This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

Bicycle Day February 29th

MOTOR CYCLE ILLUSTRATED, incorporating the Bicycling World & Motorcycle Review, is heartily in sympathy with the plan to take advantage of the odd day in the leap year by making it a National Bicycle Day. The idea is as ingenious as it is practical, and the publishers of this journal propose to do all in their power to help make it a success.

In order to insure the desired consummation, the most energetic co-operation of cycle dealers in all parts of the country is absolutely necessary. We shall do all we can to enlist the moral support and the practical assistance of the thousands of cycle dealers in the United States. A special campaign will be inaugurated, concluding on Thursday, February 24th, with a big, vital and important

Motor Cycle Illustrated

Bicycle Day is a big idea, replete with splendid possibilities, and we feel safe in prophesying that the proposition will have the unanimous support of the entire cycle trades. We hasten to assure the cycle manufacturers that this journal may be counted upon to do its share toward making Bicycle Day an epochal event in the history of the industry. It is a constructive plan, and only the right sort of co-operation all along the line is needed to make it a record-breaker.

BOSCH

Gives You the Most for the Money You Pay

THE manufacturer that provides you with a Bosch-Equipt motorcycle gives you the most for your money, not only because he actually pays more for Bosch than he would for any other ignition system he could select, but because the material and workmanship in the Bosch Magneto are such that it is bound to serve longer and better than any other system now being offered—look and judge for yourself. The motorcycle maker pays more—the material is better, the workmanship more exact, the number in use greater—all these facts are the reasons why you get the most for your money when you buy a Bosch-Equipt motorcycle.

Be Satisfied

For that feeling of confidence
For that extra ounce of power
For that vim, vigor and snap

"The People Buying Smith Motor Wheels Are Of The Better Class"

Most of our Dealers tell us

AND better class trade means more money, bigger profits, quick payments. Also higher priced and more profitable sales of bicycles, special handle bars, saddles, lamps, horns, etc. which sell along with Motor Wheels. Isn't **that** the kind of business you **want**?

The Smith Motor Wheel is the only bicycle motor on the market that is detachable. It can be attached to a boy's or girl's, man's or woman's bicycle. Your market with the Smith Motor Wheel is not limited to only men and boys. And because of the absence of vibration, its absolute cleanliness, freedom from mechanical troubles and great economy, it appeals to both sexes, all ages.

The Smith Motor Wheel is **thoroughly** practical and efficient, and is made of the very finest materials in every detail. The question always asked is: "It is made so well how can it be sold for $60?" Out one whole year with thousands in use all over the country, its ability has been successfully demonstrated, and its market is established. So take the Smith Motor Wheel agency for 1916. At least write for our 1916 Profit Proposition To Dealers. Tell us the lines you handle and the size of your business. Address:

24,960 Deliveries at 2½ Cents Each

THAT'S a twelve months record of one Harley-Davidson three-speed twin with sidevan. The delivery cost of 2½ cents included every item of maintenance, such as gasoline, oil and repairs, and even included the driver's wages.

All the details are given in a new sidevan folder we are about to issue for the use of our dealers to follow up commercial prospects, and which will be ready for distribution in quantities to Harley-Davidson dealers January 15th.

Public service corporations, together with retail merchants both large and small, while they are fast coming to realize that the sidevan is in a class by itself for economy, demand specific costs before they will give sidevan delivery a tryout. Figures talk, and an authentic record like this, featured as we are featuring it, in a good strong folder, is bound to help our dealers sell more Harley-Davidson motorcycles and sidevans.

More and more sidevans are being sold every day, and we are doing what we can to help our dealers get their share of this commercial business, which some Harley-Davidson dealers already consider the most important end of their business.

The Dealer, the Lightweight and the Belt Drive

ON the success of the Lightweight Motorcycle largely depends the future of the dealer—more sales are necessary and larger fields essential—that is the dealer's problem.

The Lightweight Motorcycle, "Everyman's Pleasure Vehicle," is the solution of the problem. Being more easy to handle and with a selling price more in keeping with the average income, the possibilities of increased sales are considerably enhanced.

Any Lightweight Motorcycle, however, is not the solution of the problem. To be satisfactory, it must be simple in design, easy to handle, smooth running, clean, and reasonably priced. In a word, it must have belt transmission.

Belt drive Lightweight Motorcycles are bound to be ideal motorcycles, not only because all the power required will be delivered to the back wheel, but because the enjoyment of touring will be enhanced by cushioning jolts and jars and reducing the strains and vibrations of uneven roads and pavements. But a belt drive motorcycle cannot be as you require or desire it, cannot have a transmission that is long lived, efficient and waterproof without a close scrutiny of the belt itself.

Select now the Lightweight you are going to sell, but be sure it is a **Belt Drive Lightweight** and then be positive that the belt is a

One Tire—One Quality
One Price—One Guarantee

An enormous possible market for the bicycle has been held back because of unreliable tire quality and unreasonable prices.

Bicycles are better made today than ever in their history. Bicycle prices are lower. But poor bicycle tires have proven one real stumbling block in increasing bicycle sales.

The Goodyear Tire & Rubber Company has a bicycle tire policy that wipes out the last objection to a bicycle purchase.

There is only one Goodyear Single Tube Bicycle Tire, the Blue Streak—a white tire, with a blue streak on each side. All effort and efficiency go into the making of that one tire. With all this better quality, Blue Streak Tires can be made at a very much lower cost because of tremendous output.

Then Blue Streaks are sold on a one-price basis; one price to all dealers, whether 10 pairs or 100 pairs are ordered. And one price to consumers, $2.50 per tire.

One guarantee covers the Blue Streak Bicycle Tire. If a single defect develops the dealer makes good to the rider and we make good to the dealer. No arguments or adjustments are necessary. We give you a new tire free.

This is the square deal Goodyear policy toward dealer and rider. It has already been accepted by over 7,000 bicycle dealers in the country. We will gladly send you on request complete dealer proposition, with your prices and profits.

CYCLE MEN RALLY FROM FAR AND NEAR FOR TWO DAYS OF MEETINGS AND MID-WINTER LUNCHEON

Meeting of Directors of Cycle Jobbers' Association of America Starts the Ball Rolling with a Vim and Divers Sessions and Conferences Will Follow in Rapid-Fire Order; Show Dates to be Decided Upon and Much Other Important Business in the Air.

NEW YORK, Jan. 5.—Old Dad Knickerbocker is greeting today the most energetic and wide-awake crowd of cycle trade boosters that it has been his good fortune to entertain in a long time. They are on hand from practically all parts of the country to attend the mid-winter luncheon of the Cycle Parts and Accessories Association at the Hotel Astor, and to participate in the meetings and conferences scheduled for today and tomorrow.

Optimism and good nature are running fifty-fifty as outstanding attributes of the trade visitors, and it is safe to say that the business program which was opened this morning with a session of the Directors of the Cycle Jobbers' Association of America and which ends tomorrow afternoon with the meeting of bicycle manufacturers to discuss the recommendations of the Organization Committee, will be the most fruitful ever held in more than one respect. There is plenty of important business to be taken up and the

BUCKNER WINS GEORGIA'S TITLE RACE

Lineup for the 25-Mile Georgia Championship Event; Insert Shows Leonard G. Buckner, the Winner; Second from the Left in the Lineup Is Harry Glenn, Victor in the 10-Mile and in the 3-Mile Match Races

SAVANNAH, Ga., Jan. 1.—Before an enthusiastic crowd of three thousand people, Leonard G. Buckner, formerly of Savannah but now of Macon, astride an Indian single ported motor won the 25-mile Championship Race of Georgia here today. J. S. Cafiero, on a Harley-Davidson was second and Harry Glenn, on an Indian, was awarded third money.

Glenn Captures Ten Mile

In the 10-mile event, Harry Glenn, on an Indian, of Atlanta, won with ease, while second went to Edward Wilcox, of Atlanta, and third to Leonard Buckner, of Macon. All were riding Indian machines.

In the match race between Glenn and Buckner of three miles, Glenn with his four valve was an easy winner.

At the start of the 25-mile event for the championship of the state, five riders faced the starter, Martin Schroder, on a ported Thor, and J. S. Cafiero, on a Harley-Davidson, represented Savannah; Harry Glenn with his four valve and Edward Wilcox with his "blue" rim, hailed from Atlanta, and Leonard G. Buckner, with a ported Indian, represented Macon.

After a flying start, Glenn started at once to win out by taking the lead into the first turn followed by Wilcox, Buckner, Schroder and Cafiero. These position were retained by the riders with Glenn increasing his lead every lap until the thirteenth lap, when Glenn was put out of the running by losing a push rod.

With Glenn gone the lead fell to Wilcox and his Indian with Buckner second, Schroder third and Cafiero fourth. These riders did not change position again until the twenty-first, when Wilcox fell out with a broken valve. The lead now going to Buckner with Schroder in second and Cafiero in third.

During the contest the cylinder of Cafiero's motor cracked, but he continued to ride.

Only Three Left in Race

With only three machines now running at the end of the twenty-third lap, Schroder overtook Buckner and, before the yelling of the numerous fans present, started to increase his lead. But on the following lap Buckner showed beautiful head work on the turns and overtook Schroder again; the riders this time entered the turn, passing the stand abreast.

Excitement was running high. As Schroder entered the home stretch turn trying to catch Buckner, his motor either skidded or hit a soft spot, and he was thrown from his mount. However, he was not injured, though the machine was damaged so that he could not re-enter.

With Schroder retiring on the thirty-second lap, Glenn now re-entered the contest, being many laps behind. Buckner was sure for first place with several laps ahead of Cafiero, who was in second position, with at least a fifteen-lap lead over Glenn.

Buckner Used Old Mount

The motor that Buckner rode was known as the "home made machine." It was purchased by R. R. Oakman, the local Indian dealer, for $25. After porting the cylinder and giving it the necessary once over it showed seventy miles an hour.

The racing of Glenn was keenly watched by the spectators after he re-entered the contest. He showed expert ability in rounding the turns and in handling his motor. He gave the racing enthusiasts of Savannah a splendid demonstration of real fast skidding on turns.

Financially, the Savannah Motorcycle Club found the meet a big success. It is now rumored that the club will hold a tri-state championship meet, including the states of Alabama, Georgia and South Carolina, on February 22.

The summaries:

25-mile championship event: First, Leonard G. Buckner; second, J. S. Cafiero, Harley-Davidson; third, Harry Glenn, Indian. Time: 33:05.

10-mile: First, Harry Glenn, Indian; second, Edward Wilcox, Indian; third, L. G. Buckner, Indian. Time: 12:30.

3-mile match race: Glenn, Indian. Time: 3:57.

NEW HARLEY-DAVIDSON HEAD IN LONDON

MILWAUKEE, Wis., Jan. 3.—Duncan Watson, of London, assumed full charge on January 1 of the Harley-Davidson Motor Co., Ltd., of London, his title being managing director. Mr. Watson succeeds Victor S. Welsford. The London company handles the foreign business of the Harley-Davidson Motor Co., of this city.

Present indications point to an unusually active 1916 season for the London headquarters, and a campaign has been perfected for giving the Harley-Davidson line very energetic representation.

Mr. Watson is of the opinion that a new era is opening abroad for American motorcycles and he looks forward to making the most of the unusual opportunities now presenting themselves.

Digitized by Google

17 PORTLANDERS FINISH ALL-NIGHT GRIND

PORTLAND, Ore., Jan. 4.—Plunging through a heavy snowstorm and slithering over roads next to impassable in places, twenty-three hardy motorcyclists who entered the New Year's eve endurance run of the Portland M. C., added a decidedly interesting chapter to the achievements of roadsters in the Northwest. Inability to see, because of the storm and the terrific condition of the course, caused many falls, but seventeen of the entrants managed to finish.

The contestants covered 250 miles over a 50-mile circuit, from Portland to Troutdale, to Rockwood, to Gresham and return to Portland.

According to the most reliable information obtainable at this writing the perfect scores were as follows: Ed. Berreth, Indian; Hardy Kurtz, Indian; Ed. Carlson, Indian; C. Davidson, Harley-Davidson and sidecar; Archie Rife, Harley-Davidson; Fred Gilbert, Harley-Davidson; "Swede" Harley-Davidson; Dustin Farnam, Flying Merkel; Gus Pepple, Harley-Davidson; Henry Klein, Harley-Davidson.

The others who finished, but with damaged scores were as follows: Joe Freeze, Harley-Davidson, 998; L. Zehr, Indian; H. Hadfield, Harley-Davidson, Howard Lystul, Indian and sidecar, Walter Erickson, Reading Standard, Charlie Excelsior, 943; Fred Gilbert, Indian, 887.

It is said stated that only six entered to perfect scores, but a report explained that the club made concessions owing to the weather conditions, and entrants arriving one or two minutes late were officially included with the list of perfect scorers.

Dustin Farnam, the Flying Merkel rider, was awarded the cup for the most consistent performance.

Special credit is given Henry Kurtz and Ed. Berreth for their daring roadwork, and Archie Rife is also mentioned in the "order of the day" for valiant work with his Harley-Davidson and sidecar. Howard Lystul, Indian and sidecar, rode 200 miles with a broken handlebar. Kurtz and Berreth are said to share the honor of having made the run without a fall.

Fred Gilbert had a close call when he collided with an automobile near Gresham. He was badly shaken up and the motor was torn from the frame of his Harley-Davidson. Repairs were made, however, and Gilbert managed to finish.

NEW JERSEY M. C. HAS A NEW YEAR'S RUN

NEWARK, N. J., Jan. 3.—Five sidecarists and one solo rider represented the New Jersey M. C. on its New Year's Day run last Saturday. The destination was Englishtown, N. J., in place of Greenwood Lake as originally scheduled. Weather conditions, in which heavy snow figured, were not sufficiently attractive to many who originally announced their intended participation in this annual club fixture.

The start was made from the clubhouse on South Broad street at 9 a. m., and the sextette were soon enjoying snow-plugging on Essex county roads. On arriving at Englishtown, in the south-central part of the state, dinner was partaken of, and soon after a start was made for home. The party checked out at Bush's Harley-Davidson establishment on Halsey street at 6 p. m.

Those who participated were Elliott B. Holton, New Jersey state commissioner, Harley-Davidson sidecar; Jack Neiss, Indian sidecar; Arthur Herrington, Harley-Davidson sidecar; Arthur Warburg, Harley-Davidson sidecar; Walter Smith, Harley-Davidson sidecar; W. McCracken, Harley-Davidson solo.

ASKS REGULATIONS FOR ALL CYCLE SHOPS

NEW YORK, Jan. 3.—After an inspection of 67 places where motorcycles are stored in this city, Commissioner of Accounts Wallstein is urging the adoption of an amendment to the city ordinances to eliminate danger of fire in such places. He states that there is no fire prevention ordinance applicable to the premises used in keeping the motorcycles, and that there was evidence of considerable negligence of common precautions against fire in many of the places.

Of the premises referred to in the commissioner's report to Mayor Mitchel, 35 were in tenement houses inhabited by from 9 to 290 persons. Three of these tenements were of frame construction. One shop was just under a dance hall of flimsy construction, while another was in a six-story building, part of which was used as a factory employing 80 hands. Thirty-seven of the places had oil-soaked wooden floors, and most of these had gas stoves or gas heaters with open flames. There were blow torches in use without adequate precautions in most of the places.

"Many lives are endangered by such conditions," said the commissioner, "and the sooner regulation is imposed, the better. In Chicago such establishments are subject to the same regulations as garages. In view of the necessity of a similar provision here, it is suggested that an appropriate committee of the Board of Aldermen, in co-operation with the Fire Department, draft an amendment prescribing adequate regulation of premises occupied as commercial or club establishments for the storage and repair of motorcycles.

"Upon the enactment of such regulation, the Fire Department should receive means to employ two or three additional inspectors for the new duty imposed on the Bureau of Fire Prevention. The salaries of these inspectors would be offset by the permit fees to be paid by proprietors of the establishments."

SOLD 19 CYGNETS AT SHOW

NEW YORK, Jan. 4.—Leadley Ogden, of the Cygnet Rear Car Company, of Buffalo, N. Y., reports the sale of 19 Rear Cars from the floor of the Grand Central Palace at which the firm has an exhibit during the New York Automobile Show. He states that the Rear Car is giving every evidence of becoming extremely popular throughout the East and expects that its use will become universal throughout the United States.

CHAMPION SALESMEN MAKE THINGS HUM

TOLEDO, O., Jan. 3.—In the accompanying photograph are seen the boosters who participated in the annual convention of salesmen of the Champion Spark Plug Co., held in this city December 27-30. Standing first and second in the line are: President R. A. Stranahan and Treasurer F. D. Stranahan. Next to last in the line stands Sales Manager F. B. Caswell, and at the end is Advertising Manager H. L. Corey.

The convention was the most enthusiastic and fruitful ever held by the Champion Company, and some idea of its scope may be obtained from the following highlights. The convention opened on Monday, December 27, with greetings by Sales Manager Caswell; then came the reception by the president and treasurer; routine work with the sales department; group work with the Advertising Manager; discussion of the financial situations in various sales districts; luncheon. Afternoon program—inspection of plant, conducted by R. A. Stranahan; sales department conference; dinner at the Commerce Club; theatre party, and at 11 p. m. "a wee bite wi' a mug o' ale."

On Tuesday the program opened with individual conferences between the salesmen and Sales Manager Caswell; then came a Round Table discussion, followed by luncheon in the Champion restaurant. The afternoon session opened with another Round Table talk, on special subjects allotted by the sales manager; an address by Advertising Manager Corey followed and then came a selling talk by H. W. Biddle, supervisor of sales. An automobile ride to the Inverness Club occupied the hour from 6 to 7 p. m., and from 7 to the "wee sma' hours," there was a banquet at the club.

Wednesday opened with official work by the sales department and from 10:30 to 12:30 the salesmen enjoyed special Champion "movies" on board a parlor car which was carrying them to Detroit. The party had luncheon at the Detroit Athletic Club and then followed an inspection of the Jeffery-DeWitt porcelain plant in Detroit, under the guidance of M. DeWitt. This occupied most of the afternoon, and Champion hustlers reparted at the Frontenac restaurant for dinner. Later there was an entertainment, featured by the Champion quartette.

NEW ZEALAND VISITOR AT DAYTON PLANT

DAYTON, Ohio.—H. L. Rogers, of the firm of E. Reynolds & Company, Wellington, New Zealand, spent a few days at the Dayton factory last week. E. Reynolds

Rogers Sampling Sidecar Comfort

& Company are distributors for the whole of New Zealand for the Dayton motorcycles. Mr. Rogers, who is in this country for the purpose of becoming personally acquainted with the various manufacturers whom he represents, is greatly pleased with the outlook for business during the present season in the islands. He reports that conditions are prosperous and that there is a great demand for motorcycles. Those of American manufacture are becoming better known and are greatly liked.

Mr. Rogers was greatly pleased with what he saw at the Davis Sewing Machine Company's plant and gave a careful inspection to the many improvements on the 1916 models.

The photograph shows Mr. Rogers after a short ride with a 1916 Dayton three-speed and a Majestic sidecar. He has made arrangements with the factory for liberal shipments to begin after the first of the year.

PERFECTING WESTFIELD EXPORT SHIPPING SYSTEM

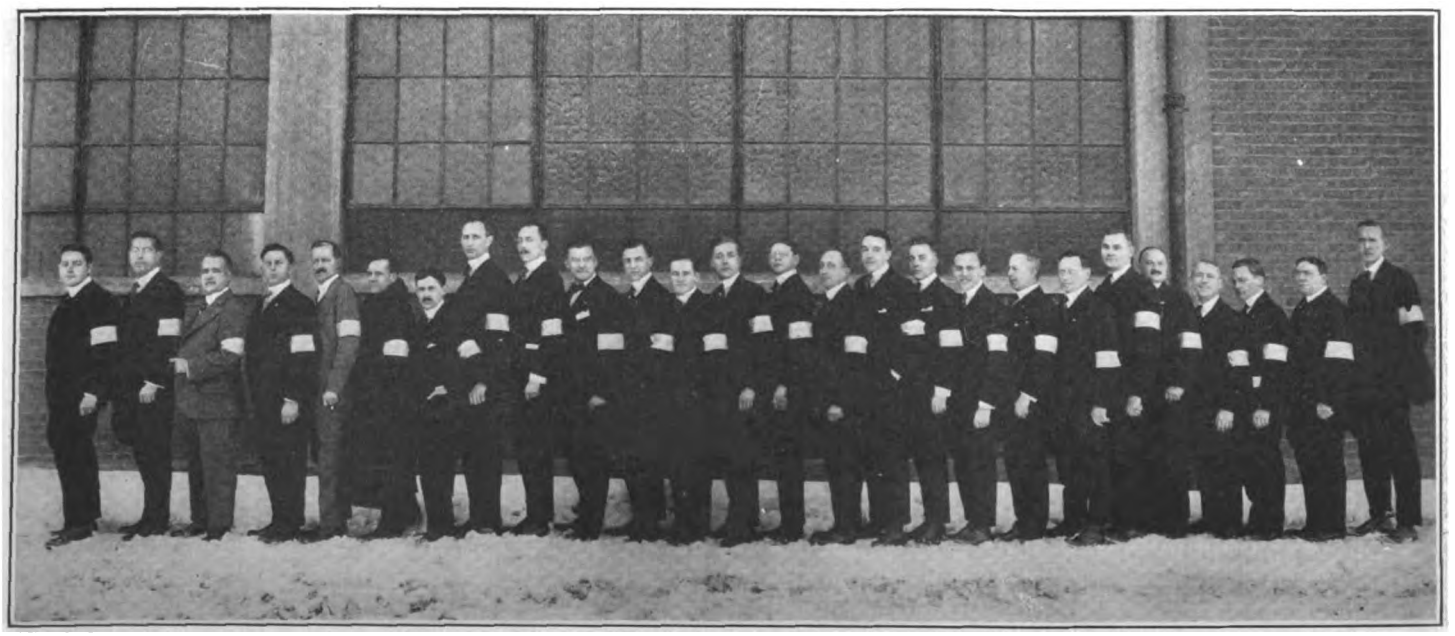
WESTFIELD, Mass.—Having made a painstaking study of packing requirements for export trade, the Westfield Mfg. Co., producer of the Pope motorcycle and bicycle lines, fully appreciates the importance of this feature and every cycle shipped from the Westfield plant carries with it an invitation in English, Spanish and French for the recipient to suggest methods of improving export shipping conditions.

The Westfield company feels that its system is well-nigh perfect, but it is anxious to profit by the first-hand experience of the trade men in the various foreign countries, and welcomes any pointers that will facilitate the passage of its goods from this country to the markets abroad.

BIG ORDER FOR BERLINGS FROM ITALIAN AUTO MAKER

BUFFALO, N. Y.—A contract running into thousands of machines has just been placed by the Fabbrica Italiana Automobile di Torino, maker of F. I. A. T. cars, in Torino, Italy, for Berling magnetos. The contract is now being filled by the maker, the Ericsson Manufacturing Company, of this city.

The requirements of the contract call for "B" four-cylinder type Berlings and N-44 type four-cylinder models. The B-41 model, which constitutes a large part of the order, is designed especially for four cylinder motors up to 4 inch bore. Like other type of Berlings, this machine has the same features of versatility, rapidity of action, rigidity and accessibility of construction.



Sales Boosters for the Champion Spark Plug Company on the Occasion of Recent Three-Day Conference in Toledo, O. Item Above

Ziegler, engineer Bosch Magneto Company; Mr. Tipton, Carl Spoerer's Sons Company, Baltimore, Md.; H. P. Woods, Ozburn Automobile Supply Company, Memphis, Tenn.; L. Wissler, Herring Motor Company, Des Moines, Ia.; T. F. Fealy, Motor Parts Company, Philadelphia, Pa.; A. Matheson, Motor Parts Company, Boston, Mass.

PLAN TO SELL 4,000,000 U. S. TIRES THIS YEAR

NEW YORK, Jan. 3.—If the expectations of the United States Tire Company are realized during the current year, the sale of its tires will foot up to not less than 4,000,000 and about the same number of inner tubes will be disposed of. These estimates are based upon the present rate of production and upon a careful survey of the possibilities that confront the company for 1916. J. C. Weston, general sales manager of the company, sees nothing farfetched about the predictions and looks forward confidently to the disposal of the 8,000,000 casings and tubes.

It is explained that the sales records for September, October and November, 1915, convince the officers of the company that they will pass the 4,000,000 mark for tires during the current twelvemonth, and that the tube sales will not lag behind this amazing figure. The company roughly estimates that no less than 14,000,000 tires will be needed to meet all demands.

CHAMPION AT HOTEL ASTOR

NEW YORK, Jan. 3.—Instead of exhibiting at the New York Automobile Show, the Champion Spark Plug Co., of Toledo, Ohio, is holding open house at the Hotel Astor during the show week. All the dealers who visit the company's quarters there are given attractive souvenirs.

EXHIBITS OF INTEREST TO MOTORCYCLISTS IN THE CURRENT NEW YORK AUTOMOBILE SHOW

A GENIAL ECLIPSE GROUP GREETS CYCLE MEN

WHEN motorcycle and bicycle riders crowded about the stand of the Eclipse Machine Co., of Elmira, N. Y., they found that automobilists only were being catered to at the New York Motor Show. This kept the company's officials busy talking of their cycle lines, and showing catalogues instead of the real samples.

Ready with the glad hand at the booth were E. J. Dunn, president; L. S. White, secretary-treasurer; J. C. Furgerson, general manager; A. C. Rice, sales manager; J. B. Lavinge, G. A. Christopher and T. C. Sales.

OGDEN DIRECTING CYGNET STAND AT AUTO SHOW

NEW YORK, N. Y., Jan. 3.—Friends of Leadley Ogden, of the Cygnet Rear Car Company, of Buffalo, N. Y., will be pleased to hear that he is actively engaged in supervising the Cygnet exhibit at the Grand Central Palace Automobile Show this week. He has practically recovered from his injuries at State Ford, Pa., on December 24, and is about with his old-time vigor.

In speaking of the affair to a representative of **Motor Cycle Illustrated,** Mr. Ogden stated that the locomotive striking the sleeper in which he was berthed hurled him to the floor of the car and he was unconscious for over 24 hours as a result. It was feared that he was internally injured, but such was happily not the case. He expects to regain his full health in a short time.

SPEEDOMETERS AND LONG HORN IN J-M LINE

JOHNS-MANVILLE and Narco specialties are features at the stand of the H. W. Johns-Manville Company, of New York. The J-M line includes spark plugs and speedometers, the latter being constructed on the well-known Jones centrifugal principle. The Long Horn, for both motorcycles and automobiles, is another attractive line at this exhibit. The Narco specialties include valve-grinding and other compounds.

C. H. Walls is in charge, assisted by H. J. Moynihan and others.

BULB AND MECHANICAL HORNS AT NONPAREIL BOOTH

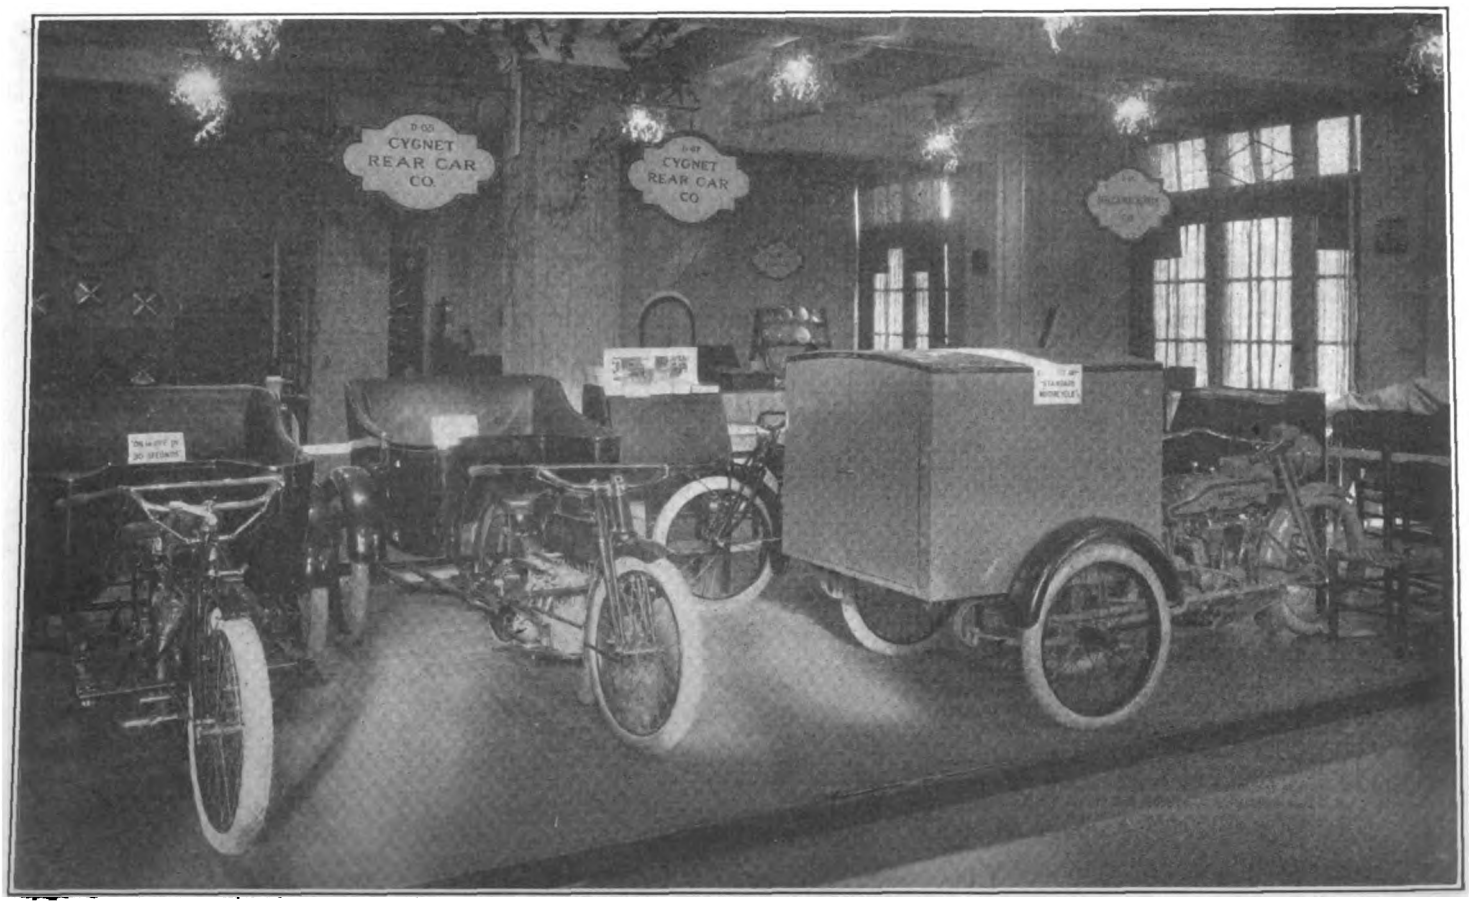
NONPAREIL horns in bulb and mechanical types are shown in a number of styles at the exhibit of the Nonpareil Horn Mfg. Co., of 73 Wooster street, New York. The line includes signalling devices for bicycle as well as for motorcycle and automobile. The mechanical horns are headed by the Model A, in which the mechanism for giving the sound is set in motion by turning a knob or wheel at the rear of the body. The motorcycle bulb horns are of the trumpet and coil types. A line of motorcycle headlights, mostly in six inches diameter, is also shown, these bearing the Nonpareil brand.

Lincoln Kauffman is in charge of the exhibit, assisted by an able staff of salesmen.

PLEASURE AND COMMERCIAL MODELS OF CYGNET

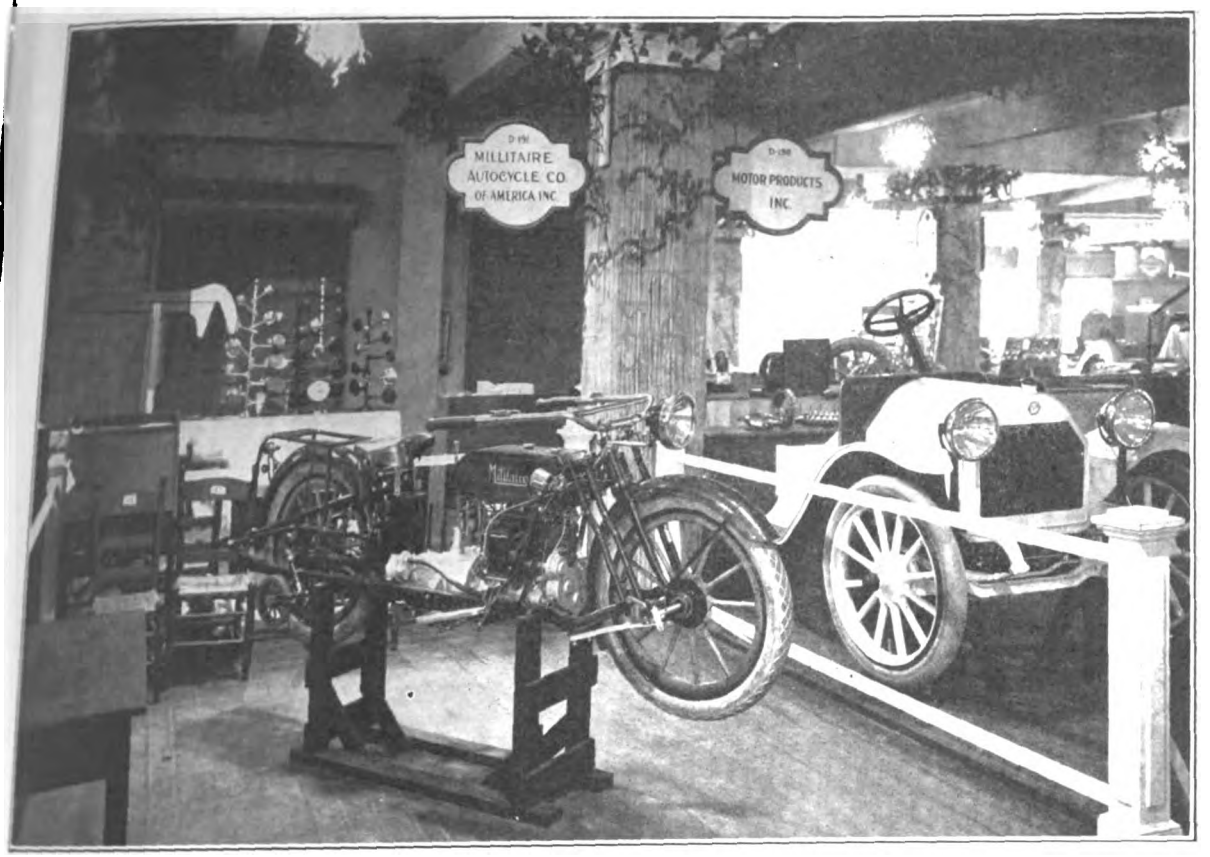
FOUR Cygnet Rear Cars are shown at the exhibit of the Cygnet Rear Car Company, of Buffalo, N. Y., these being attached to motorcycles and finished to correspond with the machines themselves. Two of these cars are the firm's passenger type, or Model A, these being attached to Indian and Henderson machines. A third is the Model B, or commercial Rear Car, with high body and covered top; this is fitted to a Harley-Davidson mount. The fourth, a Model C commercial car, is of smaller capacity than Model B and is shown hitched to an Indian model.

In charge of the exhibit is Leadley Ogden, general manager of the firm, with Irving Barnard, Calvin Webber, Wallace Stuart and Fred Bertolini as assistants, the latter being from the New York Sporting Goods Co., metropolitan distributors.



Spaces Devoted to Display of Cygnet Rear Cars in Grand Central Palace; Two Pleasure and Two Commercial Models Are Shown

Digitized by Google



Illustrating the Only Regular Motorcycle Exhibit at New York Auto Show, That of the Militaire Autocycle, Which Drew Crowds

ONE model of the Militaire Autocycle is attractively staged at the stand of the Militaire Autocycle Company, of Washington avenue, Buffalo, N. Y., and has the distinction of being the only motorcycle regularly exhibited as such in the Grand Central Palace. It is the center of an admiring crowd at all times and the staff of attendants is kept busy explaining the functions of the idler gear and other features which distinguish this make from others in the motorcycle market. The Militaire has three speeds forward and a reverse, a four-cylinder motor in unit with the gearset, chain drive and a pressed steel frame. The front fork is special, as is also the mounting of the rider's seat.

President N. R. Sinclair is at the Militaire stand, with D. F. Aitken, B. E. Carter and J. M. Hollett as assistants.

GAS TANKS AND BATTERIES FOR PREST-O-LITE

At the extensive exhibit of the Prest-O-Lite Company, of Indianapolis, Ind., are to be seen dissolved acetylene tanks in a variety of sizes and capacities. Of particular interest to motorcyclists is a section of a typical Prest-O-Lite tank showing the cellulose in which the acetylene and acetone are held until ready for use by opening the cock. Novel adaptations, such as utilizing the tanks for portable skating or other lights, and for emergency work, are a feature of the exhibit.

The storage battery line, which was put out a short time ago by the firm, an accumulator of 2 volts, 30 amperes, is shown for motorcycle service. In charge of the exhibit is General Manager S. M. Cooley, assisted by W. C. Carpenter, of the sales department; H. E. Komitch, organizer of sales; and Engineer H. S. Smith.

STANDARD SPEEDOMETERS FOR MOTORCYCLES DISPLAYED

THE Standard motorcycle speedometers attracted the attention of the visitors to the booth of the Standard Thermometer Co., of Boston, Mass. The new type C speedometer was on display, which differs from the type A in that the rigid tube and case is discarded for a flexible casing which is held against the frame a few inches below the fork crown by a swivel clamp. This new type C front drive speedometer is used on machines having oscillating action at the axle, while type B is intended for motorcycles having front forks wholly or in part a unit with the front axle.

In attendance at this booth were S. H. Figley, C. E. Atwood and Mr. Whitaker.

"BOUGIE MERCEDES" APPEARS AT HERZ STAND

THE "Bougie Mercedes," the blue enamel stone spark plug, made by Herz & Co., of New York, is being displayed for the two-wheeler enthusiasts at this company's booth. The outstanding feature of the plug is the fact that the insulation is made of blue enamel stone, baked at a temperature of 2,000 degrees, which will withstand high temperatures without breaking. Welcoming show visitors in the Herz booth are W. B. Wheeler, A. H. Eckstein, and A. L. Shoenstein.

BIG LAMP DISPLAY AT NEAT B. & L. EXHIBIT

AMID the numerous models of electric and acetylene head and tail lamps at the stand of the B. & L. Auto Lamp Company, of 507 West 35th street, New York, are models 31 and 25, motorcycle gas headlights, in both black and nickel and all-nickel finishes. The model 31 is a one-piece lamp and is fitted with a 4¼-inch Mangin mirror. It has a flanged front. The model 25 has a one-piece body also and a 5-inch Mangin mirror, the front being 7½ inches in diameter. Electric spotlights are also shown.

Alexander Backer, F. I. Israel and Nathan Brown are in attendance at the stand of this company.

BERLING MOTORCYCLE AND AUTO MAGNETOS

BERLING magnetos in ten different models make up the exhibit of the Ericsson Manufacturing Company, of Buffalo, N. Y. Two of the models are for motorcycle ignition, single and twin types, while a third, the N-44, is that employed on the Henderson models as standard equipment. Automobile type machines shown are the B-61 and A-61 for six-cylinder motors; the B-11 and A-41 for four cylinder models, and two models for eight-cylinder ignition, one of which is adapted to give two sparks.

In charge of the stand is J. L. Brothers, assisted by Sales Manager T. S. Hemenway and E. A. Valance. W. C. Berling came in early in the week to lend his aid in explaining the magneto matters.

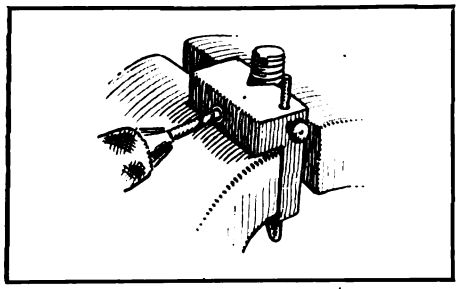
DRILL GAUGE AND GREASE GUNS FOR STEVENS

AS has been the custom at former shows, Stevens & Co., of 375 Broadway, New York, is present with a line of useful novelties, and among these are a hand vise with clamp, a cap-screw drill gauge, a new grease gun and a fibre-bodied oil gun. The hand vise



is the familiar article brought out by the firm several seasons ago, but the clamp is new and enables the user to attach the vise to a part of the machine or to a table and thus employ the vise as a bench article. The drill gauge is unique; it consists of a block having a V-groove in which rests the screw to be drilled for cotterpin. There is a wire fitting at one end which can be moved to regulate the position of the screw end in order to get the hole in the proper place. The drill hole is bushed to ensure accuracy.

The new grease gun has a pistol handle and the plunger is moved by drawing on a trigger. The gun is nickel-plated all over and has a separate oil nozzle as part of the equipment. The fibre-bodied gun is very useful, as the fibre is unaffected by oil or grease and this guarantees its long life.

J. M. Morse, A. Horn, J. Proudfoot and W. McGuckin are in attendance to explain Stevens goods.

MAG-DYNAMO AND DIXIES FOR SPLITDORF

DIXIE magnetos and the Splitdorf Mag-Dynamo are features of interest to motorcyclists at the stand of the Splitdorf Electrical Company, of Newark, N. J. The Dixie magnetos are shown in single, twin and four cylinder types and in the Model 11, for lightweight ignition service. The Mag-Dynamo is displayed on a stand which shows the operation of both the lighting and ignition circuits. Splitdorf spark plugs are also on view, as well as a line of automobile Dixie magnetos and electrical apparatus.

Advertising Manager D. R. Walls is in charge of the exhibit, assisted by Michael E. Toepel, J. D. Bridges, J. O'Hara, William Martin, E. H. Mendell, G. Nielsen and W. Garrett.

SCIENTIFIC COLORS IN MICALITE AND ALLWON GOGGLES

MICALITE and "Allwon" goggles in a variety of shades are to be seen at the stand of Strauss & Buegeleisen, of 489 Fifth avenue, New York. The Micalite goggles are displayed in clear, amber, Euhpos green, clear bottom and amber top, amber bottom and dark amber top, and clear bottom and Euphos green top. The substance used in each case is unburnable. Each goggle has a rubber binding and rubber bands to keep it in place.

L. Strauss and Elias Buegeleisen are in charge of the exhibit, with Joseph Buegeleisen as assistant.

NEW PUMP CONNECTION AT SCHRADER STAND

OF special interest in the booth of A. Schrader's Son, Inc., of Brooklyn, N. Y., is the new pump connection which obviates the necessity of detaching a pump from a tire when it is desired to test the air pressure. This little service may be attached to any pump and is very simple in construction. There are also being shown the regular line of valves and pressure gauges.

Receiving show visitors are B. W. Yockers, M. H. Tisne, J. J. Kuhl and M. Bendel.

CHAMPION SPARK PLUGS IN TWO TYPES

TWO types of Champion spark plugs are being shown at the booth of the Champion Ignition Co., of Flint, Mich., one being the "Metric" porcelain plug, with a short reach and insulation, which is available for nearly all makes of motorcycles, and the other being the long "AC-CICO" porcelain plug, with a longer reach and insulation, which is made especially for the Harley-Davidson motorcycle.

In this booth are B. D. Taliferro, H. R. Joyce, A. C. Champion, and F. D. Hayes.

RENOLD CHAINS AND ELECTRIC STEEL AT FRASSE BOOTH

RENOLD chains and parts relating thereto are among the most interesting exhibits at the stand of Peter A. Frasse & Company, Inc., of 423 Canal street, New York. The chains are shown in all sizes for both bicycle and motorcycle transmissions, each being plainly marked as to its dimensions, etc. A novelty is a folding steel horse or trestle, shown as a model only, this trestle being for use in garages and repair shops. Frasse-Electric steels, a new product, are also on display.

The Frasse exhibit is in charge of John R. Cautley.

JAY & DEE SHOW EYE SHIELDS AND A TESTER

FEATHERWEIGHT eye protectors and a number of other novelties are to be seen at the exhibit of the Jay & Dee Specialty Company, of 41 Park Row, New York, The eye protector may be had in sets of three, one being in invisible white and the others in amber and green respectively. The protectors fold readily for convenience in carrying and adapt themselves to any wearer. The Economic compression tester and tire gauge consists of a fitting for the spark plug aperture which combines a registering device. There is a connection to this fitting to connect with a tire when the gauge is to be used for determining pressure in that part of the machine. A novel watch clamp is also shown.

SPEEDOMETERS ATTRACT AT CORBIN DISPLAY

CORBIN-BROWN speedometers form the chief features at the stand of the Corbin Screw Corporation, of New Britain, Conn. There is an excellent demonstration of both front and rear drives for these speedometers in the form of a motorcycle frame with the instruments attached, the wheels being driven by an electric motor. The flexible shafting of the link type used in driving the Corbin-Brown instruments is also demonstrated.

In charge of the exhibit is A. H. Harrop, assisted by S. E. Barton and W. C. Brown, the latter being the designer of the speedometers.

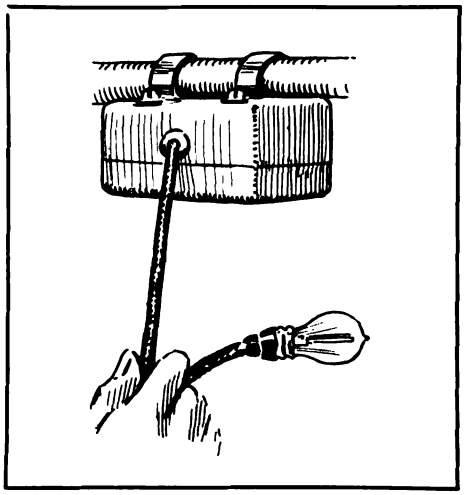
SILVEX SHOWS MANY PLUGS OF BETHLEHEM MAKE

BETHLEHEM sparkplugs in wide variety to fit any conditions of ignition, are to be seen at the exhibit of the Silvex Company, of 171 Madison avenue, New York. The motorcycle plugs shown have mica cores and are in metric 7/8 and 1/2-inch standard sizes. The electrodes on these plugs are 97 per cent. pure nickel, while India mica is utilized for the cores.

Messrs. F. S. Murray, C. C. Heffley, C. E. McCabe and Alfred Redick are in attendance at this stand

AUTOMATIC INSPECTION LAMP AND LIGHTER

ONE of the novelties at the Show is the electric inspection and sign-reading lamp at the stand of the Automatic Cigar Lighter Company, of 556 West 27th street, New York. This lamp is normally at rest in an aperture in a nickel-plated battery casing slung from



the handlebars, but has a flexible cable attached thereto. When drawn out of its aperture the lamp is lighted and can then be used for inspection, etc. A cigar lighter for the motorcycle or automobile is constructed along the same lines. The cable is under spring tension, so that on releasing it, the lamp is drawn into the aperture and the light or cigar lighter is extinguished.

Bert Lovere and Robert Wardlow are in charge at this exhibit.

CYCLE MEN GATHER FROM FAR AND NEAR FOR MEETINGS AND MID-WINTER LUNCHEON

(Continued from page 13.)

... are keyed up for action—with a ...

... o'clock this morning the Directors ... Jobbers' Association met at ... Astor. A full report on this ... printed below.

... afternoon at 3 o'clock the Standard- ... committee of the Allied Cycle ... will meet, and at 4:30 there will ... conference of committees representing ... Cycle Trades to decide upon ... the New York and Chicago

Tomorrow morning, January 6, at 10 o'clock, there will be a meeting of the Cycle Jobbers' Association of America, and at 1 p. m. the mid-winter luncheon of the Cycle Parts and Accessories Association to the Cycle Jobbers, Motorcycle Manufacturers and Bicycle Manufacturers will be given at the Hotel Astor.

At 3 p. m. tomorrow the bicycle manufacturers will meet to take action on the recommendations of the Standardization Committee, which has been at work for months past. This will close the program.

CYCLE JOBBERS ACT ON NEW MEMBERS AT BUSY NEW YORK MEETING

NEW YORK, Jan. 5—The directors of ... Jobbers' Association of Amer... meeting at 10:45 this morning at ... Astor at which a number of ... interest were discussed. The ... of cycle parts was given ... attention, but no action could ... these lines until the Stand... committee, which has been at ... this past, makes its formal re... Standardization Committee is ... meet at 3 o'clock this after...

... confirmed the election to ... a number of firms previously ... Association, the list being as ... Jennings & Co., of Galveston, ... New York Sporting Goods Co., ... Elmira Arms Co., of El... Toledo Rubber Co., of Toledo, ... Westing Co., of Indianapolis.

In addition, the following have just been elected to membership: Central Rubber & Supply Co., Indianapolis; G. C. Miller Co., of Philadelphia; A. E. Bregent, of Montreal, Que.; Hyslop Bros., of Toronto, Ont.; Harris Flippin Co., of Richmond, Va. The Central Rubber & Supply Co., of Indianapolis, i the firm with which Fred I. Willis has just associated himself.

President Keyser Fry presided over the meeting and J. W. Henry acted as secretary. The others present were: J. W. Grady, F. W. Grubb, J. F. Beck and Fred I. Willis. Charles Elyea, of the Elyea-Austell Company, was expected to be on hand, but was detained elsewhere.

The President was authorized to call another meeting of the directors of the Association in the near future, and it is likely that they will meet again about May 1 to consider general business.

MANY RIDERS ARE GOING TO THE FRONT

TORONTO, Ont.—A popular recruiting wave has caught many of the motorcyclists and bicyclists of Toronto with the result that the ranks of the racing riders are becoming sadly depleted. Those who have donned the khaki during the past week or two include Roy Thompson and Dellamore, the Excelsior racing enthusiasts, and Woods who has been cavorting on Ontario dirt ovals with an Indian for several years. Harold Cole, the former Canadian champion, is also making the plunge while Newman, another speedster, has already enlisted.

William Marr, President of the Toronto Bicycle Riders' Association, became a soldier for foreign service before the close of the old year and Mr. Dawson, who sold English motorcycles in Toronto before the war, is taking the necessary steps to become an officer.

W. M. Gladish is in the uniform of the American Legion, which is now a part of the Canadian army, for which he has been detailed to do special duties.

THE FRONT COVER

THIS week's cover illustration presents a Pullman sidecar combination in attractive surroundings. The outfit won considerable attention during the recent snowstorm in Detroit, and the coziness of the third-wheeler was widely commented upon. The sidecar is gaining favor rapidly as a cold-weather vehicle in Detroit, and the Harry Svensgaard Sales Corporation, which markets the Pullman car, is doing much to help the movement along.

Late reports from Detroit indicate that sidecar sales in that vicinity will reach a new mark before the 1916 selling season is far under way.

...LEAN SCORES IN BAKERS-FIELD RUN

WILL DISCUSS PLANS FOR A BICYCLE MANUFACTURERS' ASSOCIATION

NEW YORK, Jan. 4.—At the Astor, McAlpin, Belmont and other hotels favored by the cycle tradesmen one found plenty of evidence of the importance of the forthcoming meetings, at which there promises to be large attendances despite the fact that the cycle shows are over.

At this writing, it is safe to predict certain developments, chief among them being the possibility, if not the likelihood, of the organization of an Association of Bicycle Manufacturers. In any event it is certain that this will be a leading topic of discussion, as there is not a little sentiment in the bicycle industry in favor of another effort to secure greater coöperation. The Standardization Committee, although in existence less than six months, has demonstrated that tangible results of great value to the industry can be brought about through the right sort of coöperation. Furthermore, there is, at the present time, a better spirit of harmony in the cycle trades, and the opportunity is generally regarded as a good one for bringing about an Association of Bicycle Manufacturers.

A canvass recently conducted by **Motor Cycle Illustrated** shows that the opposition to such an association is very slight, being based very largely upon the fact that previous bicycle associations have not accomplished the purposes which they set out to achieve, but most of the manufacturers do not regard this as a substantial objection.

It is likely that in setting the dates for the next National Motorcycle and Bicycle Shows, the Motorcycle Manufacturers' Association will be guided to a large extent by the sentiments of the entire cycle trades. As a result, in all probability, the shows will be held at a later date. It looks very much, also, as though two shows as heretofore, in New York and Chicago, respectively, will be determined upon.

FAIL TO GET PERMIT FOR SIDEWALK RIDING

SARNIA, Ont.—Over eight hundred citizens of Sarnia, the population of which is 10,000, signed a petition to secure the amending of the traffic ordinances to permit bicyclists to ride on the sidewalks under certain limitations, owing to the poor condition of the roads. The petition was thrown out, however.

Company since 1908 and REALLY the 1916 POWERPLUS is so far ahead of all of them that I simply had to write and tell you how I appreciate it.

I met a young fellow with an — the other day who claimed it would do 70 m.p.h., so I asked him to run me a race as I wanted to try out the new machine. He accepted and his speedometer maximum hand showed 70 m.p.h. all right, but the POWERPLUS went right by and he could not even hang on. The next day he came in my store and asked the price of the machine I was riding. I told him and he went out. I don't know what he thinks, but I have an idea.

I have sold more machines to date than ever before this early in the season. Sold two today and from present indications 1916 should be a hummer.

Yours truly,
LON CLAFLIN.

THE INDIAN DEALER WAS NEVER IN A BETTER POSITION TO CONDUCT A WINTER SALES CAMPAIGN THAN RIGHT NOW. RIG IS EFFECTIVE BOTH AS CARRIER AND PUBLICITY MEDIUM

Special Sidecar Chassis Used by Harris and Sons, of Oxford Street, London, English Representatives for the Excelsior, in Transporting Machines To and From the Agency. An Idea Well Worth Copying

MOTOR CAR EQUIPMENT CO. LEASES BIGGER HEADQUARTERS

NEW YORK, Jan. 3.—As the natural outcome of the rapid development it has enjoyed for years past, the Motor Car Equipment Co., which has had its headquarters at 55 Warren street, New York, recently took a 10-years' lease on the modern building at 18-20 West 63rd street. In the new establishment the company will have at its disposal no less than 55,000 square feet of floor space, with all facilities increased proportionately. The old quarters on Warren street will be closed. Owing to the close proximity of the new location to Automobile Row the company will be within very easy reach of the trade.

At first the company, which was organized in 1905, did both a wholesale and retail business but now confines its efforts strictly to the wholesale trade. In addition to acting as a jobber, the company also has charge of the distribution of the products of some of the large parts and accessory manufacturers, including the American Chain Co., formerly the Weed Chain Tire Grip Co., Champion Ignition Co., Diamond Chain & Mfg. Co., Kellogg Mfg. Co., Martell Aligning Reamer Co., and a number of others. Branches are maintained in Boston, Mass., and Newark, N. J. The Boston branch is the Bi-Motor Equipment Co., which was consolidated with the Motor Car Equipment Co. in the latter part of 1914, while the Newark branch was established directly.

In the new quarters in New York the company has six floors and a basement facing on Sixty-second street, and three floors and basement on Sixty-third street. The shipping and packing departments are on the main floor on Sixty-third street, where a private driveway permits trucks to enter the building, and ample elevator facilities allow of rapid loading and unloading. In the basement of the Sixty-second street building the company maintains a service station, which, with a battery charging station, is available to the trade. The salesrooms are located on the main floor of the Sixty-second street building, where there is a large display of accessories. The general offices are on the third floor.

Walter M. Taussig is president of the company; Charles F. Wiebusch, vice-president, and James A. Abeles, treasurer and general manager.

U. S. RUBBER CO. ISSUES FIVE PER CENT. DEBENTURES

THE United States Rubber Co., New York City, has issued $3,000,000 worth of debentures secured by the Morgan & Wright property, bearing interest at 5 per cent. and running for three years, maturing December 1, 1918. Lee, Higginson & Co., the bankers, have taken the notes, and will offer them to the public. The notes have been issued in order to place back in the U. S. Rubber treasury the funds advanced to the Morgan & Wright enterprise for the development of its tire manufacture, and are guaranteed as to principal and interest by the U. S. Rubber Co.

PREST-O-LITE CO. WINS IN NEWARK

NEWARK, N. J., Jan. 3.—Once more the Prest-O-Lite Co., of Indianapolis, has obtained a court decision to prevent the refilling of its gas tanks in cases where the Prest-O-Lite trade mark is not removed and specific notice given that the tanks have not been recharged by the Prest-O-Lite Co. An injunction has just been secured restraining the Newark Acetylene Gas Works from refilling the Presto tanks and selling them as genuine Prest-O-Lite refills.

The injunction was issued by the United States District Court in Newark, and was based on the decision obtained in the suit of the Prest-O-Lite Co. against the Newark Acetylene Welding Co., which is said to have been owned by the present owners of the Newark Acetylene Gas Works. Change in name to avoid the injunction is charged by the Prest-O-Lite Co., which in addition to asking for the injunction that was granted, asked that the company and its owners be adjudged in contempt of court.

Zdenko Schubert and Rudolph B. Michalek are given as the two men connected with both companies, and their attorney stated that Schubert had withdrawn from the business. The injunction was consequently drawn against the company and Schubert individually. Judge Haight, who granted it, stated that the spirit of his order against the first company had not been adhered to.

While the attorney for the Newark company claimed that when Prest-O-Lite tanks were refilled the Prest-O-Lite name was defaced, and labels applied stating that the tank had been refilled by the Newark Aceylene Gas Works, the Prest-O-Lite Co. produced a large number of affidavits to the contrary. In each case it was shown that a tank or tanks had been purchased from the Newark company in the belief that they were standard Prest-O-Lite tanks, refilled by the Prest-O-Lite Co. and exchangeable at any of the Prest-O-Lite stations for new tanks when exhausted.

RACINE LOSES AT ROLLER POLO

RACINE, Wis., Jan. 4.—The roller polo team of the Racine Motorcycle Club lost its last game at Lakeside auditorium against the Big Chiefs by a score of 4 to 3. The contest was a thriller from start to finish and replete with spectacular plays. The local motorcyclists have been receiving praise from various teams in the polo league.

EXPORT BUSINESS IN INDIAN MACHINES SETS NEW RECORD

SPRINGFIELD, Mass., Jan. 3.—That the export situation as it applies to American cycledom is a highly satisfactory one is indicated by the latest report from the Hendee Manufacturing Company, in which it is stated that the present export business in Indian products is unprecedented. During the months of October, November and December, 1915, the Hendee company shipped more machines to foreign points—outside of Canada and the war zone—than had been shipped during the whole preceding fiscal year, and there are excellent reasons for believing that this remarkable activity in the export department will continue for some time, if not indefinitely. The Hendee company emphasizes the fact that practically all of this business comes from foreign markets in which the machines will be used along ordinary lines, and not in war service.

The Hendee company attributes the success of its export department to the fact that it has made a policy of adapting its models to the special requirements of foreign markets, the export machines often differing considerably, especially in equipment from the American stock models.

"While it cannot be denied that the export market is being greatly stimulated by the war," said a Hendee official a few days ago, "the reports we are receiving from all parts of the world lead us to believe that much of the business we are now getting will be retained against all competition when peace is declared and the contending countries begin to readjust their trade conditions. Our machines are delivering the goods wherever they are sold, and the new trade connections we have opened up are as pleased as we are that circumstances have enabled us to become acquainted."

CITY USES SEVEN

LOUISVILLE, Ky., Jan. 4.—The city of Louisville is now using seven motorcycles in the various departments for inspection service of buildings, electric wiring, police duty, etc. These machines are numbered along with the many automobiles owned by the city, and the casual observer, noting a motorcycle numbered into the fifties, is subject to the impression that the city owns a regular fleet of such machines.

MORE OHIO IMPROVEMENTS

COLUMBUS, Ohio.—Ohio Highway Commissioner Clinton Cowen announces that a number of roads in Cuyahoga and Hamilton counties will be improved with state funds during the coming year. As both counties, which are the heaviest taxpayers in the state, have been paying in thousands of dollars yearly without adequate returns in the form of road improvement, it is believed that quite a sum of money should be used towards improving roads. The contracts for the improvement will be awarded during the winter for work to be done in the spring.

ANOTHER HUSTLER ON THE WESTFIELD STAFF

WESTFIELD, Mass.—W. K. Porzer, of New York City, has recently joined

W. K. Porzer

the organization of the Westfield Manufacturing Company as publicity manager, relieving F. W. Starr, who found that the rapidly developing business demanded that he devote his entire time to his duties as assistant manager of sales.

Mr. Porzer enjoys considerable experience in trade and newspaper work, and as a former member of the staff of **Motor Cycle Illustrated,** has long been identified with the cycling world. In the advertising field, his writings are marked by individuality and attractiveness. He made a good record for himself while with the Frank Presbrey Company and several other prominent agencies. He is a charter member and former vice-president of the Triad League of New York.

This change in organization marks the beginning of the strongest advertising and selling campaign in the history of Pope bicycles and motorcycles, and the Westfield factory is already humming.

CINCINNATI SPEEDWAY ASSURED

CINCINNATI, O., Jan. 3.—The great motor speedway for this city, which has been tentatively discussed for some time, is no longer merely an iridescent dream, but is assuming an aspect of solid reality. The stock of the company, The Cincinnati Speedway Company, has been fully subscribed by a large number of substantial Cincinnati business men, and the site for the track has been settled upon, out of the several places upon which options were taken some time ago.

TO REDEEM U. S. RUBBER SCRIP

NEW YORK, Jan. 3.—All the outstanding scrip certificates issued by the United States Rubber Company, when it was organized in 1892, have been called in for redemption. John D. Carberry, assistant secretary of the company, has requested that all holders of the certificates communicate with him at his office at 1790 Broadway, New York.

KENTUCKY STATE COMMISSIONER

LOUISVILLE, Ky.—Frank B. Marshall, of this city, has been appointed by President A. B. Coffman, of the F. A. M., to be State Commissioner for Kentucky. Marshall is one of the most experienced riders in the State, and is well liked all over his territory, so that his appointment is gratifying to all motorcyclists.

HIGHER TIRE PRICES MAY COME ANY DAY NOW SAY THE TRADE WISEACRES

NEW YORK, Jan. 3.—Further and more definite indications that increases in tire prices may be looked for within the current month have come to notice during the last few days, and close followers of trade conditions would not be surprised to learn at any time now that the upward climb had started. As has already been explained, the necessity for higher prices is due to the increased cost of material of late, and it is understood that tire makers are of one mind as to the justification for the boost. However, that may be, the tire companies have been playing a waiting game during the last week or ten days, each wondering who would undertake to set the pace and how much of a jump would be made in tire costs.

Tire sales have been unusually heavy for two or three weeks, all those who were "in the know" taking advantage of the opportunity to buy before the prices were increased. It is argued that even if rubber, cotton and zinc had continued to sell at the old figures—which they haven't—the increased cost of tire production along other lines would necessitate a change in the schedules about this time, gasoline, coal and shipping charges being among the items that have gone skyward during the last year. Reports have been current for a week past that some of the smaller tire companies had already arranged new price lists or discount sheets, and that developments along these lines could not long be delayed.

HIBLETTE LEAVES GOODRICH STAFF; NEW LOCATION FOR BUFFALO BRANCH

BUFFALO, N. Y., Jan 3.—Trade workers have been surprised by the announcement that H. B. Hiblette, general manager of the Buffalo branch of the B. F. Goodrich Company, has resigned his position after having served on the company's staff for 17 years. During his first 11 years under the Goodrich colors, Mr. Hiblette was a salesman, traveling out of the New York branch.

Mr. Hiblette came to Buffalo in July, 1910, to succeed Mr. W. O. Rutherford, who went to the home office of the company in Akron as assistant General Sales Manager. In 1910 the office force numbered 26 people, with three salesmen. In five and a half years Mr. Hiblette has built up the business to such an extent that the present list of employees, with the sub-branches, numbers 78 hustlers, including 10 traveling salesmen.

Mr. Hiblette will temporarily make his headquarters at the Knickerbocker Hotel, New York, beginning Jan. 3. He has made no definite announcement concerning his future plans.

An evidence of development in the Goodrich branch in Buffalo is the change of location from the present address, 729-31 Main street, to the corner of North and Main streets, the location formerly occupied by the Ford Motor Co. The branch will be moved about May 1. The new headquarters will give more room, better office facilities and much superior window display arrangements.

MONTREAL MAY SOON HAVE MOTORCYCLE CLUB

MONTREAL, Que.—A serious attempt is being made in Montreal to organize a motorcycle club. Montreal is said to be the slowest city on earth with regard to motorcycle popularity and prosperity because there are not more than two hundred motorcycles in use here although the place is made up of 700,000 persons. To push motorcycling by assisting the dealers and by holding the usual sporting events is what the promoters of the promised organization aim to do. The chief enthusiast in the matter is E. Barrett, 516 Valois street East, and he has fired the first gun of his drive to gain the formation of the club. He points out that $70,000 is invested in the motorcycles and equipment in use in Montreal but that the riders are not banded together for self-protection or for amusement in any form.

The organization of the club will be carried on at the coming Montreal motor show and Barrett is seeking assistance from motorcycle clubs in Ontario.

Another feature to the local situation is that a wooden speedway, similar to the large saucers in the States, is promised for Montreal by a syndicate of Montreal sportsmen.

EIGHT SIGN IN ONE DAY

SAN FRANCISCO, Cal.—Eight contracts in one day were recently signed by representatives of W. E. & W. H. Jackson, representing the Davis Sewing Machine Co., of Dayton, O., in this city. The contracts were all for the Dayton Motor Bicycle. Fred H. Bente, this city; the Service Supply Co., this city; the Peninsula Cyclery, San Mateo; Fred H. Smith, Palo Alto; Beeson Brothers, Redwood City; Fred N. Higon, Mountain View; Arthur Midgeley, Menlo Park, and Z. W. Rollins, Burlingame, are the eight dealers.

The Jacksons state that every town from San Francisco to San Jose will be represented with a Dayton Motor Bicycle agent, as this territory has been closed by this one day's work. The Jacksons will shortly cover the remainder of California and expect to do as good work there.

"ENJOYED EVERY ISSUE"

"MOTOR CYCLE ILLUSTRATED has been very interesting during 1915, and we really don't believe we would have been happy without it," says W. E. Wandersee, Harley-Davidson dealer in Detroit. "We have enjoyed every issue at this store, and so have the riders. We always leave our old copies where the boys can see them, and it is surprising the great interest they take in these numbers. Let me wish the publishers of Motor Cycle Illustrated even more success in 1916. It is such periodicals that keep up interest and help to improve the industry. We should all read every issue from cover to cover."

BR-R-R-R! THAT TORONTO MIDNIGHT RUN WAS CHILLY

If sleet was falling so that it formed a sheet of ice over your riding togs—

And a bitter wind was howling across the snow and ice-covered highways—

And the hour was midnight on Dec. 31, with the countryside as dark as in the inside of a black cat—

And most other folks were nestling close to the fireplace, preparing to welcome the New Year—

Would you trundle out your trusty old chugger and hit the open trail?

Perhaps not, but a score of Toronto M. C. riders did just that and proved their sportsmanship by getting away with it. The accompanying news article tells how.

HAMILTON, Ont.—Covered with ice as a result of the sleet storm which prevailed and wearied from trying to remain on the rough and slippery roads, a score of daring motorcyclists and ... dashed into Hamilton from To... boisterous whistles and bells announcing the passing of the old year. ... were the contestants in the annual ... run on December 31 of the To... Cycle Club, and the wild ride ... colder than ever—hence more suc...

... speedsters battled against ... elements, against the blackness of ... against woeful conditions under ... skidded, they slid, they dived, ... raced the whole distance from ... Hamilton, some forty-five miles. ... with various obstacles, includ... vehicles; they fell headlong ... grades; they sloughed in... ... somersaulted at unchosen ... for they were game and every... who had anything that looked ... between his knees.

... went home by road the next ... to their friends that the ... better than a city pavement ... sleet only tickled their ... and that they would ride to ... the next night if anyone would ... question.

... time that the midnight ... the northern shore of ... has been staged. Thirteen ... and two solo machines ... on the roll call. Twelve of ... finally dropped into Hamilton. ... showed the following ma... Harley-Davidsons; five ... Hendersons; one Indian, ... and one Brough. The two ... models, George Orange, ... and Edwards, on an Excel... sidecarless mounts with ... journey, but all other en... double. All but two were ... starts, the exceptions being ... Hamilton, who straddled the ... and Harry Moore, of Oakville, ... Harley-Davidson until he woke ... He had the misfortune to ... wagon and was knocked out.

The performance of McDonald, an Excelsior flier, was notable. Before the scheduled start of the ride, at 8:30 p. m., an automobile sliced off the wheel of his sidecar. He started at 11 p. m., however, with another sidecar, and rode into Hamilton in exactly the required time, two and a half hours later. Moritz, on a Harley-Davidson, was thrown out of the running when a skid chain on the rear wheel ripped a few things from his mount which were more than ornaments. His gear-box was smashed in the bargain. Percy A. McBride, the Excelsior distributor, won the distinguished conduct medal when he landed wrong-side-up in a ditch and sprained his wrist. His sidecar partner received a black eye during the acrobatic performance. Edwards, on the solo Excelsior, carefully wiped the road for the whole forty-five miles, while Orange, the boy wonder, found that the belt of his Brough would not overcome the sleet problem.

Those who did pull through in their rough and ready fashion were: Walter Andrews, the Harley-Davidson agent at Toronto; Tommy Smith, on an Indian, Brandt with his Henderson, Wilfrid Morrison on a Harley-Davidson, and others of less note.

The start at Toronto was managed by Fred Dolson and the proprietor of the New Commercial Hotel, Hamilton, clocked each rider as he came into the hostlery to sign the register. President J. C. Jones, of the Toronto Motorcycle Club did outpost duty at the secret control near Erindale.

The results of the great ride will not be known for several days because it has been found necessary to search out the position of the secret control in order to secure the proper time that the contestants should have passed the point.

FACTORY ROOF FORMS TESTING GROUND

Two-Stroke Featherweights Being Tried Out at Main Hendee Plant

SPRINGFIELD, Mass.—Indian Featherweights were put through their paces last week on the roof of the Hendee factory when the streets and roads lay under a foot of snow. Over a gravel course of 200 yards, which was cleared along both sides of the roof, J. B. McNaughton, of the sales department, and Gus Edwards, of the testing force, rode a couple of the little two-strokers for 30 miles. They made 100 stops and starts under different conditions, and the test was probably as successful as it would have been over roads in the usual condition of travel.

TIRE DECORATIONS AT WEDDING

ST. LOUIS, Mo.—Worn-out motorcycle tires were used as the basis of a decoration scheme at the wedding of Sylvester Travis and Miss Elizabeth Schiller recently. Both are ardent riders and have been traveling on a tandem machine for the last five years. The tires were floral-trimmed and produced a novel effect.

FIND RADIO INVALUABLE

Radiograms, otherwise wireless telegraph messages, play an important part in the business of the Goodyear Tire & Rubber Company, at Akron, O. For several years, the firm has had radio stations at the Akron plant and at the Detroit branch, and much time has been saved by using the wireless in placing large orders from automobile firms in Detroit and other cities.

NEW BUILDINGS AT FISK RUBBER PLANT NEARING COMPLETION

CHICOPEE FALLS, Mass.—The exterior construction work of the several new buildings now being erected at Chicopee Falls for the Fisk Rubber Company, which recently took over the interests of the Federal Rubber Co., of Cudahy, Wis., is nearly completed and, an idea may now be had of the great size that the plant will attain when these buildings become a part of it. The new buildings are all in the tract lying between Grove street and the railroad—the administration building being directly on the main thoroughfare to the Falls. There are now 20 buildings in the plant and one of these, the new mill building, is one of the largest single buildings of its kind in Western New England.

With the new structures the Fisk Company has 29 acres of floor space wholly devoted to the manufacture and distribution of tires, the capacity in automobile casings alone being increased to 12,000 daily.

The handsome appearance of the new administration building is impressive. It is 50 by 200 feet and seven stories high, built of stone and tapestry brick. Its 70,000 feet of floor space are divided into more than 50 private offices, general offices, reception rooms, conference rooms, etc., as well as three dining-rooms capable of accommodating 200 persons. There are also rest rooms and a complete kitchen equipped with refrigerating and ice-making machines. The reception room is to be elaborately finished in English oak and opens into a main stairway 20 feet wide.

The new mill building, constructed of brick and steel, is 108 feet by 600 feet, and has five stories and basement. It is not only remarkable because of its great extent, but also because it is one of the best lighted mill buildings in this section, more than 90 per cent. of its exterior being window surface fitted with prism glass. Four fire towers afford unusual fire safeguards. This building is connected with other parts of the plant by tunnels and overhead bridges. In the excavation for this building approximately 80,000 cubic yards of earth were removed and carried across the river over a trestle built for the purpose.

The new storehouse is 108 feet by 300 feet, five stories and basement. It is of reinforced concrete and steel, with brick panels. This building also is equipped with fire towers and sprinklers. Prism glass is used in the windows and tunnels connect with adjacent buildings. A spur track on the south side of the building will serve as a loading platform for the receiving room. This building is now completed and has been put into service.

The garage and service station is also finished and occupied. It is 60 by 100 feet and built of reinforced concrete with tapestry brick side-walls. The first floor is a garage for the pleasure cars and service stations, and the basement a garage for trucks, repair shop and store room. There are air compressors with pipes to various parts of the building, oil tank in the basement piped to the main floor and equipped with pumps and a large gasolene tank in the yard. The service station is finished in Flemish oak and has large plate glass show windows facing on Front street. A transformer house for the distribution of current for power and light for these new buildings is also under construction.

CAUSE BIG RISE IN FUEL PRICE

ST. LOUIS, Mo.—With the increase in the price of gasoline which went into effect on December 30, the independent dealers in this city have in four months undone what the Standard Oil Company accomplished in eighteen months of the so-called "gasoline war."

Twenty-two months ago, the independent No. 3 gasoline and the Standard Oil Red Crown gasoline were both selling to the consumer for 17½ cents a gallon. The Standard Oil in nine bi-monthly cuts of one cent each brought the price down to 8.9 cents per gallon. Each time the independents followed the lead of the Standard Oil and reduced the price of their product. Last September, however, the worm turned and the independents raised the price one cent.

Then followed eight bi-weekly increases of one cent each, bringing the price to within one-half a cent of the figure at which the war started. The Standard Oil followed suit with the Red Crown each boost. No. 3 now sells for 17 cents, No. 2 for 19 cents, and No. 1 sells for 20 cents, in lots of ten gallons or more.

ANNUAL DIXIE BANQUET

ROANOKE, Va., Jan. 1.—The third annual New Year's banquet of the Dixie M. C., held in the club rooms in Roanoke on the night of December 31, was a most enjoyable affair. The first part of the evening was spent in card games and pool, followed by a delicious supper.

R. C. Horn acted as toastmaster, making a brief address, in which he presented the medals awarded to highest scorers in the 1915 club run contest. This contest was originated by the officers of the club to increase the attendance, improve conduct of riders, etc., on the various runs held throughout the season. The plan was entirely successful, there being a great deal of competition among the riders to score high in each run held. Winners were A. S. Leslie, gold medal, twin class, and R. A. Paul, silver medal, twin class, both medals given by Clarence Webb, Indian agent.

ALL WEED BUSINESS NOW UNDER NAME OF AMERICAN CHAIN CO.

BRIDGEPORT, Conn., Dec. 31.—From now on the widespread Weed chain business will all be handled under the name of the American Chain Company, Inc., of this city. This change in the name involves no change in personnel or policy, and has been brought about as a natural development of the company's field. Some time ago it became necessary to establish a distinct department to deal with problems peculiar to the actual production of the Weed chains, and this was accomplished by the formation of the American Chain Company, under the same ownership and management as the Weed Chain Tire Grip Company.

With the completion of the newly-equipped factory in Bridgeport, the company finds itself in a position to take the last step in the actual consolidation of the two concerns which have always been practically identical.

Announcement is made that a new Weed catalog is now in course of preparation and that it will deal most thoroughly with all the products of the company. In this connection it is stated that prompt deliveries can be made after February 1. The company's patrons are receiving a miniature calendar just by way of reminder that a large and artistic calendar will be forthcoming from the Weed offices in the course of a few days.

200 VISIT BUFFALO CLUB

BUFFALO, N. Y., Jan. 3.—More than two hundred visitors attended the New Year's Day sociable given by the members of the Buffalo Motorcycle Club. The club's rooms were beautifully decorated in holiday greens. Light refreshments were served and a string orchestra furnished the music.

SHIMMIN SPRING FORK

... SPRINGING in the construction of a front fork for motorcycles is the subject of Patent No. 1,166,156, issued to F. Shimmin, of Maryport, England. There are two main units in this fork, a fixed unit and a movable unit, the latter carrying the front wheel. At the rear the movable unit or fork is fitted with a cylinder arrangement surrounding coil springs caring for shock absorbing. An alternative arrangement is provided for a shock spring in the cylindrical arrangement beforementioned and a spring extension each end of which works against a coil rebound spring from the fixed fork. This fork is shown in Figure 1 of the illustration.

...KINS SELF-CLEANING PLUG

... properties are claimed for the construction which has been patented by Frank E. Hawkins, of Deer... This plug has a body with hol... projecting extension, an insulated tubular center conductor extending through the insulator. The end of the body forms the outer electrode. The center electrode has a head threaded into the end of the tubular conductor, an internal flange seats against the end of the conductor to form a gas tight joint. A priming charge can be put in the plug and cylinder through the central electrode. The patent was granted in 1915. It is shown in Figure 2.

...AN MOTOR ATTACHMENT

... motor attachment for bicycle propulsion is the subject of a patent issued to ... man, of Menominee, Mich., the patent being 1,165,467. The attachment consists of small wheels on an axle, from the outer ends of which extend rods diagonally to the rear forks of the bicycle and clamp to the latter. This construction provides a triangular frame on which the motor is carried. The motor is supported midway between the two wheels, in order to prevent oversetting on corners, etc. The arrangement of wheels and axle is designed to give steadiness to the bicycle, in addition. Control is by throttle only. Figures 3 and 4 show this patent.

CRIBBS BICYCLE DRIVE

An unusual transmission for a bicycle is that shown in Patent No. 1,154,292, issued to Thomas J. Cribbs, of Clearwater, Fla. There are two sets of sprockets and two chains, the latter being disposed at right angles to each other. The chains are guarded to prevent their becoming entangled with the rider's clothing. The purpose of this transmission is to "speed up," since it is figured that the gearing multiplies the speed of rotation of the rear wheel and thus enable the rider to make rapid time on the cycle so fitted. The transmission is shown in Figure 5.

PECK NON-SOOTING PLUG

Ingenious arrangement of the electrodes in a spark plug forms the subject of Patent No. 1,166,385, granted to Duncan W. Peck, of Syracuse, N. Y. The center electrode has inner and outer sections arranged end to end, with the outer section formed with a lengthwise passage and with prongs at its inner end. The passage opens in the space between these prongs. The inner section has one end extended beyond the prongs and is frictionally-held with the end space at a given distance from the bottom of the space between the prongs. Lateral passages are thus provided in addition to the lengthwise space. The construction is designed to prevent soot collecting on the electrodes. This is shown in figure 6.

FERELLA AUTOMATIC STAND

Telemaco Ferella, of Monessen, Pa. is the inventor of a novel stand for bicycles which is worked automatically by the rider when leaving or getting into the saddle. Vertical hollow members contain feet which are spring-loaded but which are held off the ground by the rider's weight when seated in the saddle. When the rider leaves the saddle, the springs act to lower the feet and suitable latching means are provided to keep these feet in contact with the ground. The latches are released by the rider getting into the saddle. A patent, No. 1,163,592 has been granted on this invention. Figure 7.

SHOW PLANS MATURING

Phil Longest, secretary of the Louisville Automobile Club, reports that things are coming along nicely for the annual show to be held at the Jefferson County Armory during the week of February 21. Everything, including motorcycles, supplies, accessories, etc., will be shown on the first floor this season. Lee Miles, chairman of the space committee, reports that there are more automobile dealers in the city than ever before, and that the space is being gobbled up rapidly.

DESIGNS FAST SPEED BOAT

NEENAH, Wis., Jan. 4.—Joseph Liebhauser, of this city, is the engineer of a motor bob sled which has been doing forty miles an hour and better. The rig is equipped with runners and a hood, and will carry two passengers.

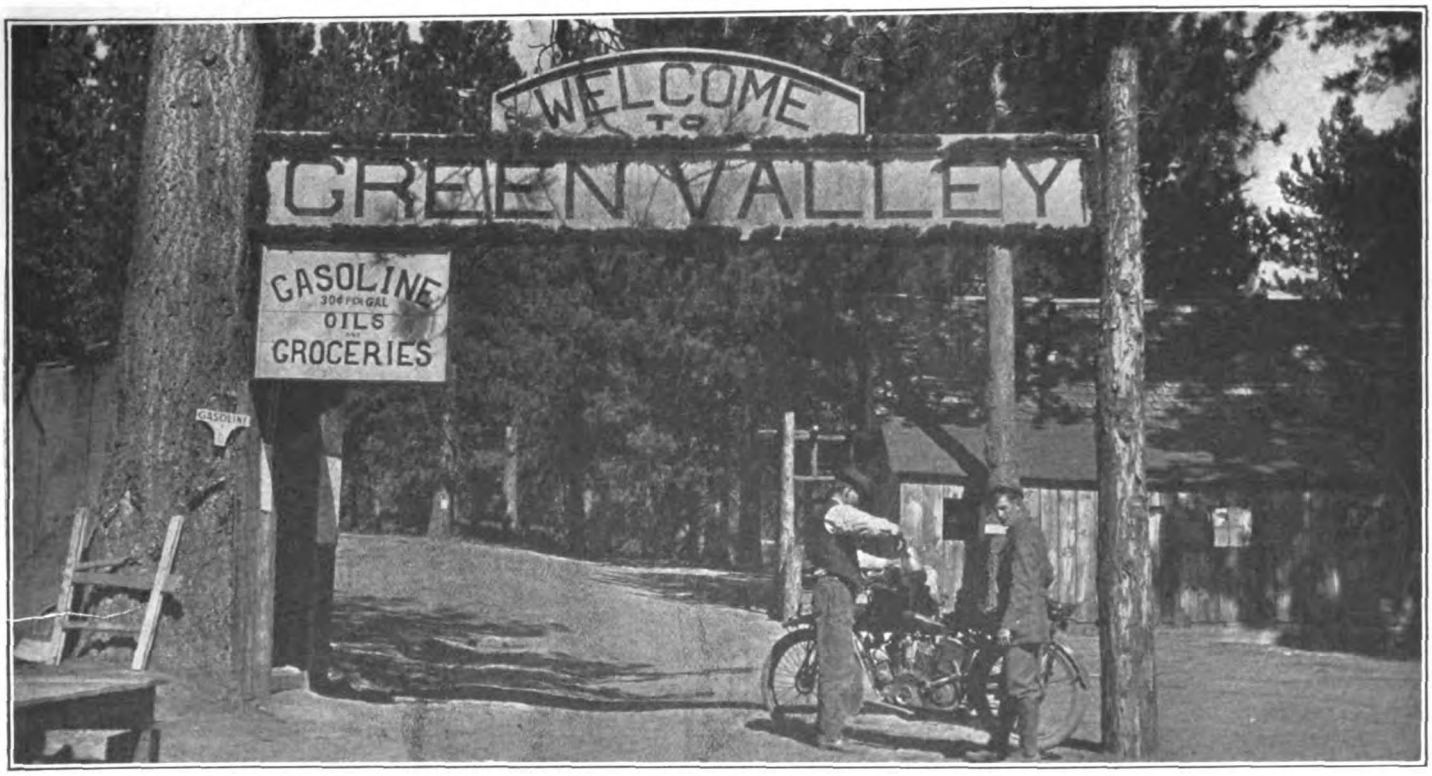
100 MILES ON THE RIM OF THE WORLD

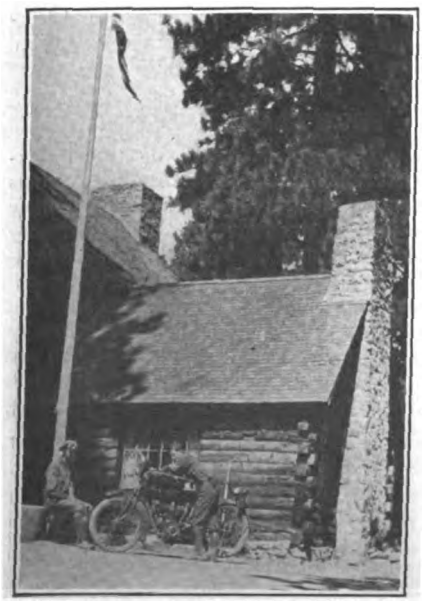
More Dope on How it Feels to Dangle Over Precipices on a Motorcycle, Swoop Into Valleys Half a Mile Deep and Climb Mountains—*By John E. Hogg*



Filling Up with Gasoline at Entrance to Green Valley; the "Garageman" Is Postmaster and Chief Male Citizen of This Place

In the first installment of Mr. Hogg's story, published December 30, the author and his partner left Los Angeles and had ascended Arrowhead Mountain over steep grades to Thousand Pines Inn on the crest. They then traversed part of the San Bernardino Mountains with their deep canyons and finally arrived at Little Bear Valley with its lake some 6,500 feet above sea level. The present installment takes the riders from the lake onward through the picturesque Green and Fawnskin Valleys and through the Santa Ana Canyon to the welcome good doads on which they traveled back to Los Angeles.

IT was nearly twenty miles through the burned over country before we came to green forest again, and which by contrast seemed greener and more beautiful than ever. It seemed good to be in the forest once more, to see the gray squirrels go scampering off in all directions at our approach, and bevies of quail go whizzing up from the underbrush at the sides of the road. We had scarcely entered the forest again when a fine big gray squirrel ran directly under our front wheel. His back was broken and he lay squealing in helpless agony until we could stop, and a well directed bullet from Albea's pistol put him out of his misery.



Stopping for Lunch at Pine Knot Lodge in Big Bear Valley

In Deep Creek Canyon

Coming to Deep Creek canyon, which we were able to recognize from our road map's description, we once had an idea of our geographical location (something that we only guessed at much of the time). Here our road wound down for nearly a thousand feet on a practically perpendicular wall, and with Albea at the bars we came down so fast that we found ourselves unable to hear upon reaching the bottom until we had swallowed vigorously several times and thus secured an equable atmospheric pressure within our ears as without.

We crossed a stream, a mountain torrent, at the bottom of the gorge on a corduroy bridge that made our bones rattle, and then followed a rocky little lane for miles up the farther wall of the gorge, where for miles we scarcely got out of low-gear.

It was hard work and tedious—but, oh! what a glorious country when we at last reached the top to behold the world spread out below us! We were on the backbone of the world and could look down on two hundred miles of country any way we looked. The dense pine woods sloped away from us in all directions, and we breathed air that was heavy with ozone.

It was twenty-five miles, mostly downhill, to Green Valley where we came into signs of civilization and got filled up on much needed gasoline and oil—welcome fuel even at 30 cents per gallon for gas and 45 cents per quart for oil.

The man from whom we bought the fuel is the merchant of Green Valley; he is also the postmaster, constable, chief of the fire department and principal citizen of that thrifty community, he and his family being the population. It was here that we were informed that we were the first motorcyclists who had ever come over the Rim of the World carrying tandem.

An Awe-Inspiring Sight

Leaving Green Valley our road angled off into an almost impenetrable forest of pine, and for miles led up and down over grades that were impossible except in low gear. At last we came to the top only to find ourselves at the summit of a barren, rocky mountain overlooking the desert over which we could see for fully a hundred miles. It was a sight that was awe-inspiring in spite of its appearance of waste and desolation. According to our road map we were now at the summit of the Gorgonio range, and were 8,500 feet above sea level.

Digitized by Google

...next twenty miles our road was ... and finally brought us out into ... Fawnskin Valley, so named ... meadows interspersed with ... at a distance give the spotted ... a fawn's skin.

... than three miles across the ... our road led up again— ... a canyon with walls of solid ... that echoed the exhaust from our ... and forth until it sounded like ... We pulled up in low-gear ... and decided it was time to ... let the motor cool, when to our ... started down once more. ... miles around the lake is a trip ... most picturesque beauty, through the ... trees all the way, with the lake on ... and the snow covered mountains ... over.

A Stop for a Hasty Lunch

... was getting quite low as we ... into Pine Knot Lodge, and ... a bite to eat at the Bear Valley ... We had little time to waste, as it ... early days and we still had 56 miles of the most dangerous mountain roads ahead of us before we would see the San Bernardino valley again.

For precaution we filled up on fuel again, and were off up through the valley, into the mountains again, and to our dismay found that our road consisted of almost bottomless sand. We cut some beautiful capers, generously distributing the sand on both sides of the road and managed to get nearly to the top of the mountain range before taking our first spill. We were rushing a right-angle curve in intermediate gear, sliding from one side of the road to the other, when suddenly we decided it was time to unload—so without ceremony or éclat we unloaded. Albea was on the tandem and naturally he got off first. Quick as it all happened, we both landed on our feet while the machine fell on its side and lay roaring like a sawmill on the very edge of a 1,000 foot drop-off until we could shut it off.

9,000 Feet Above Sea Level

No damage was done, and we straightened up the handlebars and climbed the remaining quarter of a mile to the summit of the ridge. Here we were nearly 9,000 feet above sea level, and it was so cold that we both crawled into our heavy coats and gloves.

Scenery, did I hear someone say?

Well, yes, there was a bit of it! There we stood at the summit of a 9,000-foot ridge, snow all about us; back of us, stretched out like a huge relief map 3,000 feet below, lay the verdant Big Bear valley with its beautiful lake dim and hazy in the evening twilight. In front of us lay the beautiful San Bernardino valley—that is, that portion of it that was not excluded from our view by the dense banks of clouds far below. The sun had already set upon our point of view, but was still shining brightly in the valley beneath the clouds—it was our first experience of seeing a beautiful sunset from above the fleecy clouds.

Meeting the First Robin Redbreast Seen in the District

Of our descent down out of the mountains through Santa Ana canyon in almost total darkness, I will not shock my readers with a hair-raising tale. Anyone who has ever been up or down Santa Ana canyon knows all about it, and when I tell them that we came down the length of that canyon at night, with only half a light from a sick storage battery, it is "nuf sed!"

As I have stated, the summit of the ridge is nearly 9,000 feet above sea level. The canyon is 42 miles long, and when one emerges into the valley at the bottom he is some 500 feet above sea level.

Our story of that 42 miles is one of a thousand hairbreadth escapes from instant destruction of coasting down bloodcurdling grades, around hairpin bends where we

Descending from the Rugged Top of the San Bernardino Mountains Into Picturesque Big Bear Valley; Note Sandy Roads

Digitized by Google

turned completely around in the length of the machine on the edges of thousand-foot perpendicular walls. Once with Albea at the bars we slid sidewise around a curve, and to avoid going over the edge, charged the wall on the inside. We scraped along the rocks leaving a shower of sparks for nearly a hundred feet before we finally got squared up and onto the road again.

Several times we were tempted to stop and without food or blankets, and in spite of the cold, camp until daylight would enable us to make the descent with some degree of safety.

We banished the thought, however, and kept on, wondering if the canyon would ever end or if it just went on and down forever. Finally Albea began to wail, and pointing to a huge rock dimly silhouetted at the roadside solemnly declared that he knew we had passed that place eight times. I was almost inclined to believe him for we had gone 'round and 'round until all sense of geography and direction was cast to the four winds.

It was decidedly a pinched-in feeling when we at last found ourselves at the bottom of a gorge less than ten feet wide and with perpendicular walls towering a thousand feet straight above us.

Out of the Canyon at Last

"Great God from Buckhead!" declared Albea, "will we ever get out of this infernal hole?"

"There's an end to all things," I replied, "and surely this canyon can be no exception." The words were scarcely uttered when on rounding a sharp bend the end of the canyon burst into view—and far off on the horizon the lights of the city of Redlands twinkled like myriads of stars.

We were soon on boulevard once more, and with our headlight operating direct from the generator we toured along at top speed until just beyond San Bernardino our head lamp globe said us "Good night." We spent twenty minutes putting in the spare globe and toured twenty-five miles more at about 60 per, when away went our headlight globe again. No more spare globes—that settled our light for that night, so we slowed down to an easy pace, toured on into the darkness, and without any adventure more exciting than almost straightening out a curve in the road near San Dimas we reached Los Angeles just as the big clock in the Times tower tolled the hour of 3 a. m. and soon had our feet stretched out under a table at the club. A hot bath, a wink of sleep, a double ration of ham and eggs and we felt like gentlemen once more.

"Would you do it again?" someone asked as we were discussing the trip next day.

"Would we do it again?" echoed Albea with his head cocked sidewise and a mischevious, quizzical expression in his eyes.

"How about that, J. E.?" he asked, turning to me.

"You're on!" I replied, "about January, when the snow gets good and deep up in the Big Bear country!"

"But we won't go up Santa Ana canyon way, will we?" replied Albea.

"Not by a jugfull!" I replied; "and it'll be two machines with chains on both ends."

"Shake," said Albea, reaching out his hand.

We shook.

MICHIGAN PLANS HUGE RELIABILITY TRIAL

Grand Rapids Motorcycle Club Will Stage Mammoth Competition Next July

GRAND RAPIDS, Mich., Jan 4.—A Reliability Trial that will be of national importance has been definitely decided on by the contest committee of the Grand Rapids Motorcycle Club. The dates have been tentatively set for July 2, 3 and 4.

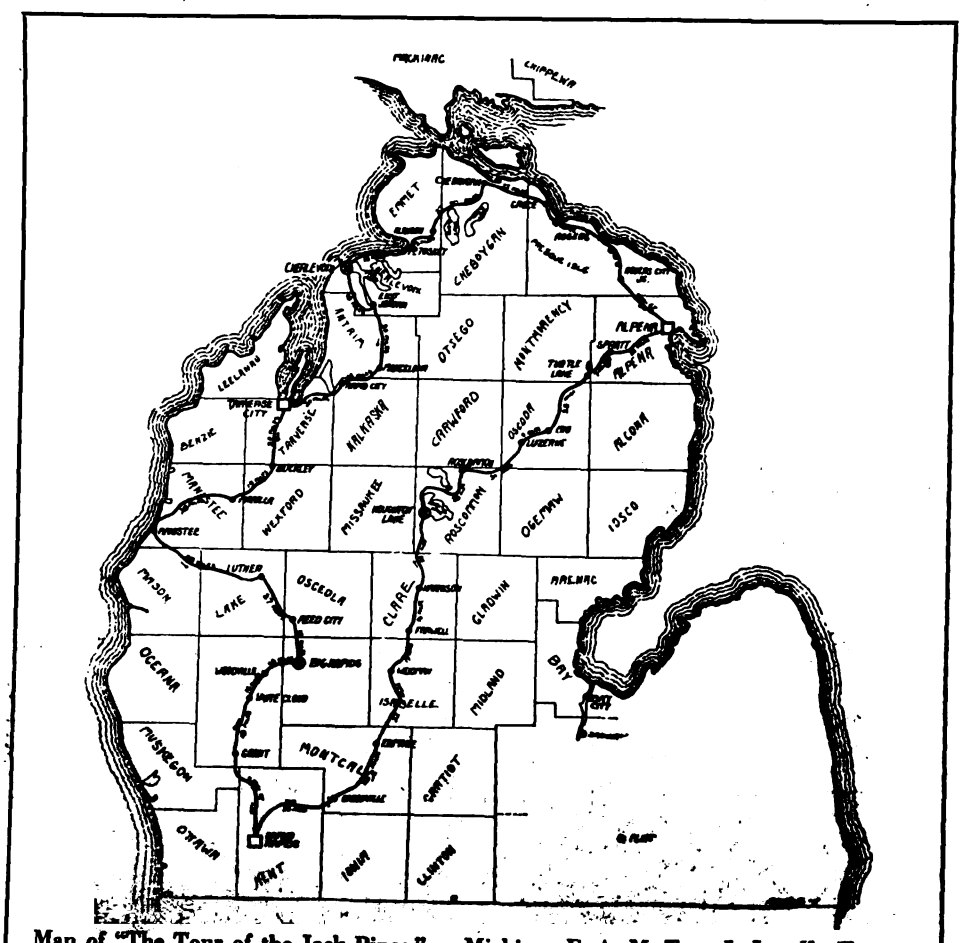
The committee has worked for several months on the plans, and it is with much enthusiasm that they launch their interesting project.

This contest is to be totally unlike any other that has ever been attempted. The objectionable features of other contests have been eliminated and many decidedly new and really feasible rules have been added that already stamp the venture with success. A system of rules and regulations will be used whereby there will be one winner and the victory will be a clean and decisive one.

The title of "National F. A. M. Road Champion" is to be conferred upon the winner in addition to the "Wilderness trophy," the principal honor and prize. A purse of about $400 is to be divided proportionately among the first four places. The contest, of course, will be held under F. A. M. sanction.

The chief object of the contest committee is to assemble and pit against one another in this event all the prominent riders and all the road riders of a more or less national reputation. The riders of the western desert country, it is especially hoped, will participate. Many of the famed competition riders in the east and Central States have already expressed themselves as being enthusiastically in favor of the project and many have also signified their intentions of taking part.

The accompanying map indicates the course which will probably be followed in this huge reliability trial. The dates set so far are not absolutely certain, a more definite announcement being promised by the committee later on. On the contest committee of the Grand Rapids M. C. are Chairman Tom Martin, F. A. M. Commissioner Hap Scherer, R. C. Chipman and R. E. Heth, Jr. The members of this committee will constitute the path finding party which expects to undertake its "expedition" the first two weeks in June. No time and expense will be spared, according to the committee, to make this trial an unprecedented success, and all contributory details are being thoroughly worked out.



Map of "The Tour of the Jack Pines," as Michigan F. A. M. Tour Is Locally Known. Territory Covered Is Upper Peninsula of State, and Run Is 690 Miles in All. Night Controls Are Shown by Squares, While Noon Stops Are Indicated by Crosses Within Circles.

EXHIBITS OF INTEREST TO MOTORCYCLISTS IN THE NEW YORK AUTOMOBILE SHOW—CONTINUED FROM PAGE 20

REGULAR AND TRIP VEEDER CYCLOMETERS SHOWN

VEEDER cyclometers for bicycles and motorcycles were effectively featured [illegible] of the Veeder Mfg. Co., of [illegible], the regular as well as the trip meters being shown, together with the motorcycle trip cyclometer and special [illegible] brackets, so that this instrument is available for all makes of machines. [illegible] demonstrating at this booth were C. J. Post, E. R. Smith and W. C.

TUBES AND TIRE GOODS AT VOORHEES BOOTH

[illegible] motorcycle tubes in sizes from [illegible] x 3 inches, in pure red rubber, [illegible] features of the display of the Voorhees Mfg. Co., of Jersey City, N. J. [illegible] includes tire reliners, patches, [illegible] and rubber mallets, the latter being very useful in the motorcycle line. Motorcycle inner sleeves and hookless tubes are shown in a variety of

MOTORCYCLE VULCANIZER IS ADAMSON FEATURE

VULCANIZERS for use on the road [illegible] the garage are featured at the [illegible] the Adamson Manufacturing Company of East Palestine, O. The [illegible] for motorcycle inner tubes, is a [illegible] instrument for use on the road [illegible] and weighs two pounds. Like [illegible] sizes, it comes in an outfit complete with repair gum, scissors, sandpaper and other materials essential to perfect vulcanization.

C. F. Adamson is in charge, with G. A. Steinhauser and J. C. Milsom as his aides.

VEEDOL LUBRICANTS FOR ALL MAKES OF MOTOR

LUBRICATION in its many forms with lubricants which are adapted to all attract attention at the stand of the Platt & Washburn Refining Company, of New York. The line, produced under the name of Veedol, includes motor oils, greases and soaps, the oils being in five weights for motors and two for gearsets and differential casings. The grease line includes gear compounds and cup greases. Boards showing the various oil tests and a lubrication chart occupy a considerable part of the exhibit.

P. N. Miller is in charge, assisted by H. A. Parsons and a corps of demonstrators.

PIEL EXHIBIT DISPLAYS LONG HORN MODELS

LONG HORNS in the model J-M are displayed at the stand of the G. Piel Co., Inc., of Long Island City, N. Y. in connection with a line of larger mechanical alarms for other motor vehicles. The J-M is shown in both all-black and in nickel and black finishes, with 4½-inch bell and positive-acting mechanism.

The Edward A. Cassidy Company, sales supervisors for the Piel firm, are in charge of the exhibit under the leadership of Mr. Cassidy. Assisting him are G. B. Gosman, R. G. Ames, W. F. Carry, John W. Klag and C. P. Brewster. The factory is represented by Arthur Piel.

MOSLER PLUG IN STONE AND MICA DISPLAYED

THE Mosler motorcycle plug in either stone or mica is the only product of interest to motorcyclists in the stand of A. R. Mosler & Co., Mt. Vernon, N. Y. These are built on the Mosler principle to withstand profuse oil without sooting or fouling, are gas tight and claimed not to short circuit.

Demonstrating at the booth are H. G. Wattenscheidt, O. H. Wachtel, J. W. Fisher, Wm. Liebling, A. R. Mosler and F. Eislie.

MANY NOZZLES IN MASTER CARBURETER

MASTER carbureters in both ¾ and one inch sizes for motorcycle use are shown at the stand of the Master Carbureter Corporation, of Detroit, Mich. This carbureter has fourteen nozzles in place of the one or two usually employed and regulates both air and gas by the movement of a barrel throttle with specially-formed ports in it. There are two screens in the fuel distribution line, so that clogging of the nozzles is impossible.

MONARCH PLUGS IN MICA AND WHITE CAP STYLES

MONARCH spark plugs in both mica and "White Cap" styles are shown at the extensive display of the Benford Manufacturing Company, at Mount Vernon, N. Y. The mica plug, which is probably the best known in the Monarch line, has a heavy mica core wound on a tapered rod, with mica washers over the core and

Digitized by Google

pressed together under heavy power. The "White Cap" plug resembles the mica plug in construction with the exception of having a porcelain cap over the mica core in place of the mica washers. Both plugs are shown in ½-inch, metric and ⅞-inch sizes, on attractive boards.

E. M. Benford is in charge of the exhibit, assisted by John Craig, David Levin, William Meyer and Leland Craig.

IGNITION-LIGHTING GENERATOR AT BOSCH STAND

IN all probability the center of interest at the big Bosch exhibit is the new ignition-lighting generator for motorcycles, known as the G1EV. This apparatus is shown in connection with a storage battery and lamps, as well as with spark plugs. There are two distinct sets of magnets in the generator, so that should the lighting section be placed out of commission, ignition can continue uninterrupted. Models for the ignition of single, twin and four cylinder motorcycle motors are shown as well as spark plugs and the Bosch oiler.

Advertising Manager A. Bartsch is in charge of the exhibit, assisted by a corps of demonstrators.

FITZGERALD STAND SHOWS CLERO HORNS

AT the stand of the Fitzgerald Manufacturing Company, of Torrington, Conn., are displayed the Clero mechanical horns in models A, M and F, the first and third being for automobile service, while the M is the familiar motorcycle horn. These horns are noted for their clear and penetrating tone and for their lasting qualities under the hardest service. They are shown with brackets which can be fitted to any motorcycle without alterations.

J. F. Hutchison presides at the Clero exhibit.

SHALER SHOWS KITS FOR TIRE-MENDING

A SPECIAL kit for mending motorcycle tubes and casings appeared at the booth of the C. A. Shaler & Co., Waupun, Wis., the model being the same as the one shown earlier this season. Besides making practical every kind of tube repair, this kit has a curved surface to fit any sized tire. The work can be done while the tire in inflated on the wheel, as it is claimed that there is no soot, or exposed flame. Either gasoline or alcohol can be used in the generator.

BICYCLE LAMPS APPEAR AT ROSE BOOTH

ONLY one model of bicycle lamp was shown at the stand of the Rose Mfg. Co. of Philadelphia, Pa., though this concern makes several types for two-wheelers. It was announced by one of the company's officials at the show that the Rose bicycle lamps were now being used by the bicycle police of New York and also on all bicycles which are being shipped from Canada for war service.

In this booth, demonstrating the comprehensive line of the company, were H. C. Rosenbluth, R. R. Koslowsky and G. W. Voigt.

GROSSMAN FEATURES THE RED HEAD SPARK PLUG

RED HEAD spark plugs in both porcelain and mica styles, both separately and in sets are displayed at the stand of the Emil Grossman Mfg. Co., Inc., of Brooklyn, N. Y. The porcelain plugs are made in standard sizes: ⅞-inch A. L. A. M., ½-inch and metric, while the mica plugs are made in metric thread only. The latter have the widely-adopted circular terminal connection, such as is used on Indian motors.

R. R. Rosenquist, of the Greater New York sales staff, has for his assistants Harry Wedler, Alfred Greene and William Farren. Secretary L. M. Schwartz of the company is directing the exhibit.

GAS AND ELECTRIC LAMPS FOR VICTOR AUTO PARTS

ELECTRIC and acetylene lamps for motorcycle and automobile use are displayed in both black and nickel-plated finishes at the stand of the Victor Auto Parts Company, of Cincinnati, O. The motorcycle lines shown include head and tail lamps for both sources of light with brackets which enable them to be quickly fitted to any machine. The electric lamps can be used with either all-battery or generator and battery systems.

William Hughes and John Corcoran are at the Victor exhibit, assisted by a staff of demonstrators.

SEISS MECHANICAL HORNS FEATURE OF EXHIBIT

SEISS mechanical horns are naturally the feature at the exhibit of the Seiss Mfg. Company, of Toledo, O., the display including those for motorcycle, bicycle and automobile service. The parts which enter into these horns are attractively displayed on a board in full view of the visitor, and it is to be noted that the same parts are used for the motorcycle as for the automobile horns.

President George J. Seiss is in charge of the exhibit with H. B. Eyer, factory representative, assisting.

COPPER COATED PLUG NEW AT SHARP EXHIBIT

MANY models of Sharp spark plugs are on view where the Sharp Spark Plug Company, of Cleveland, O., has its headquarters. Of most interest to motorcyclists is the "Indian" model, with mica core and made in metric thread. The Kopper King plug, adaptable to motorcycle ignition, although primarily intended for automobile service, has a coating of copper on that portion which enters the cylinder, and is soot-proof, since carbon does not collect on that metal. Monel metal is used for the electrodes.

W. E. Hooker is in charge at the stand, with J. S. McKenny, Walter A. Koehler and G. E. Spalding as assistants.

3 TYPES OF SCHEBLER MOTORCYCLE CARBURETERS SHOWN

A TWO stroke carburetor, the special Indian outfit and the regular Schebler are on display in the booth of Wheeler & Schebler, of Indianapolis, Ind. Sectional parts of the carburetors are shown, making the demonstrating of their working easy to explain to the many visitors to this booth.

B. T. Briggs, sales manager of the company, is in charge, assisted by J. B. Funk, of the engineering department, D. F. Wheeler, of the sales department, K. C. Nicholas, of the New York branch, and H. D. Green of the Boston branch.

WHEN WEATHER IS MILD AND ROADS SMOOTH

In the upper picture is a scene near Valleyville, Conn., taken by Jas. W. Verbeck, Jr., of Ballston Spa, N. Y., during a recent 1,200 mile trip through New York, Vermont, Connecticut and Masaschusetts. The Verbeck outfit, with its many pennants is seen at the left, with the owner driving and Paul Schaeffer as passenger. It is a Harley-Davidson twin.

NEW YEAR'S ACTIVITIES AT KLINE BROTHERS

LOUISVILLE, Ky., Jan. 4.—Pete Kline, of Kline Brothers, Louisville Harley dealers voices the sentiment of the local trade in stating that he has made but one New Year's resolution, and that is, "Sell more motorcycles." The concern lost but little time in starting to put in practice this resolve, and in fact began a sales campaign before the close of the year, which results. The concern has delivered one machine, has one in stock, and is using another for demonstrating. Seven machines are booked for future delivery, and a number of red hot prospects have been spotted for Herb Kline to "pole in." The concern will hold its annual watch party on New Year's eve, and invited all of its riders to be present and participate. The new models will be discussed, and various refreshments served.

NEW PULLMAN DISPLAYED

CINCINNATI, O., Jan. 3.—A new Pullman, made by the Svensgaard plant, is on display at the Brendamour Sporting Goods Company's store, attached to one of the Excelsior motorcycles. It is of the model designed for that machine, and will be handled by the company this season. Its beauty and strength have attracted much favorable comment, and the Brendamour people expect to convert a great many former riders to the pleasures of the sidecar.

LAMBERT IN TACOMA

TACOMA, Wash.—Jack Lambert, well known as an expert repairman and rider, is in charge of the Harley-Davidson repair shop under the management of W. P. Hall. Lambert was formerly in Seattle, working for the Tremper firm and in the Motorcycle Exchange.

HICKEY ENLARGES

PUYALLUP, Wash.—A. B. Hickey, the Indian agent in this city, has enlarged his shop and put in a new line of accessories. He has taken on the Miami Power Bicycle.

FEATURED MACKINAWS

CINCINNATI, O., Jan. 3.—The Remelin Co., which features with its line of motorcycles and bicycles a full line of accessories and equipment, made a decided success with a line of "Patrick" mackinaws and overcoats. The company secured the representation of the Patrick line, and devoted one of its windows to a display of the goods during the week before Christmas. The liberal advertising which has been devoted to the "bigger-than-the-weather" woolen clothing in this line helped materially.

DEALERS ARE HAPPY

TACOMA, Wash., Jan. 1.—Tacoma dealers have every reason to be happy, as business is considerably better than at this time last year. They have all received their 1916 demonstrators and shipments are promised in the near future; their prospect lists are growing steadily and the clear cold weather, after a long rainy month, are the reason for optimistic reports.

MINIATURE RIG ATTRACTS

LOS ANGELES, Cal.—One of the city's chief attractions is to be seen in front of Berry's Miami bike agency. It is a miniature Superior sidecar in Dutch blue coupled to a Miami Power Bicycle, and it is a big drawing card all the time. Berry got the rig up as an advertising feature, but there have been many inquiries as to getting similar outfits by family men in this city.

AMBLADE'S TRADE IS BRISK

TACOMA, Wash.—F. Amblade, who specializes in used machines, says that business has been exceptionally brisk on all makes. He is still in a field of his own in this city, other dealers disposing of used mounts as a side-line.

ASSISTING AT THE CYGNET REAR CAR BOOTH

NEW YORK, N. Y., Jan. 3.—Calvin Webber, manager of the motorcycle department of the New York Sporting Goods Company, Indian distributors for the metropolitan district, at 15 Warren street, is assisting Leadley Ogden, of the Cygnet Rear Car Company, at the latter's exhibit in the Automobile Show now on. Webber is aided by Irving Barnard, Wallace Stuart and other members of his department at the Grand Central Palace. The Sporting Goods Co. recently took the New York agency for the Rear Car.

HULT IS ON THE JUMP

PORTLAND, Ore.—D. D. Hult, of Ballou & Wright's motorcycle department, has been kept busy since the arrival of the Indian Powerplus twin, showing off its paces in traffic and also in climbing the Council Crest at 40 to 50 miles per hour. The Ballou & Wright wigwam is now anxiously awaiting a shipment of the red twins in order to satisfy the insistent demands of customers.

NOW HARLEY-DAVIDSON AGENT

MANCHESTER, N. H.—J. E. Forest has taken the agency for the Harley-Davidson for this city and vicinity. He was formerly representative for the Indian line of motorcycles.

Forest states that the boys are taking greater interest this season than ever before in the two-wheeler, and he is looking forward to a big year in motorcycles as a result.

How Wigwam Agent Clover Friedman Demonstrated Pulling Power of 1916 Power-Plus Indian in Toledo, O.—There Are Thirteen Men on the Bob-Sled

Digitized by Google

DEALERS' SECTION

PRICE SCHEDULES ON USED MOTORCYCLES

NEW YORK, Jan. 3.—The question "What shall I ask for it?" as applied to the used motorcycle problem is answered in a manner that should interest every dealer in the first edition of "The Used Motorcycle Price Guide," which is now being distributed by the National Motorcycle Dealers' Information Bureau, 1482 Broadway, New York. Manager E. F. Hallock, of the Bureau, has gone a long way towards helping the motorcycle dealer to place his second-hand machine business on a profitable basis, and incidentally he has lined up a very creditable showing of advertising from trade leaders.

The prices quoted for used motorcycles are based upon the market averages throughout the country. Hundreds of dealers helped in the compilation of the book by furnishing data concerning the prices they allow on used machines and the selling rates they adhere to when they dispose of the machine again. In other words, everything possible has been done to work out the price schedules on hard facts, and to eliminate guesswork as far as possible. The price tables begin with 1909 machines and run through to used motorcycles of the 1915 models.

An application to Manager Hallock, National Motorcycle Dealers' Information Bureau, 1482 Broadway, New York, will bring a copy of the book.

TAKES ON DAYTON

GARY, Ind.—M. Hirschberg, otherwise known as "Motorcycle Mike," has taken on the Dayton Motor Bicycle for 1916 for this city. He handles the Harley-Davidson also.

ZIMBRICH IS SCHICKEL DISTRIBUTOR

ROCHESTER, N. Y., Jan. 3.—Frank Albert, traveling representative of the Schickel Motorcycle Company, of Stamford, Conn., is now covering western New York and reports a brisk business in the Empire State. He has just closed a contract with A. M. Zimbrich, Rochester, as distributor for the Schickel lightweight for Central New York. Zimbrich will immediately launch a strenuous sales campaign.

TAKES CYCLEMOTOR AGENCY

DETROIT, Mich.—F. H. Clum, of the Harry Svensgaard Sales Corporation, Excelsior representative, announces that the firm has taken the agency for the Cyclemotor, with territory including all of Michigan and Cleveland, O. He states that a number of novel advertising stunts will be started after January 1.

Clum says that 1915 was a splendid year for Pullman sidecars and that 1916 prospects are great. During the past year inquiries for sidecars came from Europe, excepting from the nations at war, of course.

WERNER MAKES ADDITION

PASSAIC, N. J.—Joseph B. Werner, local Harley-Davidson dealer, has made extensive alterations to his establishment at 532 Main street, adding 40 per cent. more floor space. He has had a large show window fitted as part of the improvement.

The interior has been redecorated, also. Werner has three 1916 machines aready on the road and is planning for another for the spring rush, as all industries in Passaic are working full time and the boys are eager to ride.

DEALERS STUDY SALESMANSHIP

BUFFALO, N. Y., Dec. 31.—Neal, Clark & Neal, the Bison City Indian Agents are aiming for greater sales efficiency. All the members of the firm and the sales staff come together once a week to study salesmanship under a trained instructor from the Sheldon School of Salesmanship. The class is conducted along practical lines, and is being especially adapted to the motorcycle business.

Where Excelsiors Have Their Home in York, Neb.: Agency of Gus Gocke, Considered a Model Motorcycle and Bicycle Establishment in the Middle West

NEEDS MORE BOOSTING, SAYS MANAGER PURINTON

DETROIT, Mich.—"More competition, which means more dealers handling motorcycles, would be a great stimulant to this industry," says H. D. Purinton, of the W. E. Metzger Company, Indian agent at 501 Woodward avenue, this city. "Our talking machine business was tremendous this past year, by reason of the national publicity and the fact that every dealer was a booster for some other dealer.

"What the motorcycle industry needs is some national publicity and more dealers. There are not enough dealers talking motorcycles. The motorcycle has never been put before the public properly. There are probably fewer firms selling motorcycles than any other product, and this should not be the case at all.

"The motorcycle business needs more boosting, is the long and short of it. There are still people who look upon the motorcycle as a novelty."

BIGLER HAS DAYTON

GOSHEN, Ind.—Dayton Motor bicycles and motorcycles will be represented in Elkhart County during 1916 by Lawrence Bigler, of this city.

THORS HAVE ARRIVED

NEWARK, N. J.—William R. Spear, Thor representative, has received his long-awaited 1916 models, and his store has been thronged with old as well as prospective motorcyclists for a peek at the new ones. The lightness of the big "12" and the ease with which it can be got on and off the stand are big talking points, and Spear has already booked orders on these features alone.

RUMSEY ON SICK LIST

DETROIT, Mich.—W. D. Rumsey, traveler for the Harry Svensgaard Sales Corporation, makers of Pullman sidecars, has been confined to his bed with neuralgia since December 23, but is expected to be around soon. He recently returned from an extended Eastern trip in the interests of the Pullman sidecar and his order books were well filled.

CLARKE SIGNS UP

LA PORTE, Ind.—Fred W. Clarke, of this city, has just closed with the Davis Sewing Machine Company, of Dayton, O., for the 1916 representation for the Dayton Motor Bicycle in this section.

ARCHER BACK ON JOB

KANSAS CITY, Mo.—Frank Archer, head of the mechanical department of the local wigwam, of which Charles Hanson is chieftain, recently returned from a trip to his home in Manhattan, Kas. He states that the roads were very rough by reason of the freezing weather then in force.

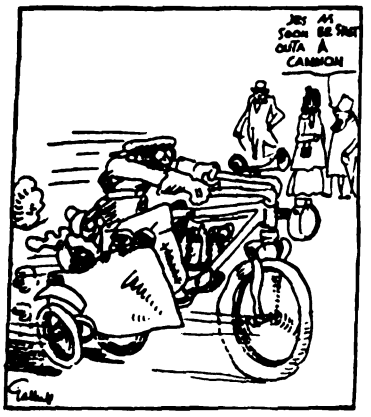
GET ON THE JOB AND SEE THAT THE NEWSPAPERS IN YOUR TOWN RESPECT THE MOTORCYCLE

MOTORCYCLE dealers the country over owe it to themselves and to the industry to discourage by every legitimate means the publication of such drawings as the one reproduced herewith. This allegedly funny sketch appeared in a recent number of the Louisville (Ky.) *Times*, accompanied by equally objectionable text.

The menace in such funnyisms lies in the fact that emphasis is invariably placed upon



those features which, in the early days of motorcycling, were real drawbacks to the industry. Having been fully overcome by the manufacturers, those early drawbacks have no place in the motorcycle field of today, and every item or picture which calls them to mind again helps to create a false impression concerning the modern motorcycle. The comic artist who made a drawing of the first motor car with all its preposterous flap-doodle fittings would not win a laugh in these days, because, whatever its beginning may have been, the automobile has justified itself. The same is true of the motorcycle.

The first motor car was something of a joke, but it is no longer regarded in that light, even by newspaper humorists. The early motorcycle was noisy, clumsy and not always safe, but it has progressed just as rapidly as the automobile. In short, the motorcycle has earned its right to fair judgment. It has admirably lived down its early shortcomings and is entitled to fair treatment from the newspapers.

The publication of such a sketch as the one accompanying is certain to hurt sales indirectly because in its cheap way it appears to confirm the fantastic views still held by some non-riders. It behooves the motorcycle dealer therefore to demand fairness from his local newspaper. Editors are human, despite considerable evidence to the contrary, and if it is explained to them that a picture is likely to injure a legitimate business they will be willing to aim their comic artists in another direction.

HOW CUSTOMERS ARE LOST TO THE DEALER

AS an example of how *not* to handle a prospect, the following conversation overheard last week at a Brooklyn, N. Y., motorcycle agency, is an excellent one.

(The Dealer is standing in the doorway as the Prospective Purchaser enters.)

Prospective Purchaser—"Would you please tell me what magneto the ——— machine is using this year?"

Dealer—"There's the machine over there; go look at it."

(Prospective Purchaser walks over and inspects machine, from a distance, as it is in the window.)

Prospective Purchaser—"Why don't the ——— people use the ——— magneto? Is this make of magneto perfectly satisfactory?"

Dealer—"I don't know; that's what they're putting on 'em. I guess it's all right."

(Dealer then steers Prospective Purchaser away from the 1916 mount and leads him to the rear of the store, saying:)

"Now here's a fine bargain for you, a 1915 ———. That's *some* machine. I'll sell that for $140 and it's a real bargain."

Prospective Purchaser—"Very likely; but I am not interested in a second-hand machine, or in that particular make. I *am* thinking very seriously of purchasing one of the make we are discussing. How are the new models performing on the road?"

Dealer—"Oh, they're a pretty good machine, all right. Here's one that a fellow ran into a trolley car with. (It looked it, too.) But if they don't know how to ride 'em and smash 'em up, that's their affair, not ours. It's his machine; he can do what he likes with it."

(Prospective Purchaser escapes, with Dealer calling after him: "Come in any time you're ready to buy.")

SUTCLIFFES TO MOVE

LOUISVILLE, Ky., Jan. 4.—The Sutcliffe Company's bicycle repair shop will probably get a more lively rush in the near future as the Western Union Telegraph Co. will shortly occupy a new building at Fourth and Market streets or just a half square from the bicycle and sporting goods house. At present the concern is some squares away.

TO REPAIR TIRES

ALLIANCE, Ohio.—The Alliance Tire & Repair Co. has been incorporated with a capital of $10,000 to deal in and repair automobile and motorcycle tires. The incorporators are: T. Galensky, W. C. Daniels, H. C. Newman, F. W. Zumkehr, and J. F. Coulter.

TENDENCIES FOR 1916 IN BRITISH MODELS

Countershaft Gearsets With Chain or Combination Drive Prevalent—Lightweights Are Numerous

By OLD RAMBLER

LONDON, England.—With the advent of the new year it is appropriate that a general survey of motorcycle innovations for 1916 be made. First, hub-located gears are dying out and countershaft sets are usurping their place in popular favor. The drive is either by chain or chain-cum-belt. One cannot help reflecting how some of the critics who used to condemn chain drive stand now confounded. There was a day when those of us who extolled chain drive wrote or spoke as with the voice of one crying in the wilderness. However, we can all afford to forget that. Even the troubles with belts are greatly eliminated by the use of large engine pulleys.

Lightweights are being fitted with handlebar-controlled clutches, a big improvement on the foot-controlled clutches. These light models, and the still more featherweight motocyclettes are going to have a big vogue; in fact, the two-stroke lightweight promises to be one of the most successful propositions of the season.

Fewer T. T. Models

As so many of our sporting young men are on war duty, there are not so many enquiries about for T. T. (Tourist Trophy) racing models, nor for single-geared mounts of any sort, as there will be after the war. The standard type of motorcycle for the average rider has for a long time been the 3 1-2 horsepower, but it does not dominate the present demand quite as much, for solo riders are finding the 2 1-2 horsepower and other lightweights wonderfully good for individual travelling and are wanting 5, 6, 7 or 8 horsepower engines to give the extra or reserve power that is desirable for sidecars.

American makers and riders will be flattered at the news that more attention is being paid over here to springing. The Indian probably set the fashion; the Pope, P. V., and A. B. C. have catered well in that direction, also, and amongst well-known British makes with good springs for 1916 are the Matchless, the Douglas and the Royal Ruby. It is wonderful what a big name the last mentioned machine has made since it came into the market. The works are amongst the first in the trade, a credit to the city of Manchester and to the head of the firm—Mr. George E. Rigby. The Matchless is springing by coils, while the others employ leaf springs.

A Big Sunbeam

The Sunbeam stable is to have a big brother in 1916, in the form of an 8 horsepower machine. It is classified as a de luxe model, specially serviceable for the sidecar users. It should be capable of carrying a thumping big passenger and plenty of luggage with that power, for the existent Sunbeams are already famous for their weight-pulling and hill-climbing potentialities. The Sunbeam with "the little oil-bath" is a mount beyond reproach, and if it could be delivered amongst the Britishers in the Far West of America it would be nearly priceless, for one gathers that the boys who follow the lone life out there prefer mounts with plenty of power, even for solo work. This monster Sunbeam will have the M. A. G. engine and will be fitted with three or four speeds, so that it will be equal to hot work on level roads and to tackle practically anything in the way of hills.

There isn't really a great deal of startling news from the factories just now, for everyone is greeted with the familiar words: "We're busy on munitions." The motorcycle factories, like those which turn out cars and bicycles—or should turn them out, war permitting—have done magnificent service to the Allies in the way of shell-making, etc., even at the sacrifice of trade. However, we are all hoping to recover whatever has been missed in the way of orders, bye and bye.

The Dreadnaught Lightweights

Meanwhile, W. A. Lloyd's, of Birmingham, announce what they are offering in the way of lightweights for 1916, and the reason the firm give for fitting two-stroke engines to all three models is put simply: "We think there is no question that for lightweights a two-stroke is absolutely *the* engine. Its handling is so very easy and its power (especially for hill-climbing) very great." Model B Dreadnaught with single-gear is listed at £30 10s., or about $153, and with Albion two-speed gear at £36 15s., or $184. Model C is listed at only a few dollars more and it is an interesting proposition, for it is a lady's machine.

It is, generally speaking, an adaptation of the A model, but instead of the top tube being bent but slightly to join the saddle pillar lug it falls well down the seat-pillar tube, thus providing a fair lot of room for the lady's dress. But she will have to wear a fairly short skirt or, peradventure, a divided skirt. The makers have got over the gasoline tank problem by making it wider and shorter than in the men's model.

At the Scott Works

I was at the Scott works in the North of England the other day; the place where the great racing machines and men come from. Adjoining the factory, which is situated in a nice bit of country, is a private speed track. The 1916 machines are to be pretty much on the lines intended for 1915, during which year it has been impossible to cater for ordinary trade owing to war calls. W. Tunstall, the manager, did tell me, however, that some new minor details will be incorporated. The radiator, for the Scott is water-cooled, will be made larger and otherwise altered; a sight-feed lubricator is to be fitted and in a few other points there will be deviations.

I was shown a grim reminder of the war, viz., the foot-pedals with their connecting rod and part of a brake rod. These are all that remained of a man and a Douglas motorcycle when a German shell had done its work. Not a vestige of aught else was to be found. They were brought back by a military motorcyclist who has done brave things and handed them into the care and keeping of the Scott manager.

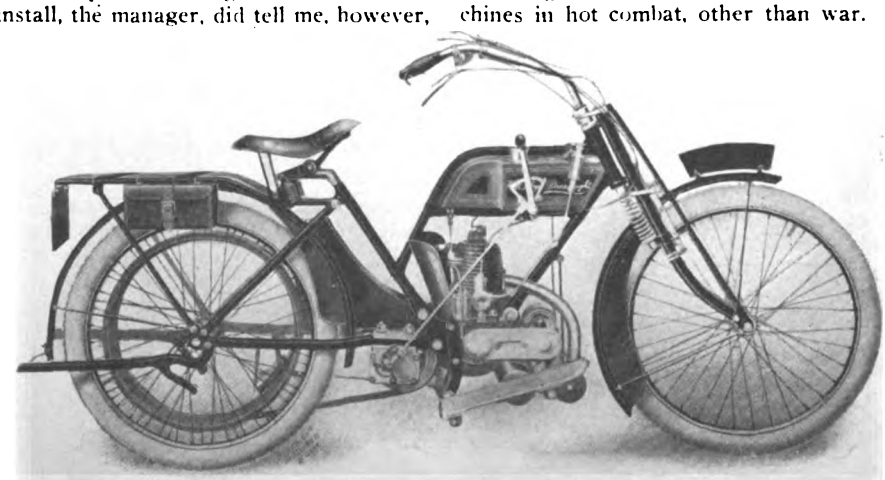
One Spoke Remained

By contrast, I know a captain in the Scottish regiment who also does a lot of cycling and motorcycling at the Front. He was riding in the danger zone when he heard the ominous shriek of a shell on the way. He dropped from his machine and ran to what he considered a safe shelter. The shell came, made the usual row and big hole in the ground, and all that the captain could find of his beloved machine was one spoke and part of the saddle.

British and Allies all tell me one tale about the motorcycles and their riders at the Front—that they figure in some of the most hazardous and responsible work. In days to come, one may be allowed to give some details.

Sport and War

It's a wonderful thing to note how closely linked with motorcycle sport is the daring and risky work of our motor men in France and Belgium, not to mention the other Fronts. Many of those who have earned fame for their reckless cornering in the Isle of Man and other racing grounds over here have employed their sensational skill to the country's advantage. And then sapient people growl sometimes about the folly and uselessness of speed contests! Anyway, the men are showing that fierce sport breeds great warriors, just as we know that races are the breath of life to motorcycle designers. Speed the day when we may once again be thrilled by the young bloods who know how to get the last ounce out of their machines in hot combat, other than war.



Model C Dreadnaught Lightweight for Ladies' Use, Made by Lloyd's. It Is Fitted with 2½ Horsepower Two-Stroke Motor and Two-Speed Gear

Of a Personal Flavor

Tom Wilkinson has been selected as manager of the San Francisco branch of the United States Tire Co., New York City. He succeeds W. R. Rigdon, who goes to the Boston branch. Wilkinson has been with the United States Tire forces for five years, and is well known on the Pacific Coast.

L. L. Banford, who has been in charge of the Indianapolis (Ind.) branch of the Stewart-Warner Speedometer Corporation, has been transferred to the home office in Chicago. He will work in the Eastern territory as special salesman.

Charles Johnson, who has been dangerously ill in Detroit with pneumonia, is recovering. He was recently appointed factory equipment manager of the Lovell-McConnell Manufacturing Co., Newark, N. J.

J. C. Rader, formerly assistant to J. P. Patterson, manager of the St. Louis branch of the Firestone Tire and Rubber Co., has been appointed general manager of the Auto Tire Sales Co., of St. Louis, succeeding Edward F. Bartling. The latter resigned to become associated with the Gibbs Brown Oil Co., of St. Louis.

Joseph E. Mayl is now manager of the branch in Memphis, Tenn., of the Firestone Tire & Rubber Co., Akron, O. He was for five years on the sales force of the St. Louis branch of the company.

Louisville, Ky., Jan. 4.—A. W. Ellis, manager of the local branch of the Goodyear Tire & Rubber Company, has returned from Liberty, Ind., where he spent the holidays with relatives. Business is exceptionally good with the Louisville branch for this season of the year.

Stanley Wilson, secretary of the D. P. Harris Hardware Co., has just returned to New York after a trip through the Middle West. He states that business has been especially fine in this territory, and in particular as regards Rollfast tires. He looks forward to a most prosperous 1916 season all over the industry.

F. A. M. STATUS IN LOUISVILLE

LOUISVILLE, Ky., Jan. 4.—Riders and former members of the Federation of American Motorcyclists in this district have received literature from Secretary G. B. Gibson, of Westboro, Mass., enclosing a message from A. B. Coffman, president of the organization. Kentucky at present is very poorly organized and has neither F. A. M. Attorney or Supervisor. Henry Pardon, at Owensboro, Ky., has been working hard to organize the riders in the Western section of the state, and has been very successful. In fact it has been suggested that Pardon would make an excellent supervisor for Kentucky. Frank Barkhouse, secretary of the Owensboro Motorcycle Club, has also been active in the movement.

AMERICAN MOTORCYCLES IN NATAL

Consul William W. Masterson, writing from his post at Durban, Natal, Union of So. Africa, says of the motorcycle in his territory: "The motorcycle is the most popular vehicle in Durban. A larger number of them are now seen on the streets than of motor cars, or even bicycles. Their popularity is enhanced by the sidecar.

"An excellent opportunity is offered for American manufacturers of motorcycles to establish agencies in Natal. About the first of the year an American firm of motorcycle manufacturers established an agency in Durban, and since that time, by advertising in the papers, by hustle, and by reasonable prices, it has succeeded in establishing a remarkably successful trade, until now fully half the motorcycles seen on the streets are of this company's manufacture.

"The agent has informed this consulate that another shipment, consisting of 120 machines, will arrive this month, and that at this time 100 have been delivered and paid for."

SURPRISING EXPORT FIGURES FOR A SINGLE WEEK

EXPORTS from this country during the week ending December 18, totalled in value more than $95,000,000.

A total trade of a half billion dollars in the month and five billion dollars in the year, with exports comprising two-thirds of the whole, is the unparalleled record of American commerce in November and the twelve months ending with November. Figures made public by the Bureau of Foreign and Domestic Commerce, of the Department of Commerce, show that November imports were valued at $165,000,000, as against $126,000,000 in 1914, and that they exceeded by $11,000,000 the former November record in 1912. It will be surprising to many to learn from the above figures that not only our exports, but also our imports, attained record-breaking figures last month.

The export total for November was $331,000,000 as against $328,000,000 in October, as compared with $205,000,000 in November last year and $278,000,000 in November, 1912, the former record.

WANT AN AMERICAN TWO-STROKE

Under date of December 16, the Sidecar Company, of 895 Fulham Road, London, S. W., England, advises the publishers of this journal that their company is very desirous of introducing an American two-stroke motorcycle. Manufacturers who are not already fully represented in England may find it to their advantage to communicate with this concern.

EXEMPTION IN PARAGUAY

A law enacted November 8, 1915, provides that unused motor vehicles, together with accessories and spare parts, shall be exempt from import duty in Paraguay for a period of two years from that date. The suspended duty on motor vehicles imported into Paraguay amounts to 62 per cent. ad valorum,

THE GUARANTEE AS A SELLING FEATURE

Two Sides to the Proposition of "Playing Up" the Promise to Make Good All Defects

By G. D. CRAIN, Jr.

...s article the advisability of ...ing after high-grade business when... was discussed. In this con... use of the guarantee, in an ... and well-defined way, may be ... in view of the fact that ... grade bicycles are guaranteed ... manufacturers for five years, as ... one year on cheaper wheels.

Advertising the Guarantee

... the general question of ad... guarantee is not one that can ... off-hand, nor is all the argu... of the affirmative. In fact, ... are strongly opposed to ... phase of the situation in any ... trying to handle each case on its ... that may arise.

...rantee may be compared with a ... te, or, more accurately, an ... ...ty. The guarantor is issuing ... covering the bicycle and its ... under conditions as stated; ... he is assuming a liability. ... ...ditions, he has given formal ... that he will make good, and it ... to do so.

...e, as a broad-gauge and ... dealer, he must do that ... customer comes back with ... part, due not to the fault of the owner but to a defect in the material, it is good business to go ahead and replace it, irrespective of whether the time limit exactly covered the period in which the breakage occurred. As a matter of good-will protection, this is essential; at the same time, it is an advantage to be able to settle the question on its merits—and the customer is more likely to appreciate good treatment then than if his attention had been called to all of the features of the formal guarantee at the time of the purchase of the wheel.

The dealer's assurance that a machine is up to the mark and that he will stand back of it always impresses a customer.

"We do not believe in stressing the guarantee," said a successful bicycle dealer recently. "We carry all grades of bicycles, some of them the very best, and guaranteed by the manufacturer for five years, and some cheaper models which are covered for only one year. Now, as merchants, we are standing back of all these wheels. We take the ground that anything we sell is worth the money paid for it; in short, that it is good merchandise. Hence, we let our customers know, as a general proposition, that they will be taken care of in connection with any defects in the bicycles which they purchase, without making a point of calling their attention to it.

A Conservative View

"Even on the bicycles which carry the long-term guarantee, we do not issue it unless it is asked for. We prefer to have the customer rely on our reputation for fair and square dealing, in case there is occasion to deal with anything in the nature of a breakage. This is possibly a conservative view of the situation, but it is one that we have found most satisfactory."

The chief point brought out in this con-

ARE YOU GETTING OUT OF THE RUT?

"BICYCLE DAY"—February 29—will be what you make it, Mr. Dealer. Success or failure will depend largely on you.

It is not entirely up to the manufacturers to help the dealers—the dealers can help each other. How?

If you are making use of effective selling ideas, if you've got a strong window display, if you are using sales-making advertising copy or circular letters—

Pass the good word along! Tell the bicycle editor of Motor Cycle Illustrated what you are doing to get out of the rut—don't bother about the literary part, we'll attend to that. Your ideas and the photos you send in will be printed in these columns.

Start the ball rolling toward the goal: ONE MILLION BICYCLES IN 1916!

Interior of the Hamilton Bicycle Shop, Owned by C. B. T. Hamilton

nection, it will be observed, is that the dealer quoted wants the customer to look to him and not to the manufacturer for adjustments of complaints. If he were to feature the guarantee, it would be necessary to point out, in the case of each individual sale, just the peculiarities of the special guarantee placed on it. In some cases the guarantee is broad and covers all features; in others, the manufacturer guarantees only those portions of the wheel which are of his own make. There are so many minor differences in individual guarantees, as a matter of fact, that it is impossible for the merchant to make a composite guarantee that he can announce on his own responsibility.

When to Advertise

This being the case, it is hardly worth while to advertise the guarantee, since it cannot be applied to the entire stock. Of course, if the dealer is handling one line exclusively, on which a uniform guarantee applies, this plan might work out, but in the case of the average member of the trade, it would not be a practicable stunt. Reasoning along this line, it appears as if the general proposition of keeping the guarantee in the background, until it is necessary to bring it forward into the light for examination in reference to any particular breakage, is to be favored.

When the customer is given a guarantee, at the time of the purchase of the wheel, he is put immediately in touch with the manufacturer, since it is the latter, and not the merchant, who is taking the responsibility. In the event of a breakage, the customer may take the matter up direct with the maker; and at long distance it is often difficult to get satisfactory adjustments, owing to failure to state all the facts or to make the circumstances plain. This may lead to irritation or dissatisfaction on the part of the customer; and in that event the merchant gets the reaction, since the owner is always inclined to blame the dealer if he doesn't get all that he feels is coming to him.

Customers Come to Him

"We encourage our customers to come to us with their troubles," said another bicycle man, who is a veteran in the business. "If they have a claim for breakage or defective parts, we represent them in their dealings with the manufacturer. We are usually able to get a satisfactory settlement, and are always in favor of a liberal interpretation of the guarantee, with the end in view of making the customer realize that we are working for his interest. It is, of course, for the good of the maker of the bicycle and ourselves that the user be satisfied, and go away boosting instead of knocking; and the best way to insure that is to handle all adjustments ourselves, and not risk having the customer take the matter up with the factory on his own account. There is too much danger of trouble arising from some misunderstanding which we would have been able to dispose of without difficulty."

Taking Advantage of the Guarantee

A point in connection with the guarantee is that it suggests several ideas in the mind of the purchaser. One is that since the bicycle is guaranteed for a given time, it doesn't make any difference what happens to it—a broken part will always be replaced. In certain cases this may encourage rough usage, if not actual abuse, and may lead to claims being presented that would not have been made otherwise.

A hardware man, who is likewise a big bicycle retailer, told how this worked out in some of his other lines.

"We formerly guaranteed pocket-knives," he said, "but we began getting so many come-backs that we found it necessary, after correspondence with the manufacturers, to remove the guarantee. It turned out that a great many people who bought knives which were prominently guaranteed promptly went out of their way to test them under conditions which made breakages inevitable, and calls for replacement under the promise made in the guarantee became all too frequent. We know that bicycles are sturdy and will stand a lot of rough handling, but reasoning from our experience in the other line, we have decided not to put the loud pedal on guarantees in our advertising or selling."

Not Likely to Have Complaint

The point brought out there is worth noticing, too, namely, that a bicycle of any dependable make is so well manufactured that the dealer is not likely to have many complaints regarding the service which it gives. That being the case, there is not much reason to feature the guarantee, from the standpoint of meeting any public demand. Owners of bicycles seldom have cause to complain that their mounts did not hold up long enough, and consequently when a man or boy buys a wheel he does so without any expectation of having to ask for a replacement of any part within a reasonable period. To make a guarantee is to assume a liability, as pointed out above; and while under the plan of con-

BELGIAN "REFUGEE" SKIDS TO VICTORY IN CHICAGO CLASSIC

Peter Himschoot Wins the 24th Annual Grind of the Two-Fifty Cycling Club; Anderson is Second; 13 Riders, Out of 40 Entries, Turn Out and Ride in a Steady Downpour of Rain

By BEAU

Start of the Chicago New Year's Day Race Held Under the Auspices of the Two-Fifty Cycling Club

C[illegible]ll., Jan 4.—Peter Himschoot, [illegible] Belgian-American Athletic Club, [illegible] in the Pullman bicycle race [illegible] here on New Year's Day [illegible] Cycling Club in a down- [illegible] It was only by wonderful [illegible] he sailed across the tape first [illegible] the title of chief scorcher. [illegible], competing unattached, re- [illegible] place.

Time 30:00 2-5 Distance 22 Miles

[illegible]'s time was 30:00 2-5, which [illegible] of a second better than [illegible] by Anderson. The distance [illegible] miles, and the going was ren- [illegible] the mud and slippery pave-

[illegible] forty-two entries, but due [illegible] other only thirteen men faced [illegible] Out of this field ten completed [illegible]

[illegible] collapsed at the finish [illegible] carried to shelter. The grind [illegible] the most gruelling ever wit- [illegible] Chicago fans, for the contest- [illegible] pedal over icy pavements, ford [illegible] of rain water, and ride in a [illegible] of the riders from seeing [illegible]

24th Annual Race

[illegible] of this the time for the 1916 [illegible] minutes better than the figures [illegible] year. The race was the 24th an- [illegible] New Year's event of the Two-Fifty [illegible] members are admitted only [illegible] by riding a mile in 2:50.

[illegible] of the spectators, each of [illegible] cyclists who ventured on the [illegible] New Year's Day deserves a huge [illegible], in addition to the tires, inner [illegible] lamps, etc., which they won [illegible]

Downpour at Start

The start of the race was made at Thirty-[illegible] street and the Grand Boulevard at [illegible] in the morning, the cyclists crossing the line in a downpour which increased as the race progressed. Accidents were just narrowly avoided because of the heavy fog. The finish was at 111th street in Pullman.

The only participant in the race who escaped a spill on the ice covered pavements was Himschoot. The other riders all had one or more spills. It was almost impossible for them to go very far at a reasonable pace and keep their wheels from skidding.

Reisner Leads for 30 Blocks

A. Reisner, of the Chicago Cycling Club, jumped into the lead at the start and set the pace for thirty blocks. He was the first to be eliminated when at 93d street, he skidded on a slippery turn and broke his chain. He was picked up by the emergency car which accompanied the riders. Jim Rose who finished seventh was bumped by an automobile at 103d street. He attempted to wheel into the car tracks, when the big touring car struck him, but fortunately he escaped injury.

Freight Cuts Into Field

A freight train at 95th street cut the field off from Himschoot and Anderson, who had passed the crossing in safety. C. White and T. E. Stasch, who had been engaged in a tussle with the foremost riders, were delayed five minutes by the train—enough time to put them out of the running. Far from being discouraged, the two cyclists made a hot fight for third position, White winning out by a margin of a few seconds.

Himschoot fought his way into the lead at 95th street. Three blocks further and he had increased his margin over Anderson to half a block, the best advantage any of the riders held at any stage of the race, with the exception of the time when the freight train cut into the field.

Anderson cut down the gap opened up by his rival steadily, until 107th street, when the two leaders struck a pond of water six inches deep for half a block and both had difficulty in making headway. A lively spurt of two blocks marked the end of the duel in which Himschoot won. The victor jerked his machine up the walk of the hotel and fainted on the steps. After he was revived, Mr. C. Kurtzeborn, of the Chicago C. C., took the young Belgian home in his auto.

Ed. Manning, competing unattached, was forced to turn back at 95th street, after a bad fall, while Ed. Murphy, of the Chicago C. C., quit the grind at 103d street.

NEW ENGLAND WHEELMEN RACE WON BY AICKELIN

NEW YORK, N. Y., Jan. 4.—With a big margin of almost five minutes, Eugene Aickelin was returned the victor in the New Year's Day Race of the New England Wheelmen from their club house at 162nd street and Jerome avenue to Bartow Bridge and return. The next in line was J. Hall, who was leading C. Tonjes, and the rest of the field of seven who came in straggling were covered with mud until hardly recognizable.

The bunch stayed pretty well together on the out-trip, but on the return trip Aickelin made a getaway and finished all alone.

USE WALL OF OLD STORAGE RESERVOIR FOR VELODROME

HOLLYWOOD, Cal., Jan. 1.—A race meet every Sunday with no prizes and likewise no entrance fees is the program of the "bunch of guys" who have discovered an ideal velodrome in an empty storage reservoir located two blocks from the entrance of Griffith Park in Hollywood. The new fellow in the game has to look out as there is a black pool in the lower part of the reservoir. The bicycle fellows have the first call on this speedway, and occasionally have a lively brush with some lucky chap who owns a Smith Motor Wheel; and there are even times when a motorcycle rider strays in to trim the bunch in a handicap grind. This speedway is not much on looks and is so well hidden that the events seldom are witnessed by spectators, except a few riders who are "in the know," but it is developing a bunch of amateur speedsters, some of whom are likely to be heard from in bigger meets.

SCHELL AND SMITH CAPTURE HOLIDAY BICYCLE RACES AT BUFFALO

BUFFALO, N. Y., Jan. 4.—For the first time in eight years the 74th Regiment A. A. attended the games of the 65th Regiment A. A. on New Year's night, and the former organization came 200 strong, with a fife and drum corps to help the sealing of the peace pact. A fine card of events were staged on that night, and two of the most exciting cycle races helped make up the card.

A hard fought contest developed in the two-mile lap race in which eight men started in the final. Spills cut the field down to three riders, but as Joe Schieder managed to gather enough points before he fell to entitle him to fourth prize the referee decided to allow him the place despite the fact that he finished over a lap to the bad. Fred Schell, an unattached rider, won the event with a total of 56 points. Second place went to Eddie Levy, his total being 47 points, and Fred Best carried off third honors with 31 points. Schieder's tallies amounted to 27.

Although the back-mark men tried hard enough to overtake the long-mark men in the mile and a half handicap the majority of places were accounted for by riders placed at 70 yards or over. A spill or two also featured this race. C. H. Smith, a Royal Flyer club member, won the race from the 170-yard mark, and second place went to the young Polish rider, Isadore Gronkowski, who had twenty yards. John Tanner, 110 yards, finished third, and Fred Best, 70 yards, was placed fourth. Summary:

Two-mile lap race, amateur—Won by Fred Schell, unattached, 56 points; second, Eddie Levy, Pirate C. C., 47 points; third, Fred Best, Royal Flyer B. C., 31 points; fourth, Joe Schieder, Y. M. C. A., 27 points. Time, 4:32⅗.

One and one-half mile handicap, amateur—Won by C. H. Smith, Royal Flyer B. C., 170 yds.; second, Isadore Gronkowski, Royal Flyer B. C., 20 yds.; third, John Tanner, C. M. B. A., 110 yds.; fourth, Fred Best, Royal Flyer B. C., 70 yds. Time, 3:21.

OHRT OUT OF HOSPITAL

SAN FRANCISCO, Cal., Jan. 2.—Hans Ohrt, the amateur champion bicycle rider, who was very ill in a hospital in San Francisco, has fully recovered. In a letter to **Motor Cycle Illustrated,** Ohrt states that after his operation for appendicitis he was operated on for an abscess which was close to the brain. Ohrt left the hospital the day before Christmas.

Ohrt's fine physical condition enabled him to go through the two operations without suffering any great weakness. He even gained weight while confined to the hospital. Ohrt says when he comes East next season he will bring with him, Harry Hoffman and Eddie Carroll, two of the most prominent coast amateurs.

CRESCENT CLUB ELECTS

BALTIMORE, Md., Jan. 4.—The semi-annual election of officers of the Crescent Bicycle Club was held on December 28, and resulted in several changes being made. Wm. T. Wright, formerly color bearer, was elected president, succeeding Welby Sherman, who was elected vice-president, thus changing places with Wright, who had been holding down the offices of vice-president and color bearer. Fred M. Sanborn succeeded himself as treasurer, and had the duties of secretary thrust upon him in addition to his old job. Walter Iglehart, a new member of the Crescents, who has proved his worth by his enthusiasm, was rewarded by the position of color bearer. The captain is Langdon M. Sanborn.

BUTLER CLUB DANCES

HAMILTON, O., Jan. 3.—The annual New Year's eve dance of the Butler County Cycle Club, held at the organization's quarters, was attended by the largest crowd which has been seen at any of its social functions this season, and was therefore a huge success. A big Christmas tree was a glitering feature. The club held open house on New Year's day, following its immemorial custom.

BIG RACE FOR FRISCO CLUBS

SAN FRANCISCO, Cal., Jan. 3.—Under the auspices of the California Associated Cycling Clubs a home trainer race will be held on January 8. It will be twenty men inter-club affair. The Century Wheelmen will hold a five-night handicap race some time in January.

TO FORM PERMANENT BODY

ST LOUIS, Mo., Jan. 4.—Cycle dealers of this city have resolved to put St. Louis on the trade map and by way of starting the ball rolling they have formed a temporary organization of motorcycle, cycle and accessory men. This association will be made permanent at another meeting to be held in a week or two. The new trade body will be known as the St. Louis Cycle Trades Association and membership will be open to all workers in the cycle fields. Persons engaged in the trade outside of St. Louis will be accepted as associate members.

August Schueddig, of the Leacock Sporting Goods Company, of this city, was made temporary chairman, and G. F. Wiewemer is now acting as the secretary-treasurer.

The organization states that its objects are to promote the use of motorcycles and bicycles, both in business and recreative lines, and to co-operate in such a way as to bring to the attention of the public the value of the two-wheeler.

NEW YORK POLICE GET REPEAT ORDER PIERCE SHIPMENT

NEW YORK, N. Y., Jan. 3.—The New York Sporting Goods Co. has today delivered its first re-order of bicycles to the New York Police Department, numbering seventy-five machines. In the course of a few days the sporting goods company expects to deliver seventy-five more wheels on a second re-order. All of these machines come from the factory of the Pierce Cycle Company, Buffalo, N. Y., and they bear the manufacturer's name plate. The police bicycles are each equipped with Pennsylvania Vacuum Cup Tires. Deliveries of Indian motorcycles to the Police Department by the New York Sporting Goods Co. will be made shortly. Lamps from the Rose Mfg. Company, Philadelphia, will be used on the police bicycles.

BIG DEMAND FOR LADIES' MODELS

DAYTON, Ohio, Jan. 3.—The biggest demand for ladies' models during the holiday season in the history of the company is reported by the Davis Sewing Machine Co. Advertising Manager S. H. Ankeny says that orders poured into the factory by telephone and telegraph from dealers and jobbers all over the country. "I believe," he said, "that this is a sure indication that the bicycle has returned to popular favor and has come back to stay. During the holiday season we also enjoyed an unprecedented demand in men's and juvenile models."

ST. ONGE VISITS WORCESTER

WORCESTER, Mass., Jan. 2.—Fred St. Onge, who is connected with A. E. Provencal, of Montreal, the Smith Motor Wheel distributor for eastern Canada, is visiting friends and relatives in Worcester during the holidays. When he returns to Canada he will introduce the Red Arrow bicycle, the popular machine made by the J. W. Grady & Co. St. Onge expressed himself as highly satisfied with the cycle prospects in Johnny Cannuck's country and believes that record sales will be made.

Four Railroads Are Employing Outfits Like the One Illustrated Here; With Two Passengers It Can Make 12 Miles Per Hour; With One Passenger, 20 Miles

JENSEN VICTOR OF NEW YEAR RACE OF C. R. C. A. OVER BRONX COURSE

NEW YORK, N. Y., Jan. 4.—In competition for the annual trophy, eleven members of the New York Division of the Century Road Club Association started at 10:35 o'clock Saturday (New Year's Day) morning, from 162nd street and Jerome avenue, in the Annual New Year's Day Race to the Pelham Creek Bridge at Bartow and return, a total distance of 16.6 miles.

This race was the third for this trophy, which must be won twice for permanent possession; those having already won it being Arthur Morgan, 1914, and Anthony Desimone, in 1915. In addition to this first prize, several other prizes were offered to the participants up to the fourth position in finishing.

Edwin Jensen, who has, literally, "cleaned up," as the vernacular goes, during the past year in winning road championships and establishing new records for America, with the assistance of John Marquart, accounted for this year's race, and covered the course in the remarkably fast time of forty-six minutes, nosing out Marquart in the final sprint, the latter's time being one-fifth of a second slower.

Marquart was responsible for this fast time; being a resident of the Bronx, he was able to show Jensen a short route, which is allowed under the rules of the race, and made the getaway just in time to "lose" the field, resulting in getting to the tape about half a mile in the lead.

Not until six minutes and seven seconds had passed did the remainder of the field come into view, and when they did Ray Caldwell was leading George Harvey and they finished in that order through the sprint. Next in line was Johnson, who had momentarily slowed down but was not passed by Naphtal, the latter exerting a final effort to better his position. After Naphtal, came Ex-Captain George Steppello, Taub and Belmont. Mullin and Zarr were not placed, for failing to make the turn at the further end of the course.

Reports of the first Association riders to complete a century (100 miles) in the new year have not been received yet.

Summaries for the New Year's race:

Pos.	Rider.	Time.
1	Edwin Jensen	46 min.
2	John J. Marquart	46 " 15 sec.
3	Raymond Caldwell	52 " 7½ "
4	George I. Harvey	52 " 10 "
5	Nelson Johnson	52 " 20 "
6	Joseph Naphtal	52 " 22 "
7	George Steppello	53 "
8	Isadore Taub	53 " 30 "
9	William Belmont	53 " 50 "

CENTRAL CYCLE RENEWS

WICHITA, Kan.—The Central Cycle & Supply Co. has renewed its contract for the Smith Motor Wheel for 1916. W. H. Nichols, the proprietor, is one of the most aggressive dealers in Kansas and has made preparations for a big sales campaign involving the Motor Wheel and a number of models of high-grade bicycles.

CHICAGO "OUTLAWS" GET OPTION ON GARDEN

After Signing Up Twenty-Four Riders for Windy City Grind, Packey McFarland Gets Option on Madison Square Garden for Six Day Race in December; Professionals Band Together to Form Union

NEWARK, N. J., Jan. 4.—Thomas P. Convey, who, with Packey McFarland, the Chicago boxer, and Michael Boyle, has signed up twenty-four riders for an "outlaw" six day race in the Windy City during the first week of February, announced, when in New York on Monday, that he had secured an option on Madison Square Garden to hold a six day race there early next December. Convey said that he had come to terms with Harry Cockrane, the general manager of the Garden.

Mihlon Also Has Contract

On the other hand, Frank Mihlon, secretary-treasurer of the Cycle Racing Association, which really controls professional racing in the United States, claimed that he and his partner Uppercu, had an iron clad contract for three years with the owner of the Garden and that no other party could hold a six day race there.

Convey left for Chicago on Monday without the signed contracts of Alfred Grenda and Fred Hill, the winners of the New York race this winter. Convey stated last week that Grenda and Hill would fall in line with the other twenty-four riders who have signed up for the Windy City grind, but this failed to materialize. Grenda and Hill did not wish to incur the wrath of the National Cycle Racing Association, which has threatened to suspend all the riders going over to the prize fighter and his partners, unless the latter came to terms with the C. R. A., holder of the indoor franchise at Chicago, which they refuse to do.

C. R. A. Refuses Permission

Last Monday Packey McFarland came to Newark to get the C. R. A.'s permission to run a six day grind in Chicago and to sign up the professionals who ride for that body. But both Messrs. Uppercu and Mihlon, who are at the head of the C. R. A., which controls the indoor franchise in Chicago, refused to allow McFarland and his partners to stage the affair, and the National Cycling Association, which supervises amateur and professional cycling, would not grant a sanction.

Thereupon the Chicago promoters went to the riders and finding them disgruntled, because they would be practically idle until the Newark Velodrome opens next spring, and the C. R. A. has been making no successful efforts to employ them during the winter months, realized that there would be no difficulty in persuading the cyclists to sign contracts for the six day race proposed for Chicago.

N. C. A. Backs Down

At a secret conference in this city, the professionals decided to thrown down the gauntlet to the C. R. A. and N. C. A. Seeing that the revolt was making rapid strides, the National Cycling Association withdrew its unqualified refusal to grant a sanction and announced that its permission would be given to stage the Windy City grind provided the promoters would give to the Newark men five per cent. of the receipts up to $10,000, and ten per cent. up to $20,000.

"We have not yielded a step to McFarland, Convey, and Boyle," said an official of the N. C. A., "nor will we until they promise to abide by our rulings. We have not refused them a sanction entirely. We sent the Chicago promoters to Mihlon and Uppercu to settle their differences. Our franchise for Chicago is held by the Newark men. They wanted McFarland and his colleagues to give them, in return for permission to promote the race, five per cent. of the receipts up to $10,000 and ten per cent. up to $20,000. It seems to me that this sum is small enough. We are not trying to hold up anybody. We are simply trying to protect the interests of all concerned.

"Mihlon and Uppercu have promoted two races in Chicago, one this year and another in 1914. Last year they lost $6,000, and this year they cleared about $1,000, and they should be permitted to make up this $5,000 deficiency before any others should break in on their field."

The riders are reported to have applied for admission in the Federation of American Motorcyclists, but since the national body of motorcyclists has made no provision for supervising bicycle competition, the professionals are said to have taken definite steps toward forming a union and affiliating with the American Federation of Labor. About twenty riders have each paid an initiation fee for charter membership.

THE GUARANTEE AS A SELLING FEATURE

(*Continued from page 44.*)

ducting a business on a liberal basis this liability exists in tacid form anyhow, it is better in this condition than to be made explicit and prominently featured.

Playing It Up Strongly

On the other hand, there are dealers who take the view that since there is little chance of trouble, they can afford to go beyond the manufacturer's guarantee, and to put a broad coverage on all the wheels they sell, guaranteeing them for three or five years, whether the makers are willing to stand behind them to that extent or not. They "play up" in their advertising the fact that they are using this guarantee, interpreting it as a surety of satisfaction to the customer, even going so far as to say that the reason the guarantee can be made so strong is because of the high quality and general dependability of their goods.

It is worth mentioning in this connection that the guarantee is no longer being featured in the sale of automobiles. When motor cars were in their early stages of development, people wanted to know for how long they were guaranteed. This indicated that they expected a certain amount of trouble, and wanted to be prepared for it. Now the average motorist buys a car without knowing what the guarantee amounts to. He expects to get the right kind of treatment if he has trouble, but he doesn't anticipate it, particularly, and therefore doesn't worry about the guarantee. Furthermore, the dealer who gave a great deal of emphasis to the fact that his car was guaranteed would raise the suspicion in the minds of some people that the machine must have been having its troubles to require such strong backing.

There are so many specific, "brass-tacks" arguments connected with every bicycle, and with bicycles as a whole, and so many opportunities to create trade by showing what the bicycle can do both in business and pleasure that a prominently featured guarantee seems, to the writer, at least, superfluous. It may be useful at times; but the same emphasis could just as well, if not better, be placed on some more tangible point.

BIG TRADE MEN MEET IN CLEVELAND

CLEVELAND, O., Jan. 3.—A meeting of prominent manufacturers in the cycle trades was held in this city recently to consider plans that will materialize the popular slogan of the year: "One Million Bicycles in 1916." Efforts were made to interest metropolitan newspapers in establishing bicycle departments in their sporting news sections.

Acting on the suggestion of the manufacturers the Chicago Evening Post is running a bike news column, and it seems certain that other newspapers will follow suit in giving publicity to the two-wheeler. A publicity campaign in which bicycling will be effective is assured.

At the Cycle Parts and Accessories Association and the Allied Cycle Trade meetings which are being held this week in New York, a resolution is being presented incorporating complete and detailed plans for the huge campaign for spreading interest in bicycling and assisting the dealers.

Those who attended the meeting in this city were:

J. C. Ferguson, representing the Eclipse Machine Co., of Elmira, N. Y.; J. W. Brant, representing the Troxel Mfg. Co., of Elyria, O.; J. C. Manternach, representing the Standard Welding Co., of Cleveland, O.; J. C. Spray, representing the Diamond Chain and Mfg. Co., of Indianapolis, Ind.; J. B. Tucker, representing the Tucker Wood Work Co., Sidney, O.; Charles E. Weaver, representing the Kelly Handle Bar Department, American Stove Co., Cleveland, O.; S. A. Falor, E. R. Stillwell, W. J. Cameron and Harry S. Quine, representing the Goodyear Tire and Rubber Co., Akron, O.; W. T. Jefferson, publicity representative of the Erwin & Wasey Co., of Chicago, advertising.

FRANK KRAMER'S LIFE STORY

Second Installment of the First Authorized Story on the Great American Champion's Career

How Kramer Entered the Professional Ranks—His Victories Over Top-Notch Riders

By HARRY MENDEL

K[illam] relates interestingly how he [decided] to become a professional bike [rider]. It was when he was winding up [the season] of 1899 as an amateur that he [felt a] strong desire to turn to the pro[fessional] ranks, and it came about by an [incident] which happened on the way home [from a] race meet in Philadelphia. Kramer [was sitting] in the train with his uncle, Mr. [Burnett], who accompanied him to practically [all] his races. Major Taylor, the [colored] rider, who had won two pro[fessional] races at the same meet, came [along] and dropped into [conversation] with [Fisher] and Burnett. He [had] a roll of bills [that] did trip up an [amateur] as Kramer ex[pected].

What Taylor's "Roll" Did

Major Taylor revealed that Kramer was [anxious] to go out in [the] professional ranks [to get] the money. [Kramer] told the writer [that he] had been thinking [of] the same thing [at the] same time, and the [sight] of Taylor's roll of [bills] just settled the is[sue].

Back in 1900 Kramer [walked] to the office [of] Chairman Amos G. [Shaffer] of the Board [of Control], and asked [for] a registration card. [The] clerk immediately [gave] an amateur card [and began] making it out. [Kramer told] him that he [didn't] want an amateur, [but] a professional card. [The] clerk was greatly [surprised] and said: "Frank, are you fool[ing]? Do you really want a professional [card]?" In those days practically all the [riders] who became professionals were [disqualified] for selling their prizes, and to [have] a rider step up and ask to be made [a] professional was indeed a great surprise [to] the clerk.

Had Enough Glory

Kramer told him that he had been national champion for two years and received all the honor and glory possible from being an amateur "champ." But he insisted: "I am going out and race for money, and if I cannot make good as a professional rider, I am going to get out of the game." Well, there is no denying that Frank made good, and he certainly received more money out of the bicycle game than probably any other rider who ever mounted a bicycle.

Kramer was given a great ovation when he won the half-mile open race on Sunday, May 6, 1900. This was Frank's debut into the professional ranks, and it was the first race meet of the season. He certainly started his career in an auspicious manner, and his victory drew forth tremendous applause. Kramer's chances looked rather slim going into the last bank, but a swerve of Jay Eaton and Bobby Walthour on the turn allowed him a chance to come through, which he did skillfully, making up two lengths in the homestretch and beating out Howard Freeman, who finished second, and Jay Eaton, who came in third.

Freeman is now one of the best all-around newspaper men in Newark, if not in the East. His cartoons are a daily feature in the Newark *Evening News*, and he writes excellent breezy bike news and comment. "Poke," as he is known by all of his friends, can also handle a camera, and for a number of years was the press agent at the Newark Velodrome.

Freeman Got Even on Kramer

Freeman evened up things with Kramer in the two-mile handicap race by defeating the East Orange rider. The first lap of the half-mile race which Kramer won was ridden slow, but then Jay Eaton hit up a stiff clip. Walthour was trailing, while Freeman and Fisher were fighting them around the outside. Kramer was trailing in the rear and seemed to be out of it entirely, but when Eaton and Walthour swung wide on the last turn, Kramer came through on the pole and won by a half length.

"Whirlwind" Major Taylor, the Colored Professional Champion of 1900, Who Persuaded Frank Kramer to Turn Professional

In the two-mile race, twenty-three riders started. There was no one to shout "skiddoo," as that phrase had not been coined as yet. There were three groups in the race, one composed of limit men, another of middle markers, while Kramer, Freeman and Eaton rode from the scratch. The track was a quarter mile affair, and on the fifth lap the pace slowed down, allowing the scratch men, who had been systematically changing pace, to overtake them. Freeman went into the lead, and Downing came out of the bunch and went around them. At the bell, Downing sprinted, with Freeman on his wheel. Freeman came out at the eighth lap and beat the speedy field of riders.

First Dead Heat

Sunday, May 20, was a fine day, and Kramer won the half-mile open with a burst of speed which reminded one of the days of the mighty Arthur Zimmerman. In the two-mile handicap, Kramer rode the first dead heat of his career. It was with the late Floyd McFarland. Kramer rode the distance in 4 min. 10⅗ seconds, which at

Digitized by Google

that date was pretty near the record time.

By his work he proved that he possessed great ability both in speed and headwork. The two-mile race in which he was tied with McFarland was a battle royal. Kramer, McFarland, Eaton and Freeman formed the crack quartet on scratch. Fisher had 30 yards and Walthour had 60 yards. These six formed a back bunch, and eight riders formed a front group. Kramer had a slight advantage going into the backstretch; McFarland, however, crawled up inch by inch. It was doubtful if Kramer could hold his sprint to the tape, but he did, and the crowd shouted like mad. A. G. Batchelder, chairman of the National Cycling Association, declared the race a dead heat. In the half-mile race, Frank finished two lengths in front of Freeman, and Freeman had two lengths on Jay Eaton.

Almost Mobbed by Crowd

Kramer was almost mobbed by his admiring friends, who numbered close to 5,000, when, on Sunday, May 27, he won the five-mile handicap race from scratch. His riding was the best seen in years, and he won over a fine field, consisting of Tom Cooper, Floyd McFarland, Jay Eaton and Orlando Stevens. Kramer's time was 11 minutes 14⅗ seconds. On the same day Kramer did not do so well in the half-mile open; in this race McFarland sprinted for a quarter of a mile, and Kramer could not pass him.

It was in June that Kramer rode the first big match race of his career with Tom Cooper, who had won the national professional championship in 1899. The lad who had won the amateur championship was meeting the holder of the professional title. It was to have been the best two out of three heats at one mile, but owing to a fall the second and third heats were postponed for two weeks, after Cooper had won the first. Kramer came back, however, and took the next two and the race.

Cooper Takes First Heat

Hadfield, who was pacing the riders, dropped out at the end of the third lap, or three-quarters of the distance, leaving Cooper up in front. Cooper slowed up and ran up the back, watching back all the time to see what Kramer would do. On the turn going into the backstretch, Kramer jumped and started through on the inside. Cooper saw him coming and closed down on the inside. The riders collided and both fell. They got up and immediately started an argument, when suddenly Kramer grabbed his bike, mounted it, and started for the tape. Cooper watched him for an instant then took his own wheel, straightened the handle bars, and went after Kramer. He caught him on the turn and beat Frank out at the finish. Both riders were badly cut up in the fall. Cooper strained his shoulder and would not ride again that day.

How He Beat Cooper

Sunday, June 24, Kramer won the two remaining heats of the match that afternoon and was heartily applauded by the 6,000 spectators. In both races he won just as he is doing today—beating out his men at the tape by coming from behind. The margin of victory was very close; in the first race he won by about a foot, while in the second heat his win was accomplished by half that distance.

Cooper was not the contender for the title in 1900, but if Kramer thought by taking his measure in the match race that he would have clean sailing for the championship that year, he was very much mistaken. Major Taylor was just then at the zenith of his power, and it was the colored boy who took the national championship, and not the East Orange speed merchant. Kramer was the runner up, but Taylor, with his French sprint, natural speed and cunning tactics, ran off with the title.

When Taylor Trimmed Kramer

Major Taylor and Kramer met in a match race at Manhattan Beach, on Saturday afternoon, June 30. This was the first match race that Kramer rode against Taylor, and the colored wonder justified all the predictions of those who said he could beat them all, by winning in two straight heats. In the first, Kramer was beaten by a length and a half, and in the second by less than a half length.

Although it is more than fifteen years since this race was run, Kramer still has a vivid recollection of how the darky "put it over him." The other day the writer went out to East Orange to call on the American champion, and speaking of this race, Frank said, with a reminiscent smile:

Taylor Had More Speed

"I was outjockeyed in the first heat. Getting into the homestretch, I looked around for Taylor, and before I knew what was happening he shot past on the inside and won the heat. In the second heat, however, Taylor did not outgeneral me as he did in the first, but he had the least bit more speed and won by less than a half a length."

Kramer only won one national championship race in 1900, and this was at Asbury Park, on Wednesday afternoon, August 8. Earl Kiser finished second and John Fisher third. Kramer finished second on three occasions, and third, four times. The final standing of the riders, with Major Taylor, the champion, was as follows:

	First	Second	Third	Pts.
Major Taylor	5	1	0	40
Frank Kramer	1	3	4	20
Owen Kimble.....	2	1	1	18
Freeman	2	0	0	8
John T. Fisher.....	0	0	2	5
James B. Bowler.....	0	1	0	2

STARTING LIFE RIGHT

Master Arol H. Bernard, a 3-Year-Old Rider of Tiffin, O.

Newark fans could not get enough of bicycle racing in the daytime, and on Thursday July 19, night racing was inaugurated. Light was supplied by big lamps, suspended from poles along side of the course. A good view of the race was to be had at nearly every point. The first night race run was a half-mile open, which was won by Howard Freeman. Bobby Walthour finished inches ahead of Kramer for second place. Frank came back and won the five-mile handicap event, riding from scratch. Hardy Downey followed Kramer home.

Kramer tells an interesting little yarn of what happened on July 22, when the big crowd could not get out of the ordinary exits and broke down a portion of the fence and swarmed through. The gates had been shut to get the people to leave the grounds through another way and through the "Shooting Park," where beer was being sold.

Men battered down the door with a heavy beam, and the police took hold of four of them. Before the cops had gone ten steps the crowd was upon them, and after a tussle the blue coats were routed and the prisoners released.

The big feature on this eventful day was a team match race in which Tom Cooper and Orlando Stevens easily defeated Frank Kramer and Jay Eaton. Cooper and Stevens had more speed, and won in two straight heats. In a five-mile handicap race, Kramer came back by taking first place.

The "Demon on Wheels"

On Labor Day, 1900, Major Taylor, known as the colored "Whirlwind," "Cyclone" and "Demon on Wheels," won the quarter of a mile championship of America at the Vailsburg track. It was the first national race ever held in Newark under National Cycling Association regime, and was also the first circuit meet sanction ever to be granted to any track for a holiday. The colored rider clearly proved his worth. He met a field of the most speedy sprinters who could be brought together in America, and went away from them in a way that astonished those who thought they were thoroughly familiar with his powers. The crowd was the largest of the season, and they fairly went wild over the colored rider. Kramer finished second and Fisher was third. Kramer got into the final by defeating Owen Kimble. Taylor beat Tom Butler and Fisher vanquished Willis Coburn. In the final, Taylor rode from the rear and first passed Fisher and then Kramer, winning by a length and a half. The time for the distance was 33 seconds. Taylor had hardly dismounted when the crowd swarmed over the track and into the arena to pay homage to the wonderful colored cyclist.

Kramer Suspended for Not Riding

On Saturday, September 22, the championship races came to a close with a one-mile event, contested at Montreal, Canada. Kimble led Taylor home by two lengths, while George Collett finished third. Kramer refused to ride in one of the semi-finals and was suspended for the rest of the day. Kramer was pretty badly used up in his heat and did not want to start.

After this Saturday in Montreal, Kramer jumped back to Newark, and on Sunday afternoon won a big 25-mile race.

(To be continued.)

Start "Bicycle Year" Right

Nineteen Hundred and Sixteen will go down in business history as "Bicycle Year."

You'll see the biggest return to bicycles ever known. What will be your part in the making of bicycle history this coming year?

Right now—before the man across the street gets the jump on you—prepare for the demand that's coming by stocking up with a full line of the acclaimed leaders of the bicycle world—

Pope-made Bicycles

Columbia	Crescent
Tribune	Pope
Rambler	Cleveland

You know that the parts of a Pope-made bicycle are not picked up on the open market—but made to order. You know about the many original features of Pope construction and design—the superior finish—the luxuriousness of equipment—the all-around efficiency of these quick sellers.

And your customer, though he may not know all these technical points, knows the prestige gained by these bicycles during their thirty-eight years of manufacture.

The result is that you can sell enthusiastically to an enthusiastic customer when you handle Pope-made, name-plate bicycles.

Write for prices—you will find them interesting.

The Westfield Mfg. Co.

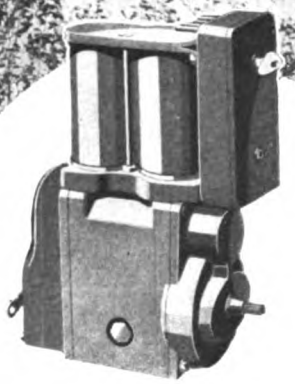
A New Brand of "Night-Riders"

They came into existence when the REMY Equipment began to appear as an important part of Motorcycle equipment.

Now you will find there are thousands of these "night-riders" on all kinds of roads, from Maine to California, protected from the dangers of darkness by the



REMY

Motorcycle Lighting-Ignition System

The REMY system stands for a brilliant, never-failing light at the 'fore and aft of a Motorcycle and strong, reliable ignition always available. Spill-proof battery. Protected wiring. A system fully worthy to bear the same name as the famous REMY equipment for automobiles.

See the REMY system demonstrated on a Harley-Davidson. Service stations nearly everywhere.

Here's the Safest, Most Logical Place for Your Prest-O-Lite Tank

If all the motorcycle engineers and designers since the first motorcycle was built had put their heads together and decided upon the most convenient, safest, simplest and most logical place for the Prest-O-Lite tank, and if they had combined their efforts in the construction of a strong, inexpensive holder for the Prest-O-Lite Tank, we believe they would have unanimously agreed on the

One Dollar Leonard Prest-O-Bracket Neatest Cheapest Strongest

YOU CAN'T BEAT THE PREST-O-BRACKET! It's as naturally *the* place for your tank as the front fork is the proper place for the lamp.

The LEONARD holds the tank out of danger of being struck in case of a spill.

The LEONARD does away with the need of long tubes that clog and break. Just a short eight or ten inch connection from tank to lamp.

Then, again, you get a better light because of the direct connection and steady, even flow of gas.

You have your entire lighting unit directly before you, permitting the adjustment of gas while lighting.

The added weight of the TANK over the front wheel adds to the riding balance and makes steering easier.

The LEONARD clamps to the fork brace directly under the headlight and is held rigidly in place by means of bolts. It weighs but 16 ounces and is made of nickel-steel.

When you consider the many talking points of the LEONARD PREST-O-BRACKET your common sense will tell you that here is the solution of the tank-carrying question.

Go to your dealer and ask for a LEONARD PREST-O-BRACKET *today*. Remember the price, $1.

Dealers—are you ready for the big demand?

BLUE STREAKS

In a certain sense the Motorcycle Manufacturer risks his own reputation in his tire equipment.

Yet every leading Motorcycle Manufacturer specifies Goodyear Blue Streaks as standard tire equipment for 1916.

Could any argument we might advance in behalf of Blue Streaks compare with this unequivocal endorsement?

The specifications of the Blue Streak Tire indicate why this tire has so splendidly demonstrated its superiority.

For example, there is 4-ply fabric—the same as used in the small-size automobile tires.

Then there is a breaker strip, built between the tread and the carcass. This protects the fabric and prevents tread separation.

There is a metal valve spreader which clutches the rim like a vise—so Blue Streak Tires can't creep.

And Blue Streaks have the exclusive Goodyear "All-Weather" Tread. We believe no other tire has a tread so wide, or thick, or deep.

These are the reasons Blue Streaks should be your only motorcycle choice, whether you are a rider or dealer.

Morrow

"The Brake that Cancels Danger"

MORROW control means safety. Safety is what the buyer demands first and last in his mount. And NO brake can so strongly emphasize the absolute smoothness, ease of handling and safety of the bicycle as can the MORROW.

In the MORROW the rider gets the most positive forward drive—remarkably free coasting. The MORROW has the largest braking surface of any coaster brake made. No less than 24 quarter inch balls are used in the MORROW. This makes for marvelous coasting smoothness.

This year will witness the greatest bicycle boom in the history of the industry. **The most practical and effective boost the bicycle dealer can give his bicycle business is to equip each bicycle he sells with "The Brake That Cancels Danger."**

Eclipse Machine Co. Elmira, New York

Harley-Davidson

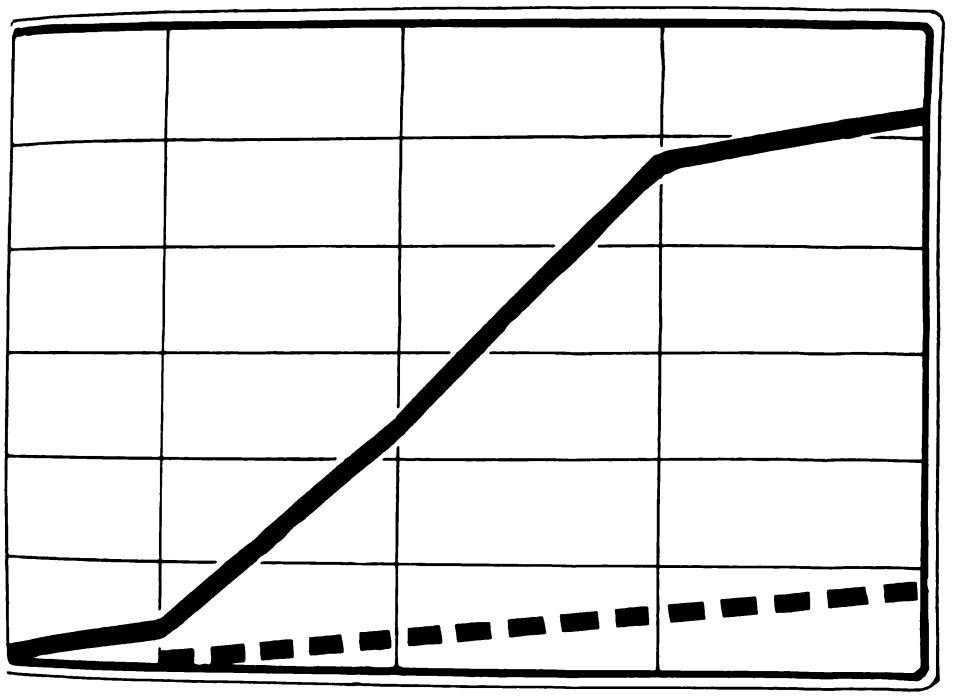
VICTOR ROOS, Harley-Davidson dealer in Omaha, is a typical example of the sort of men who sell Harley-Davidsons. To think of Roos is to think of Harley-Davidson—he is all Harley-Davidson, simply wrapped up in his business. He is an enthusiastic rider, a man who makes his customers his friends.

Four years ago, after selling another make, Victor Roos took on the Harley-Davidson. Since then he has outstripped his competitors, who were enjoying a far bigger motorcycle business than Roos when he signed his first Harley-Davidson contract.

Victor Roos is a typical Harley-Davidson success. He is one of the red-blooded sort of men who singled out the motorcycle business and staked their future on the industry.

Digitized by Google

nSales in Omaha



Comparison of 1916 shipments of Harley-Davidson motorcycles with 1915 shipments to Victor Roos

During the first four months of the 1915 season, or up to February 1st, we shipped Roos three machines, but he sold 57 during the season. This year he got a better start, and up to January 1st we had shipped him 26 1916 models. How many Harley-Davidsons he will sell during 1916 can only be conjectured.

There are two big reasons for Victor Roos' success. He secured the right machine, and then went out and pushed the line.

Any dealer with equal enthusiasm and ability, and backed up by the intensive co-operation of the Harley-Davidson factory organization, can duplicate Roos' record in a like city.

Running Day and Night

THERE are 1400 men employed in this factory, 1100 by day, 300 by night; and there are 48 distinct departments.

With few exceptions, such as tires, magnetos, etc., every Smith Motor Wheel part is made and finished in our own factory.

All of the stampings are made in our press department, which is one of the largest in the world, consisting of 122 presses, ranging in sizes up to 2000 tons pressure. The Motor Wheel parts that are drop forged are the products of our drop forge plant, which is one of the most modernly equipped in America, having 18 hammers, of from 1000 to 5000 pound drop.

If you are not a Smith Motor Wheel dealer write for our 1916 Profit Proposition to Dealers. Tell us the lines you handle and the size of your business. Address:

The Big Motorcycle Market—
Where It Lies

The modern trend is toward labor and time-saving devices, of which the motorcycle stands in the front rank.

Merchants, salesmen and contractors are using the motorcycle in their business every day—and saving dollars as well as hours.

But there is a vast army of mechanics who are spending precious hours traveling to and from their work. A few of them have already found the motorcycle to be just what they need to help them make the most of every spare moment. But the great majority offer an almost untouched field for your sales effort—and mechanics have the money—especially in these prosperous times.

The Motorcycle that is the logical one to sell the mechanic is the

Pope Lightweight Model H-16

for the mechanic does not buy for the sake of great speed, great power, nor for the pride of having a more expensive model than his neighbor. The Pope Lightweight meets his demand for moderate speed, moderate power and moderate cost, combined with simplicity of construction and the lowest possible up-keep.

After five years of popularity this model is acknowledged to be the leader of the lightweight class in America. It has behind it the experience, the skill, and the reputation that has standardized the name of Pope throughout the world.

Have you got the Pope Lightweight to sell to this big market now? If not, you will find our prices worth writing for.

THE ORIGINAL INDIANAPOLIS G & J BICYCLE TIRE

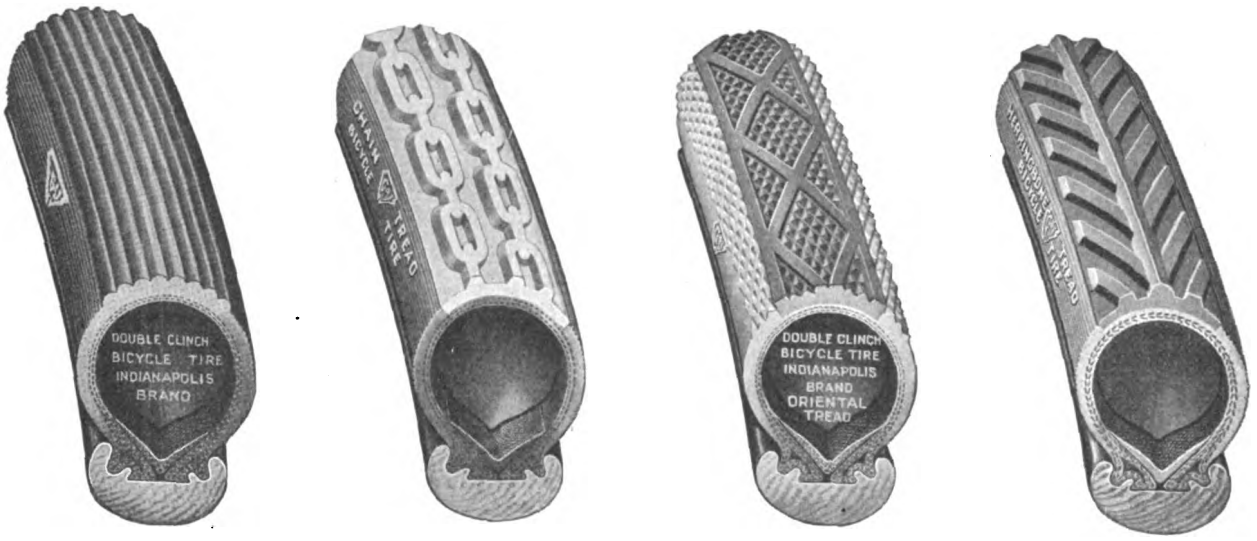
A Tried and True Tire

THERE are many imitations of the genuine G & J tire —they look the same, but there is only one genuine "G & J" in service.

Avoid imitations—get the original—specify the brand INDIANAPOLIS G & J.

The merits of this justly famous tire need no explanation.

In its original form it is known wherever there is a bicycle.



We are making it now in four styles of tread—
At the left, the old familiar "corrugated" tire—
Next, the "Chain" tread—Best of anti-skids—
Then, the "Oriental" tread—Entirely new—
At the right, the "Herring-bone" tread—with heavy fabric—

You have your choice of four superb tires—

Four tires that will out-last by many miles the average bicycle tire.

If satisfaction in what you buy means anything to you, the original G & J is the tire to get.

Remember—specify INDIANAPOLIS brand, on all orders.

OCTOBER EXPORTS SHOW BIG JUMPS

Shipments of Motorcycles for That Month Total 1,148 and Their Value Aggregates $230,327—Bicycle and Parts Exports for October Reach the $81,900 Mark

The whole story of the European war is written under the "scare heads" on the first page of the newspapers, but the entire tale told in the illustrations. A very significant and, to the manufacturers, all-important chapter in the struggle is told each month in the import and export statistics which are issued by the Bureau of Foreign & Domestic Commerce. The summary of statistics for October, for instance, covering that month in 1915 American manufacturers shipped 1,148 motorcycles at $230,327, to foreign lands. In the same month of 1914 the number of machines shipped were only 507, and the value given at only $76,604, representing a percentage increase of 112 in the number of machines shipped, while the percentage increase in the value is 154.

13,007 Machines in 10 Months

The ten months ending with October of this year, 13,007 motorcycles, valued at $1,[illegible]27, were shipped across the water, which represents an increase of a little over 100 per cent., both as to the number of machines and the valuations, over the ten months ending with October, 1914, being 6,327 motorcycles, valued at $[illegible]

Also noteworthy is the percentage increase in the exportation of bicycles which during October of 1915 over those shipped in the same month of 1914. During the past year the value of this manufacture including bicycles and parts. During the same month of 1914 the valuation was $42,543. However, in that particular month the exports was far in advance of what they were the same month of 1914, but in the ten months ending with October, 1915, did not show a corresponding great advance. The total valuation of bicycles and parts shipped to foreign lands by American manufacturers during the ten months ending with October, 1915, was $[illegible]35,109, while for the corresponding ten months of 1914 the valuation showed a percentage increase of about

Even more significant and pointing strongly to the possibilities of the foreign cycle market for American manufacturers, is the falling off in the imports during the same period. During October of 1914, for instance, the valuation of imports of motorcycles, bicycles and parts was $11,625, while during the same month of 1915 the valuation had fallen to $2,272, a falling off of just about 80 per cent. in a twelvemonth. The totals for the ten months ending with October for the two years, tell the same story, the valuation being $180,376 during the ten months ending with October, 1914, and only $33,403 for the ten months ending with October of the year just past.

TICE AND GRAVES WIN AT BAKERSFIELD

Harley-Davidson Rider Captures Two Firsts, While "Morty" on His Indian Stars in 100-Mile Event

BAKERSFIELD, Cal., Jan. 10.—M. Tice, Harley-Davidson, carried off most of the honors at the meet in this city yesterday, winning two firsts and a second. Tice's time as winner of the ten-mile event was 8:18⅘, while in the five-mile sidecar race, he came first in 6:28⅖. Tice was second in the 100-mile feature event. Morty Graves, Indian, captured the 100-mile race in 1:24-20, while P. Gilmore, Excelsior, was winner in the five-mile open event. His time was 5:38⅖. The times were considered indifferent, owing to the poor condition of the track.

Don Johns Takes the Lead

In the long-distance event, Don Johns, on his Indian, shot ahead at the start and held the lead for 43 miles, with Graves trailing and Tice a good third. The Jinx, however, had it in for Johns, and in the forty-third mile his oil tank ruptured, and he was forced to drop out. Graves went to the front with Tice close up, and Mahlin, Harley-Davidson, coming on strongly. At the tape it was Graves, Tice, Mahlin, with Gilmore, Excelsior, fourth. Time, 1:24:20.

Gilmore Never Headed

The five-mile initial event saw F. Gilmore, Excelsior, in the lead soon after the start, with T. Barulich, Harley-Davidson, following. Gilmore was never headed and Barulich came in second. Tice was third man. Time, 5:38⅖. In the ten-mile, Tice was a good winner, with Martin, Excelsior, second, and Barulich, who shifted to a Thor, third. The time was 8:18⅘. The five-mile sidecar event was a win for Tice with his Harley-Davidson outfit; Gilmore, Excelsior, being second, and Berges, Indian, third. Time, 6:28⅖. The attendance was over 3,000, and the motorcycle enthusiasts enjoyed every minute of the meet.

REYNOLDS, ON EXCELSIOR, IS TUCSON VICTOR

TUCSON, Ariz., Jan. 10.—H. Reynolds, Excelsior, was first in the Tucson-Oracle road race held on January 8 from this city. Reynolds' time for the 78 miles of the course was 1:40:13. W. Jeffries, Indian, came second in 1:55:40, while W. Cox, Harley-Davidson, was third man in 2:01:50. R Reynolds, Harley-Davidson, was fourth, in 2:02:50. Eight out of the nine riders entered finished, the ninth man, D. J. Buck, Harley-Davidson, spilling on a sharp turn and retiring without sustaining serious injury.

Huge Crowd Attends

The Tucson-Oracle race was a closed club event, with $40 as the first prize, $30 for the second man, $20 for the third and $10 to the fourth man. The referee was M. L. Moran. The start and finish were witnessed by a huge crowd. The affair was pronounced a rousing success by all, and the fans are eager for the next races.

CYGNET REAR CARS GOING LIKE "HOT CAKES"

Sales Manager Ogden Lines Up Export Contracts For 500 Cars and Books a Strong Array of Dealers in Eastern Section of the United States; Commercial Outfits in Demand

NEW YORK, Jan. 11.—Sales Manager Leadley Ogden, of the Cygnet Rear Car Company, of Buffalo, who has been conducting a whirlwind campaign among the leading dealers of the East, and also reaching out in all directions for foreign representatives, has obtained results during the last few weeks that establish something of a record. When Mr. Ogden found time to drop in at the office of **Motor Cycle Illustrated** today he was loaded with information of the kind that invariably keeps a wideawake sales manager smiling.

The Cygnet company has found the export demand for its product especially active and contracts have already been closed for Australia and New Zealand, under one distributor; Holland and the Dutch colonies, under one distributor; Spain and Portugal. The two countries last named have separate agents, and in Portugal the first order for Cygnet cars has been placed on behalf of the government, which will give them a trial preparatory to placing a larger order.

The orders for immediate delivery from the countries above named total fifty cars, and the contracts call for an aggregate of 500 cars during the year for these points.

Negotiations are now pending with representatives in the Netherlands, West Indies, South America, Philippine Islands, France, India and China. An interesting angle on the outlook for Cygnet business in China is that a former United States consul is planning a campaign to have the Cygnet passenger outfit replace the jinrikisha, the traditional vehicle of the Orient. The promoter of the idea argues that the middle and upper classes in China are ready to give up the jinrikisha for a speedier and more comfortable form of conveyance, and he feels that the Cygnet rear car will fill the bill. Present indications point to a demand for about 2,000 Cygnet cars from these countries.

Among the dealers who have signed up with Sales Manager Ogden during the last week or ten days to handle Sygnet rear cars are the following: George L. Miner, of Rochester; George E. Seavey, of Haverhill, Mass.; Bridgeport Cycle Co., Bridgeport, Conn.; General Motorcycle Sales Co., of Boston; A. T. Tragesser, Lancaster, Pa.; F. S. Bump, of Binghamton; J. F. Kilham, of Beverley, Mass.; Neal, Clark & Neal, Buffalo; Henderson Motorcycle Sales Co., New York; T. J. Sixsmith, New York; B. G. Sammis, Huntington, L. I.; Hugo Scherin, Bronx, N. Y.; O. C. Berckhemer, Bronx, N. Y.

The New York Sporting Goods Co., New York City, which has the general distributing rights for Cygnet cars in the metropolitan district, states that it is prepared to supply the cars for attachment to any standard make of motorcycle. The firm believes that 300 cars for the season is a conservative estimate of the business in sight.

Wallace Stuart, of New York Sporting Goods Co., with a Cygnet Rear Car Party

WANT FIFTY MOTORCYCLES FOR SPECIAL SERVICE

BOSTON, Mass., Jan. 10.—Fifty motorcycles will be needed for special patrolmen who will investigate automobile accidents if a bill filed by Representative Foster, of Gloucester, a few days ago becomes a law. It is the aim of the bill to regulate speeding and discourage any misuse of the roads which might lead to accidents, and to provide for immediate and thorough investigation of any smash-ups that do occur.

The bill provides that the fifty special men shall be supplied with motorcycles "or other suitable vehicles," and it goes without saying that the motorcycles will be selected if the measure goes through.

CLAIM EXCESSIVE FREIGHT RATES CHARGED

TWO more complaints regarding excessive freight rates charged for motorcycles have been filed with the Interstate Commerce Commission since November 20, 1915, both referring to shipments in less than carload lots. The first of these was submitted by Nicholas Lawlor, transacting business as the Lawlor Cycle Co., and naming the Chicago, Milwaukee & St. Paul, the Chicago, Burlington & Quincy, and other railroad companies as respondents. The second is that of E. F. Rose, naming the Boston & Albany R. R. Co. as respondent.

Lawlor, whose headquarters are in Lincoln, Neb., stated that he was charged by the defendant railway companies rates of $2.125 and $2.145 per hundred pounds, from Milwaukee, Wis., and Middletown, O., respectively, for shipments of motorcycles from the cities mentioned, to Lincoln, Neb., and that these rates were unjust and discriminatory. He claimed that just and reasonable rates for the shipments from Milwaukee and Middletown would be $1.275 and $1.545, respectively, and prayed for a hearing, reparation for damages sustained and other relief.

E. F. Rose prays for a rehearing of his case, also one claimed to be on rates unjust and discriminatory. He claims that the conclusions of the commission, that he was not entitled to money reparation from the Boston & Albany Co., were contrary to the finding of the commission in similar cases and that the conclusions were not based on finding of fact.

Both complainants base their claims on the 1½ times first-class rate being just and reasonable, that being the rate charged on bicycles in less than carload lots. This rate was fixed by the commission in its finding and order of May 9, 1910.

NEW FIRESTONE MANAGERS

C. D. Studebaker has become manager for the New York branch of the Firestone Tire & Rubber Company, of Akron, O. He succeeds Dan C. Swander, who was recently placed in charge of the Eastern District.

G. A. Spohr is now managing the Des Moines branch of the Firestone Tire & Rubber Company, of Akron, O. He is the successor of E. W. BeSaw, now in charge of the Firestone western branches.

VOTE BONDS FOR HIGHWAY

UNIONTOWN, Idaho.—The Lewistown Highway District has voted bonds to the amount of $150,000 for the construction of a hard surface highway from Clearwater river to the top of Uniontown hill. The road from a point near this city to the Snake river in Clarkson county constitutes the Idaho link in the Washington State highway system.

BAKER DASHES THROUGH TASMANIAN MOUNTAINS AND SMASHES A RECORD

The First Picture of Baker (in Center) Before the Start of his Initial Record Breaking Ride in Tasmania. The Other Two Riders Acted as Escorts on Their Indians. This Was a Section Where the Road Was Good

HOBART, Tasmania.—"Cannon Ball" Baker is plunging right into his record-breaking work and has just succeeded in hanging up a new mark for Tasmanians to aim at. On his 1916 Powerplus machine he whizzed from Hobart to Launceston in the record time of two hours and thirty-seven minutes. He maintained an average of 50 miles per hour over a mountainous course and roads with rough surfaces.

The best previous record for a motorcycle covering this distance was two hours fifty-three minutes, and the best car record three hours thirty minutes, while the train time between these two cities is six hours. Baker has therefore clipped sixteen minutes off the former motorcycle record.

Baker left the United States two months ago to visit Australia and some of the South Sea Islands to demonstrate in that part of the world the ground-covering qualities of the new Indian machine. It is interesting to note that the motor with which "Warhorse" made the new Tasmania record is the same one he used to smash the three-day record last fall, riding from Canada to the Mexican line on the Pacific Coast in three days, nine hours and fifteen minutes. Tasmania, as is generally known, is an island lying just off Melbourne, Australia.

BUY OUT MOTOR SUPPLY CO.

PORTLAND, Ore.—C. G. Arnold and F. P. Waring have purchased the Motor Supply Company of this city and have incorporated under the old name. Arnold is secretary and general manager while Waring is president and treasurer. The location will be retained at 31-33 Broadway.

WHY ARE GASOLINE PRICES SOARING?

Federal Officials Say Conditions *Do* Not Justify the Higher Rates and Promise Searching Investigations.

WASHINGTON, D. C., Jan. 10.—Government figures made public today show that in the face of rising prices of gasoline, production of crude petroleum in the last year was greater than in 1914, that although production was "purposely retarded as far as practicable," reserve stocks of crude petroleum now being held in the country are the largest ever recorded, and that exports of gasoline, to which the rise in prices frequently has been attributed, were in the last ten months of 1915 less than the exports in the corresponding period of the two preceding years.

Both the Department of Justice and the Federal Trade Commission are preparing to investigate gasoline prices.

A statement issued recently by the Geological Survey estimated the 1915 production of market petroleum at 267,400,000 barrels, 2,000 barrels more than in 1914.

"This," says the statement, "does not agree with the currently reported reason for the exceptionally high prices now prevailing for motor fuel.

"As a result of the overload put on the transporting and refining phases of the petroleum industry by the excess output of 1914," the statement continues, "the year 1915 may be characterized as a period of readjustment in which production activity was purposely retarded as far as practicable. The small increase therefore is more significant than the simple figures indicate."

Factors that might be expected to affect the price of gasoline, according to Geological Survey officials, are production, consumption and prices of crude petroleum. Consumption figures, they said, were not available, though consumption was increasing.

BOTH MOTORCYCLE AND OWNER DISAPPEAR

NEW YORK, Jan. 11.—Motorcycle garagemen and others are requested to keep a sharp lookout for an Indian Powerplus machine, motor number 70H892, which has disappeared under conditions which lead to the suspicion that the owner may have met with foul play. The machine was owned by a Southampton (L. I.) man who rode it to New York to keep an engagement with an acquaintance. Neither machine nor rider have since been seen. If the machine is located, the Chief of Police at Southampton should be notified at once; his phone number is 56. It is explained that the present holder of the machine need fear no complications with the police, as their desire is simply to trace the machine back to its owner and thus account for his disappearance.

The motorcycle had been ridden about three weeks. It carried an Old Sol lamp, No. 6; Prest-O-Lite tank, Old Sol brackets, and a tail lamp which was not connected. The tool-box had been removed.

RACINE CLUB BOYS FROLIC AT BIG ANNUAL BANQUET

Wisconsin Notables Attend Merry Affair; "Doc" Hanson Eclipses Arthur Davidson at Telling Swedish Yarns; Local Club Boys Dance the Oriental Mazurka and Stage a Hypnotic Seance

By PATHFINDER

RACINE, Wis., Jan. 11.—Arthur Davidson has met his Waterloo.

Now don't misunderstand us.

While the doughty little leader of the Harley-Davidson sales force is one of the best-versed men in the motorcycle industry on the matter of selling two-wheelers from the manufacturer's standpoint, and has every detail of his profession at his finger tips, it is not in this particular qualification that Arthur has been eclipsed.

Doc's Swedish Yarns

Out of this humble burg has come one who threatens to supplant Arthur in another qualification—the telling of Swede stories. He is Dr. ("Doc") W. C. Hanson, toastmaster at the big annual get-together banquet of the Racine Motorcycle Club. The fact that the affair stretched out to way beyond last Saturday midnight, with everybody in a wideawake and hapy frame of mind, testifies to Doc's versatility as presiding genius of banquets. It was Doc's incomparable Swedish yarns that did it.

William Wadewitz, newly re-elected president of the Racine club, was the openning speaker. He urged his fellow members to co-operate with the club's officers to give the Racine club still greater prestige in the world of live-wire organizations. Big Bill Wadewitz is the idol of local motorcyclists. His word is supreme. And Bill has helped the Racine club to a prominent spot on the motorcycle map.

Lauds Racine Boys' Work

H. E. Baldwin, state F. A. M. referee, praised the Racine club for its enterprise demonstrated in numerous affairs during the past year and for the effective results achieved in elevating the sport of motorcycling in the Southeast corner of Wisconsin.

In introducing Hugh Sharp, secretary of the Milwaukee Motorcycle Club, Doc. Hanson certainly gave ye humble scribe a flattering send off that threatened to cause indiscriminate popping of upper vest buttons and serious expansion of our bald dome.

Not that we are unusually short of hirsute adornment, but—the epithet persists in sticking so we might just as well take things as others would have us see them. "Others" meaning those lacking in appreciation of high foreheads.

Speaks on Value of Trade Journal

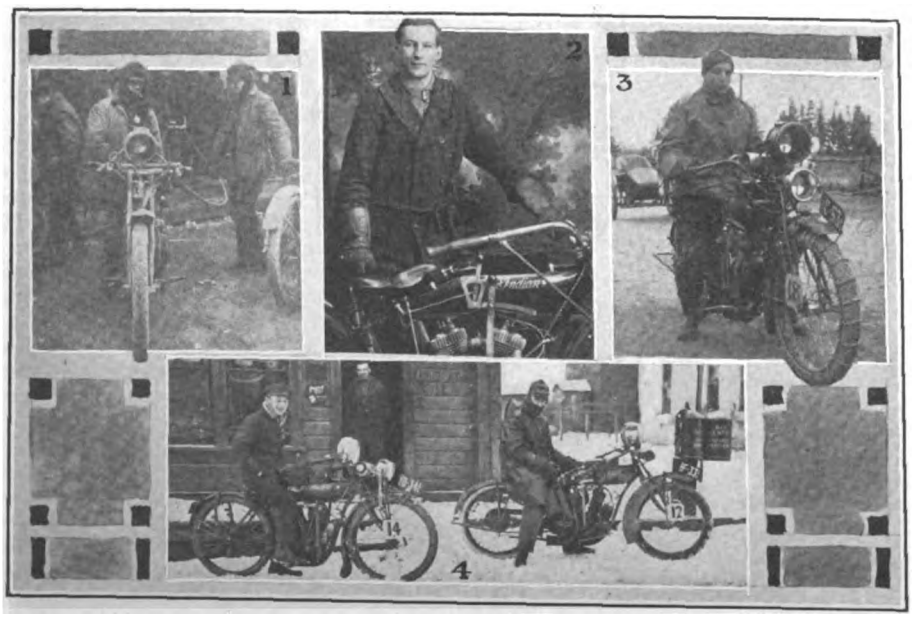
The value of the motorcycle trade paper we modestly take it was what Doc. meant when he said: "Here is a man who speaks to thousands through the medium of **Motor Cycle Illustrated** in boosting the motorcycle sport and business." We, in turn, pulled the old one about the newspaper man being a rotten speaker, got away with it, and then tendered greetings from the Milwaukee club, put in a little boost for the F. A. M. and, well, after we got through Baldwin whispered, "Good speech, old man." And Baldwin is the Milwaukee club humorist.

Club Officers Elected

Besides Mr. Wadewitz as president, the Racine club elected the following officers at the annual meeting: Vice-president, T. Peterson; secretary, B. Larson; treasurer, F. Meiske; custodian, H. Helding; captain, C. Albright; first lieutenant, C. Hill, and second lieutenant, V. Jensen.

A feature of the program was the appearance of several dancers around whom "Doc" threw much mystery. They turned out to be just the club fellows imitating an Oriental mazurka. Charlie Bullette tried a hypnotic seance and almost got away with it. He got so far as to put his "inert" subjects across the backs of two chairs.

HIGH-SCORERS IN PORTLAND NEW YEAR'S RUN



1, Archie Rife, Harley-Davidson, Who Got Perfect Score; 2, Ed. Berreth, 1916 Indian First to Finish Run with 1,000 Points; 3, Henry Kurtz, Indian, Finished Without Penalization; 4, Ed. Carson, Indian, 1,000 Points, and A. Zehringer, Single-Geared 1912 Indian, 998 Points

HIGH-CLASS PUBLICITY FOR VAN IN ROANOKE

ROANOKE, Va., Jan. 10.—The Indian delivery van purchased from the Roanoke Cycle Co., of this city, agents for the Indian and Henderson, played quite an important part in the "efficiency sale," held by the S. H. Heironimus Co., one of the largest department stores in the state. This sale was held for the purpose of impressing their patrons with the type of clerical and delivery service they endeavored to give. The delivery van was advertised as being used in delivery of those goods which were desired immediately by customers and which could not be handled expeditiously enough by the auto trucks.

To emphasize the importance of this one item of service, the S. H. Heironimus Co. was loaned an extra Indian by the Roanoke Cycle Co., to be placed in one of their show windows. An entire corner window was used for this purpose, the machine being surrounded by appropriate display cards.

CONSOLIDATED M. C. ELECTS

INDIANAPOLIS, Ind., Jan. 10.—Harvey Davis was re-elected for the third consecutive time as president of the Consolidated M. C. at the recent semi-annual meeting. Davis, and Earl Starkey who becomes vice-president for the next six months, are both charter members of the organization and have done much to foster the club spirit and care for the club during its infancy. Harry Todd is secretary, while Fred Dyer, former vice-president, is now treasurer. Dyer is a veteran rider and a former member of the old Indianapolis M. C. in which organization he was known as the "Daddy of the Indianapolis motorcycle riders."

HE WON'T GO SHORT ON SALES FUEL

CONSIDERING the remarkable business returns from the last motorcycle, bicycle and accessory show in New York, and the fact that the admissions reached a total materially higher than at the Chicago show, it is only reasonable to expect that the trade bodies would decide in favor of continuing the eastern exhibition. There are indications on all sides that this arrangement meets with unanimous approval; and further indications that the shows for 1916, both western and eastern, will go far beyond the 1915 programs in the number of exhibitors.

MUCH DISCUSSION ON USING MOTORS ON R. F. D. ROUTES

URBANA, Ohio.—The question of motorizing the rural mail service, in which the initiative has been taken by the postoffice department, with a view to reducing expenses, is creating much discussion in this and other localities where rural routes are numerous. Many carriers going out of this point use motorcycles in almost all kinds of weather, making their routes in less than half the time required with a horse. The average run is 25 miles, and the proposed increase will make the average about double that, letting out a corresponding number of carriers. Some of the farmers, however, are protesting at the proposed change, declaring that a small motor truck cannot be relied upon to make 50 miles regularly through the winter in the same time that a horse will make 25 miles. The motorcycle seems to be the happy medium, alternating with the horse, and giving way to the latter when the roads get heavy. Congressman Fess and others will take up with the Government the protest of the farmers against the proposed change.

ORGANIZE TO PREVENT ACCIDENTS IN CINCINNATI

CINCINNATI, Ohio.—The extent to which the number of accidents due to reckless motorists has increased lately has resulted at last in definite proposals to eliminate the evil, the police authorities promising full co-operation in this connection. An organization of pedestrians is also proposed, which will insist on the local registration of every owner of a motor vehicle of any sort, and on stringent punishment for speeding or other forms of reckless driving or riding. On the other hand, local authorities point out that "jay walking" is unusually common here, and that regulations which will compel pedestrians to cross streets only at the regular crossings and to keep on the right side in all cases, obeying the signals of traffic officers at crossings just as do vehicle drivers, will do much to reduce the number of accidents.

BEST FORM OF DELIVERY

LOUISVILLE, Ky.—Motorcycle delivery has proved itself the best form for handling drugs, according to the experience of the Newman Drug Company, of this city. This firm is one of the leading prescription houses in the state and employs a motorcycle to carry its goods to any point within the city limits. The company has been using this delivery for two years and would not be without it.

"IT CAN'T BE DONE"

EDITOR.—I took **Motor Cycle Illustrated** for two years and then tried to get along without it. It can't be done. I feel lost without it, so please send it to me again. Find subscription price enclosed.

"TEDDY" HASTINGS COMES BACK TO AMERICA

MELBOURNE, Australia, Dec. 20.—Mr. T. K. Hastings, the manager of the Australian branch of the Hendee Mfg. Co., is on his way back to America, having sailed from here with Mrs. Hastings and T. K., junior, a few days ago. He will visit the Indian factory at Springfield, Mass.

Before leaving Australian shores Mr. Hastings was given a bon voyage banquet at the Paris House in Sydney, which was attended by a host of friends as a "recognition of good services to motorcycling by a good sport." Hastings had become the stanch friend of hundreds of riders on this big island and they were certainly sorry to see him depart. He was not only a hustler in business, having in a comparatively short time made the Indian machine one of the most popular in Australia, but he was always active in promoting motorcycle competitions that aroused the interest of the two-wheeler enthusiasts as never before.

On his departure Mr. Hastings expressed himself as glad to get back to "Little Old New York" once more and to see his many American friends again. American motorcyclists will recall that Mr. Hastings made some very formidable records in motorcycle competitions in the States. In 1906 he was the vice-president of the F. A. M. and took and active part in its affairs.

SOCIABILITY RUN WILL BE STAGED BY DETROIT CLUB

DETROIT, Mich., Jan. 10.—The Harley-Davidson Motorcycle Club has completed its plans for a sociability run which will start from the store of W. E. Wandersee, the local agent for the gray fellow, at 10:30 p. m. on January 15, and will proceed over fifteen miles of well-paved road to one of the best road houses near the city, where at midnight a turkey supper will be served and entertainment will be furnished by the riders. The fellows will spend the night at the road house and will motor home at their own convenience in the morning.

The entry fee is fifty cents for each rider, which only will help to defray the expense.

THREE PERFECT IN EUGENE (ORE.) CENTURY

Charles Forneri on a Harley-Davidson Wins 100-Mile Event Over Snow-Covered Course; Brandt, H-D, Second; Schnorenburg, Excelsior, Third

Forneri Waiting to Check in at Control in Eugene on Second Lap

EUGENE, Ore., Jan. 10.—Averaging 55 minutes to the lap over 32 miles of snow-covered road, Charles Forneri, riding a Harley-Davidson, won the century endurance run of the Eugene Motorcycle Club, which was held January 2.

Dick Brandt, on a Harley-Davidson, took second place, and Bill Schnorenburg, riding an Excelsior, was third. All three men were awarded perfect scores. They were the only riders to finish. Brandt made the fastest lap of the day by covering the 32 miles in 50 minutes.

Ed Tripp, riding an Excelsior, and Yale Smith, with an Indian, were both compelled to drop out of the race before the finish on account of accidents to machines.

The race was run over a fairly level course between Eugene and Junction City, which had been covered by a few inches of snow and frozen crust. Riding was very difficult and spills were many. Just as the first man started, the snow began to fall again and the entire race was run in a blinding storm. Eleven men signed up for entry, but there were only five at the start.

A silver cup was presented by the motorcycle club as a trophy for the run, and it will bear the names of Forneri, Brandt and Schnorenburg, the perfect score men.

500-MILE ENDURANCE RUN FOR ROANOKERS

Active Virginia Club Starts Plans for Big Two-Day Trial and Also Schedules Races for Decoration Day, July 4 and Labor Day

ROANOKE, Va., Jan. 10.—At the first semi-monthly meeting of the Dixie M. C., for the new year, officers were chosen as follows: A. S. Leslie, president; Herbert Webb, vice-president; W. A. Paxton, recording secretary; G. A. Martin, financial secretary; Clarence Webb, road captain; W. C. Stevens, lieutenant; H. McDonald, assistant recording secretary; G. A. Martin, auditor; W. A. Paxton, auditor; G. A. Martin, club reporter.

After the new officers had been installed, plans for endurance runs, races, etc., for the season were taken up. It was decided to hold three races, one on Decoration Day, another on July 4, and the third on Labor Day.

The endurance run, which will be a two-day affair under F. A. M. sanction, was put into the hands of the necessary committee. Although it is not definitely known, the course will probably run from Roanoke to Richmond via Lynchburg and Petersburg, and return via Louisa, Charlottesville, Staunton and Natural Bridge, a distance of over 500 miles. It will be by far the most important event of its kind ever held in this state.

As the permanent marking of a course of this length will be decidedly expensive, assistance will be asked from the various tire companies, from the motorcycle clubs en route, and probably from the American Automobile Association, as it can be readily understood that the thorough marking of a route between four of the largest cities in a state would be conducive to an increased automobile traffic, as well as a great advantage to motorcyclists. The matter is now being handled by correspondence, but in the course of two or three weeks, three club members will cover the entire course to see just what the situation is.

REPAIRING TACOMA SPEEDWAY

TACOMA, Wash., Jan. 3.—As soon as the weather settles, the work of constructing an adequate guard rail around the Tacoma Speedway will be begun, and other needed repairs will also be made. When this work is completed the track will be much faster than it was in 1915. Motorcyclists are anxiously awaiting the completion of the repairs, for they are desirous of trying out their 1916 models.

BRAZILIAN RUBBER EXPORTS

The total exports of crude rubber from the port of Paco and Manaos in Brazil in the first three-fourths of 1915 was 25,172 tons, of which 14,903 tons went to Europe, and 10,269 tons to the United States. English vessels carried four-fifths of this rubber, while the remaining fifth was shipped in Brazilian bottoms.

It was decided on motion by Mr. Huffman and seconded by Mr. Fogarty that the annual dues be $50, payable in advance.

Better Show Patronage Expected

It was the general impression that with heartier co-operation from the jobbers and parts manufacturers, this year's shows would be much more liberally patronized. Show Manager Coffman brought out the interesting fact that nearly half of the space at the Chicago Show and more than half of the space at the New York Show had been purchased by motorcycle manufacturers. Now that the parts makers and jobbers will be represented on the show committee and have been given an opportunity to help determine the show dates, it is generally believed that many members of the other two associations who have not heretofore exhibited will take show space.

WITH GUTERMAN IN FLORIDA

Reading-Standard Traveler at Old Gates in St. Augustine; Below, Paul Weigant, Who Will Represent the R-S in St. Augustine, in the Sidecar, Out for a Run

As the Motorcycle Manufacturers' session was approaching its close, a committee of the Cycle Parts Association, consisting of Messrs. Schwab, Hamilton and Brandt, of the Stevens, Federal and Troxel companies, respectively, announced that Atlantic City had been selected as the place, and the first week in August as the time, for the annual convention of the allied cycle associations. This had the hearty indorsement and unanimous approval of the motorcycle manufacturers.

Next M. M. A. Meeting in Springfield

With ten members voting, Messrs. Weschler, Arthur Davidson, Schack, Quinlan and Kirk were elected a board of directors for 1916. The board subsequently re-elected T. W. Henderson as president, Arthur Davidson as treasurer, and E. F. Hallock as secretary.

Mr. Kirk was of the opinion that the New York Cycle Show should be held in January, during the week of the Automobile Show. He said that the Automobile Show, as well as the various meetings of the Cycle Associations, always attract a large attendance of cycle tradesmen, and this was the logical week for the cycle show in New York. However, no decision was reached as to the date, this being left to the joint show committee.

On invitation extended by Mr. Weschler, of the Hendee Manufacturing Company, it was decided to hold the next meeting of the Motorcycle Manufacturers' Association at Springfield, Mass., April 12.

NATIONAL CAPITAL CLUB ELECTS OFFICERS

WASHINGTON, D. C., Jan. 6.—The National Capital M. C., of this city, held its annual election yesterday at the club house. E. Mitchell Dodson, president for the past two seasons, was re-elected for 1916, while John S. Berryman becomes vice-president. F. H. Thornhill succeeds himself as secretary, while W. F. Throop was elected treasurer to succeed H. B. Cohen, who declined re-election. Victor Dessez continues as road captain and Fritz Weiss and Percy Wise are lieutenants.

A banquet will be tendered the officers-elect by the retiring officials at the University Club during the first week in February. There will be a number of prominent speakers present, and among other matters that of forming a military motorcycle division will be taken up.

WESTFIELD BOOSTERS HOME

WESTFIELD, Mass.—The Christmas spirit was strongly in evidence at the home office of the Westfield Manufacturing Company last week when five of the salesmen, C. B. Hull, F. R. Swayne, T. B. Hallbourg, C. T. Quinn and B. A. Edgar, dropped in from their territories to pass around the compliments of the season, and to spread the tidings of excellent business conditions in all sections of the country.

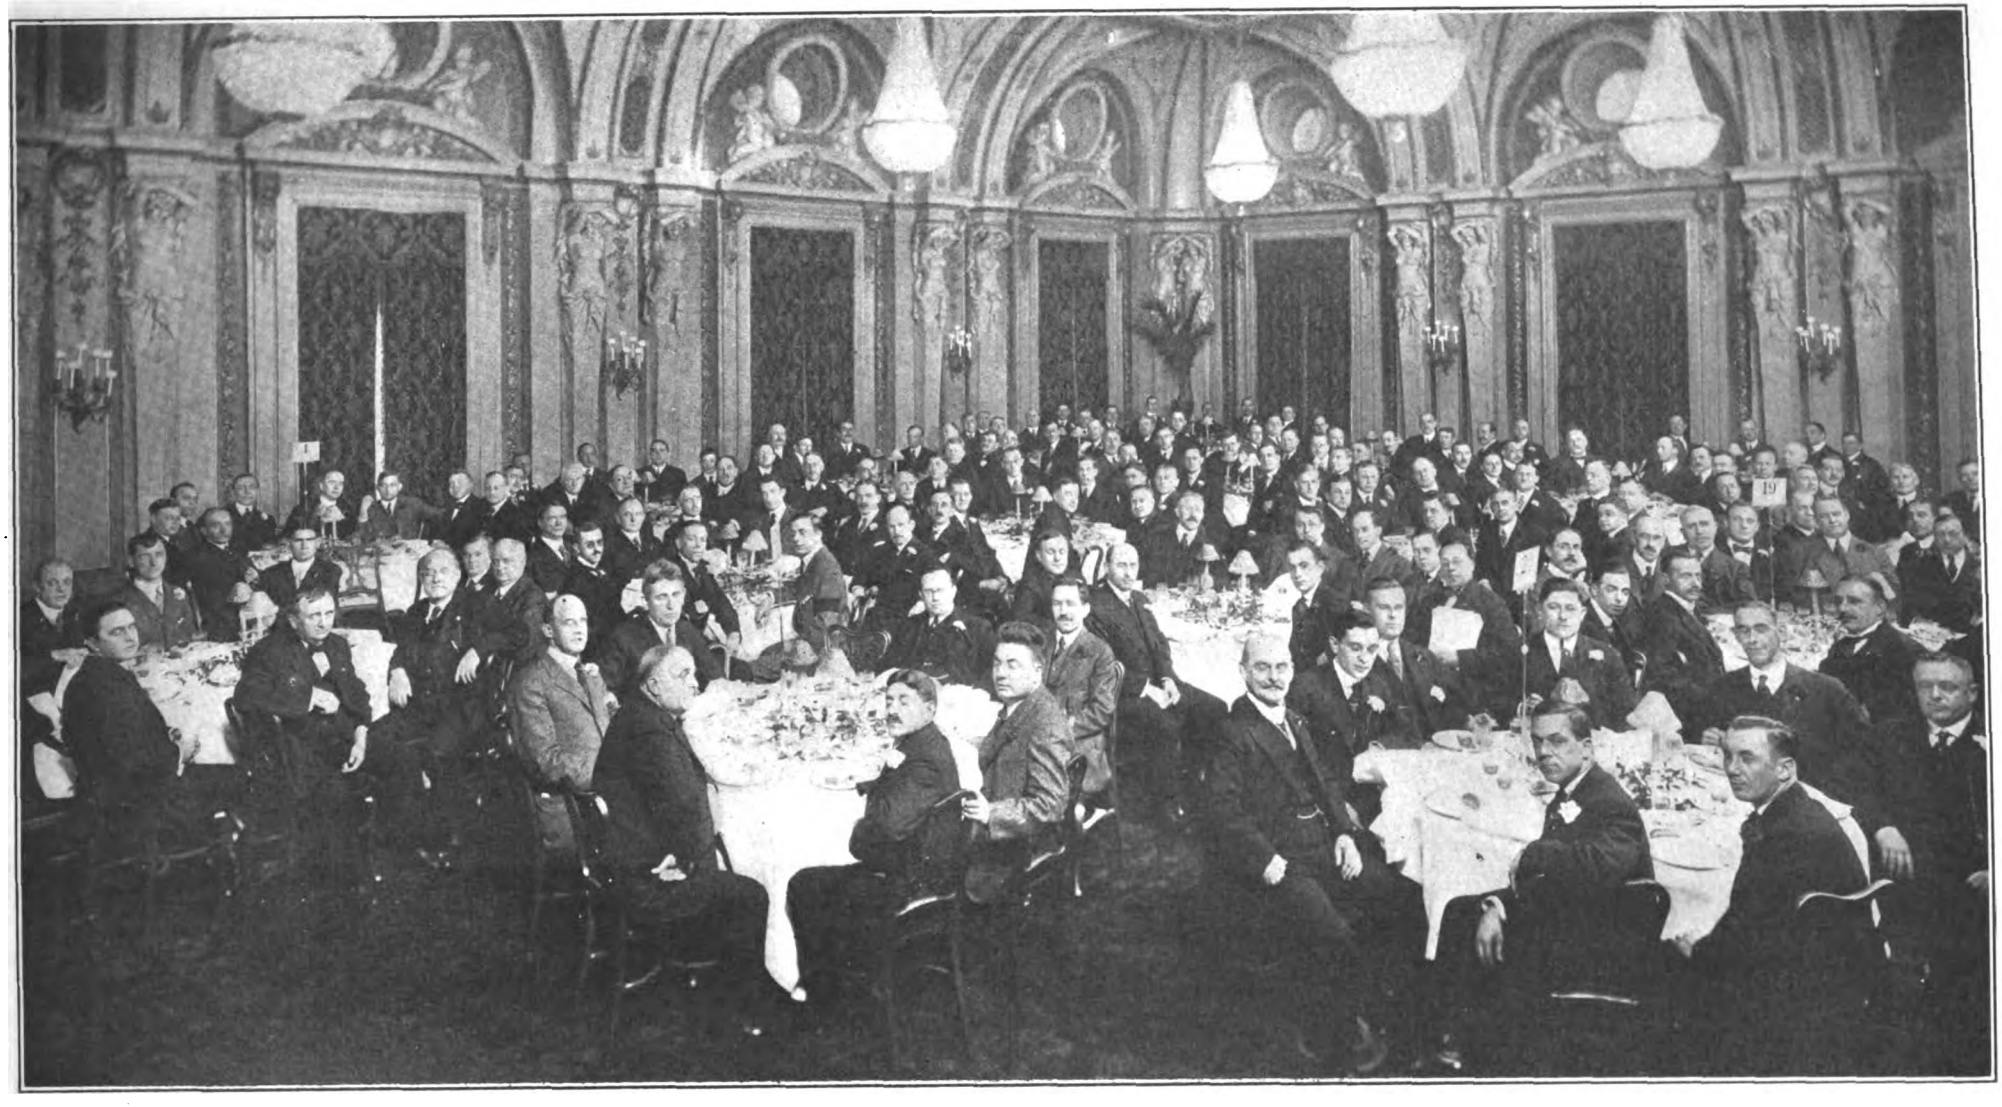
ENTHUSIASM HEADED THE MENU WHEN THESE CYCLE MEN MET



IT was announced that 190 trade men were accommodated, and an examination of the photograph will show that there was no space to spare in the famous North Ball-Room of Hotel Astor when all the guests were seated and ready for the starter's gun. A notable feature was that the social spirit of the occasion was always appreciable although the assemblage was bombarded with more solid facts and straight-from-the-shoulder business arguments than had been brought to bear upon the trade leaders at any previous affair of the kind. Its success followed naturally.

CYCLE JOBBERS AFTER MORE MEMBERS

Will Push Standardization Work; Majority of Members Favor Two Cycle Shows; Meeting Well Attended

NEW YORK, N. Y., Jan. 10.—At the meeting of the Cycle Jobbers' Association, which was called to order by Chairman Keyser Fry on Thursday morning, January 6, it was decided to start a vigorous membership campaign, each member of the association being asked to bring at least one of the former members back to the fold. Speaking of the shows, Mr. Fry stated that he had circularized all the members of the association and had obtained 56 answers: 34 men were in favor of one or more shows, while 22 were either against or neutral on the subject of shows.

A committee was appointed to participate in the publicity campaign for one million bicycles in 1916. This committee consists of J. W. Grady, of J. W. Grady & Co.; William A. Owens, of Coggins & Owens; F. A. Baker, of the New York Sporting Goods Co.; J. F. Beck, of Keyser Fry, and Fred I. Willis, of the Central Rubber Supply Co. Keyser Fry and John Henry will act as ex-officio members. An appropriation of $100 was voted for the standardization committee to carry out its work, and it was decided that the next meeting would be held at Atlantic City.

To Arrange for Shows

During the meeting Walter Davidson, representing the Motorcycle Manufacturers' Association, announced that that organization desired the jobbers to appoint a committee of one to act in conjunction with a similar committee of the Cycle Parts and Accessories Association and the M. M. A. to arrange for the next shows. Fred Grubb was appointed to represent the jobbers.

Keyser Fry discussed fully the work of the standardization committee and spoke of the many benefits to be derived from the formation of an Allied Cycle Trades Association, all the members at the meeting being in favor of organizing such a body. Secretary Henry reported that sixteen new members had joined the Jobbers' Association, while the treasurer announced that the association was in splendid financial condition.

Those present were: J. E. Shaw, of The Olmsted Co., Syracuse, N. Y.; F. A. Baker, of New York Sporting Goods Co., New York City; L. J. Hood, of Walthour and Hood, Atlanta, Ga.; C. W. Leng, J. S. Leng Son, New York City; Geo. W. Nock, of Geo. W. Nock Co., Philadelphia, Pa.; Max M. Sladkin, of Haverford Cycle Co., Philadelphia, Pa.; H. Perlman, of Perlman Cycle and Auto Supply Co., New York City; N. Evens, of Perlman Cycle and Auto Supply Co., New York City; Wm. A. Owens, of Coggins & Owens, Baltimore, Md.; J. F. Beck, of Keyser Fry, Reading, Pa.; W. H. Grover, of W. H. Grover, Norfolk, Va.

C. J. Smith, of C. J. Smith Co., St. Paul, Minn.; W. D. Alexander, of W. D. Alexander, Atlanta, Ga.; C. L. Elyea, of Elyea-Austell, Atlanta, Ga.; G. W. Shreyer, of G. W. Shreyer & Co., Dayton, O.; E. C. Deardorff, of The Toledo Rubber Co., Toledo, O.; Geo. H. Greiss, of Geo. H. Greiss, Philadelphia, Pa.; Albert E. Goodby, of Goodby-Rankin, Providence, R. I.; Wm. Holland, of Henry Keidel & Co., Baltimore, Md.; J. W. Grady, of J. W. Grady & Co., Worcester, Mass.; Henry Horton, of Henry Horton, New Haven, Conn.

Mr. Foskett, of Albany Hardware & Iron Co., Albany, N. Y.; Nat C. Cohn, of Goodby-Rankin, Providence, R. I.; Chas. F. Corey, of Hub Cycle Co., Boston, Mass.; D. N. Marks, of Mfrs. Supply Co., Philadelphia, Pa.; Jno. Henry, Vim Cycle & Hardware Co., Buffalo, N. Y.; Keyser Fry, of Keyser Fry, Reading, Pa.; Geo. W. Ellis, of Supplee-Biddle Hdw. Co., Philadelphia, Pa.; A. Scaison, of Progressive Cycle & Auto Supply Co., New York City; E. Pitzele, of Progressive Cycle & Auto Supply Co., New York City; W. F. Carroll, of Utica Cycle Co., Utica, N. Y.; G. Hees, J. S. Leng & Son, New York City; Fred I. Willis, of Central Rubber Supply Co., Indianapolis, Ind.; C. S. Schwarz, of City Supply Co., New York City.

ALL GOT A "SHAV-RITE"

NEW YORK, N. Y., Jan. 10.—Mr. Wood, of the Buffalo Specialty Co., in behalf of its secretary, Mr. Martin J. Cabana, pleasantly surprised the trade men who gathered at the Astor Hotel last week by presenting each of them with a "Shav-Rite" safety razor set. This consisted of a new patented blade holder, a strop holder, and six blades, all neatly tucked away in a handsome leather case. Mr. Wood found, on distributing the sets, that there were more trade men present than he had calculated, so that his supply of gifts did not go round. However, he generously invited all those who did not receive a "Shav-Rite" to communicate with him at Buffalo and promised to mail a shaving outfit to all who wrote.

AN OBSTINATE JITNEY BUS

NEW YORK, N. Y., Jan. 10.—Some of the trade men who attended the meetings at the Hotel Astor last week may still be trying to get the jitney bus into the garage. Everybody tried it at the Astor, but mighty few succeeded. And the representatives of the Forsyth Metal Goods Co., of Buffalo, N. Y., who distributed the jitney bus puzzles—for it wasn't a real jitney bus—just smiled at the vain attempts to back the four-wheeler into its stall. The puzzle was a very ingenious one, consisting of a glass-covered container in which was fastened a little garage, and around which rolled a tiny jitney that "didn't want to go home," and kept the men in an uproar trying to back it into the garage.

C. P. A. COMMITTEE TO AID IN CAMPAIGN

Will Co-operate With Other Trade Bodies in National Drive for Bicycle Business; Discuss Some Standardization Points

NEW YORK, Jan. 10.—President Daniel F. Printz presided at the session of the Cycle Parts and Accessories Association at the Hotel Astor on Thursday morning, January 6, and a considerable amount of business, chiefly along routine lines, was transacted.

A committee made up of H. S. Quine, C. F. Olin and Horace Hawthorne was appointed to represent the C. P. A. in co-operating with the other trade bodies in the national bicycle campaign.

It was decided that the annual summer convention of the cycle trades will be held at Atlantic City as usual early in August, and that W. J. Surre and C. E. Morehouse will continue to handle the arrangements.

When the matter of standardization of cycle parts was taken up there was a lengthy discussion, but only two recommendations were definitely decided upon: That the use of 7-16 drill on 1 1-4 inch rims and upward be endorsed and that the advisability of using 1 1-8 and 1 inch drills be left open for the time.

Many angles of the standardization question were threshed out on Wednesday afternoon by the Standardization Committee, which is made up of Keyser Fry, chairman; President Daniel F. Printz, J. W. Ash, H. S. Wise, C. R. Miller, J. P. Fogarty, J. F. Beck and Louis Schwab.

LOVELL AND WAINWRIGHT ON M. A. M. STAFF

NEW YORK, Jan. 7.—F. Hallett Lovell, Jr., of the Lovell-McConnell Mfg. Co., maker of Klaxon horns, was elected president of the Motor and Accessory Manufacturers, at the annual meeting in this city yesterday. Mr. Lovell was also re-elected to the directorate.

L. M. Wainwright, of the Diamond Chain & Mfg. Co., of Indianapolis, was elected treasurer of the same body.

THE PRESIDENT OF THE M. M. A.

FIRST IN A SERIES OF CHATTY SKETCHES CONCERNING TRADE LEADERS

How T. W. Henderson Began Life in Glasgow, Came to America with His Parents, Reached a High Place as a Singer and Then Was Forced to Aim His Ambition in Another Direction Which Led to the Henderson Motorcycle and Success

Once upon a time, many many years ago—in 1872, to be exact, although you would never guess it today from the youthful appearance of our subject), there was born in the city of Glasgow, Scotland, a baby with a four-cylinder ambition that has since made its presence felt and a family leaning towards the name of Henderson. He was given—

"Now" we hear you gurgle, with an accent in your voice, "don't delude us with any of that New York stuff—you are just getting ready to write something about the life of T. W. Henderson, president of the Henderson Motorcycle Company, and of the Motorcycle Manufacturers' Association, etc., etc., and we're wise to you right off the bat. It's a"

Yes it's true. There really is no sense trying to be subtle these days. The subtle business is not what it used to be. So let's get back on the job. Where was I?

Seven Seasons in Glasgow

Oh yes—Tom was given seven years in which to imbibe some of the classic atmosphere of Glasgow before his father decided to emigrate to America. Then in company with his three younger sisters the boy started with his parents for New York. He arrived without seeing a submarine, and spent two years in the Metropolis. His parents then arrived at the conclusion that the New York climate did not agree with the children, so Tom was bundled up again, and this time accompanied by another sister and also a brother, he started with his family for Cleveland. There the greater part of his life has been spent.

While he was still quite a tender youth Tom Henderson started to work and learned the pattern-maker's trade, which he followed for eight years. When he reached at the age of 22, that he was practically at the top of his trade, inasmuch as he was earning the maximum wage, and as the maximum wage did not fully realize his ambitions, he decided to start out again and attended a business college for a period of six months. After graduating he obtained a position as a salesman.

Choosing a Singing Career

At this time he was earning more money as a salesman than he ever had before—being at one time the highest paid church singer in Cleveland. While he was at work, he decided that he would make a career of singing. Several years were spent at the Conservatory of Music at Dresden, Germany. On his return to this country the youth was in concert and oratorio, also in one of the New York churches on Sunday and in a Jewish synagogue on Friday nights.

He prospered as a singer, and after a couple of years went back to Paris to spend some time in study to prepare for grand opera. After a year there it was said that he was the most promising American student. Unfortunately, at this period he changed teachers and made a very bad change, because in a few months what had been a beautiful voice was entirely ruined and quite unfit for publication, which meant that young Henderson had to come back home and go to work; and he has been hard at it ever since.

Mr. Henderson's first employment upon returning to America was as a salesman for the Winton Motor Car Company, of which his father is the vice-president, in Philadelphia. Later he went to New York in the same capacity. From there he was transferred to Detroit as manager of the Michigan branch.

T. W. HENDERSON

He Can Turn Out a Good Motorcycle or a Good Story With Equal Facility

During this period his brother Will was working on a four-cylinder motorcycle. He had been fussing around with this machine for several years, and finally, in order to get it out of his system, he built a couple of them. While Tom Henderson was on a visit to his home in Cleveland, his brother showed this motorcycle to him, and Tom became so enthusiastic about it that he decided to cast his lot with his brother and organize a company in Detroit for the manufacture of the motorcycle.

For all that has transpired since that time, Tom Henderson modestly gives credit to brother Will. He credits Will with a positively uncanny way of working things out on paper and getting them right. In the last few years the company has religiously given everything a thorough test in practical service before incorporating it as a regular part of the machine, but in the hurry of getting out its first 1912 models, many features were never tried at all. Will Henderson laid them out on paper the way they *ought* to work, and work they did.

Made Good From Start

And the surprising part of it was that no serious mistakes resulted from that reckless course. From the very start the Henderson "four" made good. The company started on a small scale, of course, by comparison with the volume of business the established manufacturers were doing then, but for a start it did wonderfully well. The records show that in the first year after the incorporation of the company, they sold more motorcycles than have been sold by any other motorcycle company during the first year of its existence.

The company proceeded conservatively, took no ultra-long chances, kept busy and sawed wood. And in its second year it doubled its output. The 1914 season was a good one for the Henderson too, the sales continuing to increase conservatively but steady.

But it was in the 1915 season that business really started to take on speed for the company. The first half of the year was just moderate, but when the firm shortened the wheelbase to 58 inches and brought out its 1915 model E, the deluge began. Sales for the year totalled fully 50 per cent. above 1914, and the factory was humming to keep pace with the business.

For 1916, the company's increased production has enabled it to reduce prices, and this, in connection with the new features of the machine, brought in a volume of business that positively staggered the officials.

Can't Keep Up With Orders

They had arranged to build more machines than they ever had before, but even this increased production was wholly inadequate, and they have been unable to keep up with the orders from the very first announcement that was made.

The factory has been working day and night since early in October, and every department is pushed to its maximum output, but they are today 179 machines behind orders.

THE BICYCLE STARTS FOR THAT MILLION MARK

Trade Men Outline Educational Plans in Addresses at Cycle Parts Luncheon and Bring Up the Big Guns for Nation-Wide Publicity Campaign; Figures Show the 1916 Possibilities to be Greatest in History of American Cycledom; Standardization Work Progressing

TO say that the spirit of the allied cycle tradesmen, as expressed by the speechmakers at the Cycle Parts luncheon in the Hotel Astor, New York, on January 6, was one of optimism is to put it mildly. At no previous gathering of the kindred industries had there been such unanimity of opinion as to the potential scope of cycledom in America, and it is safe to say that when the addresses were over everyone present had a clearer insight into the great possibilities—and responsibilities—of the current year.

The appeals for co-operation, for a whole-souled campaign to attract nation-wide attention to the bicycle were featured by a policy from which the individual element was eliminated as far as possible. "No one wants personal glory or commendation, no company seeks special benefit from the present movement," said President Daniel F. Printz, of the Cycle Parts and Accessories Association. "We are all going to pull side by side for the wonderful results we know can be obtained, and which in due time will amply repay all concerned. We are after broad achievements and we must work along broad lines.

President Daniel F. Printz of the C. P. A.

The spirit of this affair seems to give pretty solid evidence that we can do that very thing—and continue to do it."

President Printz expressed the opinion that an unusual concentration of powerful influences for the upbuilding of the cycle industries had been brought about through the luncheon, and that in his opinion it was only necessary to set these influences at work along constructive lines to insure truly wonderful results. He referred to the slogan, "1,000,000 Bicycles in 1916," as quite in keeping with the generally optimistic outlook, and ventured to predict that the total bicycle sales might even go beyond a million for the year if all the forces of the industry are marshalled so as to present a solidly co-operative front. President Printz closed his talk with the statement that unsurpassed opportunities confront the cycle tradesmen and that the time for immediate action has arrived. Mr. Printz then introduced Keyser Fry, president of the Reading Cycle Co., and chairman of the Standardization Committee of the Allied Cycle Trades. Mr. Fry's address was as follows:

A Valuable Investment

"We are gathered here socially, yet our organizations have performed more work and accomplished more good for the benefit of the cycle industry than was ever done in years gone by when the Jobbers' Association was formed for strictly business purposes.

"Each moment, of course, has its market value as an investment for all of us, and when put to proper use as a drawing account in the vast bank of experience we can get full interest semi-annually and benefit materially by attending the winter and summer meetings of the allied cycle trades. We feel fully repaid for the valuable time spent, in having met with men—broad-gauge, energetic and noted for their capabilities and cashed in on the things we have learned and the benefits derived from such intimate association.

Allied Cycle Trades Body

"Let me offer some suggestions that may appeal to you as being helpful for the cycle business. Why not have one big association called the Allied Cycle Trades Association to which bicycle and motorcycle manufacturers are eligible as well as the parts maker and the jobber? Every member of each of the other cycle associations now in existence would be eligible to join and membership in the others would be a pre-requisite to membership in the new association. All would be active members. We should have no less than 250 members and at a nominal fee of $5 to join, with annual dues of $10, we would have sufficient money to pay an assistant secretary who could attend to correspondence, issue weekly bulletins and handle much work as now devolves upon officers of the several associations. This allied trade association would virtually be the clearing house for all questions and problems that might perplex either the jobbers or the manufacturers and an executive committee or a board of directors of such an association would be able to plan and execute many important things through the minor associations, such as publicity stunts, adopt uniform dating and terms, plan for cycle shows, etc. If a generous amount of money would be necessary for promoting any worthy proposition it wouldn't be difficult to raise $25,000 by getting $100 from each member.

"We now have three healthy cycle associations and need another for the bicycle manufacturers, so that they can meet on

Keyser Fry

common ground in a social way and accomplish for one another what the jobbers have in their association. Ten years ago the jobbers were just as far removed from a get-together spirit as the bicycle manufacturers have been. If the motorcycle makers can meet and discuss business problems, why not the 16 bicycle makers? There certainly will be good business for all during this year, and if there ever was a good time and place to get together it ought to be done right here and now.

"The formation of the Allied Cycle Trades Association can be accomplished now and officers of the several associations, president, vice-president, secretary and treasurer can meet this afternoon and make arrangements so that at our mid-summer convention the Allied Cycle Trade Association will be a reality.

Progress in Standardization

"As chairman of the Standardization Committee I can report that much has been accomplished, but a vast amount of work is yet to be done and in order that proper compilations may be made regarding the various questions that confront your committee and officers of the associations I have arranged a series of questions that each of you present are to answer. Don't leave any unanswered—then sign your name and the firm you represent and we will be guided by your wishes and answers. Ask questions and offer suggestions if you don't care to publicly express

...Wainwright, of the Diamond Chain ... referred to his long association ...cycle industries and stated that in all his experience he had not found more remarkable opportunities confronting the American cycle trades than those existing at present.

"Let no one feel that we are talking fairy tales when we discuss the outlook for '1,000,000 bicycles in 1916,'" said Mr. Wainwright, "for I feel that such a showing is quite within our capabilities. If Mr. Ford can market 300,000 motor cars in a year, at a price that necessarily must appeal only to the middle class man and those higher up, we certainly should be able to sell 1,000,000 bicycles when we consider that they are marketed at a price within the reach of all."

L. M. Wainwright

Bike Makers Need Co-operation

The speaker called attention to the co-operative work that is being done by the jobbers, and remarked that the time had arrived for the bicycle manufacturers to work out their plans on an equally liberal basis.

"Through standardization and a truly co-operative spirit it ought to be possible for the manufacturers to bring the standard price of a good bicycle down to $15," continued Mr. Wainwright, "and when they once reach that figure you will see them go at a startling rate. Prices for a good many classes of material are now ascending, but it would seem that one of the chief aims of the wideawake manufacturer should still be to get his prices down somewhere in the neighborhood of the $15 mark. I believe it can be done, and the results that will follow are surely worth the effort.

"Great campaigns cannot be carried through without money, and when funds are needed to pursue the educational work, and to make the publicity plans liberal and really fruitful the cycle tradesman should hold himself ready to go down in his pocket for 'the needful.' It will come back to him with interest later on."

President T. W. Henderson, of the Motorcycle Manufacturers' Association, opened a characteristic talk by arguing that with so many hard facts being passed out by other speakers it was unnecessary for him to be serious in his remarks. Accordingly, he treated the assemblage to a trio of stories, and "got 'em across," as our friends the theatrical magnates say, with the usual Hendersonian cleverness. He also extended the thanks of the M. M. A. to the Cycle Parts and Accessories Association for the invitation to participate in the luncheon program.

Calls It "Piker Figure"

One of the most enthusiastic speakers at the luncheon was H. S. Quine, manager of publicity for the Goodyear Tire & Rubber Co. Mr. Quine admitted that the slogan "1,000,000 bicycles in 1916" was considered rather sweeping when it was first casually considered, but stated that careful investigation into the existing possibilities had convinced him that 1,000,000 is really a "piker figure" for the number of bicycles that can be sold in the current year if all the forces of the cycle trades are properly concentrated.

"A slogan is a fine thing," said the speaker, "but of itself it can bring about no startling results. It must be put into action before it takes on genuine value. And when we start to boost we must keep in mind that we are working to upbuild bicycling as a national proposition. In other words, we must boost the bicycle itself; not any one make of machine, nor any special make of tire, for example. All lines are bound to benefit when the bicycle takes its place as a national vehicle, and the far-seeing manufacturer will be willing to work along with all the others in the field until his reward comes to him through the natural development of the trade."

Mr. Quine explained that the Goodyear company recently opened a campaign for the dealers, and that the response obtained wah highly satisfactory. "We found that our suggestions and letters fell upon fertile ground," continued the speaker, "and that it was not half so hard to get the hearty co-operation of the middlemen as some folks seem to believe. We expect great things from this general awakening of the dealers to their opportunities."

H. S. Quine

In discussing publicity work, Mr. Quine stated that editors of automobile columns in various newspapers in the large cities seem quite willing to give the bicycle consideration and called attention to the fact that one Chicago paper is now running a bicycle column regularly. He argued that practically all newspapers could be induced to give space along the same line to the bicycle, and pointed out that it is the aim of the trade boosters to extend the campaign from the large cities to the smaller places, so that in a comparatively short time most of the papers of the country will be giving as much attention to the bicycle as it received in the "boom days."

Lots of Work Ahead

"We have a lot of work to do in the coming six months," declared Mr. Quine, "but we must not look for big results immediately. It should not be a question with us of how things will stand next week, or next month—or even next year. What we have to look to is the standing of our industry five years or ten years hence. We are building for the future. If we work hard with a clear eye on the future, the present is pretty certain to take care of itself.

"One of the big angles to be considered in the present campaign is the juvenile field.

Digitized by Google

A WINNING TEAM

Messrs. W. J. Surre, at Left, and C. E. Morehouse, the ever-busy and unfailingly-successful Entertainment Committee of the C. P. A. They have been retained as usual, by the way, to handle the 1916 cycle trades convention, which will meet at Atlantic City.

Every boy wants a bicycle—and should have one. It should be an accepted part of his boyhood. He'll be a better boy for having a bicycle and no parent could make a wiser investment.

"And the ladies should not be forgotten. Interest the ladies in a pastime and its success is assured. They must be shown that the lady who rides a bicycle has just as distinctive a place in the community as the lady who rides in her limousine. In fact, the lady bicyclist should often be envied by the motor car owner, for she is obtaining exhiliration, healthful exercise, change of scene and a sense of freedom—all at an outlay too small to be considered. Ladies in high places the world over—in many royal families, for example, are as ardent bicyclists today as they were ten years ago, so there certainly is nothing to prevent the American woman from taking the bicycle into her affections and making the most of it.

The Campaign Well Started

"There are many sides to a big campaign of this character," said Mr. Quine in conclusion, "but as far as the 1,000,000 bicycles for 1916 are concerned I feel that it is all over but the details."

C. F. Olin, advertising manager of the New Departure Mfg. Company, delivered an address that bristled with bed-rock arguments and straight-from-the-shoulder facts from beginning to end. He opened by calling attention to the long-recognized policy of the New Departure Company, by which all its campaigns are based on liberal co-operation with the dealer, and stated that this plan had proved a highly satisfactory one, both in material returns and because of the fine spirit of understanding it has developed between the factory and its many representatives.

Speaking of the slogan "1,000,000 bicycles in 1916," which he originated, Mr. Olin remarked that the greatest compliment that could be paid in connection it is that it has "moved real men to action."

"A slogan, or anything else under the sun, that can set in motion the varied influences of trade circles, make men roll up their sleeves and prepare for a united fight in the interest of high ideals is a mighty good thing," said Mr. Olin, "and the desire to place a bicycle in most of the homes of our land is certainly a high ideal. At least, that's the way I regard it. I don't pretend to juggle words, or polish phrases—I haven't time for it—but I feel sure I will make myself clear when I say that I can work like h—— for a proposition as broad and clean and worth while as this bicycle campaign."

When the applause had subsided Mr. Olin went on to explain that the calculations of the New Departure company with reference to the number of bicycles that can be sold during 1916 are based upon carefully gathered data, that there has been little or no guesswork in estimating the business in sight.

The Market Is Spreading Out

"Some time ago," continued the speaker, "we gathered figures covering the sales of bicycle and accessories for four years and we were amazed at the growth of interest in bicycling from year to year, in spite of the fact that no broad, co-operative effort was being made to foster it. The market was being left somewhat to itself, and still it was spreading out at a very satisfactory rate. It was evident that the bicycle was 'coming back' strictly on the basis of its own appeal to the public and that with reasonable attention it would certainly become the great, nation-wide industry that all its friends have predicted it would become. The bicycle industry is already a very big proposition; that fact must not be lost sight of, but it is at present only in a preliminary stage of the great upward movement to universal favor.

"As far back as September we had data in hand which convinced us that 1916 would be the biggest bicycle year the industry in American had ever seen.

"We have built up our plans around the estimate that 1,000,000 bicycles for the current years is perfectly reasonable, and I feel sure that if the forces represented at this luncheon are put at work on a harmonious basis the number of machines for the twelve months can be made even higher. To the attainment of this goal I pledge the support of the New Departure Manufacturing Company and my own hearty efforts."

And Then Eddie Came on Deck

At this stage Eddie Westlake, motor editor of the Chicago Evening Post, enlivened the occasion by shooting across some reminiscent remarks anent his own cycling career and passing out a few publicity pointers. He argued that the cycle business is big enough to merit the attention of every newspaper in the country and that space for bicycle material can be obtained on a regular basis as soon as the editors are properly approached.

"We editors have been Rip Van Winkles as far as bicycle publicity is concerned," said the breezy Chicagoan, "but no more so than the cycle trade men. We fell asleep but you failed to wake us, so the responsibility must be shared fifty-fifty. Start something now and I believe you will have no trouble in getting all the newspaper publicity you want."

J. B. Clarkson, manager of J. B. Clarkson, Ltd., of Wellington, New Zealand, was the next speaker. He dropped a verbal bomblet by stating that the one-time business of American bicycle manufacturers with New Zealand had been completely lost. From thousands of machines yearly, the shipments from the United States had dropped to zero. Practically the same conditions apply to Australia, he explained.

Mr. Clarkson stated that this trade had been sacrificed through neglect and because American builders refused to make any concessions in designing to meet the demands of foreign markets. He advanced the opinion that with the low-priced labor obtained in America, and all the industrial advantages of a prosperous nation to back up the manufacturers, it ought to be possible for this country to corner almost the entire cycle business of the world. He held the belief that 1,000,000 bicycles for 1916 was a conservative mark, all things considered, and stated that the figure could easily be 2,000,000 in 1918.

Holland's Big Bicycle Sales

D. G. Ruarus, of Amsterdam, Holland, spoke briefly on the progress that his country had made in cycling. Holland has about 6,000,000 population and the yearly sales are in the neighborhood of 160,000. He pointed out that this is a better showing, proportionately, than 1,000,000 bicycles in a year will be for the United States. Mr. Ruarus emphasized the value of cycle clubs and stated that nearly every small town in Holland has an organization of cyclists.

George W. Nock, of Philadelphia, a veteran in cycle trade circles, closed the speaking program with an appeal to manufacturers to place their name and trademark on every product sent out. He contended that the manufacturer of a high-class article is entitled to the credit for producing it, and that it should be made very easy for the consumer to tell where his bicycle and its accessories had come from.

With the Manufacturers

BIG EXPORT AND WESTERN SHIPMENTS OF EMBLEMS

ANGOLA, N. Y.—The second shipment of bicycles to India from the factory of the Emblem Manufacturing Company has just been sent off, following the receipt of a recent order from Bombay. Another shipment of Emblem motorcycles has been made to Australia and four carloads of bicycles have been dispatched to the West, up to the end of the week of December 27.

President Schack states that the Western trade this season has been better for 1916 than for the last two years, while Emblem export trade has been excellent. The latter has included European shipments, as well as Asiatic and Australasian.

TUBELESS TIRE CO. FORMED

MILLERSBURG, Ohio.—The Tubeless Tire & Rubber Company has been incorporated, with a capital of $75,000, to manufacture motorcycle and automobile tires. Incorporators are O. J. Hicks, John Lemmon, W. R. Price, G. B. Helmuth, D. A. Messner and S. N. Miller.

ELLIS PRESIDES AT BANQUET

LOUISVILLE, Ky.—A. W. Ellis, manager of the local branch of the Goodyear Tire & Rubber Company, of Akron, Ohio, was toastmaster at a banquet given by the office staff on Wednesday evening, January 5. There were ten present at the affair.

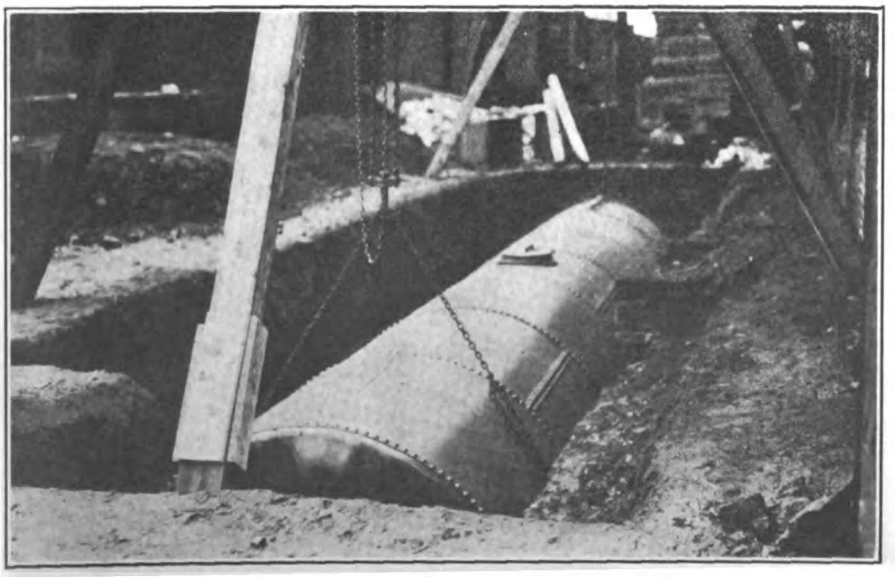
THIS OUTFIT DEFIES THE WEATHER MAN

FAYETTEVILLE, N. Y.—The outfit shown in the accompanying photo has been driven from Fayetteville to Syracuse and return every day but two so far this winter, sometimes navigating six inches and more of snow. The machine is fitted with a C. & G. Twin Seat, which is occupied in the picture by B. S. Chilson, sales manager of the E. U. Scoville Co., manufacturer of the Twin Seat, and C. M. De Puy, of Brooklyn, the company's distributor for New York.

These riders keep the machine in almost constant use to demonstrate the adaptability of the motorcycle to all-season travel and to show the comfort and sturdiness of the C. & G. seat. Three hours after the photo was taken the hardy roadsters made the homeward trip in 15 inches of snow without difficulty.

"I believe there is no finer sport than winter motorcycle riding," says Mr. Chilson, "if both driver and passenger are properly dressed and the machine is comfortably equipped for passenger-carrying. The three-speed motorcycle affords plenty of power for all conditions of roads, and while we have the business object in keeping the machine on the road every day with its Twin Seat we also get a lot of genuine enjoyment out of it."

TO SUPPLY POPE HEAT-TREATING DEPARTMENT



WESTFIELD, Mass.—A new giant tank, 35 feet in length, has just been buried at the plant of the Westfield Manufacturing Company, maker of Pope motorcycles and bicycles. This tank will be filled with 10,000 gallons of fuel oil, for use in the heat-treating department, and is one of the many indications of increased facilities which have been made necessary by reason of the excellent business done by this company.

JOERNS CREDITORS TO MEET

ST. PAUL, Minn., Jan. 10.—Notice is given that a meeting of creditors of the Joerns Motor Mfg. Co., of this city, will be held at the office of Referee Gideon S. Ives, 915 Commerce Building, on Saturday, January 15, at 10 a. m.

VANCE GOES TO BUTTE

DELAWARE, Ohio.—Donald Vance, formerly of this place and for a year connected with the Goodyear Tire & Rubber Co., has been transferred to Butte, Mont., and placed in charge of the adjusting department of the company's branch.

FRASSE COMPANY COMPLETES A CENTURY

1916 Marks 100 Years of Steady Progress for Well-Known Firm; Tract Bought for New Mill and Warehouse in Hartford, Conn.

NEW YORK, Jan 10.—Peter A. Frasse & Co., Inc., the well-known importers and manufacturers' agents for tubing, steel, and supplies, and for the widely-used chains, is now 100 years old, the year 1916 bringing the firm to the century mark. Some of the company's old letters which are still in existence show correspondence with Aaron Burr, Alexander Hamilton and many of the other early families of Manhattan whose activities are now ancient history. In the little shop of the elder Frasse was made the model engine for a model steamboat invented by Robert Fulton.

It is a far cry, however, from that shop to the company's holdings of today. Indicative of the steady growth of the concern is the recent purchase of a tract 65 by 600 feet close to the tracks of the Central New England Railway, in Hartford, Conn., on which a new mill and warehouse will be erected. Hartford was chosen for the location of the new buildings because it is considered the best point from which to serve the trade in western New England, and is also in direct communication with Pittsburgh and within easy reach of the company's warehouses in New York, Buffalo and Philadelphia.

The new mill will be three stories high. In the heat-treating department there will be furnaces for annealing, heat-treating, case-hardening and tempering of steels. Draw benches for cold drawing will be installed, as well as lathes for machining steel bars. The equipment will enable the company to deliver on short notice anything that a manufacturer might need in the way of raw material, as well as semi-finished material in the various grades of steel of its manufacture.

DIXIE-IGNITED INDIAN WINS TASMANIA RECORD

NEWARK, N. J.—Word has been received by the Splitdorf Electrical Company, of this city, that Erwin G. Baker, used a Dixie-ignited Indian when making his record across Tasmania. This record, an account of which appears elsewhere in this issue, started from Hobart, and the other side of the island was reached in 2:37:00. The course covered was rough and mountainous and Baker's average of 50 miles per hour was therefore considered remarkable. His time betters the former motorcycle record by 16 minutes and the automobile record by 53 minutes. Baker gives great credit to the Dixie ignition apparatus in this performance.

OPEN PHOENIX BRANCH

PHOENIX, Ariz.—The Goodyear Tire & Rubber Co., of Akron, O., will shortly open a factory branch at 133 North Centre street, this city. This branch will be the wholesale distributing point for Arizona.

NEW PULLMAN CONNECTIONS

DETROIT, Mich.—The Harry Svenson Sales Corporation, maker of Pullman sidecars, has had its engineering department at work for some time on a new universal connection and recently applied this to the firm's satisfaction. The connection as now brought out fits a Pullman sidecar to be fitted to any standard model of motorcycle by such changes as can be carried out with both hands. Details of this connection will be announced in a later issue.

GE EMPLOYEES GET BONUS

LYNN, Mass., Jan. 10.—Eighty-seven thousand dollars in bonus money was distributed recently among seventeen hundred employees by the Graton & Knight Co. of this city, makers of Spartan belts. The average amount given to each employee was approximately $50. These bonuses were given by the company in appreciation of their employees' loyalty during a period of interest in this section the past year when the Spartan belt manufacturers were overwhelmed with orders.

GOODYEAR HEIGHTS ANNEXED

AKRON, Ohio.—So successful has been the building plan for employes of the Goodyear Tire & Rubber Company, that the city of Akron included the whole Goodyear tract in an annexation ordinance which has just been passed, and Goodyear Heights is now a part of the city.

The plan was started three years ago by Mr. F. A. Seiberling, who felt that of the 10,000 Goodyear workmen many should become home owners, but were unable to meet the "down payments" necessary in the usual real estate deal. Thereupon a number of acres of land were purchased close to the Goodyear plant, the ground was allotted, streets laid out, paved, sewered, etc., gas and electric light provided for and houses built and sold to workmen on easy terms of rent, no down payment being required.

ELEVEN NOZZLES IN MASTER CARBURETER

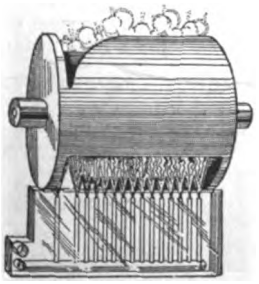
Novel Motorcycle Instrument Has Multi-Jet Arrangement in Which Mixture Is Controlled by Throttle Movement Only

QUICK starting and correct proportion of gas and air at all times and speeds are features of the Master motorcycle carbureter, the product of the Master Carbureter Corporation, of Detroit, Mich. In this carbureter, there are eleven nozzles as compared with one or two in other motorcycle instruments, and the gas is thus broken up into a series of minute sprays, forming a mist which mixes instantaneously with the air entering the mixing chamber. The result is a rapid and powerful gaseous spray which ensures perfect combustion and great economy at all speeds. There is but one moving part, a barrel throttle, and this throttle regulates the air and fuel-mist.

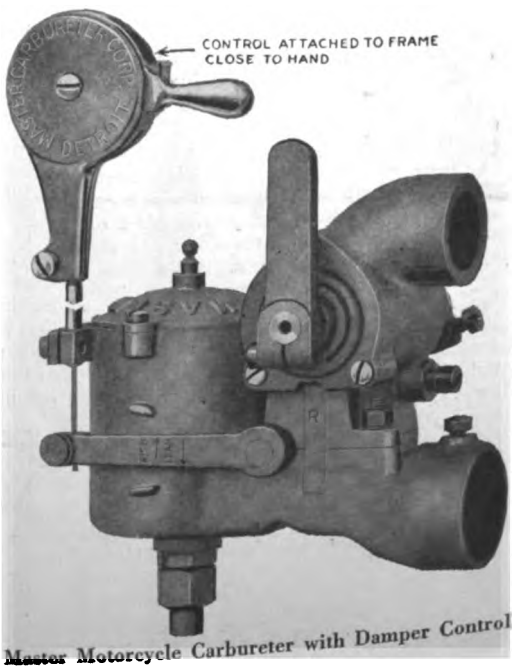
The jet of the ordinary carbureter is replaced by a fuel-distributor in the Master carbureter, this distributor having eleven minute holes or nozzles in one rank. Above these is the rotary or barrel throttle in which are cut ports on opposite sides of a diameter, these ports being of special form in order to control the proportions of fuel-mist and air for all speeds. Thus, when the throttle is closed, fuel is admitted from only one of the eleven nozzles, with air sufficient for slow speed and idling.

As the throttle is opened, the ports therein uncover additional nozzles one by one, and the fuel supply is increased, thus insuring perfect flexibility and unusual power. The throttle is borne upon large journals with substantial bearings, thus eliminating wear and consequent air leakage. The throttle cannot wear the distributor, as it is not actually in contact with the latter.

A damper is provided, in the form of a rigid plate extending across the passage parallel to the fuel distributor. This damper acts as a sort of Venturi around the nozzles in the distributor and is controlled by a lever and wire mechanism fitted to the frame of the motorcycle. When the lever is moved "rich," the damper moves toward



The Fuel Distributor



Master Motorcycle Carbureter with Damper Control

Digitized by Google

the distributor, increasing the suction on the nozzles and riching up the mixture. When the damper is "rare," a much larger area is opened and there is less suction on the jets and a leaner mixture. This damper is used to correct for atmospheric conditions, and like the throttle and fuel distributor system is protected by patents.

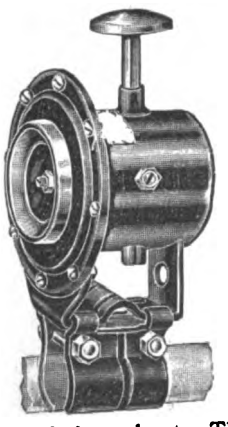
Precautions Against Clogging

Clogging of the fuel passages to the distributor and of the distributor passages themselves is prevented by a detachable trap located under the float chamber. This trap has a removable 80-mesh brass screen which thoroughly filters the fuel and keeps out water and dirt. In the float chamber there is also inserted a 100-mesh cylindrical screen through which the fuel is again filtered before entering the distributor passages. The outlet to the manifold is horizontal on this carbureter, so that it can be applied to existing inlet arrangements. In the ¾-inch motorcycle size the Master carbureter lists at $15, complete, with control and tubing and hot air connection. In the one-inch size the list prize is $20.

"ROLLFAST" MECHANICAL HORN FOR CYCLISTS

BICYCLISTS desiring a reliable mechanical signalling device will be interested in the latest offering of the D. P. Harris Hardware Company, of 48 Warren street, New York. This is the "Rollfast" bicycle mechanical horn, of the vibrating diaphragm type, listing at $1.50 complete with bracket ready to attach to the machine.

The "Rollfast" horn is very light in weight and is cleancut. The operating plunger is vertical-acting, and when depressed gives a penetrating and attention - compelling tone whose volume is regulatable at the will of the cyclist. The body of the horn is cylindrical, the finish being in black. The diaphragm lug is adjustable to take up any wear. The horn is fitted with short bell and is waterproof throughout. The bracket which accompanies it attaches to a special piece of general U-form fitted to the body and the diaphragm flange. This bracket will accommodate any bicycle frame tube. The price, as mentioned above, is $1.50, and in spite of this low figure, the horn is a thoroughly reliable article. Those interested should address the company at its New York headquarters.



PREST-O-LITE CALLS IN BONDS

INDIANAPOLIS, Ind.—The Prest-O-Lite Company, of this city, has recalled $2,000,000 worth of bonds for redemption. The date on these bonds has not been reached, but the company is sufficiently prosperous to call them in ahead and thus clear itself of the interest obligations upon them.

COMING WARNING SIGNAL IS EASILY OPERATED

VARIABLE control of sound, from a mild and pleasant note to a loud and distinct warning, is a feature of the Coming warning signal, produced by the Coming Manufacturing Company, of Railway Exchange building, Chicago, Ill. This mechanical horn, although designed for motorcycle service, is used freely by automobilists by reason of its ease in operation, a slight touch of the hand or elbow setting the vibrator in action. This ease in operation commends itself to the rider inasmuch as the giving off of a powerful warning in no way interferes with the balance of the operator.

Coming Motorcycle Horn

The vibrator is fitted with a ball-bearing adjusting screw. The gears are made from steel and formed out of the solid. All bearings are of special alloy to ensure smooth running and long life. The vibrator or diaphragm is made of Swedish steel of uniform quality and is so treated as to obtain uniform thickness and temper all over. This results in a clear tone and prevents cracking from excessive vibration. The Coming horn is furnished complete with double supporting bracket, adaptable to any portion of the frame. Finish is black and nickel.

NEW TIRE FIRM FORMED

A new tire and vulcanizing firm has been started at Memphis, Tenn., by Loren L. Watson, Colyar Reese and Bethel Edrington. Headquarters have been established at the corner of Marshall and Union streets. In addition to vulcanizing, the concern will handle the Mohawk line of tires. A complete vulcanizing plant will be installed, and a corps of service cars and free service will be maintained.

KELLNER BACK ON THE JOB

BUFFALO, N. Y., Jan. 11.—A. Kellner, manager of the Buffalo Haverford Cycle Company branch is again at his desk, although he is still very weak. For the past two weeks he has been confined to his bed with bronchial trouble. L. J. Kellner, the manager of the Cleveland Haverford Cycle Company's branch, took charge of the local store during his illness.

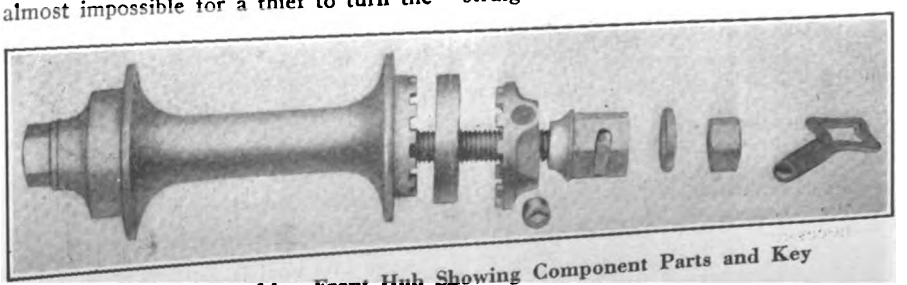
LOCKING HUB IS LATEST FROM ECLIPSE

New Fool-Proof Device for Front Wheel Is Operated by Socket Key and Insures Machine Against Theft

ONE of the most recent offerings of the Eclipse Machine Company, of Elmira, N. Y., is a front locking hub for both motorcycles and bicycles, designed to render the machine to which it is fitted proof against theft, or unauthorized handling. To all appearances, this new hub resembles the standard Eclipse front hub, but it contains a strong locking means, whose movement is governed by a special key carried by the rider. By using the key, the front hub is prevented from rotating and the motorcycle is thus unridable until the key is put into service once more.

The ball-race flange on one side is notched to receive a locking member. The cone has a hexagon head, over which the locking member moves longitudinally when the key is inserted over the shifting pin in a recess in the outer part. The key is of the socket type, this arrangement making it almost impossible for a thief to turn the shifting pin by any other means than by a similar key. The inside end of the shifting pin operates as a cam in the slot in the hexagon cone head and is held securely, in either the locked or released position, by a flat spring.

The lock may be placed on either side, but the makers recommend putting it on the left side with the key-slot down. It is then accessible to the owner, but a thief would have to turn the wheel over to get at the key. Even if the man were familiar with the device he would not be able to determine why the wheel would not turn, for there is no indication of any locking device on the outside. With the lock engaged, the machine is immovable, except by carrying it away. The Eclipse locking front hub may be applied to any motorcycle or bicycle, either in course of manufacture or in use. It is made in both concave and straight hub designs. The list price is $1.25.



New Eclipse Locking Front Hub Showing Component Parts and Key

WILL OFFER MANY PRIZES FOR BICYCLE DAY

Cycle Parts Men and Jobbers Organize Joint Committee to Promote BICYCLE DAY and the "One Million" Campaign; Will Cooperate with Every Dealer; Big List of Awards for Dealers Announced

NEW YORK, Jan 10.—Following the great enthusiasm for "One Million ...les in 1916," which marked every meet-... the bicycle trade interests at the Ho... on Wednesday and Thursday of ... week the committees appointed by the ... Parts and Accessories Association ... the Cycle Jobbers' Association, met to ... and perfect plans for immediately ... the monster sales campaign.

Prominent Trade Men Present

... present at the meeting were: H. ..., of Akron, O., and Charles F. ... Bristol, Conn., representing the ... Parts and Accessories Association; ..., of Worcester, Mass., and Fred ... of Indianapolis, Ind., W. A. ... Baltimore, Keyser Fry, of Read... the committee from the Cycle Job... Association F. A. Baker, of New ... E. H. Hawthorne, of Bridgeport, ... are also members of the joint ... were unable to attend.

... following resolution was adopted: ... the members of the Cycle Parts ... Association and the Cycle ... Association have had their respec... and taken action favorable to ... a campaign for furthering ... cycle riding, be it, therefore,

... That the joint committee appointed by the aforesaid organizations shall now organize for the purpose of working for the sale of 'One Million Bicycles in 1916.'"

PRIZES FOR DEALERS AND SALESMEN

AT their meeting last week in New York the joint committee of the Cycle Parts and Accessories Association and the Cycle Jobbers Association decided to offer the following prizes to dealers and their salesmen in order to arouse interest in BICYCLE DAY:

For the best advertisements appearing in a local newspaper, featuring machines for men and boys: first prize, $50; second prize, $25; third prizes (two), $10.

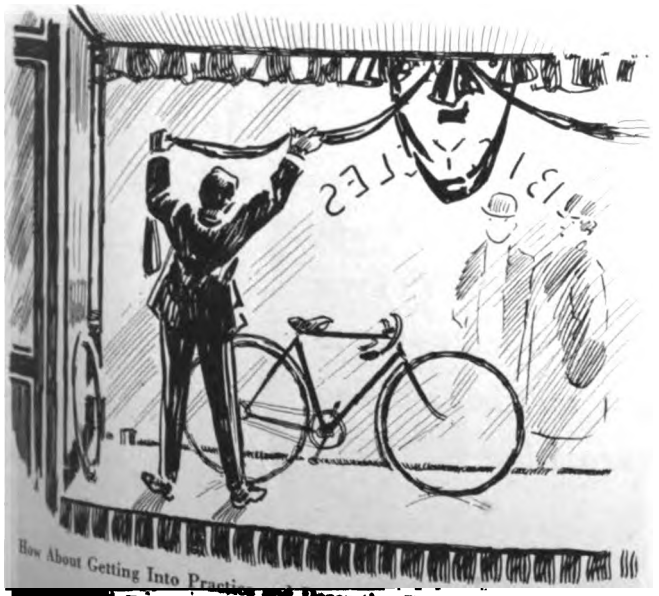
For the best advertisements featuring bicycles for girls and ladies: first prize, $50; second prize, $25; third prizes (two), $10.

For the best bicycle window displays: first prize, $50; second prize, $25; third prizes (two), $10.

The above prizes are all for dealers and the ads as well as the displays must be used during BICYCLE DAY WEEK or the preceding week.

To the salesmen or clerks writing the best selling talks on bicycles (not to exceed 500 words) the following prizes are offered: first, $100; second, $50, and third (two), $25. And to the writers of the best one hundred letters that do not win a cash prize will be given a handsome traveler's outfit.

Letters and photos may be sent to Motor Cycle Illustrated, 13 Park Row, New York, which will forward them to the Committee.



The work of organizing followed immediately, and Harry S. Quine was elected chairman of the joint committee, while Charles F. Olin was chosen secretary, and Fred I. Willis, treasurer. It was the sentiment of the entire committee that it should start right away on plans for furthering the success of BICYCLE DAY, Tuesday, February 29.

Co-operation All Year

It was agreed that the co-operation of the committee would not cease with BICYCLE DAY, but that it would continue throughout the entire season, and that during the period of this work plans will also be discussed from time to time, and information gathered, etc., that will enable the joint committee to make recommendations to the Atlantic City meetings of the cycle trades men, next August, for waging a still stronger campaign for the season of 1916-17.

It was voted to establish a fund to which the members of the associations would contribute, which would enable the joint committee to send to every bicycle dealer and repairman in the country an announcement of its sales campaign plans, as well as an appeal for co-operation.

Digitized by Google

Cash prizes of $50, $25, and two of $10 were voted to be given to the dealers having the best advertisements in city and local papers in which bicycles for men and boys were boosted. This was done by the committee in order to interest the dealer in a way by which he can make BICYCLE DAY a big success. And in order to still further attract the attention of the dealers the country over to live wire merchandising ideas, the committee also voted to give a similar list of prizes to dealers using the best advertisements in girls' and ladies' models are featured. A like set of prizes will be awarded for the best bicycle window displays gotten up by dealers.

Put Punch Into Your Sales Talks and Ad Copy—Get an Early Start and See If You Can't Win One of the Prizes That Are Offered

Equal Opportunity

The conditions under which these contests will be run give the small dealer or the small town dealer an equal opportunity with the large dealer. The advertisements and the window displays must be used during BICYCLE DAY week or the week preceding BICYCLE DAY.

It was the opinion of the committee that newspaper advertising with a punch in it was very important to the success of BICYCLE DAY, and that every dealer will get substantial returns from all advertising of this character in connection with the big national BICYCLE DAY campaign.

Reading notices will be sent out by the joint committee to every dealer on BICYCLE DAY and for boosting bicycle riding, which the dealer can turn over to the reporter of his local paper for publication.

Prizes for Selling Talks

Cash prizes of $100, $50, and two of $25 are to be awarded to the bicycle salesman or clerk who will write the best selling talk on the bicycle that could be used to convince a prospective rider. These talks are to be not more than five hundred words. In addition to the cash prizes, one hundred handsome traveler's outfits, consisting of a set of toilet requisites, in a leather case, will be given to the one hundred best letters after the cash prize letters.

The committee put in several hours of hard work and discussed at length various ways and means of getting dealers interested in BICYCLE DAY and getting them to realize the big opportunity that is offered by this monster sales campaign. After completing details of organization, the committee decided that it would make an early announcement to the trade covering the entire campaign.

PRICES MAY SOAR

LA PORTE, Ind., Jan. 10.—In a letter sent out to all dealers representing the lines of bicycles manufactured by the Great Western Mfg. Co., President E. J. Lonn states that all present quotations are withdrawn and that new prices on all machines will be sent to agents some time in January. "We do not believe in the indiscriminate advance of prices," writes Mr. Lonn, "but you will agree with me that materials and metals have greatly advanced due to the present condition of the world's trade."

Mr. Lonn further states that there will be no sacrifice in the high quality which marks the Crown, Adlake and America lines, made by the Great Western Mfg. Co. Rather than use less expensive material, he announces in his letter, he would ask for a slight increase in price. By additional purchases of material and metals the Great Western company declares that it will stand by the new prices which it proposes to ask until July 30. This announcement of proposed price increases does not affect orders placed previous to December 30.

NOVEL SALES CONFERENCE

CLEVELAND, O., Jan. 10.—Lockwood, Luetkmeyer & Henry Co., one of the largest hardware jobbers in Cleveland, handling also a complete line of bicycles and accessories, held a novel salesmen's conference recently. They had samples of their lines exhibited on one of the floors of the building they occupy, all wares of the same lines being grouped together. Then the traveling men and experts from the various factories attended the conference and thoroughly posted the salesmen of the jobbing firm on the various points they ought to know about their products. Among the cycle trade men present were H. M Huffman, of the Davis Sewing Machine Co., W. J. Surre and E. H. Strickland, of the Continental Rubber Works, and Mr. Van Vetten of the Buffalo Metal Goods Co.

BICYCLE DAY will mean MONEY to you —BUT you've got to get on the job and earn it!

HORDER "COMES BACK" AND WINS TWO AUSTRALASIAN CHAMPION RACES

S[illegible] Australia, Dec. 15.—Frank [illegible] not the only champion of [illegible] for the Australasian [illegible] George Horder, who [illegible] Alfred Goullet and Alfred [illegible] other Australians now [illegible] and who has now been [illegible] nearly twenty [illegible] the second [illegible] his ability to [illegible] proved him[illegible] greatest sprinter of [illegible]

Two Champion Races

[illegible] at the [illegible] Sports Ground [illegible] Horder met in com[illegible] best men here, [illegible] almost young [illegible] his sons, and [illegible] in which he beat [illegible] certainly convinc[illegible] three championships [illegible] Australasia were decided, [illegible] won two, being [illegible] only six inches [illegible] after leading [illegible] ball on a four[illegible] track. That sure [illegible] performance [illegible] 36 years, who [illegible] three of two strap[illegible]

[illegible] championship races [illegible] one, five and ten [illegible] James Wells, who [illegible] rider's wheel from [illegible] finish just won the [illegible] while the cham[illegible] [illegible] the other two [illegible] Fred Walcott [illegible] [illegible] place in the five [illegible] miles.

Rode Against Major Taylor

[illegible] like McNamara and Spears, first [illegible] commence on country tracks of [illegible] New South Wales way back in [illegible] he made his first appearance [illegible] riding in handicaps against [illegible] when that famous sprinter [illegible] here. It was not long before [illegible] spoke of him as a coming world's [illegible] and to his generous advice Hor[illegible] that he owes much of his pres[illegible] perfect sprinting style.

[illegible] Horder ran second to W. T. J. [illegible] Sydney Thousand," the mile [illegible] in 1 minute and 51⅘ seconds. [illegible] 1910 he won more Aus[illegible] state championships than he [illegible] He also ran Jackie Clark up to [illegible] a double match when Clark was [illegible] on the Melbourne saucer [illegible] 1912 came round, Horder [illegible] reached the end of his [illegible] first in sprint races during [illegible] handicapped him up to 120 yards [illegible] especially.

Had Second Relapse

[illegible] began to come back, and [illegible] Spencers as his partner captured [illegible] four team race and two New [illegible] championships—the one mile and the twenty-five miles, these being won in one night. Following another relapse into bad form, Horder has again come back in the champion events of 1915. Horder was also a great road rider and has a ten-mile unpaced record of 21 minutes and 50 seconds.

George Horder and Trainer, After Winning the Championship of Australasia

U. S. I. GIVES BANQUET TO PRESIDENT AND ELECTS

NEW YORK, N. Y., Jan. 11.—On Sunday night Elmer Mullin beat Nelson Johnson by inches in a half-mile race on home trainers at the club house of the Unione Sportiva Italiana. The time was 36 seconds flat. The second race of the evening, which was at one mile, resulted in the victory of A. Ferreo over Thos. La Rossa. The time was 1:17⅖s. Next Sunday, January 16, Francesco Verri, the crack Italian sprinter, will give an exhibition on home trainers.

On the morning of January 2, thirty-five members of the U. S. I. gathered at a banquet in Bruschi's Restaurant, which was given in honor of President Golzio and Secretary Rappio. As a token of the esteem in which these officers are held by the members, Dr. Gullino, editor of the *Italian Herald*, presented them with handsome presents.

The following new officers were elected for the 1916 season:

President, Luigi Golzio; first vice-president, A. Gallina; second vice-president, A. Cerruti; treasurer, P. Tesio; secretary, L. Rappis; controller, A. Cerruti; sport director, F. Bizzoni; trustees, John Taletti, A. Almini, and F. Gasperini; manager of cycling, George Bieregel.

Both President Golzio and Secretary Rappis have been re-elected to their respective offices for the third time.

BAYONNE CLUB WILL STAGE A TWENTY-FOUR HOUR BICYCLE TEAM RACE

BAYONNE, N. J., Jan. 11.—A twenty-four-hour two-man team race will be staged by the Hudson County Wheelmen some time in May, according to the plans recently announced for the new year by the boosting committee of the Bayonne Cycle Club. The past year was one of the most active for the local cyclists, and 1916 promises to see a larger number of bicycle events which will draw entries not only from Hudson County, but also from New York and Long Island.

Will Draw Best Eastern Amateurs

More than $400 in prizes will be hung up for the twenty-four-hour grind, which fact, it is believed, will bring some of the best riders in the East into the competition. It has already been definitely decided that the first place prize will be worth at least $100. Harry Jaeger, Duane Moore and Bill Chambers, who are in back of the race, expect to find little difficulty in raising the necessary money for the prizes.

The grind will be an amateur affair. The City Park Oval track will be used, and camps and bunks will be pitched inside the track for the riders and their attendants. A special committee of the Hudson County Wheelmen will wait on the city commissioners and ask them to grant permission to erect temporary lights. The race will be limited to ten teams and the same rules will govern Bayonne's little grind as those that were in force during the recent New York six-day race.

SELLERS' BUSINESS BRISK

KANSAS CITY.—The Sellers Cycle Company has been doing one of the largest businesses in bicycles in Kansas City. The company is located at Fifteenth street and The Paseo and is an exclusive bicycle shop. Mr. Sellers says that this is one of the first winters that he has found the selling of the bicycles almost enough without the repairing department. Most of his time has been taken up with the selling of wheels, although the repair business has been as proportionately large.

CRESCENT BICYCLE CLUB PLANS BIG PROGRAM FOR THE NEW YEAR

BALTIMORE, Md., Jan. 12.—Following the election of the officers the Crescent Bicycle Club's program for the season of 1916 was announced. Three handsome medals, gold, silver and bronze, will again be offered for competition in the century mileage contest, the contest starting, as usual, with the first day of January and ending with the last day of December. There will also be a set of three medals of a differen design for the three riders scoring the most points in the club championship series, five points being given for first place, four for second, three for third, two fourth, and one for fifth, the series consisting of a quarter mile, half mile and one mile track race; a five, ten, fifteen, twenty-five, fifty and one hundred mile road race, and a hill climbing contest, making ten events in all.

In addition to this there will be offered a gold medal for the most points scored in weekly point races, all of which will be at a distance of five miles, and which will be scored by points as in the club championship races. The gold medal, known as the meritorious record medal, will be offered this year. In order to win this medal the competitor must ride at least five thousand miles, including ten centuries, and secure three new members, who must remain in the club six months.

The Crescents will also promote a number of open events during the coming year, among which will be a track meet on either Decoration Day or the Fourth of July, a ten mile road race and a spring century run. A number of long trips will also be held to nearby cities and points of interest within a radius of 100 miles from Baltimore, including Philadelphia, Winchester, Frederick, Hagerstown, Gettysburg, Washington, Leonardtown, Easton, Ocean City, Martinsburg, Harpers Ferry, Havre De Grace, and other interesting points.

BECOMES ATHLETIC DIRECTOR

BUFFALO, N. Y., Jan. 3.—John D. Rust, one of Buffalo's best amateur riders in the last few years, has been appointed as athletic director of the 74th Regiment Athletic Association, to take the place of Fred Vokes, the former incumbent, who resigned after a mixup with one of the officials of the organization.

NEW LINE FOR APPEAL COMPANY

LOS ANGELES, Cal.—Two carloads of fully-equipped bicycles are now on their way from Middletown, Ohio, to the Los Angeles and San Francisco stores of the

This Bicycle Van Is Used by a Baker to Deliver Quick Lunches

Appeal Mfg. & Jobbing Co. This is a new line for the firm, and dealers can now obtain jobbing wheels at very attractive prices. A big shipment of Emblem bicycles from the Angola, N. Y., factory is now coming west.

BICYCLE SALES LARGE

KANSAS CITY.—The bicycle in W. Bell's Pope agency has been the main feature for several weeks. Bicycles have been selling in this section of the country better than they have ever before sold, according to Mr. Bell, and nearly all of the other dealers. The business is expected to be extremely large in them during the summer.

SILVER TROPHIES FOR BUFFALO AMATEUR SERIES

BUFFALO, N. Y., Jan. 3.—The local cycle trade and a number of individuals have donated two handsome silver trophies to be awarded to the amateur cyclists scoring the most number of points in the bicycle races to be staged at the 65th and 74th regimental armories during the winter season. One of the cups will be emblematical of the city championship and will be contested for in open events, while the other will be awarded to the winner of the most number of points in handicap races.

Points will be scored at the rate of five, three, two and one for first, second, third and fourth places respectively. Robert Schultz and Fred Schell are tied for the championship series with ten points each. Andrew Ciaciuch, 4 points; Elmer Bundt and Eddie Levy, 3 points; Fred Best, 2 points, and Joe Schieder, 1 point, is the way the others have scored. In the handicap series Fred Best leads with six points, while C. H. Smith and Peter Rott each have five points. Joe Schieder, W. Fraser and Isadore Gronkowski each have two points, and John Tanner, Fred Schell and R. J. Hoover have each scored two points.

COASTER BRAKE RECORD

BUFFALO, N. Y., Jan. 11.—An interesting little folder has just been issued by the Buffalo Metal Goods Co., makers of the Atherton coaster brake, in which a messenger boy tells the story of how he used a Pierce bicycle equipped with one of these brakes and ran up a mileage of more than 16,574 miles. His greatest mileage for one day was 121, while the lowest was 85. During the period of this riding he experienced no trouble with the brake; in fact, after his Veeder cyclometer indicated that he had rolled up a huge mileage, he became worried about the brake, and when he had it taken apart and inspected, it was in first class shape. This is only one instance, says Mr. Emerson, of the Buffalo Metal Goods Co., where the coaster brake has succeeded in making the work of the messenger easier and more pleasant, and has increased the utility value of the bicycle.

BACK TO FORMER LOCATION

LOUISVILLE, Ky., Jan. 2.—The National Supply Company, retailers and jobbers of bicycles and supplies, has moved from 207 West Main street to its original location at 104 West Market street, where the concern was located ten years ago when it was first organized by Sol. Lipski. The company has been showing some very attractive bicycles, tricycles and velocipedes for the holiday season.

SOLD 512 BICYCLES IN 1915

DETROIT, Mich.—The W. E. Wandersee Co., of Detroit, reports that the records for 1915 show that 512 bicycles were sold by the firm. The company handles the Miami, Flying Merkel, Iver Johnson and Dayton wheels.

Ed. Harris, who has long been known in the trade as an expert repairman, has joined the staff of the Wandersee company.

CYCLISTS' UNION AFFILIATES WITH "WHITE RATS" AND SEEKS NEW GOVERNING BODY

NEW YORK, N. Y., Jan. 12.—A meeting of the delegation which hopes to take over the reins of the National Cycling Association was held at the Metropolitan Opera House, on Sunday last and while the reports the delegates gave out at the time sounded very good, they hardly held

Bob Larsch, Dayton Factory Tester, Riding a Dayton Motor Bicycle

water when an attempt was made for a confirmation. These gentlemen went so far as to say that the Amateur Athletic Union would take over the control of cycling. They had present at the meeting Herman Obertubessing, the official handicapper of the Amateur Athletic Union and one of the big factors in A. A. U. athletics.

A committee was appointed to draw up the constitution and by-laws, consisting of Harold Diblee, Dr. A. J. Birs and Dr. George H. Muth. Diblee and Birs were officials at the Newark Velodrome last season while Dr. Muth is a newcomer. Hugh Brown, an old amateur rider, was for putting the grievances of the men up to the National Cycling Association before making an attempt to overthrow the present body. This was put to a vote and was killed when Alfred Goullet, William Coburn, Harold Diblee and Doctor Muth voted "no."

Frederick W. Rubien, president of the Metropolitan Association of the A. A. U., in commenting on the meeting, said: "Do not think for a minute that Mr. Obertubessing or Mr. Diblee were at the meeting in any official capacity. The A. A. U. has an agreement with the N. C. A. which has been in effect for the last sixteen years and it will stand by this agreement. If the N. C. A. has a fight on its hands we will stand by the National Cycling Association to the end and give it all the support we posisble can."

"False Pretenses" Charged

Mr. Obertubessing stated that he was brought to the meeting by Harold Diblee under false pretenses and did not know there was any outlaw movement under way. He said he came to the meeting with the intention of talking on club organization and as it turned out this was not the case.

On Saturday, the American Racing Men's Union held a meeting in Newark and elected officers. Alfred Goullet, of Australia, was elected president; Peter Drobach, secretary and treasurer.

The riders were turned down by the American Federation of Labor on their application for a charter and were referred to the White Rats, an organization of theatrical performers. The riders journeyed to New York in a body on Tuesday night and became affiliated with the "Rats."

Owing to the pressure on our columns this week, the third installment of Kramer's Life Story has been crowded out. A big, interesting installment will appear in the Bicycle Supplement next week. Watch for it!

On the Pacific Coast

TRADE ACTIVITIES IN BUSY 'FRISCO

PRESIDENT A. FREED, of the Pacific Motor Supply Co., Indian distributor for this section, has gone to Los Angeles for a visit to the branch there. Freed has been a very busy man during December on account of closing up the deal for Indian distribution, taken on about a month ago, and a little respite will not come amiss.

THE MOTORCYCLE SALES CO., distributing the Reading-Standard and Cyclone in this section, has received its first 1916 model of the brown R-S. It is a three speed twin, and it has been kept out on the road in catering to numerous demonstrations.

GOLDEN GATE motorcyclists were introduced to the Dayton Motor Bicycle just before Christmas, when the first one arrived at the agency of W. E. & W. H. Jackson, Pacific Coast distributors. All dealers who have seen it are enthusiastic over it, and the Jacksons have closed contracts all over Northern California for this make. W. E. Jackson reports receiving applications for local representation for the motor bicycle from all over the State with each mail.

THAT the Excelsior lightweight, which has recently made its initial appearance in this city, is destined to become very popular, is evidenced not only by the attention which it has attracted but also by the bookings for demonstrations. Whenever the little fellow appears on the street, it speedily becomes the center of an interested throng of people and favorable comments are heard on every side.

ALL the stock of the Hendee Manufacturing Company's San Francisco branch is now in the salesrooms of the Pacific Motor Supply Company, the work of shifting from the Van Ness avenue branch having been already complete. Charles Meyer, who had charge of the parts department for the factory branch, has been retained by President Freed, of the Motor Supply Co., in the same position, and will have R. H. Carter as his assistant.

The Hendee branch is in charge of George W. Sherman, who is closing up the Hendee business. It is expected that it will be the first of March before this work is completed.

SAN FRANCISCO CLUB HOLDS ANNUAL ELECTION

SAN FRANCISCO, Cal., Jan. 4.—The San Francisco M. C. have elected the following officers for 1916 at the recent New Year's meeting: Charles Meyer, president; W. Hunt, secretary; Miss R. Powell, recording secretary; A. W. Green, financial secretary (re-elected); George W. Payton, treasurer (re-elected); M. C. Tracy, and W. L. Caughlan, directors.

Under the constitution, the president has the right to name the captain and lieutenants, but President Meyers has waived this and will let the club do the electing of these officials. At the next meeting of the club the committee which has charge of arrangements for the projected endurance run will make its report. It is believed that the run will be decided upon for February 15.

GAVE CLARK A BAD 5 MINUTES

TACOMA, Wash.—For about five minutes on Christmas Day Jack Clark was one of the most doleful men in this State. Clark, on his Harley-Davidson, patrols the high-tension power line between this city and the Mashell river. While he was having visions of a nice turkey dinner and other things, he got word to go to the superintendent, B. W. Collins.

When Clark arrived, he was "jacked up" for not being able to cover his beat well, and he explained that the trouble was due to his machine, which was pretty nearly worn out, having been in use since the power line was first started. Then Collins presented Clark with a brand-new Harley-Davidson. Clark's despondent looks vanished like a lightning flash.

The Tacoma light department has been exclusive users of Harley-Davidsons ever since motorcycles were adopted for its service.

PACIFIC HIGHWAY NEARLY FINISHED

TACOMA, Wash.—The last stretch of the Pacific Highway in California from Yreka to the Oregon line is practically completed. A distance of 27 miles is graded and four bridges, inclusive of the steel structure over the Klamath river, have been put in. The two bridges across the Shasta river are not yet finished, but it is expected that the work will be completed before Spring.

THOR LEADS TO VICTORY

SEATTLE, Wash., Jan. 9.—Without any of the customary preliminary boosting, quite a speed event was pulled off in this city last week, when Guy Verhon, on a Henderson, and George Brannon, on a Thor, met on the North Trunk road and decided to settle an argument as to which one was the better at handling his mount. Brannon, with the help of his trusty Thor, quickly took the lead and was never headed. Vernon, however, is of the opinion that the case should be appealed, and the fans will probably see another snappy contest soon.

POOR RESULTS FROM HUNT

TACOMA, Wash.—E. E. Peterson, Excelsior dealer in this city, had all his plans laid for a goose hunt over Thanksgiving Day and started off accordingly. However, the rains did the rest and Peterson came home with a couple of ducks and some clams. One of his consolations is that the "Big X" for 1916 is "going fine."

WANT LOW NUMBERS

TACOMA, Wash.—Motorcycle riders are always anxious to get low registration numbers for each season and most Washingtonians desire to retain the same numbers from year to year. Wherever possible, this is being done by secretaries of state of Washington and Oregon, and already 1916 numbers are seen in quantities in the larger cities.

MOTOR VEHICLES IN WASHINGTON

TACOMA, Wash., Jan. 11.—The registration of motor vehicles in the State of Washington is at present 45,711. The population of the state is approximately 1,150,000, which means that one individual, in every twenty-five in the state of Washington, is the possessor of a motor vehicle.

On Monday morning, ... back to the office or shop ... are employed and tell others ... they had riding on the day ... they interest others—through ... talk.

The Case of the Girl

... hand, let us suppose Jones' ... Girl," and that he has either ... a sidecar on his machine. The ... tells her girl friends, and ... brother or two, what a fine sport ... riding is, and these people, not ... suggest to their brothers or ... the advisability of getting a ... Again the dealer gets more pros... recommendation.

... are sold, and sold in big ... through the sociability features ... recommendation. Motorcycle dealers in many cases do not sell as many machines as they could because they neglect to take into consideration one or both of these factors, particularly the one that any human being craves the society of some other or others.

How Sales Are Lost

Now, Dealer Smith and every other dealer should realize the force of this hankering after companionship, and, also, that whether he (the dealer) equips or does not equip Jones' machine, Jones is going to get a passenger by hook or crook. If the dealer sells his man a mount with a bare luggage carrier, the motorcycle appears with a lot of folded cloths or rags for the passenger, or a cushion that is frequently not much better than a rag. The result is that his friend, instead of becoming a booster for the pastime, becomes an advocate for the best liniment that the drug store can provide and his friends hear all about how sore he is the next morning. We here have a case of sales lost through recommendation.

Can you picture an automobilist having a comfortably-upholstered seat in front for himself and putting his guest on the steel frame of the car with a folded raincoat or something like it for the trip? Well, this sight is duplicated on a motorcycle every day of the week, and the dealers themselves are entirely responsible for such sights.

Irving Beck

Get Tandem in First

In selecting equipment for a customer's motorcycle, the dealer should consider it just as important to prepare him to properly carry a passenger as to fit him out with adequate lamps. He should furnish him with a good lamp right off, as well as with a good tandem attachment or sidecar—or both. If the rider cannot spare enough money at the time to purchase both the lighting outfit and the tandem, it is up to the dealer to get in the tandem first. The rider will have to come back for the lamp and cannot use cloths for throwing a strong light at night.

Among my own customers, I can say that 50 per cent. refuse to sell cheap cushions to their trade, and it is a further fact that in those cities where good tandems and sidecars are in vogue, motorcycle riding is further advanced and the dealers are more prosperous.

I do not mean in this article that by following out the above suggestions any dealer can sell a maximum number of motorcycles and that the sales of the power two-wheeler will immediately compare favorably with the sales of automobiles in his town. I do know from long observation that they will increase his sales materially. My point of view may be prejudiced, perhaps, due to the fact that I sell tandems and sidecars, but throughout I have endeavored to discuss the subject "neutrally."

STENGER TAKES ON THE DAYTON MOTOR BICYCLE

CINCINNATI, O., Jan. 3.—Ferd Stenger has taken on the Dayton motorbicycle, and looks for big things for it this year. The low price and inexpensive upkeep of this lightweight are expected by Mr. Stenger to make a decided hit with the man who wants the engine to do the work, but does not want to pay high prices for the machine or its upkeep.

NEWS NOTES OF BUSY CHICAGO TRADE MEN

FRED HUYCK AND C. E. Way, of the Motor Sales Company, at 1804 South Michigan avenue, have delivered 20 machines of 1916 models so far and have booked orders for ten more for March 1 delivery. They consider that the company has never before equalled this performance in so short a time after the first of the year. There are but three used machines on hand now. The Sales Company is agent for Henderson and Flying Merkel machines.

MORRIS TANNENBAUM, who holds the West Side agency for the Henderson has disposed of 4 of the four-cylinder models of 1916 so far and has prospects of as many more for the next shipment. He is wearing the smile that lasts, as this is the first year he has sold so many around New Years. Tannenbaum is located at 3151 Ogden avenue.

J. P. COLLINS, who manages the West Side branch for the Edwards-Crist Company, at 1150 West Jackson boulevard, predicts that the demand for Indians during 1916 will be unusually heavy, especially for early spring delivery. He has evidence on his books to prove his claim, too.

FRANK W. SNOOK, manager of the West Side branch of the R. C. Crist Company, Excelsior distributor, at 1111 West Jackson boulevard, has made deliveries of 1916 machines since the first of the year. He is looking forward to the best season he has ever had, for 1916, and is taking orders for present and Spring deliveries.

OUT at 3018 East 91st street, South Chicago, is the headquarters of the S. C. Brown Music Company, distributing the Henderson, Indian and Excelsior. This firm recently held a big opening celebration and has been busy ever since booking orders on all three of its lines. Most of these are for Spring delivery.

LOS ANGELES, CAL.

FOLLOWING the visit of President A. Freed to the local branch of the Pacific Motor Supply Company, active preparations are being made to enlarge the store and garage in this city. Freed arrived here on January 5, and two days later, Manager Edward Lebell was busily superintending a force of workers. The second story of the building in which the branch is located has been leased, the floor area being even greater than that of the present quarters. An elevator has been put in, of ample capacity to take several crates of machines. The upper floor will be used for the firm's wholesale business.

TOMMY BUTLER was as busy a man as the Los Angeles trade has ever seen on January 5. He was handling another carload of Powerplus Indians at C. Will Risden's store, and trying to satisfy immediate demands for the same before the crates were taken off.

SALESMEN on the Appeal Mfg. & Jobbing Company's staff met at headquarters on December 31, to outline plans for 1916, in concert with Sales Manager E. E. Welborn. The organization is going after business with a vengeance, not only pushing the Harley-Davidson, but also the bicycle and sundries business, including Firestone bicycle tires.

SEATTLE, WASH.

PIPER & TAFT, Excelsior motorcycle and bicycle representatives in this city, report an extra heavy demand for the motor-equipped "X" models in this territory. An increase of 50 per cent. in the sale of bicycles during Christmas week as compared with the same period of 1914 has naturally made the partners very enthusiastic over bicycle conditions.

Neat and Accessible Arrangement of Excelsior Parts in Stores Department of J. B. Clarkson & Co. at Wellington, N. Z. System Enables Orders to Be Filled Rapidly

Dealers'

RACINE, WIS.

GUY DIXON, handling the Harley-Davidson in connection with his sporting goods establishment has recently made an addition which triples his floor space and gives him a fine display front on Main street. Motorcycle sales made this addition necessary.

EXCELSIOR machines will be sold by the Rice Cycle Company for 1916, this representation being continued for the third season. L. R. Rice, the proprietor, is one of the veteran motorcycle and bicycle dealers in this state and looks forward to another excellent sales season.

WILLIAM WADEWITZ, manager of the De Luxe Garage, will continue the Thor agency in this city for the 1916 season.

N. C. JOHNSON & CO. have signed up again to represent the Indian motorcycle and bicycle lines.

JONAS & PROSTERNICK have renewed their contract with the Westfield Manufacturing Company and will handle the Pope line once more during 1916.

DAYTON motorcycles, and the Motor Bicycle with front-wheel power plant will be represented during 1916 by the Dayton Cycle Company in this city and surrounding territory.

CINCINNATI, O.

HOW motorcycle sales respond to the least encouragement in weather conditions was demonstrated recently, on a nice day, when Joe Wandstrat, of the Brendamour Sporting Goods Company's motorcycle department, sold an Excelsior for cash. A trial trip across the Ohio river took the purchaser to a Kentucky town to get his cash, and also showed him what the machine could do on muddy roads. The Brendamour firm is now rejoicing in the possession of one of the 1916 big-valve speed models, similar to that which won the Chicago classic last fall, and a number of riders who want to burn the wind have been looking it over.

SHOW OPENS NEXT WEEK

ROCHESTER, N. Y., Jan. 11.—Four motorcycle dealers will exhibit at the automobile show which opens at Exposition Park on Monday night, January 17. These firms are Geo. L. Miner Co., Wagner-Dolph Co., Flynn Bros., and A. J. Deininger. The motorcycle exhibits will be a prominent feature of the show and will appear with accessories at the entrance, so that visitors will see the powered two-wheeler before they inspect the autos. The show is under the auspices of the Rochester Auto Trades Association.

In one speed trial, the mount showed 42 miles per hour before the throttle was opened full. One of the Big X speed-monsters is due soon, to be turned over to one of Newark's speed merchants.

A move toward co-operation was made by the local motorcycle dealers recently, and uniform closing hours were decided upon. The stores close at 8 p. m. daily except Saturday, when 10 p. m. is the closing hour. Sundays and holidays, the dealers themselves go riding after ten. The new ruling is working well, the riders readily adapting themselves to the idea.

BRONX, N. Y.

GENE COUGHLIN is now the Bronx representative for the Harley-Davidson, having recently severed connections with the Harley-Davidson Sales Co., of New York which not long ago had a sub-agency of its own in this section. Up to January 3, Coughlin sold 14 of the Silent Gray Fellows of 1916 model, as well as 11 used machines of various makes.

Coughlin carries a line of accessories which have been welcomed by Bronx riders and has done a big business in this direction since starting in last Fall.. The repair shop keeps him busy what time he is not out giving demonstrations of the capabilities of the 1916 three-speeders.

KANSAS CITY, MO.

CHARLES HANSON, Indian agent for this section, states that the motorcycle business has decidedly increased the winter over that of previous years and assigns two main causes for this. The first is the amount of publicity given to the practicability of Indian models, and the other is the changing of the climate.

The publicity has resulted in sales during the past two months being as heavy as during the top of the riding season in some years. Kansas City has not had a real hard winter for several years and riding conditions have consequently been fine.

NEW HAVEN, CONN.

THE contract for supplying the New Haven Police Department with six motorcycles has been awarded to Albert Werle, agent for the Harley-Davidson. The machines ordered are all 1916 three-speed twins, with full electric equipment. At present the department has four 1914 two-speed Harley-Davidsons in use, so that from now on New Haven will have a force of ten motorcycle policemen.

Until recently the police machines had very poor lighting equipment—no tail lights at all, in fact, and very dim head lights—so that there was considerable adverse comment on the part of motorists. It seemed very unreasonable for a motorcycle rider to be stopped by a policeman because he had no tail lamp, or because his tail lamp was not lighted after dark, when the officer himself was violating the law he was trying to enforce. That is a thing of the past, however.

It is the intention of the Department of Police to put most, if not all the machines on night service as well as day. Up to the present the mounted police have gone off duty at six.

COLUMBUS, O.

TEN dealers from Franklin County, which includes this city, were registered with the state of Ohio during 1905, according to a report made by W. H. Walker, registrar of automobiles. In all, says the report, there were 227 dealers, of which Hamilton County, inclusive of Cincinnati, had 12; Cuyahoga County, with Cleveland, 8; Wood County, 8; Lucas County, 7; Miami County, 8; Montgomery County, 8, and Ashtabula County, 7. The remainder were scattered over the state.

PORTLAND, ORE.

GEORGE E. RICHARDS, formerly with the Dayton motorcycle agency in San Francisco, has returned to this city for an indefinite stay. He expects to enter the motorcycle business here after a short rest.

Our Canadian Letter

CANADIANS PLAN "BICYCLE WEEK"

As Soon as Motor Cycle Illustrated Arrived with News of a Big Bicycle Day for the States the Torontoans Decided Upon a Six-Day Program

TORONTO, Ont.—On the same day that the announcement reached Toronto, through **Motor Cycle Illustrated,** that Tuesday, February 29th, had been set aside as "Bicycle Day" as the formal opening of the 1916 season, officers and members of the Toronto Bicycle and Motorcycle Dealers' Association decided that the whole week of February 28th should be a "Bicycle Week" during which a number of special features would be employed to arouse enthusiasm and, incidentally, to demonstrate the staple efficiency of the wheel.

The dealers gathered at the headquarters of the Planet Bicycle Works to discuss the "Bicycle Day" proposition as it was outlined in the issue of **Motor Cycle Illustrated** and the first decision reached was to have a whole week's "celebration" instead of one day. The assistance of several manufacturers was promised and the tire people are to be asked to co-operate to the limit. All windows are to be dressed alike during "Bicycle Week" and a certain amount of advertising and publicity is to be placed in the daily newspapers. Special printed matter is to be distributed as well and every salesroom and store is to be made a show room—in fact every dealer is expected to conduct a small bicycle show of his own with all of the special features and attractions.

There are about sixty bicycle dealers in Toronto and each of them will take part in the big demonstration, providing the officers of the association can impress upon them the benefits of co-operation. Every cycle merchant in the city, whether he is a member of the association or not, will be given an opportunity to secure a share of the good things whether he cares to become actively associated with the local organizations or not. The hope of President Grove of the Toronto Association is to have every legitimate dealer in line for the demonstration so that the best results can be obtained.

Secretary Walter Andrews and Treasurer Sam Bulley were detailed to secure as much information as possible regarding the features which are planned for Bicycle Day in the States and a request has been sent to **Motor Cycle Illustrated** for all available particulars.

The association members also took steps to secure the reduction of the fee for so-called second-hand licenses from $15 to $5 per year. Junk peddlers are required by the city to pay only $1 per year for their second-hand licenses and they can buy and sell all the used bicycles they care to handle.

The municipal authorities are also to be asked to prohibit the handling of used bicycles by peddlers because it has been found that too many wheels, supposed to have been stolen, have been disposed of through the junk dealers.

President Grove told the meeting about the experience which his son, Pte. Joseph Grove of the Canadian Divisional Cyclist Corps had encountered since going overseas. In a recent letter from the soldier-son, particulars were given of an all-day ride of 85 miles which had been taken by 2,500 cyclists. It rained nearly all day and the roads were in a terrible state, he wrote. The Canadian cyclists came through the trip with honors, however, as scarcely a Canadian rider had to fall out.

TRADE CIRCLES CONTINUE ACTIVE IN TORONTO

Percy McBride Adds Miami Power Bicycle—Indian Featherweight Scores Hit—Kipp Starts Another Long Trip

TORONTO, Ont.—Percy A. McBride, the widely-known Canadian distributor, has added the Miami Power Bicycle to his already formidable array of agencies. This lightweight will be handled in Toronto at McBride's branch store, 45 Queen street East. He has already received his first shipment of machines.

The Indian Featherweight, with its two-cycle engine and general completeness, is making a hit in Canada, according to reports. During one week recently, more orders were received at the Canadian Indian factory here for the lightweight model than for any other model and the orders for the regular lines were heavy also.

Herbert W. Kipp, the Canadian traveling representative of the Indian forces is starting on another cross-country business trip for the Hendee Company. It is understood that he will cover the whole of Western Canada before he returns to Toronto.

Announcement has been made by President T. A. Russell of the Russell Motor Car Company, Limited, recently purchased by the Willys-Overland Company, that the Canada Cycle & Motors Company, Limited, West Toronto, will be a separate and distinct organization in future from the automobile concern. J. W. Gibson, formerly sales manager of the Canada Cycle Company, has been appointed general manager of the new bicycle firm.

WAR HONORS FOR MOTORCYCLE OFFICER

Lieut. Hallam Did Great Work With Machine Gun Section at Dardanelles and Has Received Distinguished Service Order

OTTAWA, Ont.—The story has just been released through the Canadian military offices here of the winning of the Distinguished Service Order, a high British military honor, by Lieutenant Douglas Hallam, a motorcycle officer and a son of the late Alderman Hallam of Toronto, during activities at the Dardanelles.

Lieut. Hallam was attached to the Armored Car Division of the Royal Naval Air Service, but he was in charge of a motorcycle machine gun section, composed of four guns and thirty-six men. It was announced that Hallam won his commission through working out an original plan to mount machine guns on motorcycles. The details of this arrangement are, of course, withheld. He was sent to the scene of operations in Turkey, and during forty days of terrific fighting he was wounded no less than five times.

DOINGS OF LONDON DEALERS

LONDON, Ont.—Fred Kerr, who possesses a model motorcycle establishment in this city, has just secured the sales rights for London and vicinity for the Harley-Davidson.

McCarthy of Stratford, Ontario, has also secured a Harley-Davidson agency and he will handle the Milwaukee motorcycle in addition to the Indian.

Butler, of Waterloo, Ontario, now represents the Harley-Davidson in that town as well.

LOOK FOR WHEELS

SEATTLE, Wash.—Vernon & Son, Excelsior and Henderson distributors in this city, are not considering taking on bicycles as yet. They point out that they are on the lookout for a good line and are anxious to interview manufacturers' representatives.

This Illustrates What Happens When You Start A Cold Motor

WHEN you "light the gas" under your cold spark plugs the effect is much the same as if you poured boiling water on a spark plug half buried in a cake of ice.

Unless the materials are exactly conditioned—

Unless the parts are accurately tooled and fitted—

Unless the contact points are properly cushioned where the strains come—

Something is bound to break.

Champion

"TOLEDO MADE FOR THE WHOLE WORLD'S TRADE"

Motorcycle Spark Plugs

give absolutely reliable service under all the varying strains of temperature, speed and load.

We have tried them out in motorcycle engines under every conceivable condition.

We go to extremes in testing you'd never dream of.

By actual comparative tests the Champion plug designed to serve your motorcycle engine will do the work better than any other kind of plug you can buy.

Insist upon having Champions.

Be sure the name "Champion" is on the *porcelain*—not merely on the box.

The Champion Guarantee

Complete satisfaction to the user—
free repair, replacement or your money back

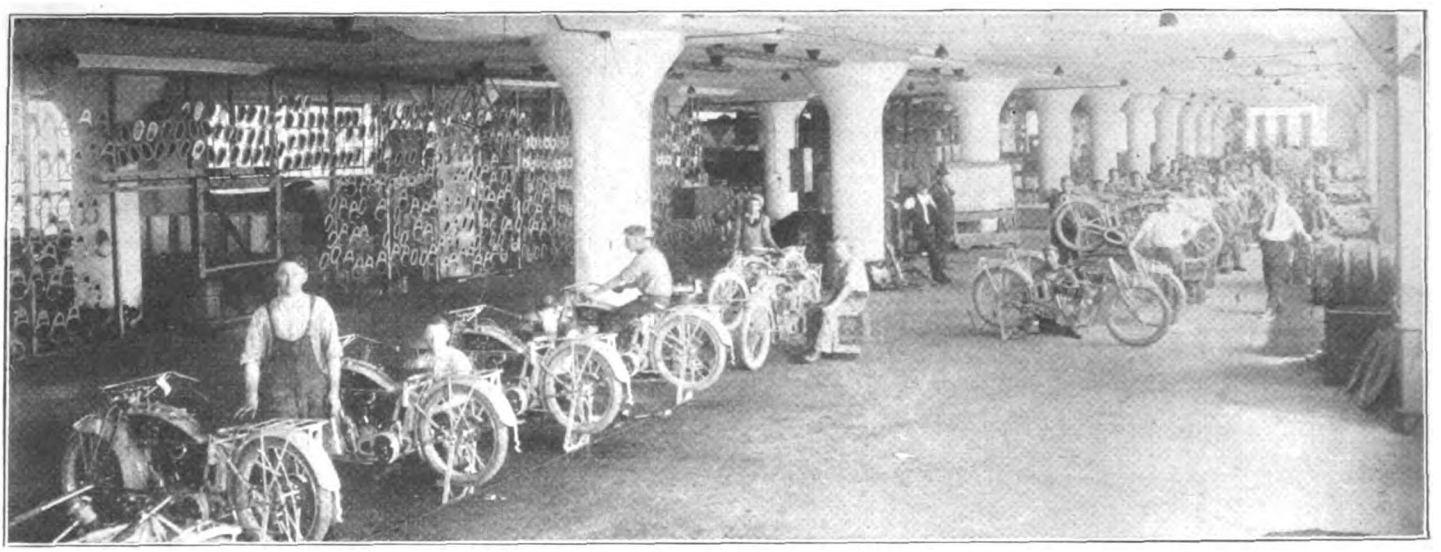
PERFECT ASSEMBLY OF THE EXCELSIOR

Only Experienced Men Thoroughly Familiar with Every Detail of the Excelsior Machines Employed in These Departments. The Final Inspector's O. K. Signifies a Perfect Machine



Final Testing Section of Assembling Department

NO matter how scientifically designed, how perfectly made, or the quality of the material, the element of perfection in a motorcycle is largely dependent on the exactness of its assembly and the final inspection and test before it leaves the factory.

In the Excelsior plant each element such as motors, transmission gears, brakes, frame, wheels, tanks, etc., are carefully tested and approved by the heads of the several departments before they reach the assembling room.

While in the manufacture of the various details of the machine, the workmen are often familiar only with their own particular element, the men of the assembling department are largely men who have passed through other departments or at least in some way have become thoroughly familiar with every detail of the several models. The relation of their work to the finished product closely resembles that of the man who finally times and regulates an accurate time piece or the man of perfect ear who gives the final tone to a magnificent piano. They know the proper relation of every part and how its operation must harmonize with that of other elements to produce perfect results.

Setting Motors and Transmission Gears

Even skillful men cannot produce satisfactory results without proper equipment. To insure such efficiency, the assembling room of the Excelsior factory has been developed to its present efficiency, not by one man, but through the joint ideas of the workmen who know what they are required to accomplish and are often better able than any one else to specify what tools and equipment they need. Taking advantage of the almost entirely glass sides of the building, the assembling department runs along the East front for a distance of over 200 feet, each operator being provided with a specially designed bench and a complete set of special tools, wrenches, spanners, etc. Borrowing from neighboring workmen is absolutely prohibited and each assembler is required to keep all his appurtenances in perfect condition. Wrenches must perfectly fit the parts for which they are designed, bruising and damage to the nuts and bolts being thereby avoided. Pliers for holding control rods, tubes and similar nickel parts are leather faced to protect the finish and when the machine is fully assembled and ready for the final inspection, it must be perfect both in operation, adjustment and finish.

By employing a large force of workmen, and perfect equipment, the assembling of individual machines need not be rushed and every care can be given to even the smallest details, yet on account of the number employed and the capacity of the department, 300 machines per day can be passed to the shipping room for crating and delivery.

It is by such thorough methods and equipment throughout the plant that the mechanical perfection of the Excelsior Autocycle has been attained and when the dealer or ultimate user uncrates an Excelsior Autocycle, he knows it is right and ready for immediate use. —Adv.

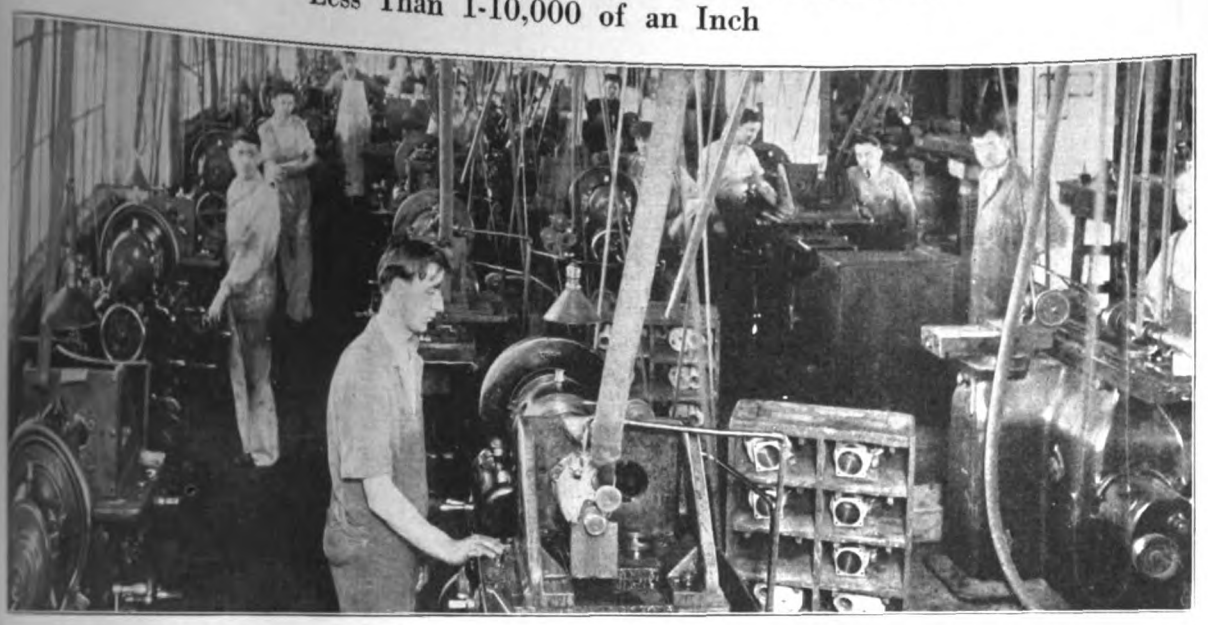
EXCELSIOR MOTOR BUILDING METHODS

Absolute Accuracy a Feature of Every Step in the Production of Excelsior Motors—Every Moving Part Ground to Size with a Variation of Less Than 1-10,000 of an Inch



Cylinder Grinding Department

THE efficiency, power and reliability of a gas engine is largely dependent upon the absolute fit and perfect accuracy of every element. In the production of the Excelsior motorcycle engines, the cylinders, pistons, rings and in fact all moving parts are first machined to a size slightly over that of the finished product. In this work, the most modern machinery is used. Cylinders are bored by heavily constructed, perfectly adjusted and absolutely accurate vertical boring mills.

The pistons are all machined on heavy turret lathes.

Piston rings are machined inside and out and cut apart on heavy lathes, after which all three of these moving parts are sent to the grinding department.

The cylinders are ground on special machines which insure perfect cylinders both as to curvature and constant diameter.

The pistons are ground to a size 3/1000 of an inch less than the cylinder diameter.

The rings are ground on three sides, the flat faces being ground on magnetic chucks and, by this means, perfect fit is assured both in the piston grooves and against the cylinder walls.

The valve seat and guides are machined by means of special jigs and after the cylinder walls are ground the valve seats are ground by means of special machines.

The valve cams are ground to contour on special grinders designed solely for cam production by which perfect contour is attained and silent valve action assured.

Gears are cut from special steel and perfectly tempered, thus producing a gear of great wearing qualities and eliminating the noise and back lash inevitable in improperly formed or irregular tempered gears.

Fly wheels are turned and balanced in specially designed lathes that insure perfect uniformity with consequent elimination of motor vibration.

CRANK SHAFT PERFECTION A FEATURE OF THE EXCELSIOR MOTOR

The crank shafts and crank pins are first formed on heavy automatic machines.

The smooth running and great durability of the main shaft bearings are the result of perfect grinding of the main shafts and crank pins, all of which are finished on micrometer grinders with a variation of less than ½ of 1/10,000 of an inch. Such a shaft, tempered glass hard before grinding, is practically frictionless when working within the Non-Gran bronze bushings used in the Excelsior motor. In short there is no operation in the production of Excelsior motors that can be in any way improved upon within the present knowledge and machinery of motor construction. The results of such mechanical accuracy are written large in the records of Excelsior accomplishment wherever motorcycle contests for speed, power and endurance are held in properly controlled and accurately recorded contests.

Bear in mind, an Excelsior motor of strictly stock design was the equipment of the only motorcycle to officially attain a speed of 100 miles per hour and other world's records for the majority of the recognized distances are held by these motors.—Adv.

NEWS AND VIEWS OF F. A. M. DOINGS

By GOSLIN

RECENTLY, the F. A. M. paid the twenty-seventh reward of $25 for the recovery of a member's motorcycle. A. W. Anderson, of Chicago, Ill., had his machine taken the day after he affiliated with the Federation. When his machine was recovered more than one year after the theft, the reward was paid to the member of the Chicago police force who located it.

The thief had to pay Anderson $60 for repairs and was sent away for one year to safeguard other Chicago motorcyclists. Anderson had an emphatic answer to any query he might have made regarding what he got for his dollar, and you, too, Mr. Rider, can lean over his shoulder and hear it.

Anderson's Answer

He was helped to the extent of $25 in offering a reward for the recovery of his stolen machine, and like the rest of us, could not afford to lose a motorcycle very often. When your machine is stolen, that F. A. M. reward of $25 added to what you can offer yourself is quite a tidy sum. It is enough, in fact, to make the recovery of the machine worth while to quite a number of Sherlock Holmes'.

Twenty-seven $25 rewards makes close to $700—paid out for the recovery of F. A. M. members' motorcycles. Some answer to that question, "What do I get for my dollar?" isn't it?

Why Not Affiliate?

Now, you may never have your motorcycle stolen, but are you positive of this? Can you say definitely that there is no lad hanging round your neighborhood awaiting the opportunity to make off with your motorcycle? Even admitting that you will never lose it through theft, is there no honor in affiliating with a body that has a standing reward to recover its members' property? You may never appear in courts, yet you are taxed for their maintenance; you are proud to live in a country which gives the right of fair trial, therefore, why not affiliate with a body of motorcyclists who are banded together for the common good of all who ride?

It is all over now, this annual Christmas rush with the strain of what to give, but this suggestion will be good next year at the same season and for any part part of the season, in fact. Give your riding pal a membership in the F. A. M. By doing so you not alone benefit him, but you help yourself and thousands of other riders—good fellows all, even if you do not know them. What could better represent the real, 18-karat Christmas spirit?

Speed Up, All Hands

The F. A. M. has been running along throttle down for the past few months, but 1916 is here now and we want to speed up. We want to sign up all those new riders and go after the veterans who have not been affiliated as yet. We need those 20,000 riders and Mr. Ignatz Schwinn's $500.

All of you 437 collectors, registered men, brush up your arguments and oil up your persuasive powers. Do your little bit and do it hard. Clubs, too, get after the 1916 crop of riders and don't overlook the lightweight riders by any means. We need them and they need us.

NEW JERSEY CLUB ARRANGES SEASON'S AFFAIRS

NEWARK, N. J.—The New Jersey M. C. installed its new set of officers last meeting and began the new year with a rush. A secret time run is scheduled for January 16, a theater party with cabaret trimmings at one of the local lobster-palaces is on the cards for January 27 and a dance committee has been appointed to prepare for an event of this nature some time in February. The club held 19 runs last year, totaling 2,616 miles, and is planning 25 sociability rides during the present season. The club starts 1916 with a membership of 118 and a bank balance of $125.

FREEPORT OFFICERS INSTALLED

FREEPORT, Ill., Jan. 13.—President-Elect Roy Mensenkamp and the other officials of the Freeport M. C., of this city, were installed by the retiring officers today with the procedure which has marked such action in the club heretofore. The first affair determined upon by the new president was the participation of the club in the Rockford M. C. dinner on January 15. Most of the members have decided to attend the affair as a body.

In addition to President Mensenkamp, the following officers are to serve during 1916: M. W. Barkman, vice-president; Harry Kuhlemin, secretary and treasurer; J. E. Kegel, corresponding secretary; Elmer Koym, road captain.

BUSY MEETING FOR WHEELING

WHEELING, W. Va., Jan. 10.—The first meeting of the new year was held by the Wheeling Motorcycle Club last Tuesday, with a large attendance. The new officers were installed and a racing committee was appointed. London Bier was elected chairman of the committee, whose members are as follows: Paul Dangle, Harry Douglass, Carl Sells, A. C. Hubbard, H. A. Brady and H. G. Friedrichs. After the meeting was over the members presented President Bier with a shaving set, as a token of their appreciation for his splendid services.

Three new members were initiated, one of them being Harvey Bernard, the well-known Indian representative. A committee was appointed to visit the Moundsville Club in order to induce them to affiliate with the F. A. M. In the New Year's resolutions adopted by the fellows, they promised to comply with all speed ordinances, to keep their mufflers closed and to be courteous to all users of the road.

WATCH FOR THESE STOLEN MACHINES

DEALERS and riders who are willing to co-operate with the F. A. M. in aiding its members to recover stolen machines will find below a complete list of the motorcycles which were stolen during the past year. It will be wise for dealers to cut out this list and post it prominently in their stores. Full data regarding each stolen mount is on file in the office of Secretary G. B. Gibson at Westboro, Mass., and can be secured by communicating with Dr. Gibson. The list follows:

Harley-Davidson: 6209DG, 3324H, F9592H, 1613K, 7641H, 789C, 9072H, 8257B, 1988EH, 1680K, 7874H, 1530EH, 4058K, 8760H, 2731K, 5841K, 3406D, 6470DG, 2752K, 11557H, 10992H, 6044H, L4299K, 6684E, 6525H,6760H, 1735EH, 3876K, 10026H, 9289K, A14349H, 5151G, 10158H, F14107H, 8201, 7036H, 10533, K1426, 2009D, 5214DG, 9188K, L5883K, 6084K, 4613H, 10397K, L8467K, 4364, 6844H, 11519K, 12501K, 12525K, 9524H, 5147K, L8430K, 2805E, 4960E, F14146H, 10428H, 14583K, 2625K, 712E, 8833K, 7410H, 9519K, 1017K, A13845H, L3114K or 13114K, 6654K, 7953B, 11833K, 15002K, 13395K, 12823K, 1278H, 10123H, 8760H, 3246H, 1234EH, L12534K, 1860K, 3527H, 3655B, 7958K, 10993K, 3493H, 1177K, 4397K, 8955K, 10730K, 3157K, 1656B, 4530E, 12862K, 13941K, 1374E.

Cyclemotor

The high speed, light-weight motor was officially endorsed by the leading automobile manufacturers at the New York Show. They approved the important principle expressed in the Cyclemotor.

The power of a gas engine is measured by its speed. **High speed means reserve power and lack of vibration.** The Cyclemotor engine makes 3000 R. P. M., running at 20 miles per hour, hence, vibration is eliminated and the motor is not injurious to the bicycle frame.

This achievement is several years in advance of all other cycle engines now on the market and it is therefore to your decided advantage to cash in on the exceptional selling qualities of the Cyclemotor at once. Ask for our dealers proposition and booklet "L I."

CYCLEMOTOR CORPORATION

Arlington Bldg. Rochester, N. Y.

Preparedness

IS on the mind and tongue of every American!

Mr. Dealer, have you brought the principle of preparedness into your individual business?

ARE YOU PREPARED TO HANDLE YOUR PORTION OF THE MOTORCYCLE, BICYCLE AND ACCESSORY BUSINESS WHICH WILL SOON BE AT ITS HEIGHT?

HAVE YOU SUFFICIENT SPACE IN WHICH TO HANDLE THE LOOKED FOR BUSINESS?

Better dispose of those second hand machines. IT WILL PAY YOU TO ADVERTISE THEM IN THE CLASSIFIED COLUMNS OF MOTOR CYCLE ILLUSTRATED.

IF used once the ad will cost three cents a word—if used two or more times the cost will be two cents per word for each insertion. Address, Department C, Motor Cycle Illustrated, and

MAIL IT TODAY!

This Brake Means Better Bicycling to You—The

CORBIN

DUPLEX COASTER BRAKE

Perhaps no other device on the market has done more to make bicycling a practical convenience and pleasant pastime than the Corbin Duplex Coaster Brake.

It has played a large part in popularizing the bicycle and kept pace with its most rapid progress.

For years it has been the standard equipment.

Bicyclists the country over know its service record, know its power of grip, its ease of action, its remarkable durability.

On roads, hills and traffic congested streets it has been tried and tested year after year and found reliable.

It is the **one** coaster brake equipment which the dealer will find will give universal satisfaction to his customers.

1916 bids fair to be the biggest year that the bicycle has ever known and you will not be securing your share of the profit unless you carry the Corbin Brakes.

All bicycle manufacturers will equip the Corbin for 1916 when specified — jobbers will gladly furnish it. Discounts, price lists, and catalog on request.

"THE COVENTRY

Coventry, England, is the Mecca of mechanical knowledge. It is the centre of the steel industry of England. There are turned out the finest motorcycles England can produce. And there, too, are built "The Coventry" Chains.

While, ordinarily, the geographical location of a manufactory is of slight significance, the fact remains that here, at the very core of the mechanical world, "Coventry" engineers apply every known test to "The Coventry" Chains.

This is but another reason why "The Motor's True Mate" is the strongest, most durable motorcycle chain in the world.

Write for our interesting booklet,

No 5 PIRATE PEDAL

Two Pedals That Are Immensely Popular

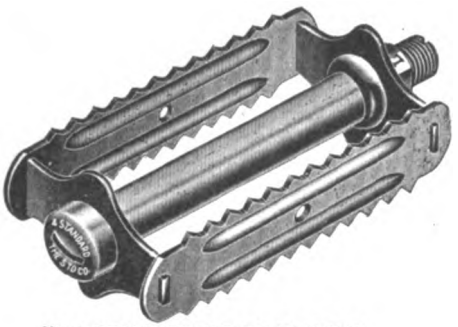
Their design and construction assure strength and comfort. Especially is this true of the No. 5 PIRATE, whose deep corrugated rubber cushions are not only soft to the feet, but absorb shocks and keep the feet from slipping.

The No. 4 STANDARD is a new addition to our large and comprehensive line of Rat Trap Pedals. It is strongly made, well designed and gives a splendid foot hold.

The Standard Co. *Torrington Connecticut*

Manufacturers of

Diamond "E" Spokes and Nipples for bicycles, motorcycles, tricycles, velocipedes, invalid chairs, sulkies, carriages, cycle-cars and automobiles. Pedals for bicycles, tricycles, velocipedes and motorcycles. Toe clips for bicycle pedals. Emergency axles for pedals. Screw machine products.



No. 4 STANDARD RAT TRAP PEDAL

Schrader Universal Tire Pressure Gauge

Let us send you our motorcycle booklet giving the views of tire manufacturers on the importance of keeping motorcycle tires inflated to a prescribed air pressure.

If you have been riding on haphazard pressure you have been spending a great deal more money for tires than you need have spent.

The use of a

SCHRADER UNIVERSAL
TIRE PRESSURE GAUGE

will save you this needless expense and may save you your life in the bargain.

PRICE ONE DOLLAR

Posed on a Bosch-Equipt R-S Motorcycle

BOSCH

IS THE NAME YOU MUST LOOK FOR

AFTER you have faced the pain of ignition breakdown—after you have "forked up" for another magneto so as to have dependable ignition, you will have learned forcefully the necessity for looking for the name "Bosch" on the ignition system of the motorcycle you buy.

No item of your motorcycle is as important as the ignition system.

No item is as puzzling as ignition.

No individual accessory costs as much.

None can make or mar your motorcycle so readily.

For these reasons look—look for the name "Bosch" and insist on getting Bosch Magneto Ignition, for then you will have the ignition system used by most makers—the highest priced system, to be sure, but the very best system, the system without a "Big Bogey Man" within itself.

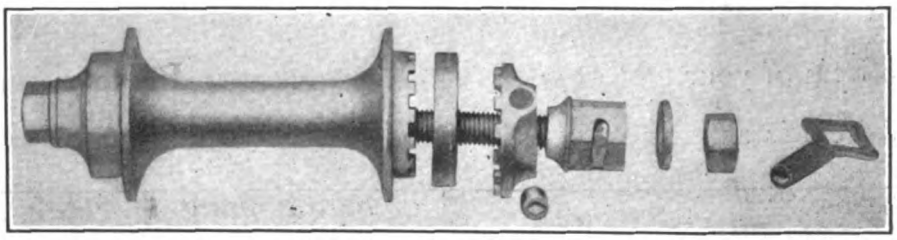
ECLIPSE LOCKING FRONT HUB

FOR

Bicycles and Motorcycles

An invention which is revolutionizing the locking device market

Riders buy a machine to own it. They demand protection against theft and the annoyance of the practical joker. The lock and chain are things of the past. The Eclipse Locking Front Hub is efficient, thief proof and fool proof. Carry a key; that's all. Same distance between cones.



SIMPLEST, SUREST LOCKING DEVICE KNOWN

This photograph shows the Eclipse Locking Hub parts (made for both bicycles and motorcycles). It shows the ball race flange notched to receive the locking member. Between the notched surfaces is shown the dust ring, slipped off to expose the notches. The cone has a hexagon head, over which the locking member moves longitudinally, by the use of a socket key inserted over the diamond shaped shifting pin. The inside end of the shifting pin operates cam-like in the slot in the hexagon cone head and is held securely, either locked or unlocked, by a flat spring which prevents movement. Unlimited key shapes are provided.

America's Pioneer Lightweight Uses Belt Drive

FOR six years the Pope Lightweight, Model H, has been a faithful adherent to the belt drive method of transmission. Its original method of transmission remains unchanged because no change has been found necessary or advisable.

Admitting the correctness of the belt drive principle for lightweight motorcycles, the engineers of the Pope Lightweight, the pioneer American motorcycle for "Everyman" would not have been so successful had it not been for the fact that it was belt drive with a different kind of belt. A belt that withstands exposure, water, oil and mud—a belt that will not slip, tear or crack and outlives any other method of transmission—a belt that is known the world over as "par excellence"—the Spartan Belt.

Let your selection of a Lightweight be governed by the reputation of its transmission. Insist that the Lightweight Motorcycle you sell be simple, long lived and smooth running—insist that they be guaranteed to do all both you and your customers require of them—insist that they be fitted with no other than

Section of Smith Motor Wheel Crank Case Department

An 1800 Horse Power Factory

EIGHTEEN hundred horse power is used to drive the 900 machines which occupy the greater portion of the 424,300 square feet of floor space in this factory. This power is of our own manufacture, generated by one large steam engine and two gas engines in our power house.

Most of the machines are specially designed for their purposes. The crank case machining department, a section of which is pictured above, is equipped to finish crank cases for Smith Motor Wheels in 24 operations. These machines are fitted with fixtures and tools designed for Motor Wheel crank cases only, and are laid out in the order the operations on the crank case follow. This allows not only quantity production, but insures absolute uniformity of all Motor Wheel crank cases and positive accuracy to the minutest degree.

Motorcycle Dealers for 1916 Specify the

CORBIN-BROWN SPEEDOMETER

"The Speedometer of Absolute Accuracy"

The Corbin-Brown has more logical sales arguments behind it than any other speedometer on the market. And motorcyclists of note the country over have emphatically endorsed these arguments.

Your customers will be interested in the Corbin-Brown. Once they have seen it they will be more than interested, they will be convinced.

Its friction reducing, flexible shafting, its strong, simple mechanism, its steady hand and clear dial, its correct centrifugal principle and its fair guarantee of one year of service will be sufficient "reason why" to clinch the sale.

More motorcyclists every day are coming to recognize the dependable service to be had by the Corbin-Brown. And every day more dealers are realizing the profit that lies in carrying it.

Its unequalled selling features together with its nation wide reputation for durability and accuracy have always made the Corbin-Brown an attractive sales proposition. It will be more so than ever for 1916.

BLUE STREAKS

A Standard Bicycle Tire at $2.50 Each

Do you really want to eliminate the factors in the bicycle business that have been its own worst enemies?

Do you want to eliminate factors in bicycle tire selling methods, that you would not permit for a single moment in any other line you carry?

Lack of faith in tires and tire prices has kept thousands of people from purchasing bicycles; people who did not care to renew old grievances against the Dealer in bicycles and bicycle tires.

Now, so far as Goodyear Dealers are concerned, that is ended.

We have standardized the brand—it is the Goodyear Blue Streak Non-Skid, the best tire value we can build.

We have standardized the price—it is $2.50 each to riders everywhere.

We have standardized the guarantee—it provides both the dealer and the rider with a new tire free if the service is unsatisfactory.

You can always tell the Goodyear by its beautiful white tread, with the Blue Streak on each side.

The price to dealers is the same whether 10 pairs or 100 pairs are purchased.

More than 7000 Dealers have accepted this Goodyear Square Deal Policy. Don't you believe it would help your bicycle sales too? Then write us for complete Goodyear Dealer's Bicycle Tire Proposition.

HENDERSON PRICES ADVANCE TO $295 and $325

Rapidly-Ascending Cost of Material and Labor Necessitates This Action by the Company to Avert Actual Loss; Single-Speed Formerly Sold at $265, Two-Speed at $295

CONFRONTED by the raw material shortage and labor conditions which hardly have been foreseen, and determined to preserve the high standard of workmanship by which its motorcycle has established an enviable reputation, the Henderson Motorcycle Co, of Detroit, announces that it has been compelled to advanced the prices of its two models. The single-speed machine, which formerly sold at $265, will now retail at $295; the two-speed, formerly sold at $295 will now retail at $325.

The announcement is the result of abnormal conditions of manufacturing which have existed for several months, and which promise to become more bothersome. The cost of materials of all kinds has increased greatly and labor has also become much more expensive. For example, the aluminum crankcase castings for the Henderson motors now cost $5 more apiece than they did in 1915. The crankshaft costs $1.75 more than formerly, and so it goes throughout the whole machine. Screw machine work costs the company four times what it did a year ago. Other manufacturing costs are likewise increased.

To make matters worse it is impossible to get satisfactory deliveries on material, even at these high prices. War-order manufacturers are using such quantities of all metals that a serious shortage exists, and the difficulty of getting the materials when they are needed hampers production in proper volume.

The Henderson company emphasizes the fact that it did not decide upon the increased prices until it became evident that it would be impossible to continue production on the present high standard without an actual loss on every machine.

Realizing that the company would not make such a move unless it was found unavoidable, most of the Henderson dealers throughout the country are showing a loyal spirit and receiving the announcement of the new prices without complaint. With few exceptions the dealers assert that they can sell nearly as many machines at the new prices as at the old.

"We deeply appreciate this spirit," said President T. W. Henderson, in referring to the situation, "and will certainly do all we can to back up these loyal agents so that they will never have cause to regret their faith in us and in the Henderson machine."

TIRE PRICES JUMP UPWARD TEN PER CENT

A Number of Leading Manufacturers Announce Higher Quotations for Motorcycle Products and Others Are Likely to Follow Suit Owing to Increasing Cost of Production

NEW YORK, Jan. 18.—Tire users woke up with something of a jolt today to learn that the threatened advance in tire and tube prices by the leading manufacturers had become a reality. One or two of the companies issued formal announcements to the newspapers, and the others made statements to **Motor Cycle Illustrated** from their New York offices when asked for their revised quotations. Where a definite increase in price has been decided upon the advance is 10 per cent.

The United States Tire Company, from its headquarters at 1790 Broadway, announced an advance of ten per cent. on all motorcycle and automobile tubes and casings in standard sizes to take effect at once. This advance, of course, included accessories and repair goods.

The Goodyear Tire & Rubber Company announces an advance of ten per cent. on standard sizes of motorcycle and automobile tires and on solid and cushion tires for heavy motor vehicles as well. In other words, the Goodyear advance affects its entire line of motor vehicle products.

The Firestone Tire & Rubber Company issues a statement quoting an advance of ten per cent. on standard sizes of motorcycle and automobile tires, including accessories, etc. This advance became effective today.

The B. F. Goodrich Company announced its advance today. The figure quoted is ten per cent. above former prices and all motorcycle and automobile tires of standard sizes are involved.

While a statement from the headquarters of the Federal Rubber Company was not obtainable as regards motorcycle tires, an advance of ten per cent. was announced on automobile goods; this increase took effect today. It is thought, however, by tire men in the metropolitan district who represent Federal products, that motorcycle tires will shortly be similarly advanced in price.

The New York office of the Pennsylvania Rubber Company would not go into details regarding an advance in prices of Vacuum Cup tires. It was stated that no advices had been received as yet on any changes in the present prices.

There have been a number of vital causes for an increase in prices. Successively during the past four or five months, the price of crude rubber and of other materials which are essential to the manufacture of tubes and casings has advanced. There has been a general increase in wages also, and these factors necessitate a higher figure being charged to the consumer, as the manufacturing cost had been proportionately increased. Factory costs have likewise undergone a marked advance during the last half of 1915.

While the ten per cent. increase affects motorcycle and automobile tubes and casings in several instances only, each maker announcing the advance specifies that the new quotations are for tire accessories and repair materials also.

WESTFIELD EMPLOYEES GET 10 PER CENT. INCREASE

Machinists Will Also Receive Time and a Half for Overtime Work and Double Pay for Sundays and Holidays; Big Factory Is Humming at Capacity Schedule These Days

WESTFIELD, MASS., Jan. 15.—Official announcement was made tonight at a meeting of the employes of the Westfield Manufacturing Company that the company had granted the men in every department of the big factory a 10 per cent. increase in wages, to go into effect at once. Negotiations have been pending for two weeks between the company and the newly-organized Machinists' Union and the men were jubilant tonight when the agreement was made public.

Not only does the company grant the 10 per cent. increase, but the men are granted time and one-half for overtime, and double pay for Sundays and holidays, with no work on Labor Day. The older men will be given the preference, all other things being equal, when it is necessary to lay off any of the help. The company will deal with the men through the Shop Committee. The machinists asked for an 8-hour day, but the company has contracts to fill based on the 9-hour day and settlement of that question was postponed, at least until the close of the fiscal year of the company, August 31. About 500 men will be benefited by the 10 per cent. raise in wages. At the Union meeting tonight the report of the committee was unanimously accepted.

The relations between the Westfield company and the men in its various departments have been of a decidedly friendly character, and the present liberal attitude of the company has strengthened what has always been a close bond between officials and employees. The big Westfield plant has rarely been busier than it is at this time, and there are strong indications that the pace now being set will have to be maintained indefinitely. When questioned concerning the increasing demands for their motorcycle and bicycle lines, the Westfield folks stated that both motor and bicycle sales are certain to go considerably beyond those of 1915.

DETROITERS DEFY JACK FROST IN MIDNIGHT RUN

As the Mercury Drops, Enthusiasm of Detroit Riders Climbs and Brings Large Number Out to Sociability Affair; Turkey Dinner at Hotel Followed by Dancing and Games

DETROIT, Mich., Jan. 18.—The fact that the temperature hovered around the zero mark, making it the coldest day of the season seemed to prove a stimulant in bringing out a larger attendance than expected in connection with the Sociability run of the Harley-Davidson Motorcycle Club of Detroit, which took place Saturday evening, January 15. Up until noon reservations were made by about 25 members; each hour the weather got colder and each hour more reservations kept coming in.

Got a Royal Send-Off

The boys met at the club over the W. E. Wandersee store, 129 Gratiot avenue, at ten o'clock; many brought their wives and sweethearts along; at eleven o'clock Roscoe D. Brown, of the Wandersee store, and who arranged the outing, announced that everything was ready to start. There was much enthusiasm and cheering as the riders got away, as a large crowd had gathered in front of the Wandersee store. It was such a unique outing—think of it! starting out about midnight on the coldest day of the season!

The itinerary included West Fort street, then West Jefferson avenue, through Delray, River Rouge, Wyandotte and Ecorse. The latter village was where the riders landed about a quarter of twelve. They went at once to the Riverview Hotel where a hot fire was in the grate to thaw out the riders. Promptly at midnight they sat down to a turkey dinner, which included cranberry sauce and all the other goodies that usually go with such a dinner. A special room had been reserved for the dinner.

Dancing, Singing, Games

Following the fine dinner—and it certainly tasted like home-cooking—the crowd made the time whizz past by dancing, music, singing, games, etc. This round-of-pleasure lasted until three o'clock and then the ride back to Detroit began. It was four o'clock before everybody returned. The event was one long to be remembered. Everybody had such a real good time. Among those who participated were riders of Harley-Davidsons, Excelsiors, Indians and other prominent motorcycles. Each participant was assessed seventy-five cents and the balance of the expense was generously paid by W. E. Wandersee.

There were prizes for those who arrived at Ecorse ahead of the others. The first prize went to Adolph Lemaigre; it consisted of a chain tread tire and inner tube donated by the United States Tire Co. John Otte won the second prize,—a twelve dollar sweater given by Mr. Wandersee; the third prize was won by Roscoe D. Brown, a $5.50 Harley sweater was also given by Mr. Wandersee.

GEORGE SCHRADER'S DEATH REPORTED

Government of Norway Cables That Former Head of A. Schrader's Son Died on Trawler Sailing to that Country; Was Noted Inventor

NEW YORK, N. Y., Jan. 18.—George H. F. Schrader, formerly head of A. Schrader's Son, Brooklyn, N. Y., manufacturer of tire valves, valve parts and gauges, is reported to have died on November 15 last aboard a fishing trawler enroute from Iceland to Norway. Mr. Schrader, after retiring from the firm in 1904, spent most of his time and fortune in philanthropic work and it was this which had taken him to Iceland.

His activities there exhausted his energies and he was on the verge of nervous prostration, when three months ago he wrote to an intimate friend in America that he would return. He could get no passport in Iceland, and feared to travel without one to England, lest he be interned as a German because of his appearance and accent although he was an American citizen. He therefore decided to take passage for Norway, where he could establish his identity.

While this letter was in transit here Mr. Schrader sailed, so that the New Year's greetings which Mr. Hunter, the secretary of the company, cabled him brought back the reply that no Mr. Schrader could be found in Iceland. Then came the letter. Mr. Hunter communicated with the government of Norway, and they reported his death. The Norwegian government officials have been requested by Mr. Hunter to furnish the necessary proofs of Mr. Schrader's death, including affidavits of the sailors who were aboard the trawler with him.

Mr. Schrader, according to his friends, was a mechanical genius. Of an extremely modest and retiring nature, he was very active at all times, and in addition to turning out his numerous inventions, including the well-known Schrader valve for pneumatic tires, he devoted himself to philanthropic undertakings.

SOUTHERN TRADE LOOKS FOR BIG YEAR, SAYS TRAVELER

SAVANNAH, Ga., Jan. 17.—T. S. Long, the Indian traveler, told the representative of **Motor Cycle Illustrated** a few days ago that the outlook for Indian business in the South is the best he has ever seen.

"Nowhere could I find a dealer who felt justified in crying over poor times," said Long, "and from Washington, D. C., to Jacksonville, Fla., it seemed to be generally agreed that 1916 is going to be a humdinger of a year for both motorcycles and bicycles."

MILWAUKEE MOTORCYCLE SHOW FEBRUARY 26-27

Canvass of Dealers Shows Strong Sentiment for Another Independent Exhibition and Capable Committee Starts Work—Charles Grier Is Again Appointed Manager

MILWAUKEE, Wis., Jan. 18.—Tentative dates for the second Milwaukee motorcycle show have been set at Saturday and Sunday, February 26 and 27; the Auditorium and Walker halls, Auditorium building, Fifth and Cedars streets. A canvass of the dealers in town showed conclusive evidence of the desire for another show this year and from the present outlook for space the show is assured of success.

Charles Grier, president of the Milwaukee Motorcycle Club, under whose auspices the show will be conducted again this year, has drawn about him a committee to manage the show which augurs well for results. It comprises Arthur Davidson, Arthur Eckes, George Melcher, Wilbur Geiger, Rudolph Fischer and Paul Bruess.

The club's show committee held a conference with the dealers at which preliminary plans for the show were discussed. It was decided this year not to give out the customary complimentary tickets with space, the dealers themselves urging the club not to adopt this plan and thereby to eliminate a common nuisance and at the same time make more money for the club.

The club this year will add new features to make the show more attractive to the rider. A sidecar will be given away during the course of the show, the winner being given the privilege of selecting his own make of sidecar.

The show committee expects to have the floor space laid out and a complete report ready to present to the club and to the dealers by January 28. At that time the space will be allotted and final details arranged. The office of the Milwaukee Show Committee will be 253 Fourth street and communications should be sent there.

BUFFALO IS TURNING POINT FOR BAY STATE RUN

Boston Club Announces Complete Plans for 1,000-Mile Endurance Grind to Be Held May 28-30; Six Classes of Contestants Provided for, Including Lightweights

BOSTON, Mass., Jan. 17.—Plans for the most ambitious event ever arranged by the Bay State Motorcycle Club, which will be run off May 28, in the form of a 1,000-mile endurance run, have now taken definite form. The original announcement of the run was made in **Motor Cycle Illustrated** recently. It will start from Boston at 3 a. m. on that date, and the contestants are expected to reach Buffalo, the turning point, at noon the next day. After a short rest for refreshments they will hit the trail again for home, and count upon checking in at Boston at 8 p. m. on May 30.

The interesting feature of the run will be the participation of lightweight motorcycles. These machines will be ridden by amateurs and will make Syracuse their turning point. The schedule will naturally be slower than that for the standard twins.

The Six Classes

The following classes have been provided for: *Class A*—To consist of teams made up of professional riders, as follows: four solo riders or four tandem machines with two riders, or four sidecar machines with two riders. Teams will be made up of one make of machine. Every member of a team finishing with the highest consistent score will be awarded a diamond medal. Members of all other teams finishing with perfect scores will be awarded gold medals, and all "survivors" will be awarded silver medals.

Class B—To consist of professional riders on solo, tandem or sidecar machines, not connected with any team. All riders in this class finishing with perfect scores will be awarded gold medals, and all "survivors" will be awarded silver medals.

Class C—Same as Class A, except that all contestants must be amateurs. Each member of the team finishing with highest consistent score will be awarded a diamond medal. Members of all other teams finishing with perfect scores will be awarded gold medals, and all "survivors" will be awarded silver medals.

Class D—Same as Class B, except that all contestants must be amateurs. Riders in this class finishing with perfect scores will be awarded gold medals and all "survivors" will be awarded silver medals.

Class E—To consist of teams made up of professional riders as follows: Four solo lightweight motorcycles all of the same make. Each member of the team finishing with highest consistent score will be awarded a diamond medal. Members of all other teams finishing with a perfect score will be awarded gold medals, and all "survivors" will be awarded silver medals.

Class F—To consist of professional riders on solo lightweight machines not connected with any team. All riders in this class finishing with perfect scores will be awarded gold medals, and all "survivors" will be awarded silver medals.

The term "survivor" covers any rider who finishes with a score of more than 900 points, and less than 1,000.

The committee has decided to classify as a lightweight any machine entered that is rated at 3 horsepower or less.

CYCLES FEATURE OF BUFFALO MOTOR SHOW

Nearly Every Motorcycle and Bicycle Dealer in the Bison City Represented—Lightweight Machines Attract Crowd

BUFFALO, N. Y., Jan. 18.—An unusually large number of motorcycles and bicycles were exhibited at the Buffalo Motor Show which was held here in the Broadway Auditorium, January 10-15, under the auspices of the Buffalo Motor Manufacturers' and Dealers' Association.

The Emblem Mfg. Co., of Angola, N. Y., had a complete exhibit of its motorcycle and bicycles. Mr. Schack and Mr. Gale were in charge. The Emblem lightweight was the powerful magnet of this booth and elicited much favorable comment from the visitors.

Seeber & Hofheins, of the Bison City, displayed the machines for which they hold the Buffalo agency, these being the Henderson, Thor and Cleveland lightweight. Pierce and National bicycles were also at this stand, a big attraction being the Pierce Machine on which Krank Kramer won the national championship.

Poppenberg Brothers exhibited the complete line of Pope motorcycles, and also the Columbia, Rambler, Tribune, Barnes and Fay Juvenile bicycles. This booth was in charge of Otto Brocker and the Westfield factory representative, C. A. Leander.

H. L. Peters, the Buffalo Harley-Davidson dealer, had a very attractive exhibit, showing the whole family of silent gray fellows. In charge of this booth were Otto Peters and factory representative E. R. Durkee. A number of Peters' sub-agents were also on the job, among whom were: H. C. Wood of Hartfield, N. Y.; P. Moone, of Niagara Falls, N. Y.; Mr. Londahl, of the firm of Londahl & Johnson, of Jamestown, N. Y.; C. A. Granger, of Westfield, N. Y.; Harry Willyoung, of Bowmansville, N. Y.; William H. Hummel, of Clarence, N. Y.; William Schlichter, of Springville, N. Y.; E. C. Arenz, of Tonawanda, N. Y.; Ira Palmer, of Central Park District, Buffalo, N. Y., and Charles Liske, of East Buffalo, N. Y.

The Vim Cycle and Hardware Company had a very interesting exhibit of its bicycles, also the Schickel and Dayton motorcycles. Frank Albert, the Schickel factory representative, was at this stall with the glad hand.

Almost to a nicety did F. F. Rick & Company display the Standard-Reading Motorcycle and the Rick bicycles. A feature at this stall which made a hit was the miniature bicycle which was constructed by the Emblem Manufacturing Company.

GOODYEAR SALESMEN GATHER MOTORCYCLE DATA

Ten Special Representatives Are Studying Conditions the Country Over Preparatory to Assisting in the General Campaign for 100,000 Motorcycles in 1916

NEW YORK, Jan. 17.—S. A. Falor, and E. R .Stilwell, of the Goodyear Tire and Rubber Company, called upon the publishers of **Motor Cycle Illustrated** after their visit to the Hendee factory, one day last week. With Mr. Quine, of the Goodyear Company, enthusiastically acting as Chairman of the Million Bicycle Committee, Messrs. Falor and Stilwell took it upon themselves to inaugurate a campaign for larger motorcycle sales. Their suggestion was heartily welcomed by the Hendee Company, and the slogan: "100,000 Motorcycles in 1916" is the result.

To the end of making this slogan an actual fact, the Goodyear folks are resolved to obtain more and better motorcycle publicity. The daily newspapers, the National Press Associations, and various other news channels, together with some of the leading national magazines, will be enlisted. Special efforts will be made to arrange to supply the newspapers with daily items of general interest, and the magazines with feature articles on the motorcycle as a pleasure and commercial vehicle, its wonderful adaptability to military purposes, etc. Finally, it is planned to conduct an educational campaign in behalf of the lightweight motorcycle as a vehicle of general utility, so as to make possible production on a much larger scale than heretofore.

As these plans assume more definite shape announcements of the details will be made from time to time in **Motor Cycle Illustrated.**

An idea will be gained of the systematic manner in which the Goodyear company is entering upon the campaign for 100,000 motorcycles in 1916 when it is understood that Manager S. A. Falor, of the company's Motorcycle Tire Department, now has ten special salesmen recollecting data on which to base broad-gauge plans for helping the dealers. These salesmen handle nothing but Goodyear motorcycle and bicycle tires, and the country is divided into ten districts for them. When their reports have been turned in the Goodyear company will have an invaluable fund of information with which to proceed.

Each of the ten salesmen is now making a careful study of motorcycle sales in his district, to ascertain the potential business in the field and to pave the way for bigger sales by getting at the bottom of the conditions that have been detrimental to the advancement of the power two-wheeler in the past.

SUPERIOR FACTORY ON CAPACITY SCHEDULE

ELYRIA, Ohio, Jan. 17.—Manager H. A. Jackson, of the Superior Metal Products Co., the well-known saddle manufacturers, reports that the call for immediate shipments of his saddles has jumped way beyond his expectations.

"We counted on big business," says Manager Jackson, "but hardly expected it to strike its present remarkable pace. If we could obtain the necessary skilled hands we would certainly put on a night shift and operate on a 24-hour schedule for awhile."

BIG CALL FOR COMMERCIAL CYGNET MODELS

BUFFALO, N. Y., Jan. 17.—One of the most interesting phases of the rapidly increasing demand for Cygnet Rear Cars concerns the adaptation of the product to commercial uses, and Sales Manager Leadlay Ogden is authority for the statement that no less than a dozen calls for specially designed Cygnet bodies are now on file. One large concern purposes using Cygnets on suburban milk routes, and is having a special type of car tried out. Other lines of business in which the Cygnet has created a highly favorable impression include tea and coffee houses, tailoring establishments, department stores and florists.

The New Sporting Goods Company of New York City, reports that excellent publicity was obtained when a Cygnet Rear Car, driven by one of its salesmen and drawn by a 1916 Indian, carried nine men in one load to the recent automobile show.

THREE FISK DISTRICTS ON PACIFIC COAST

CHICOPEE FALLS, Mass.—The Fisk Rubber Company, of this city, has divided its Pacific Coast territory into three districts for 1916. The northern district will be in charge of William Bayliss, with headquarters at Seattle, Wash., while the central district will be managed by C. O. Du Mars, at San Francisco. Du Mars will also take care of Fisk foreign trade in the Pacific. The southern district will be in charge of F. Sargeant, with headquarters in Los Angeles.

TIRE COMPANY IS SEEKING SITE FOR NEW FACTORY

GRAND RAPIDS, Wis., Jan. 18.—There is a certain tire manufacturing company that bewails the ingratitude of a community lacking enough enterprise to induce large factories to locate within its precincts. Grand Rapids is the community but we won't mention the name of the tire concern. But among the modest requests that the tire company makes is a factory site on which a plant valued at $150,000 can be built, this plant to be two stories high and basement, constructed of brick and concrete and cement floors and it asks that Grand Rapids sell $100,000 worth of stock. It is stated on good authority that the request for an early reply was complied with.

BARTSCH DISCUSSES TRADE ADVERTISING

In the "Inland Printer" He Writes an Instructive Article, Commenting on What the Bosch Magneto Company Has Done in the Cycle Field

NEW YORK, N. Y., Jan. 18.—In the January 13 issue of the *Inland Printer*, which is probably the best authority on advertising, appears an interesting article from the pen of Alfred H. Bartsch, Advertising Manager of the Bosch Magneto Co., which is entitled "Making Advertising Yield Count to the Utmost with Trade Appeal."

A portion of this instructive feature deals with the Bosch motorcycle advertising and in that connection Mr. Bartsch calls attention to the fact that, in the cycle field especially, close co-operation is very much appreciated by the manufacturers. He then goes on to say in the article:

...t of them desire to see their ma... used in illustrations and frequently ... very strong point of the matter in ...ction with the editorial pages of mag...

"It was figured that the company could ... co-operate with the manufacturers, ... would please and help them materially ... machines were used in the illustrations in the ads. It was also counted on that the riders of each machine, being interested in pictures of the motorcycles they rode, would be more apt to read the copy if it contained such pictures.

"Motorcycling, it is hardly necessary to mention, has been generally considered a rather untidy and grimy pleasure. This is unjust to the sport, because in these days dirt and untidiness in connection with it are absolutely needless. It was believed that it would be doing the manufacturers of motorcycles a good turn if this false impression were corrected. Naturally, the idea embraced the illustration, too. Why not use one that would help to lift the motorcycle from the undeservedly low plane to which it had been relegated by the public?

"Whites and blacks affording the greatest contrast in illustration, that type was determined upon. Since the presence of the gentler sex suggests surroundings in harmony, one of its members was included in each illustration and so helped to have the machine and rider suggest an appropriate cleanliness and neatness.

"The Bosch company has been the first in the line to adopt an all-around co-operative scheme of this character. That it is meeting with approval has been shown by numerous letters from manufacturers expressing thanks and appreciation for the co-operation, from trade papers which felt assured that the advertisements were teaching a lesson of better advertising, and from riders in general. These evidences all indicate that the series has got across better than any other of the house's copy heretofore run."

INDIANA CYCLE SHOW OPENS FEBRUARY 24

...icipal Exhibition Hall in Indianapolis Will Be Used to Stage Annual Show; 20,000 Feet of Display Space Available; Show Will Last Three Days and is Expected to Draw Record Crowd

...DIANAPOLIS, Ind., Jan. 18.—The ...Annual Indiana Cycle Show will be held ...year on February 24, 25 and 26 in ...ckson Hall, the municipal building ...ere large exhibitions are usually staged. ...e Mansur Garden, in which the show ...held last year, proved too small to ...e adequately all the exhibits; and the ... this year promises to be much larger ... that of 1915.

Opens Noon Each Day

... addition to products of the cycle ...des sporting goods will also be shown, ...ny of the dealers throughout the State ...handling these two lines. The show be ...ms open to the public on noon of each ...y until eleven o'clock in the evening, ex... on the last day, when the show will ...nd up at midnight. The booths will be ... up on the morning of the first day.

According to official count more than ...000 riders and dealers visited the exhibition last year, and, with a larger building in use and more products on display this year, prospects indicate that at least twice that number of riders and dealers will attend. Space in the new show will be placed on sale beginning with the first of February, so that everybody contemplating exhibiting will have plenty of time in which to make arrangements.

Plenty of Space This Year

The hall will be decorated in attractive colors and everything for the convenience of visiting dealers will be arranged for. The Hearsey-Willis Co., G. H. Westing Co., Van Camp Hardware Co., Central Rubber and Supply Co., and several other Indianapolis jobbing firms are making special arrangements to entertain all their dealers.

As special attractions for riders, the Indianapolis News Boys Band has been booked for the three days of the show, and Charles Clary, baritone, will sing with Ione Booth, while Graff and his midget will also be engaged.

Lightweights to Appear

A special feature of the show will be the lightweight motorcycle. The Miami lightweight was the only machine of this type on display last year and aroused more interest than any other exhibit. This year at least seven different makes of the light models are expected to be displayed. All of the leading heavy machines will be on display with men from the factory to represent them. Bicycles will come in for more attention this year, as several of the smaller dealers who did not exhibit at the 1915 show have already agreed to come in.

The show is under the management of the Indiana Cycle Show Association. Jack C. Carr is secretary of the association and makes his headquarters at 337 N. Pennsylvania street, Indianapolis.

EIGHTEEN NEW FISK SERVICE STATIONS

Plans Call for Opening of That Number During 1916—Consider Eau Claire, Wis., as Location for Big Distributing Center

EAU CLAIRE, Wis., Jan. 18.—The Fisk Rubber Company, Chicopee Falls, Mass., may establish a distributing center and service station in this city. L. G. Barrett of the Minneapolis Fisk branch, has been in the city looking about for a suitable building to house the new Fisk center.

About a month ago representatives of the Fisk company were in Eau Claire investigating shipping facilities and conditions generally and Mr. Barrett stated that after due consideration the Fisk officials had looked favorably on the matter of locating here, the only question being the securing of a building that would meet the demands.

Mr. Barrett stated that the Fisk company intended opening up 18 new service stations during the present year. With the enlargement of the Chicopee Falls plant and added production facilities the Fisk company is beginning a campaign for preparedness in the service end of the business as well and promises that its service will be unexcelled.

WILSON STARTS ANOTHER FLYING TRIP

NEW YORK, Jan. 13.—Stanley Wilson, secretary for the D. P. Harris Hardware Company, of this city, has just left on one of his flying trips to the South and West. Starting with Maryland, he will cover that State and also Virginia, Ohio, Illinois, Mississippi, Michigan, Indiana, Texas, Florida, Georgia, Alabama, Missouri, Arkansas and then return to Maryland.

If Wilson meets with the same success on this trip as he did on his recent one, the Rollfast line will receive an additional strong impetus. The Rollfast line, true to its name, is rolling up sales fast and 1916 is destined to be a boomer.

RACERS MUST REGISTER FOR 1916, SAYS DONOVAN

CHICAGO, Ill., Jan. 14.—Chairman John L. Donovan, of the Competition Committee of the F. A. M., has issued a notice concerning the registration plan for racing riders for 1916, and a second with regard to blank sanctions. Regarding the registrations, he calls attention to the fact that all registrations issued expired on December 31, 1915, without regard to the date originally issued. This date, says the chairman, has passed, and renewals have not been coming in.

The chairman calls attention to the fact that the registration plan is still in force and that in order to compete in sanctioned events this season, all racing men must have up-to-date registration cards. Delay in renewing until such time as the cards are needed will be justification for refusing such renewals when applied for.

Chairman Donovan states that all blank sanctions held by referees are being withdrawn, and new ones issued direct from the office of the Competition Committee, 811 Ashland Block, this city. He calls the attention of promoters to this fact, and points out that much time will be saved and better service given to those organizing affairs when direct application is made.

CLEVELAND AND HENDERSON WIN JERSEY RUN

Waughop on Lightweight and Ker on Four-Cylinder Sidecar Rig Score Highest in First Club Competition Event

NEWARK, N. J., Jan. 16.—C. W. Waughop, on his Cleveland lightweight won the highest score in the solo class in the first monthly competition run of the New Jersey M. C. today. His score was 985. Walter D. Ker, Henderson sidecar, won in the sidecar class, with a count of 993. The run was a secret time event, the course being from Newark to New Brunswick and return, about 50 miles in all. Eight solo riders and six sidecarists entered and all finished. Besides winning in the solo class, Waughop and his little two-stroker came in for some city notice. This was in the form of a summons for travelling at 32 miles per hour inside the city limits The performance of the Cleveland was notable as the conditions of the roads was a severe test to both mount and rider Ker, Henderson sidecar, tied with W J Phillips, Harley-Davidson sidecar, but won in the toss-up held after the run

H. B. Misner, Harley-Davidson sidecar, had Mrs. Misner as passenger; this lady being the only one in the run. Misner and Fred S. Hofman, solo Harley-Davidson, covered the course in one minute less than two hours. After the finish Waughop demonstrated the Cleveland to an admiring crowd of both riders and just ordinary people. Because of the non-appearance of the Excelsior lightweight, the club cannot brag of holding the first lightweight competition, but is looking forward to several entrants of this character next month.

Following are the summaries:

SOLO CLASS.

C. W. Waughop, Cleveland lightweight	985
H. I. Cogswell, Indian	984
A. W. Wintsch, Indian	981
Leslie Wintsch, Indian	977
Harry Kunath, Indian	977
W. S. Moffatt, Harley-Davidson	974
Milton Cox, Henderson	974
F. S. Hofman, Harley-Davidson	958

SIDECAR CLASS.

Walter D. Ker, Henderson	993
W. J. Phillips, Harley-Davidson	993
C. L. Eckhardt, Harley-Davidson	984
Wilbur D. Malden, Harley-Davidson	981
H. B. Misner, Harley-Davidson	958
Elliott B. Holton, Harley-Davidson	953

FARNHAM IS WINNER OF PORTLAND RUN

Flying Merkel Rider Wins Consistency Trophy and a Rooster in New Year's Event; Other Finishers Get Merchandise Prizes

PORTLAND, Ore., Jan. 12.—Final decision of the officials in the third annual New Year's Run of the Portland M. C., held on January 1, 1916, gave the trophy for the most consistent performance to J. H. "Dustin" Farnham, Flying Merkel, who was one of the ten perfect score men in the affair, which was detailed in **Motor Cycle Illustrated** of January 6. Farnham also received the Plymouth Rock rooster, an added prize donated by one of the members, a Firestone casing and a pair of gauntlets. C. G. Danielson, Harley-Davidson side car combination, another perfect scorer, was awarded a Vacuum Cup casing and a Persons' saddle. Ed. Carlson, Indian, also scoring 1,000 points, received a Goodyear Blue Streak casing and a tube, while Gus Peppel, Harley-Davidson, received a Fisk casing and a U. S. tube.

In addition to the above, six other contestants who received perfect scores were awarded merchandise prizes. These are: Ed. Berreth, Indian, Goodrich casing and case of porter; Archie Rife, Harley-Davidson, mackinaw, one pair leggins and two chickens; Ted Gilbert, Harley-Davidson, Federal casing and Goodyear tube; Herbert Yost, Harley-Davidson, U. S. casing and 5 gallons oil; Henry Kurtz, Indian, Prest-O-Lite tank and 5 gallons of oil; Henry Klein, Harley-Davidson, Vitalic casing and pair of leggins.

Joe Freburg, Harley-Davidson, who scored 998 points, received a Long Horn and a cap as finisher's awards. Lawrence Zehrung, Indian, 998 points, was awarded a Stewart-Warner horn and 5 gallons of oil. H. G. Hadfield, Harley-Davidson, 990 points, received 5 gallons of oil and a $5 merchandise order. H. Lystul, Indian sidecar, received 10 gallons of oil in two lots; his score was 974. Walter Erickson, Reading-Standard, with a score of 968, had as prizes a Persons' saddle and box of cigars. Leonard Kratzke, Excelsior, scored 943; he received a Troxel saddle and a pair of gauntlets. Fred Gilbert, Harley-Davidson, had hard luck with his mount and scored only 867. As a finisher he was awarded a tandem and 5 gallons of oil.

The following did not finish: Jos. A White, Reading-Standard, broken frame; Clyde Clement, Dayton, frame trouble; Ernest Long, Indian, bad spill and retired; W. J. Hadfield, Thor, last lap, mechanical trouble, Thomas Colton, Reading Standard, broken rocker; W. T. McDonald, Indian, broken control and no gasoline.

BUFFALO CLUB FORMS RIFLEMEN CORPS

Will Also Qualify as Messengers and Scouts, and Co-operate With Local Militia; Purpose to Enroll 135 Riders

BU...LO, N. Y., Jan. 18.—The latest ... cycle club to offer its services for ... urposes is the Buffalo M. C. Its ... are a healthy crowd of patriots ... ardent supporters of the policy of ... ss. On January 17, they formed ... motorcycle riflemen who in event ... ll be ready to take the field with ... soldiers.

... the militia in this city has no ... unit, as have some of the cities, ...ington and New York. Whether ... club will join the local militia ... been decided, but some of the ... believe that greater efficiency can ... by the riders if they joined the ... under some suitable arrangement. ... qualify not only as riflemen, but ... messengers and scouts and will be ... accordingly.

... Peters, the local Harley-David... who is the prime mover in the ... a rifle corps among the Buffalo ... made the following announcement after the recent meeting of the club:

"Our idea is being splendidly received by motorcycle riders; not only the members of the club, but also unattached riders are showing unusual interest in the formation of a motorcycle corps for military service. We have been given every reason to believe that the War Department will furnish us with rifles and uniforms. After we get the necessary equipment, I do not believe that, in view of the keen interest which is now being displayed, it will be difficult to get the right sort of men to train. Buffalo has many red blooded riders who would be more than glad to join us.

"We will call our organization," concluded Mr. Peters, "'The Buffalo Motorcycle Mounted Riflemen,' and will look for training, aside from riding, to the officers of the army and militia. Our target practice will be done on the ranges of the local armories and on the big outdoor ranges at Kenilworth. I expect that the corps will number about 135 men."

On the Pacific Coast

HENDERSON DISTRIBUTOR IS NAMED FOR 'FRISCO

SAN FRANCISCO, Jan. 17.—Motorcyclists of this city are greatly interested in the announcement that a new store is to be opened here for the sale of the four-cylinder Henderson.

The new dealers will operate under the name of the Motorcycle Sales Company, and is a partnership between Edward Loudenclos and E. J. Angwin.

In addition to the big store they will conduct in this city, these two hustlers plan to open a branch store immediately in Oakland. They have contracted for a large slice of territory in this part of the state, and intend going after the business in a very aggressive way.

LOS ANGELES

SALES MANAGER WELBORN, of the Appeal Mfg. & Jobbing Co., which recently took the representation for the Bethlehem spark plug, states that the phenomenal sales of this article have been in a large measure due to the policy of the Silvex Co., the maker of Bethlehem plugs. The maker sent a special missionary to assist the Appeal forces in the latter's territory, and between the Silvex and Appeal men, a rousing business has been done.

C. FRED BREESE is now with C. L. Smith, Reading-Standard representative, at 1043 South Olive street. He was formerly with the William H. Hogee Co., as manager of the bicycle department.

BAKERSFIELD

JULES BERGES, head of the Berges Motor Supply Co., of Bakersfield, is thoroughly satisfied with his start as an Indian representative. This is his first season with the Hendee folks.

FRESNO

BEN BRESEE, who handles the Harley-Davidson in Fresno, says he has no fault to find with 1916 business. The present season so far is considerably better than the same period of the 1915 season.

SAN FRANCISCO

E. F. MERRY, Excelsior representative in San Francisco, has made a point of demonstrating the new "Ex" lightweight as a hill-climber. His first demonstrating machine has climbed every test hill in the city.

TURLOCK

SWANSON BROS., who sell Harley-Davidsons in Turlock, state that they have have disposed of as many machines to date as they figured on selling up to the middle of next summer.

PORTLAND

BALLOU & WRIGHT have taken the representation for the Eklipse spark plugs for both the Portland and Seattle sections. The firm holds the Indian agencies in both cities.

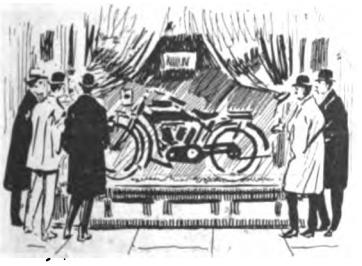
MAKE YOUR SHOW WINDOW TALK

A CORPORATION having successful stores in most of the large cities recently made systematic observations to ascertain the actual value of a well-decorated show window. It was found after weeks of figure gathering and comparisons that the window with a "punch" in it is more of an asset than even its most enthusiastic advocate would be likely to believe at first thought. It was proved that a truly attractive show window could be counted upon to ... chance from ten out of twenty passersby—men being referred to in ...—and that under ordinary conditions six of the twenty would ... at least a brief stop for an inspection of the window's contents. To ... these facts the corporation in question spent considerable money. ... regarded the investment as a wise one. It learned that too much ... tion could not be given to its show windows; that every hour spent in ... a window attractive brought actual cash returns; that it is a simple ... to catch the eye of the passerby and hold his attention if the proper ... is made.

There are comparatively few articles that can be displayed in a window ... effectively than a motorcycle or a bi- The machine itself carries a "punch" ... requires less work on surroundings ... background than is necessary with ... of the trade lines displayed in store ... ows. A shining motorcycle, suggest- ... speed and endurance in every line and ... ng the master touch of the skilled ... er and the best craftsmanship of the ... eer, is a magnet that will draw the eye ... a man, and not a few women, even ... ough a thought of buying has never been entertained. The same applies ... the bicycle.



In some quarters we have heard it argued that a motorcycle or bicycle ... es not offer a good opportunity for a window display. That is all wrong. Men who make a business of decorating windows would laugh at such a ... m. They are constantly dressing windows with articles much more ... saic and unattractive than motorcycles and bicycles—and getting away ... with it. They know that the heart of man turns towards a wheeled vehicle as it does to few other things under the sun; that the mere sight of a motorcycle or bicycle is suggestive of open roads, fresh air, freedom from the turmoil and hum-drum grind of the city; that with the recreation idea there is coupled up the equally strong health appeal. They know that with eight out of ten boys and men of riding age, to see a bicycle or motorcycle is to want it.

But they must see it. Not on the street nor on a country road. That helps, of course, but the influence is too abstract to be worth much. They must see the machine at a dealer's establishment, where they can learn all about it—and a cycle displayed in the show window will often bring in a prospect who might otherwise be lost.

MAY HAVE SPECIAL REGISTRATION LAW

PROVIDENCE, R. I., Jan. 18.—A new motorcycle registration law has been introduced in the General Assembly here providing for special registration, to expire on the last day of December, and for special plates for summer residents. The act provides that the letter "S" shall precede the number on plates issued for registration between June 1 and September 30.

The law reads as follows: "For each original license or duplicate thereof to operate a motorcycle, $1." The law further says: "For the substitution of the registration of a motor vehicle for that of a vehicle previously registered in accordance with the provisions, $1 will be charged; provided, however, that any person who is a temporary resident in this state between the first day of June and the 30th day of September, shall be permitted to pay one-half of the fee prescribed by this section, and the State Board of Public Roads shall issue a special plate."

MARYLAND CLUB HOLDS ITS ANNUAL ELECTION

BALTIMORE, Md., Jan. 18.—The Maryland M. C. has just elected officers for the coming season on the occasion of its annual meeting. H. A. Frederick is president; H. E. Snyder, vice-president; F. O. Boyd, secretary, and William Wood, treasurer. A. Gebhardt is road captain and has as his lieutenants William Snyder, Joe Hannibal and N. Leppo.

The club is now in its sixth season as a motorcycle organization. It started as the Walbrook M. C. on September 29, 1910, with seven members. Inside of two months the membership had grown to 25 and the present name was adopted. At present the club occupies a whole building at 847 Hamilton Terrace.

As an organization, the Maryland M. C. has led in promotion of meets and runs in this section and will be by no means behind hand in these respects in 1916. The first social event of the season will be the annual banquet on January 27.

PLAN SOCIABILITY RUN FOR FEBRUARY 22

SAVANNAH, Ga.—With the holiday racing events as past performances, members of the Savannah M. C. are now awaiting the next series that the organization will pull off. The holiday races were a success financially as well as from the standpoint of attendance.

The club is now considering a sociability run from this city to Sylvania and return, a distance of 60 miles each way, for February 22, as the proposed tri-state meet has been given up. The run will be free to all Savannah riders if it is held. A barbecue at Sylvania will be a start of the affair.

The tri-state race meet will probably be run off on July 4 in addition to the annual road race. Definite plans for this dual arrangement have not yet been settled, however.

Charles J. O'Neill, the official F. A. M. referee in Savannah, announced that the New Year's race was the last as far as his being referee was concerned.

CURTISS SAILS HIGH IN AERO DEAL

Pioneer Motorcycle Manufacturer Receives $5,000,000 in Cash and Big Block of Flying Machine Stock in New Company

ALBANY, N. Y., Jan. 17.—His hundreds of friends in the cycle trades will be pleased to learn that Glenn H. Curtiss, one of the pioneer motorcycle manufacturers in this country, has come into a large fortune as a result of his hard work and ingenuity in the development of the now famous Curtiss aeroplane. On Thursday of last week, there was incorporated in Albany, N. Y., the Curtiss Aeroplane and Motor Corporation of Buffalo, a combination of the old Curtiss Aeroplane Company and the Curtiss Motor Company. The incorporation papers revealed the interesting fact that Glenn Curtiss, inventor of the aeroplane which bears his name, received $5,000,000 in cash and also, it is said, $3,500,000 of the 7% accumulative preferred stock and 75,000 shares of the common stock of the new company. The shares are underwritten by a syndicate composed of many strong banks and business houses. The capitalization of the old companies was $3,000,000. The business in the past year was in excess of $5,000,000 and orders and contracts, both domestic and foreign, have been received which amount to between $13,000,000 and $15,000,000.

Mr. Curtiss and James Imbrie have been elected trustees and the control of the stock for the next five years has been placed in their hands. The directors of the new corporation are Glenn H. Curtiss, Monroe Wheeler, Kenneth B. McDonald and Harry C. Genung, of Buffalo; G. Ray Hall of Hammondsport, and James Imbrie, C. Horace Connor, Murray W. Dodge, George Q. Palmer and Harmon S. Graves of New York.

For many years Mr. Curtiss manufactured motorcycles and motorcycle motors. He was also prominent in competition, and it was only a few years ago that, on an eight-cylinder machine of his own design and manufacture, he was timed for a mile in 26 seconds on the Ormond-Daytona Beach, in Florida. This is still a world's record.

INDIAN CLUB ARRANGES FOR SPLENDID HOME

CHICAGO, Ill., Jan. 18.—The Indian Motorcycle Club of Chicago, with headquarters at 1154 W. Jackson Boulevard, recently elected new officers for the coming season. The officers now are: President, Jess Wilbourn; vice-president, Wm. Johnston; secretary, Art Hertzer; assistant secretary, G. Gosman; treasurer, J. W. Collins; captain, Gus Zina.

The club has completed arrangements for a new, beautifully equipped club house at Algonquin, Ill., overlooking the Fox River, where the members can spend their weekends and entire summer vacations. All of the club riders are enthusiastic over the new headquarters, and believe that its many attractions, such as fishing, boating and bathing in the Fox River, will bring new riders into the Indian organization.

ANOTHER CYCLIST CORPS

TORONTO, Ont.—When Gordon Moffat, a moving picture machine operator at the Family Theater, Toronto, left his post in order to enlist with the Divisional Cyclist Corps, the audience in the theater tendered him an ovation as the anouncement of his resignation was flashed upon the screen.

It is understood that still another corps of cyclists will be raised in Canada in the very near future. Toronto has already supplied approximately one thousand riders for this branch of the service and more local cyclists are preparing to join the colors.

TRADE DATA IN DEMAND

We are informed by the Department of Commerce that as the war in Europe has brought about a famine in South America of all European literature relating to trade and commerce, American publications are in big demand. American manufacturers are advised that for the current year no better method of advertising can be found than the sending out of large numbers of calendars. There is a dearth of them, particularly in Brazil.

MORLEYS ENJOYED THEIR CROSS COUNTRY TRIP

JACKSONVILLE, Fla., Jan. 15.—Ten months ago Mr. and Mrs. Morley left this city on what proved to be a very pleasant motorcycle cross-country journey. They recently arrived in Jacksonville on their return trip and their Indian machine and sidecar with attractive lettering was viewed by thousands of people. Mr. Morley was most enthusiastic about the whole journey.

On the way out Mr. and Mrs. Morley chose the northern route, the return being made via the southern route. Mr. Morley said to a representative of **Motor Cycle Illustrated** that he made the journey to California as a human advertisement for the Dixie Highway.

A feature of the trip to which Mr. Morley frequently refers with great satisfaction is the fact that he rode 3,800 miles on a Firestone tire placed on the wheel of the sidecar when he was in Omaha, Neb. Not only that, but he arrived in Jacksonville on the same air. Morley considers this quite a tire feat, and he has been riding a motorcycle for several years.

THE FRONT COVER

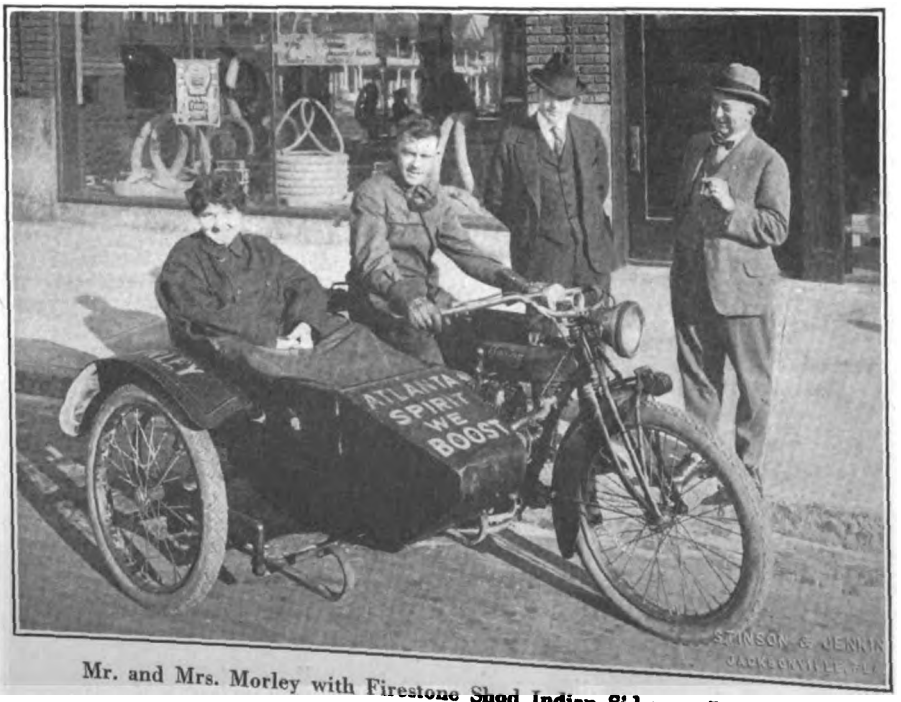
THIS week's front cover illustration shows a Cygnet Rear Car party on a pleasure jaunt in Central Park, New York. The car is attached to an Indian motorcycle and is driven by Wallace Stuart, of the New York Sporting Goods Company's staff. The latter company has kept a Cygnet demonstrating outfit on the streets of New York almost daily of late and passengers are so plentiful that they are booking their rides some time in advance.

INDIAN AND RUTAN DID GOOD WORK

ELMIRA, N. Y.—Phay B. Rutan, of Elmira, found his Indian and sidecar very valuable in getting into the Adirondacks and out again on a hunting trip a few weeks ago. On the homeward trip he carried a prize cargo of a ten-point buck, weighing 191 pounds when dressed. It was one of the handsomest specimens that ever came into Elmira, and the lucky hunter on his machine was surrounded by an admiring crowd.

JACKSON SIGNS 'EM UP

TOLEDO, Ohio, Jan. 18.—W. V. C. Jackson, general manager, Motor Wheel Division, A. O. Smith Company, Milwaukee, stopped off here long enough on his way to the Manufacturers' Convention in New York to close Associated Motor Sales Company on contract to again handle the Bicycle Booster, also Toledo Store, H. D. Capron, manager, who will continue with the Motor Wheel another year.



Mr. and Mrs. Morley with Firestone Shod Indian Sidecar. Item Above

W. G. SCHACK A CYCLING PIONEER

NUMBER TWO IN A SERIES OF SKETCHES CONCERNING TRADE LEADERS

It Was Thirty-Five Years Ago That the Present Head of the Emblem Mfg. Co. Entered the Cycle Field and His Record Since, Both as Sportsman and Manufacturer, Has Been an Enviable One; Still an Athlete at Fifty, Says Doctors are Superfluous

WHEN a man devotes thirty-five years of an active life to one industry it goes without saying that he is possessed of some character, an unusual degree of foresight and more than ordinary loyalty, and by the same process of reasoning it must be admitted that the industry which has inspired such consistent concentration of effort on an ideal must also be out of the ordinary and decidedly worth while. That this is any sketch of the life of President W. G. Schack, of the Emblem Mfg. Co., is meant to be somewhat of a tribute to the men in cycledom—and vice versa. Few men in cycle trade circles in this country today are so closely bound up with the history and romance of the industry as Mr. Schack, and certain it is that no man is more proud of the part he has been enabled to play in the advancement of cycling.

Started at Fifteenth Year

This will be better understood when it is stated that Mr Schack's active participation in cycling and cycle trade work goes back to his fifteenth year. He was just finishing his school course when he turned to the bicycle—and he has never turned back. Mr Schack is now fifty years of age. At least, he has reached the half-century mark as the calendar records time, but his friends and he himself figure that he is not a day over thirty as far as energy, working spirit and general ability whatever the goods are concerned.

It was in 1882 that Mr. Schack began riding the old high-wheel, or Ordinary, and in a very short time he was attracting attention. Almost before he realized it he became known as one of the best road and track riders in his section of New York State. While he was not greatly inclined to display his prowess before spectators he was persuaded to enter a number of events in most of them. He held the championship of the Rambler Club for some time and also captured the two-mile Buffalo championship.

An Expert Roller Skater

At the same time Mr. Schack devoted much attention to roller skating and up to 1890 he was undoubtedly the best all-round roller skater in central New York State. At that period his interest in skating was neck and neck with his love of cycling and he captured many races on both. He was captain of one of the fastest and most successful roller polo teams that played in those days, and the records show that for two years or more Captain Schack's aggregation of stars was practically invincible.

That Mr. Schack was consistent in his admiration of the bicycle, however, is evident from the fact that he continued to ride one until about seven years ago, when he started to use an Emblem motorcycle. He has ridden the latter steadily ever since. Each summer he rolls up a mileage of about 3,000 and up to the time he leaves for his annual Pacific Coast business trip by rail he rides from his home in Buffalo to the Emblem factory in Angola several times a week. Nearly every pleasant Sunday finds him out on the road on his Emblem motorcycle, and he asserts that no other pastime so admirably combines mental relaxation with healthful exercise and fresh air.

W. G. SCHACK
He Does the Work of Three Men Daily and Keeps Right on Smiling

During the last 10 years Mr. Schack has devoted considerable time every winter to bowling, and has a striking array of cups won in competition on the alleys. He finds that bowling is a good form of exercise, and does not hesitate to "roll a few" whenever he can find a worthy opponent. Mr. Schack is not boastful of his bowling accomplishments, but it is generally understood that few athletically-inclined boosters in the cycle trades care to pit themselves against him.

Looking back upon his long experience in the field, and profiting by developments in the past, Mr. Schack is of the opinion that the greatest need of the industry at present is better co-operation among manufacturers, jobbers and dealers. He argues that the sales of bicycles could easily be doubled if a harmonious campaign, in which all can participate, is carried through, and he is heartily in accord with the present movement to boost 1916 bicycle sales to the million mark. The spirit of co-operation should not be confined to the jobbers or retailers, in Mr. Schack's opinion, but must be the keynote of the whole movement from factory to rider.

For Greater Co-operation

Mr. Schack is also strongly in favor of greater co-operation among motorcycle manufacturers.

"If anything," says the Angola enthusiast, "the necessity is greater for 'get-together' work in the motorcycle field than in the bicycle industry, because the motorcycle's chief competitor—the low-priced motor car—is drawing closer all the time and necessitating a harder fight to maintain our position. The interests of the dealer and the manufacturer should be so cemented by loyalty and mutual welfare that it will be impossible for any other vehicle to take the place of the motorcycle. In other words, the motorcycle should stand permanently in a class by itself, and it is the duty of the factory and the dealer to see that it does maintain that prominence to which it is entitled."

It will have been inferred from the opening paragraphs of this article that Mr. Schack has always been a keen believer in outdoor exercise, and he still practices what he preaches. He asserts that fresh air and reasonable exercise are the best medicines anyone can take—in addition to being the least expensive—and that riding a bicycle or motorcycle give the ideal combination of economy, variety and exhilaration.

Hard Work and Health

What's more to the point, Mr. Schack backs up his arguments by calling attention to his own excellent physical condition. He cannot recall when he has missed a day at business through illness, and he is capable of as much hard work today as he was twenty years back. He never goes to bed until about midnight, and is always up in the morning at 7:30 or 8 o'clock. He arrives at the factory in Angola at 10 a. m., clears up the work of three men during the day and pulls out for Buffalo again at 4:45. But he is never so busy that the inherent spirit of hospitality for which he is noted will not move him to pass out good cigars and devote a few moments to discussion of the good old days—and the better days to come.

Andy Says

FIRM BELIEF IN THE SOLIDITY OF YOUR BUSINESS AND FAITH IN MACHINE YOU HANDLE ARE OFTEN TOP-NOTCH SALES BREEDERS

I EXPECT any man who offers to sell me an article to believe in that article from the ground up; to swear by it; to cherish its reputation as he does his own; to take it to his heart and make it a part of all he is and all he hopes to be. And I'm ninety-nine per cent. human. If I feel that way, other people do.

I can't buy a motorcycle or a bicycle from a man unless he believes—and makes me believe—that the article can't be beaten at the price I want to pay. He must *believe* it, mind you, not merely say it.

I've never seen a phonograph that could hold me with a sales argument for a pair of minutes. I can't trust the darn thing. I know it'll say whatever happens to be on the record. And a cycle dealer who winds himself up and recites a few random statements from the manufacturer's catalog gives me the same feeling of uneasiness. I don't believe he's ready to stand behind all he's saying, any more than the phonograph is. It makes me leary. So I button up my mackinaw, make fire in my jimmy pipe according to prescription, and go away from there.

Now, the motorcycle or bicycle dealer who fails to get his sales talk across is suffering from one of two shortcomings: lack of knowledge of the article, or lack of faith in it. There's little to choose between them. As business-losers, they run fifty-fifty. What he needs is a thorough insight into the machine he is handling—and the faith ought to follow. If it doesn't, that dealer has the wrong machine, or he's in the wrong business.

A dealer ought to know his catalog, of course, and be ready with the hard mechanical facts. But after that if he can't talk about the machine he is selling with the light of triumph in his eye, and his breath coming fast and his hands caressing the friendly metal every time he gets within reach of it—if he can't make himself feel just that way about it, I mean—there's something seriously wrong. Sooner that "something" is located and remedied, the better.

BUFFALO SPECIALTY WINS IN NEVERLEAK SUIT

BUFFALO, N. Y.—The United States Circuit Court of Appeals had recently decided in favor of the Buffalo Specialty Company, in a suit brought by this firm against Van Cleef Brothers, of Chicago, Ill. The suit was in regard to the term "Neverleak," which name refers to a compound made by the Buffalo Specialty Company, and which the Van Cleefs had used in connection with their "Dutch Brand" line of goods.

The decision in the Circuit Court of Appeals was to the effect that the Dutch Brand Neverleak was a violation of the Buffalo Specialty Company's trademark and trade rights on Neverleak tire fluid. The Van Cleef Brothers have already accepted the decision and have discontinued the manufacture and sale of Dutch Brand Neverleak as well as paying damages and costs.

With the obtaining of this decision, it is the intention of the Buffalo Specialty Company to proceed against other infringers. The firm feels that the decision places it in a stronger position than ever to defend its rights in infringements from any source.

TO ENFORCE TRAFFIC RULES

CINCINNATI, Ohio.—Steps have been taken by both the criminal division of the courts of Hamilton County and the police department of Cincinnati for a better observance of the traffic rules and regulations. Judge Cosgrove, in instructing a recently empaneled grand jury, devoted an hour to the traffic question and urged the passage of a law making reckless driving of any vehicle a felony. The question of educating the school children in the better observance of traffic rules and to exercise greater care was also discussed.

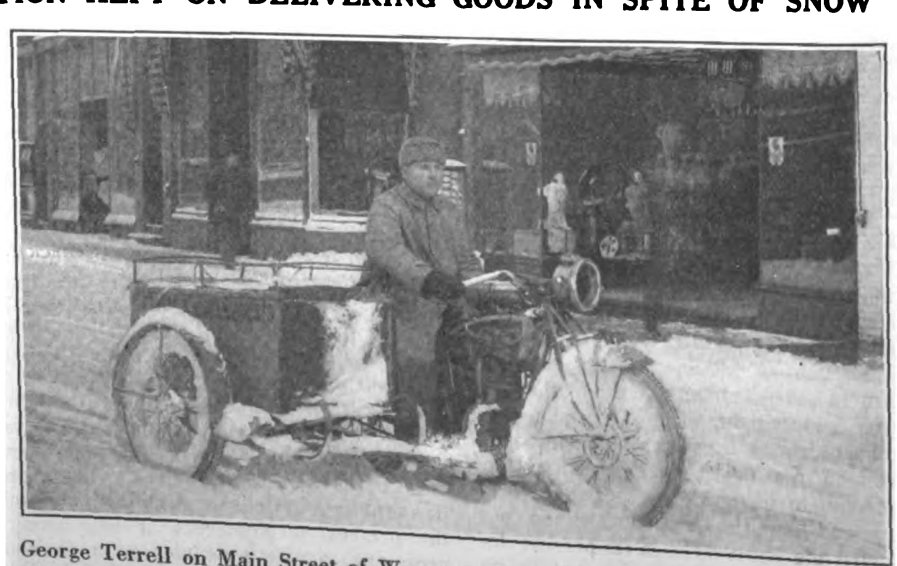
GALE WITH EMBLEM AGAIN

ANGOLA, N. Y., Jan. 18.—The Emblem Manufacturing Company announce that M. E. Gale is again back at his old job. It was last spring that Mr. Gale left the Emblem people to join the Schickel factory, but since the recent New York show is once more within the folds of Emblem boosters.

ROGERS-EXCELSIOR COMBINATION KEPT ON DELIVERING GOODS IN SPITE OF SNOW

WASAW, Ind.—George E. Terrell, of the firm of William Terrell & Son, florists, figures that the sidevan outfit is invaluable in delivering flowers and other goods from his firm, no matter what the weather. The equipment used is an Excelsior with Rogers attachment, and was put into operation in the early spring of 1915. Terrell used the van to transport Christmas rush orders on December 25, and got through on time, in spite of a heavy fall of snow the night before.

"I had to go through drifts and lots of streets where the snow was unbroken," said Terrell, "but the Rogers outfit did the trick. We feel that this sidecar is invaluable in our business and are anxious to help a good thing along." This is not the first occasion upon which the sidevan outfit has proven its worth, but until the first fall of snow, there had been no opportunity to test its reliability under hard plugging at speed.



George Terrell on Main Street of Wasaw on Way to Complete Round of Daily Deliveries; Fifty Miles Is No Unusual Travel Before Closing Time

CLASSING THE LIGHTWEIGHT IN COMPETITION

Suggesting Means for Giving the Little Fellow a Square Deal When Contesting with the More Powerful Singles and Twins in Endurance Runs and Hillclimbs—Not Suitable for Tracks

By ARTHUR CHAPPLE

The author as he appeared in board track competition

In regard to lightweights in competition as expressed in a recent article in **Motor Cycle Illustrated**, the matter is of such importance to the present development of the "little fellows" that the writer has ventured to give his observations and experience in this particular field. While the lightweight is comparatively new to the American rider and dealer, it has been an important factor in the development of the present-day motorcycle in all foreign countries.

The lightweight appeared in competition under A. M. C. A. sanction as early as 1910 in this country, and its performances were remarkable. Still, it failed to receive enough support to warrant motorcycle manufacturers taking it seriously. However, constant reports of the excellent showing of lightweights in various British and Continental competitions gradually aroused interest enough over here to bring out a few experimental models, and today we have a number of the "little fellows" bidding for favor.

Lightweight in Competition

We all know the old motto about "Competition being the life of trade," so we may apply this to the motorcycle industry in particular. Perhaps my past experience in hillclimb and endurance runs impresses this particular phrase strongly on my mind. However, I am open to argument and shall welcome any and all criticism from readers upon publication.

The question in relation to trade may be considered in several distinct lines in the motorcycle field, but the purpose of this article is to employ it as a medium to arouse public interest in the possibilities of the lightweight and to govern those possibilities in a fair and impartial manner. I do not doubt that the lightweight in its present development can be considered a possibility in the racing game, especially on motorcycle or dirt tracks. It will, I am sure, be a big factor in our future endurance runs, hill-climbs and economy trials.

Let us first take up the subject of endurance runs, which to my mind will prove very important to numerous motorcycle clubs throughout the country in laying out their 1916 schedules. Some of these runs have already been mapped out, and, much to my surprise, I find that the lightweight has been ignored or will be forced to compete with the large twins. Several seasons back, when motorcycling was a new sport, many manufacturers still adhered to the single cylinder mount as their standard. Now to put a single up against twins in competition was of course unfair, and a system was applied in nearly all the important contests which gave the "one-lungers" an opportunity to share in the results. This was in classifying the machine according to piston displacement.

There were two classes: the 61 cubic inch class, which applied to twins, and the 30.50 cubic inch class applying to singles. An initial credit of 1,000 points was received by each contestant in each class. These credits were subject to penalization on two schedules of points; for example, five points were deducted for every minute late or early at a control in the single cylinder class and ten points in the twin cylinder class. As many endurance runs in those days included either one or two hill-climbs, the schedule of points was followed out in inflicting penalizations for pedaling on hills or for complete failures to ascend.

Penalization for Pedaling

It was not considered a disgrace to resort to pedaling on a severe hill in the single cylinder class, but 25 points were deducted for this in the twin cylinder category. In the case of a complete failure, it was 25 points deduction in the single and 50 points in the twin class.

To apply these rules to the lightweight, we must also consider the average speeds necessary to keep on schedule. Any reader who has competed in an endurance run can very easily understand my claim that to check in at controls calling for a schedule of 20 miles per hour, it is very necessary to keep the speedometer hand between 25 and 30 miles per hour, while if an adjustment has to be made it means a speed of 35 to 40 miles per hour.

The difference in speed between the lightweight and the large twin of today is far greater than that between the single and twin of several seasons back. Therefore, in adopting a system for penalization to suit the present developments, it will become necessary to plan schedules on a basis of two average speeds. As a criterion, I might suggest that where a schedule calls for 20 miles per hour for the larger machines, 15 miles per hour would be sufficient for the lightweights. Another plan would be to place the lightweights in a class with the sidecars, for it has worked out in a number of past endurance runs that a sidecar combination is under a handicap in maintaining a fast schedule along with solo machines.

We have already derided the sidecar combination in one particular run: that of the New Jersey M. C. during the spring of 1915. It was the fast schedule that eliminated the majority of sidecars in the famous F. A. M. National Run from Chicago to St. Louis. I competed in that affair with a sidecar combination, and in order to maintain schedule speed took far more chances with the life of my passenger and myself than has been necessary in any high-speed competition that I have ever been in. Keeping in mind the increasing popularity of the sidecar we might improve conditions by separating this class also, and kill two birds with one stone by classing lightweights and sidecars together. We can thus eliminate the danger for one and include the advantage necessary for the other.

Callendar's Formula

In hill-climbing competitions, we are confronted with the same conditions as regards the multi-speed twin and the lightweight. In spite of the severity of the grade, it may be possible for the big twins to roar up at a fine pace on high gear, while the little fellows will have to use low gear in order to make a creditable showing. We cannot use the 30.50 and 61 cubic inch classifications, as the majority of lightweights are far less piston displacement than 30.50, hence we have an excellent opportunity to revive Professor Callendar's hill-climbing formula, which was brought out and applied to equalize the difference between the larger and smaller motors. In this formula time, weight of machine and rider and piston displacement are all considered.

(To be continued)

JUST what changes are needed in competition rules in order to play fair with the lightweight? How can the little fellows be given a fair chance to demonstrate their economy and reliability in contests with the existing motorcycle classes?

"Motor Cycle Illustrated" invites a full discussion of the matter, and will print all letters which seem to aid in getting at the bottom of the problem. What are your views as to the position of the lightweight in competition? The Editor will be glad to learn of them.

GETTING THE BEST FROM BULB AND BATTERY

Long Life and Proper Light Obtainable by Correct Voltage Relation Between Lamp and Source of Current—Focus Regulation Is Desirable As Well As Low Current Consumption

By ELLSWORTH A. HAWTHORNE
President, The Hawthorne Mfg. Company

IN order to obtain the most satisfactory results with miniature electric bulbs used with dry cells, such as are employed in many motorcycle and bicycle outfits, the voltage of the battery of dry cells should be from ¼ to 1½ volts higher than that of the bulb used. The amount of this excess voltage is dependent upon the size of the bulbs, and the schedule below will give the best practice in this line:

For one dry cell, of voltage 1½, the bulb should be 1¼ to 1.3 volts; two dry cells, voltage 3, the bulb should be 2.8 volts; three dry cells, voltage 4½, the bulb should be 3.8 volts, while for four dry cells, with a voltage of 6, a 5-volt bulb should be used.

It must be understood that this applies to dry cells only. When storage batteries are employed the voltage of the bulbs must be equal to that of the batteries. Each battery cell in a storage battery equals two volts, so that for a 3-cell battery, such as is used on most motorcycles, the voltage for the battery and for the bulb will be 6.

Testing for Voltage

Under no circumstances, short of an emergency of course, should the voltage of the batteries exceed the above schedule. When there is any doubt as to the voltage of a bulb, it should be tested by connecting to a single dry cell. If the bulb has a higher voltage than 1½, the filament will glow a faint red only, and additional dry cells should then be added, one by one, until the filament shows a white light. In connecting up several dry cells, the carbon of the first should be connected to the zinc of the second, then the carbon of the second to the zinc of the third and so on. The wires should be led from the zinc of the first cell and the carbon of the last cell respectively. This is known as the direct or series method of wiring.

It is impossible to mark low voltage bulbs in such a manner as to enable the user to determine the voltage of the same, and consequently, a large number of lamps are ruined, due to connecting them to batteries of higher voltage than that for which they are intended. As an example of this, if two dry cells are connected to a 1½-volt bulb, the battery voltage will be much in excess of the bulb voltage; the bulb will burn with an intense white glow and soon burn out. Hence, unless positive that a bulb is a certain voltage, the test referred to above should be used.

Trying Out the Bulbs

In testing bulbs, it is obvious that submitting each lamp for a life-service test would make it useless to the purchaser, but most manufacturers put each one through tests for defects and for voltage. But no matter how thorough tests may be, there is a possibility that a few bulbs will not give the life service desired and this is rarely due to defective manufacture. In the majority of cases, it is the result of broken filaments, broken globes and other effects of careless handling, as well as to the use of excessive voltage.

With regard to dry cells, testing by an ammeter will assist the purchaser in selecting those which are in good condition and which have not been deteriorated by age or weakened by previous use or accidental short-circuit. In making ammeter tests, it is very desirable to employ a "dead beat" ammeter; i. e., one whose indicating hand comes to a stop so that no time may be lost in reading. It must be thoroughly realized that putting an ammeter on a dry cell subjects it to short-circuit, so care should be used to remove the instrument as quickly as possible after reading. A voltmeter test of a dry cell will show 1½ to 1.6 volts with the cell in good condition. The lower voltage cell should be selected for use with low voltage bulbs, as high voltage batteries have a tendency to shorten the life of bulbs of 1½ and 2.8 volts, in that they give higher voltage than necessary.

For example, two dry cells, totaling 3 volts, when used with a 2.8 volt bulb, allow an excess of 0.2 volt, which is approximately correct. Two dry cells of 1.6 volts each, totaling 3.2 volts, give an excess of 0.4 volt when used with the same bulb. This is higher than necessary and means shorter lamp life. Usually, there is a complaint about the bulb being defective, whereas, the fault is excessive voltage.

Of the two tests, that for amperage is the more important and cells should be selected that show the highest reading.

Adjustment of Focus

Correct focal adjustment is desirable on all lamps and particularly in the case where bulbs of different candlepower from that normally supplied are used. The choice of users in regard to light varies: some riders prefer a small circle of light giving clear white on a small portion of the road, while others prefer a beam illuminating the full width of the road, as two instances of this. With a means of focusing, the small circle of light in the first case can be located to suit the individual taste of the rider. However, this small circle of light is inferior to a medium diameter circle with as bright a center as is possible to obtain.

In the light with the medium diameter circle, dark rings such as appear in the light circles are eliminated, as well as a frequent dark spot which appears in the center of the circle. Such rings and spots show that the bulb is not correctly focused, and when present give a diffused rather than a clear light.

OFF FOR WEEK END TRIP IN CANAL ZONE

Mrs. John Ward, Harley-Davidson, and Mrs. J. L. Greene, Pope, with Party on Trail to Miraflores During Recent Pleasure Run. Both Are Ardent Riders

GASOLINE PRICE GOES UP ANOTHER CENT

NEW YORK, Jan. 17.—Gasoline retailed at 28 cents a gallon yesterday, a rise of one cent, which causes garage men to predict the price will soar shortly to 30 cents. In view of the steady increase of the past few days early prophecies that the product would reach 40 cents before spring seem justified.

Retailers place the blame for the increase on the wholesalers, although they disagree on the margin of profit which they themselves should be allowed. Some garage men are satisfied with three cents a gallon, while others claim a profit of five cents is necessary to meet overhead expenses.

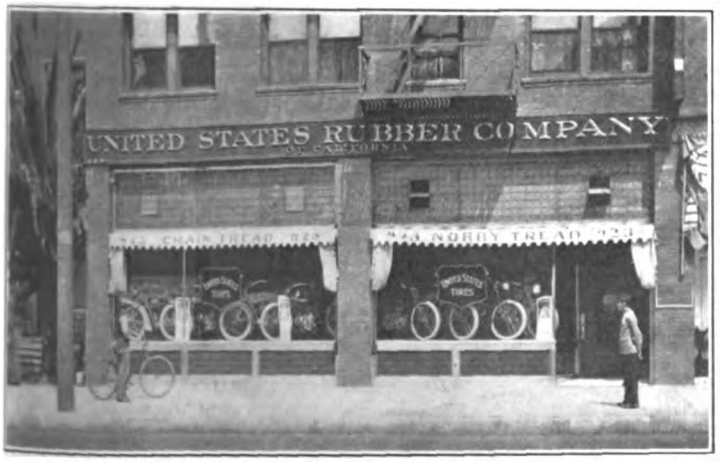
THREE SCENES OF WINTER ROAD WORK AND A BUSY TIRE BRANCH

MILO W. KIBBE, of Henderson traveling staff, togged for winter roadwork and waiting for a ferry on his homeward run from Canada; Two Henderson trail-breakers demonstrating the prowess of their machines after a recent snowstorm in Detroit; at the right, Larry Kaltz, Detroit messenger, who helped to handle the holiday delivery rush in spite of the bad condition of roads and streets; below, the Los Angeles branch of the United States Rubber Company. It will be noted that the windows are filled with motorcycles of various makes and a heavy percentage of the business of the branch is in motorcycle products.



BUSY DAYS FOR MOTOR-BOBS IN WISCONSIN

RHINELANDER, WIS.—The even, cold temperature of the past month has made bob sport in the state of Wisconsin where almost every city of any size has its power sleigh enthusiasts. Many of the club members have organized a series of race meets and rivalry exists amongst the members to see which owns the fastest motorcycle propelled sleigh. The river running through town affords the right of way for these contests that are staged every Sunday.

Big Crowds Are Always on Hand

Many motorcycle fans are becoming interested in bob sleds and are equipping their cycles with runners and bobbing around this vicinity at a merry clip. Edward Fahrbach, Joseph Liebhauser, Joseph and Philip Gazecki and George Diedring are the latest recruits to the sport.

From Algoma comes the announcement that Otto and Arthur Krueger, of Forestville, are builders of what is probably the most unique bob-sled yet designed. The frame is made of split rails, the runners chopped out of a plank, the steering apparatus is what was left of an old binder and the seat an old cushion from a discarded buggy. After the outfit was assembled the Krugers merely hooked their motorcycle alongside. Needless to say, the outfit is not a thing of beauty, but the Kruegers state that they have obtained quite satisfactory results with it in various conditions of snow-running.

HIGHER WAGES FOR FISK TIRE WORKERS

CHICOPEE FALLS, Mass.—A revision of wages and a reduction in working hours has been put into effect in the plant of the Fisk Rubber Company, of this city. Time and one-half is paid for overtime on week days and double time on Sundays. The night force, in addition to other increases, will get two cents more per hour than the day force.

Working hours are reduced from 55 to 50 hours a week and the factory will be operated under two shifts—day and night—instead of the three-shift arrangement previously employed. The latter arrangement did not permit of such rapid shipments as does the two-shift one.

COMBINING COMMON SENSE WITH TIRE MILEAGE

The Rules for Obtaining Maximum Service from Motorcycle Tires Are Few and Simple—You Will Save Money and Avoid Road Worries By Observing Them Carefully

By R. S. WILSON
Manager of Service Dept., Goodyear Tire & Rubber Co.

WHETHER you ride a motorcycle for business or for pleasure, tire service is one of the most important items for consideration. For that reason, tires ought to receive a proportionately large amount of attention. As a matter of fact, it is questionable whether tires ever receive attention commensurate with their importance in the rendering of efficient motorcycle service.

A great deal has been said and written about the care of automobile tires, and solid tires on trucks are beginning to receive their share of attention. Motorcycle tires, however, have seemingly never come in for their share. Luckily, it is not a very difficult task to give the attention necessary to your tires.

Selection of Proper Tire

The first thing that should be given attention is the proper size. The machines of recent manufacture are heavy and powerful. When they are used in rough service, over bad roads, it is desirable that they should be equipped with extra strong tires to meet the emergency. Such a tire as the Goodyear Blue Streak, for instance, is especially adapted for heavy service of this sort.

Another important consideration is the type of tire. If your rim is old style, BB, or CC, you must be sure to get a tire of the proper profile to fit your rim. Otherwise the tire does not seat itself properly in the hook of the clincher rim and it will probably rim cut easily.

As in the case of automobile tires, by far the most important individual attention is the matter of inflation. It has been found from actual observation that only a very small percentage of motorcycle riders test their tires with pressure gauges. It would be interesting to any motorcycle rider to make the following experiment some time:

Go out and feel the rear tire and make an estimate of the pressure; then apply an inflation gauge and see how near this estimate comes to the actual pressure registered on the gauge. This will fully convince one of the inadvisability of inflating his tires by guesswork.

The following is the ordinary schedule to which motorcycle tires should be inflated:

Stock Tires

2½-inch	40 lbs.
2¾-inch	40 "
3-inch (Cor. or Stud.)	40 "
3-inch (Blue Streak)	50 "

Racing Tires

2-inch	50 lbs., when cool
2¼-inch	55 lbs., when cool

Of course, if you are carrying a particularly heavy load it will probably be necessary to increase this pressure slightly. On the other hand, if your machine is a particularly light one and you find that it bounces a good deal over the road under the inflation given above, it would be proper to reduce the pressure slightly.

The next important attention to give your tires is the closing up of the little tread cuts that you are bound to get from time to time as a result of running over sharp stones and little pieces of glass, etc. Run over your tires once a week with a damp cloth and plug up the little holes that you find with Tire Putty.

Of course, an essential to good service is care on the part of the rider. This is particularly true in riding over country roads where ruts and stones are likely to be encountered. If a heavy machine going at a good rate of speed runs oved a stone the size of your fist, the force of the blow on the tire is enormous. Tires are built to withstand such shocks and they will up to any reasonable force, but occassionally, particularly unless the rider is careful, these shocks will break the inside of the fabric; the tube then works up into the break and is pinched, causing a blowout. Such breaks can be patched temporarily with a tire plaster, but should be repaired by a vulcanizer before the tire is used for any length of time.

Starting and Stopping

Another important consideration that depends upon the rider is the matter of quick starts and sudden stops. It is not uncommon to see a rider put his back wheel on the stand, start his engine while astride the machine, and then with the back wheel revolving rapidly let the machine down on the ground. When the rapidly revolving tire comes in contact with the ground there is a fearful grinding, tearing action which tends not only to grind off the tread, but also is likely to pull the tread loose from the carcass. This is a very injurious practice and should not be used by riders who seek long mileage from their tires. Setting the back wheel and skidding have the same effect.

It is natural that since both the majority of the weight and the driving power concentrate on the back wheel the rear tire should wear more rapidly than the front tire. It has been found advisable among most experienced riders to change the rear tire to the front, and vice versa, at the end of two or three thousand miles of riding. In this way both tires are worn out evenly and both give good service.

PROVING WINTER CAPABILITIES OF READING STANDARD

Manager E. W. Theurer, of Reading Standard Co., with Sidecar Outfit on Which He Recently Climbed Mt. Penn Through Nine Inches of Snow on Second Speed

NEW CROSSING REGULATION

BOSTON, Mass.—Pedestrians who cross the streets at other than crosswalks, or when a traffic officer at a crosswalk has signalled vehicles to proceed, are liable to a fine of $20, according to an ordinance put into effect on January 1. The city has determined to abolish the practice of "jaywalking," hence the ordinance.

RIDER AND DEALER FOR THIRTEEN SEASONS

Same Has Marked Career of H. L. Loudenclos Since His Entry Into the Trade in Pasadena in 1903—Climbs Mt. Wilson as a Power and Reliability Demonstration.

THERE are few men in this country who can boast of having been a follower of motorcycling for thirteen years, yet one of these is H. L. Loudenclos, of the firm of Loudenclos & Angwin, forming the Motorcycle Sales Company, in San Francisco, the Reading-Standard distributor for Northern California. His start in the pastime was made early in 1903, when he purchased and used a Marsh-Metz single cylinder 1903 model.

Loudenclos' first mount, the Marsh-Metz, had single-tube tires and wood rims as well as a ingenious but unadjustable carburetor. He used this make of mount until 1906, when he purchased a Reading-Standard. With the opening of the next season, he took the agency for R-S machines in Pasadena and began his trade connections with the rapidly-growing motorcycle industry. From 1907 to 1910, Loudenclos sold more R-S motorcycles in Pasadena than all other makes combined and he is credited of the credit of introducing motorcycling in that territory.

First to Climb Mt. Wilson

The first season with the R-S was not a success, by any means. In 1907, people were more skeptical as to the adaptability of the motorcycle that at the present time, a considerable number looked upon the motor-wheeler as a toy. Loudenclos staged a real climbing demonstration in an ascent of Mt. Wilson, and much to the surprise of the public accomplished without trouble. Loudenclos with his car was the first man to ride or drive a motor vehicle up this mountain and his feat received continent-wide attention.

Mountain-climbing and road demonstrations were not the only directions in which Loudenclos activity was displayed. He competed on the race tracks in Pasadena and Los Angeles long before Graves, Balke and Seymour really knew what made a motorcycle run. Among his trophies on the track is the Pasadena Endurance Cup, which he won three times and thus made it his personal property. He continued to handle the R-S until 1915, but added the Excelsior some seasons earlier. Last year he moved to San Francisco and opened up a distributing agency for the Cyclone. His most recent big deal was in the Fall of 1915, when he took over the Reading-Standard distributing agency for Northern California with Mr. Angwin.

Loudenclos' partner, Angwin, is new to the motorcycle trade, although he has been a follower of the sport for several years. Like his senior partner, he has no doubt of the success of the Reading-Standard in California for 1916.

CLARKSON DISPOSED OF 500 EXCELSIORS IN 1915

J. B. CLARKSON & CO., Wellington, N. Z., representatives for the Excelsior, have distributed over 500 Excelsiors during the 1915 season, according to a recent statement made by President Clarkson.

Mr. Clarkson, who was in this city recently for a visit to the Excelsior factory, stated that there was an excellent prospect for increasing the firm's output by a large margin over that of 1915.

BALTIMORE DEALERS HAVE INDIVIDUAL SHOWS

BALTIMORE, Md., Jan. 18.—The automobile show opened at Fifth Regiment Armory today minus the usual motorcycle dealers' exhibits. Representatives of the power two-wheeler, however, were perfectly satisfied with the arrangement and are keeping open house at their own stores. The latter have been attractively decorated for the occasion and all the latest models are on view. The Baltimore Motorcycle Dealers' Association solved the show problem by this arrangement.

All Baltimore dealers are filled with enthusiasm over the outlook for 1916. Orders are piling in and the firms are after the factories to hasten deliveries. The mild winters in this section make riding an all-year sport and very few of the boys tuck their mounts away when cold weather makes its appearance.

HASELTON LOST NO TIME

CLEVELAND, O., Jan. 17.—Guy Haselton, of Stevensville, Mont., was in Cleveland last week during the Automobile Show and was so favorably impressed by the Cleveland lightweight that he lost no time in getting his name down on the dotted line of a contract.

YALE SMITH BUYS SHOP

EUGENE, Ore., Jan. 9.—Gus DeVos, who has operated the Cycle Shop in this city for several years, has recently sold his business to Yale Smith. The new owner has secured the Indian agency and reports excellent prospects.

Proprietor Loudenclos, of Motorcycle Sales Co., San Francisco Agent for Reading-Standard, with 1916 Model in Front of His Establishment. Item Above

Digitized by Google

SAVANNAH, GA.

JOSEPH S. CAFIERO, the Indian speedster, has become connected with R. R. Oakman's tepee in this city. He will assist Chieftain Oakman in running the agency from now on. Cafiero is about the most popular rider in and around Savannah. He won the 100-mile road race last July 4th, competed in two 300-mile races staged here and is the holder of several dirt track records. He announced his retirement from the racing game on New Year's day.

PUEBLO, COLO.

R. L. FLEMING, proprietor of the Pueblo Motor Company, Harley-Davidson representative, has just delivered two machines for municipal service. The first is a three-speed, electrically-equipped twin to the Police Department for use in answering emergency calls. It is fitted with Stoll tandem and J-M speedometer, and is the second machine of 1916 model to go to this department. The other mount just delivered is a three-speed single which went to Deputy Sheriff C. L. Fiscus, who will use it to serve official papers.

NEWARK, N. J.

NEWARK, N. J., Jan. 18.—The Carl W. Bush Company was incorporated last week with Carl W. Bush as president. Lincoln Holland, Jr., as vice-president and sales manager, and P. Wilmer Stevens as secretary-treasurer and manager of the repair shop. Frank Bagswell, formerly with the Harley-Davidson Sales Company of New York, will assist Stevens in the shop.

This trio will make an exceedingly strong combination, as all are veterans in the motorcycle line. The oldest in point of experience is Stevens, whose connection with the industry dates from 1901, his first mount being the Yale. Bush has been a motorcyclist since 1906 and has been identified with the Harley-Davidson since 1912. Holland has ridden and sold machines ever since he was in knickerbockers.

The Carl W. Bush Company, Inc., will continue to represent the Harley-Davidson in Newark. "We expect a banner year for 1916," says Bush. "Our 1915 mark was 184 machines and 72 sidecars, and present demand looks as if we would beat this all hollow."

TACOMA, WASH.

MANAGER PETERSON, otherwise E. E. Peterson, who handles the Excelsior in this city, reports a number of inquiries for machines to be used by local and suburban commercial firms. In each case, the machines are to be fitted with side-vans. He considers that the activity in the lumber market is the reason for the inquiries.

ALTOONA, PA.

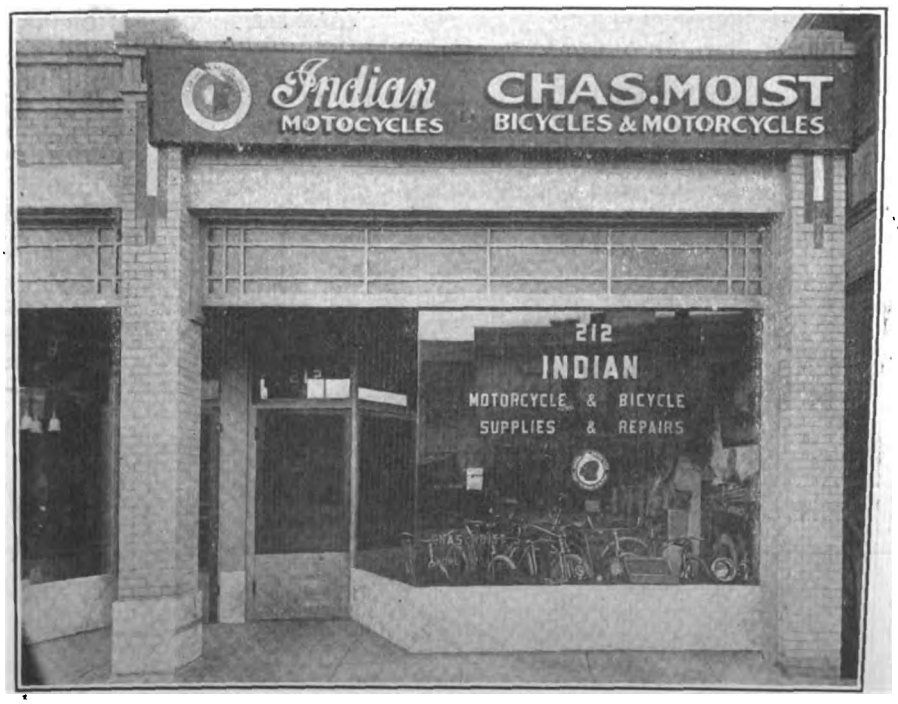
JOSEPH WOLF, local agent for the Harley-Davidson, has a unique window-display which has been attracting much attention ever since it was first shown. The center of the window is occupied by a 1916 model with cards showing the various improvements and features, while the background is some attractive country scenery. Photographs of Wolf and his riders in various pleasing places, as well as a line of parts and accessories, make up the rest of the exhibit.

SPOKANE, WASH.

THE SPOKANE AUTO & CYCLE SUPPLY CO., of this city, has taken the distribution for the Eklipse spark plugs, the product of the Fulton Co., of Milwaukee, Wis.

OAKLAND, CAL.

THE BURG AUTO SUPPLY COMPANY, of this city, has taken the agency for Eklipse spark plugs, made by the Fulton Co., of Milwaukee, Wis.



Substantial and Orderly Headquarters for Indian at Long Beach, Cal.; Agency of Charles Moist at 212 East Broadway, Now in Fourth Year of Prosperous Existence

Dealers'

DENVER, COLO.

THE ROCKY MOUNTAIN MOTORCYCLE CO., which was recently organized, has moved into its new quarters at 1616 Broadway in the heart of Denver's motor row. The company handles the Henderson and Cleveland lightweight for Colorado and Wyoming and has established a number of live sub-agencies in the larger cities. Manager D. B. Southard expects to order a carload shipment of four-cylinder Hendersons within a few days.

The Broadway location was chosen by Southard to put him into the best touch with prospective patrons. The store is finely fitted up and carries an atmosphere of progressiveness and neatness that wins the approval of all who enter its doors.

PHOENIX, ARIZ.

TIBBETS & THOMPSON have been made state distributors for the Excelsior in Arizona, their headquarters being in Phoenix. They are lining up a strong organization of sub-agents throughout the state.

LOUISVILLE, KY.

KLINE BROTHERS, Harley-Davidson agents, who recently took over a motorcycle and automobile supply house on Broadway, are quite busy straightening out the establishment just now. Free air, a vulcanizing plant and a first class oil and gasoline equipment will enable the concern to give better service to its patrons.

DAYTON, O.

HARLEY-DAVIDSON and Dayton motorcycles were featured at the big industrial exhibit which opened on January 14 in the new building of the Dayton Engineering Laboratories, Inc. The motorcycles were shown by the local Harley-Davidson agency and by the Davis Sewing Machine Co. A number of local tire and automobile concerns also exhibited.

BOISE, IDAHO

A. P. TYLER, who represents the Harley-Davidson in this city, has sold twice as many 1916 machines so far as he did 1915 models during the same period last year. Motorcycle dealers are getting their Spring business under way and all look forward to 1916 as a record-breaker.

SANTA ROSA, CAL.

JENKIN'S CYCLERY is the center of great interest these days. The cause of the arrival of the first 1916 Powerplus Indian. Since its advent Jenkins has been busy showing the red twin's speed and power and taking orders for a number, mostly three-speed models.

MARICOPA, CAL.

C. A. WATSON, Harley-Davidson agent, has had to keep open Sundays for the last month in order to accommodate anxious patrons. "Each Sunday meant one new or used machine sold," says Watson. "There are two 1916 three-speed twins here now, but they won't be with me long. I have to order them from the Los Angeles headquarters by wire, the demand is so brisk.

CROWN POINT, IND.

EARL J. CRAWFORD, agent for the Flying Merkel in this city, has already disposed of four 1916 models, two of which were fitted with electric lighting. He figures that 1916 will show 100 per cent. more sales than did 1915 in his territory.

ST. LOUIS, MO.

A. A. KNIGHT, head of the Knight Motor Co., has signed up to represent the Henderson and Flying Merkel models for the St. Louis district. He has just completed a trip through Southern Illinois and has arranged for sub-agencies in Charleston, Mattoon, Shelbyville, Taylor, Hillsboro, Litchfield and Alton. The company has moved to 3327 Locust street, where it has five times the floor space of its former quarters.

THE OLIVE CYCLE & MOTOR CO., Harley-Davidson dealers, is making alterations in its store at 1035 North Grand avenue, which will increase the space by 33 per cent.

HARRY LOSSER AND FRED WITLER are soon to open a Harley-Davidson shop and repair department in East St. Louis. They have the agency for East St. Louis and St. Clair county. Losser was formerly with the Olive Cycle & Motor Co. in this city.

AUBURN, WASH.

M. R. JORGENSON now has his name over the Crescent shop in Auburn, Wash., as sole owner. He is the Excelsior agent.

MAGGINI & PERKINS, Harley-Davidson live wires in San Francisco, report unusual interest in the commercial vans. They now have about 40 of these outfits on the road and giving uniformly good service.

COLUMBUS, O.

WILLIAM T. BERGIN, manager of the Franklin Cycle & Supply Co., Excelsior agent, has resigned to accept a position with an automobile accessory house. He is succeeded by John McCormick.

THE BELT-BARR MOTOR CO., Gay & Fifth streets, distributing the Indian in Central Ohio, has signed up the following sub-agents for 1916: J. W. Grube, Delaware; Noecker & Brehmer, Circleville; Harry Kindler, Lancaster; Weaver Hardware Co., Basil; Millersport Garage, Millersport, and Arthur Grant, Ashley.

SAN ANTONIO, TEXAS

THE GUARANTY CYCLE CO., Wigwam representative, has sold seven 1916 Indians to the United States Government for use in scout service and border patrol. The machines are at Fort Sam Houston.

SHEBOYGAN, WIS.

THE SHEBOYGAN MOTORCYCLE SUPPLY COMPANY, 1813 Indiana avenue, handling the Harley-Davidson for this city, is remodelling its store extensively. An entrance six feet wide is incorporated in the plans for an entire new front. When completed the alterations will give the Sheboygan concern one of the finest looking shops on Indiana avenue.

PUYALLUP, WASH.

A. B. HICKEY is the man to see about Excelsiors in Puyallup, Wash. "Hick" is also making a feature of stocking a full line of motorcycle and bicycle parts.

EXPORT NEWS GATHERED FROM MANY SOURCES AND BOILED DOWN TO FACTS FOR THE BENEFIT OF BUSY MANUFACTURERS

Those Who Are Interested in Any Announcement Made Under This Heading Are Invited to Communicate with Motor Cycle Illustrated; Additional Details for the Guidance of the Exporter Sometimes Come to Hand After the Original Item Has Appeared in Print

CO-OPERATION FOR CYCLE EXPORTERS

Motor Cycle Illustrated Places Constantly Growing Store of Information at the Disposal of Manufacturers

AS announced in the January 13 issue of **Motor Cycle Illustrated** during the ten months ending October, 1915, 13,007 motorcycles, valued at $2,491,527, were exported by American manufacturers. Of this number, 1,148, valued at $230,327, were shipped in October. It is more than probable that November and December shipments will be even larger, and that still higher figures will be attained during 1916.

In any event, something like 25 per cent. of the total business now done by American motorcycle manufacturers is with foreign countries, the conditions produced by the war being largely responsible for the recent unprecedented growth in our export trade, which has affected bicycles as well as motorcycles, the increase in the latter for 1915, as compared with 1914, approximating 25 per cent.

As a matter of fact, American manufacturers are in a way to do practically all of the cycle business of the world. English, German and French manufacturers who once controlled nearly all the foreign cycle business are now, with very few exceptions, devoting all their energies toward turning out munitions of war. The American advantage will continue for some time after the war, as it will take foreign factories many months, and in some cases years, to reorganize their facilities and secure again the trade which they have lost and are still losing.

Always Ready to Assist

We desire again to call the attention of manufacturers in the cycle fields to the fact that this jojurnal is doing all it possibly can to assist in the development of foreign business in motorcycles, bicycles, parts and accessories. We are constantly adding valuable material to our store of export data, that is to say, names and addresses of importers, jobbers and dealers in foreign countries, cycle trade opportunities, and the like. All of this information is at the disposal of our advertisers and we want to be considered entirely at their service. We are in position to secure practically any export information which we have not already in our possession, and invite our manufacturers to call upon us for any assistance which it is in our power to render. Don't feel that you may be asking too much.

EXPORT DECLARATION PROCEDURE AMENDED

A REVISED draft of the regulations entitled "Shippers' Export Declarations and Export Procedure" (Treasury Decision 35,708 of Sept. 15, 1915), was approved jointly by the Secretary of the Treasury and the Secretary of Commerce on December 14, 1915, and issued as Treasury Decision 35,969.

The new order makes clear certain doubtful points in the first order and meets some well-founded objections against specific provisions. The principal modifications are as follows:

Instead of January 1, 1916, the new regulations are made effective on February 1, 1916.

No oath is required on declarations for export by vessel if total value of shipment does not exceed $100.

It is specifically provided that the declarations may be executed by an authorized agent of the shipper.

In case of shipment from an interior point for export on a through bill of lading, if it is not practicable to prepare the declaration in time to accompany the goods, it may be transmitted to the seaboard with the shipping papers.

The car manifest required for exportations by railway may be a copy of the waybill, bill of lading, or other shipping paper, or of the manifest prepared for the foreign customs.

No declaration will be required for goods shipped under any form of customs bond for exportation from or in transit through the United States, the statistics in such cases being obtained from the customs papers covering the shipment.

When the goods are sold, the selling price should be stated as the value, otherwise the market value at the time of exportation in the port of the United States from which shipped.

On application the Bureau of Foreign and Domestic Commerce will supply up to ten copies for distribution to shippers. Additional copies, if desired, may be obtained from the Superintendent of Documents, Washington, D. C., at the rate of 5 cents a copy.

CYCLE RATES REDUCED FOR NEW ZEALAND

ACCORDING to a telegram received from the American Consul General at Auckland, the recently proposed changes in the New Zealand customs tariff have been enacted and are now in effect. American cycle manufacturers will be interested to learn that while the duties on various articles imported into New Zealand have been increased, the rates on bicycles, motorcycles and fittings therefor have been reduced. That is to say, whereas the old general rate on bicycles, tricycles, motorcycles, sidecars and parts was 30%, and the British preferential rate 20%, the general rate is now 20% and the British preferential rate 10%. With reference to bicycle fittings, including handlebars, plain forgings and stampings, rims not bored, spokes, etc., the old general rate was 20%, while the new general rate is 10%, as against free admission from Great Britain.

Rubber tires, solid and pneumatic, for vehicles of all kinds, including motorcycles and bicycles, continue to be exempt from duty.

POSTAGE PROBLEM BOTHERS THE FOREIGN BUYERS

AN example of the carelessness that often loses business for American exporters is brought to light in the communication printed below. It is from the North American Trading Co., a well-known Italian importing firm, and reads as follows:

"We enclose herewith the envelope in which we received your esteemed favor.

"The letter was taxed 30 cents for shortage of stamps and we had to pay to the post office the above mentioned fee to receive your letter. Kindly remit to us at your earliest opportunity in international postage stamp coupon, or in U. S. A. postage stamps, the above mentioned amount, and kindly take notice that the postage rate to Italy is 5 cents for first class mail."

From the fact that the letter was stenciled, with a blank space left for the insertion of the amount due, it is evident that the practice of "shorting" the postage on letters addressed to that one firm at least is so general as to constitute a nuisance. Needless to state, the American firm that forwarded the letter received no reply other than the dunning letter above reproduced.

CYCLING IN CONSTANTINOPLE

We are informed by the American consul general at Constantinople, Turkey, that although poor road conditions have hampered motorcycling, the sport has found great favor in Constantinople itself, the number of machines in use increasing steadily from year to year. In so far as bicycles are concerned, the Consul General advises that Turkish dealers, as a general rule, are partial to European makes.

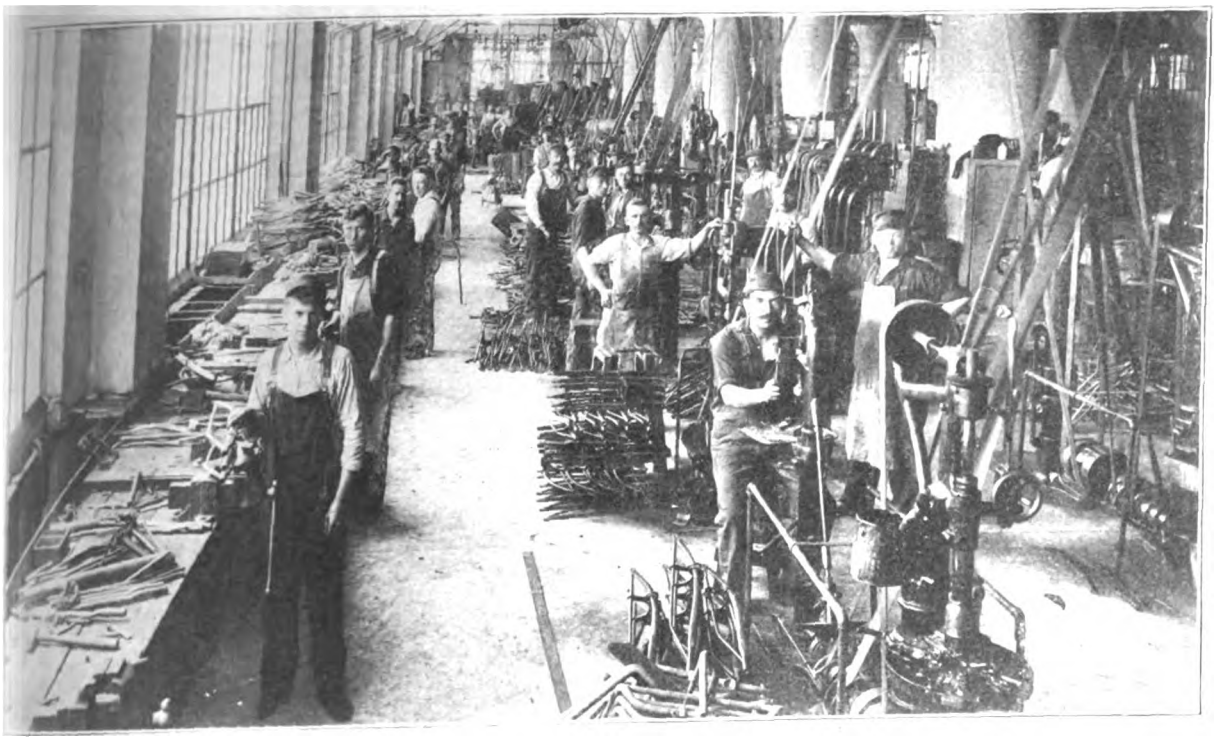
EXCELSIOR FRAME CONSTRUCTION

Nickel Steel Forgings, Extra Heavy Seamless Steel Tubing and Perfect Workmanship Insure Reliability, Safety and Efficiency



Excelsior Frame Shop Machining Assembled Frames

THE Excelsior was the pioneer low saddle position frame and is the one motorcycle frame built of nickel steel drop forgings throughout. There has never been a casting or any other element of cheap construction in any Excelsior Autocycle frame ever built.

By the use of such materials, consistent design and perfect workmanship, Excelsior Autocycle frames have established a world-wide reputation for strength, rigidity and durability.

With correct design and the best of materials, the final result is still a matter of accurate workmanship, requiring not only skilled labor but a thorough equipment in machinery and tools.

Adhering to the fixed policy of maximum efficiency, a large section of the Excelsior factory is equipped with specially designed machines, including boring mills, drilling machines, turret lathes, automatic screw machines, grinders, etc., which are devoted exclusively to the various operations of frame building.

In this department the rough forgings are bored and reamed in heavy jigs that insure absolute accuracy and perfect fitting of the various parts of the frame.

A Corner of the Brazing Plant

In another department, the extra large gauge nickel steel tubing is cut to exact length and then in still another department, the frames are assembled and prepared for brazing.

The Excelsior brazing department is one of the most elaborately equipped and extensive brazing plants in the country. The brazing together with the pickling and other processes requiring the use of acids, is done in a separate building provided with an elaborate exhaust system to carry away the fumes, thus protecting the workmen and preventing the corrosive gases from getting to other parts of the plant.

The next operation is the removal of the surplus spelter which is done partly by an electrolytic process and partly by grinding and filing.

This being done, the frames are sent to another machine shop where the boring, facing and similar work is done in specially constructed jigs, after which the frames are alined and finally finished for enameling. In this department particular attention is given to the perfect alinement by which maximum efficiency of the power plant is insured, and it is largely through the enormous strength and correct alinement of the Excelsior frames that Excelsior Autocycles have established their many world's records for speed and durability.

The final inspection of the frames and forks is of such thoroughness that no part in any way faulty can get into the finished machine, and the durability of the motorcycle and the safety of the rider is thereby assured.

The frame of a motorcycle is the foundation on which is built the entire structure, and the final quality of the machine is inevitably in proportion to the mechanical perfection of the frame.

The Excelsior frame is as near mechanical perfection as skilled workmen and accurate machinery can make it, and the quality of the entire machine is therefore of the same high degree.—Adv.

INDIANS AT NEW YORK

75 *More* Indians For New York Police

Again the New York Police have *re-ordered* Indians—75 more this time, right on top of a previous total of 107 machines.

Simultaneously Baltimore also re-ordered 6 more Indians for the extension of police work.

Recent other big police contracts—*all of them re-orders*—include the cities of Philadelphia, Los Angeles, San Francisco and Birmingham. Hundreds of police departments in the United States and in foreign countries are Indian equipped.

It is a conspicuous fact that these departments re-order Indians over and over again whenever new machines become necessary. *Motorcycle police are practically unanimous for Indian.*

Indian serviceableness, great speed and dependable mechanical operation are *known and proven factors in police work.*

For assurance of prompt attention to your wants mention MOTOR CYCLE ILLUSTRATED.

FINGER ADJUSTMENT ON NEW SPARTONS

Hand-operated Horns Have Ingenious and Ready Means of Varying Tone for 1916—Two Models for Motorcycles

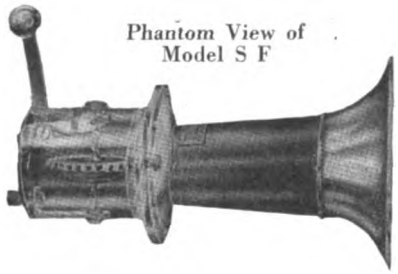
IN offering its 1916 line of Sparton hand-operated horns or safety signals, the Sparks-Withington Company, of Jackson, Mich., announces a number of improvements and refinements over those of previous models. The most important of these is the fitting of a knurled screw at the rear of the body, this screw allowing the mechanism to be adjusted by the fingers and obviating the use of special wrenches or pliers. For motorcycle service, the SF and SM models are exceedingly well adapted. The list price of each model mentioned is $4.

Sparton Safety Signal Model S M

The Sparton SF, illustrated herewith, is of the vibrating diaphragm type with the diaphragm having a central hardened point on its interior face. Against this rotates a ratchet wheel on a worm-shaft, the latter being moved by the downward movement of a nut attached to the forked ends of a rocker. This rocker moves in an arc when the ball-ended lever at the top rear is moved forward. A spring lifts the rocker to its normal or upper position when the lever is released.

The vertical worm-shaft carrying the ratchet wheel pivots in a piece at the bottom of the case. This piece is movable to and fro under the influence of the knurled screw mentioned before and by this means the contact of the ratchet and the diaphragm point is regulated. All wearing parts are hardened to eliminate wear and there is nothing to get out of order.

The SF signal is furnished with a long bell or projector, while the SM has a short projector. The mechanism of the SM is the same as that just described. Both signals are fully guaranteed. Every part is made in the firm's factory by skilled operatives. The tone of each Sparton is long and penetrating for country roads or short and commanding for city service, according to the wish of the user. Each Sparton is furnished with a bracket ready to fit to any tubular part of the motorcycle and only an ordinary screwdriver is needed to fit the horn in place.



Phantom View of Model S F

CLEVELAND EXHIBIT DRAWS HUNDREDS AT SHOW

CLEVELAND, Ohio, Jan. 19.—One of the real novelties of the automobile show which opened on Monday is the handsome exhibit of the Cleveland lightweight, the product of the Cleveland Motorcycle Company, of this city. The exhibit includes the white model in its black and gold frame, which was the hit of the New York motorcycle show, and this particular portion of the stand was the center of interest for the fair sex in particular.

The Cleveland stand attendants were kept busy all day and evening in answering hundreds of inquiries about the little two-stroker. Several automobile engineers examined the Cleveland and gave great praise to its original features of construction and about the high standard of materials and accessories used. One interesting feature of the exhibit was the interest among automobile dealers. One agent for a well-known automobile said: "It seems to me the Cleveland offers automobile dealers a big chance to increase their sales with little or no increase in their overhead expenses. Its construction and the high grade of materials used certainly means that it will need very little service work after being sold."

Messrs. Quinlan, Alexander and Neracher were in attendance at the exhibit, while several demonstrators with Clevelands were kept busy outside.

Testing Cleveland Two-Stroke Lightweight for Road Performance in Sixth City Park

FEW CHANGES IN ENGLISH 1916 MODELS

TORONTO, Ont.—A recent visitor to Toronto was A. W. Torkington, of London, England, a prominent officer of the Auto-Cyclists' Union of England. He declared that but few changes were noticed in the mechanical construction of British motorcycle for 1916 because the British factories, without exception, are engaged in the manufacture of war supplies to almost the complete extent of their outputs.

Sam Bulley, treasurer of the Toronto Bicycle Dealers' Association, recently sent a large kit of spare parts, tire supplies and other accessories to the Canadian headquarters in France as a gift to the many Toronto cyclists now engaged in warfare.

Enquiries regarding Canadian bicycles, tires and other products have been received in Toronto from tradesmen in Bermuda, where British wheels were formerly sold in large quantities. The English bicycles are now difficult to obtain and Canadian makers are receiving sample orders. A large quantity of Canadian wheels is also sent to Australia every year.

EDDIE SEEBER VS. SCHACK

BUFFALO, N. Y., Jan. 18.—They say that Eddie Seeber, the Emblem agent in the Bison City, has taken the motorcycle bowling championship away from Mr. Schack, president of the Emblem Mfg. Co. Heretofore Mr. Schack has been regarded as the most invincible knight of the pins in the cycle field, and now Seeber at a recent match held during the motor show, according to report, appropriated that honor. But Mr. Schack is still smiling genially, for Seeber is a relative of his so that the "championship" is still in the family.

Apartment in Hotel Astor, New York, During Automobile Show, Featuring Champion Spark Plugs. Many Visitors from Motorcycle and Automobile Circles Attended, and Were Entertained by Staff Under Direction of Advertising Manager F. Caswell

FIRST HENDEE BALL PROVES A BIG SUCCESS

SPRINGFIELD, Mass.—The first annual ball of the employees of the Hendee Mfg. Co., held in the Auditorium on January 7, was a great social and financial success. The attendance was 1800. The grand march was led by Mayor F. E. Kirby with Mrs. A. Tobin, wife of the president of the Springfield Machinists' Union. Dancing lasted until one o'clock and included many square figures, the changes of these being called by Prompter Harrison, Indian advertising manager.

The hall was decorated with plants and American flags, while on the stage was a handsome 1916 Powerplus sidecar combination. The general committee for the affair was composed of A. J. Tobin, chairman; J. Mulcahy, secretary; W. N. Townsend, L. Waite, C. F. Newton, W. E. Hunt, W. L. LePlant, F. I. Russell, G. A. G. Watts, M. E. Hindle, G. Anderson, J. Thomas, G. Carney, C. Green, R. Johnson, D. Bird, H. Meldrem, A. Ratcliffe, F. D. Parron, E. Zerb, A. Frost, J. Anderson, W. Dumas, A. Fromke, F. Snyder, R. W. Turner and B. Howland. The proceeds of the ball are for the benefit of a social club which is being formed.

BECK SAYS NEWARK IS FINE SIDECAR CITY

NEWARK, N. J. Jan. 18.—Irving Beck, the genial Rogers sidecar salesman, was here last week and after making a tour of the trade, showed orders for four cars. Beck says that Newark is one of the three leading motorcycle towns in the East and is a fine sidecar city, too. He has delivered over a dozen Rogers cars so far this winter.

TWO BRACKETS WITH M-B BICYCLE HORN

ONE of the latest additions to the line of warning signals put out by the E. A. Laboratories, Inc., of Wythe avenue and Broadway, Brooklyn, N. Y., is the Type B-M mechanical horn, devoted to the use of bicyclists. This horn, like the Type B hand-operated horn for motorcycles, is the only cycle horn sold with two brackets for immediate attachment to handlebar or top tube. It is a miniature automobile horn with every part interchangeable and guaranteed to give permanent satisfaction.

The B-M bicycle horn is operated by a vertical plunger which turns a toothed wheel. This toothed wheel is of the ratchet type and acts on a pointed anvil in the center of a vibrating diaphragm. On the axis of the toothed wheel is a ratchet device to allow the wheel to over-run and also to let the plunger return without interference. The tone is far-reaching with only a light touch on the plunger. The horn measures 3 by 3 inches and weighs but one pound. It is finished in all-black only. The makers claim that it is the most efficient bicycle mechanical horn on the market. Those interested should address the firm at its Brooklyn headquarters.

WAUGHOP WILL MAKE HIS HOME IN NEWARK

NEWARK, N. J.—Jan. 14.—C. W. Waughop, of the Cleveland sales force, will hang up his hat in Newark when not on the road this spring and summer. Waughop wishes to affiliate with the New Jersey M. C. and join with the members in their social and competitive events.

BIG GOODYEAR PERCENTAGE

The Goodyear Tire & Rubber Company, of Akron, O., not only produces the largest number of automobile tires, but is also a leader in the motorcycle tire field. Three out of every four motorcycles start their careers on Goodyear Blue Streak tires. The firm estimates that this season's production will be about 60,000, and 45,000 of these will start on the road on Blue Streaks.

FREIGHT RATE REDUCED

MILWAUKEE, Wis., Jan. 18.—W. V. C. Jackson, general manager of the Motor Wheel Division of the A. O. Smith Company, has succeeded in reducing the freight classification of Motor Wheels for the Eastern territory, making the rate first class instead of one and one-half times first class.

FEDERAL RUBBER TO ADD

CUDAHY, Wis.—The Federal Rubber Company, of this city, has approved plans for a new five-story addition which will increase the present floor area by 50,000 square feet. The new space will be devoted chiefly to making casings.

Our Canadian Letter

QUIET ANNUAL SESSION OF THE C. M. A.

Letter from President Coffman of F. A. M. Relative to Co-operation Is One of the Features—No Outside Clubs Represented

TORONTO, Ont.—With a number of its officers and members serving with the colors overseas, and with little direct interest being shown by motorcyclists of outside centers, the 1916 annual meeting of the Canada Motorcyclists' Association was held quietly at the Queen's Hotel, Toronto, on Saturday evening, January 15, with President J. M. Scott in control of the proceedings. The attendance was limited to not more than twenty officials, delegates and spectators, all of Toronto. Outside clubs were represented in no way and no communications were received to indicate that the governing body was of concern to the riders of other Canadian cities.

Reasons for Continuing C. M. A.

In addressing the meeting, President Scott declared that little sport could be expected during the coming season, but that it would be very wise for the association to "carry on" until such time as track and road competitions could be renewed, especially because of the affiliations which the C. M. A. held with the F. A. M. and the A. C. U. of England. Legislative matters might arise, he said, and these would demand attention, while if any racing were held at all during 1916 the association would be ready to issue sanctions as usual.

The most interesting feature of the session was the reading of an address for President A. B. Coffman of the F. A. M., who could not reach Toronto in time for the meeting. Mr. Coffman pointed out that competition matters in Canada were apparently satisfactory because no complaints had been made to him and American riders who had competed in Canada had always received fair treatment. The Federation leader described the main features of his organization and made special point to impress upon Canadian riders the necessity for collective effort and co-operation in order to protect the cause of motorcyclists. He drew attention to the fact that no less than $83,000 had been saved to American riders through opposition to unjust and discriminatory legislation proposed in several states during 1915 alone. He made particular reference to the way the Federation had fought the law-makers of the Panama Canal Zone last year.

Toronto M. C. Starts Something

The only ruffle during the annual convention occured when the Toronto Motorcycle Club insisted that they were entitled to vote at the meeting on a membership representation of 101 members when they had not paid their fees for last year. It was finally settled that the local club be allowed to use their three delegates on the understanding that the club guarantee to pay the 1915 dues. The three Toronto club men who were permitted to vote were D. Boyd, F. L. Dolson and Walter Andrews. It was also agreed that Toronto club representatives who might secure a place on the C. M. A. directorate for 1916 would resign in case the club failed to make good its guarantee. The debt was admitted by President J. G. Jones of the Toronto club, but he declared that his organization was in more or less financial difficulties.

New Officers Elected

The elections resulted in the placing of F. A. O. Johnston in the president's chair in succession to J. M. Scott. The defeated candidate for this office was Fred Dolson of the Toronto club. Herb Marshall was the unanimous choice for the vice-presidency, and W. H. Cooke, of Toronto, was re-elected to the position of secretary-treasurer. Five directors were elected, as follows: A. E. Humphrey, J. M. Scott, F. L. Dolson, W. E. Andrews and D. Boyd. There are really seven directors on the board, but it was decided to choose only five. No attempt was made to give outside clubs any representation.

F. L. Dolson gave notice of motion that affiliated club fees for 1916 be only $5 per club instead of being figured on a per capita basis. He argued that more of the small motorcycle clubs would be induced to join if a low fee were imposed and that the association would really be in a better position thereby.

President-elect Johnston suggested that the fees owing by several clubs for 1914 be wiped out, and W. E. Andrews gave notice of motion to this effect.

F. A. O. Johnston, C. M. A. President

The report of the competition chairm for last year, W. E. Stoner, showed th sanctions to the value of $135 had be issued. But few race meets, outside those held on the Toronto board trac were held during the year.

The incoming board of directors will me at Toronto within two weeks, when t committee chairmanships will be allotte It is expected that J. M. Scott will be s lected for the competition department.

Among those present at the meeti were: J. M. Scott, F. A. O. Johnston, A. Humphrey, Herbert Marshall, W. Gladish, A. Burke, H. A. Mahaffy, F. Dolson, J. G. Jones, W. E. Andrews, Be Stillaway, D. Boyd, H. E. Wood a J. McDonald.

SENTIMENT FOR "BICYCL WEEK" IS GROWING

TORONTO, Ont.—When the bicycle a parts manufacturers of the Unit States took up the suggestion for a wi selling campaign with the slogan "O Million Bicycles in 1916," they truly start something. Although the movement w primarily intended for the American h public, the bicycle manufacturers and cessory makers in Canada have taken the idea and considerable activity, as w as enthusiasm, is already being shown. ready a number of newspapers have pu lished lengthy editorials on the subje which the writers are pleased to call bicycle revival," and if nothing further th these articles are secured something w have been accomplished.

More will undoubtedly be achieved, ho ever, for the simple reason that the bicy tire and other producers of Canada taking steps to launch a Canadian campa along the lines of the American moveme Special literature is being drawn up to bo the game along and retail dealers are to assisted in working out window decorat schemes. The waves of this trade tide v probably reach to every corner of the D minion, in which there are approximat 3,500 retailers.

No change has been suggested from tentative dates of February 28-March 4 the Bicycle Week for the local trade. Th dates will probably be used by bicycle de ers in other cities as the idea is spread rapidly for such a demonstration.

A VETERAN PASSES OUT

MONTREAL, Quebec.—The credi pioneer of bicycling on this continent, bert T. Lane, passed away at his home Outremont, a suburb of Montreal, on Ja ary 10. Lane brought the first bicycle America in 1872 from England and wa close friend of the late Colonel Pope "Happy Days" Pitman, as well as ot early cyclists. The deceased was a p president of the Canadian Wheelmen.

START WHEELS MOVING TO BOOST "BICYCLE DAY"

Circular Sent to Dealers by the "One Million Committee" Urging Them to Form Plans for BICYCLE DAY; Everybody's Working Hard; "Talk Contest" Will Close on January 31

NEW YORK, N. Y., Jan. 18.—"The One Million Bicycles Committee," which was appointed by the trade associations during the recent luncheon at the Hotel Astor, is already well in harness and is working hard for the success of BICYCLE DAY, February 29, which will formally open the nation-wide dealers' campaign to increase bicycle sales.

Did You Get This Circular?

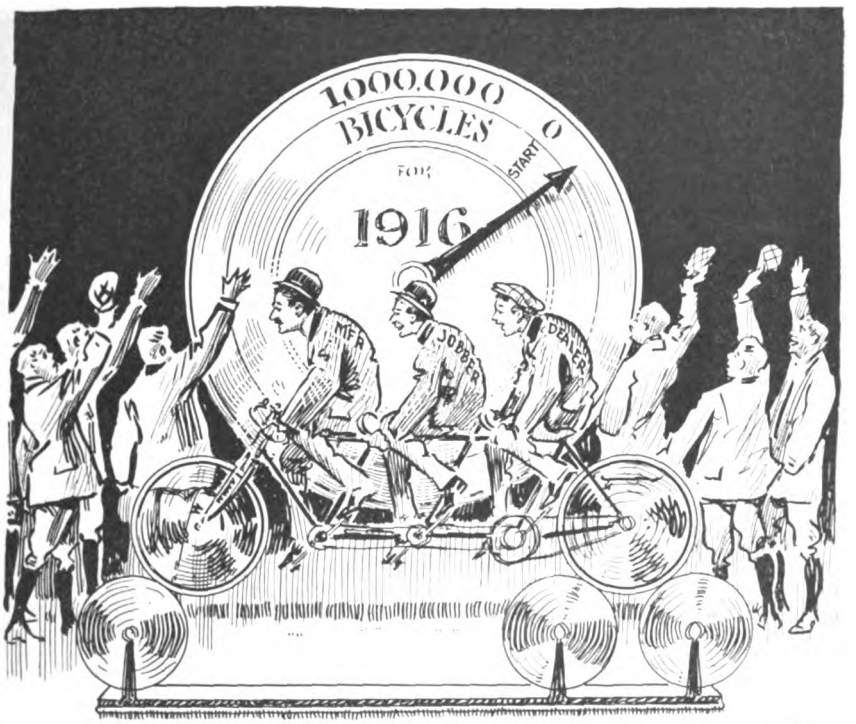
There has already been mailed to bicycle dealers an illustrated folder, urging the dealer to get into line and make his plans for window displays, newspaper advertising, moving picture show publicity; to get up mailing lists of prospects, encourage selling schemes, and to arouse the interest of his clerks, etc. Any dealer in bicycles who has not received this circular should write to the secretary of the committee, Charles F. Olin, Bristol, Conn. Mr. Olin will promptly furnish him with full information and place his name on the committee's mailing list to insure his getting all future announcements.

Trade Men Pull Together

Many letters have been received from manufacturers and jobbers in the trade, says Mr. Olin, showing their enthusiastic interest in the monster campaign. From present indications it is certain that their co-operation will not be lacking and that they will do their utmost to arouse the dealers to the opportunity they will have for increasing bike sales.

Salesmen on the Job

Several of the manufacturers are now planning to furnish their dealers with more and better selling helps than at any previous time. Manufacturers' and jobbers' salesmen are being instructed by their sales managers to do everything possible to further the success of BICYCLE DAY and the "One Million" movement. Many of the salesmen have already written to Secretary Olin expressing their enthusiasm over the committee's work and pledging their co-operation.



The committee expects that the dealers and their clerks will respond in large numbers to the contest, which was first announced in last week's issue of **Motor Cycle Illustrated**. Mr. Olin is of the opinion that the cash prizes will arouse an unprecedented interest and that the dealers and their employees will strive hard to win one of the many awards. The offering of one hundred gentlemen's traveling sets to clerks, in addition to cash prizes ranging from $25 to $100, will make it possible for a large percentage of those who enter the best selling talk contest to be well rewarded for their efforts. The committee states that these traveling sets are being made to its special order and are far superior to any of the five-dollar outfits found in retail shops and will be very useful to the contest winners.

"Talk" Contest Closes Jan. 31

The selling talk contest will close on the 31st of January, and all the good selling points brought out by the dealers' salesmen and clerks in their letters to the committee will be printed and sent out to every dealer in the United States in order to assist them in making sales and writing advertising copy. The committee feels that even if it had not offered a single prize, the amount

ARE YOU TRYING ?

ONLY a few days left for dealers' salesmen and clerks to send in their selling talks to the secretary of the "One Million Bicycles Committee" and to capture a cash prize or a traveling outfit. The prizes are $100, $50, two at $25 and 100 traveling outfits. Talks must not exceed 500 words. Contest closes Jan. 31.

And dealers, remember your chance to win a prize during BICYCLE DAY week for (1) best newspaper ads featuring men's models; (2) best ads featuring ladies' machines; (3) best bicycle window displays. For each of these three contests there are hung up the following prizes: first, $50; second, $25; third prizes (two), $10. Send your letters to Secretary C. F. Olin, Bristol, Conn.

Digitized by Google

of practical benefit which each clerk would have received in concentrating his attention on bright, effective sales talks would have more than compensated him.

The joint committee has this week suggested to all bicycle manufacturers that they incorporate in their 1916 catalogues illustrated copy, featuring the attractions, the advantages, and the pleasures of bicycle riding, so that the prospect's desire to be mounted on a wheel this year will sharpen to a razor edge.

This has been done by the committee as a result of a canvass of a number of dealers who claimed that literature of this character is just what is needed to sell more machines. These dealers stated that before the manufacturers can sell their own particular make of bicycles, there must be, on the part of the customer, a real, live desire for a two-wheeler. In many instances, the dealer's experience has shown, boy prospects are eager for bicycles, but the consent of parents is sometimes difficult to obtain. Most catalogues lack illustrations and reading matter which would convince the parents that the bicycle is just the thing to provide their boys and girls with wholesome and enjoyable recreation that they ought to have.

The joint committee will make further announcements in the columns of the Bicycling World Department for the benefit of its many dealer readers, summing up the progress that has been made from week to week in rounding out the campaign.

WHY EVERY STORE SHOULD HAVE A SHOP

Impossible to Give Adequate Service Without a Repair Shop; How Sundry Sales Are Boosted by Repair Business; No Elaborate Equipment Need Be Provided for Effective Shop

By G. D. CRAIN, JR.

"SERVICE" is probably the most overworked word in the advertising dictionary. Every business man claims that he is able to give service to his customers. Some of those who make the claim would hardly be able to tell whereof their service consists. Others, including principally those who handle mechanical products, know, as the result of the frequent calls made upon them by their customers, that they must give service if they are to remain on the commercial planet.

Has Wearing Qualities

The bicycle, fortunately, is so simple a proposition, and is so sound a commodity, from the standpoint of good manufacture, that the dealer seldom has to worry about its making good. Nearly every wheel on the market, irrespective of make or price, is a good buy, in the sense that it will deliver service to the customer without requiring a great deal of attention.

Even bicycles which are subjected to abuse, as in the case of those which are used by messenger boys—and their name is legion—stand up under their work remarkably well, everything considered, and do not require a great deal of maintenance.

It might be assumed by the uninitiated from the foregoing that it is quite unnecessary for the dealer in bicycles to run a repair shop, unless he feels like doing it for the money that he thinks he can make out of it.

Must Be Prepared

But while the premises seem to suggest such a conclusion, it could not be reached by any logical process based on an examination of conditions in the business, for the reason that while purchasers of bicycles do not require a great deal of service, they want it sometimes; and when they want it they expect to get it—or know the reason why. Hence, whether for profit or policy, a bicycle repair shop is almost an essential of the business.

A dealer in hardware, for instance, who handled bicycles as a side-line, might get along after a fashion without a shop, in the event that he required none for his other business; but he would disappoint a good many customers, first and last, by not being able to render the prompt and efficient service which they have been taught by modern business men in other lines to expect as a matter of course.

Giving Business to Competitors

The dealer who sold bicycles without attempting to do anything in the repair line might refer the purchaser in every case to some dependable shop which could look after whatever repair work happened to be necessary; but such a direction would amount to a strong endorsement of the business policy of that concern, for practically all of those who run shops of any consequence are likewise in the business of selling bicycles.

Thus, since bicyclists do require a certain amount of mechanical service, and since the man who sells the wheel and makes the profit out of the sale is the logical person to provide that attention, it looks as if the dealer who expects to get anywhere in his bicycle business must have a shop and be prepaired to render service whenever he is called upon for it.

Work Usually Simple

Most of the work done is not of an elaborate nature; in fact, the most important work is simple, requiring only a few minutes' time. But it is ability to take care of these minor requirements, which the owner of the wheel correctly believes ought to be met without any question and with little loss of time, that creates the correct selling atmosphere, and leads people to say of a concern: "It gives the service."

In the case of big jobs, like brazing a frame, a bicycle store might logically refer the customer to some shop specializing in that kind of work, on the ground that it hasn't enough of it to justify the installation of the equipment. But for handling minor jobs it ought to be provided with the necessary mechanical features to be able to take care of the bicycle user in a way that will put a good taste in the latter's mouth.

Helps Sundry Sales

The sale of sundries practically involves doing some shop work. Putting on rubber grips is a simple proposition, but it takes a practical man to complete the job. The same is true of replacing worn rubber pedals, putting a new spring on a saddle, etc. All of these transactions involve the purchase of merchandise and then its application to the bicycle; the sale, as it were, of both goods and labor. The dealer can hardly provide one without the other, and, incidentally, there is no reason why he should not make money on one just as easily as on the other.

The sundries business is one of the most profitable features of the bicycle trade, as well as of allied lines, and it is a good thing to get those who are riding wheels in the habit of coming in the store for their sundries. They are much more likely to do this if the habit has been developed by necessary recourse to the repair shop. If there is no repair shop, the opportunity to come to the store will not be created; hence from this standpoint, too, it is well to have a shop as a feeder for sundry department trade.

WILL ENTER NEW YORK RACES

NEW YORK, N. Y., Jan. 18.—Some of the city's best cyclists will participate in the races that will be given for the benefit of the *Evening Mail's* Save-a-Home Fund, which will be staged on Thursday evening, Jan. 20. Edwin Jensen, the crack rider of the C. R. C. A., has already signed an entry blank, as have John J. Marquart, Nelson Johnson, Raymond Cladwell, Joseph Naphtal, Joseph Brexel, George Harvey, John Welton, Bert Baker and George Steppello.

CYCLISTS PUT THE SKIDS UNDER THE N. C. A.

New Governing Body Is Formed and Board of Control Elected; Western Promoters Announce a Circuit of Six-day Races and Contemplate Building Rival Track Near Newark Velodrome

NEWARK, N. J., Jan. 18.—Developments have followed one another in rapid succession in the bicycle war during the past week. The riders have received a charter from the White Rats of America, a theatrical organization which is affiliated with the American Federation of Labor. A body has been chosen by the bicycle riders to govern the sport of cycling, and a statement was made here in Newark that if the present promoters decide to bar all the riders who compete in the Chicago six-day race, a new track will be erected at Riverside Park, Belleville, which is just a few paces outside of Newark. This is by far not all that has happened. The promoters who are contemplating running the Chicago six-day race have also offered the riders races in Kansas City, Milwaukee and St. Louis. The riders are not the only men who have been active, and the trainers who take care of them all through the season have formed a body and received direct affiliation with the American Federation of Labor. The trainers have put their demands before the riders to be acted upon.

The Chicago Promoters (Left to Right): Packey McFarland, Thos. P. Convey, Mike Boyle, Dave Malkay. The Fifth Man Is Iver Lawson, One of the Belligerent Cyclists

Riders Who Joined "White Rats"

All the riders have not been initiated into the White Rats as yet, but the following have signified their intention of joining the Cycle Racing Men's Union, as well as the White Rats: Alfred Goullet, Jackie Clark, Iver Lawson, Robert Spears, Reggie McNamara, Alfred Grenda, Joe Fogler, Percy Lawrence, Jake Magin, Pete Drobach, Harry Kaiser, George Cameron, Frank Kramer, Frank Corry, Donald McDougall, Lloyd Thomas, Thomas Grimm, Joe Nelson, William E. Coburn, Larry Corbett, Joseph Rodda-Russe, Gus Wohlrab, Norman Anderson, Ernest Ohrt, Thomas Stevens, Paul Suter, Charles Piercey, Martin Brink, Fred Weber, Floyd Krebs, Eddie Arcularius, Clarence Carman, Raymond Duffy, Eddie Madden, Francisco Verri, Salvatore Madonna, William Hanley and Walter Schlee.

There is also a small list of riders who have not decided as yet whether or not they will join the other cyclists, and the most of these is Frank L. Kramer, the American champion. Kramer has not commented as to what he proposes to do. The other riders who have not committed themselves one way or the other are: Fred Perry, Eddie Root, Bobby Walthour, Menus Fenlon, John Bedell, George Wiley, Worthington Mosten, Cesar Moretti, Victor Linart, Walter Schlee, Alfred Halstead, Gordon Walker, Oscar Egg and Marcel Dupuy.

Elected New Board

The riders met here on Saturday and elected a board that will probably be known as the American Cycling Association. These men are to take the place of the National Cycling Association, according to the riders. Harold Dibblee is the chairman. The other members are: Dr. George H. Muth, Dr. E. J. Birs, William Coburn and Hugh R. Brown. Any promoters desiring a franchise will have to make application to this body and it will be granted for a fee of $50. In settling disputes this body will not have full power to act, but will work in conjunction with two riders and two promoters.

At the meeting the proposition of the Twentieth Century Cycling Association, Inc., was put up to the riders. It is this company that intends to run the Chicago six-day race and is composed of the following men: President, Packey McFarland; vice-president, Samuel Pruyn; second vice-president, Michael Boyle; treasurer, Charles R. Hall; secretary and general manager, Thomas P. Convey. These promoters also offered the riders a ten hour a day six-day race in St. Louis, Kansas City and Milwaukee for thirty per cent. of the gross receipts and transportation expenses. The riders turned their offer down and asked for forty per cent. of the gross receipts, an eight-hour race instead of a ten-hour affair, and transportation. As yet the promoters have not acted on the riders' demands.

Call It Game of Bluff

After the meeting on Saturday, Dave Mackay, who is acting as Eastern representative for the Twentieth Century Cycling Association, was approached, and told that Frank Mihlon, president of the Cycle Racing Association, had expressed his opinion that Mackay and his associates were putting through a big game of bluff. This rather peeved Mackay and he gave out the story about the new track to be erected in Newark. Mihlon, when told about the new track, said it was along the same lines of the rest of the "bluffs" they were throwing.

Mackay then went along to say that if the Newark promoters black listed the riders, a new saucer would be built. He said that the men behind the movement had gone so far as to have plans and specifications made and that the track, grandstand and bleachers would cost $22,800. Being just outside of Newark, Mackay said motor-paced races could be run which are not allowed in Newark. Who the men are behind the new move is not known as yet, but it is believed that a prominent brewer here is the party Mackay had in mind to back the move.

There has also been a rumor current that the riders wished to join the Federation of American Motorcyclists, should that body extend its scope so as to embrace bicycle competition. This was put up to Alfred Goullet, the president of the Cycle Racing Men's Union of America, by a representative of **Motor Cycle Illustrated.** Goullet said:

Would Co-operate With F. A. M.

"We would like to affiliate with the Federation of American Motorcyclists just as we would with the Amateur Athletic Union, but we have no desire to come under the jurisdiction of the motorcyclists. We have selected a body to take the place of the National Cycling Association and intend to be governed by that body. We, however, would like to be on good terms with Federation of American Motorcyclists and would like to work hand in hand with them in competition."

The text of the communication submitted by the Bicycle Trainers of America to the riders at their meeting on Saturday is as follows:

"We hereby notify the cyclists' organization that we, the professional trainers, have organized a union to be known as the 'Bicycle Trainers of America,' effective January 16. The object of the union is to protect all the members of said organization.

"This union consists of none others than those who make their livelihood in the bicycle game as trainers, and it is only fair that the steps which we have taken to protect ourselves should meet with the approval of your organization.

"We do not wish, nor do we ask, to dictate to the riders, nor have we raised our wage scale beyond the means of any rider."

SCHULTZ AND PETERSON STAR AT BUFFALO

Former Breaks Local Record for One Mile by Four-fifths of a Second; Handicap Races Thrill a Large Crowd at Buffalo Armory

BUFFALO, N. Y., Jan. 15.—A big crowd witnessed the indoor sports at the 74th Armory tonight. Besides the local fans there was a fair sized crowd from Toronto. From the very beginning the entire program was a thriller.

The one-mile bicycle lap race brought forth a howl of applause from the crowd when Robert Schultz broke Allie Krushel's record of last year by ⅘ seconds. His time was 2:08⅘. In his effort to make the 39 points Schultz was pressed hard by Schell and Bundt, who took second and third place.

The final heat in the 1½ mile bicycle handicap race was a thriller throughout. The excitement was at its height when the scratch men nearly caught the leaders after the first mile. L. A. Peterson starred in this event. Carl Muth and Joe Muehlbauer took second and third place.

One mile lap race, bicycle. Winner and second man in three heats having the most points to qualify for the final.

First heat—Robert Schultz, W. S. R. C. (41 points), first; J. Muehlbauer, Royal Flyers (22 points), second. Time, 2:16⅘.

Second heat—Joe Schieder, C. Y. M. C. A. (38 points), first; C. V. Kohlmeyer, unattached (17 points), second. Time, 2:16⅗.

Third heat—Elmer Bundt, unattached (41 points), first; Eddie Levy, Pirate C. C. (33 points), second. Time, 2:15.

Fourth heat—I. Gronkowski, Royal Flyers (33 points), first; Fred Schell, unattached (26 points), second. Time, 2:15⅘.

Fifth heat—Warren Fraser, unattached (39 points), first; A. B. Funk, P. O. D. (21 points), second. Time, 2:16⅗.

Final heat—Robert Schultz, W. S. R. C. (39 points), first; Fred Schell, unattached (23 points), second; Elmer Bundt, unattached (22 points), third; I. Gronkowski, Royal Flyers (8 points), fourth. Time, 2:08⅘. New world's record. Former time, 2:09⅘, held by Allie Krushel, February 20, 1915.

One and one-half mile bicycle handicap race. First two in each heat and third in the two fastest heats to qualify for the final heat.

First heat—Carl H. Smith, Royal Flyers (60 yards), first; Carl Muth, unattached (115 yards), second; A. B. Funk, P. O. D. (130 yards), third. Time, 3:17⅗.

Second heat—Fred Best, B. F. B. C. (45 yards), first; J. M. Tanner, C. M. B. A. (65 yards), second; O. E. Quigley, unattached (185 yards), third. Time, 3:19⅘.

Third heat—Robert Schultz, W. S. R. C. (scratch), first; L. A. Peterson, B. R. C. C. (90 yards), second; O. V. Kohlmeyer, unattached (105 yards), third. Time, 3:21⅘.

Fourth heat—William Anthony, Alma A. C. (65 yards), first; Jos. Meuhlbauer, B. F. B. C. (85 yards), second; L. Schreck, unattached (100 yards), third. Time, 3.20.

Final heat—L. A. Peterson, B. F. B. C. (90 yards), first; Carl Muth, unattached (115 yards), second; Jos. Muehlbauer, R. F. B. C. (85 yards), third; A. B. Funk, P. O. D. (150 yards), fourth. Time, 3:18.

C. R. C. A. AWARDS PRIZES FOR FIRST THREE CENTURIES

NEW YORK, N. Y., Jan. 18.—Awards have just been made by Chairman Jacobson, of the C. R. C. A.'s Road Records Committee, to the three riders who have completed the first centuries in 1916. The prizes were a silver mug, offered by National Treasurer J. M. Mitchell, and two club jerseys, hung up by the New York Division. Frank Kuno, of New York, captured the mug, while Fred M. Sanborn, of Baltimore, and Ed. Jenkins, of New York, accounted for the jerseys.

Kuno rode from New York to East Islip, L. I., and return on New Year's Day, starting after 1916 had been only one minute old. Sanborn sailed forth for his century at nine o'clock on New Year's Day morning and completed the hundred miles at a leisurely pace, while Jenkins, who rode the third century, covered the hundred miles on January 5.

WILL HOLD ANNUAL BANQUET

ST. LOUIS, Mo., Jan. 18.—The annual banquet of the St. Louis Cycle Club, which claims the largest membership of any similar club in the country, will be held at the Marquette Hotel in St. Louis Saturday night, Jan. 22. Plans for the 1916 activities of the club will be discussed. Robert E. Lee will be toastmaster. The club now has a membership of more than 100.

PALMER STARS AT SYDNEY

SYDNEY, Australia.—William "Pedlar" Palmer, the Australian cyclist who has performed on many American tracks in former years, accounted for the "second and third class" handicap at a recent race meet held here. Palmer had fifteen yards and won in 1:04 2-5, W. B. Seaman, 30 yards, being second. The "Fisher Scratch Race," at five miles, went to A. M. Beath, with T. J. Wilson and F. D. Walcott following him across the line. Walcott accounted for the mile handicap from the 80-yard mark, beating A. J. Davies, 65 yards, and George Horder, 85 yards, in the order named. Many classic races will be held in Australia this year in spite of the war.

VERRI GIVES EXHIBITION

NEW YORK, N. Y., Jan. 18.—At the headquarters of the Unione Sportiva Italiana, last Sunday night, Francesco Verri, the six-day rider, gave an exhibition mile on home trainers in the fast time of 1:08⅘. Tom Bello gave a mile exhibition in 1:15⅗, while Desimone rode a half mile in 32 seconds flat. In a special match race between Johnson and Desimone at one mile, the former won, after a nip and tuck battle, in 1:12.

HAD SUCCESSFUL SEASON

MILWAUKEE, Wis., Jan. 18.—The North Side Cycle Club will hold its annual meeting during the month of February according to President Louis Pierron. The club has had a remarkable season, the bicycle sport here showing a marked revival. Runs and tours were held almost every Sunday, although the weatherman butted in and spoiled some of the best affairs planned by the club. The Thanksgiving Turkey tour had to be abandoned on account of inclement weather. The club includes amongst its members some of the oldest bike riders in the city.

LIPPOW CYCLE INCORPORATES

MILWAUKEE, Wis., Jan. 18.—The Lippow Cycle Company has been incorporated, with a capital stock of $10,000. The incorporators are L. and M. Lippow and N. L. Baker. A new store has been erected at Seventh street and North avenue in the North end of town to handle Miami cycles.

CYCLIST HUYBRECHT MAY COME TO AMERICA

NEW YORK, N. Y., Jan. 18.—Francois Huybrecht, a Belgian cyclist who is one of the best known motor pace followers in Europe, has applied by letter to the Cycle Racing Association for a contract to ride in America this season. He is now at Putte, Holland, where he fled when the Germans captured Antwerp. Frank Mihlon, the treasurer of the C. R. A., said last week that the Belgian would probably be engaged for the coming season, although he will leave the signing of the contract entirely to Manager John Chapman, who is now resting up at his home in Atlanta, Ga. American pace followers who have met Huybrecht in competition rate him as one of the best in the game.

Victor Linart, the Belgian who was the runner up in the American motor paced championship last year, will probably stay in America until the war is over. After the New York Six-Day Race he intended to return to his native land and join the army. But, it is reported, he was advised by cable to remain here.

LOTS OF FUN AT C. R. C. A. AMATEUR NIGHT

NEW YORK, N. Y., Jan. 18,—An amateur night and dance were held by the New York Division of the Century Road Club Association last week at its club house at 54th street. During the acts refreshments were served, and after prize winners for the best acts were announced dancing was in order. First prize was awarded to Ed. Gavin for an exhibition in breaking straps, weight lifting, etc., while the second award went to Robert Einson, who demonstrated how easy it was to escape from a regulation straight jacket. Henry Engel captured the third prize for a clever monologue. There was lots of fun throughout the evening and the members of the association and their friends voted the affair a huge success.

CRESCENTS START WEEKLY POINT RACES

BALTIMORE, Md., Jan. 18.—Walter Iglehart was again the winner of the second point race of the Crescent Bicycle Club, Fred. M. Sanborn finishing second and Ernest Nitz third. Five riders lined up for the start, but owing to the strenuous going and the hilly course two of them dropped out of the race several miles from the finish, Iglehart winning out in the final sprint. This gives Iglehart a total of ten points in the series, having captured a point race last week, and a lead of 5 points over the nearest man, Ernest Nitz. Owing to his victory in last Sunday's race Iglehart was compelled to start fifteen seconds behind the field, but easily made up the distance in the first mile.

A hill climb contest was held on the steep grade on Charles Street Avenue, near Towson, on the way out to Cockeysville, the destination of the run, and the winner proved to be Fred. M. Sanborn, who walked away with the event in easy fashion. Ernest Nitz was second, Langdon M. Sanborn third, Welby Sherman fourth, and Walter Iglehart fifth.

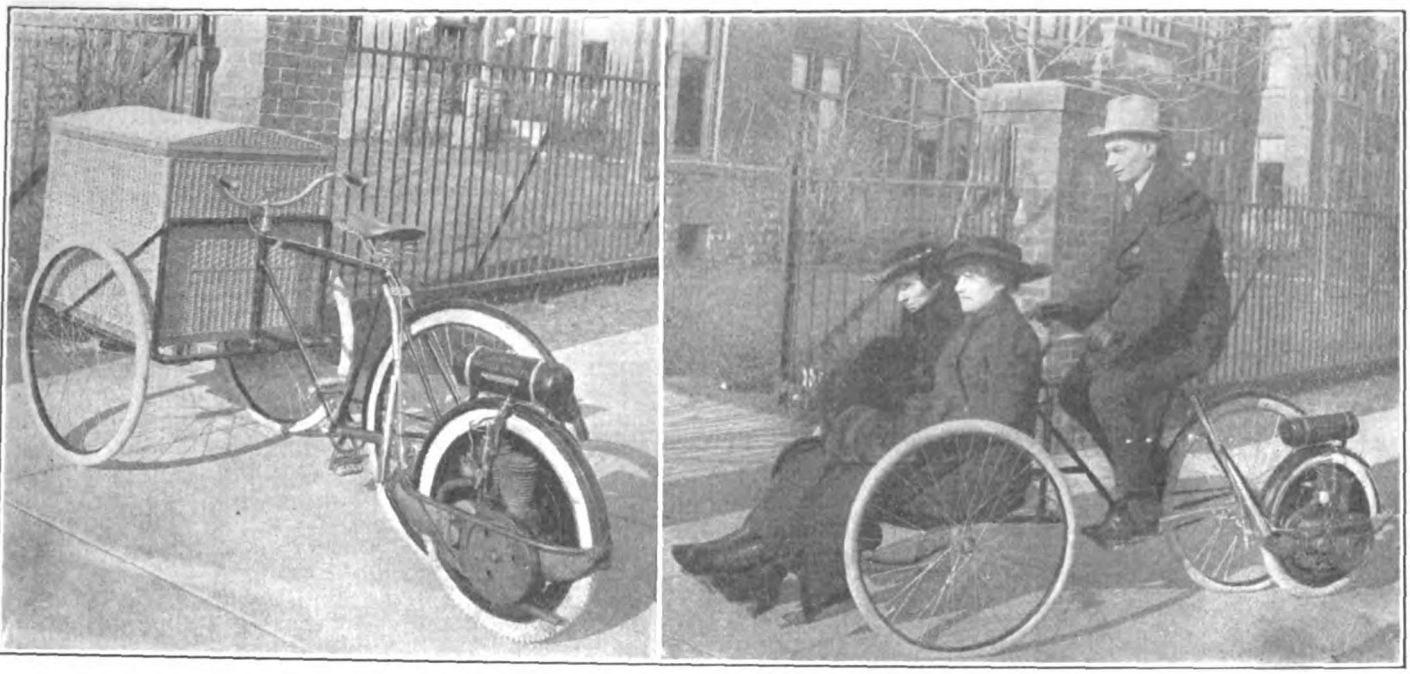
WORTHINGTON PACKAGE AND PASSENGER TRICYCLE FOR MOTOR WHEEL USE



MILWAUKEE, Wis., Jan. 18.—The Worthington Company, of Elyria, Ohio, has placed on the market a very practical package carrier tricycle for use with the Smith Motor Wheel.

The Worthington outfit is extremely light in weight, having light bicycle framework and the package container being made of woven wicker. It is a very commodious box and suitable for any light delivery service.

A unique feature about the Worthington tricycle is that it can be instantly converted into a passenger conveyer. This gives it a double use in that during the day it can be used for delivery purposes and at night and on holidays the rider can take his friends out for a ride.

ADDS INDIAN BICYCLE

ARDMORE, Okla., Jan. 17.—W. O. Lane & Co., one of the biggest bicycle firms in this city, has added the Indian bicycle for 1916. The firm did a large business in Pope and Miami wheels during 1915 and will open a branch in Corsicana, Texas, in a short while.

THE BICYCLE COVER PICTURE

H. N. Baker, who is one of the most intrepid cyclists in the country, is seen on the front cover this week on the grounds of the Panama-Pacific Exposition, after completing his transcontinental bicycle journey from Boston to Frisco. Speaking of his wonderful trip, Baker says:

"I wanted to see America and the great Exposition, so I started on my Dayton bicycle from the Y. M. C. A. building in Boston, Mass., on the 6th of last June. In the East, where the towns are numerous and near together, the travelling was quite pleasant. But when I got into the wilderness of the mountains and into the deserts of Nevada and Utah, where you cannot even get a drink of water, it was quite different.

"I sailed into Frisco finally on the evening of November 27. It is interesting to note that my bicycle was still in splendid condition after that long, gruelling ride; my Vitalic tires, with which I had covered nearly 3,900 miles when I arrived at the Golden Gate, were good for another 500 miles, while I had no trouble at all with my Coventry chains. All things considered it was certainly an interesting journey—a wonderful education."

TOM BELLO JOINS U. S. I.

NEW YORK, N. Y., Jan. 18.—Tom Bello, who is popularly known as the "clean-up kid," is the latest New York amateur cyclist of note to join the growing ranks of the Unione Sportiva Italiana. Bello has won quite a number of fast time prizes in big Eastern competitions last season and also has two American competition road records to his credit. At Floral Park, L. I., last fall he covered ten miles in the record time of 23:08, while in the Coney Island handicap classic on Decoration Day he made twenty-five miles in 1:03:07.

Tom Bello

VETERAN FIRM AGAIN TO HANDLE BICYCLES

NEW YORK, Jan. 17.—At one time a big factor in the bicycle trade, the H. & D. Folsom Arms Company, 314 Broadway, New York City, subsequently discontinued its cycle business. During the past year, however, the Folsom Company has received so many inquiries for bicycles that it has just decided to put in a representative line and issue a catalogue.

Not only that, but as a result of a recent visit by Messrs. Jackson & Cahn, of the A. O. Smith Company, of Milwaukee, Wis., the Folsom company has taken on the Smith Motor Wheel for a good-sized contract, and arrangements have been made to have the concern act as a service department for New York and nearby territory, carrying a complete line of repair parts for the motor wheel. In the early days of the bicycle the Folsom Company were distributors for the Monarch, of which they sold many thousands in the metropolitan territory each year. Their return to the bicycle business is another evidence of the vast improvement which the industry has recently experienced.

INTER-CLUB TO BANQUET

NEW YORK, N. Y., Jan. 18.—The delegates and alternates of the Inter-Club Amateur Cycle Road Racing League will give a banquet at the Hungarian Restaurant, 161 West 46th street, to President D. J. McIntyre and Secretary-Treasurer H. W. Zarr, in appreciation of the efficient services which these two officials have rendered during the past season. Three representatives from each club in the League will attend the banquet.

FRANK KRAMER'S LIFE STORY

Third Installment of the First Authorized Story on the Great American Champion's Career

How Kramer Won His First Professional Championship—His Defeats and Victories in 1901

By HARRY MENDEL

Kramer after finishing second to the great colored rider, Major Taylor, in the National Cycling Championship in 1900 resolved during the winter months that in 1901 he would capture the premier championship of the land. Sure enough, he realized his fondest ambition when on September 7th in a race meet at Hartford, "Big Steve" clinched the title by winning the five-mile championship race. Taylor was the runner up to Kramer, Fred Lawson finished in third place in the race at Hartford, where Kramer won the issue, Lester Wilson finishing fourth while Major Taylor breezed home last. Kramer was the pro-champion of America just a couple of months before his twenty-first birthday, the youngest champion the world ever known.

Trained at Ambrose Park

Kramer was in the habit of training in the spring at Ambrose Park, in Newark, when he went there in 1901 the track in an unridable condition. "Buffalo Bill's" bucking broncho's were allowed to roam over the field during the winter months and Kramer found a lot of large holes in the track. Repairs were being made at the time, however, and Kramer made his debut at Berkley Oval, up in the Oranges, until the Newark track was ready.

It was May 12, when the formal opening of the Vailsburg track was held, with 10,000 people on hand. Kramer, a tall auburned haired youngster, startled the crowd by a brilliant finish at the tape in the final of the five-mile professional handicap race, in which he defeated Floyd Krebs and Bobby Walthour who had liberal handicaps. Another race on the same afternoon. Bobby Walthour started from scratch and just nosed out Kramer for victory by a foot. Charley Hadfield finished third.

"Yes," the sheriff answered, "and the official timers and I have agreed on every heat ridden so far."

Sheriff Virtue, who since that time has passed away, became an ardent bike fan and nothing was done to interfere with the Sunday racing which has become so popular in Vailsburg. With the sheriff looking on, Kramer won a two-mile race from Bobby Walthour and the badge wearer joined in with the rest of the fans in applauding the East Orange rider.

Frank Kramer in 1901 When He Had Won His First Professional Championship

Twelve thousand people swamped the Velodrome on Decoration Day, the big event being a two-mile bumping race which corresponds to an Australian pursuit race today. Hardy Downing was the winner while Kramer finished third. Frank did not let the holiday go by without winning a race, finishing first in the half-mile professional affair after an exciting finish with Owen S. Kimble.

Kramer came out on the track the first Sunday in June and declared that he would split up the McFarland-Cooper combination. But though he tried hard to accomplish it Frank only came out second best. Kramer was rushed off the track at the first opportunity by McFarland and "Mac" was hissed loud and long. The judges did not disqualify any one and Kramer naturally was a pretty sore individual and had a hot argument with Cooper and McFarland right on the track.

The warfare continued down into the dressing room and Mr. Burnett wanted to wager $500 on Kramer to beat McFarland or Cooper, but both claimed they were not in condition to ride Frank a match race. That afternoon was not a good one for Kramer. After failing to finish in the five-mile race, in which he was ridden off the track, he could only get third place in a quarter mile sprint which went to McFarland, with "Foke" Freeman second.

Bad Day for Kramer

The following Sunday rivalry was still hot and McFarland defeated Kramer easily in a ten-mile race in which there was a field of twenty-five starters. Kramer was unable to place second, Bobby Walthour beating him over the line. On Tuesday, June 11, Kramer visited Boston and cleaned up in two professional races. In a third of a mile dash Kramer led Kimble and Freeman home while Johnny Cooper finished second and Tom Cooper third in the one mile open.

"An official with more ivory in his head than brains caused me to go down in a mean spill at Vailsburg on Sunday, June 16," remarked Kramer to the writer last week, seeming still peeved over this spill. "This fellow stepped on the track and was hit by Walter Babb, while Al Newhouse, Howard Freeman, Hardy Downing and myself all went down in a heap, but luckily none of us were seriously injured."

There was a race named after Kramer on Sunday, June 31, called the "Frank Kramer stakes" and Kramer happily won the event which was at a half mile. There was also a "Floyd McFarland handicap" on the bill and Kramer finished second in this, to Willie Fenn, who had a handicap of 100 yards. The distance was five miles and Kramer riding from scratch was clocked at 10 minutes, 29⅕ seconds, exceptionally good time.

"Big Steve" made a field of the best hand-

Digitized by Google

icap riders of the country look like mere novices in the Vendome stakes, a two-mile handicap affair. Riding from scratch and with a stiff wind blowing, Frank clipped 8⅗ seconds off the world's record. The previous mark was held by Floyd McFarland, who covered the two miles in 4 minutes and 8 seconds. Kramer's time was 3 minutes, 59⅖ seconds. McFarland had hung up his mark in Washington, D. C., in 1899.

In a sensational finish at Vailsburg on Sunday, July 14, Kramer flashed over the tape a winner by barely two inches over Howard Freeman, of Portland, Oregon, in the combination team race at one mile. Kramer was teamed with Fisher while Freeman had Hardy Downing for a "side kick." In the heat that Kramer won, Barney Oldfield, the now famous automobile driver, teamed with W. A. Rutz, came in third. Oldfield did not shine on a bike as he does now behind the wheel of a big racing car.

Bike Riders Strike

It was right after this race that 20 of the leading bicycle riders of the country declared a strike at the Vailsburg board track. Tom Cooper was delegated to act for the cyclists and presented a petition to the management asking for an increase in the size of the purses offered.

On July 22 Kramer was again shut out of a championship race. This time it was held at Madison Square Garden and Kramer fell a victim to the speed of Freeman and Fenn. Fenn and Taylor rode in the final and the Major won by three lengths over "the boy wonder." Kramer finally came into his own by taking a half-mile championship race on the night of July 30 at Albany. Major Taylor was beaten in the grand semi-final by Johnny Fisher, the Chicago boy, while Kramer met Fisher in the final and won by a scant wheel.

The first day of August Kramer rode in a championship race at Syracuse. Lawson and Kramer went through the sifting process successfully in the half-mile event, but Lawson beat Kramer by a length in the final. Iver went into the last lap leading and was never headed.

Although the first race in August was not particularly lucky for Kramer, he managed to climb into the lead for the national cycling honors before the week was out. On Saturday afternoon, August 3, Frank took the measure of Major Taylor in a half-mile race at Vailsburg, before some 5,000 fans. He won over the colored marvel by two feet. Kramer got a rest when it rained on Sunday and then jumped on a train for Hartford. On Monday night, in Hartford, he defeated the colored rider once more. This time in a race at two-thirds of a mile. In the final, Taylor was unable to get the pole and he was a full length behind at the finish. Kramer by this victory had a total of 26 points while Taylor had 22.

McFarland's Sportsmanship

Kramer was beaten three lengths on Thursday, August 8, by Iver Lawson. In the semi-final Lawson won over Lester Wilson by two lengths. The late Floyd McFarland beat Wilson in the semi-final but Wilson punctured and McFarland would not take the race.

"This was characteristic of Floyd," said Kramer, commenting on this race. "He had a big heart and did not wish to take advantage of Wilson in this way. McFarland rode another heat with Wilson but this time he was beaten." Kramer remarked that McFarland got a wonderful ovation for his sportsmanship and he was bigger in the eyes of the fans in defeat than he would have been in victory.

Kramer smashed the world's record for a half mile in the fourth heat of a half-mile championship race, at Madison Square Garden, on August 9. Kramer's time was 58 seconds. The final narrowed down to Cooper and Kramer. Cooper set the pace but Kramer beat him out in the home stretch by two lengths. Lawson had a mishap with his bike and could not finish while Taylor did not ride on account of injuries. The next day Kramer won the half-mile championship at Manhattan Beach.

Pan-American Exposition Races

On Monday, August 12, the riders turned their attention to the International Grand Circuit meet which was being held in the Stadium at the Pan-American Exposition in Buffalo. Four preliminary heats and the semi-finals of the quarter-mile championship race were run off, Kramer, Lawson, Taylor and Freeman qualifying for the finals. The following day, in the finals, Lawson defeated Kramer in the first semi-final while Taylor disposed of Freeman. Iver then took the measure of the Major in the final.

The racing continued at Buffalo all that week and on Wednesday the fight for honors in the one-mile race narrowed down to Kramer, Fisher, Lawson and Kimble. Taylor won his heat but was shut out in the semi-final. Thursday, Kramer beat Lawson in the final of the one-mile titular race before 15,000 people, one of the biggest crowds that ever turned out for a bicycle race in Buffalo. Kramer caught Lawson napping in the last eighth and worked up a good sprint before Lawson realized that the final was on. Kramer went "dead" to the tape and beat Lawson by two lengths.

On Monday, August 19, the riders appeared again in New York at the Madison Square Garden. Kramer won a half-mile championship race from Collett. Taylor, Kimble and Fisher figured in a spill in the first semi-final, Kimble and Fisher beating Taylor home after the mix-up. On Tuesday, at Baltimore, Lawson beat Kramer in a half-mile championship race, in which all the stars were entered with the exception of Taylor.

Showed Signs of Weakening

Kramer started to show signs of weakening on August 23 when in a meet at Madison Square Garden he failed to qualify in the half-mile championship race. Frank was shut out by Cooper and Taylor. Lawson won the final by defeating T. J. Gascoyne. On Sunday in Newark, Kramer lost the first open race in his professional career. Iver Lawson was the rider to do it. He opeend up a gap of three lengths and just managed to win by about a couple of inches.

Kramer sprung a "come back" at Hartford the next Monday by nosing out Willie Fenn in the half mile titular race. Fenn, "the boy wonder," shut out Lawson in the semi-final and Kramer led Lester Wilson home. Kramer failed to show at New Haven, in the half-mile championship race. George Collett was the winner and Willie Fenn was second. Major Taylor was still among the missing. Kramer was shut out by "Poke" Freeman and Fenn.

It was just one race after another and at Providence, on Wednesday, Kramer was beaten in a one-mile championship race by Lawson. This victory put Lawson ahead of Taylor in the race for the national title and within striking distance of Kramer.

Major Taylor came out of his hiding on Thursday, August 29, and riding at Springfield, Mass., led the East Orange rider to the finish mark, in the one-third mile championship race. Taylor had barrels of speed after his long rest and won by six lengths. On the first day of September the standing of the riders for the national title showed Kramer with 65 points, Lawson 40, Taylor 32 and Fenn 20.

On Wednesday, September 4, the colored Major gladdened the hearts of over 5,000 enthusiastic admirers by winning the one-mile championship affair. Kramer was disqualified in the grand semi-final.

At the Boston Races

The Boston races started on September 6 and Major Taylor immediately began to make a clean up. He won the quarter-mile championship race and was second in the two-mile affair. Kramer was not placed in either one of these races. Willie Fenn was the winner of the two-mile race. On Saturday Major Taylor won the two-mile race at Charles River Park, beating Kramer and Lawson. He then came through and won the one-third-mile championship race and the next day took the one-mile race, and bettered his chances for the title. He then had 66 points while Kramer had a total of 72. Kramer was faring poorly and in a majority of the races was not being placed.

Kramer returned to Newark from Boston and rested up for a three cornered match race which was to be staged between Major Taylor, Iver Lawson and Kramer. Here were the three biggest stars in the game to be brought together. When Kramer was approached and asked who he thought would win the race, he put his hands deep in his pockets and said: "Right here." And he won, beating Taylor.

(To be continued.)

Popular Because Standardized

THE Pope Model H-16 is acknowledged, by practically every one in the trade, to be the most popular lightweight in America.

The reasons for this popularity are many—our long experience in the manufacture of motorcycles, our unusual facilities, our highly-skilled employes, and the long series of tests and experiments we have made in order to produce the best machine that money can buy.

But this all brings us around to one point—standardization. Every piece of material used, every process of manufacture, is standardized. Into the building of each

Pope Lightweight Model H-16

go such standard products with world-wide reputation for quality as:

SPARTAN V-Belt, 15/16" wide.
ECLIPSE free engine clutch, operated by hand lever.
SCHEBLER type H automatic and compensating carburetor.
DIAMOND "E" spokes, 36 heavy gauge.
ECLIPSE knockout axle in front wheel. Internal expanding coaster brake in rear wheel.
PERSONS Champion Saddle.
UNITED STATES detachable tires.

Small wonder then that the Pope Model H-16 is the most satisfactory lightweight to own and the easiest to sell; Price, $150.

The demand for it is growing every day—making it one of the most profitable motorcycles for you to push during 1916. Are you in line?

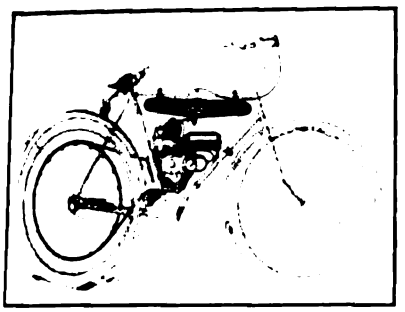
Cyclemotor



2 Stroke **High-Speed**

The endorsement of the **high-speed**, light-weight motor, by the leading Automobile Manufacturers at the New York Show, further substantiates our claims to the superiority of this type of gas engine.

Everybody was surprised at the tremendous amount of power which these motors developed, in proportion to their weight. Experts were startled by their quick acceleration and the total lack of vibration

Yet these same important principles and features have been embodied in the Cyclemotor since the first machine was built.

Here you have the ideal motor attachment. Built on advanced ideas, giving the maximum amount of power yet being economical to maintain and requiring no attention after the first adjustment.

Are you going to act now and secure the agency for this paying proposition or sit back and watch your neighbor beat you to it? Better ask for Booklet "D-I."

Before the Summer comes things are going to happen in the Bicycle Business!

"Here's for a Million Bicycles in 1916"

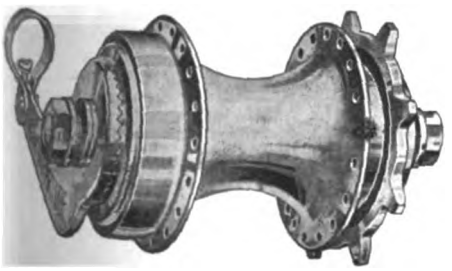
is not a mere theory—It is a fact—a fact accepted by the Manufacturers, Jobbers and Dealers who know the trend of the times.

Now the big question is—What Coaster Brake are *you* planning to feature as *your* leader?

Let your choice be governed by the consideration of *Quality* alone.

The NEW DEPARTURE COASTER BRAKE

is distinctively the brake of *Quality*.



The New Departure Coaster Brake—The Brake that Brought the Bike Back. Nearly 5,000,000 have been sold.

Send for Our New Catalog

It is made entirely of steel—each part so processed as to give it just the shape required and just the degree of strength needed for the work it must do.

Our aim is that no imperfect part shall find its way into the New Departure. 157 inspections guard you and your customers against defect. Materials, workmanship, inspection and testing combine in the New Departure, the brake that out-wears the bicycle.

This extreme care makes it possible for us to stand back of every New Departure you sell, with a guarantee based upon the assumption that the customer is right—a guarantee that safeguards you both.

Sell a man a good thing and he comes to you again.

THE NEW DEPARTURE MANUFACTURING CO., BRISTOL, CONN., U. S. A.

Pope Construction Tells

It is the excellencies of Pope construction behind the Model M-16 that make this Single Cylinder the equal of many Twins. Pope construction means not only the greatest care in the selection of the highest possible grade of materials, the concentrated attention of our experienced Engineers on every intricate detail of construction, but it means that every Pope Motorcycle is built with the one end in view—the complete satisfaction of your most particular customer.

That is why you find a motorcycle of recognized reliability and assured day-in-day-out demand in the

Pope

SINGLE SPEED Model M-16

One reason why the Model M Engine gives Speed and Power far in excess of its rating is because of the overhead valve construction—a construction which permits the use of practically all the produced power, affords instantaneous exhaust of spent gases, permits quick filling of the chamber with the new mixture, and combines accessibility, simplicity and certainty of action.

Model M is the very picture of sturdy dependability. And the fact that you carry this model in stock will not only bring more prospective customers into your store, but will send more of them away satisfied purchasers.

We are ready to meet your needs for Model M-16 with all the advantages of our facilities and organization which means immediate delivery of your requirements.

One Corner of A. O. Smith Co. Chemical Laboratory

Where Rigid Analytical Inspection Prevails

A CHEMICAL and physical laboratory, one of the most extensive in the country, is maintained by this Company. Every shipment of steel, of which there is an average of over 4,000 tons received per month, all castings, forgings, coal and fuel oil and other materials used are thoroughly tested both physically and chemically by a large group of graduate chemists, and accepted or rejected, as the case may be.

We give special attention in this department to every Motor Wheel part, thus insuring durability of parts and a uniformity of product.

SEVERAL testing machines have been specially built for trying the different Motor Wheel parts under actual running conditions, determining the stresses to which all parts are subjected and their ability to withstand them. Thus we are assured of strength and accuracy in every Smith Motor Wheel shipped.

IF you are not a Smith Motor Wheel dealer write for our 1916 Profit Proposition To Dealers *now*. Tell us the lines you handle and the size of your business. Address:

What BLUE STREAKS Mean to You

When you realize that every leading motorcycle manufacturer in this country has adopted Goodyear Blue Streak Tires for 1916, you can form a very definite idea of the quality of these tires.

These manufacturers must observe the closest scrutiny in passing judgment on their standard tire equipment.

We do not believe this almost unanimous verdict was based solely on the fact that Blue Streaks hold every world's record for speed and endurance, amateur and professional.

Far more important to rider and dealer, is the fact that the name Goodyear itself implies the utmost in scientific achievement in the manufacture of automobile tires, truck tires, motorcycle tires, bicycle and aeroplane tires.

To the motorcycle rider Blue Streaks mean a very positive assurance of tire mileage, tire comfort and tire dependability.

To the motorcycle dealer Blue Streaks mean a very positive assurance of a swifter and easier selling tire, which is the shortest and surest road to permanent profit.

Whether you are a motorcycle rider or motorcycle dealer, let us send you further details on this year of years for Blue Streak Tires.

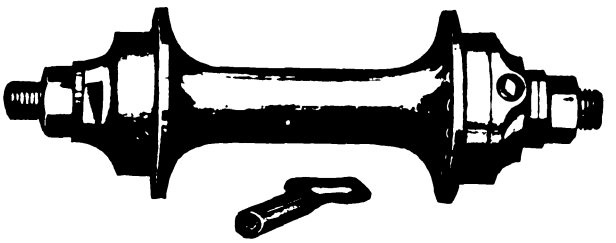
ECLIPSE LOCKING FRONT HUB

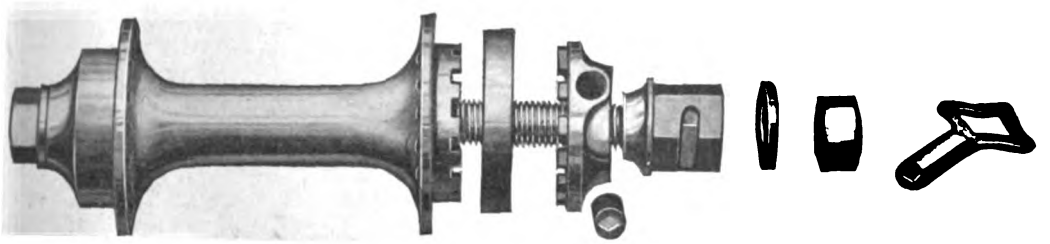


FOR

Bicycles and Motorcycles

An invention which is revolutionizing the locking device market

Riders buy a machine to own it. They demand protection against theft and the annoyance of the practical joker. The lock and chain are things of the past. The Eclipse Locking Front Hub is efficient, thief proof and fool proof. Carry a key; that's all. Same distance between cones.



SIMPLEST, SUREST LOCKING DEVICE KNOWN

This photograph shows the Eclipse Locking Hub parts (made for both bicycles and motorcycles). It shows the ball race flange notched to receive the locking member. Between the notched surfaces is shown the dust ring, slipped off to expose the notches. The cone has a hexagon head, over which the locking member moves longitudinally, by the use of a socket key inserted over the diamond shaped shifting pin. The inside end of the shifting pin operates cam-like in the slot in the hexagon cone head and is held securely, either locked or unlocked, by a flat spring which prevents movement. Unlimited key shapes are provided.

BUY YOUR 1916 MOTOR NOW; HIGHER PRICES MAY COME SOON, MANUFACTURERS ADMIT

Producers Are Striving to Maintain Present Schedules, and Hope to Be Successful, But State That Continued Shortage of Material With Increasing Cost of Labor May Force Advances—All Motorcycle Factories Feel the Pressure and the Situation Is Being Studied Calmly

MANUFACTURERS DISCUSS OUTLOOK CONFIDENTLY AND STATE THEIR POSITIONS

"BUY NOW" is the keynote of the motorcycle situation, so far as prospective advances are concerned, according to statements obtained from eight manufacturers by **Motor Cycle Illustrated** and information gathered less formally throughout the field. Aside from the Indian Motorcycle Company, which announced an increase of $30 in the price of its models in the January 20 issue of normal, no manufacturer is ready at this time to put into effect a new price list, but almost without exception the factory officials admit that such action may become necessary in the near future.

Besides the shortage of material, with increased incidental costs, and the assured rates for labor, have made themselves felt in motorcycle factories and in several instances it is stated that the necessity of increasing the list prices of machines has been under consideration for some time. Needless to state, the manufacturers are striving by every means within their reach to avoid revising their prices, but point out that increases will be absolutely necessary unless there is an early and material improvement in labor conditions in the markets for materials used in motorcycle construction.

Pope Advance Is Possible

Replying to the inquiry of **Motor Cycle Illustrated**, Secretary J. P. Fogarty, of Westfield Manufacturing Company, Westfield, Mass., states that the matter of a possible advance in price to meet abnormal manufacturing conditions has been given serious consideration by the company of late.

"We have finally decided," says Secretary Fogarty, "that on the allotments of our various Pope motorcycle models that are now going through the factory, and for which material was bought during the early spring months at normal prices, there will be no advance.

"Should it be necessary to put through additional allotments, which we will probably have to do, judging from the number of orders booked since the New York Show, our selling prices will of necessity have to be advanced. Based on the advanced labor costs and present prices for material, such advance would amount to at least 10 per cent."

The Cleveland Situation

Secretary W. S. Quinlan, of the Cleveland Motorcycle Manufacturing Company, Cleveland, O., gave the following interesting reply to **Motor Cycle Illustrated's** inquiry concerning the possibility of a change in the Cleveland price:

"We have not given the question of advance in list prices of our machine any consideration, as our entire efforts have been devoted to the production end of the business, and we are very pleased to say that machines are coming through in good shape, and we are securing very satisfactory reports from all parts of the country on the performance of the machine.

"In territories where contracts have been made for a modest quantity of machines, we have already received specifications for shipment in excess of quantities that were supposed to cover demand for the entire year. As an example, we closed up with one concern for twenty-one machines, and already have an order for a carload from this company for shipment just as soon as we can get the goods out.

"It is our sincere hope that in spite of the extreme advances that have taken place on almost all materials entering into the manufacture of machines, we will be able to maintain our present list price, by producing a comparatively large number during this, our first year.

"It is becoming more difficult daily to secure certain materials and premiums seem to be in order. If this condition continues it will be impossible to produce as many machines as we are equipped for, but we are hoping this condition will improve."

Excelsior Factory "Stands Pat"

"For the present we shall stand pat," says Sales Manager Fred B. Mathis, of the Excelsior Motor Manufacturing & Supply Company, Chicago, "leaving our prices as they are and thus giving our friends the advantage of our unusually large purchasing power.

"On the other hand, if our material costs continue to soar as they have, we will undoubtedly be compelled to advance our prices a little later on.

"This means that Excelsior prices are subject to change without notice.

"Our suggestion is to buy now."

No Indian Raise Expected

While stating that the situation is at present well in hand, owing to purchases of large quantities of material when prices were normal, or nearly so, the Hendee Mfg. Co. places emphasis upon the seriousness of the shortage in materials and states that "it will take a prophet to tell what tomorrow will bring forth."

F. J. Weschler, treasurer and sales manager of the company, outlines the position of the Indian manufacturers as follows:

"We contracted over twelve months ago for all materials in connection with the manufacture of 1916 Indian motorcycles;

Digitized by Google

in consequence, our materials are being purchased generally at lower figures than the market, and so far as we can see at the present moment there will be no advance in the prices of 1916 Indian motorcycles.

"We believe it would be impossible for any manufacturer to say today that there will not be an advance, because the question of delivery of materials today is almost as important a factor as the price. Oftentimes deliveries from the regular source are not sufficiently prompt to keep the factory going, with the result that we must get material elsewhere, at a considerable advance in price and oftentimes paying premiums on top of that.

"The material situation has become more acute each day, and it will take a prophet to tell what tomorrow will bring forth.

"Wages have also advanced over the wages of a year ago, but we are happy to say that this was a known quantity at the time our 1916 prices were established, consequently there will be no influence from that direction."

No Militaire Raise at Present

President N. R. Sinclair, of the Militaire Autocycle Company, of Buffalo, states that "for the present this company is not seriously considering raising the list price of the Militaire."

"On the other hand," continued President Sinclair, "it is quite true that the cost of material has gone up quite rapidly within the last few months, and I would not care to state positively that we will not be under the necessity of slightly increasing the price of the Militaire before 1916 is over."

Manager Huffman's Statement

Manager H. M. Huffman, of the Cycle Department of the Davis Sewing Machine Company, Dayton, O., states that the company "has given no consideration to an increase in the price of the Dayton motorcycles during the present season."

"It is true," says Mr. Huffman, "that there is an increased production cost, but for the present at least we will make no change in our prices."

R-S Decision Is Pending

From Assistant Treasurer Theurer, of the Reading Standard Company, Inc., Reading, Pa., comes the reply that this company "has not as yet decided to increase its list prices. Of course, if material continues to advance in price something must be done to offset the increased cost of production. We have given the matter some consideration since the situation was brought home to us by the abnormal conditions existing, but no definite decision has been reached."

Miami Co. Considering the Problem

James A. Ash, secretary and manager of sales of the Miami Cycle & Manufacturing Company, Middletown, O., made the following statement concerning the likelihood of an increase in the Miami schedule of prices:

"It is indeed true that with the present cost of material and labor an advance is very essential and should be made, and w have the matter under consideration at th present time."

Can't Promise for the Future

No advance is contemplated at this tim in the price of Iver Johnson motorcycle according to a statement from the factor

"Of course it is quite uncertain what w happen several months hence," writes Lovell Johnson, of the company, "conside ing that there is a continual change of co ditions throughout the country."

HARDEN ENTHUSIASTIC OVER COAST OUTLOO

Westfield Sales Manager, Now on His Way East Again, Says Carlo Orders for Pope Machines are Quite Common

"SHIPMENTS of Pope motorcycles to the Pacific Coast will be in carload lots this year," said Sales Manager L. D. Harden, of the Westfield, Mfg. Co., on leaving Los Angeles for his trip back East, via Salt Lake City. While in southern California Sales Manager Harden closed the contract by which C. L. Smith will continue to handle the Pope in the southern part of the State. Mr. Harden says Smith is enthusiastic over the new Pope 3-speed model, which sells on the coast for $290, and that the new features and improvements incorporated in this model are fully up Mr. Smith's expectations.

Many dealers have placed their ord for the 1916 models, a stock of which v leave the factory the last of January. Harden reports an increase over last y in sales of the Pope lightweight, wh sells on the coast for $160. He repo that the factory has orders at the pres time for five carloads of bicycles for t ritory west of the Rockies for immedi shipment. Pope business on the Coast surely good and improving every day.

PREST-O-LITE SUES SUNLITE COMPANY

Pioneer Gas Tank Firm Seeks Injunction Restraining Defendant Concern From Alleged Misuse of Prest-O-Lite Containers

INDIANAPOLIS, Ind.—Charging unfair and fraudulent competition, the Prest-O-Lite Company, of this city, has filed a suit in the United States District Court for the District of Indiana, against the Sunlite Company, of Indianapolis, and its president, O. K. Smart. The complaint states that the Sunlite firm is operating a plant in Indianapolis for refilling acetylene gas tanks and that such tanks so refilled are sold under the Prest-O-Lite label and trademark and that Sunlite goods are sold to Prest-O-Lite customers as Prest-O-Lite goods.

A further charge is made by the plaintiffs that the Sunlite company is engaged in the sale of apparatus to others for the purpose of enabling them to engage in similar unfair competition and is representing to prospective purchasers of such apparatus that the business is a fair and lawful one. The Prest-O-Lite Company asks for an injunction to restrain the Sunlite firm from continuing to engage in unfair practices and to restrain the defendants from selling apparatus to others to enable them to engage in unfair competition and to restrain the defendants from selling apparatus to others to enable them to engage in unfair competition

MOTORCYCLE ACCESSORIES SHOWN AT CHICAGO

Many Interesting Offerings for the Power Two-Wheeler Are Effectively Displayed in Annual Automobile Show at the Coliseum and Motorcycle Visitors Are Numerous

CHICAGO, Ill., Jan. 24.—Motorcycle accessories are playing an important part in the 1916 automobile show, which opened in the Coliseum and First Regiment Armory on January 22. The balcony of the Coliseum and Annex, and the Greer Building are well provided with exhibits of accessories suitable for both motorcycle and automobile, as well as many articles exclusively for the power two-wheeler.

B. & L. AUTO LAMP CO.

The B. & L. Auto Lamp Co., of New York, is showing a complete line of headlights, spot lights and tail lamps, in both black and nickel finishes. Lamps for sidecar use are also displayed and the line includes those for acetylene and electric lighting.

BADGER BRASS CO.

The Badger Brass Mfg. Co., Kenosha, Wis., is featuring its double-bulb type of electric headlight under its well-known "Solar" trade-mark. The exhibit includes sidecar and tail lights as well as the old reliable "Solar" bicycle lamps, well-known since the advent of the safety bicycle.

STEVENS & CO.

Samson inner tube repair kits are featured at the stand of Stevens & Co., of New York. The firm's hand vise, grease guns, speedometer lights, and extensive line of small tools are also on display, as well as automobile novelties.

SPLITDORF ELECTRICAL CO.

Dixie magnetos in models for single, twin and four cylinder motors, and the Splitdorf Mag-Dynamo are the main features at the stand of the Splitdorf Electrical Company, of Newark, N. J. The various types of Splitdorf spark plug are also shown as well as the ammeters and fuses used in connection with the firm's motorcycle electric system.

GEMCO MFG. CO.

The Gemco Mfg. Co., of Milwaukee, Wis., is showing tire tools, one-hand wrenches, lamps and brackets. These goods are well adapted for motorcycle service.

GARFORD MFG. CO.

Electric and hand-operated horns are the features at the stand of the Garford Manufacturing Company, of Elyria, O. These horns attract the attention of practically every motorcyclist and automobilist who attends the show.

HEINZE ELECTRIC CO.

Heco horns are the main products of interest at the booth of the Heinze Electric Co., of Lowell, Mass. The firm reports that it is several thousand behind in its deliveries of the warning devices.

VEEDER MFG. CO.

Cyclometers for motorcycle and bicycle service in a number of sizes are important features at the interesting exhibit of the Veeder Mfg. Co., of Hartford, Conn. Revolution counters occupy another section of the stand.

SPARKS-WITHINGTON CO.

Sparton hand-operated safety signals in the SM and SF models interest the motorcycle visitor at the stand of the Sparks-Withington Co., of Jackson, Mich. Other models, both electric and hand-operated for automobile service, as shown.

IMPERIAL BRASS MFG. CO.

Dandy tail lights, fitted with shut-offs or regulable from an external control, are shown at the booth of the Imperial Brass Mfg. Co., of Chicago, Ill.

A. R. MOSLER & CO.

Mica motorcycle plugs are attractively displayed at the stand of A. R. Mosler & Co., of Mt. Vernon, N. Y., in addition to an extensive line of platinum electrode, "Spit-Fire" and other spark plugs of which the company is producer.

LOVELL-McCONNELL MFG. CO.

Hand Klaxons, Klaxonets and other mechanical and electrical horns working on the well-known Klaxon principles are shown at the exhibit of the Lovell-McConnell Mfg. Co., of Newark, N. J. The motorcycle horns are supplied with special brackets to attach to any part of the machine.

VOORHEES RUBBER MFG. CO.

Ideal red inner tubes and Model gray tubes for motorcycle service are to be seen at the stand of the Voorhees Rubber Mfg. Co., of Jersey City, N. J. Patches and liners are also on display.

ESSEX RUBBER CO.

Motorcycle inner tubes in different sizes, patches, goggles and a variety of other rubber goods adapted to the use of the motorcyclist are shown at the stand of the Essex Rubber Co., of Trenton, N. J.

This Party Is Made Up of Members of the Dixie M. C., of Roanoke, Va., Who Made a Successful Run While a Recent Snowstorm Was Fresh on the Roads. These Clubsters Are Consistent Riders and Are in the Saddle the Year Round

ELECTRIC STORAGE BATTERY CO.

Exide batteries in type Z, for motorcycle service, are included in the display of the Electric Storage Battery Company, of Philadelphia, Pa. These batteries are used as standard equipment by the Harley-Davidson Motor Co., of Milwaukee, Wis., among others.

C. A. SHALER CO.

Motorcycle Vul-Kits, affording a ready means of vulcanizing tires on the road or in the garage, are specialties at the booth of the C. A. Shaler Co., of Waupun, Wis., maker of electric and other vulcanizers.

PREST-O-LITE CO.

Prest-O-Lite tanks in the regular motorcycle size, with and without regulating device, are on exhibition at the stand of the Prest-O-Lite Co., of Indianapolis, Ind. A sectional view of one tank is displayed, as well as novel means of employing the tanks for inspection work.

JOS. DIXON CRUCIBLE CO.

Graphite and graphite greases form the bulk of the exhibit of the Jos. Dixon Crucible Co., of Jersey City, N. J. The lubricants, all of which incorporate graphite, are shown in a motor-driven gearset to demonstrate their efficiency.

KOKOMO ELECTRIC CO.

Kingston spark plugs, in metric, A. L. A. M. and half-inch sizes for motorcycle and automobile ignition service occupy the stand of the Kokomo Electric Co., of Kokomo, Ind.

AMERICAN BRONZE CO.

...ings and bearings of every description ...tand of the American ...bile a large picture of Bob Perry and his Excelsior machine, in which bearings of this make are used, adds to the attractiveness of the firm's catalog.

DOUBLE FABRIC TIRE CO.

Inner tubes, sleeves, reliners and double-fabric casings make up the display of the Double Fabric Tire Co., of Auburn, Ind.

ROYAL EQUIPMENT CO.

Raybestos brake lining in various widths, as well as clutch discs for drymultiple types are on view at the stand of the Royal Equipment Co., of Bridgeport, Conn. This lining is in widespread use among the standard makes of motorcycle.

BENJAMIN ELECTRIC CO.

Horns, batteries and tool kits shown by the Benjamin Electric Mfg. Co., of Chicago, Ill., are of interest to the motorcyclist.

H. H. FRANKLIN CO.

Die-cast parts such as time-covers, magneto casings and worm-drive housings are to be seen at the stand of the H. H. Franklin Mfg. Co., of Syracuse, N. Y. Bearings of various kinds adapted to motorcycle service are likewise shown.

VACUUM OIL CO.

Mobil oils and greases, gear greases and other lubricants in the "Gargoyle" line are to be seen at the stand of the Vacuum Oil Co., of Rochester, N. Y. An interesting feature is a series of lubrication charts illustrating the systems employed by various makers.

C. O. TINGLEY & CO.

Tire sleeves, inside and outside blow-out patches, cements and fillers bearing the "C. O. T." mark are to be seen at the stand of Charles O. Tingley & Co., of Rahway, N. J.

A. W. HARRIS OIL CO.

Oils for every model of motorcycle on the market, as well as greases are displayed on the stand of the A. W. Harris Oil Co., of Providence, R. I. Special lubricants for gearsets both new and with worn bearings are shown here.

VAN CLEEF AND ATLAS FIRMS AT ARMORY SHOW

CHICAGO, Ill., Jan. 24.—Van Cleef Brothers, makers of Dutch brand cements and other goods, and the Atlas Specialty Co., producing leggings, gloves and leather articles, are exhibiting at the automobile show in the First Regiment Armory this week. Both firms have their headquarters in Chicago and are well known in the motorcycle trade. Their exhibits have been centers of interest since the doors of the exhibition were opened.

At the Van Cleef stand, attention is attracted to the Dutch girl, dressed in her native costume, and representing the Dutch brand of goods put out by the company. In charge of the exhibit was President Noah Van Cleef, assisted by Paul Van Cleef, factory manager; Felix Van Cleef, expert chemist, and Maxime Van Cleef, traveling representative.

The Atlas Specialty Co. is featuring motorcycle leather goods such as leggings, gloves, skirt guards, handlebar muffs and other comfort-making apparel for the rider. C. J. Wollheim is in charge, assisted by an excellent staff of demonstrators.

WHEELING CLUB TO RIDE TO ATLANTIC CITY

WHEELING, W. Va., Jan. 24.—At the meeting of the Wheeling Motorcycle Club which was held last week plans for the 1916 season were fully discussed. Among the more important features of the program are a club ride to Atlantic City next summer and an endurance run, which will be staked under the auspices of the *Wheeling Register* in June, that journal having promised to donate all the prizes. A deposit box has been procured from one of the local banks in which each member can put a small sum from week to week, receiving credit each time from the treasurer; in that way the riders will be able to store up quite a bit of money for the Atlantic City ride, without feeling the pressure on their pocketbooks.

TAIL LAMPS ARE NECESSARY SAYS ATLANTA CHIEF

ATLANTA, Ga.—Chief Mayo, of the local police department, announces that he will hereafter enforce the city's new traffic ordinance, especially with regard to tail lamps. Until last week, the Chief did not put the ordinance in force as regards motorcyclists, he states, in order to give them plenty of time to purchase tail lamps and put them on, and also by reason of dealers in this city not having tail lights in stock. Knowing that these lamps are now obtainable, the Chief states that any rider now found minus a tail lamp will be liable to arrest.

The traffic ordinance has been enforced as regards automobiles up to the present time, but nothing was done as regards the power two-wheeler. A heavy fine is inflicted for violations.

"PREXY" GRIER ENTERTAINED

MILWAUKEE, Wis., Jan. 24.—Charlie Grier's stag party was a big success and one of the crowning social events of the Milwaukee Motorcycle Club. Grier is president of the club, and back in December, when the atmosphere was roseate with holiday spirit, Prexy Grier proposed to the club members that he would provide the necessary fluid and other refreshments for a stag party at his expense if $50 in dues were forthcoming before January 15.

The dues rolled in so fast that Charlie's head began to swim, and more than a week before the date specified, Treasurer Martin has the necessary $50 and then some. Speeches by Arthur Davidson and J. J. Hegeman and some alleged singing by an improvised quartette furnished most of the entertainment. Friend Arthur speaks well in Swedish and Yiddish, and Hegeman makes one suspicious of his antecedents by his clever Irish impersonations.

INDIAN RIDER CONQUERS STEEP GRADE NEAR FRESNO

SAN FRANCISCO, Cal., Jan. 22.—An annual hill climbing feat was recently accomplished by George Wood, of Fresno, when with a tandem passenger he ascended the Old Toll House Grade, 42 miles northeast of that city, on a 1916 Powerplus Indian, in very fast time. That the feat was really something out of the ordinary can be gathered from the fact that this grade is two and a half miles long and rises 2,500 feet above the level of the surrounding country.

"Quite recently," said Wood, commenting on the climb, "I went up the hill alone, but I had some doubt as to whether I could make the grade with a tandem passenger. I was willing to try—and success crowned the effort. However, I must give a great deal of credit not only to the power of the new Indian, but also to the Black Safety Tread Tires, which J. H. Rodda, traveling representative of the B. F. Goodrich company, advised me to use in the climb.

"The Indian just straightened out those curves," continued Wood, who, with Mr. Ray, has the subagency for the Indian in Fresno, "and the way we went up that hill would make you hold your breath. One of the boys was to take a photo of us on the grapevine turn while going up, but all he could get was a blur of wheels. After we got up the grade we continued on past the snow line and I took a picture of the party that witnessed the climb. My tandem passenger was Wesley Sullivan, and he sure has some pluck!"

MANY BUYERS KEPT GIRTON-HOFFER MEN HUSTLING

LOS ANGELES, Cal.—A rush of customers kept all hands busy at the store of the Girton-Hoffer Company, recently, and during working hours it was hard for anyone to get loose for a moment. Otto Kupfer, of the sales department made a number of attempts to get through the front door to make a minor purchase from one of the other stores, but it was only after about one hour and a half that he succeeded. The last hindrance to Kupfer's exit was a chap with $35 cash looking for a bicycle, and after taking the money and giving the customer the mount, Otto got into the open air. The many customers wanted bicycles and second-hand motorcycles for the most part, but there was a fine demand for new Excelsiors.

HENDERSON BRANCH THRIVING

LOS ANGELES, Cal., Jan. 24.—The Henderson branch in Los Angeles is reporting rapid headway in establishing dealers on the Pacific coast. "We are ..." said Sales Manager Hugh A. ... of the oldest deal... shows the ... on the coast. In a few months we expect to have one of the best sales organizations. Everything indicates that the Henderson dealers are going to have a splendid year."

STEWART-WARNER MOVES

SEATTLE, Wash.—The Stewart-Warner Speedometer Corporation has moved its station in this city to 1710 Broadway and Thomas M. Hart is now the manager. A chain of service stations has recently been established along the Coast. The Seattle station is run under the name of the Stewart Products Service Station.

PARK BILL POPULAR

SPOKANE, Wash.—Local motorcyclists are much interested in the bill to be introduced into Congress making Mount Spokane a national park. The mountain is 6,000 feet above sea level and good roads radiate from it in all directions. It has for some time been the Mecca for Eastern Washington and Northern Idaho riders and automobilists.

JUST GOT HIS SIXTH

TACOMA, Wash.—C. J. Embree, salesman for Albers Brothers, this city, has just purchased his sixth Indian twin.

NEATEST TACOMA RIDER

TACOMA, Wash.—G. W. Kelly, who rides a Harley-Davidson, is easily at the head of neat riders in this section. Most of the time Kelly is busy balancing accounts for F. T. Crowe & Co., yet he finds time to cover many miles of roads in Pierce county and keep his machine and himself looking spick and span.

LONG TOUR WITH SIDECAR

LOS ANGELES, Cal.—Chem Bird is getting together road dope these days, as he is planning a tour to Chicago with his wife. Bird will use his Henderson and carry "The Madam" in the sidecar.

TEACHER JOINS THE RANKS

THE FULLER CYCLE & SUPPLY CO. is demonstrating the 1916 Henderson these days and working up a most desirable class of customers. One of the first orders for the new four-cylinder types was that of Ben Gabriel, a teacher at the Whitman School.

LAMBERT WITH GLASGOW

W. P. GLASGOW, Harley-Davidson man in Tacoma, has placed Jack Lambert in charge of his service department.

NEW JERSEY RUN TO BE 24-HOUR AFFAIR

Annual Endurance Test to Cover About 400 Miles in Day and Night Riding and Have Six Classes

NEWARK, N. J., Jan. 19.—The ninth annual endurance run of the New Jersey M. C. of this city will be held on May 31 this year. It will be a 24-hour affair covering 400 miles in all, and will be confined to roads in New Jersey. The course under consideration will cover 175 miles during the night at a 20-mile schedule and about 200 miles in the daytime at a 22-mile schedule.

There will be six classes of contestants: amateur solo, professional solo, amateur sidecar, professional sidecar and amateur and professional lightweight riders. Secret checking will not be used to any considerable extent and if the committee in charge can evolve another means of eliminating tie-scores that system will be discarded entirely. The route will be well posted and the running directions furnished each competitor so complete that there will be no chance for him to get lost no matter how unfamiliar he may be with the roads. Silver cups and accessory prizes as well as medals will be awarded the high score men.

The New Jersey M. C. introduced the twice-around-the-clock form of run in this country in 1911 and had 50 contestants to cover the 360 miles course. From this it is augured that the Decoration Day affair will be a big success.

AWARD PRIZES FOR MIDNIGHT RUN

TORONTO, Ontario, Jan. 26.—At an enthusiastic meeting of the Toronto Motorcycle Club, held in the club-room on Wednesday night, January 26, the prizes were awarded to the winners of the spectacular midnight run on December 31, the official report of which showed that the following earned perfect scores in the terrific struggle of forty-five miles: Walter Andrews, Harley-Davidson; Wilfrid Morrison, Harley-Davidson; L. K. Brown, Harley-Davidson; C. McDonald, Excelsior, and A. Shuttleworth on a Jefferson.

WILL NOT CHANGE ONTARIO LICENSE FEE

TORONTO, Ontario, Jan. 24.—Ontario Government officials are now entertaining no notion, it is declared, of raising the annual license fee for the use of a motorcycle within the borders of the Province of Ontario, although they are preparing to raise the license fees for automobiles.

Through recently enacted legislation, Ontario now has a Provincial Highways Department and all fees from the 4,200 motorcyclists in the Province go to this department for the improvement of roads. The total revenue from Ontario riders last year was about $12,000.

There has been no rush on the part of Ontario riders for 1916 license number plates because the motorcyclists are allowed until February 1 to take out new cards.

WESTING GOODS GOING WELL

LOUISVILLE, Ky.—F. H. Hassler, representing the G. H. Westing Co., of Indianapolis, Ind., in Kentucky, has just finished a round of the local motorcycle dealers. He reports an excellent demand for motorcycle and bicycle sundries throughout the State and also in Indiana.

THE WESTFIELD POLICY

WESTFIELD, Mass.—One of the latest additions to the literature issued by the Westfield Mfg. Co., makers of Pope products, is the card shown above. It indicates that courtesy is a predominating feature in Westfield policy.

CANADIAN TRADE REPORT

Despite the fact that the war is having a more or less depressing effect upon the Canadian people, buoyant prosperity is indicated by the November statement of Canadian trade. This reached a total of $154,000,000 as against $126,000,000 in the corresponding month of last year. Exports totalled $92,000,000 and imports $45,000,000. For the eight months of the fiscal year Canadian trade totalled $863,000,000 as against $767,000,000 in the corresponding period of 1914.

HE'LL SOON FILL IT

PEES ENTHUSIASTIC OVER AMERICAN TRIP

PALMERSTON NORTH, N. Z.—E. S. Pees, well known as an importer of motorcycles and other motor vehicles, has just returned from an extended trip through North America and is enthusiastic over what he saw and did there. In a recent letter to the Manawatu *Evening Standard*, Mr. Pees commented upon the jitneys which he found in all the large cities of the United States, and also upon the huge number of motor cars which he saw on Michigan avenue, Chicago, and Fifth avenue, New York. He suggested that a jitney service could be established to good effect in this city.

In regard to motorcycles and bicycles, Mr. Pees was surprised to find large contracts for these vehicles for the Russian, British and French governments in addition to other goods in which prior to the war these countries had almost a monopoly of the trade. From a commercial viewpoint, he found his trip very satisfactory, having secure a number of valuable agencies.

INTERSTATE ELECTS AT STORMY SESSION

TOLEDO, Ohio, Jan. 24.—The Interstate Racing Association's annual meeting, held here last week, was a stormy affair, owing to the steam-roller method of electing which was employed by the local men. Stockholders from Indiana and Michigan, who attended the gathering, failed to elect a single officer and only succeeded in securing two representatives on the board of nine directors.

About sixty per cent. of the total stock is owned by Toledo men, who found it an easy matter to put their favorites into office.

The following men were elected: President, W. G. McBree; vice-president, C. W. Quetschke; secretary, J. W. Siler; treasurer, F. W. Robinson; auditor, F. J. Kessler; referee, Ed. Ehlinger, and property man, H. Dimke.

Although the Interstate Association promoted numerous race meets during the past season, the year was not a big financial success, the promoters just about pulling out even. Tentative plans for next season's racing were made by the company, calling for the opening meet as soon as the weather permits.

ANOTHER BUILDING FOR STEEL PRODUCTS CO.

CLEVELAND, O.—Work has been started on an addition to the plant of the Steel Products Co., maker of valves for motorcycle and other vehicle motors. The addition is to be devoted to grinding and is to be constructed with special reinforcement to prevent vibration. It will be four stories high, will measure 126 x 90 feet and will be in L-shape to provide for subsequent enlargement. Full fireproof construction will be used throughout.

This latest unit is but one of several which have been erected from time to time during the past year by the firm. The previous additions included hot shops, heat treating rooms with single-unit furnaces and shops with hydraulic press equipment. The Steel Products Co. was formerly the Electric Welding Products Company.

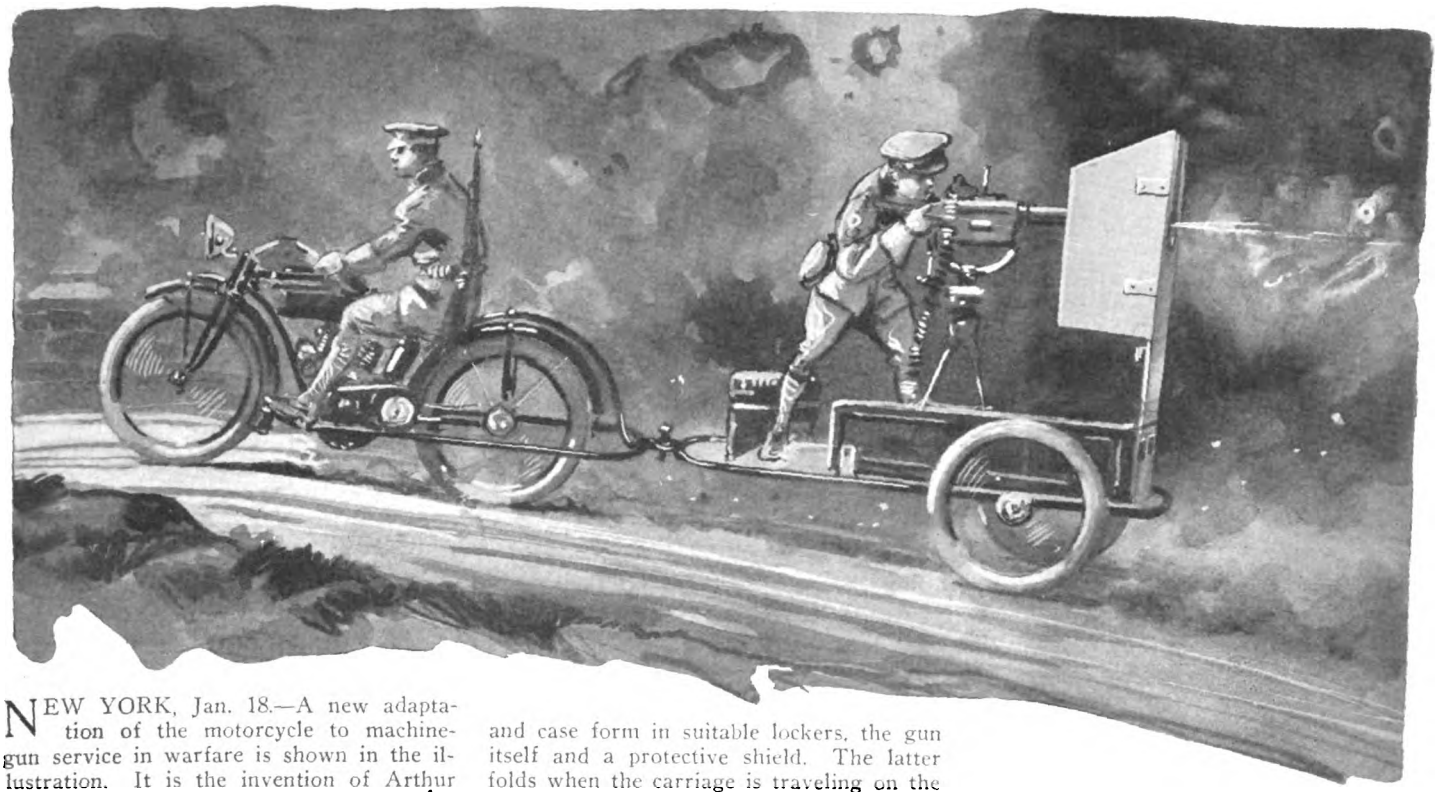
INGENIOUS NEW FIGHTING UNIT DESIGNED BY ARTHUR CHAPPLE



NEW YORK, Jan. 18.—A new adaptation of the motorcycle to machine-gun service in warfare is shown in the illustration. It is the invention of Arthur Chapple, well known as a veteran track and road rider in this country, and the details have been carefully worked out to fit it to American as well as European military conditions.

The device consists of a special frame fitted to the motorcycle and a chassis or carriage with footboards for transporting the machine-gun. The frame on the motorcycle is such that the machine-gun chassis can be quickly attached to either side or detached as readily, the side positions being the normal ones for travel. The chassis may also be towed by the motorcycle, attaching to the rear end of the special frame by suitable means. In this position a retiring action can be fought, and it is such an action that is pictured above.

The machine-gun chassis is made to transport the gunner, ammunition in belt and case form in suitable lockers, the gun itself and a protective shield. The latter folds when the carriage is traveling on the road. Side-shields are used to protect the gunner from oblique fire. The carriage wheels are removable, so that when the carriage is attached to the side of the motorcycle, one wheel is carried on a special fitting as a spare. When used as a trailer both carriage wheels are fitted in place.

The machine-gun is tripod-mounted to give an all-around fire or to be used when removed from the carriage. The present European war has demonstrated the desirability of having the gun removable from the carriage for use in restricted spaces, such as underbrush, etc.

Chapple is dickering with representatives of several European war departments with regard to the adoption of his outfit. These representatives have been ungrudging in their praise of its design and adaptability to present war conditions.

LIGHTWEIGHT MACHINES INVADE WASHINGTON

Nearly all Makes of Lightweights are Being Represented in the Capital City; Dealers are Enthusiastic Over Prospects

WASHINGTON, D. C., Jan. 24.—The long awaited invasion of Washington by the new lightweight motorcycle has come and taken the city by storm. First of the new arrivals was the Cleveland lightweight, which is being handled by a new firm, Seebley & Hines, located at 1006 H street. Mr. Hines was formerly the local agent for the Schickel and is thoroughly familiar with the two stroke motors of the type used in most of the lightweights this year. He has already disposed of several Clevelands and considers the outlook bright because of the well-kept streets in and about Washington and the fact that many of the government employees come in from the suburbs daily.

A few days ago the local branch of the Haverford Cycle Co. received their initial shipment of the new Excesior lightweights. They immediately placed one of the machines in the window and it certainly drew the crowds. Numerous comments were heard on the sturdy appearance of the little machine, and many of the spectators expressed surprise at the low price. Chas. H. Cross, manager of the local branch, is more than pleased at the enthusiasm aroused by the Excelsior lightweight and believes that his allotment of 100 machines will be gone in a few months. W. F. Throop, head of the Haverford motorcycle department, has already over 25 appointments for demonstrations and at this writing he said that he would book no more for another week until he catches up.

Harry F. Seamark, agent for the Miami Power Bicycle, has received his 1916 models and has completed arrangements with Frank Hazelton, who has a fine store at corner Ninth and I streets, to act as sub-agent for the machine. Mr. Hazelton will handle nothing but lightweights in his motorcycle department, having already built up a promising trade during the past season as agent for the Smith Motor Wheel. Seamark has contracted for 200 Miami Power Bicycles for the new season and says that he has already sold more than 10 per cent. of this allotment. He will concentrate his selling forces on the lightweight this year, for he believes that the low price and extremely small upkeep cost of the lightweight will appeal to a large number of prospects.

Cyclemotor Is Popular

The Acme Bicycle & Supply Co., located at 1749 Pennsylvania avenue, which has the agency for the Cyclemotor, reports numerous applications for catalogues describing the bicycle motor attachment. They are putting out several of the attachments each week and in most cases sell the complete outfit of bicycle and motor, thereby boosting the sale of high-grade bicycles. J. B. Shaw, the proprietor, states that he expects to sell about one hundred of the outfits in 1916.

When August Zimmerman, of the local Harley-Davidson agency, was approached on the lightweight situation, he stated that he had no difficulty in meeting the demand for lightweights with the regular Harley-Davidson single cylinder model, which he is now featuring.

The Neutral Motorcycle Garage, Dayton agent, is eagerly awaiting the first shipment of the Dayton lightweight. Samuel McPherson, the owner of the garage, expects to push the sale of these machines during 1916, and with the large following he has among Washington riders McPherson believes that he will sell a good number of the lightweights.

THE MAN BEHIND NONPAREIL HORNS

THIRD IN A SERIES OF BREEZY SKETCHES CONCERNING TRADE LEADERS

A Wide Knowledge of Men and Trade Conditions, Combined with Natural Business Sagacity and an Inherent Disposition to Hustle, Has Brought President Carl Kaufman, of the Nonpareil Horn Manufacturing Company Steadily to the Front

"DON'T say much about me," was the characteristic reply of Carl Kaufman, President of the Nonpareil Horn Manufacturing Company, New York, when told by a representative of **Motor Cycle Illustrated** that he was to be interviewed for an article on his personal business career. And it will hardly be necessary to disobey this injunction inasmuch as the reader can form a pretty accurate estimate of the man from the achievements credited to him.

Let us only say that Mr. Kaufman possesses the excellently combined qualities of vitality, energy, breadth of mind and vision and a goodly amount of business acumen. Graduating from the public schools of Germany, Mr. Kaufman entered the Stuttgart Technology Institute from which he received his diploma. His early business experience led him to the far East where he studied carefully business conditions, and where he made innumerable business friends. In India alone, he spent five years. Many Americans were among the number of friends made by Kaufman during his sojourn in the East, and it was due to their importuning that he finally decided to visit America, to see for himself how accurately drawn were the word pictures of his Yankee friends. He came, he saw—and remained, not only to conqer all obstacles in the way of his business success, but also to enjoy the fruits of his efforts.

A Bicycle Enthusiast

Soon after his arrival and connection with an American firm, Mr. Kaufman went to North Carolina and there had opportunity of studying and learning the characteristics of the Southerner and his business methods. From the South he went West to Kansas, and here again made careful analysis of western men and western business conditions. His next jump was back to the East where he decided to settle permanently.

The bicycle early claimed Mr. Kaufman's attention, but from its sport-producing qualities and from its sales possibilities. He became an ardent devotee of the two-wheeler and entered and finished many a century run with the boys. For twenty years Mr. Kaufman has been identified with the bicycle industry, becoming, however, actively interested in the automobile and motorcycle industries as they came into being.

In 1903 he founded the Motor Car Equipment Company, whose size and business status is so well known as to need no mention here. For eleven years Mr. Kaufman acted as general manager, relinquishing this position to become President of the Nonpareil Horn Manufacturing Company.

From his first-hand knowledge of human nature, obtained both in the far East, Europe and America, from his wide experience of export conditions and by reason of his large number of business friends, both here and abroad and his thoroughly-American business activity and sagacity, it will be readily apparent why Mr. Kaufman has so ably succeeded in his business ventures. On national politics and international politics Mr. Kaufman's observations show a keen analysis of the situations. Though a great and careful reader of the newspapers, he forms his own opinions on the various important topics of the day.

CARL KAUFMAN
Next to Breaking Sales Records He Enjoys Playing Pinochle

In spite of the many demands made upon his time by his business, Mr. Kaufman is very active in Masonic work. In fact, he is a thirty-second degree Mason. Mr. Kaufman is married and has one little girl and is a lover and deeply interested observer of children.

"What is my hobby?" said Mr. Kaufman, while his face wreathed in smiles—"pinochle"; and by the way, this is an American game—not German, as is commonly thought; pinochle is scarcely known to Germany at all, your American game of poker or bluff, as it is called there, being universally played."

In general Mr. Kaufman views the business outlook in the motorcycle and bicycle trades optimistically. "Of course, shortage of raw material is a serious handicap," says Mr. Kaufman.

REPRESENTS BIG FRENCH DEVELOPMENT CONCERN

CLEVELAND, O.—Arrangements have been completed by which the Factory Appliance Company, Illuminating Building, this city, will have charge of all American purchases of the Consortium d'Importateurs et Exportateurs, of Paris, France. The Consortium is the commercial department of the Banque Mutuelle d'Etudie, 8-10 rue Nouvelle, Paris. It is capitalized at 2,000,000 francs.

The Consortium is interested in motorcycles, tires, magnetos, accessories, etc. Manufacturers desirous of making permanent business connections in France are advised to get in touch with the Factory Appliance Co.

20TH CENTURY CO. HAS LINE OF ACETYLENE BURNERS

NEW YORK, Jan. 22.—The 20th Century Manufacturing Company, of 41 Warren street, is now handling acetylene burners for all kinds of motorcycle and automobile lamps. These burners will fit any make of European or domestic lamp. The burners are in addition to the firm's extensive line of lamps for motor vehicles, bicycles and horsed-vehicles.

GASOLINE BY NEW PROCESS

BALD HILL, Okla.—Gasoline is to be made from "casing-head gas" in the near future by the Twin Hills Gasoline Co., which has just been incorporated with $125,000 capital. This gas comes from oil wells and is usually allowed to escape unused. A plant capable of handling 1,500,000 cubic feet of gas daily is to be erected and a daily output of 3,750 gallons of gasoline is looked for.

RUSHING WORK ON PLANTS

AKRON, O.—The new plants of the Goodyear Tire & Rubber Company, in this city, are rapidly nearing completion. When ready for service, the daily capacity will be 20,000 automobile tires.

JOHNS-MANVILLE SPEEDOMETER

NEW YORK.—The H. W. Johns-Manville Co., announces that its speedometer is now known as the "Johns-Manville," the name "Jones" having been discontinued.

TEN CANDLES ON OUR BIRTHDAY CAKE

Motor Cycle Illustrated Closes a Busy and Fruitful Decade with This Number—From a Modest Booklet to the Journalistic Pace-maker of Cycledom

TEN years ago, that is, the latter part of January, 1906, appeared the first number of **Motor Cycle Illustrated**. It was a little paper, of hardly pamphlet size. Its front cover, reproduced herewith,

Cover of First Number of Motor Cycle Illustrated, Then a Monthly Journal

showed a photograph of the start of a race, on the Coney Island Boulevard, in Brooklyn, of the Greater New York motorcycle policemen.

The editorial contents were as follows: Introductory to the Trade. Meet of Brockton, Mass., Motorcycle Club. A Motoring Romance (poem by M. Winchester Adams). Use of the Motorcycle in New York State. A Strange Discovery, by L. E. French. Chicago Motorcycle Club on an Outing. William C. Chadeayne on His Record-breaking Trip Across the Continent. Associated Cycling Clubs New Year's Eve Run. The Care of Motorcycle Chains, by Hastings. Power, Speed and Utility of Motorcycles. Queries and Answers. Trade Notes.

Chadeayne's transcontinental trip would hardly be regarded as anything wonderful in these days of Baker and his kind, but it was quite an achievement then. Chadeayne, who was captain of the Buffalo Motorcycle Club, rode from New York to San Francisco on a 1904 model 44 Thomas Auto-Bi in 47 days, 23 hours and 50 minutes.

Among the text illustrations was one showing Oscar Hedstrom and Stanley T. Kellogg, winners of the Mt. Washington Hill Climb; a photograph of R. G. Betts, William Chadeayne and the late George Jenkins; also a picture of Glenn Curtiss, on his "two cylinder racing machine." Twin cylinder machines were then a novelty.

There were nine advertisers, as follows: G. & J. Tire Company, Armac Motor Company, American Motor Company, Jones Speedometer Company, Breeze Carburetor Company, Persons Manufacturing Company, Hastings & Miller, the Corbin Screw Corporation and the Reading Standard Manufacturing Company..

At the time the first issue of **Motor Cycle Illustrated** was published, *The Bicycling World* was already a comparatively old paper and solidly established. For a long time the older journal maintained its lead until, under the editorship of the late Frank Prial, **Motor Cycle Illustrated** began to gain upon its competitor. Mr. Prial in the meantime had converted his journal into a biweekly. It was not until 1914, however, that **Motor Cycle Illustrated** became a weekly, and in February of last year its publishers purchased *The Bicycling World* and combined the two journals.

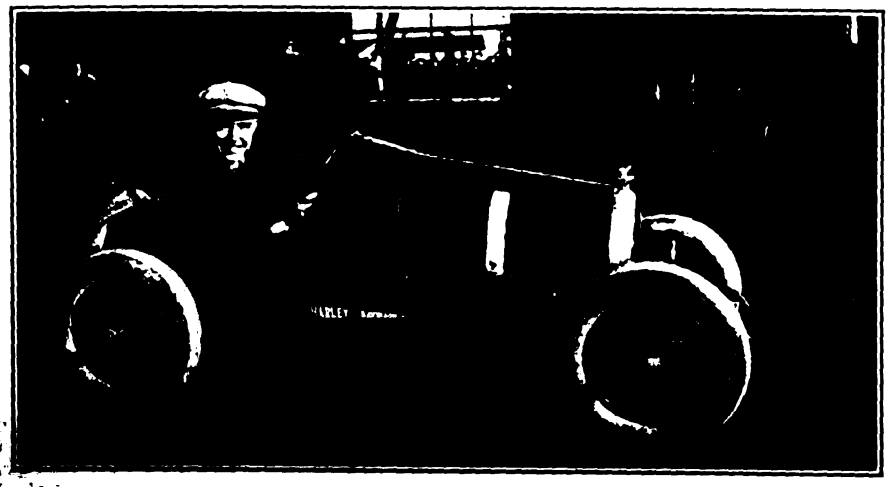
This is, in brief, the history of ten years' progress of the oldest American motorcycle journal, with which is now incorporated the oldest American bicycle journal, a combination which has not only found favor with the American industry, but has also succeeded in the recent past in making its influence felt throughout the entire cycling world.

Specimen Page from Recent Spanish Export Number of Motor Cycle Illustrated

HARLEY-DAVIDSON MOTOR IN NOVEL CAR

SAN FRANCISCO, Cal.— Art Smith, the aviator who thrilled thousands during the Panama-Pacific Exposition, has placed an order with Maggini & Perkins, for ten baby racing automobiles, each of which is to be fitted with a Harley-Davidson twin motor, three-speed gearset and clutch. The order is being filled as rapidly as possible.

Each car is to have a different hood made to resemble some well-known big racing car. The illustration shows one of them outside of Maggini & Perkins Harley-Davidson agency in this city. Smith will race these little speedsters in connection with his flight exhibition throughout the country during the coming season, the plan being to use the little machines in racing contests to draw the crowds inside the grounds.



Art Smith in One of the Baby Racing Cars Outside His Hangar

HENDERSON DISTRIBUTOR FOR MILAN, ITALY

MILAN, Italy, Jan. 18.—Vincenzo Lanfrancki, of this city, has just closed contracts whereby he gains the distributing rights for the four-cylinder Henderson motorcycle in this territory. Mr. Lanfrancki has had very wide experience in the motorcycle business in Italy and has business connections in all the principal cities of the country.

He believes that the outlook for business in 1916 is exceptionally good, as the demand for high grade motorcycles has become very strong in this country and the English and German factories, which formerly supplied machines, are no longer able to furnish motorcycles.

Mr. Lanfrancki predicts that the foothold which American motorcycles are gaining in Italy at the present time will not be effected when the English and German factories resume operations after the war.

GETTING READY FOR THAT ENDUR'ANCE RUN

Endurance Affairs Should Comply with the F. A. M. Requirements—What Kind of Course to Select and the Necessity for Keeping a Moderate Pace and Marking the Route Well

By GOSLIN

NOW'S the time for the fellows to gather in the club house, round the comfy old stove, light their glimmies and start talking endurance runs. And when the puffs of blue smoke fill the room and you can hardly see Mike's homely face, we ought to get right down to brass tacks and discuss what kind of an affair an endurance run should be and how we can improve upon those which were held in seasons past.

Make It a Real One

Gee, fellows, if we're going to have something that's to be called an endurance run, make it a real one complying with F. A. M. requirements. Nothing under 300 miles is an endurance contest; yet how the distance has shrunk! Why, last summer they reached the absolute limit. Some boys had gosh darn nerve enough to call a sixty-mile ramble an endurance run. Can you beat it!

Just match that sport spin with the four-day 814-mile Ohio-Pennsylvania F. A. M. affair, or the Los Angeles M. C. two-day 640-mile event in which the contestants rode seventeen hours each day—the biggest portion of the way under a burning sun in a glittering desert. That's the mark to shoot at, boys—maybe not so hard and long, but make the run one of real endurance. Ye gods! to finish a run of that kind, even with a score riddled with penalties, is an honor.

Matching Your Skill and Strength

Yes, and finishing a run of that sort is a mighty fine satisfaction, too. The secret of the fascination which an endurance run holds over you is that old, deep-seated longing to match your skill, cunning and strength against the other fellows—and also against dear old Dame Nature. And gosh, the old dame is some pill at times. Am I right? Sure!

Motorcycling is an outdoor sport and the outdoor man is ever popping with energy. The endurance run is the logical safety valve for that big store of energy. We've just got to have our fling once a year, so on with a good, stiff endurance run—one we can brag of for twelve months at least. You'll not please all the boys in the club by doing so. But think, would all of the bunch compete if you held a set of races on the fair ground's track? Of course they wouldn't. In an endurance run you will need somebody to check and that's where the non-competing members come in handy.

Some Hills and Rough Going

Now when it comes to picking out a course, let's get one that includes hills and rough going—not necessarily Rocky Mountain stuff for the whole distance, but we ought to feed it to the field in small doses. Give them a rough stretch or let them wallow in sand for five or ten miles, then let them have a chance to get their breath again with a nice strip of velvet. After that some more ruts.

We must be sure that the mileage is accurate. Then let's schedule the run at twenty miles per hour and hold it there whether the roads are good, bad or indifferent. Twenty miles doesn't sound hard; but try it once for some distance, add the nervous strain of making your checks on time, and you'll readily agree that the gait is plenty fast enough.

Keep It Down to Twenty

Look at the poor Massachusetts lads who now have a state law prohibiting endurance runs, all because of some speed work on the highways of that state. A big field riding at too fast a pace is going to attract attention—the kind that puts the motorcycle in "Dutch." So keep it down to twenty miles an hour, fellows.

That pace will be more than enough if the run is held on a rainy day, for you surely will pull that big event off regardless of the weather. Remember when we went to Baltimore in 1914 and we rode into a rain belt and out again? When you cross a big stretch of country there is likely to be all sorts of weather. You've got to be willing to tackle inclement weather, for postponing an event always tends to subtract interest from it. Rain or shine—that's us. What did we get those Weed chains for—to hang the mistletoe on the parlor chandelier? And haven't we strapped the oil skin "slicker" on the luggage carrier for use?

Use More Arrows

Let's mark the course well: use twice as many arrows as last year. No one strayed off the course, to be sure, but we ought to be doubly certain this year that no contestant will go astray. I remember one run in 1915 which had an awful mix-up on account of poor marking.

Say what you will about the endurance run not being popular, I'll bet the real kick against them is due to poor management on the part of the promoters. The course is not routed clearly, or the mileage is incorrect, or the checking is not handled with speed and efficiency. All these matters are within the power of the fellows in charge to handle right, but they are often left until the last minute and then they're rushed through in a slap-dash fashion.

The old humdinging endurance run still has many friends, so get busy with your route, rules, maps and prize list. Get your entry blanks out and boost the run: locally in the home newspapers and nationally in the trade journals.

ECONOMY TALK IS TIMELY THESE DAYS

With Gasoline Still Bound Skyward and Tires and Tubes Following Suit the Motorcycle Ranks As An Obvious Money-Saver

By DUDLEY ESSEX

WITH the increase in the cost of gasoline still occupying our thoughts to a considerable extent, now comes a rise in the price of tires and tubes, and unless a motorcyclist is level-headed it may get the impression that the game is becoming rather expensive. If he stops to think a moment, however, he will realize that the motorcycle is still about as economical a vehicle as can be found, considering the returns it gives.

Every cloud has a silver lining, and it ought to cheer us riders somewhat to think of the motor car owner these days. The multi-cylindered cars of this season will make an awful dent in their owners' pocketbooks, with their 8 and 10 miles to the gallon of gas. Whew!

Our lot is easy by comparison. The average motorcycle's gas appetite is only about a gallon for 60-70 miles in solo work, and a gallon to about 45-55 miles in sidecar driving. That is a feature of the motorcycle that is not sufficiently emphasized by manufacturers and dealers. The low running cost for the motorcycle and sidecar combination is a trump card—now more than ever before—and it is not played as it should be. An economy talk these days makes a hit.

Many merchants have turned to the light automobile of late to solve their delivery problems, and these men will soon be worrying over gasoline bills and thinking of some less expensive means of transportation. That's where the motorcycle ought to come in. The country has been drained of horses by the warring nations of Europe, so no help can be expected from that source. Every one must use motors. Besides, very few merchants would be inclined to return to the slower and more costly horse delivery after having used a motor.

If the side-van is a good vehicle for the R. F. D.—and the carriers themselves say it is a winner—it ought to be a jim-dandy proposition for the merchant with a great number of comparatively small packages to deliver. It will give him plenty of speed, and the running cost is bound to be low. Economy talk is timely, all right.

RECORD ATTENDANCE AT CROTONA BALL

BRONX, N. Y.—Motorcyclists and their guests to the number of 300 enjoyed themselves at the fourth annual ball of the Crotona M. C. on January 15. The attendance, which is a record one, included riders from this borough who represented all the clubs in the Bronx M. A., as well as a representative crowd from Manhattan and Westchester County. The dance order consisted of 24 numbers, all of which were run through, in addition to numerous extras. An excellent supper was provided.

Since the first of these balls in 1912, the Crotona M. C. has always come out successfully, both from the social and financial viewpoints, and the large crowd at 1916 affair has added a neat little sum to the treasury of this live Bronx organization.

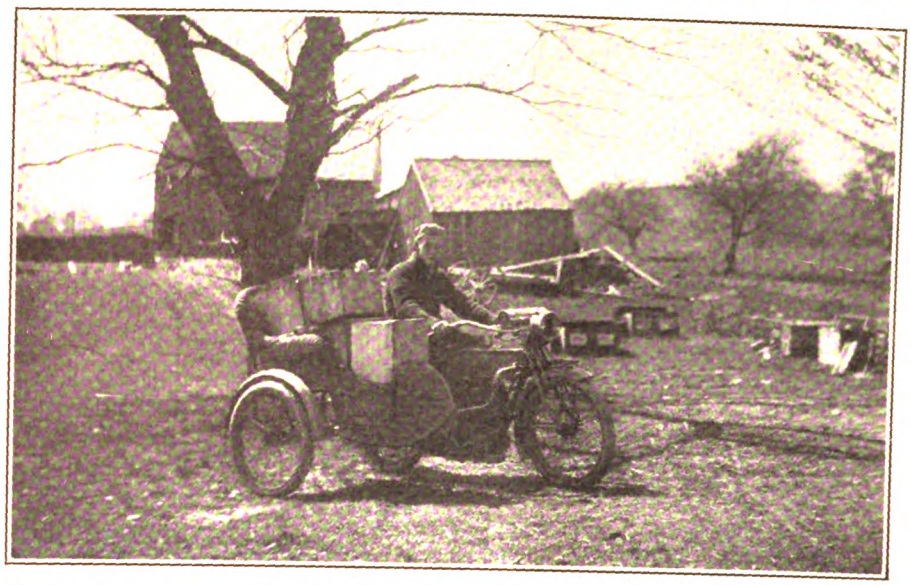
AUDUBON CLUB ELECTS

NEW YORK.—The Audubon M. C., of this city, held its annual election of officers at the recent January meeting. Arthur T. Merrick once more is president and E. P. Gooding has again been re-elected to the vice-presidency. A. L. Smith, former secretary, will continue this office for 1916, while W. H. Enell will succeed himself as treasurer. J. Miller and B. Doherty are directors for the new season. Road officers are W. Stuart, captain, and H. E. Smith and F. P. Cristalle, lieutenants.

MAY HAVE A TRAFFIC COURT

NEW YORK, January 20.—A traffic court has been suggested for this city, Mayor Mitchel, the originator of the plan, is confident that present traffic difficulties will be lessened by the establishment of such a court. The court will be presided over by a special magistrate and will have jurisdiction over all traffic cases.

SHOWING UTILITY OF POPE IN GENERAL FARM SERVICE



No Special Sidecar or Van Attachment Is Needed to Perform a Majority of the Hauling Duties in Connection with the Homestead

BUFFALO CLUB ELECTS NEW OFFICERS

BUFFALO, N. Y., January 25.—The Buffalo M. C. held its annual election of officers with the following results: President, O. H. Peters; vice-president, J. Leuer; secretary-treasurer, Fred Schudt; captain, H. Peters; lieutenant, Ed. Loescher; directors: A. McFarland, A. Rosenthal and A. D. Cook.

President Peters announced that the club would push the formation of a riflemen's corps and is now working on an interesting calendar of motorcycle events. Other forms of outdoor sports and indoor activities will also be fostered. During the summer time a camp will be built a short distance outside of Buffalo for the use of the riders.

ON RECENT SECRET TIME RUN OF NEW JERSEY CLUB

ABOVE is the line-up at the start, taken in front of the clubhouse on Broad street, Newark, N. J., on the morning of January 16. At the right is C. W. Waughop, who won highest mark in solo class, on his Cleveland lightweight. Waughop's total was 985 points.

NEW HERKIMER CLUB

ILION, N. Y., Jan. 24.—Motorcycle racing will be promoted more vigorously than before in this vicinity, now that a new club has been formed, made up of riders living in Herkimer County. The name of the new organization is the Indian Motorcycle Club, and the following officers have been elected: President, W. Thiel; vice-president, W. Moose; secretary, George Gay; treasurer, M. J. Bielawa; sergeant-at-arms, James Seney; pace-maker, Frank Metzer.

ROAD IMPROVEMENT INTERESTS

COLUMBUS, Ohio.—Motorcyclists in the Buckeye state are very much interested in the project of improving the road extending from Cleveland to Cincinnati, through Columbus, known as Market Road No. 10. The commissioners of Hamilton County have adopted a resolution agreeing to cooperate with the Ohio Highway Commission in bringing about the improvement. Civic and business organizations in many cities have boosted the improvement of the road and motorcycle clubs are aiding in the movement.

ROCKFORD CLUB ELECTS

ROCKFORD, Ill.—At the last meeting of the Rockford M. C., officers were elected to serve for the 1916 season. Reuben A. Croon is president, while William Swanson is vice-president, and Ralph Olson secretary. Henning Johnson is recording secretary, while Fred Dummer, Elmer Larson and Paul Pfansteil are directors.

CLASSING THE LIGHTWEIGHT IN COMPETITION

How the Small Two-Stroke and Four-Stroke Mounts Can Be Placed on Even Terms with Larger Machines in Economy Tests—Such Contests Benefit Dealer and Rider—*Part 2*

By ARTHUR CHAPPLE

IN the last installment I spoke about Callendar's formula for hill-climbing and stated that this took into account the time for the ascent, the weight of the machine and rider and the piston displacement. There remains the economy contest as adaptable to the lightweight machine. In economy contests we have another form of competition which may prove of far more value to the average rider than speed trials. Such competitions give the advantage of fuel and oil consumption to the lightweight.

Another element that is to be considered is the relation between the two-stroke and four-stroke types of motor. It is not to be expected that a two-stroke motor will be entered into competition with a four-stroke motor of equal cubical capacity, as the advantage will no doubt be with the four-stroker. This is where a distinct division will become necessary among the lightweights themselves and I believe that it would be a good means to invite criticisms and suggestions from readers of Motor Cycle Illustrated.

Separate Classification

The simple way points towards a division of the four-stroke and two-stroke motors in separate classes. However, there may be other valuable suggestions which may prove beneficial in forming rules to cover economy contests. In former years, a smaller class was added in many economy competitions and entrants in this class invariably carried off the honors in fuel and oil consumption. To equalize the difference between large and small motors we must again resort to a speed schedule. It was no uncommon thing in past economy contests to use a variety of tricks to stretch out each drop of fuel to its utmost limit. I have witnessed economy runs where big twins could barely make 20 miles per hour with the throttle wide open; this was due to the very fine adjustment on the needle valve or jet. Such an adjustment had to be made in order to give a creditable showing when competing with machines of smaller piston displacement.

If I remember rightly, we used to have motors of 30½ cubic inches cover 50 miles on a quart of gasoline. This figures out at 200 miles per gallon. Such a consumption is exceptional, but it goes to show the value of carbureter adjustment. However, in the majority of cases, the machines entered in the 21 cubic inch class would show the best economy in these runs or trials.

Taking this as an example, we can improve upon previous rules by calling for an average schedule in each class and use it as an additional basis to determine results. If we set a schedule of 35 miles an hour for 61 cubic inch twins and 20 miles an hour for lightweights, this to be the minimum speed, it will bring out exceptional results and prove something, even in addition to acting as a check on freak adjustments.

Of course, the reader will immediately criticize a speed of 35 miles an hour on a public highway or road. My answer is that a real economy contest with the best results cannot be run on a public road. It offers too many opportunities for cheating, and hence it is necessary to have the contestants under the eye of the referee and judges at all times. For such purposes, the old mile or half-mile tracks are excellent.

Benefiting Dealer and Club

This form of competition will prove a wonderful stimulant among members of motorcycle clubs and gives a good afternoon of variable enjoyment and sport. As many of the small motorcycle dealers throughout the country are watchfully awaiting the results of the lightweight movement, I am certain that it will prove to be of material benefit to them, if we assist in every way possible to put the lightweight into competition. But to do this we must create rules to fit the abilities of the little fellows.

In conclusion, I might state that the field for the lightweight is far greater than any previous development of the motorcycle. It is the machine that will appeal to the majority of the watching public and I am sure will be the means of adding the man in the street to the riding ranks.

Powerplus Making Remarkable

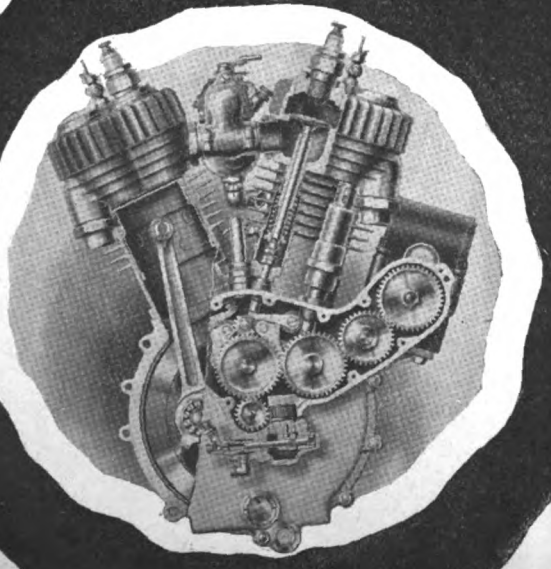
ERWIN G. BAKER on the INDI smashed every record he has ridden

First he "cannonballed" the Powerplus over severe rock-strewn Victorian roads and established four new Australian records—*one after the other.*

The runs were made under the auspices of the Victorian Motorcycle Club, who report a consistent 55 miles an hour average in each event. Time is as follows:

Three Hour Record—116 miles.
Six Hour Record—316 miles.
200 Mile Record—3 hours, 42 minutes.
300 Mile Record—3 hours, 58 minutes.

IT HAPPENE



POWERPLUS
THE MOTOR THAT DID IT

Then came the biggest event of all. Baker established a NEW 24-HOUR WORLD'S RECORD.

Over the same rock-strewn roads and in the teeth of a gale and driving rain he drove the Powerplus for 24 consecutive

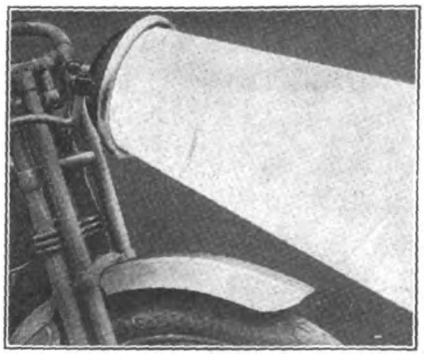
NEW LENS SYSTEM IN PITTSBURGH LAMP

Powerful Headlight Has Strong Beam and Low Current Consumption—Can Be Used with Dry Cells or Storage Battery

ABUNDANCE of light combined with low current consumption is a feature of the Pittsburgh motorcycle headlight, the product of the Pittsburgh Electric Specialties Co., of 927 French street, Pittsburgh, Pa. The lamp is fitted with an entirely new lensing system which increases the amount projected from the parabolic reflector. The current consumption is but one ampere.

The Pittsburgh headlight incorporates a lens centered focally as regards the bulb, this lens being used in connection with an 8-inch parabolic reflector. The beam produced by this combination is strong, with an extended thrust, enabling the user to read signboards and house numbers as well as to pick out bad places in the road. It can be lighted from ordinary dry cells or used in connection with a 6-volt lighting system, either straight battery or battery-and-generator. The consumption of one ampere enables the user to get long life from either type of battery.

The headlight is substantially made of first-class materials, and is fully guaranteed. While designed primarily for motorcycle service, it has been used with satisfaction on many automobiles. The finish is black japan with nickel trimmings. A switch is furnished with each lamp.



Pittsburgh Motorcycle Headlight

KOKOMO TIRE SALES HEAVY, SAYS SMITH

LOS ANGELES, Cal.—Julius Smith, manager for E. F. Merry in this city, states that there has been an unusually heavy sale of Kokomo Kord bicycle tires, as well as those of the Everlaster brand of Kokomo make. Smith said that he had to draw on the San Francisco store to fill orders, pending the arrival of a shipment from Kokomo.

HARLEY-DAVIDSON MANUAL IS MOST COMPLETE

HARLEY-DAVIDSON models for 1916 are supplied with an 80-page instruction book, known as the "1916 Manual," which is a model work of its kind. Great care has been taken to inform the owner of a Silent Gray Fellow exactly what he is to get with his machine, how to set it up after withdrawing from the crate, how to start it and stop it and to change gears on the variable-gear models. A short but effective section gives riding instructioons to the novice, and this is followed by complete information on regular lubrication of the various working parts.

The care of the different components is exhaustively described and all necessary adjustments demonstrated. The operation and adjustment of the mechanical oiler is another feature of the work, and this, the same as in other sections of the Manual, is well illustrated in addition to being plainly written. The center pages show an outline map of the United States with each Harley-Davidson service station indicated by a dot. The magneto and Remy type of generator and electric system are well described and pictured and the necessary adjustments demonstrated. The Schebler carbureter is exhaustively treated, and important suggestions on tire care are made. An index in the rear of the book enables the rider to quickly find any point he desires.

SPLITDORF EQUIPMENT ON POLICE MACHINES

NEWARK, N. J.—The Splitdorf Electrical Company is equipping the two Harley-Davidsons recently purchased by the local police department, with the Mag-Generator and electric lighting system. The entire 18 police motorcycles are now electrically fitted.

DeWITT'S NEW CONNECTION

DETROIT, MICH., Jan. 17.—Frank DeWitt, formerly Detroit representative for the Steel Products Co., of Cleveland, is now sales manager for the American Distributing Co., of Jackson, Mich., with offices in Detroit. The American company is concerned chiefly with the automobile trade, marketing a line of wheels, steering apparatus.

HEADS NEW ENGLAND BRANCHES

BOSTON, Mass.—Edwin H. Kidder is now managing the New England branches of the United States Tire Co., of New York City. He is making his headquarters in the Boston branch, of which he has been manager for several seasons.

COGHLAN IS SECRETARY

NEWARK, N. J.—Walter P. Coghlan has been elected secretary and a member of the board of directors of the Lovell-McConnell Mfg. Co., makers of Klaxon products in this city. He was formerly general sales manager of the firm.

1916 MODELS DRAW CROWDS AT DAYTON

Harley-Davidson, Indian and Dayton Stands are Centers of Interest at Show Demonstrating Industry in Ohio Manufacturing City

DAYTON, O., Jan. 22.—Harley-Davidson, Indian and Dayton motorcycles are represented in the Industrial Exposition being held here this week. The three exhibits are attracting an extra large share of interest among the big crowds which throng the building each day. The Exposition is being held in the new seven-story building of the Dayton Engineering Laboratories Co.

The Harley-Davidson Sales Company, of whose exhibit proprietor Fluke had charge, showed three separate models of the Silent Gray Fellow. Fluke was assisted by I. W. Schroder, Harley-Davidson traveler for Ohio. The latter said that the Dayton show was the best he had seen yet. "The biggest thing about this show is the series of crowds which have come here, the ten cents admission having much to do with this. We have already made a considerable number of sales," said the Harley-Davidsonite.

W. J. Tubner presided over the Indian exhibit, consisting of a sidecar combination, a two-stroke Featherweight and a cradle spring frame twin. The latter was mounted upon eccentric rollers driven by an electric motor. The operation of the frame was thus demonstrated. A wax figure was placed on this motorcycle to represent the rider. Tubner expressed himself as well pleased with results from the show.

Dayton motorcycles and bicycles were staged by the B. B. L. Co., local Dayton agent. The chief attraction at this stand was the Dayton Motor Bicycle, shown in both ladies' and men's models and at times the throngs packed it five deep.

The Dayton Engineering Laboratories Co., which manufactures the Delco starting, ignition and lighting system for motor cars, donated its building free of charge to the Industrial Exposition committee, and while the show has cost over $25,000, the floor space sold has been sufficient to make it pay for itself.

NONPAREIL HORN BUSINESS HAS BIG INCREASE

NEW YORK, Jan. 22.—The Nonpareil Horn Mfg. Co., of 73 Wooster street, has transacted over 100 per cent. more business during January, 1916, than it did in the corresponding month of 1915. Sales Manager Kauffmann states that last season was far ahead of the preceding one and he estimates that Nonpareil business for the ensuing season will continue at least 50 per cent. greater than last year.

RANDALL-FAICHNEY CO. IS REORGANIZED

BOSTON, Mass.—The Randall-Faichney Company has been reorganized, the new firm taking over all assets of the old one. Production of motor accessories will be continued and a number of new products for the 1916 season will be added. There will be no change in the management, the same efficient body of officials continuing the work as they have been doing in the past 19 seasons. The officials are: W. A. Randall, president; G. H. Faichney, vice-president, and Charles P. Blinn, secretary.

CONCERNING THE LIGHTWEIGHT IN COMPETITION

EDITOR **Motor Cycle Illustrated:**

Have read Arthur Chapple's article on the lightweight in competition and, while good, think he has been a little premature in saying that the clubs are overlooking the newcomer.

The Bay Staters will have a lightweight section and we New Jerseyites have in mind a pro and amateur lightweight* division running at a 15-mile schedule. Our plan is not to inflict any penalty for walking up the steeper hills this year at least.

I am not the racing authority that Arthur is, but I am sure that the lightweight can furnish some entertainment on small tracks. Racing between the two-strokes is quite a sport on the other side, so why not in America? The main thing is to keep the lightweight away from the big twins, for in competition with them the two-stroke is out of its class and will naturally suffer by comparison. At that, a Triumph two-stroke has stacked up against the big fellows in an Australian endurance run of note, coming home with the highest honors two years in succession.

Let the manufacturers of the lightweights show any inclination for competition and the F. A. M. and the various clubs will be on the job with rules and conditions that will give the newcomer a chance to demonstrate its efficiency.

E. B. HOLTON,
Sec'y N. J. M. C.

DEPOSIT IS REQUIRED FOR TOURING IN CANADA

MOTORCYCLISTS and bicyclists who purpose touring in the Dominion of Canada will have to pay a deposit subject to refund of amount charged, provided that the machines are exported from the Dominion within six months of the date of entry. In a recent letter from the Department of Commerce it is stated that for motorcycles, a deposit of $10 is required, with the refund dependent upon satisfactory identification of the property at the port of exportation. Other regulations governing tourists' motorcycles are, in general, the same as those applicable to travelers' automobiles. The note regarding the bringing of machines into Canada for ten days' without charge, which came from a Canadian source, is therefore incorrect.

CLEVELAND WINS NE

Rider Waughop on his Two-Stroke first prize (solo class)—against Newark-New Brunswick, 50 mile E plete victory for the CLEVELAND Entered in the Run! CLEVELA

Cleveland 2 STROKE SPEED

C. W. Waughop breezing al

C. W. Waughop on his CLEVELAND sailed away with first prize in the gruelling 50-mile test—an endurance run in every sense of the word. And although snow covered, the rough roads making the ordinarily hard going still harder, the CLEVELAND breezed in for first prize.

In short, the CLEVELAND put up the best all-around performance and beat machines that weighed and cost twice as much. The two-stroke CLEVELAND motor ran along smoother than any of its twin cylinder competitors. The test—the grind—the rough going—were not too severe for the CLEVELAND. This proves conclusively the adaptability of the CLEVELAND to rough going; that it is a real cross-country machine. It is dependable.

Andy Says

MAKE FRIENDS OF YOUR LOCAL NEWSPAPERS—PUBLICITY AND PROSPERITY ARE NATURAL TEAM-MATES IN ANY BUSINESS

I WONDER when the average cycle dealer is going to drop his somewhat belligerent attitude towards his local papers and face the fact that they can help to make or break him. Strikes me that it is about time he wised up on this angle of his business and started to make a study of the publicity situation. It'll pay him, believe me. There may be motorcycle and bicycle dealers who don't need the support of their town papers, but I've never seen one. And what's more, brethren, I never expect to see one. Such a dealer would have to be all-fired prosperous—or dead.

When I was hitting the trade routes only a short time back, I noticed that the dealer who prospered was in nine cases out of ten the one who made a point of being friendly with the newspapers—of getting his name and business into print at short intervals. That kind of a dealer might grab off the big sales anyway, through sheer pluck and hustling, but it must be something more than coincidence that connects his prosperity with consistent newspaper publicity. I've seen the two hooked up so often—publicity and prosperity—that I can't help believing they are natural team-mates.

On the other hand, I can't recall at this writing a single motorcycle or bicycle dealer among my friends who has ignored the local newspapers and got away with it. That's something to think about, boys.

Don't slip advertisements over on the editor and expect him to print them in his editorial columns. It can't be done. If he permitted everybody to operate on that policy there wouldn't be any advertising or any newspapers. You must give the editor something with at least a slight news value; then he'll feel that he's being repaid for working in the puff about you and your machine. Being hoggish won't pay. Bring out whatever news there is in your item at the top and then be satisfied to mention yourself casually. That will please the editor and get your item across.

Cultivate the local reporters. Take 'em to fires in your sidecar, or on your tandem. Co-operate with them in any other way possible. Make friends of them. But don't expect them to do the impossible. They can't devote a write-up to you and your place unless you use your ingenuity and hustle around and do things that make news. Finding an excuse for items that your local paper will print is a simple matter once you get the knack of it.

Next week I'm going to discuss briefly several easy methods of stirring up motorcycle news in the average town. It's a mighty interesting angle of your business, fellows, and a profitable one.

NOVEL ENGLISH SIDECAR HAS HAMMOCK SEAT

UNIQUE in sidecar design is a recent English model produced by The Sidecar Co., of 895 Fulham Road, London. The body is olive-shaped with a short, vertical windshield and folding victoria top, the latter having side panels of celluloid. No straps are used for the top. This sidecar is fitted with a hammock seat in place of the usual upholstered fixed one. An electric lighting outfit is used, there being a sidelamp, a light inside the top near the front and a tail-lamp. In the rear of the body is an ample luggage compartment, with a large door. The color scheme is black with white trimmings.

IN FAVOR OF DOG REGULATION

SEYMOUR, Ind.—Motorcycle riders and automobilists of this district are strongly in favor of a new "dog ordinance," providing that all dogs shall be harbored on the premises of the owner and specifying penalties for allowing them to roam on the streets.

BIG EXPANSION OF PACIFIC MOTOR SUPPLY CO.

LOS ANGELES, Cal.—Although the Pacific Motor Supply Co. is at present without a motorcycle agency, Manager E. Lebell explains the expansion of its quarters by referring to the heavy business done in bicycles and parts. The firm recently closed its accounts for 1915 and was actually surprised at the quantity of machines and parts sold.

The expansion will give the concern a second story, 175 feet wide and 137 feet deep, and will be the largest quarters of any place in Los Angeles. The staff is to be increased by another salesman and a shipping clerk, as well as an increase in the office force.

TO IMPROVE TURNPIKE

ALEXANDRIA, Va.—The Legislature of Virginia has granted a charter to an association known as the Warrenton & Fairfax Turnpike Co., Inc., to allow it to take over the old Alexandria-Warrenton turnpike. The company will grade it, re-surface the road and operate it as a toll-road until the State wishes to take it back. Nearly one-half of the required amount for construction has been subscribed and as soon as another $50,000 is obtained, work will be commenced. The route runs between Washington, D. C., and Warrenton, Va., passing through Fairfax Court House, Centerville, and the Bull Run battlefield. It is 46 miles long.

TRAFFIC REGULATION CONTINUES

CINCINNATI, O.—Measures to break up speeding and facilitate the handling of traffic with the minimum of danger are continuing in this city. The motorcycle police have been active in rounding up motor car speedsters, while traffic officers on crossing duty have been provided with white uniforms in wet weather. This provision has been made so that no motor vehicle user can complain about not seeing the officer's motions.

WHY CANDOR IN SALESMANSHIP PAYS

The Prospective Buyer Who Hears Every Dealer Describe His Machine in Superlative Terms May in Time Decide to Discount All Sales Arguments

By GEORGE M. JOHNSON

In a series of humorous pictures dealing with the New York Automobile Show, Briggs, the clever cartoonist on the Tribune's staff, has something that well deserves the attention of motorcycle dealers. An auto demonstrator is talking as follows:

"I don't say it's the greatest of all cars. If you buy it you'll probably have magneto trouble, and some time you'll have a rotten time making a hill, and you'll only get six miles to the gallon sometimes. You'll do a lot of cussing—she'll skip a cylinder and pound and lots of things. But you're buying a motor car."

To which the prospect, with a glad grin, responds: "Shake, George, I'll take it."

And this is the moral Briggs tacks on: "Some day when an auto salesman puts up a talk like this we are going to fall for the car."

Makes Little Impression

Now, did you or I ever meet a motorcycle dealer who would admit that his machine was not the fastest, the cheapest to operate, the easiest to handle, the most comfortable, the quietest, and the most satisfactory all-around mount? I trow not. And yet how, in the name of the prophet, can every one of a dozen makes be all of these highly desirable things? Echo whispers softly, "They *can't!*" The prospect who has a grain of sense, and most of 'em have or they wouldn't know enough to want a motorcycle, knows this very well. He realizes that a good bit of what the enthusiastic dealer says is mere bubble; the selling talk that is crammed full of superlative won't make a very weighty impression on him.

It may even make the wrong kind of impression. He may argue within himself: "There are other machines on the market as good as this fellow's. In some respects they are better. His line of talk doesn't stack up with truth worth a counterfeit copper; guess I'll look around elsewhere."

And finally, in sheer relief and desperation the prospect might buy his machine from a dealer who says, as did the auto salesman of Briggs' cartoon:

"I don't claim she's the only boat in the world. If you buy her, you'll probably have some trouble with the carb, and often when you want to change gears something'll stick. She'll start hard in the summer and harder in the winter; but remember this, bo: you're buying a motorcycle."

We mentioned the use of the superlative a short time ago. The modern idea in advertising and salesmanship is to go easy on the superlative. When you are trying to sell an article which differs in no great degree from a large number of others—as is the case with motorcycles and bicycles—you have a big contract on your hands to prove that your one article is the best of the lot. As a matter of fact, there is really no such thing as the *best* motorcycle, the *best* bicycle, the *best* automobile. This one or that may have it on the rest in some particulars, and is probably second best in some other features to make up for it—but best of all? That is indeed too big a dose.

In trying to land a prospect the dealer would do well to forget that superlative *best*. Let him concentrate on the proposition of convincing the prospective rider that his machine is first-class in every particular; guaranteed—not to clean up the X Y & Z every time on the road, not to outclimb the P D & Q, but to give satisfactory service as long as the rider gives the bus reasonably decent treatment.

Clear Out the Superlatives From Your Sales-Talks; They Are Rarely Convincing

When mention of other makes comes up, as will almost always be the case, the agent should get the talk back to his own make as soon as possible. He should be willing to concede some good things to the rival makes, but let him avoid the mistake made by one certain dealer. He was a rider who took up the business of selling motorcycles without much experience, but he knew that prospects didn't like to hear other machines knocked. He had a lad in tow and was spinning out his selling arguments to beat the band when the prospect interposed a question regarding a rival make. The new dealer at once became quite enthusiastic, and launched into a glowing tribute to the merits of the other motorcycle. His line of thought was something like this: "When Blank here sees what a good sport I am in praising up that old tub, he'll certainly come across with a deposit on mine."

Went the Wrong Way

Unfortunately, however, Mr. Blank's line of thought didn't parallel the dealer's. "Gee whiz!" he communed within himself. "If a rival agent thinks that boat is as good as this, she must be a bear! Me for her!" and his deposit found its way to the other shop.

There is really a bit of worth while selling psychology concealed in the ridiculous statements of the auto dealer in Briggs' cartoon. It pays to be frank with your prospect. Get confidential with him. Don't be afraid to admit that there may be one little thing, rather unimportant, to be sure, about the machine that you wish the factory would change; they probably will come to it sooner or later; it would merely make a machine already first-class a trifle better. That will impress the customer with your honesty, and he will be all the more ready to credit the statements you make regarding the virtues of the machine you are trying to sell. It may work still further; he will, perhaps unconsciously, expect other dealers to show the same de-

Digitized by Google

gree of frankness. He will wonder what little criticism they may have to make regarding the motorcycle they represent, and the chances are that none will come forth, since the salesman who has given up the use of the superlative—at least, in the motorcycle business—is a rare bird. The prospect may even ask, in a timid sort of way, if there is no possible way in which the machine could be bettered, and when the unhesitating "No" is barked out—as it probably will be—he won't believe it. He won't feel the same confidence in that dealer as in the other one, and, other things being equal, he is more likely to buy at the first shop.

Perfection Claims Disastrous

The dealer must not make the mistake of claiming that his motorcycle has reached utter perfection. He can't do this honestly, and he knows he can't. Furthermore, the prospect probably knows it, too; if he doesn't, he will soon find out, and in any case, the dealer has done just so much to injure his chances of landing a sale. Some agents were making this claim three or four years ago, and look at the changes—actually vital improvements—that have appeared. At the very time the claim of perfection is being made, the factory experts may be contemplating radical changes in their prouct, and of course that makes the agent's line of talk look positively sick.

Perfection means 100% efficiency, and 100% efficiency is the biggest contract on earth, barring nothing. The up-to-date motorcycle is a mighty fine product, but perfect—No. If absolute perfection is represented by a steep hill, the motorcycle is only half way up, in low gear, with its engine red hot and pounding its head off. Perfection is unattainable, and it is a lucky thing for us that it is.

Statements Must Fit

Motorcycle dealers should realize that statements made to one rider are likely to be contrasted and compared with those made to some other rider. Therefore the statements must fit. I have met a good many dealers. Some of them I felt I could always believe; so far as I knew, they invariably told the truth. Others, experience demonstrated, told the truth about half the time, the natural result being that nobody ever believed them any of the time. Lose the confidence of a customer, and you lose his trade forever. He unconsciously applies the old Arab proverb: "If mine enemy deceive me once, shame on him; if he deceive me twice, shame on me!" The rider who has been treated dishonestly by a dealer won't put himself in a position to let it happen again. "I'm cured!" is his comment.

I don't mean to imply by the above that a large proportion of motorcycle dealers are rishonest in their sales policy, for most of them are not. And besides, the actually dishonest ones are rapidly being weeded out by the cold-blooded process of the survival of the fittest.

TOLEDO, O.

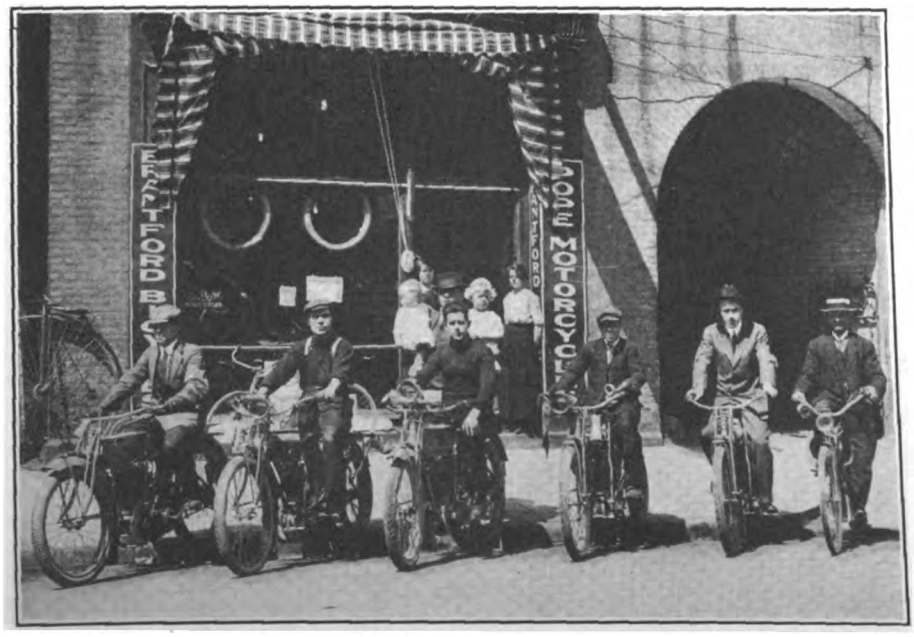
GEORGE LEIGHTON, proprietor of the Leighton Cyclery, agent for the Dayton products, has just returned from a visit to the factory of the Davis Sewing Machine Co., in Dayton.

JACKSONVILLE, FLA.

W. E. ROBBINS will hereafter represent the Vacuum Cup tire line for Jacksonville, handling these products of the Pennsylvania Rubber Company from the Jacksonville Motor Car Company's garage on Laura street.

NORFOLK, VA.

DRAKE HARDWARE CO., distributing the Indian in this city, has moved to its new location at 112 West Main street. The new store measures 80 by 140 feet and was formerly used as an automobile garage. The firm has sold to date as many motorcycles as during the entire 1915 season.



Where Pope Motorcycles Are Effectively Handled in London, Ontario; Establishment of The Bicycle & Motorcycle Sales Co., at 425 Wellington Street

Dealers'

NEW YORK, N. Y.

GUS ROTHOLZ, the veteran dealer of 1491 Fifth avenue, has just closed an excellent season in motorcycles. His season begins and ends on January 1 each year, and to the first day of 1916 he had disposed of 34 machines of various makes. Fourteen twins, one single cylinder and one van were the total of 1915 Reading Standards, while three Hendersons were sold. Excelsiors disposed of numbered 15. "This does not include used machines," says Rotholz. "Practically 45 per cent. of the mounts sold in 1915 were fitted with sidecars."

GRAND JUNCTION, COLO.

PETER FOX, Indian dealer for Grand Junction, has made the most of his opportunities and has been successful in business. He started to ride in 1912, using an Indian, and entered the agency field the following year. His total sales for 1913 was 8 machines. In 1914 he increased his space and sold 20 machines. In 1915 he took the Indian representation and disposed of 30. For the 1916 season he has so far sold nine of the Powerplus models and has expectations of selling 35 or 40 before the season closes.

WASHINGTON, D. C.

HOWARD A. FRENCH & CO., Indian representatives at 424 Ninth street, N. W., recently received fourteen two-cent stamps in an anonymous letter which stated that the stamps were in payment of a debt of several years' standing, plus interest. As this was the first payment to the "Conscience fund," Proprietor French is at a loss to know what to do with the remittance.

DETROIT, MICH.

PROPRIETOR WANDERSEE, of the W. E. Wandersee Co., Harley-Davidson representatives at 129 Gratiot avenue, reports an average of one sale per day since the first of new year, this being on 1916 models of the Silent Gray Fellow. In second-hand machines, the firm cannot secure enough to meet the demand. "This situation has never before been encountered," says Wandersee.

W. E. METZGER CO., 501 Woodward avenue, Indian agent for this city, has abandoned the use of the side window which formerly could be seen on Woodward avenue. The reason is that the owner of the property adjoining has leased the ground to a bill-posting firm and a big boarding shuts off the view. The Woodward avenue window is, of course, in plain view.

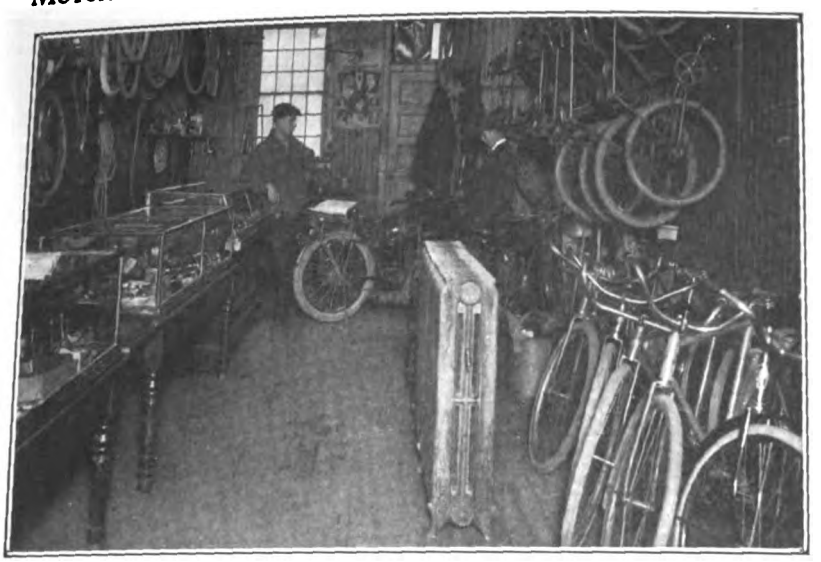
Section



Interior of the Somerset Shop, 46 East Main Street, Somerville, N. J.—Handling Harley-Davidson and Indian Motorcycles, Smith Motor Wheel and Pope Bicycles

BALTIMORE, MD.

SOL NECHAMKIN, proprietor of the Baltimore Cycle Co., Pope representative, has just returned from a visit to the plant of the Westfield Mfg. Co., makers of Pope motorcycles, at Westfield, Mass. He went to the factory to increase his orders for the various Pope models.

DEALERS in this city have formed a business organization known as the Baltimore Motorcycle Dealers' Association. The body is doing a little co-operative advertising and is arranging to have a series of shows simultaneously in the salesroom of each member. This has come about because motorcycles were crowded out of the auto show owing to lack of space. The organization is doing good work for the riders, as it is the intention to work in conjunction with the local club in promoting contests of all kinds.

PATERSON, N. J.

FRED L. JOFFEE, representing the Excelsior, has moved into new quarters at 18 Clark street. He found his place at 180 Market street too small, hence his change to the larger store. Joffee has sold four more Excelsiors at this period of the season than he did during the corresponding period in 1915.

NEWARK, N. J.

WALTER GOERKE, Wigwam representative, with the aid of Percy Drumwood, his mechanic, has rigged an Indian Powerplus with handlebar-controlled clutch for trial by the Newark Police Department. The machine has the valve-lift on the throttle grip, while the clutch-rod extends from the right grip to the thrust rod and passes through the gearset to the clutch in the usual manner. The spark lever is separate, being mounted at the left side of the tank.

The Newark police specifications call for handlebar-control of the clutch and up to the present only one make could fulfil the requirements. The machine fitted up by Goerke will be in the hands of a traffic sergeant this week.

SEATTLE, WASH.

PIPER & TAFT, the Seattle hustlers, report 350 sales of bicycles for 1915, and state that indications point to a continuance of this pace throughout the present season.

FREDERICKSBURG, VA.

E. L. DOWNEY, who opened a bicycle store here about one year ago, has taken the agency for the Indian motorcycles and bicycles. In view of the fact that the road from Washington to Richmond has now been put in fairly good condition, many tourists will take the route through Fredericksburg during 1916 instead of the longer one through the Shenandoah Valley.

GRAND RAPIDS, MICH.

WARREN VELTMAN, Henderson dealer, has already sold six of the four-cylinder mounts and is very optimistic regarding the 1916 outlook. The past two State endurance runs have convinced the sceptics that the Henderson is there in heavy sand. Veltman has also the agency for the Miami Power Bicycle.

L. W. DELYLE, handling the Excelsior, has received a number of deposits on 1916 models and looks forward to a fine season. The police motor is making quite a hit among local speed fans. Nearly all DeLyle's orders specify the police motor with three-speed gearset. DeLyle also handles Excelsior bicycles and does a good business in them.

HOWARD FERGUSON, who is agent for the Pope, has just finished an addition to his store to accommodate an enlarged repair shop. Both his Pope motorcycle and bicycle business are good.

C. C. CLINE, representing the Harley-Davidson, has delivered a three-speed with electric equipment and a three-speed regular model to customers to date. He has also booked ten orders for Spring delivery. The new short-coupled model is creating big interest among the many speed bugs who live in and around Grand Rapids.

ROCKS BROTHERS, Thor agents, have taken the Grand Rapids representation for the Tiger lightweight.

SPOKANE, WASH.

ARDO M. PETERSON, manager of the Pacific Tire & Rubber Co., of Seattle, has just opened a branch in this city. He will handle Gordon and Batavia tires in both places. The Spokane Tire Company has taken a sub-agency for the Gordon, while the Fosdick Company has taken on the agency for the Batavia.

DAYTON, O.

L. P. BIRCKENBACH, of the L. P. Birckenbach Co., Dayton Motor Bicycle agent in Columbus, O., was an interested visitor at the Industrial Exposition in this city. While in Dayton, Birckenbach visited the Davis Sewing Machine Company's plant and advised the firm of plans being made to push the Dayton line this summer.

SAN FRANCISCO, CAL.

E. F. MERRY, representing the Pope motorcycle in this city, has just returned from a trip through the East. During this trip he stopped off at Westfield, Mass., to pay a visit to the factory of the Westfield Mfg. Co., makers of Pope products. Merry expressed himself as being greatly impressed by the business activity in the East.

BRONX, N. Y.

OLIVER BERCKHEMER, proprietor of Oliver's Indian agency, at 993 Washington avenue, is humming these days. "Ollie" is back on the job with his full vigor now and with Vic. Pelezzare, his manager, is kept busy in showing off the paces of the new Powerplus twins. A feature of the establishment is an up-to-the-minute Prest-O-Lite service.

GENE COUGHLIN & CO., of Washington avenue and 163rd street, Bronx County agents for the Harley-Davidson, have disposed of 17 new models as well as 12 used machines. The accessory business is a thriving one for this firm and between demonstrations and sales, the partners find little time on their hands.

J. COBBAN, Jr., is handling the Henderson once more for 1916. Cobban is a firm believer in the four-cylinder mount and proves it by going into all endurance runs that are held within any reasonable distance of his headquarters at 321 East Tremont avenue. He displays trophies from Crotona, Yonkers and Invincible M. C. affairs to assist him in demonstrating the lasting qualities of the Henderson.

WESCHLER WRITES ON THE IDEAL AGENCY

Sales Manager of Hendee Mfg. Company Offers Valuable Suggestions in Honest Injun—Cleanliness and Brightness as Well as Business Activity Are Essential to Success

IN the January number of the *Honest Injun*, the Hendee Mfg. Company's interesting house organ, Sales Manager F. J. Weschler has a highly-instructive article under the title, "If I Were an Indian Dealer," his theme covering some of the principal features which contribute to the success of an agency. Mr. Weschler in describing his ideal motorcycle headquarters states that he would make the store "so attractive, so appealing, so fraternal looking and yet so businesslike that everyone in town would know me for my perfect business surroundings.

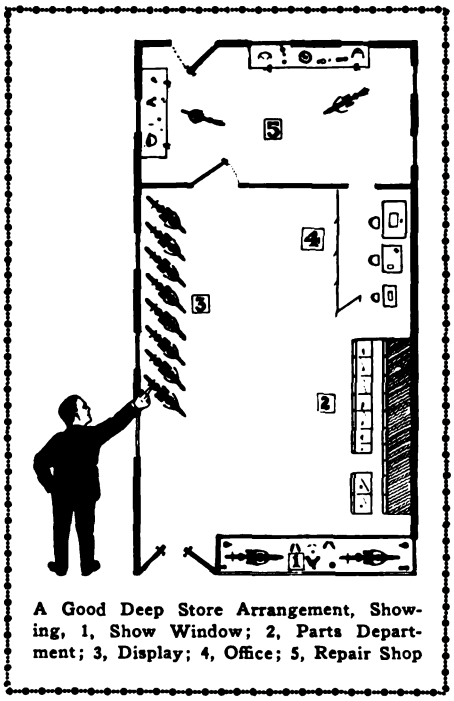
"My store," he continues, "would be a magnet for prospective customers. It would raise the standard of motorcycling in their estimation and it would radiate an atmosphere of cordiality that would be difficult for the prospect to resist—once he had been bitten by the Indian 'bug.' My store would be a landmark, a meeting place for the motorcycling fraternity of my vicinity—and yet, withal, a place of crisp, clean-cut business."

Agencies Not Laid Out Well

Mr. Weschler then proceeds to tell how he would bring about the above mentioned conditions, drawing upon his long experience in the sales field and his observations made on many trips throughout the country. He states at the outset that most agencies he has inspected have been laid out unscientifically, and that as a result the dealer has failed to obtain the best results. Most motorcycle agencies are unnecessarily dirty, also, in his opinion, and few of them are properly lighted.

The writer refers to the unsatisfactory conditions found where the salesroom and repair shop are not kept as separate and distinct departments, and argues that in some cases the confusion of departments and the general hodge-podge air of the place drives away discriminating prospects. He takes a firm stand for sectioning off the various branches of the business, the salesroom, parts department, reception room and repair shop all being provided for along scientific lines.

Mr. Weschler refers to three general classes of stores—as regards floor area; those that are narrow and deep, those that are square, or nearly so, and those that are shallow and wide. He points out that each type has its advantages, and in the three sketches accompanying he shows how each can be arranged to excellent advantage by the discerning dealer.



A Good Deep Store Arrangement, Showing, 1, Show Window; 2, Parts Department; 3, Display; 4, Office; 5, Repair Shop

The prospect who finds the motorcycle models attractively lined up on one side, the parts cabinet and counter within easy reach and still not intruding on the strictly motorcycle section, a small but neat reception room and a businesslike repair shop apart from the other branches, will in Mr. Weschler's opinion be a much easier man to handle than the one who enters the store to be confronted by a general jumble. "Well, this is a regular business," the prospect is quoted as remarking to himself. Motorcycles must be legitimate, substantial things—not freaks that go wild and get one dirty and messed up with grease and oil."

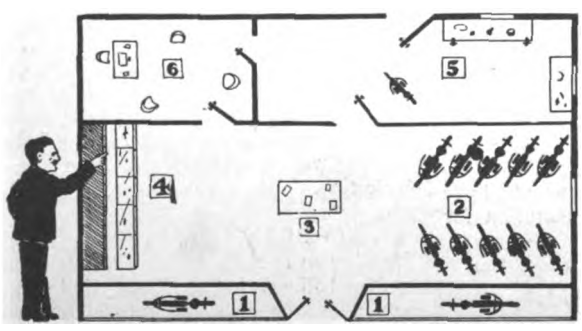
Coat of Paint Needed

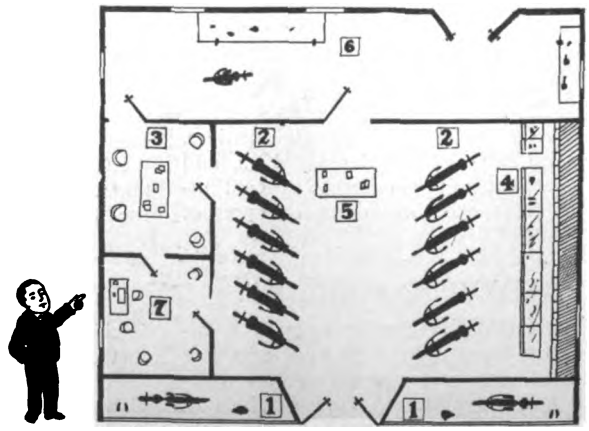
Reference is made to the fact that in most cases where a dealer's store looks dull and run-down, it is in need of a coat of paint. Mr. Weschler briefly discusses the "psychology of colors" and points out that the interior of an agency can be made suggestive of life, activity and cheerfulness by selecting a bright color, while a dark or drab tone will tend to be depressing. A bright color assists in the lighting arrangements and enables the dealer to give a much brighter general effect without increasing his bills for illumination.

Mr. Weschler devotes considerable space to the value of scientific lighting and argues that a motorcycle dealer who tries to get along with a poor lighting system is severely handicapping himself. He states that any reasonable outlay for a lighting system is money well invested, and calls attention to the fact that all successful dealers have been specialists in lighting and decorating as well as in the ethics of salesmanship.

ANOTHER BIG DISTRIBUTOR FOR HOLDFAST TIRES

NEW YORK.—Announcement is made by the Hawaco Rubber Co., of 48 Warren street, that the Olmsted Company, of Syracuse, N, Y., has arranged to distribute Rollfast tires throughout an extensive territory of which Syracuse is the center. The Olmsted firm will utilize all six of its travelers in pushing Rollfast tires during 1916. The Syracuse firm is the most recent of the numerous big distributors who will handle the Hawaco company's lines.





Above Is a Neat Plan for a Wide Store, the Figures Indicating, 1, Show Windows; 2, Display Section; 3, Catalog Table; 4, Parts Department; 5, Repair Shop; 6, Office. NEWSPAPER PUBLICITY FOR BICYCLE DAY

Staff of Newspaper Writers Now Working on Reading Material for the Dailies—Contest Letters Are Swamping Secretary Olin's Office—Announcement of Winners to Be Made Soon

BRISTOL, Conn., Jan. 24.—Rapid progress has been made during the past week in perfecting plans for BICYCLE DAY, February 29, that will mark the formal opening of the nation-wide campaign for "One Million New Bicycles in 1916." Letters from dealers in all sections of the country have been received by the "One Million Committee" pledging their co-operation and promising to use to the fullest extent all of the material which the committee is now mailing to the bicycle dealers.

More manufacturers and jobbers have also joined the ranks of the boosters and will bend every effort to crown BICYCLE DAY and the big campaign with an unprecedented success. According to Secretary Charles F. Olin of Bristol, Conn., the manufacturers and jobbers have never shown so much enthusiasm before and are resolved to see that everybody pulls together.

Newspaper Writers at Work

Beginning about the first of February there will appear in the newspapers throughout the country reading matter showing the attractions of cycling, its advantages and many pleasures. Several of the brightest newspaper writers in the country are now at work in preparing this material. Secretary Olin who has charge of this publicity work said recently: "With the cracker-jack staff of men we have at work licking this reading matter into shape, the automobile's little brother is to be brought into the limelight as it never has before."

While this material is running in the newspapers, live dealers will be given a splendid opportunity to land a good, active list of prospects. By placing their advertisements in the newspapers while interest is being thus aroused in cycling and by circularizing prospects through the mails each individual dealer can attract attention to his store and get his share of the big sales that will result from the general boosting campaign.

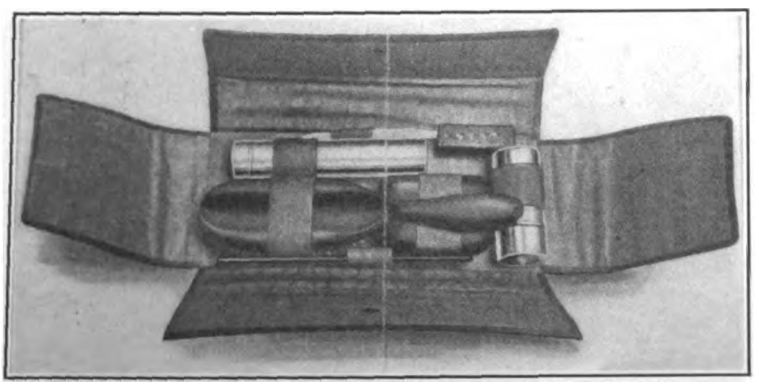
"As an indication that the dealers are getting on the job," remarked one member of the "One Million Committee," last week, "a letter I received from a dealer out in the Middle West is certainly very interesting. This man plans to get the schoolboys in his city, who now ride bicycles, active in boosting for BICYCLE DAY by having them bring into his store their friends who are prospective buyers. For every sale he makes to such boys he gives a premium to the lad who brings in the prospect. This is a very clever idea and ought to work well, for it interests every present rider to work for the success of BICYCLE DAY among his friends. Other dealers should do the same thing. The scheme is simple and yet very effective."

Contest Letters Coming In

In the initial announcement sent out by the committee last week, the dealers had outlined for them the general scope of BICYCLE DAY. It called attention to the prizes which are being offered for the best window displays, the brightest ads and the most effective selling talks. It also showed the necessity of getting up a first-class mailing list of the names and addresses of prospects, so that they can be properly circularized for BICYCLE DAY and throughout the year.

A big batch of letters are coming each day into the office of Secretary Olin at Bristol, Conn., from dealers' clerks and salesmen who are competing for the best "selling talk" prizes which range from $25 to $100 and include one-hundred traveling sets such as shown in the photograph reproduced on this page.

"These letters," said Secretary Olin, "prove conclusively that the great majority of bicycle salesmen and clerks are made of the right timber and that they know how to present a proposition effectively to the prospective rider. I feel certain that when BICYCLE DAY brings thousands of prospects into the dealers' stores that the salesmen and clerks will make the most of the opportunity. The prize winning selling talks will be printed soon and sent out to the dealers for use in connection with BICYCLE DAY."



This Traveling Set Will Be Given to the 100 Clerks and Salesmen Who Write the Best Selling Talks

MAYOR ATTENDS ST. LOUIS CLUB'S BANQUET

ST. LOUIS, Mo., Jan. 25.—One-hundred and eleven bicycle riders, comprising the membership of the St. Louis Cycling Club, which claims the distinction of being the oldest organization of its kind in America, wined, dined and made merry at the Marquette Hotel here Saturday night. It was the tenth annual and most successful banquet ever given by the wheelmen.

The guests of honor were Mayor Henry W. Kiel of St. Louis, Mayor R. M. Tidd of Webster Groves, Mo., a former president of the Cycling Club and City Supply Commissioner Thomas of St. Louis. Then there was also a delegation of about a dozen men from the motorcycle clubs of the city. Carl Schutte of Kansas City and Maldron Martin of this city, both winning members of the American bicycle team at the last Olympia games, were there. The height of hilarity was reached when Carl Lindenschmit, who in the annual Derby last July won the slow climb of Solomon's hill in St. Louis county by spending 34 minutes in the ascent, was awarded a copper medal 13 inches long by 17 inches, in recognition of the feat.

Shop-talk was taboo at the banquet, but from the whisperings of the few dealers present and from the general spirit of the 111 bicycle owners it was evident that 1915 had been a good year for the dealers and that 1916 would be even better. Mayor Kiel spoke about the good roads movement and asked all of the cyclists to stand back of the city administration by voting for highway improvements.

BIKE PRICES WILL CLIMB, SAYS BROWN

Scarcity of Materials and Advanced Wages Have Increased the Cost of Manufacture and Shipments by Parts Makers Are Being Held Up

BUFFALO, N. Y., January 25.—"Every dealer may expect an announcement from the bicycle manufacturers in a month or so." This was the cryptic way in which Sales Manager Fred Brown, of the Pierce Cycle Co., greeted the **Motor Cycle Illustrated** correspondent last week.

When asked what the announcement would be about, Mr. Brown continued:

"There is a general shortage of bicycle parts, and this, if it affects others as it has us, will mean a great handicap on the output of machines. Heads, seat post clusters and all stamped parts are hard to get. We placed an order for heads last December and we were then told that shipment could not be made before April. Again, this month we contracted for tubing, and we were told that we would have to wait—wait until September before the first shipment could be made.

"Because of the scarcity of material," continued the Pierce sales manager, "prices have increased greatly. Tubing has advanced about 50 per cent.; the price of labor has jumped from 33 1/3 to 50 per cent.; while all stamped goods have advanced 50 per cent. Only the other day we received notice that the drop forge people were also going to ask higher prices. Taking all these facts into consideration, in addition to the present scarcity of dyestuffs, especially the reds, it seems that bicycle prices will have to go up soon.

"Already one manufacturer, as I understand it, has announced that after all his present orders are filled an advance in price will be made. But this advance," concluded Mr. Brown, "will in a sense be of benefit to the industry in that the manufacturers will be able to keep to a high standard."

INTER-CLUB MEN DINE

NEW YORK, N. Y., Jan. 26.—The banquet of the delegates and alternates of the Inter-Club Amateur Cycle Road Racing League, given in honor of President D. J. McIntyre and Secreary H. W. Zarr, for their faithful services during the past three years, was held at the Hungarian Restaurant, New York City, on Friday evening, January 21. Representatives were present from the eight clubs which comprise the league.

START RIGHT BY CLEANING YOUR STORE

The Neat Looking Shop Is the One Which Inspires Confidence and Will Draw the Crowd on BICYCLE DAY—Clean Up the Machines and Feature the New Models

By ROBERT GUTHRIE

THOUGH BICYCLE DAY is more than a month off, it is not too early to turn your store inside out and give it a first-class cleaning now. The war in Europe is showing the value of preparedness, and more than one business battle—even though it be but friendly competition—has proven that the fellow who isn't ready at the right time is a sure loser. Turning the hose on your store, so to speak, is the best way of getting the dollars headed toward your cash drawer for BICYCLE DAY.

Brush the cobwebs out of the corners and off the ceilings. Get rid of that heap of junk which has been piling up for so many months. Those dusty machines must be kept spic and span—the enamel shining and the nickel glittering. If the second-hand machines are falling all over each other near the door, put them toward the rear of the store where they belong. Bring the new wheels forward where customers will see them just as they enter the store.

And, Mr. Dealer, how about your windows? Can people see through them and tell what you've got on display, or look into your store? A bicycle rider in Buffalo told the writer the other day that when he purchased his last machine he went to a store, of which he only knew the approximate location, having been told to go there by a friend, and passed the place three times before he realized that it was a bicycle shop. The windows had at least six months' accumulation of dirt.

The windows are the eyes of a dealer's establishment. They indicate the character of his place and must be kept clean so that the displays can be clearly seen by passersby.

Cycling being an outdoor sport, the very mention of it suggests the open air, green fields and meadows, wholesome and healthy recreation. When a prospect has that vision of bicycling in his mind, imagine the shock on entering a store that is badly kept. By its cleanliness and neatness a bicycle store can be made to reflect the atmosphere of cycling.

If you are a live dealer, you will be circularizing your prospects and lining them up for a visit on BICYCLE DAY. The newspapers in your town will soon be printing the interesting reading matter which is being sent out by the "One Million Bicycles Committee." Your town will take a renewed interest in cycling.

You will be on the job, of course, talking bicycles to prospects on the big day. But will your store be on the job?

All the work that you have been doing to interest your prospective customers, all the articles which the newspapers in your town will publish, all the efforts of the "One Million Bicycles Committee," won't bring many dollars into your pocket, if the place from which you sell bicycles doesn't inspire confidence. A dirty store gives a prospect a pretty bad impression of its owner and of what he has to sell.

SAMPLES OF ADS WHICH THE "ONE MILLION" COMMITTEE IS PREPARING

Every Girl Ought to Ride a Bicycle

No less an authority than Dr. Bessie Lobdell, of Chicago, tells us that the girls of the land are fast developing what she terms the "slinker slouch" type.

We do not like this expression, but are sure all will agree that the average girl of today lacks that robust, sturdy, rosy, full-blooded health that comes from **EXERCISE IN THE OPEN AIR.**

Dr. Lobdell and other physicians say that **BICYCLE RIDING IS AN IDEAL FORM OF EXERCISE** for girls, ideal because it brings all of the muscles into play, stimulates circulation of the blood, and affords pleasure every moment of the ride. This form of exercise is not only good for girls, but for boys and men.

Why not establish health, add new joys to life, by riding a wheel?

The handsome 1916 models are here and will be displayed in our show rooms on

Tuesday, Feb. 29, Bicycle Day

Come in and see them. You are as welcome to look as to buy.

(Signed by Dealers)

Why Don't You Ride a Bicycle?

Do you realize that there are over four million boys and girls, men and women in this country who have found the bicycle a help in doing their work? A sure and ready convenience, **A REALLY SPLENDID SOURCE OF PLEASURE AND PROFIT**—a thing they would not want to be without.

Stop a moment and think of what the bicycle can mean to you these delightful spring days and through the whole outdoor season; in fact, all year around.

The bicycle was never so popular as it is today; it was never so good as it is today; there were never so many reasons why you should own and ride a wheel as there are today.

We want to tell you all about it on

Bicycle Day, Tuesday, Feb. 29

We have made special plans to entertain you at our stores on this opening day of the season. Do not stay away because you are not ready to buy. **WE WANT YOU TO COME IN AND SEE THE HANDSOME NEW MODELS.** Please consider this as a personal invitation.

(Signed by Dealers)

WILL BE RECORD YEAR FOR IVER JOHNSON

FITCHBURG, Mass., January 25.—When asked how the prosperity wave had affected the bicycle business as far as his company was concerned, Mr. J. Lovel Johnson, of the Iver Johnson's Arms & Cycle Works, made the following statement:

"On bicycles it has been necessary for us to pass up business that we could have had for Christmas owing to our not being prepared in turning out any quantity of machines that we received orders for, not anticipating the great rush that we did have just at the Christmas season. For 1916 we think the bicycle business will be as good as any year in our history. All of these predictions depend upon our being able to get supplies and material.

"Steel, and some of that product, they want eight months delivery on, and we are paying prices at time of shipment, not knowing the cost at time of placing orders. Metals have doubled in price, chemicals are out of the market, and with everything tending upward we can't see any result except a fine year, and the biggest ever that is coming to us within a few days."

BIG DEMAND FOR CYCLE TIRES

BATTLE CREEK, Mich.—E. L. Saxton, who has a bicycle shop at 143 West Main street, is selling bicycle tires, as he expresses it. "They come in lots of 100 pairs and they go fast," says Saxton. "I have one shipment of 150 pairs on the way, and last week the remaining pairs of the last 100-pair shipment went to local customers."

MOTOR WHEEL TO BOOST

MILWAUKEE, Wis., Jan. 25.—"Put us down for 10,000 of the 1,000,000 bicycles scheduled for 1916," says W. V. C. Jackson, general manager of the Motor Wheel Division, A. O. Smith Company, Milwaukee. That many bicycles, be believes, will be sold with Smith Motor Wheels this year.

"Last year we sent out a very complete question blank to our dealers and one of the questions asked was, 'How many Smith Motor Wheel customers bought bicycles at the same time?' From statistics gathered from a count of the return of question blanks from 40 to 60 per cent. of Smith Motor Wheel customers bought bicycles at the same time from the same dealer. Now, this year we propose to manufacture 25,000 Motor Wheels and according to figures of last year this means at least 10,000 bicycles."

MOONE WILL HANDLE BICYCLES

NIAGARA FALLS, N. Y., Jan. 18.—P. Moone, the Cataract City Agent for the Harley-Davidson, has taken the dealership for the Columbia, Tribune and National bicycles, and also the agency for the Pennsylvania Vacuum Cup tires. Moone is one of the largest dealers at the Falls and has a good following.

TWO TIE IN U. S. I. HOME TRAINER CHAMP. SERIES

NEW YORK, N. Y., Jan. 25.—Tom Bello won the second race of the series of home trainer races for the championship of the Unione Sportiva Italiana, on Sunday night, January 23. Bello is now tie with Desimone, each having five points for winning one event.

Another series, separate from the championship races, was begun last Thursday night. The event was a one-mile match style, run off in three heats, one semi-final and a final. Bello and Gordano qualified for the semi-final, while Desimone riding the fastest heat qualified for the final, which was a battle between him and Bello. Desimone won in the slow time of 1:24⅘.

C. R. C. OF A. BANQUET

NEW YORK, N. Y., Jan. 26.—The date announced for the 25th Anniversary Dinner of the Century Road Club of America, is February 12th, at the Broadway Central Hotel, New York City. Tickets and invitations may be obtained from Julius G. Schmidt, Ridgefield Park, N. J., or Emile E. Fraysse, West Hoboken, N. J.

HAS MOTOR WHEEL AGENCY

SAVANNAH, Ga.—J. E. Hetzel has taken the agency for the Smith Motor Wheel, and celebrated the occasion by selling the first one sent him to a local furniture collector, along with a bicycle.

MOTOR WHEEL SNOW BOB DELIVERS ORDERS

This Outfit Was Rigged Up by Will Van Liew, of Glen Falls, N. Y.

DEALERS TO UNITE AGAINST DEPARTMENT STORES

CHICAGO, Ill., Jan. 25.—Five bicycle dealers of the Windy City propose to organize the Chicago Bicycle Dealers' Association to fight department stores that make a practice of selling machines at cut prices.

To offset the advantages of the department stores, which buy large cash shipments and can therefore sell bicycles at a lower price than the average dealer, who is obliged to purchase in small quantities and ask for long dating on his bills, the Chicago dealers will unite to launch bargain days, and probably to combine their purchasing power. On the same days every dealer will sell similar goods at the bargain prices advertised.

The proposed association will, if the plans are carried through, use combination advertising in the big daily papers, all of the dealers contributing an equal sum to defray the expenses. In that way they will be able to secure prominent space and good display. Each dealer's name and address will appear in the same advertisement, so that equal benefits will be enjoyed by all. Those who have already agreed to join the association are: Fred Harlow, Oliver Turner, Fred Nelson, the Lakeview Cycle Co., and C. R. Hendricks.

CHAPMAN DECLARES VELODROME WILL OPEN APR. 2

NEWARK, N. J., Jan. 25.—Manager John M. Chapman of the Cycle Racing Association arrived here last Sunday and had an important conference with two officials of the organization, Frank Mihlon and I. M. Upperou, regarding the proposed break of the professional riders with the National Cycling Association.

Chapman announced that the Newark Velodrome would be opened on Sunday, April 2. He said that no bonus contracts would be made, but that big prize money would be the rule instead. The first race of the season will carry a purse of $500, of which the winner will receive $300. The value of the amateur prizes will also be increased during the coming season.

Chapman declared that the old bonus system was unjust, in that the riders who were paid big bonuses made no efforts on at the track at times, while those who did not receive large bonuses often showed superior ability for which they were not awarded. In the past, Chapman stated, referees had failed to disqualify riders for teaming, for the reason that their bonus money would be forfeited. With the prize system these evils will be eliminated.

N. C. A.'S RIVAL ELECTS SET OF OFFICERS

NEW YORK, N. Y., Jan. 25.—The organization which was formed a week ago for the purpose of wresting the control over amateur and professional bicycle racing from the hands of the National Cycling Association held a meeting in the Aeolian Building, New York, on Monday night, and elected officers, after deciding that the body shall be known as the Federation of American Cyclists.

The officers are as follows: President, Harold Dibblee, of New York; vice-president, John Matthews, of Newark; secretary and treasurer, Dr. George Muth, of New York. These three, with William Coburn, Hugh R. Brown, Samuel Barnet, and Dr. Birs, will form the board of control.

LEAVE FOR CHICAGO GRIND

NEWARK, N. J., Jan. 26.—Twenty professional bicycle riders left this city on Tuesday, January 25, for Chicago, where they will participate in the Windy City Six-Day Race, an outlaw affair, which will be staged in the Coliseum, beginning Thursday, February 2. These riders were: Kaiser, Cameron, Drobach, Corry, Ryan, Thomas, Lawrence, Magin, Ernie Ohrt, Anderson, Wohlrab, Kopsky, Smith, Coburn, Cavanagh, Grimm, Madden, Hanley, Ruddi-Russe and Madonna.

Iver Lawson, Ned Young, Francesco Verri and Piercey are now in Chicago.

FRANK KRAMER'S LIFE STORY

Fourth Installment of the First Authorized Story on the Great American Champion's Career

Kramer Broke Three World's Records in 1902 and Decisively Beat Major Taylor for the National Honors

By HARRY MENDEL

FRANK KRAMER was as fast as lightning during the season of 1902 and ran away with the national championship. After having the title safely stowed away the East Orange marvel put a crowning touch to his season's work by vanquishing Major Taylor, his nearest rival, in a match race at the Vailsburg track. Kramer took the measure of his dusky rival in two straight heats, the first at a half mile and the second at one mile. It proved beyond the question of a doubt that he was the best sprinter in America and far superior to any other rider.

The final summary for that year showed Kramer with 128 points. Major Taylor was second with but 57 credits, being 71 points behind the pride of East Orange. Jot Lawson was third and Owen S. Kimble and George Collett tied for fourth. The summary was as follows:

	1	2	3	4	Pts.
Frank L. Kramer	18	4	1	0	128
[illegible]	5	6	1	1	57
[illegible] Lawson	1	6	4	4	38
[illegible] S. Kimble	0	4	3	4	28
[illegible] H. Collett	0	4	6	3	28
Willie S. Fenn	1	0	1	4	17

Two Records In One Afternoon

Kramer not only ran away with the title but during the course of the season smashed three world's records, two in one afternoon. His first record-breaking performance occurred on Sunday, April 20, the second race meet of the season, when he led Floyd McFarland over the tape by half a wheel and rode the distance in 28⅗ seconds. The previous record was made on October 13, 1900, by D. I. Brown, of Decatur, Ill. Brown's time was 28⅘ seconds. This new record stood until last year when Kramer clipped a full second off the time in a meet at the Newark Velodrome.

About two months elapsed when Kramer took another crack at old father time. This was on Sunday, June 15, at the Vailsburg track. Kramer smashed the world's record for a half-mile in the third heat and did it by starting ten yards back of scratch. The race was arranged to see how much advantage Kramer could really give his opponents. In Kramer's heat Fisher was on ten yards and Kimble at twenty. Kramer caught Fisher at the first turn and the work of wearing down the other riders began. Passing the grand stand for the first time Kimble and Coburn were leading with Kramer not far back. Kimble and Coburn set a stiff pace up the back stretch, but when the sprint began and Kramer sat down to ride, it was a different story.

Shooting to the front Kramer carried the bunch at a merry clip. He was out for a new mark and although he had the race well in hand he sprinted to the tape a winner and the spectators showed their approval. When it was announced that Kramer had clipped one-fifth of a second off the world's record there was a tremendous applause. The previous time was 55 seconds, made by Pat O'Connor on June 10, 1895, at Minneapolis. The final of this race was won by Walter Bardgett, who led Kramer to the tape by half a length.

Smashing the 10-Mile Mark

Kramer then came through with a record in the ten-mile open, which he won in a sensational finish with Joe Jacobson, Eddie Bald, Danny Sullivan and George Collett. The other riders finished in that order. Kramer's time was 22 minutes and 10 seconds while the record was 22 minutes 35⅖ seconds made by Iver Lawson at New Haven, on August 1, 1901. Kramer's performances for a single day was remarkable: the smashing of two world's records, a victory in one race and second in the other, being his share of the afternoon's sport.

Kramer will not forget his victory over Major Taylor during the season of 1902 if he grows to be 100 years old. The superiority of one rider over another was never more plainly demonstrated than in a special match race, which took place at the old Vailsburg board track, on Saturday afternoon, September 6.

Taylor had always claimed that he was Kramer's master in the sprinting game and accounted for his defeats at the hands of the champion by averring that all the other cyclists were in a league with Kramer and

Frank Kramer (at the Left) with Willie Fenn. This Photo Was Taken at the Newark Velodrome Just Before the Opening of the 1902 Season

Digitized by Google

working against him. Kramer offered to ride Taylor a match race and the colored rider accepted.

On this eventful Saturday Kramer won over Taylor in two straight heats. He won the first heat, which was one-half mile by an open wheel's length and he took the second, which was at one mile by a foot and one-half.

Cheers resounded throughout the grandstand and could be heard for blocks around and the relay of the shouts taken up by those in the bleachers drowned whatever sound was made by passing vehicles or trolley cars. In the fire house, opposite the track, bells clanged and whistles blew. It was a scene that made Kramer blush like a schoolboy.

A Tussle with McFarland

Kramer followed his custom of winning the first race of the season, when he took the Inaugural Stakes at a half mile. The season got under way on Sunday, April 13. With the exception of Major Taylor and Iver Lawson practically all the stars were entered in this race. In the three heats contested Frank Kramer, Floyd McFarland, Charley Hatfield, Franz Krebs, George Collett and Walter Bardgett qualified. The real issue came on the back stretch of the last lap, Kramer was leading and McFarland tacked on to his wheel. The race from there on was between these two and Kramer was compelled to do his best to beat McFarland.

During this year teaming was allowed if the riders declared before the race who they intended to work with. On Sunday, May 18, Kramer put over a win in a twenty-five mile race in which he was teaming with McFarland. McFarland finished second to Kramer while Charley Hadfield was third and John Bedell fourth.

Kramer went along through the early months of the season winning one race after another. There seemed to be no stopping the champion who made a clean up in practically every race meet that he started. The problem at the time was how to beat Kramer, and bike fans wrote into the different Newark papers telling how they thought the champion could be beaten. Hundreds of letters were received. One fan suggested mounting all of the other riders on motorcycles, while another thought that all the riders and trainers who were not busy should swarm on the track and block "Big Steve's" way.

The First Champ Race

Kramer won the first championship race run in 1902. It was on Saturday night, July 12, at the Revere Beach track. The distance was a half mile, George Collett and Eddie Bald following Kramer in. William Martin, known as "Plugger Bill" and F. S. Beauchamp, who came from Australia to participate in the national races, failed to qualify in the semi-finals. Four days later Kramer won a third-mile championship race at Providence. Major Taylor was not a starter in either one of these sprints.

Kramer won the first national championship race ever run in Pittsburgh when he finished ahead of Lawson, Kimble and Collett in a one-mile affair. It was on Monday, July 21, that Major Taylor made his first appearance in national races and the next Wednesday in Washington, D. C., he finished one foot behind Kramer in a half-mile race which was a corker.

Kramer beat Taylor again on the Saturday of that week, in a race at Vailsburg. Kimble was leading twenty yards from home but Kramer just shot by him and took first place. Lawson finished third and the best Taylor could get was fourth position.

Defeated in Canada

Kramer met his first defeat in a championship race for the season of 1902 at Ottawa, Canada, on Saturday, August 2. Major Taylor led him to the tape in a quarter mile championship race. "I will certainly give the Major all the credit in the world for his racing on that day," said Kramer in telling about his defeat. "Taylor rode with a borrowed wheel, a borrowed suit and a borrowed pair of shoes. and even with all of these drawbacks he managed to beat me. Though I got a bad start I pulled up even with Taylor on the backstretch, but on the turn I lost a little and was not able to make up."

On the day previous to this at Ottawa, Kramer had won the one-mile championship race, but Taylor did not ride in this event.

Two days later the riders were still at Ottawa, for it was a three-day meet. Kramer won a half-mile race, which was almost a dead heat, but Kramer got the decision by inches. In this meet Jay Eaton and Orlando Stevens were competitors. It was their first appearance since the "phoney" match race they rode at Vailsburg, two years previous.

On Friday night at Buffalo Kramer beat Taylor home in a five-mile titular race. On the last lap Kramer shot to the front and while Taylor gave him a hard battle down the stretch Frank was able to win out. Willie Fenn and John Bedell followed Taylor home.

Taylor scored his second victory over Kramer in a championship race the next day at Manhattan Beach, in a one-third of a mile sprint. Taylor won by an open length over Kimble who led the champion home by the same distance. At this stage of the season Kramer had a comfortable lead for the championship. He had 65 points while Taylor who was second had but 23 and Owen Kimble in third place was credited with 18. Taylor took another point race from Kramer, at Baltimore, on Thursday, August 14. The distance was two miles.

Kramer in Dead Heat

Kramer and Major Taylor rode a dead heat at Providence on August 27 in a hair-raising finish. Kramer protested the decision and right to this day he thinks he won the races but the judges said no. At Springfield the next night Kramer beat Taylor in a third of a mile race by about two feet.

The cycling season at Manhattan Beach came to a close on Saturday, August 30, with Kramer winning the one-third mile championship race. Major Taylor was pocketed by Lawson and John Bedell in the final heat. Taylor was used so badly that he sat up and stopped riding, while Kramer who was behind the two jumped out and won. Lawson and Bedell were disqualified and Taylor given second place.

(To be continued.)

NEW ENGLAND WHEELMEN DISTRIBUTE PRIZES

NEW YORK, N. Y., Jan. 25.—The New England Wheelmen of New York distributed the various medals and trophies which were offered for the different competitions during the year 1915, on Saturday, January 22, at the club house of the Italian Sporting Union in New York City.

While Eugene Aickelin was generally conceded to be the "clean-up kid" of the evening, Carl Sprauer, Sr., vied with him as to the quantity of the medals and cups which were taken home.

Representatives were present of the following clubs in New York city and vicinity: Glunz Wheelmen, Century Road Club Association, Acme Wheelmen, Century Road Club of America, Italian Sporting Union and the New England Wheelmen.

The prizes and trophies were distributed as follows:

The "Pelham" trophy, for most points in annual series of weekly cork races, won by Eugene Aickelin.

The "Kopsky" trophy, for fastest time unpaced over old cork course on Eastern Boulevard, won by Carl Sprauer.

The "McIntyre" trophy, for most new members introduced during year, won by George Polacsy.

Medals for Annual Championship Races, won by Eugene Aickelin, C. J. H. Tonjes, 2nd; Chris Eiler, 3rd; George Polacsy, 4th.

Medals for Annual Weekly Cork Races, won by Eugene Aickelin, C. J. H. Tonjes, 2nd; Carl Sprauer, 3rd.

Medals for Consolation Race for non-winners, won by William Holl, Jr., Carl Sprauer, 2nd; E. Schindler, 3rd.

HAS BEST C. R. C. A. MILEAGE

NEW YORK, N. Y., Jan. 25.—While the official figures of the National Century and Mileage Competition of the C. R. C. A. are not as yet ready, it is generally conceded that Fred M. Sanborn of Baltimore is again the winner, having before won the competition during 1914. William Winquist of Brooklyn, N. Y., accounts for second prize, while Sylvain Segal, of New York City takes the third prize.

PIERCE BUSINESS BOOMING

BUFFALO. N. Y., Jan. 25.—The Pierce Bicycle Works are experiencing a good year. Large shipments are being made to all parts of the world. Sales Manager Brown says that during the first 4 months and 20 days of this year (their fiscal year begins September 1), they booked orders which are equivalent to three-quarters of their entire business for 1915.

GOODRICH GIANT BLACK SAFETY TREAD BICYCLE TIRES

Giant profits from Giant Tires

You are in business for profit. This tire gives you a handsome profit.

You are also entitled to interest for the money invested in your stock and fixtures. The retail price of this tire gives you that interest.

And in making a sale you often have to work to put on tires and do repairing just to please the customer. *You can get your pay* for this work out of what your customer pays for this tire

Now, look at the tire itself—

You know the unprecedented demand that is sweeping the country for Goodrich Black Safety Tread Auto Tires.

"Giant" is the same identical article in a bicycle tire. It has the same gristly Black Safety Tread. Its fabric is actually heavier than that used on many small sized auto tires of other makes, and is woven so that its loose mesh allows the separate layers of rubber to be welded together through it, an inseparable unit.

"Giant" is guaranteed for a year, everlastingly wears, and *stays sold.*

And, now the demand —

Everybody is talking about the Black Safety Tread *Auto* Tire that Goodrich has put on the market. Dealers are deluged with orders. And when a boy finds he can get the same up-to-date Goodrich Black Tread on his bicycle tire that his daddy has on his auto tire, that's the tire he is going to buy.

The big national "Giant" advertising campaign

is being directed for the most part to the boy. And to further stimulate his interest, we are offering two gifts with every "Giant" Tire. And we are telling him that he can get them at his local dealers' store which is your store. Here they are:

First—A rich maroon or dark blue pennant with silver frosted letters.

Second—The Boys' "Guide Book" telling how to make a boomerang, how to build a camping tent, how to tell poisonous snakes.

(Note—A coupon comes with every tire. He returns this coupon to us, we send him the gifts; hence you are put to no trouble.)

And every dealer gets, with the first ten pairs of tires, our "Giant" display rack which is a real sales booster.

The B. F. Goodrich Company

Makers of the Celebrated Goodrich Automobile Tires

CANADIAN NEWSPAPERS BOOST CYCLING

Give Generous Editorial Space and Agree That Cycling Has Come Back to Popular Favor; Comment on "One Million" Campaign

TORONTO, Ontario, Jan. 25.—Canadian daily papers have taken up the big sales campaign of the bicycle industry in a way that is exceedingly gratifying to the retailers of this and other cities of the Dominion. Half-column editorials have appeared in a number of the leading newspapers of Eastern Canada within the past two or three weeks, and a surprising part of this work is that the writers have struck the "correct dope" in their discussions.

"Neat Bicycle Stores"

The Toronto *Daily News* says: "The anticipation is held that more bicycles will be sold in Canada and the United States during 1916 than during any previous year in the history of the silent 'velocipede,' the so-called boom days of the nineties included. In the American Republic, manufacturers are making preparations for an output of one million bicycles which will be placed in the hands of users, they insist, before another winter. In Canada, the bicycle makers and dealers are preparing to produce or sell more wheels than have ever been distributed in any one year before. Practically every real bicycle dealer in Canada enjoyed a prosperous year during 1915 and the increasingly neat bicycle stores reflect in a decided manner the activity of the times."

Promises to Be Record Year

The Montreal *Gazette*, in part, says: "It may be that the war has had something to do with the restoration of the wheel to public favor on this continent. At any rate, the bicycle seems to be in for another boom which is an excellent thing, it may be stated. The present price of the bicycle is one-quarter what it used to be, a good wheel selling for from $25 to $40 complete. With inexpensive wheels and greatly improved roads, the healthy sport should not want for devotees in the coming summer. This present year promises to see a record in production and manufacturers and dealers have adopted as a slogan, 'One Million Bicycles in 1916.'"

Gaining Health and Saving

The Ottawa *Citizen*, another influential daily, has this to say in a half column article: "It is interesting to learn that bicycling, if no longer a popular sport, is increasing of late years as a means of transportation for city workers and in those districts where there is a considerable distance between the home and the factory or workshop. The price has cheapened very much and the modern wheel is a dependable and durable piece of mechanism. Reliability—not excessive speed—is the chief essential and the user of a wheel has the satisfaction of knowing that in its employment he is gaining in health and saving in pocket."

Other Canadian newspapers are speaking along similar lines of their own volition. No bicycle advertising is contained in the issues in which the above editorials, which are here greatly condensed, appear so that the boosts are not mere readers accompanying advertisements. It is also apparent that the press is reflecting the opinion of many Canadians.

IN TRAINING FOR FUTURE WAR SERVICE

Private A. Walker, Despatch Rider in 91th Battalion, Driving Excelsior Outfit with Sergeant Ward, 12th York Rangers, as Passenger on Way to Camp at Niagara, Ont.

NEW BRANCH FACTORY

Sarnia, Ontario, Jan. 25.—Scretary T. A. Gordon of the Sarnia Board of Trade announces that the representative of a well-known motorcycle manufacturing company of the United States recently visited Sarnia for the purpose of looking into local conditions with a view to the establishment of a Canadian branch factory here. The company will require a plant with 30,000 square feet of floor space to start with, and would employ two hundred skilled mechanics. Negotiations are proceeding and, in the meantime, Secretary Gordon is withholding the name of the concern.

CLASSIC CLUB WINS APPEAL

Toronto, Ontario, Jan. 25.—When police officials laid charges against the Classic Athletic Club of Toronto because of the operation of pool and billiard tables without a police permit, the club officials produced a government charter which authorized the organization to engage in various sports, including the playing of pool. A police court judge convicted the club, however, but an appeal from the conviction was carried to a higher court. On Thursday, January 20, this appeal was allowed by Judge Morson, after a copy of **Motor Cycle Illustrated** was introduced as evidence to show that the club was engaging in bicycling and other outdoor sports in accordance with its charter.

MONTREAL RIDERS MEET

MONTREAL, Quebec.—About fifty motorcyclists of Montreal met recently at the Windsor Hotel to organize the Montreal Motorcycle Association, the details of which are to be worked out at a meeting to be held in the Canadian Athletic Club on January 30. The latest movement to organize a club here was started by Mr. E. Barrett, a veteran motorcyclist of Montreal. Seven years ago Montreal had the only motorcycle club in Canada, but its existence was decidedly short-lived.

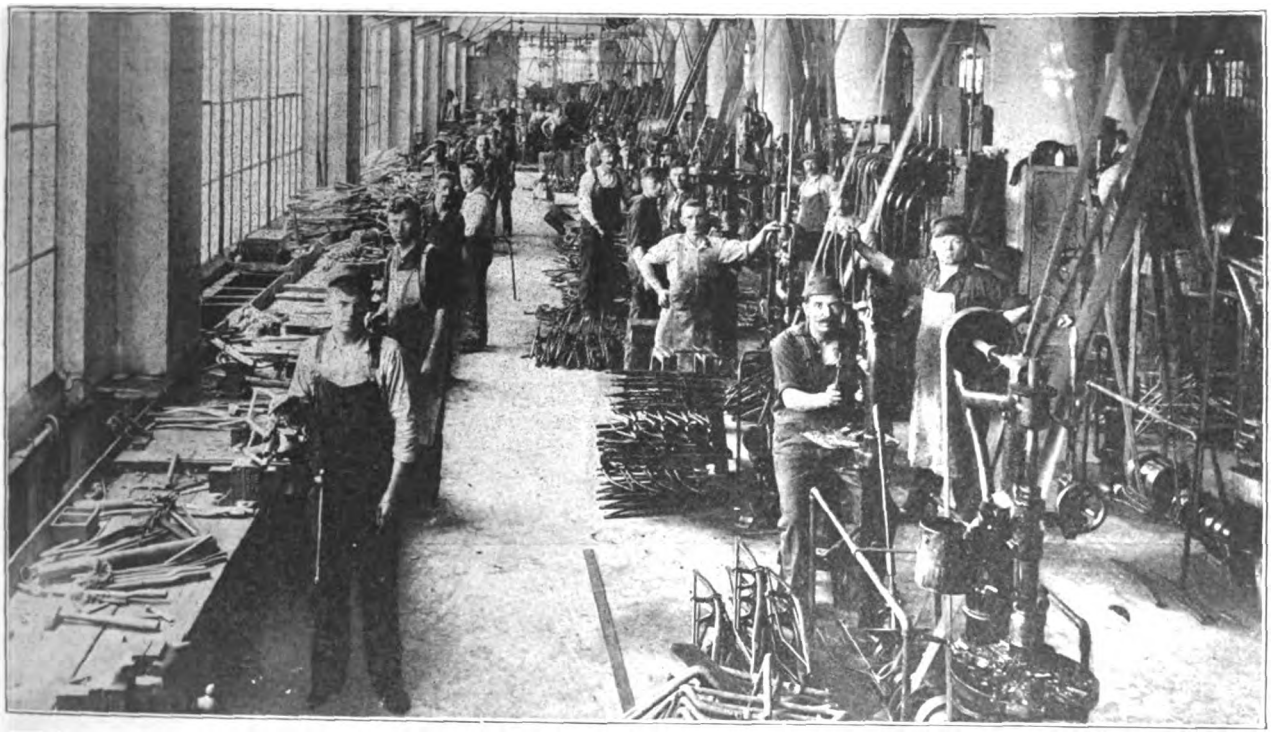
EXCELSIOR FRAME CONSTRUCTION

Nickel Steel Forgings, Extra Heavy Seamless Steel Tubing and Perfect Workmanship Insure Reliability, Safety and Efficiency



Excelsior Frame Shop Machining Assembled Frames

THE Excelsior was the pioneer low saddle position frame and is the one motorcycle frame built of nickel steel drop forgings throughout. There has never been a casting or any other element of cheap construction in any Excelsior Autocycle frame ever built.

By the use of such materials, consistent design and perfect workmanship, Excelsior Autocycle frames have established a world-wide reputation for strength, rigidity and durability.

With correct design and the best of materials, the final result is still a matter of accurate workmanship, requiring not only skilled labor but a thorough equipment in machinery and tools.

Adhering to the fixed policy of maximum efficiency, a large section of the Excelsior factory is equipped with specially designed machines, including boring mills, milling machines, turret lathes, automatic screw machines, grinders, etc., which are devoted exclusively to the various operations of frame building.

In this department the rough forgings are bored and finished in heavy jigs that insure absolute accuracy and perfect fitting of the various parts of the frame.

A Corner of the Brazing Plant

In another department, the extra large gauge nickel steel tubing is cut to exact length and then in still another department, the frames are assembled and prepared for brazing.

The Excelsior brazing department is one of the most elaborately equipped and extensive brazing plants in the country. The brazing together with the pickling and other processes requiring the use of acids, is done in a separate building provided with an elaborate exhaust system to carry away the fumes, thus protecting the workmen and preventing the corrosive gases from getting to other parts of the plant.

The next operation is the removal of the surplus spelter which is done partly by an electrolytic process and partly by grinding and filing.

This being done, the frames are sent to another machine shop where the boring, facing and similar work is done in specially constructed jigs, after which the frames are alined and finally finished for enameling. In this department particular attention is given to the perfect alinement by which maximum efficiency of the power plant is insured, and it is largely through the enormous strength and correct alinement of the Excelsior frames that Excelsior Autocycles have established their many world's records for speed and durability.

The final inspection of the frames and forks is of such thoroughness that no part in any way faulty can get into the finished machine, and the durability of the motorcycle and the safety of the rider are thereby assured.

The frame of a motorcycle is the foundation on which is built the entire structure, and the final quality of the machine is inevitably in proportion to the mechanical perfection of the frame.

The Excelsior frame is as near mechanical perfection as skilled workmen and accurate machinery can make it, and the quality of the entire machine is therefore of the same high degree.—Adv.

SELECTING FOREIGN AGENTS

Holland Representative Says Haste in Placing Agencies Abroad Accounts for Poor Results Often Obtained

ACCORDING to the director of a leading automobile and cycle firm at the Hague in Holland, several manufacturers of motorcycles and automobiles, apparently too eager to do business in that country, have appointed Dutch agents who regard motorcycles and automobiles as a sort of side line, and, in consequence, do not do full justice to their opportunities. Our correspondent claims that even big firms have fallen into this error; that, for example, a large American manufacturer has just entrusted its agency for Holland, Belgium and the colonies to a firm whose address cannot even be found in either a telephone or business directory.

"This is all the more remarkable," writes our correspondent, "because really competent firms, who are well up in the line, are unable to secure agencies. We think you can do a good work by pointing out to American manufacturers and exporters the importance of securing complete information before placing agencies. American products can readily find a market in Holland, and first-rate manufacturers need really not fall back upon some offside agent, but will easily find competent representing firms willing to take up their products. We think it is in the interest of the American manufacturers and the Dutch public to place agencies for American products in the hands of firms with capital for spare-stock, garage, repair shop and showroom facilities. It is only in this way that success for both parties can be secured."

There is undoubtedly merit in the above criticism. It is practically a fact that some of our manufacturers, too anxious to "land" foreign agents, have made in at least some instances rather poor selections. With increasing experience in export business this condition may not be as serious as it was at the start. In any event, the main point is that substantial foreign firms are only too eager to secure American agencies, so that it is not necessary for our manufacturers to consider the applications of small or unreliable firms.

COMMERCIAL ABBREVIATIONS USED IN ITALY

THERE have come to the attention of the American Consul at Rome several cases of misunderstanding between American exporters and Italian importers in which the use of commercial abbreviations has led to serious complications. There are certain generally used abbreviations known all over the world in commercial transactions which seem to be capable of different interpretations, to judge from a recent controversy between an importer in this city and an American exporter. In telegraphic communications such abbreviations are widely used, and it is therefore of the greatest importance that their significance should be understood. While the following list, showing what is meant by common abbreviations in Italy may appear elementary, the need of explanation of these terms has been shown in actual transactions:

F. o. b.—Free on board—is invariably understood to mean free on board ship at seaport. In Italy it is never understood to mean free on board cars. For instance, f. o. b. New York means that freight from the inland place of manufacture or shipment, insurance (if any) during the railroad transit in the United States, cartage from depot to dock, and loading charges at dock are all paid by the exporter.

F. a. s.—free alongside (ship)—means that railroad freight and insurance in the United States and all cartage charges to the dock are paid by exporter. The loading charges from dock to ship in this case are paid by the purchaser.

F. o. r.—free on rail—means loaded on railroad cars at the point quoted; e. g., by f. o. r. Cincinnati or f. o. r. New York it is understood that the purchaser buys the goods on the railroad cars at Cincinnati or New York free of all charges.

C. i. f.—cost (of goods), insurance, freight. By this term it is understood that the exporter sells the goods with all charges paid to the point quoted. For example, a quotation of coal at $12.50 per ton c. i. f. Naples would mean that the coal is sold by the exporter at that price on shipboard at Naples, the exporter having paid all charges, including ocean freight and insurance. The Italian buyer would have to pay the cost of unloading from ship, customs duties, and handling charges in Italy.

MALAY RUBBER EXPORTS

The exports of cultivated rubber from the Federated Malay States during the eight months ending August, 1915, amounted to 26,673 tons, compared with 18,671 tons for the same period in 1914.

LETTER FROM DUTCH AGENT

We are in receipt of a letter from J. Witmondt, Prinsengracht 291, Bij de Westermarkt, Amsterdam, Holland, who advises that he is desirous of representing American manufacturers of motorcycles and accessories in Holland and the Dutch Colonies. Mr. Witmondt states that for years he has been sole agent for many large English firms, and gives as reference The Enfield Cycle Company, of Reddich, England; the Abingdon Ecco, Ltd., Birmingham, England; J. B. Brooks & Co., Ltd., Birmingham, England; New Hudson Cycle Company, Ltd., Birmingham, England. Mr. Witmondt is desirous of receiving catalogues and quotations with trade discounts from firms not already represented in Holland, or who may be desirous of making any changes.

MADAGASCAR'S IMPORTS

A report recently rendered by Consul James G. Carter, of Tamatave, Madagascar, to the Department of Commerce, Washington, D. C., shows that among the imports into Madagascar having an increase in 1914, were motorcycles, bicycles and parts, which were valued at $44.824 in 1913 and $94,975 in 1914. The report does not show what proportion of these motorcycles and bicycles come from the United States. It is probable, however, that the proportion was larger than in the case of the total imports into Madagascar. These were valued at $9,139,000 in 1914, of which goods worth upwards of $7,500,000 were furnished by France and French Colonies, about $1,000,000 by England and British colonies, $117,000 by Germany and $290,000 by other countries, including the United States.

CYCLES IN STRAITS SETTLEMENTS

Automobiles, motorcycles, bicycles and parts, to the value of $970,502, were imported in 1914 from foreign countries into the Straits Settlements, and similar articles valued at $631,687 into the Federated Malay States.

ITALIAN CYCLE IMPORTS

During the year 1914 bicycles, motorcycles, parts and accessories, valued at $252,380, were imported into Italy, as against imports of the same articles valued at $330,960 in 1913.

REPORT FROM JOHANNESBURG

We are informed by American Consul Edwin N. Gunsaulues, who is stationed at Johannesburg, Union of South Africa, that very few American-made bicycles are in use in that country, nearly all having been imported from Great Britain. American-made motorcycles, however, have a very large sale in that Consular District, trade in these machines having had a great impetus within the last two or three years. Mr. Gunsaules adds: "I should regard the opportunities for trade in motorcycles as affording a good market for American manufacturers."

DETROIT, MICH.

October 25th, 1915.

Motorcycle Illustrated
13 Park Row,
New York City.

My dear Mr. Condiot:-

Enclosed you will find copy to be run in the next issue of your paper.

I am pleased to state that we are getting splendid results from the ads in your paper. We are constantly receiving inquiries from small dealers in places where we never have an opportunity to call and these are the kind of results that we are looking for.

We thank you for your cooperation and beg to remain

Yours faithfully,
FENTRESSNEWTON MFG. CO.
Irving Beck
Sales Manager.

The Fentress - Newton Manufacturing Company, of Detroit, Michigan, make tandems — good tandems. So good that a very large percentage of American-made motorcycles are fitted with the famous F-N.

The unsolicited letter shown herewith is another strong proof of our contention that good goods, consistently advertised in MOTORCYCLE ILLUSTRATED AND BICYCLING WORLD, will invariably gain a wider distribution.

We have many more letters like these, and will reproduce them from time to time.

Model L-16—Price $225

Because They're Built Right—They Sell

Pope dealers are not afraid to answer frankly the questions of their most particular customers concerning the construction of these famous motorcycles. They know that Pope construction sets a standard. They can be enthusiastic over the advantages offered by Pope Motorcycles because they have solid facts of road experiences to back up their enthusiasm.

Pope

Motorcycle Model L-16

Using

S. K. F. Ball Bearings

These Pope superiorities are embodied in the POPE MOTORCYCLE MODEL L-16. This popular single speed has the celebrated Pope motor that marks the height of present day perfection in motorcycle construction.

As an example of the care which every feature has received, note that **S. K. F. Ball Bearings** are used on the magneto drive. Because of the difficulties of lubrication the Pope engineers realized that none but the finest kind of ball-bearings could live up to their requirements. And this is typical of every bit of Pope construction.

Conscientious workmanship like this means sales for you. Our facilities assure prompt deliveries.

Write today for our prices—they will interest you. Catalog is ready.

WESTFIELD, MASS., U.S.A., January 26, 1916

S. K. F. BALL BEARING COMPANY,
NEW YORK, N. Y.

Gentlemen:-

For a number of years we have used S.K.F. self aligning annular ball bearings for a portion of our requirements, and for the Season of 1916 we have standardized our annular ball bearing requirements so that S.K.F. Self Aligning Annular Ball Bearings will be used exclusively. This includes the mounting in both sides of our Transmission Case of the heavy and extra heavy series of Bearings.

Very truly yours,
WESTFIELD MANUFACTURING COMPANY
By- W. L. McGrath
MECHANICAL ENGINEER

SKF

SKF Ball Bearings were the first ever purchased by the makers of the POPE. Since 1911 SKF Ball Bearings have worked—literally *worked*—their way deeper and deeper into the confidence of the Westfield Company until now they are to be used exclusively. Motorcycle manufacturers will realize the significance of the words "for the season of 1916 *we have standardized our ball bearing requirements* so that SKF Ball Bearings will be used exclusively." There's a wealth of appreciation in those simple words.

"The Most Impressive Argument We Employ," *says New York's Big Pope Distributor*

Everyone knows "Buck," that twin-six Pope hustler who has scratched his mark deep into the sales-annals of the motorcycle industry. He's a keen fellow, quick to grasp the sales-idea. And it is this quality that instantly made him appreciate the value of SKF Ball Bearings as a sales-factor in "closing" a prospect. Read his letter.

Let us make a point clear to those men who boost and sell Harley-Davidson,

B A L L
BEARINGS

Pope, Miami, Cleveland and Reading-Standard Motorcycles:

When you show your prospect an SKF Self-Aligning Ball Bearing and point out the place it occupies in the machine YOU sell, you are adding a "wallop" to your sales-talk that brings your man to the buying point — every time. Try it and see.

New York December 24, 1915

SKF Ball Bearing Co.,
50 Church St., N.Y.

Gentlemen:

We find it an excellent plan to show a dissembled Pope motorcycle when trying to "land" a prospective purchaser. The most impressive argument we employ is the fact that SKF Ball Bearings are used both on the engine and in the three speed.

The intelligent buyer appreciates the "different" quality of SKF Bearings. The self-aligning feature is an important point and makes a decided hit.

We have nothing but praise for SKF, both as an efficient service factor and as a means for speeding up sales.

Very truly yours,
WEAVER-EBLING AUTOMOBILE CO.

35 Years!

Every one of the "Old Guard" knows the Bicycling World. For *thirty-five years*, first as Official Organ of the League of American Wheelmen and then as an independent trade publication, the "Bi-World" has been the companion, the counseler and news-purveyor for thousands of bicycle dealers and riders.

Small reason, then, to wonder at the tremendous following the Bicycling World has built up in the trade during the many years of its life. ALL the responsible bicycle dealers, jobbers and manufacturers read it. Because, by a steady process of faithful service, it has welded itself into the hearts and minds of ALL the trade.

The BICYCLING WORLD is now incorporated with MOTOR CYCLE ILLUSTRATED. The mating is proper, for so closely interwoven are the two industries that the publishers' policy of constructive service to the cycle trades demanded this move.

The same staff that made the BICYCLING WORLD so universally popular still runs the bicycle paper.

Remember—the date of our big Bicycle Number is February 24th

Smith Motor Magneto Perfection

ALTHOUGH we have explicit confidence in the magnetos we purchase for Smith Motor Wheels, we administer, nevertheless, a most rigid examination and test before passing them to the assembly department.

FOR example, each magneto is first thoroughly inspected as to mechanical measurements. All magnetos passing this examination are placed on a specially constructed testing bench, shown in the picture above, where they are run for many hours and their electrical efficiency measured by a number of delicate instruments.

THIS test is many times harder than any actual service required of the magnetos on Motor Wheels. However, such precaution and strict attention to details of all Motor Wheel parts are what insure long durability and satisfactory service to Motor Wheel riders. If you are not a Smith Motor Wheel dealer, write for our 1916 Profit Proposition to Dealers now. Tell us the lines you handle and the size of your business. Address:

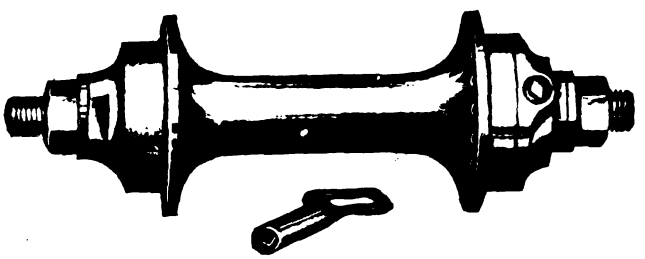
ECLIPSE LOCKING FRONT HUB

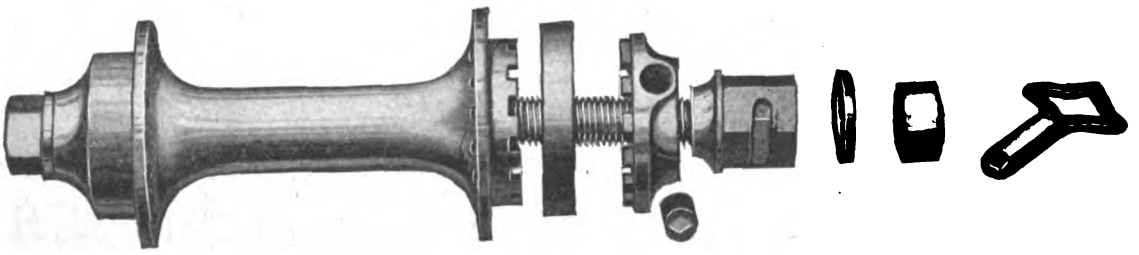


FOR

Bicycles and Motorcycles

An invention which is revolutionizing the locking device market

Riders buy a machine to own it. They demand protection against theft and the annoyance of the practical joker. The lock and chain are things of the past. The Eclipse Locking Front Hub is efficient, thief proof and fool proof. Carry a key; that's all. Same distance between cones.



SIMPLEST, SUREST LOCKING DEVICE KNOWN

This photograph shows the Eclipse Locking Hub parts (made for both bicycles and motorcycles). It shows the ball race flange notched to receive the locking member. Between the notched surfaces is shown the dust ring, slipped off to expose the notches. The cone has a hexagon head, over which the locking member moves longitudinally, by the use of a socket key inserted over the diamond shaped shifting pin. The inside end of the shifting pin operates cam-like in the slot in the hexagon cone head and is held securely, either locked or unlocked, by a flat spring which prevents movement. Unlimited key shapes are provided.

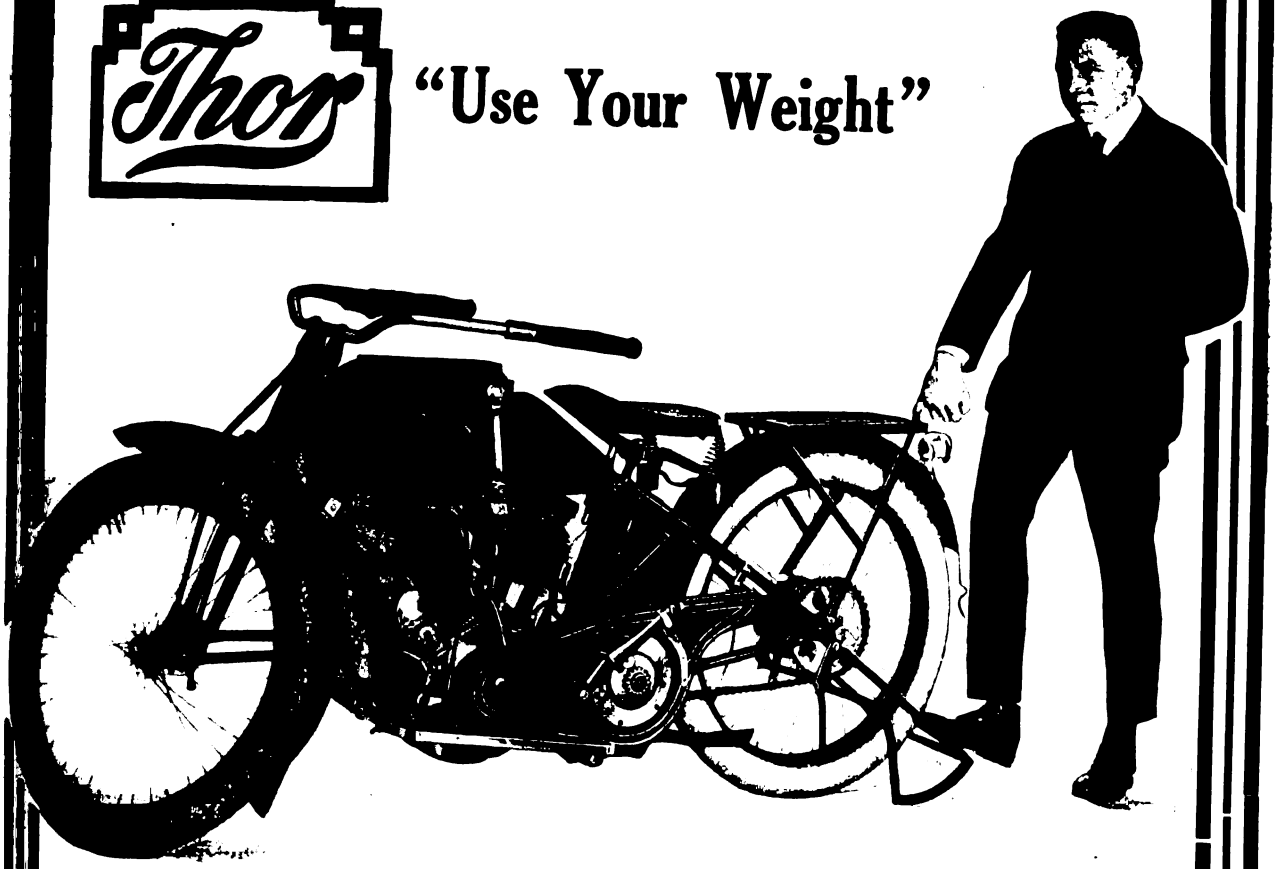
Thor

"Use Your Weight"



Here's a new stand! Drop it—press on it with the right foot, and the machine rolls up on the stand. It's the roller mechanism that does it.

No more sweating from the violent exertion, formerly necessary, to put the stand in place. Just one finger and the pressure of the rider's foot is all that is now required—on the Thor.

This roller-stand feature is regular equipment on the Thor U—12 H.P. Model. It is an Exclusive Thor Feature! Riders will demand the Thor.

DEALERS: You can see that this is a tangible selling point. It will make a big "dent" on experienced riders. This feature, alone, will sell many Thors for you—if you hurry and get the Thor Agency. Write today, to

Belt Transmission
The Decision of Miami Experts

THE success of the Miami Power Bicycle is due to its light weight, its exceptional power, its thorough simplicity, and its smooth transmission. These are the requirements of the modern motorcycle for "Everyman."

Years ago when the Miami Power Bicycle was being put through its experimental paces, all kinds of transmissions were carefully considered and tried. The result was the selection of the belt drive.

Miami engineers selected belt drive because they found that the main essential of a good Lightweight Motorcycle was getting sufficient power to the rear wheel, getting it there without intricate mechanism, getting it there positively, and without loss, yet with that silky smoothness so desirable of Lightweights and only to be found in Belt Drive Lightweights.

You agree, Mr. Dealer, that a Lightweight Motorcycle must be part of your selling line. You agree that it must be a good Lightweight—simple, clean, noiseless and smooth running. You must agree then that the Lightweight you select must use a belt drive, belt drive only as is provided by using

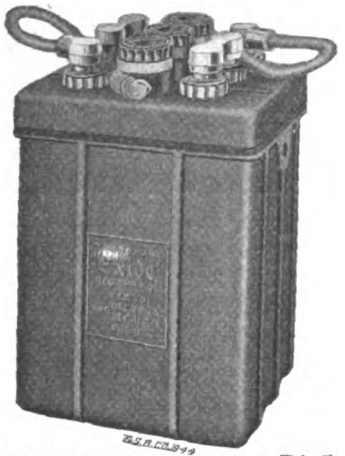
Make Your Electric Lighting Reliable
Use The "Exide" Battery



"Exide" Battery, Type 3-ZA-5
with cable type terminals

A properly designed storage battery furnishes the most dependable source of current for motorcycle lighting.

The "Exide" Battery, Type Z, has been especially designed for this service and is being used on thousands of machines with the most satisfactory results.

The "Exide" motorcycle battery is manufactured by the oldest and largest storage battery maker in the country. It is of the same design as the "Exide" Batteries with which a majority of all electric vehicles are equipped, the same design as is being used in hundreds of thousands of automobiles for starting and lighting and for numerous other storage battery services.

Users of "Exide" motorcycle batteries have at their command all of the facilities of the enormous "Exide" Service Organization, which includes 14 Sales Offices, 14 "Exide" Battery Depots and hundreds of "Exide" Service Stations.

Write our office nearest you and ask for our folder No. 1252 which describes in detail the construction of the "Exide" Battery.

TO DATE (January 29th)

we have shipped 34 1916 models to Carl W. Bush, Harley-Davidson dealer in Newark, New Jersey. Last year to January 29th we had shipped him 21 1915 Models. In addition to the 34 machines we have shipped to date, Mr. Bush has 15 orders for later delivery.

Carl Bush's success lies in the fact that he is a good business man, that he selected the right line, and that, through the progressiveness of the Harley-Davidson factory organization, he secured prompt deliveries following the early show.

Hundreds of other Harley-Davidson dealers are enjoying a nice increase in business this year. Are you?

Bicycle Tire Buyers Take Notice

A Standard Quality and Standard Price Established at last

As a concrete illustration of the Goodyear policy of keeping faith with the public—here is a definite, positive saving of $3,000,000 to $5,000,000 per year offered the Bicycle Tire buyers of America.

The bicycle business in America has been in existence for more than twenty-five years.

And yet, never before, has there been one standard of quality in bicycle tires at one standard price.

More than a thousand brands of bicycle tires are marketed in this country today.

No man has known heretofore what price he ought to pay in order to get the best.

He has been asked to pay, and has paid, $3, $3.50, $4, $4.50, $5, and even more per tire.

But he need not now pay a cent more than $2.50.

That is now the standard price for the highest standard of quality—$2.50 for the guaranteed Goodyear Blue Streak Single Tube Bicycle Tire.

This Goodyear policy of one tire, one brand, one quality, one guarantee, and one price will cut off, at a stroke, an unnecessary expense of more than $3,000,000, which American bicycle tire buyers have paid for years.

The Goodyear Tire & Rubber Company neither asks nor expects praise or approval for this action.

In establishing this standard price to Bicycle Tire buyers, we actually serve our own best interests.

We strengthen our own self-respect; we win the respect of the tire buyer; and we are repaid a thousandfold for doing what is merely right.

No one in particular has been to blame for this abuse. It was a condition which grew up because public and trade alike seemed to demand a multiplicity of tire brands.

Years ago Goodyear began cutting down the number of its brands, fighting trade conditions in order to do it.

And now the fight is ended.

You can go to any Goodyear dealer anywhere—and there are more than 7,000 of them—lay down $2.50, and know that you are getting the best bicycle tire value the world offers.

The Goodyear Blue Streak is guaranteed to you and to the dealer to give satisfactory service or be replaced with a new tire free.

Never again—no matter what the argument or conditions—pay a penny more than the Blue Streak price.

You can always tell the Goodyear by its beautiful white tread, with the Blue Streaks on each side.

Just say flatly: "I want that handsome Goodyear Blue Streak; and I won't pay more than the Blue Streak price."

And that will settle it!

GOODYEAR AKRON Bicycle Tires

The Goodyear Tire & Rubber Company
Akron, Ohio

Advertisement From the Saturday Evening Post, January 15, 1916

When you realize that the above full page advertisement in the Saturday Evening Post will be seen by six million readers, you have a fair idea of the importance we attach to the Goodyear Bicycle Tire Selling Policy.

We believe that one standard tire, at one standard price and guarantee, will promote an increasing sale of bicycles quicker than any other single factor in the business.

And we believe you will think so too, if you stop to consider the evils in the tire selling methods this Goodyear policy now ends.

For assurance of prompt attention to your wants mention MOTOR CYCLE ILLUSTRATED.

Posed by Carl Goudy on his Bosch-Equipt Excelsior

No record of ignition performance ever has equalled the record made by the

BOSCH MAGNETO

The 10 Best Victories of 1915
Are 10 Bosch Victories Too

1. 300 mile race, Chicago, Ill., Carl Goudy, Excelsior, 3:29:51⅖, 86 m.p.h., Bosch Magneto used.
2. 300 miles, Dodge City, Kas., Otto Walker, Harley-Davidson, 3:55:45, average 76.2 m.p.h., Bosch Magneto used.
3. 300 miles, Venice, Cal., Otto Walker, Harley-Davidson, 4:24:17⅕, average 69 m.p.h. Bosch Magneto used.
4. 200 miles, Phoenix, Ariz., Joe Wolter, Harley-Davidson, 3:07:27⅕. 64 m.p.h. Bosch Magneto used.
5. 200 miles, La Grande, Oregon, Wolter, Harley-Davidson, 3:36:58, 55.3 m.p.h. Bosch Magneto used.
6. 150 miles, Oklahoma City, Okla., Parkhurst, Harley-Davidson, 2:20:50, average 64 m.p.h., Bosch Magneto used.
7. 100 miles, Peoria, Ill., 82:30⅕, average 72.7 m.p.h., Carl Goudy, Excelsior, Bosch Magneto used.
8. One-hour F. A. M. Championship, Chicago, Ill., Robert Perry, 64¼ miles, Bosch Magneto used.
9. 300 mile relay race, Readville, Mass., Robert Perry and Carl Goudy, Excelsior, time 4:24:00⅕, average 68.1 m.p.h., Bosch Magneto used.
10. 200 mile relay, Columbus, O., winner Robert Perry and Carl Goudy, Excelsior, time 2:58, average 67.4 m.p.h., Bosch Magneto used.

With this wonderful record of Bosch Reliability and Bosch Efficiency before you, it is hardly possible that you would buy or sell a motorcycle with other than Bosch Magneto Ignition. It costs motorcycle makers a trifle more, but it serves and satisfies better—better than you ever could imagine, unless, of course, you are a Bosch user.

ERWIN BAKER SETS NEW 1,000 MILE MARK

Covers the Distance Over Rough Australian Roads in 21 Hours and 3 Minutes, Using Powerplus Indian; Previous Pro. Record for 21 Hours Was 690 Miles and 586 Yards

NEW YORK, N. Y., Feb. 2.—According to a cablegram received in this city on Monday from Sydney, Australia, Erwin G. Baker, on his Powerplus Indian, established a new world's record for one thousand miles on Saturday, January 29. The new mark was hung up under very trying conditions, "Cannon Ball" being obliged to ride against a strong wind and through a severe rain storm. He covered the distance in 21 hours and three minutes

Beats English Record

The professional record for twenty-one hours was 690 miles and 586 yards, made by H. A. Collier, of Canning Tower, England, on May 5, 1909. The amateur record for the same time is 945 miles and 587 yards, set up by Charles Spencer, at Springfield, Mass., during a special track exhibition on October 2, 1909.

Baker's run was made over rough Australian roads, yet in spite of this he experienced no mechanical trouble, except once when he had to readjust a valve. The run was held under the auspices of the Victorian Motorcycle Club.

Baker rode at a consistent clip of fifty miles an hour, allowing fifty minutes stop for fuel and food, so that at times he rode at a seventy-five mile an hour rate. "Airhorse" Baker's 1916 Indian was equipped with United States Nobby Tread Tires and a Dixie Magneto.

BAY STATE RIDERS URGED TO BACK NEW BILL

WESTBORO, Mass.—Secretary-Treasurer G. B. Gibson, of the F. A. M. has called the attention of riders in Massachusetts to House Bill No. 1124, now before the Massachusetts legislature. This bill allows registration and operation of a motorcycle for $2. Just one-half that of the present fee. Riders are directed to write their Senators, Representatives and Chairman Haigis of the Roads and Bridges Committee, and riders are advised to get up petitions directed to the same officials in order to have the measure passed. Sidecarists are advised to write direct, recommending a change in the legal definition of a motorcycle, to have it read "a vehicle, having two or three wheels in contact with the ground, which is propelled by a gasoline motor, and upon which the rider sits astride."

Two F. A. M. officers will appear at the hearing before Chairman Haigis' committee on February 8, but co-operation on the part of all Bay State riders is needed.

WILL PROMOTE BIG RACES IN OHIO CITIES

DAYTON, O., Feb. 2.—The incorporation of the Miami Racing Co., with a capital stock of $5,000, by Dayton interests, indicates the consummation of plans for a big program of motorcycle, bicycle and motor racing in this vicinity during 1916. The incorporators of the company are: Robert E. Gerspacher, of the Auto Service Co., E. D. Hensley, of the United States Tire Co., R. E. Gerkins, of the Gerkins Oil Co., Daniel Larkin, and E. H. Rehn.

The company has already taken leases for the season on tracks in Dayton, Springfield, Greenville and Wapakoneta, and options are held on tracks in Lima and Chillicothe, one of which will probably be added to the proposed circuit. The plans of the promoters are to start racing in Dayton on the first Saturday in May, and continue them at Dayton and the other towns mentioned throughout the season. All of the tracks controlled are fast. It is possible that the company will establish in each of the towns where it operates a track a store for the handling of motor oils, tires, accessories and the like, but this has not yet been determined.

NEW CRISTMAN BILL PASSES ASSEMBLY

Measure Calling For $2.50 Annual Fee For New York State Motorcyclists Accepted By Lower House—Speed and Age Limitations Provided.

ALBANY, N. Y., Feb. 1.—The amendment offered by Senator Cristman, of Herkimer, to the present highway law, relating to the registration and licensing of motorcycles, has passed the Assembly and has been submitted to the Senate. It will be passed upon by the superior body before April 1, it is predicted in motor vehicle circles in this city, and will probably be accepted and become law.

Non-Residents Exempted

The Cristman amendment, presented by the Herkimer senator in the form of a bill, calls for an annual registration fee for motorcyclists of $2.50, this fee to be charged to resident riders only. Non-resident riders are exempted in accordance with the provisions of the existing highway law the same as regards automobiles in New York State. The minimum age for riding and operating a motorcycle is fixed at sixteen years. A rate of speed in excess of 30 miles per hour is prohibited. The funds accruing from the license fees are to be used for the maintenance of the improved roads of the State.

Old Bill Defeated

This is Senator Cristman's second measure proposing the licensing and registration of the motorcycle in the State. His first bill, presented in 1915, fixed a tax of $5 for the rider and $10 for the dealer; later this was modified to $3 for the rider. Senator Lockwood introduced a second bill at the same time that the Cristman measure was under consideration, calling for a $2 annual fee for the rider. Through the combined efforts of **Motor Cycle Illustrated** and the F. A. M. in New York, the Cristman measure was defeated. The Lockwood measure did not pass the New York Legislature.

CYGNET SALES SWELL AT CHICAGO

Orders for Rear Cars Take Big Jump at Automobile Exhibition and Will Keep Things Humming at Buffalo Factory.

CHICAGO, Ill., Feb. 3.—Cygnet Rear Cars received a most enthusiastic reception during the automobile show which closed last Saturday. No less than 38 dealers outside of Chicago closed yearly contracts with Sales Manager Leadley Ogden of the Cygnet Rear Car Co., of Buffalo, N. Y., while local dealers and distributors were by no means slow in signing up. Mr. Ogden was assisted by Factory Manager Edgar Messersmith in his good work.

The first man to sign up was M. C. Cameron, of the Harley-Davidson Sales Co., of Dallas, Texas. Cameron closed the deal about ten minutes after the show opened. The Lippow Cycle Co. representative from Milwaukee, Wis., sent a phone call from his headquarters after leaving the city and grabbed the Henderson which was shown at the booth as a preliminary. By the third day of the show, the Rear Cars in the exhibit were all booked to be sent off immediately the show was over.

In Chicago, R. C. Crist, Excelsior factory representative for Cook county, and the Edwards-Crist Mfg. Co., Indian distributors, together accounted for 32 rear cars. Demonstrations were given by Sales Manager Ogden to Simon Florsheim, president of the Florsheim Shoe Co., and Sales Manager H. N. Kirk, of the Aurora Automatic Machinery Co., maker of the Thor. The Thor retail store on Michigan boulevard took four cars as a result. C. H. Lang, distributing the Harley-Davidson, got his demonstration and signed up at the close. Paul Hanke, who handles the silent gray fellow on the North Side, took orders for two right away. The contracts closed in the Middle West, including Chicago, assure the rear car people of 800 cars for the 1916 season, this figure not including those orders at the New York show.

The rear car exhibit consisted of pleasure and commercial models attached to Henderson, Indian, Excelsior and Harley- Davidson models.

NEW RHODE ISLAND LAW

PROVIDENCE, R. I., Feb. 2.—A bill has been presented in the Rhode Island legislature which seeks to create a uniformity with the motor laws of Massachusetts. It calls for lights to enable a driver "to see any person, vehicle or substantial object upon the roadway or side for 10 feet on each side of the motor vehicle and 10 feet ahead of the vehicle." It also provides that the headlight shall cast no rays higher than 3½ feet above the ground at a distance of 60 feet, but so long as the rays do not exceed the 3½-foot limit they may penetrate to a distance of 150 feet.

If passed the act will be enforced by the State Board of Public roads, which have already equipped the State's cars with lights of the suggested calibre.

GAS AT FIFTY PER

SYDNEY, Australia.—Motorcyclists are fighting against the attempt of the gasoline companies to increase prices. The companies are trying now to raise the price of gas above fifty cents. But whatever increase will be made must first be passed on by the Necessary Commodities Commission, which regulates prices out here.

PUSH SPEEDWAY WORK

CINCINNATI, O., Feb. 2.—Work is going on apace on the Cincinnati speedway, under the supervision of Architect Harry Hake. Surveyors are now cross-sectioning the site, preparatory to the making of estimates on the grading necessary for the construction of the grade, and in a short time everything will be ready for the letting of contracts.

BALTIMOREANS HOLD ANNUAL BANQUET

Huge Crowd of Riders Gather Around the Festal Board—Eight Vaudeville Acts Given by Splendid Talent.

BALTIMORE, Md., Feb. 2.—The big social event of the season of the Maryland M. C.—the annual banquet—was held last Thursday evening at the clubhouse, 847 Hamilton Terrace. It was the best one ever staged by the organization and was the sixth one to be held. The menu was typically Maryland, with all the famous dishes of this state solding a prominent place.

In addition to the "eats" and the few speeches there was a vaudeville program that was exceptionally good, comprising eight acts of splendid talent. The committee responsible for the success of the affair was composed of F. O. Boyd, George W. Coggins and Theodore A. Krug. Gathered around the festal board were the following:

B. C. Aner, R. Heckinger, J. B. McDermott, C. B. Cook, J. E. Codd, W. E. Wood, H. E. Snyder, H. C. Hughes, W. W. Snyder, N. Johnson, C. L. Waters, M. S. Woods, B. W. Schwinger, C. B. Penrose, E. D. Kerns, Jr., T. A. Peterson, C. Frank, J. Becker, W. Becker, V. Daley, C. B. Mears, J. A. Robinson, G. H. Frank, N. J. Schoenig, Chic Thomas, A. C. Nagle, M. T. Carter, W. Fields, G. W. Coggins, F. O. Boyd, W. Cordle, H. L. Needham, H. E. Snook, H. A. Frederick, A. Gebhardt, N. R. Ellis, C. H. Harden, J. Zimmerman, R. M. Crouse, M. G. Barnes.

W. P. Blatt, J. Latinsky, J. W. Phillips, W. Honchell, E. B. Kaufman, J. O. Hyder, H. D. Bartholomew, J. E. Davis, W. Seidlich, E. O. Cox, S. H. Congdon, H. Vetters, C. T. Emmart, W. Becker, W. S. Owens, I. Sandruck, J. F. Lowrey, W. R. Hakerkoen, N. Leppo, J. Jacob, R. L. French, E. A. Coursey, J. Scales, W. Leek, T. E. Thomas, G. Hauser, J. N. Ericson, W. Schaefer, H. M. Gault, C. Scott, S. L. McCallister, W. S. Standiford, H. Mitchell, J. Muth.

G. Yeatman, W. C. Waskey, J. J. Schaefer, F. Anderton, E. Thomas.

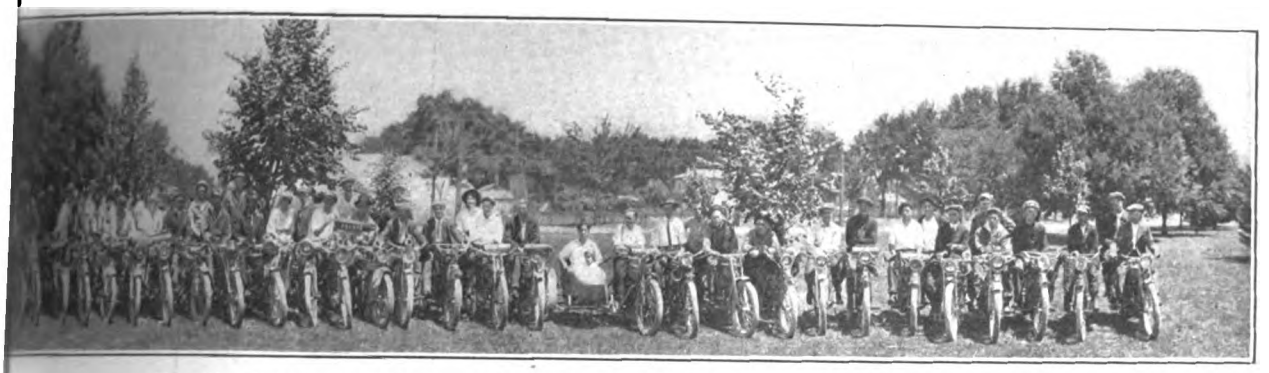
ERRITORY AND CREATES A STRONG FOLLOWING OF RED-BLOODED RIDERS



Fifty-eight Machines with Riders and Passengers Lined Up in Front of the Camera on this Occasion

NEW SALES LETTERS READY

NEW YORK, Jan. 28.—The National Motorcycle Dealers' Information Bureau, of 1482 Broadway, this city, has gotten out a new series of sales letters for motorcycle dealers and will be glad to send them upon request. Application should be made to Secretary E. F. Hallock at the above address.

AFTER BOOTH'S RECORD

SYDNEY, Australia.—Norman Saunders, a crack Australian motorcycle rider, has bought an eight horsepower Excelsior machine and will attempt to lower Jack Booth's half-mile record, which is twenty-two seconds. Saunders has not announced just when he will take a shot at Booth's mark.

ANNUAL SPEEDWAY RACES.

PROVIDENCE, R. I., Feb. 2.—The second annual automobile and motorcycle racing event will be held at the Narragansett Speedway here on September 16. These races last year proved a big success, drawing riders of national reputation.

MONTREAL SHOW DRAWS LARGE CROWDS

American Accessories Hold Prominent Place Among Exhibits; Dealers Are Forced to Stage Separate Shows

MONTREAL, Que., Feb. 2.—The most successful motor show in the history of Montreal was brought to a close on Saturday, January 29, after a week's run, and practically all the local motorcycle and bicycle dealers shared in the general activity. One of the finest exhibits at the show was the display of Harley-Davidson motorcycles by Art. Ross & Company, 751 St. Catherine street West. The entire range of new models was shown.

Another attractive exhibit was that of the A. E. Bregent Company, the features of which were the 1916 model of the Smith Motor Wheel, Worksman bicycle delivery van and an assortment of Pope and other bicycles. The Canadian Fairbanks-Morse Company showed Bosch magnetos and the Kelly Company exhibited the products of the Standard Welding Company. Motorcycle and bicycle tires were shown by the Goodyear, Firestone, Dunlop and Dominion (United States Tire) companies. The Dominion Chain Company displayed Weed chains and S. F. Bowser, Inc., had gasolene tanks on view.

Because of lack of space in the Almy building, a number of dealers were forced to hold shows of their own. Among these was the Canada Cycle & Motor Company, which had on display 1916 model bicycles, Old Sol lamps and many other well-known accessories.

The paid attendance during the week was remarkable, as many as 7,000 people visiting the show during one day. No other show will be held in Canada the season of 1916.

The dealers who held separate shows—and there were several—found that the big exhibition aroused considerable interest in their individual displays. All of them were able to add to their list of prospects, and a few sales were reported. Attractive window displays were used by the dealers during the show.

SAN FRANCISCO RUN TO BE A "KILLER"

Endurance Contest Slated for February 20 Includes a 30-mile Mud Stretch and Many Poor Sections in 270 Miles of Travel

SAN FRANCISCO, Cal., Jan. 26.—The endurance run of the San Francisco [illegible] which is slated for February 20, will be a boulevard joy-ride, according to Stewart Slosson, special Firestone representative and the only man who has been over the course as yet. Slosson covered the entire circuit last week with his Harley-Davidson sidecar combination and had no trouble going until he reached the summit of the mountain west of Saratoga.

Here he found the Big Basin road closed for repairs and the only route open to Santa Cruz an abandoned wagon trail which showed no signs of wheel tracks on it at all, indicating that it had not been traversed for many moons. However, Slosson started to push through the mud of this alleged road and soon stuck with the sidecar axle in the mire. It was well toward midnight when he gave up trying to get the rig out by himself and went off to help. He finally got a man with a mule to haul the sidecar rig out and then worried his way to Santa Cruz. This was the only real bad stretch of road on the course, but it is 30 miles long. Slosson, therefore, thinks that if clear, dry weather does not prevail for two or three weeks before the event, there will be no perfect scores in the run. He covered the course in 13 hours, and during his passage found that there was a lot of enthusiasm for the run among riders in the towns along the route.

The start of the run will probably be from Van Ness and Market streets. The first checking station will be at Belmont, another will be at San Jose and the next at Saratoga. The route from San Jose will take the riders through the Big Basin country, over the abandoned road to Santa Cruz, the next checking station. The route then leads on through Watsonville, Salinas, San Juan, Hollister, San Felipe, Gilroy to San Jose. Checking stations are at Salinas, Hollister and San Jose. Return is made over the route mentioned.

A. W. Green, Dudley Perkins, C. L. Meyer and W. L. Hunt are in charge of the run.

RIDERS TAKE R. F. D. EXAMS

CINCINNATI, O., Feb. 2.—More than 150 motorcyclists, who want to be rural route carriers in this vicinity for the Government, took the civil service examination required for the position last week. The number of applicants was the largest ever examined for the position. The appointees will receive $1,500 to $1,800 a year, but must maintain a motor vehicle out of that salary.

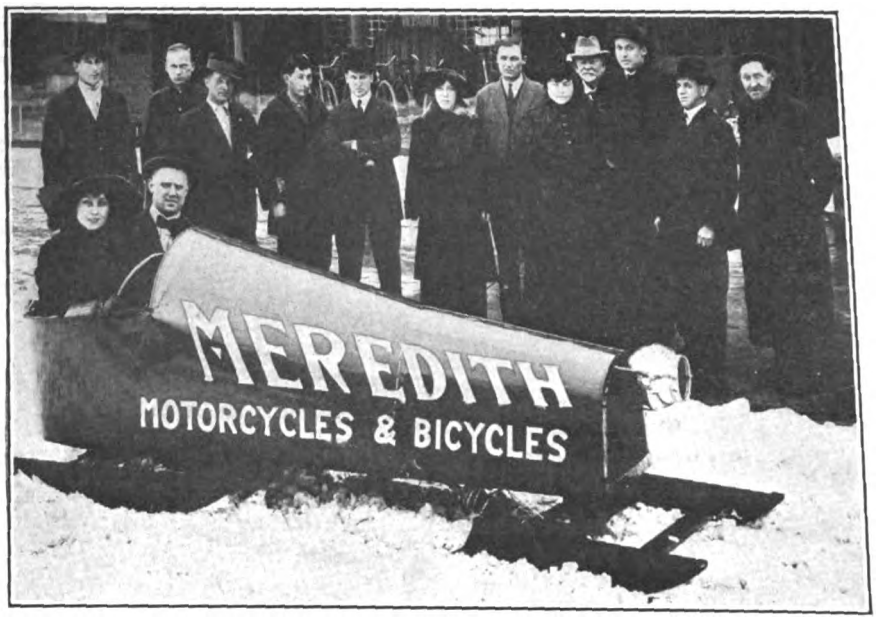
MEREDITH STAFF INSPECTS BRODBECK'S BOB



Forces of Meredith Motor & Bicycle Co., Merkel Agent in Salt Lake City, Utah, Look Over Motor Sled in Which Secretary and Mrs. Brodbeck Are Seated

CHASE ENTERTAINS SHOW COMMITTEE MEMBERS

CHICAGO, Ill., Feb. 1.—Frank T. Chase, of the Frank Mossberg Co., of Attleboro, Mass., was host to the Allied Cycle Trades Show Committee during its session in this city on January 28. Mr. Chase entertained at the Illinois Athletic Club, giving a dinner as a preliminary and afterward showed his guests around the club.

The Show Committee met in session to discuss the date for the New York motorcycle exhibition and decided that the time previously chosen—early in January—would be the proper one and that it should not be disturbed. Among those present at the session were Arthur Davidson, Fred W. Grubb, A. B. Coffman, George T. Briggs and Frank T. Chase.

GAS PRICES STILL CLIMB

ST. LOUIS, Mo., Jan. 28.—The price of gasoline went up another cent here today. Yesterday the Standard Oil advanced the price of Red Crown gasoline from 15.9 cents a gallon to 16.9 cents at filling stations. Today the independent dealers boosted the price of their No. 3 gasoline from 17 cents to 18 cents at filling stations and from 15.9 to 16.9 at tank wagons. A. P. Robinson, local manager for the Standard Oil Company, freely predicted a further advance would be made soon.

DYER GETS DAMAGES

INDIANAPOLIS, Feb. 2.—One of the few cases for damages ever rendered in the local courts in favor of a motorcyclist is that of Fred Dyer, F. A. M. secretary. He was awarded damages to the amount of $2,250 for injuries sustained when he was run down by an automobile three years ago. He was crippled so that he has been unable to do any work since.

ELLIS HAS A PASSENGER NOW

YONKERS, N. Y.—F. A. M.—Commissioner George Ellis is now a benedict. He was married January 25 to Miss Louise Smith, of Yonkers.

The Yonkers Motorcycle Touring Club, in which Commissioner Ellis is a leading light, extended its congratulations in the following form: "We wish Mr. Ellis and his bride good luck and a long and happy life; for he's a jolly good fellow—and as game as they make them."

HOW SMITH TRAVELS WHEN ROADS ARE FROZEN

EUGENE, Ore.—Among the many motorcyclists who enjoy the sport of motor-sledding this season is Yale Smith, who uses the "scooter" fitted with a 1916 Powerplus Indian shown in the photograph herewith. Smith can travel at the rate of 35 miles an hour with another man aboard when using his sled.

The motorcycle is mounted securely upon two side timbers by means of iron braces from each side. The front axle is mounted on a block which also carries the king-bolt. The front truck is controlled in a positive manner by a rod connected to the steering column. On the rear is mounted a side-by-side seat, upholstered in leather.

The clutch is operated by a lever at the left of the driver and the throttle is connected by a wire from the steering wheel to the carbureter. The rear wheel is covered with a canvas to protect the passengers from flying snow. The sled is very comfortable and cost little to build. This is the first time that motorcyclists in these parts have had a chance to motor-sled and advantage of the cold weather is being taken on all sides.

ACTOR AND MOTOR WHEEL IN UNREHEARSED COMEDY

NEW YORK.—As indicating the revival of cycling among all classes, the moving picture firms are now beginning to feature the use of the bicycle in their society photoplays. Often amusing incidents occur during the filming of these productions, and one such was seen recently in the suburbs during the taking of a film featuring Charles Richman.

Richman was riding a bicycle with members of a cycling club in hot pursuit. He was supposed to become exhausted, and stopping in front of a country store, to seize a Smith motor wheel there and fit it to his bicycle, starting off just as he was on the point of being captured. Everything went as planned, but a bull grazing in a nearby field saw the red motor wheel and started to investigate.

The bull caught up with Richman and the Motor Wheel equipped bike and the actor, abandoning the machine, took a five rail fence in short order. The bull attacked the machine but did little damage to it, being driven away by the rest of the company who came up on the run. Richman was rescued and the scene was started over again later in the day.

F. A. M. STATISTICS SHOW GAIN IN JANUARY

WESTBORO, Mass.—Membership statistics for the month of January 1916, show that the F. A. M. has gained 42 affiliated members, 44 unaffiliated members and that 132 members have renewed. Massachusetts leads in renewals, with 22 members, and New York is next with 21. As regards total numbers, New York is ahead, there being 12 unaffiliated, 3 affiliated and 21 renewals.

Massachusetts totals 28 for January, 22 being renewals, 4 affiliated and 2 unaffiliated. Pennsylvania comes next with 12 renewals, 8 affiliated and 7 unaffiliated, total 27. Ohio has 12 renewals and 3 affiliated; South Dakota, 10 affiliated and 4 renewals; illinois, 6 renewals, 5 unaffiliated and 3 affiliated. Northern California has 5 renewals, and 2 unaffiliated. Oregon, Southern California, Indiana, and Virgina have 5 in all; New Jersey has 6, and Nebraska, 4, all renewals. North Carolina has 3 and so has Southern Texas.

BERKS CLUB ELECTS

READING, Pa., Feb. 1.—The Berks M. C. has elected officers for the 1916 season, on the occasion of its last meeting at the club house, 710 Ninth street. William Shearer is president and Raymond Lenich is vice-president, William H. Printz is secretary-treasurer and Charles H. Krick, George L. Dengler and William Shearer are trustees. The entertainment committee is composed of Mesdames John Weinhold and Raymond Lenich, while the house committee is made up of Fred Koenig, President Shearer and William Brown.

NEW ZEALANDER VISITS WIGWAM

SPRINGFIELD, MASS., Feb. 2.—Horace L. Rogers of Wellington, N. Z., representative of E. Reynolds & Co., motor importers, called at the Indian factory in Springfield a few days ago in the course of his visit to the United States. He was shown over the plant, expressing great admiration at the machinery and methods of manufacturing, and had an opportunity to talk with President George M. Hendee and Treasurer Frank J. Weschler. In discussing trade conditions in New Zealand he said it was apparent that the American-made motorcycle had come to stay.

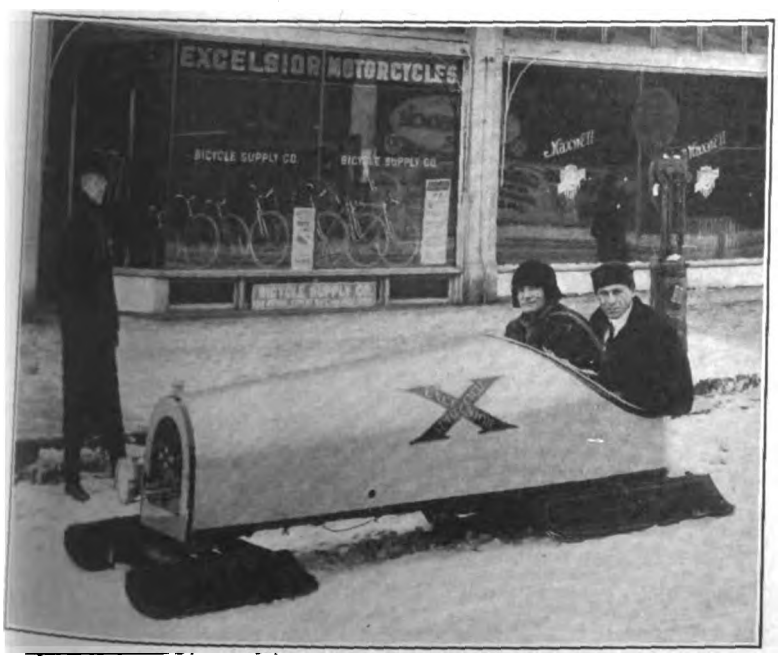
LONG ISLAND HUNTERS USE CYGNET REAR CAR

Wading River Sportsmen Find Rear Attachment Excellent for Transporting Dogs and Game in Addition to Themselves. An Indian Machine Is Used

EXCELSIOR-ENGINED MOTOR SLED STANDS TEST

SALT LAKE CITY, Utah.—Ray Peck and Milo Daly, of the Bicycle Supply Co., 348 South State street, Excelsior agents for this city, have built the motor sled shown in the photograph herewith. The sled is powered with a 1914 type Excelsior twin motor and uses the Excelsior transmission and clutch to drive a motorcycle rear wheel. Weed chains have been fitted to the driving wheel to assist traction. The clutch is placed at the left of the operator. The body is of the streamline type and driver and passenger sit in two comfortable seats at the rear. Cooling of the motor is effected by an opening in the front of the body. The sleds proper are of wood with metal runners.

In every test that Peck has put it to the sled has stood up finely. In recent trials at hill climbing and speed, the expectations of both Peck and Manager C. W. Brewer were surpassed. Manager Brewer, is seen standing by the sled.



Ray Peck at Wheel with Milo Daly in Bob Built by Them. Item Above

ANOTHER ARREST IN HOLD-UP CASE

TERRE HAUTE, Ind.—A further arrest has been made in the motorcycle bandit case of October 9 last, when two riders "stood up" the paymaster of the Vandalia Coal Company, at Lattas Creek, and got away with $9,000. Last week, Bert Dickey, a miner at Shelburn, was turned over to the Indian Reformatory to serve from one to 14 years as a receiver of stolen goods. He was alleged to have been caught with part of the payroll.

"Dusty" Graham and Harry Davy, two former miners from Shelburn, were recently convicted of the hold-up. A confederate of Dickey's is still at large.

AMERICAN TIRE INCORPORATES

AKRON, O., Feb. 2.—The American Rubber and Tire Company has been incorporated with a capital of $500,000 to manufacture automobile and motorcycle tires, etc. The incorporators are Louis B. Mauger, Geo. W. Kratsch, Fred H. Snyder, Frank H. Snyder and I. M. Taggert.

BOON FOR REPAIRMEN

LOUISVILLE, Ky., Feb. 2.—Representative Minor has introduced a bill into the Kentucky legislature proposing to give repair shops the authority to sell articles repaired upon which the charges are not paid inside of a reasonable time. This bill would prove a great benefit to motorcycle and bicycle repairmen who have money tied up in repair work of one kind or another.

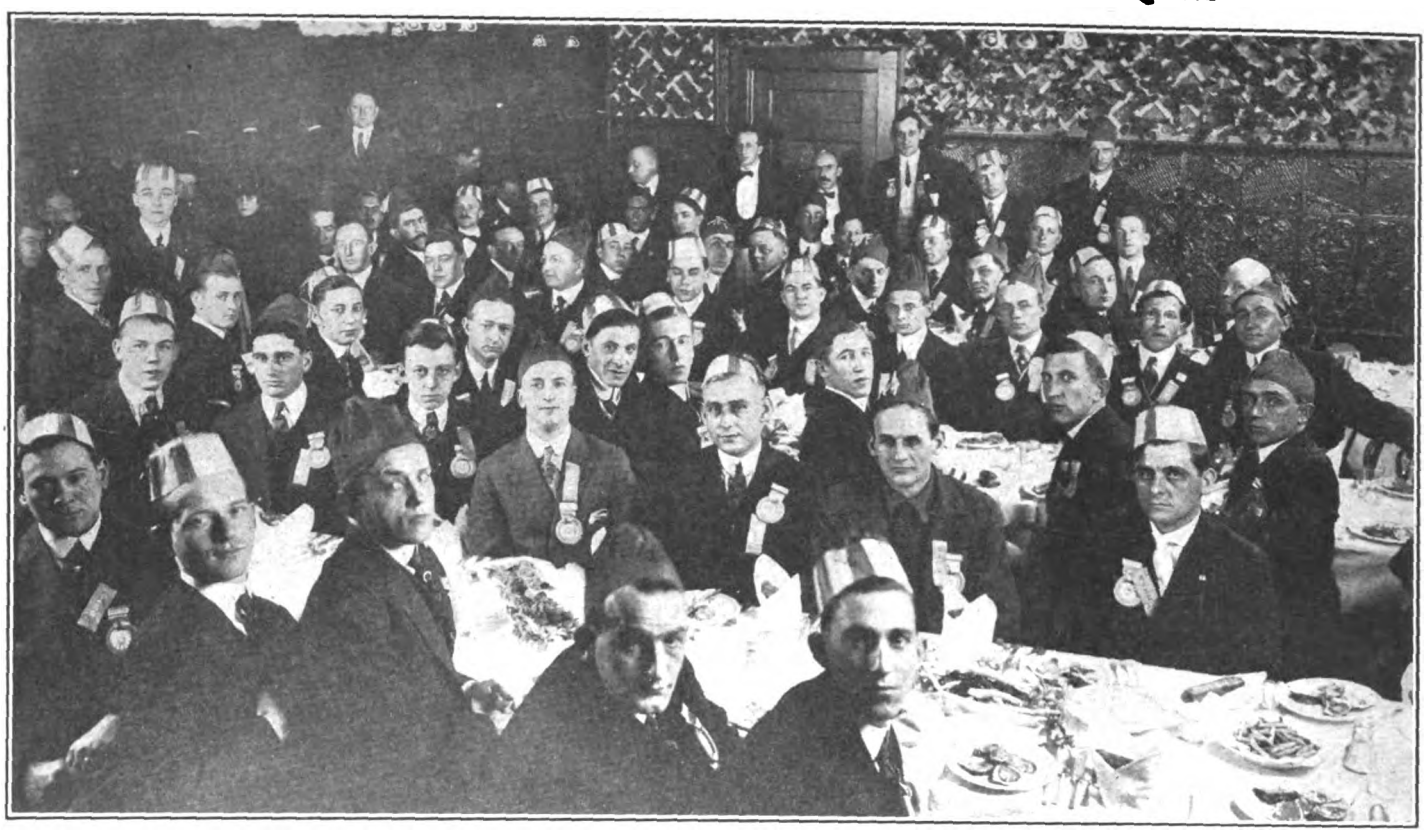
NEW JERSEY CLUBSTERS ASSEMBLE AT ANNUAL BANQUET



Members of Hustling Newark Organization Ready to Feast After Attending Theatre Party on January 27. There Were 65 Present

CLUB AWARDS PERFECT SCORE MEDALS.

SAN FRANCISCO, Cal.—The San Francisco M. C. has awarded handsome medals to those who made perfect scores in all the club runs and tours during 1915. Five such scores were made during the season and nineteen tours and runs were conducted. Following are the riders who made the scores and received the medals:

M. C. Tracy, Miss Dora Hansen, Ed. Roseberry, Miss Mae Anholm and A. Hole. Miss Hansen rode with Tracy on all the runs, while Miss Anholm acccompanied Roseberry on most of the tours. These girls are the first to make perfect scores for a season's riding. There are ten girl members in the club.

BLACK HILLS CLUB ELECTS FOR NEW SEASON

BLACK HILLS, S. D.—At the last meeting of the Black Hills M. C., held recently, the following officers were elected to serve during 1916: William H. Jordan, president; William A. Oates, vice-president; Phil Schoenberger, secretary, and A. J. Eckern, treasurer. A. J. Wooley and H. L. Douglas were elected trustees. The election was followed by a business session, and a lunch and chat wound up the evening.

HALEDON M. C. ELECTIONS

HALEDON, N. J., Jan. 28.—The Haledon Motorcycle Club held its annual election of officers recently and the members heartily thanked the outgoing officers for the splendid work they had done during their terms of office. Twenty-five new members were brought into the club during the past year and its financial standing was never better. The new officers are as follows: President, Wolf Kaufman; vice-president, Louis J. Meyer; recording secretary, Leo A. Meyer; financial secretary, F. Burgers; treasurer, Thos. Scott; captain, S. Stone; first lieutenant, J. Fields, and second lieutenant, Joe Schlecht.

PLAN ANOTHER ENDURANCE RUN TO PHILADELPHIA.

WASHINGTON, D. C.—The National Capital M. C. is planning to repeat its two-day endurance run to Philadelphia and return via Baltimore and Lancaster, Pa., returning via Wilmington, Del., and Havre de Grace, Md. This run was last held several seasons ago and there were a large number of entries. W. E. Throop, manager of the motorcycle department of the Haverford Cycle Co., in this city, has been appointed to draw up plans for the run.

The club will hold its annual banquet at Eckstein's, on New York avenue, on February 9. An attendance of over 100 is looked for. Several notable speakers have signified their intention of being present, among these being Representative Augustus Gardner, of Massachusetts, who will address the assembly on "The Use of the Motorcycle in National Defense."

CONSOLIDATED CLUB DANCE

INDIANAPOLIS, Ind.—The Consolidated M. C. will start its season's activities with a dance on the evening of February 4. Emmett Toole will have charge of all the details, and will be assisted by a committee composed of Jack Carr, Harry Todd, Fred Dyer and George Bradshaw.

WHEELINGITES PLAN CARD FOR NEW SEASON

WHEELING, W. Va.—At the last regular meeting of the Wheeling M. C. the card of fixtures for the coming season was laid out. The initial event is slated for May 30, when there will be a track meet at the State Fair Grounds. Following are the events on the schedule:

June 11, sociability run to Uniontown, Pa., and return, 152 miles; June 18-19, annual endurance run to Bedford, Pa., and return, 336 miles; June 30, sealed run; July 9, sociability run to Pittsburgh, Pa., and return, 138 miles; July 16, tri-state endurance run and open house, 100 mile course; July 23, sociability run to Zanesville, O., and return, 210 miles; July 30 to Aug. 12, sociability run, Wheeling to Atlantic City, N. J., and return, 600 miles; Sept. 6, annual road race, 30 miles; Nov. 30, annual hill climb.

HALEDONS MOVE HEADQUARTERS TO PATERSON

HALEDON, N. J.—The Haledon M. C. has just moved to its new headquarters at 115 Ellison street, in Paterson. The move was made by reason of most of the members coming from the city to Paterson. When put to a vote last meeting, the move was carried unanimously.

TO GIVE SLEIGH-RIDE

WESTFIELD, Mass.—The Westfield M. C. is planning to start its second season with a rush. The first event will be a sleigh-ride, supper and dance at Russell on February 11. The members have been busy fitting up club rooms over F. P. Rouette's Indian shop.

On the Pacific Coast

PROHIBITION INCREASES ARIZONA BIKE SALES.

LOS ANGELES, Cal., Jan. 30.—C. Tobey, who covers Southern California and Arizona as salesman for C. L. Smith, the great Western bicycles distributor, has just returned to Los Angeles after a hard luck trip in the rain to Arizona. In spite of unfavorable weather conditions on the trip he is very optimistic about business conditions in this territory. Tobey was caught by the rain jinx while in the San Joaquin Valley, and it followed him over into Santa Barbara and then into Arizona. He reports motorcycle business quiet in Arizona but the bicycle business good far beyond his expectations. The people are optimistic and business conditions in the state are better than they have ever been. Not only are the mines and smelters going full blast, but the prohibition law has caused many people to spend money for bicycles and motorcycles which in previous years they were using to buy excitement in liquid form.

HOW FAR TO SANTA ANA?

LOS ANGELES, Cal., Jan. 30.—If any one in Southern California wants to see two gentlemen who look about as peeved as cyclists can look, they have but to ask H. A. Lillie and J. A. Benson, of the Appeal organization, which distributes the Harley-Davidson and Smith Motor Wheel, how far it is to Santa Ana. And it all came about because of the recent rains. On the last day of the severe storm which broke over Southern California Lillie started on his 1916 machine and Benson raced after him with a motor wheel bicycle, their objective being Santa Ana, 34 miles from this city. When they reached the destination their speedometers showed up 172 miles and the riders could not be recognized because of the mud.

BENSON IS VERY BUSY

BAKERSFIELD, Cal.—J. A. Benson, in charge of Smith Motor Wheels sales for the Appeal Mfg. & Jobbing Co., in the San Joaquin Valley, has been appointing agents in the prosperous towns between this city and Fresno. His aim is to appoint agents in each center of population.

NEW PLATES IN WASHINGTON

SEATTLE, Wash.—The new plates for motorcycles in the State of Washington are the same size as the 1915 plates. All 1916 plates, however, have white numbers on a lavender ground. The fiscal year for the motorcycle ends February 29.

GASOLINE GOING UP

SEATTLE, Wash., Jan. 30.—For the week ending January 22, the price of gasoline in Seattle and Tacoma remains firm at 16½ cents per gallon, but dealers are looking for another rise in price soon.

JOHNSON'S SIDE CAR RIDE WAS INTERESTING.

LOS ANGELES, Cal.—Joe Johnson, of the local branch of the Firestone Tire & Rubber Co., of Akron, O., had his first experience in sidecaring recently, when he went up Mt. Wilson to assist in bagging a wildcat for the menagerie of the Universal Film Co. Johnson did some deep thinking when it was told him that he would have to occupy the sidecar with the cat on the return trip and prepared a big club for the occasion. He rode with his feet over the back of the car all the way down to be ready for an attack on the part of the feline passenger.

While the bagging was going on Johnson and other members of the Firestone staff had an interesting view of a big truck carrying a 13-ton girder up to the Mt. Wilson observatory. The truck did the job nicely over the hard, rocky roads to the top. It was shod with Firestone tires and these stood the heavy load and hard road finely.

BERRY'S PUZZLE CONTEST BRINGING RESULTS

LOS ANGELES, Cal.—T. E. Berry, Southern California distributor for the Miami Power Bicycle, has had excellent results from the picture puzzle which he recently distributed to a list of carefully selected prospects. In the first week after

SPACIOUS HOME OF HENDERSON IN LOS ANGELES, CAL.

Front of New Store of Henderson Motorcycle Sales Co., at 907 South Main Street, with Window Featuring Single Machine

Digitized by Google

PROVING HENDERSON'S CLIMBING POWERS

Turfy Hills as Well as Steep and Rough Roads are Ridden Over by Denver Henderson Dealers to Demonstrate Capabilities of Four-Cylinder Models

the puzzles were sent out, there were 150 returns and since then Berry has been busy entering the time of arrival of each. A prize is offered for the correct solution, or in the event of no one getting the 22 words correctly, for the nearest correct solution.

The puzzle consists of a pictorial rebus containing 22 words making a complete sentence. All the words used are contained in the Miami Power Bicycle catalog, and by the time a contestant has read through the catalog several times to find out the words he will be pretty thoroughly familiar with the advantages of the Middletown product. Berry attributes the idea to a number of items which were published in **Motor Cycle Illustrated** on the actual power of publicity. E. R. Burnett translated Berry's idea into the pictures.

POWERPLUS TWIN BROUGHT FOGH THROUGH

TACOMA, Wash.—Ray Day, local Indian distributor, is much gratified over the performance of Myrwin P. Fogh and his Powerplus Indian during a trip through the snow from this city to Cedar Falls, where Fogh resides. Fogh rode the 80 miles into the Cascade Mountains under the worst of road conditions and his mount went through without a whimper. He sent a message of congratulation to Day on arriving at his home and the Indian man is showing it as another proof of the all-weather ability of the side-valve Indian twin.

TO SELL FLYING MERKELS

SPOKANE, Wash.—In addition to its motorcycle business, the Falls City Cycle Co. has "fallen in line" with the determination to sell as many bicycles as possible this season. The agency for the Flying Merkel bicycle has been taken for this city, therefor. The Harley-Davidson motorcycle representation will be continued.

SHOWERS FOR HAMILTONITES

HAMILTON, Ohio.—The installing of a set of shower baths in the quarters of the Butler County Cycle Club adds another convenience for the use of the members, which will be much appreciated. Many of the boys are ardent motorcyclists, and come in hot and dusty from long summer runs, and the showers will be rushed heavily during the summer months, it is expected. The new dancing floor, which has been completed, is another feature which has elicited universal approval.

AEROSLED A SUCCESS

SPOKANE, Wash.—Roy Finch and Charlie Dean recently built an aerosled and tried it out with success during the last cold spell. It carried them both at a speed of 30 miles an hour on a low consumption of gasoline. The power plant is a twin Indian motor with a two-bladed propellor driven by chain and sprockets.

MAY HOLD NON-STOP RACE

LOS ANGELES, Cal.—The Los Angeles clubsters are making plans for a non-stop race for the spring season and it has been suggested that this be held at Exposition Park, where accessibility would mean a large attendance. At the same time, Paul J. C. Derkum is having the Ascot race-track paved and otherwise fixed up, so that this track may have the affair. The date of the non-stop race is still unannounced.

PAULSON BUILDS A BOB

TACOMA, Wash., Feb. 1.—Tom Paulson, Thor distributor in this city, is the first dealer to take advantage of the unusual fall of snow here by constructing a motorcycle sleigh with the aid of a 1916 Thor. One of his stunts was to haul five grown people up a fifty per cent. grade with very little effort. A quick and successful run was also made to Lemons Beach.

ROADS IN WASHINGTON STATE

TACOMA, Wash.—There are now 42,528 miles of officially-located roads in the state of Washington, enough to afford fourteen distinct routes from the Pacific to the Atlantic Coast. There are also 9,551 miles of graded and drained earth roads of a sandy clay mixture.

RECORD LICENSE FEES

SEATTLE, Wash., Jan. 30.—Evidence of increase in motorcycle business throughout the State of Washington is furnished by the report of Secretary of State Howell, which states that the motor license fees in 1915 amounted to $238,707, as compared with $60,146 in 1914.

CALLING HIS BLUFF

Washington News Item—Investigations are now under way to ascertain why gasoline prices should be increased, and motorists expect to show that there is no real justification for the present hold-up tactics of the Oil Barons. The fight for reasonable gasoline rates is on.

A REDUCED SCHEDULE FOR LIGHTWEIGHTS DESIRABLE

EDITOR, **Motor Cycle Illustrated**:—The much discussed topic of classifying the lightweight is a problem at best, and especially at this time, when numbers of competition events are being booked for the 1916 season.

Then, too, the lightweight is rapidly growing in favor and a means of classifying the little fellow fairly is necessary. Endurance runs are my hobby, and I have talked the matter over with a number of veteran endurance run riders in order to get the consensus of opinion. It strikes me that the most absolute fair and square proposition would be to cut down the schedule as suggested in **Motor Cycle Illustrated**, viz., where the schedule calls for 20 miles per hour for the big twins and multi-geared singles, give a 15-mile schedule for the lightweights.

This I think is the nearest approach to a solution for the problem and I feel that it would work out to perfection. I would suggest the 15 miles an hour as an approximation, allowing for the length and condition of the course to govern at all times. The methods used in grading lightweights in the English trials appeals very much to me, but I think that on account of our road conditions and the varying sizes of lightweight motors, their arrangements would hardly prove practical in this country.

POLICE WANT MOTORCYCLES

NASHVILLE, Tenn., Feb. 2.—In a recent report to the Mayor and City Commission the police department approved a plan for mounting a number of patrolmen on two-wheelers. For several months there has been a great deal of automobile stealing in the city, and the police have been unable to cope with the situation due to the lack of motor facilities. A petition has been circulated and signed by hundreds of citizens asking that the City Commission take steps at once to provide motorcycles and assign certain officers to duty.

PASTOR WILL USE SIDECAR.

PHILADELPHIA, Pa.—The Reverend Mr. Alan W. Connett, pastor of the Third Spiritualist Society, of 1421 North Sixteenth street, will soon be numbered in the steadily increasing ranks of clergymen who utilize the motorcycle. Mr. Connett, who is a leader in American spiritualist circles, has been convinced of the desirability of the motorcycle with sidecar attached, and will utilize the combination in his parochial duties, as well as for pleasure runs about Philadelphia.

STOP YOUNGSTERS' RIDING

ST. LOUIS, Mo., Feb. 2.—The Board of Aldermen have passed an ordinance prohibiting persons under 18 years of age to drive motor vehicles on the streets of St. Louis. A fine of from $5 to $25 was provided for violation of the ordinance. This ordinance was passed by the unanimous vote of the board.

INDIANA SHOW SPACE SELLING BRISKLY

Twenty Booths Have Already Been Taken by Manufacturers, and Reservations Made for Late Exhibitors—Board of Directors Elected—Novel Plans Will Be Used to Draw Crowd

INDIANAPOLIS, Ind., Feb. 2.—With complete arrangements made for the promotion of the second annual Indiana Cycle Show, Feb. 24, 25, 26, the list of directors selected, and twenty spaces sold at this writing to manufacturers, all indications point to the largest cycle and sporting goods show ever staged in this state. The board of directors is composed of some of the biggest men in the cycle trades who promise to lend their support in every way to make the show a money-earner.

Forty Booths Set Up

Tomlinson Hall, where the exhibition will be held, has been divided up into forty booths, each 10 x 10, which have been placed around the sides of the display floors. Ten spaces have also been reserved in the center to take care of the late exhibitors. It is planned not to use these ten spaces unless it is absolutely necessary. Should the forty booths be insufficient to accommodate all the exhibitors, there is still more space available on the main floor.

The hall will be decorated in appropriate style. Specially designed divisions will be made to separate the various booths, so that the general appearance of the show will be uniform. The promenade through the center of the hall is more than sixty feet square and the greater part of it will be taken up by easy chairs for the use of visitors.

A very attractive vaudeville entertainment has been arranged for the afternoon and evening by the committee in charge. One of the main features will be motion pictures. The program will consist of both comic films and reels descriptive of motorcycle and bicycle manufacture. In addition to the motion pictures, the entire Indianapolis Newsboys Band has been engaged as well as prominent vocalists.

Home Trainer Races

A feature that is expected to attract much attention is a bicycle home trainer race. Any person attending the show will be given an opportunity to try his ability on the machine and the rider covering the greatest distance during the show will be awarded a brand new bicycle. A contest will also be promoted in which a local amateur star will ride fifteen minutes each evening, and the spectators will be asked how many miles he has ridden. Merchandise awards will be given to the person making the best guess.

The list of the directors for the show is as follows: F. I. Willis, G. H. Westing, J. H. Kinney, H. L. Dipple, B. L. Douglas, L. Emmelmen, J. L. Thompson, B. F. Harding, J. E. Merz, Gus Habich, Sam Van Camp. The officers of the association are W. F. Sturm, president; F. C. Baldridge, treasurer, and J. C. Carr, secretary.

Among the list of exhibitors to date are the following: Van Cleef Bros., Chicago; Hearsey-Willis Co.; Van Camp Hardware Co.; Central Rubber and Supply Co.; G. H. Westing Co.; H. L. Dipple Co.; Merz Motor Co.; Thompson Supply Co.; Davis Sewing Machine Co., Dayton, Ohio; Henderson Motorcycle Co., Detroit; Douglas and Talbott; Em-Roe Sporting Goods Co.; Les Gas Co.; Gus Habich Co.; Military Motorcycle Co., Buffalo, N. Y. Negotiations are under way with several out of town exhibitors and their applications for space are expected to be received before the list closes on February 10.

ACCESSORY MEN PLEASED WITH MOTORBOAT SHOW

NEW YORK, N. Y., Jan. 31.—Schebler carbureters, Splitdorf, Bosch and Berling magnetos occupy prominent positions in the accessory sections at the annual motorboat show, which opened last Saturday in the Grand Central Palace, Lexington avenue and Forty-seventh street. Although but in the second day of the exhibition, business transacted has been most satisfactory, and fine results are looked for on all sides.

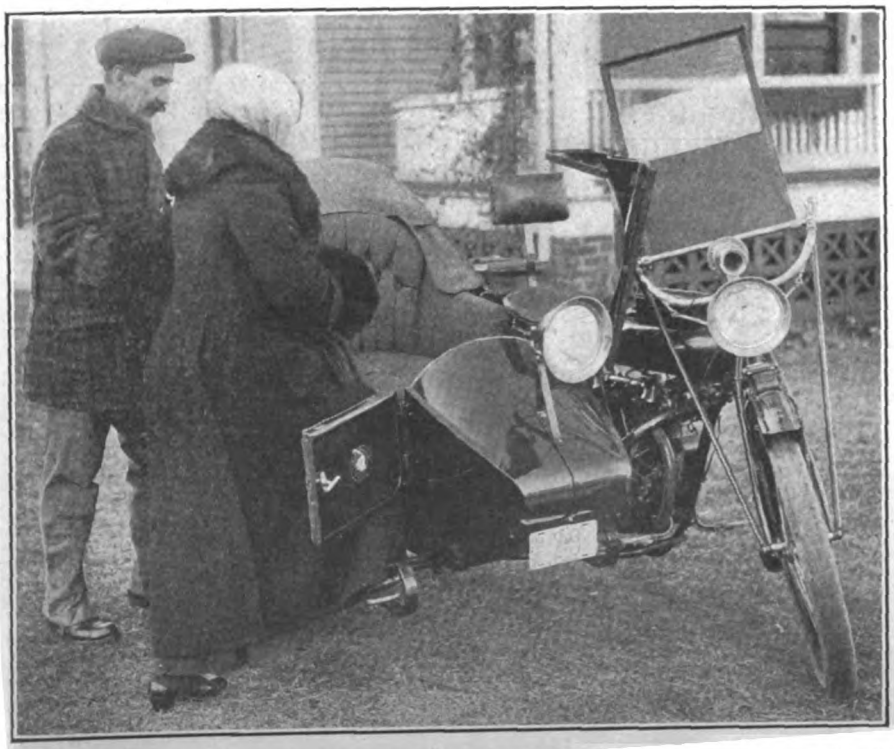
At the stand of Wheeler & Schebler, makers of Schebler carbureters, is George Briggs, assisted by R. W. Doherty and C. J. Jensen. The trio have been kept busy showing the various Schebler models, ranging from the ¾-inch Model H for motorcycles to the huge affairs for heavy duty yacht motors.

Bosch magnetos in the ZEV and ZE2 are shown at the extensive exhibit of the Bosch Magneto Co., in addition to motorboat ignition and lighting apparatus. Chief Engineer V. W. Kliesrath is in charge, with L. C. Carlton, assistant chief engineer; A. H. Ziegler, G. H. Lang, G. R. Rymarczick and G. Margolin.

Dixie magnetos and the Splitdorf voltmeters and ammeters occupy prominent positions at the stand of the Splitdorf Electrical Co. O. J. Rhode is in charge, assisted by O. D. Corbett, E. J. Fitzgerald, W. H. Girdlestone and H. J. Buckel, all from the New York branch. The Apple Electric Co., Splitdorf subsidiary, is represented by R. E. Pickering among others.

Berling magnetos in the N44, A11 and B21 models are shown at the exhibit of the Ericsson Mfg. Co., of Buffalo, N. Y., which is under the direction of T. S. Hemenway. Assisting are E. A. Valance and Elmer Rea. The N44 is a four-cylinder machine which is standard equipment on the Henderson and occupies a prominent place on a number of different makes of boat motors in the show.

THEY HAVE A WELL-FITTED INDIAN COMBINATION



A. G. Gruendler, of Hendee Sidecar Department, with Mrs. Gruendler and Their Rig Fitted with Windshield, Two Headlights and Lighting Dynamo

LOEWENBERG FIRM GETS BIG RESULTS AT CHICAGO

CHICAGO, Ill., Jan. 29.—The Loewenberg Co., of Newark, N. J., showed various styles of motorcycle and sporting clothing at the automobile exhibition in the armory here this week. The lines shown fulfilled every need of the rider or automobilist for all-weather service and the firm's order books show how well the Loewenberg products were received.

THE DESIGNER OF THE SCHICKEL

ANOTHER SPRIGHTLY SKETCH IN THE SERIES CONCERNING TRADE LEADERS

Norbert H. Schickel was Fascinated by Engines from Boyhood, Produced His First Motor When He was Fourteen, and Has Never Faltered Since in His Determination to Make Schickel Products Maintain a High Standard in Two-Cycle Design

INTENSE interest in all things mechanical, combined with a consistent determination to leave beaten paths and stand by his own engineering convictions, were the dominating influences in the early life of Norbert H. Schickel, head of the Schickel Motor Co., of Stamford, Conn., and one of the most interesting figures among present-day motorcycle designers in this country. And a great deal of the story of Mr. Schickel's progress is contained in the statement that he has never wavered from those early ideals. Inherently modest, he has been satisfied to see his plans work out slowly but surely, and to know that the engineering principles for which he stands as the sole exponent in America have fully justified themselves.

Mr. Schickel was born in Eighty-sixth street, New York City, and at about the age when other lads are developing into expert top-spinners and roller-skaters young Schickel was turning his mind to the improvement of all the mechanical toys that came to his hands. He was of studious bent and no more than a dozen years had been put behind him when it became evident that nothing fascinated him more than the purr of a motor. He studied engines in his own way whenever an opportunity presented itself, and at the age of 14 designed and constructed his first gas power-plant.

He Started in Early

Mind you, he was only a thriving youngster in knickerbockers when this first engine came from his hands, but there is plenty of testimony to back up his claim that it would run. That it was lacking in a few things here and there even young Schickel knew—but he had succeeded in making metal work for him, and if anything was needed to complete his fascination with mechanics that engine turned the trick. From that time forth there was no question as to the youth's course in life. He was born to the wizardry of steel and those who watched him developing agreed that his ambitions would be laid along uncommon lines. They were right.

Young Schickel perfected his first motor to the point where it could be depended upon to do its work reliably and then hooked it up to a lathe. With the motor-driven lathe he was able to make more rapid progress, and another engine was soon finished.

Upon completing his common schooling the youth entered Cornell University, in the class of '99, and finished the mechanical engineering course with honors. When college closed in the summer of his freshman year Mr. Schickel built his first motorcycle, and his experiences with it in the hills around Ithaca would fill quite a book. The hills were steep and the motorcycle was a first attempt, so it followed that the enthusiastic freshman did considerable walking when he had counted upon riding. In other words, that first motorcycle was not as strong as it might have been on hill-climbing. But it gave the designer a lot of information, every bit of which was applied to the construction of another motor during the leisure moments of Mr. Schickel's sophomore year.

NORBERT H. SCHICKEL
His Big Idea Has Been the Two-Stroke Motor Ever Since His Boyhood

Even before taking up his mechanical engineering course at Cornell, Mr. Schickel had been deeply interested in the two-cycle type of motor, so it was natural that his efforts should be turned to working out a motor on that principle that would meet the special requirements of the motorcycle. The two-cycle engine that Mr. Schickel produced in the summer of his sophomore year proved a remarkably efficient one, not a hill in or about Ithaca being steep enough to stall it. That encouraged him, and it was then that he practically decided upon the plan to market a two-cycle motorcycle.

At the close of his sophomore year Mr. Schickel devoted two months to a trip on which he visited all the large automobile plants in the country, studying the principles of automobile designing.

During his junior year the young designer built a four-cylinder, V-type, two-stroke motor, and while making a test with the motor in an unfinished state, he came within an ace of ending his promising career. Gathering a great and sudden burst of speed, the engine broke away and threatened to mess up a section of the adjacent landscape. What's more to the point, young Schickel was in a fair way to be a part of the mess.

When summer rolled round in his junior year Mr. Schickel went with the Simplex Automobile Company, in New York, his aim being to acquire further practical experience. He continued to apply himself to the problems of automobile engineering, and to work on motorcycle power-plants at odd moments, and finally, at the close of his college course, he joined the Franklin Motor Co., of Syracuse. He remained with this company about a year and a half, part of which time he worked in the laboratories and part in the designing rooms of the commercial car department.

The Second Two-Stroke Motor

Upon severing his connection with the Franklin folks Mr. Schickel returned to New York and started work on another motorcycle model in his shop on the west side of the city. In the summer of 1911 he moved his base of operations to Stamford, Conn., subsequently making arrangements for his present compact, but well-equipped factory on Garden street.

Practically all of the year 1911 was devoted to gathering necessary machinery and fitting out the factory, and it was not until 1912 that Schickel motorcycles were placed on the market. From that time there has been a steadily increasing interest in the Schickel products, and the Bix Six, the company's standard model, has demonstrated its prowess on numerous occasions and often under extraordinary conditions. The latest offering from the factory is the Schickel lightweight, a clean-cut model in which the salient features of Schickel designing are combined with moderate poundage and price.

Mr. Schickel has applied himself so consistently to his work that he has not found time to develop a hobby, unless keeping himself in the pink of physical condition can be regarded in that light. He is of athletic build and one glance at him satisfies the observer that he might add to his laurels in almost any line of athletic endeavor if he happened to have the inclination. But he hasn't. He believes that life and the work incidental to it are serious matters, and treats them accordingly. He is a keen thinker, a hard an aggressive worker—and determination is perhaps the keynote to his character.

THIS IS WHITNEY'S FIRST 1916 MOTOR BOB

CEDAR RAPIDS, Ia.—F. R. Whitney, local Pope representative, has been enjoying the snow around these parts recently, using his Motor Bob No. 1, shown in the photograph herewith. "It can't snow too much for me," says Whitney, "with No. 1 capable of moving at a speed of 60 miles or better an hour. I call the bob No. 1 because there are two others under way in the garage."

BABY NAMED AFTER HENDEE

SPRINGFIELD, Mass., Feb. 2.—While W. H. Wells, manager of the Indian headquarters in London, was on the ocean, bound for this country several weeks ago, an event occurred in his family of the greatest possible interest to the several members of it in the arrival of a fine baby boy. Members of the organization at the factory as well as Mr. Hendee himself were pleasantly surprised when the news spread around that Mr. and Mrs. Wells had decided to name their boy after the founder of the Indian Motorcycle. The baby has consequently been christened George Hendee Wells.

CONVICT BILL INTERESTS

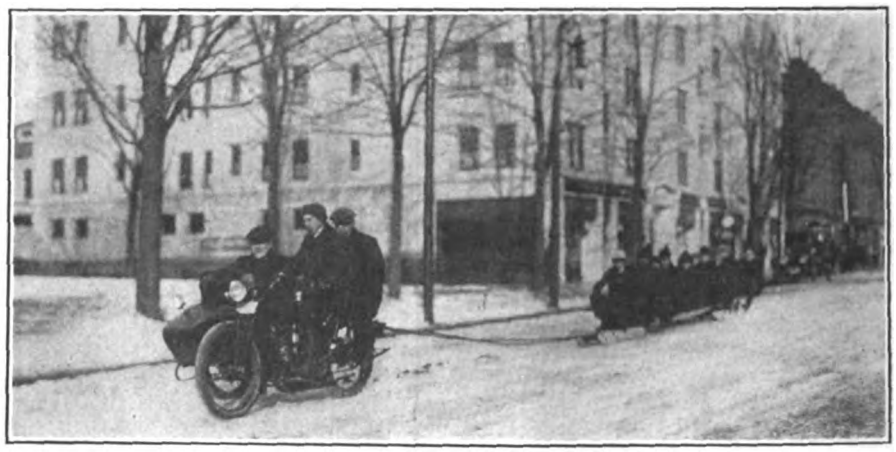
LOUISVILLE, KY.—Motorcyclists and other users of Kentucky highways are much interested in a bill introduced before the legislature providing for the use of convict labor on the roads. This bill states that the convicts could be better employed in this way than in making prison merchandise of various kinds. The bill has the backing of labor organizations among others. With the use of convict labor and the immense bond issue for road building in Kentucky now being arranged for, it is probable that roads in this State will soon be among the best in the country.

EACO HAND HORNS ATTRACT AT CHICAGO SHOW

CHICAGO, Ill., Jan. 31.—The exhibit of the E. A. Laboratories, Inc., of Brooklyn, N. Y., at the automobile show last week included a full line of the firm's mechanical horns, under the Eaco trademark. These horns have the bell and body in one piece and have glass-hard contact points. Both the motorcycle and bicycle horns are equipped with two brackets, enabling them to be attached to handlebar and top tube. The exhibit was in charge of Eckhouse Brothers, of this city.

BADGER STATE CO. GROWING

MILWAUKEE, Wis., Jan. 28.—The Badger State Motorcycle Company, new Indian dealer for Milwaukee county, is expanding. The present quarters of the company became so cramped that it was necessary for Adolph Waech, one of the partners in the concern, to vacate the cottage next door which he had been using for a dwelling place and move into quarters above the store so that the cottage could be transformed into a repair shop.



J. Howard O'Brien, of Hendee Parts Department, Towing Bob Load of Ten Through Streets of Springfield, Mass., to Coasting Ground at North End

ROTH WINS MOTOR BOB RACE AT ALTOONA, PA.

ALTOONA, Pa.—George Roth, one of the city's most prominent motorcyclists and motor sled enthusiasts, won the motor bob race from this city to Hollidaysburg, and return on January 15. He took 30 minutes to make the round trip and thus sets a new record. The sled entered by Fluke & Davis was second, with 44 minutes, while Ernest Albright on his sled was third in 65 minutes.

Roth is now considered the champion of these parts, as this race was the fourth which he has won so far this season. His time for the trip was considered remarkable inasmuch as he sank in a hold filled with water during the outward run and lost a few minutes getting out and off again.

Members of Racine M. C. at Recent Annual Banquet Which Formed Initial Feature for 1916 Season. The Club Is Planning Many Social Fixtures for the Year

MILITAIRE EXHIBIT IS WELL PATRONIZED

CHICAGO, Ill., Jan. 29.—The booth of the Militaire Autocycle Co., of Buffalo, N. Y., attracted big crowds at the automobile show which closed here tonight, and President N. R. Sinclair and his staff of assistants were more than pleased with the results. "We will be turning out Militaires not later than the second week in February," said President Sinclair, "and our daily output will be eight machines by March 1. Naturally, the first lot of mounts will be sent to dealers for demonstration purposes."

RACING REFORMS NEEDED TO SAVE THE GAME

Accidents Discourage Factory Officials as Well as Speedsters and Make the Price Too Heavy—Smaller Motors Are Strongly Advocated for Flat Track Races

By JOHN U. CONSTANT
Former Holder of National Amateur Championship

IN view of the recent accident out West where Bill Goudy and Frank Montgomery lost their lives, I think the time is ripe for some one to start an agitation for "safe and sane" racing, with a great deal of emphasis on the "sane." We all realize that competition of any sort can never be absolutely safe; it is the danger and chance that draws many to it, but a great deal can and should be done towards making motorcycle racing sane, and it is far from that today.

The writer was not acquainted with either of the unfortunate boys, but has heard a great deal about Montgomery from other riders; and if Bill Goudy was anything like his brother Carl, then he must have been a prince, for nobody would wish to meet anyone with better qualities than Carl Goudy.

It does not seem right that so many lives should be sacrificed as there have been in the past few years on motorcycles. Nixon, DeRosier, Hasha, Balke, McLewis and Evans were all friends of mine, and I am wondering how many more will be added in the coming season.

How F. A. M. Is Lax

Personally, I believe the F. A. M. is at fault; first, through not enforcing the rules through the referees. Report has it that both Goudy and Montgomery hit the fence, and the rules state that there shall be no fence on the outside of the track. Why was this rule not enforced? I know it is repeatedly disregarded, but it can and should be enforced. The A. A. A. enforces it to the letter; why not the F. A. M.?

There was one instance where the importance of this rule was very firmly impressed upon the writer—at Saratoga, last July, in the five-mile National Championship. Walker, Carroll and Perry came down the home stretch on the first lap abreast, and about twenty feet behind them—and also abreast—were a rider I couldn't recognize, myself and Stokes. Behind us were several more. We all sailed into that bad turn wide open. The rider who was on the inside slid into me, and shoved me into Stokes. I lost the pedals, and came as near to the outside fence as I ever care to; let me tell you, it made me think hard. Carl Goudy skinned his knuckles on one of the posts in a later race.

Close Call at St. Louis

Another time was at St. Louis, in the 100-mile race. I slid into the outside fence, and to avoid hitting it I pushed the machine down and turned completely around, falling off, of course. When I landed I was very near the fence. I was pulling the motor to the inside when Goudy, Perry and Wolters went past. Carl missed my machine by inches, and afterwards told me it was the nearest he had ever come to a smash. If he had hit it, the three of them might have been badly done up.

The second count on which I blame the F. A. M. is for not reducing the size of the motors.

There is just as much sport in a race for small-sized motors as there is in the races where the big machines compete. The most interesting race I ever witnessed was a sidecar event at Baltimore, on Labor Day, 1915. Speed is all very good in its place, on a speedway, but on the ordinary dirt track 61.00 cubic-inch motors, such as are built today, are too fast—unless the promoters pull down the outside fence and to make it more safe, the inside fence also.

It is not the falling off that hurts a fellow, it is hitting the fences that does the killing. When you skid and fall, the skid takes a large percentage off from the speed, and it is a gradual fall. When you actually hit the ground the saddle is only about a foot high, and it is then a case of slide. The majority of times the rider comes off badly shaken up, but unhurt. I know, because I have taken many a fall; but let me tell you, it makes you think a while after you have slid off one of those big motors on a curve, going about 70 m. p. h. or more.

The Author Ready for Action

I am pretty sure the factories that make racing motors would welcome a change in the size of the motors. The men who are behind the Indian, Excelsior and Harley-Davidson machines, the three most prominent factories that make fast machines, I am sure would welcome some change to make racing safer. You can gamble that each fatal accident brings to the minds of Messrs, Hendee, Schwinn, Mathis and Weschler tragedies that have visited their factory racing staffs, and they are not pleasant memories. The Harley-Davidson factory has never had one of its men killed while racing, but they have lost men otherwise. Everybody knows Arthur Davidson's opinion of racing, and I know that several months before Eddie Hasha was killed, Mr. Davidson offered him very good inducements to quit. Eddie's death hit Arthur very hard.

This is no announcement that I have quit racing, for that is farthest from my thoughts, but I do believe that much can be done to make it safer for the rider. When the season starts, undoubtedly I will ride, but I always realize the danger. I am also of the opinion that many of the prominent riders realize the danger of racing, as it is carried on today, and could suggest methods to make it safer.

Riders Not Represented

There is one great trouble with the F. A. M.: because some of the riders are of the "rough and ready" sort, it gives the impression to the motorcycle public that they are "rough necks," and that all racing men come under this class, that they are unable to think sanely. The only thing they are credited with being able to do right, is turn the controls on the bars of a motorcycle.

The F. A. M. is largely financed by the racing revenue it receives through issuing sanctions, but the men who race and make it possible for the F. A. M. to receive this money have absolutely no representation in the controlling body.

When Experience Counts

With due regard for John Donovan (we all know he has done his best), I think the Competition Committee should be run by a man who has ridden on race tracks and knows the game. Men like Walter Goerke, Fred Huyck, Art Mitchell, Ed. Lingerfelder, Ray Seymour, Bob Stubbs, Oscar Hedstrom, Billy Tuebner, Chas. Spencer, Chas. Gustafson and others who have been Class A riders, and have quit, should compose the Competition Committee. They know the dangers to be encountered on tracks, and can appreciate what they are today, and make rules accordingly.

As I said in opening, I believe the time is ripe to start something, and I am convinced that once a movement is started to improve racing conditions, all the forces of the industry can be concentrated to insure success.

OUR COVER PICTURE

THIS WEEK'S front cover is a scene taken on Mt. Penn, above Reading, Pa., just at the entrance to the Mountain House driveway. The young couple with their Reading Standard sidecar combination are resting for a moment before returning to the city along the snow-covered grades which wind around the mountain. Cold weather, snowstorms or steep hills do not mar their pleasure with this outfit.

HOW YOU CAN MAKE $20

Relating the Means By Which a Score of Hard, Round Iron Men Can Be Had With a Little Elbow Grease and Polish.

By DUDLEY ESSEX

SOMETHING like a get-rich-quick ad is what that head sounds like, doesn't it? Well, Mr. Reader and Rider, go ahead and see how it concerns you.

A lot of you fellows who are not riding these cold, disagreeable winter days are neglecting your trusty motorcycles, letting them slowly but surely take on the appearance of rusty old machines. Now, when you are idle nights and Sundays, with plenty of leisure time on your hands you should be tearing the bus down and giving it a thorough overhauling. You have your eyes on a new one already, so why not clean up the old one, the mount which treated you squarely last season? Why not make it look creditable?

Rubbers, Grips and Renovator

A new set of pedal rubbers costs 30 cents; new grips to replace the old, split worn ones cost 75 cents and a can of varnish renovator, polish and enamel costs one dollar. Get busy with them all and see what a nice look the mount will have.

There was a friend of mine who once had his whole machine repainted at a cost of $7.50. He took it apart for the painter, of course, and reassembled it again, but he had his reward. He sold it to a private individual, while Yours Truly let his go as it was in trade for a new one. My thrifty friend beat me just $40 with his industry.

Glitter Lands the Novice

It's the glitter that lands the new rider. What does he know about compression or quiet-running motors? Dazzle his eyes and you can sell a crock, but try to dispose of your machine in a dirty, rusty condition and no matter how good, fast or powerful it is, you will have to offer an inducement to sell it, a cash reduction every time. And that's to a private individual; you will find the dealer has a keener eye for neglected parts and places, and you can't blame him, either. It will take labor to put your dirty motorcycle in shape for a sale, and labor costs money.

You had better take some good advice and bring that motorcycle up to 100 per cent. in looks now when you are not riding and have plenty of spare time. If you put it off till those warm Sundays in the latter part of March or early April, as sure as you are born you are going to have a case of riding as well as spring fever. Then you will turn the machine in for at least $20 less than it is worth, simply because of its non-salable condition.

Where You Lose Money

Here's how you will do it—experience talking—your riding pal is going to call round for you one of those Sundays with his new 1916 model. You're going riding with him and right away the comparison of the two machines is going to work your downfall. If not on that day, as soon as you can get over to the dealer's place, you are going to talk about a swap.

Then watch Mr. Dealer get on the job and look your poor forlorn mount over. You will not hear him, but this is a cross-section of his mind. "Rusty spokes, hubs and bars, that's $5.00 off; scratches and dents in the tank and frame, another five-spot," and so on he goes. Then he names a price way below your friend's turn-in figure. You remonstrate; he points out the work necessary to make the mount fit to sell and you decide to take it home and fix it up. Fate and the spring weather are against you though, for up rides a lad on a new '16 and you sigh and say—"Aw, shucks, when can you get me a new one?"

Now will you take some good advice and make a start toward saving that $20.00. All you need is the new rubbers and grips, polish, enamel and plenty of *elbow grease*.

JERSEY PAPERS PLEASE COPY

We doff our editorial lid to Paterson and Hackensack, N. J., make profound obeisance, pull our forelock as a traditional indication of humility and solemnly declare that we will never do it again. We can't explain it, but in the January 27 number of **Motor Cycle Illustrated,** a rather striking photo of two Dayton machines on a picturesque bit of road was described as having been taken in Ohio, when as a matter of fact the picture was snapped between the aforementioned and reasonably well-known towns of Paterson and Hackensack.

EASTVIEW CLUB MEETS

OTTAWA, Ont., Feb. 2.—A meeting of the Eastview Cycle Club, Ottawa, was held on January 25 when plans were made for touring and racing events for the coming season. The club is greatly interested in the bicycle sales campaign which has been started in the United States and Canada, and the members have promised to do their share to boost.

PUT A BIG PUNCH IN YOUR WINDOW

As an Advertising Asset the Window Display Is Second to None, and Highly Attractive Effects Can Be Obtained at Slight Cost—Methods of Dressing Which Bring Results

By GEORGE M. JOHNSON

THE aim of advertising is to get the biggest return of business for the amount of effort or cash expended. The ways in which the motorcycle can be profitably advertised are numerous; probably the easiest of all, and involving the least amount of expenditure, is the proper use of the dealer's own show window. As a means of attracting attention to the stock within it is unequaled, but it is almost pitiful to see how few agents are alive to the opportunities in this direction.

People as a whole are interested in motorcycles. I know this from personal experience. Whenever I leave my machine, especially if the sidecar is attached, near the curbstone in the business part of town, there are always persons who seem eager to give the boat the once over. Occasionally one will ask me a question, while I often overhear amusing comments—amusing because of the extraordinary degree of ignorance they display concerning this handy type of motor vehicle. Now since the interest is so universal, why is it that so many men who ought to be motorcycle owners have never had the pleasure of straddling a machine? Don't the dealers shout loud enough?

Frequent Changes Needed

Coming back to show window advertising. While I don't profess to be an advertising expert, I know what I like to see in a window, and what makes a ten strike with me will doubtless carry a similar appeal to others. I have seen many window displays that were poor; also many that were good for a while, but the proprietor of the shop didn't know enough to change before his exhibit became stale. When a show window is decorated with a choice collection of dust and dead flies, its value as a business getter, no matter how good it was at the start, is gone; from then on it will keep people out of the shop rather than drag them in. I should say that the two essentials of a good show window display were cleanliness and novelty.

The following little article will suggest a few ways in which the show window can be used to attract trade to the cycle store.

A New England Idea

A very telling advertising feature originated in a certain New England agency; at almost any hour of the day someone could be seen standing in front of the window, his eyes taking in the attractive display within. By means of boards covered with earth a steep hill was represented. On the slant, held up by fine wires, was a new three-speed machine. Several small evergreen trees and bits of shrubbery brought from the woods made the scene more realistic. Nor were the tracks made by the studded motorcycle tires in the soft clay, omitted. A comic touch was added in a small, long-necked black cat which glared intently at a miniature billboard, an exact representation of the big posters used by the agency. A neatly lettered sign gave to all passers-by the following information:

This is a 30 per cent grade.
You can climb it on an ———

Another stunt that appealed considerably to me was a motorcycle entirely dissected, even down to the magneto. The pieces were arranged in groups, so that a person who had only a superficial knowledge of motorcycle mechanism could get a general idea of the working parts. Small lettered cards may be used in brief explanation. The value of this sort of a display lies in its appeal to the onlooker's curiosity. He has seen plenty of motorcycles about the streets, but the inside of one is a sealed book to him. The disadvantage lies in the work involved in taking down and reassembling the machine, but this can be done during the slack season.

Working Up a Contrast

A fine display can be made up of an old crock—the older the better—side by side with the latest model of the same make. The exhibit might be lettered:

"Seven years of motorcycle development, as shown by the ———"

Or the old crock could be displayed alone, with a label something like this:

"This ——— Motorcycle is a 1905 model. Eleven years old, and still in running condition. ——— Motor-

IF there are cobwebs in your show window it is time for a clean-up and a new display. Don't allow a spider to out-advertise you in your own store!

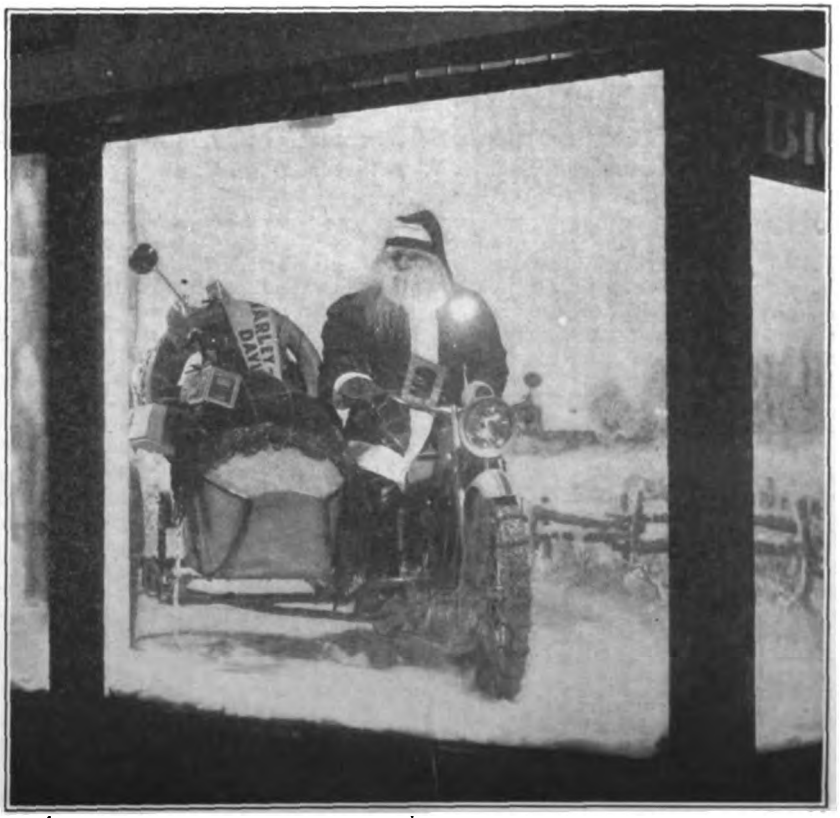
There should be an idea behind every window display. Make your window seasonable, bright and clean and top it off with a touch of originality.

Even a striking display becomes stale in two or three weeks. Adopt a policy of changing the window make-up regularly—say, every two weeks.

Good photographs, enlarged, work wonders in getting the attention of passers-by. Every good window display should have two or three instructive photos.

The accompanying article offers some suggestions for catchy window lay-outs. Try the one best adapted to your window, and let us know how it works out.

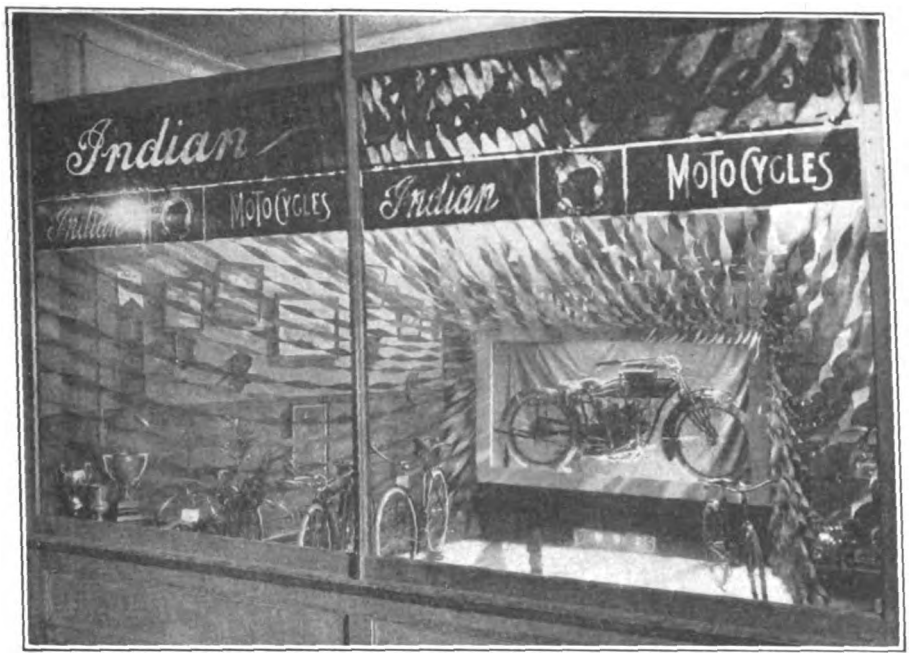
A ROCHESTER (N. Y.) WINDOW THAT DREW HOLIDAY CROWDS



It Was Arranged by the Wagner-Dolph Co., Inc. The Setting Was Highly Artistic and Accessories Were Cleverly Worked in by Utilizing the Sidecar

Digitized by Google

HOLIDAY NOTE WAS EMPHASIZED IN THIS DECORATION SCHEME



Show Window of Walter Goerke, Wigwam Representative in Newark, N. J. The Dressing Was Done by Manager Lincoln Holland, Jr., and Elicited Widespread Admiration

cycles were good then; they are even better now. Come inside for a catalog."

If a local rider has done something especially noteworthy in the way of transcontinental touring, mud plugging under almost impossible riding conditions, etc., etc., his machine, just as it ended the record run, would make a fine window ad. The worse it is encrusted with mud, the bigger an impression that a motorcycle can go anywhere under any conditions will be driven into the minds of the beholders.

I don't know why it is that so few dealers appreciate the value of photographs. Good motorcycle photos enlarged are mighty attractive, and ought to be on display in every agency; they have the average commercial posters, which you see everywhere, tucked away out of sight behind the bureau. There is hardly a locality where some riders do not put their machines to especially interesting uses, along the line of hunting, fishing, etc., and the agent would not find it difficult to secure a few good pictures. It costs little to have a photo enlarged and framed; the show window is an A No. 1 place for one or two enlarged photographs. Get one of a chap riding his motorcycle through mud halfway to the hubs, and see how the necks will stretch as people lamp it.

The following idea is by no means new, but there must be many places where it has not been tried. It is best used when the season's newest model is first displayed in the window. Close to the glass, so that the print can be read from outside, are several catalogs opened to pages that describe the notable changes and improvements of the model in question. Fastened close by the printed matter by means of a sticker is a length of colored ribbon which leads to the new motorcycle in the background, where it is attached to the part discussed in the catalog. The dozen or more colored ribbons—a varied assortment of colors can be used if desired—makes a very attractive setting for the new motorcycle, and furthermore particular attention is directed to the features about it that deserve notice.

A Miniature Track

Any dealer who cared to go to the trouble could fix up a miniature race track, featuring a red-hot speed feat. A tiny machine, his make of course, would be represented as leading the field by a comfortable margin. A sign would read: "The ——— ahead as usual." Needless to say, the other motorcycles should be machines of no particular make; to indicate his motor beating several very definite rivals might appeal very strongly to the dealer himself, but it would come too close to knocking to make a hit with the general run of riders.

Above all, the glass of the window must be kept clean. It is useless to have anything behind the window to look at if the latter is not crystal clear. Nothing can do more to discourage prospects from dropping into the store than this sort of carelessness.

FORGING AHEAD IN SALESMANSHIP

How the Dealer and His Assistants Can Increase Their Selling Efficiency—Points to Call to the Prospects' Attention

By JACK CARR

WHILE the object of every earnest motorcycle salesman is to close as many sales as possible, the majority of them stop right at that point. They sell on a sort of hit-or-miss basis, never using the same set of arguments in any two cases. Lots of salesmen never look to the future, which is another way of saying that if the prospect is not landed the first or second time, they put him down as lost. They do not figure on "missionary work" at all.

Now, there are too many salesmen who overlook the interesting of the public in general in the particular make of machine they are pushing. To make many sales and to interest the public, all arguments should center round the following points, which can be called standard sales arguments: The superiority of your machine; the factory which is back of it, and the agency which is selling it. To talk intelligently about your machine, you must study the catalog, and what you can't find there can always be obtained directly from the factory men themselves.

Before going any further, I want to emphasize several personal matters in successful salesmanship. These are courtesy, attentiveness to prospects, enthusiasm, truthfulness and sincerity in all statements. Coupled with the employment of standard sales arguments, a long way is traveled toward the goal of success in selling motorcycles.

The customer should first be told about the advantages of your machine. Start with one good feature after another—there is simply no limit. Call his attention to the fact that your machine is no higher in price than others. Explain the improvements on your machine over older models, but study the catalog so that you have these points right on tap and ready for any question that the customer can be expected to put.

The Value of the Catalogue

Familiarize yourself with the catalog, in other words. It tells you about the fine factory making your machine, the tremendous growth of that factory, the output, long experience, etc. Tell the customer how long you have sold that machine, and show him the large stock of parts which you always have on hand. Explain the importance of purchasing from a firm which is in a position to give him service. Tell him about the excellent repairmen you have and how they understand the motorcycle business thoroughly. Refer to your stock of accessories and point out that as soon as a new article of merit is marketed you put it in stock.

Impress him with the fact that it is not wise to buy a motorcycle of a firm that may be handling one machine one year and another the next. Also, that some agencies are in business only for a few months and then quit. Tell him that he will have absolute protection in this respect if he purchases.

Start With the Machine

Ordinarily, you should start your arguments with the superiority of your machine and close with the factory back of it, and the agency selling it. However, an ironclad rule cannot be reserved, just so that you stick to your arguments.

Here are a few don'ts to keep in mind, and these will help lots. The first is not to knock another machine. This is most important. The second don't is to fail to see the correct moment when the prospect is ready to close up the deal. Watch him, coach him, lead him, but never beg him.

FROM TRAVELING SALESMAN TO DEALER

How a Minnesota Nursery Stock Representative Entered the Motorcycle Ranks and Made Good by Following Sound Business Methods; Sees Big Future in Industry

By PATHFINDER

FIVE or six years ago, A. E. Shiley was covering an extensive territory selling nursery stock. The fact that he was successful in this line is evidenced by the fact that he was in his twelfth year working for the same house in that territory. Three years later he was in the motorcycle business as a dealer and today is thriving as the Harley-Davidson representative in Moorehead, Minn. The kind of philosophy that Shiley dispenses at Moorehead is well expressed in the following sentence, which is a favorite of his: "Every time I sell a man a motorcycle I feel that I am doing a kind act to that man, for I am helping him improve his health and at the same time making an efficient man out of him." A half-hour's chat with this modest Minnesotan convinced **Motor Cycle Illustrated's** representative of the sincerity of Shiley's determination to "make life worth living, to have an object in life and that, to do something for humanity."

Trying Out the Bicycle

When Shiley was selling nursery stock, his business brought him into constant touch with farmers. By reason of the nature of his business he was forced to rely on livery service all the time, and so expensive did this prove that he began to figure on a better way of working the territory. He first tried the bicycle, shipping the wheel ahead and using it in all his sales campaigns, but while this was better than the old horse and wagon arrangement, it had its shortcomings. He was not able to carry quantities of catalogs on the wheel, and long trips would find him pretty well played out at the end of the week.

The automobile came into prominence about this time, and Shiley invested most of his savings in a four-wheeler. This motor car was the beginning of his downfall as a salesman. The machine proved staggeringly expensive for maintenance in addition to fees for garaging and the sums, varying from $1 to $10 levied by farmers for pulling him out of mudholes. His territory had bad roads and the wear and tear on the machine was about bankrupting Shiley.

He stuck it out till the end of the season and then sold the motor car for next to nothing. Not only was the machine a total loss, but it had eaten up the profits for that season and some of the savings accumulated from previous years. Someone called his attention to the motorcycle the next season. Shiley was about through experimenting, but made up his mind to take another chance. He rigged up a luggage carrier with box to carry his literature and started out. It must be remembered that those were the days when motorcycles were far from being the excellent machines that they now are. There were no clutches, starters nor variable gears, and the saddles were far from comfortable.

The results he obtained right from the start were amazing. Even his firm wrote and asked how he accounted for the sudden increase in business that he was turning in from his territory. He explained how the motorcycle was enabling him to cover much greater territory than he was ever able to accomplish and what good time he was able to make with his little machine.

At night he could shove the two-wheeler in any old corner and the cost of running was practically nothing. He makes the boast now that he was not compelled to make five cents' worth of repairs on that first motorcycle of his. He figured up his profits of that season with a big grin. He not only had made a fine showing for the year, but had been able to make up for the loss of the automobile season.

Then he sat down and did some thinking. If the motorcycle offered such tremendous possibilities to Shiley, why couldn't Shiley make other people see these same possibilities and sell motorcycles? His family had often hinted that his presence around the house might make things a little more congenial. His children were getting to that age where they were entertaining, and he hated more and more every trip to leave them.

Where A. E. Shiley Sells Harley-Davidsons in Moorehead, Minn. Proprietor is at Right

Starting as a Dealer

He was well acquainted in Moorehead. With the determination to open up a small repair shop, Shiley got started. He was conservative. He never took a chance, never speculated. He never went beyond his means. Gradually he felt out the motorcycle business. Then he picked out a good machine and secured the agency for it.

That was three years ago. Motorcycles then were an unknown commodity in Moorehead. There were only a few in the vicinity. It was up to Shiley to educate the community to the motorcycle. He did it like an oldtimer. He knew whereof he spoke. Shiley made a friend with every sale. That was the secret of his success.

While Shiley has not set the world on fire, he says that he has been able to live like a human being, is with his family, has acquired a home, bought and paid for, is his own boss and regrets that he did not get started three or four years before. Shiley never went into debt. He stayed in his little repair shop three years before he felt confident enough to open the first class establishment that he occupies now. His stock kept increasing, but as it in-

Digitized by Google

creased it paid for itself. Shiley believed in paying cash, and still continues in this belief.

There are cases where prosperity spoils motorcycle dealers. But one is confident that Shiley will not allow the new quarters to impair his efficiency as a salesman. "If I wait for a buyer to come to me, chances are I won't get him," he says. "I have got to go to him and land him right in his own back yard."

Shiley sells Harley-Davidsons and the manner in which he kept his 1916 demonstrator humping bears out the big idea oft repeated throughout the interview that Shiley sees a big future in the motorcycle industry and that he is out after his share regardless of war talk, financial stringency, lack of work or any other excuse advanced by his less enterprising brother dealers for not getting the business.

Shiley makes business. That's why he is so successful.

SAN FRANCISCO, CAL.

THE MOTORCYCLE SALES CO., holding the Reading-Standard agency for Northern California, has just signed up for the Henderson for San Francisco, Marin, Alameda, Contra Costa and San Mateo counties. One shipment of Hendersons has arrived and another is due this week. Inside of the first week of taking on the four-cylinder model, two Hendersons were sold and two others ordered.

THE PACIFIC MOTOR SUPPLY COMPANY is just in receipt of advices from the East that Red Armstrong, who is at the Indian factory at Springfield, has undergone an operation for appendicitis and is on the road to recovery.

W. E. & W. H. JACKSON, Dayton distributors, are lining up new representatives for the Dayton Motor Bicycle daily. The following are some of the latest agents to sign up for the Motor Bicycle: George A. Faulkner, the Harley agent in Oakland; John A. Wilson, Indian agent in Berkeley; Merced Vulcanizing Works, Merced; George Baker, Oroville; Newton & Wackford, Chico.

MAGGINI & PERKINS, local dealers in Harley-Davidsons, have sold two van outfits within the past week. The Emporium, the greatest department store west of Chicago, purchased one and the other was taken by the Degen Belting Company, both concerns of this city.

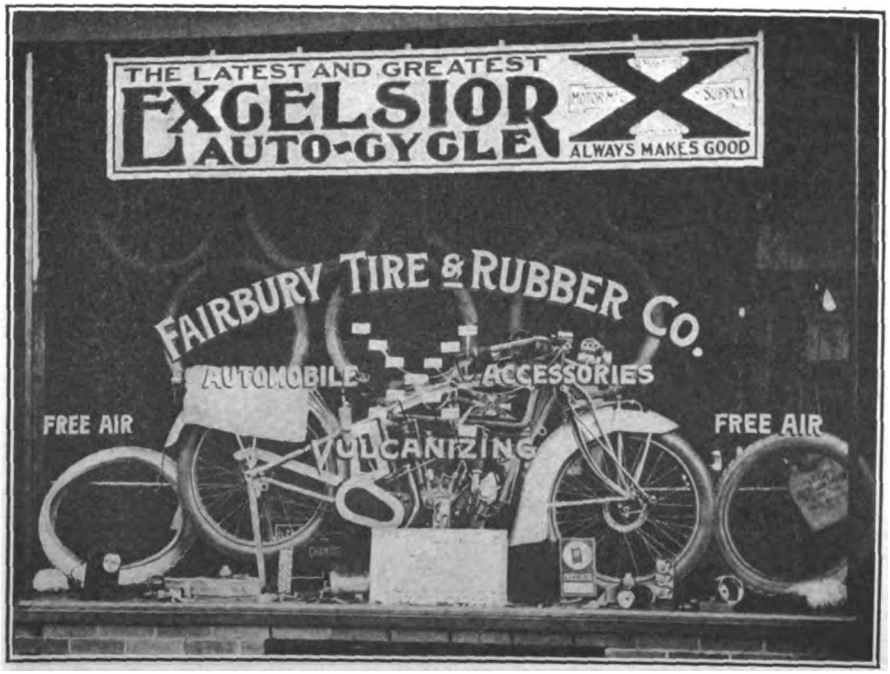
LOUDENCLOS & ANGWIN, proprietors of the Motorcycle Sales Co., now have the exclusive agency for the Henderson in this city. Factory Sales Manager Hugh A. Fargo signed them up on a recent trip to this city.

BOSTON, MASS.

W. J. WALKER, handling Harley-Davidsons in this city, has disposed of 121 machines since the first of September and has orders for 100 more. He attributes the volume of sales to excellent trade conditions and to an extensive advertising campaign.

COLUMBUS, OHIO

C. S. BARR and O. C. Belt, constituting the Belt-Barr Motor Company, at Gay and Fifth street, have dissolved partnership. O. C. Belt will continue the name of the old concern at the same address and will hold the Central Ohio distribution for the Indian as heretofore. Barr is entering the automobile field.



Attractive Window Display of Fairbury Tire & Rubber Co., Fairbury, Neb., Featuring the Excelsior. Note Explanatory Window Cords Forming an X

Dealers'

KANSAS CITY, MO.

L. A. YOST, proprietor of the Reading-Standard Motorcycle Co., of 412 East Fifteenth street, is moving his repair shop from the ground floor to the basement, so that the entire first floor will be free for display and sales purposes. "Business prospects called for this change," says Yost, "and it is being made as quickly as possible. I figure that 1916 will be over 60 per cent. better than last season on new machine sales."

BRONX, N. Y.

J. JONOSCHEK is handling the Reading-Standard for this city and surrounding territory for 1916. His headquarters are at 1013 Washington avenue and a branch has been established at 1153 Webster avenue also. He has done an excellent business in bicycles as well as motorcycles since he entered the two-wheeler line and his repair shop is humming these days.

WHEELING, W. VA.

WALTER BOWMAN, a well-known motorcycle man in this city, has entered into partnership with the T. A. Hoge Hardware Co., and will have charge of the firm's motorcycle department hereafter. He will be assisted by Bob Campbell. The firm handles Excelsior and Thor machines.

MANCHESTER, N. H.

CHARLES F. JACKSON, agent for the Indian in this city, is taking an extended tour with Mrs. Jackson, through Cuba, Jamaica and Panama. C. F. Eaton is in charge of the agency in Jackson's absence.

R. J. PELLETIER is demonstrating the Henderson in this city. He handles the Detroit-made four-cylinder mount through J. R. Poulin, State agent, in Nashua.

NORFOLK, VA.

DRAKE HARDWARE CO., Indian agent for this city, has moved to new quarters at 110 West Main street. The firm was for several years at Charlotte & Church streets. The move was made to take care of increasing business.

AUBURN, N. Y.

H. H. PULLNAN is again in the cycle line and is looking for a suitable representation for this territory. He handles an up-to-date line of accessories and bicycles.

NASHUA, N. H.

J. R. POULIN, Thor agent in this city, has also taken on the Henderson representation for 1916. His Henderson territory will cover the State of New Hampshire.

Section

INDIANAPOLIS, IND.

C. E. HAUK, who distributes the Cleveland lightweight throughout Indiana, Illinois and Wisconsin, with headquarters in this city, is attracting a great deal of attention to the litle two-stroke mount in the Hoosier capitol by riding the city streets in all kinds of weather. He is preparing to launch a strong campaign in all parts of Indiana, and as soon as the weather permits will cover his entire territory on the little fellow.

JOHN MERZ, handling the Excelsior line, has just received the first two-stroke lightweight "X," and has been busy showing off its paces on the roads around Indianapolis. Merz is sure of a big sale for the little mount. He has recently added a balcony over the rear of his salesroom to accommodate the office, all floor space being needed for the new season.

G. H. WESTING CO. men are jubilant these days. The cause is two carloads of Indians, totaling 100 machines, the largest shipment ever received in Indiana by one firm. There were several sidecars in the lot, and it took 20 wagons to carry the mounts from the freight yard to the salesroom. The Westing men decorated the crates with signs, and paraded the wagons all over the city before unloading them.

THE EM-ROE SPORTING GOODS CO., has taken the agency for the Smith motor wheel for Indianapolis. The firm recently purchased the business from August Leauty, a veteran cycle dealer. Lee Emmelman, president of the firm, is one of the best-known young men in the athletic line in the state, and his colleagues are all well versed in the trade.

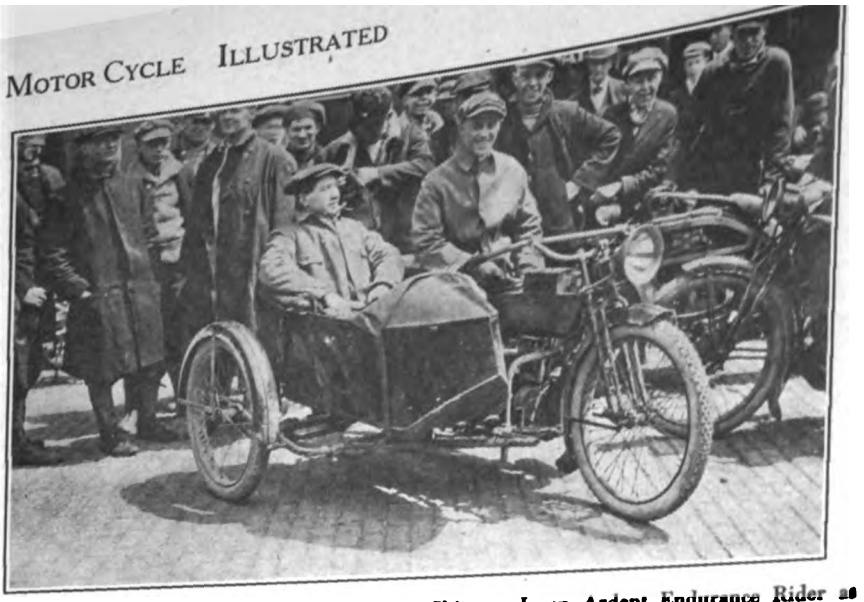
TACOMA, WASH.

E. E. PETERSON has sold out to Ray Pentecost and Harry Goble, and the purchasers have changed the name of the establishment to the General Cycle & Supply Company. The new firm will continue to feature the Excelsior at 1327 Broadway. Repair work is keeping the shop busy. A line of bicycles will be added later.

CHRISTOBAL, C. Z.

C. H. NEWELL and Jay L. Greene have opened a new motorcycle store and garage under the firm name of Newell & Greene. They intend to sell motorcycles at list prices, and claim that this will be the first shop to do business on this basis in the Canal Zone, as agencies for motorcycles have heretofore been handled by government employes, who are not permitted to enter into private business for a profit. They have taken the agency for the Pope line.

Ground was broken only a short time ago by the firm for the new two-story, concrete fire-proof building. It is to occupy a lot 140 feet x 30 feet. This building will be equipped with all modern conveniences, including a new invention for cleaning machines.



Fred Huyck, Representing the Henderson in Chicago, Is an Ardent Endurance Rider as Well as a Hustling Dealer. Photo Shows Him in Recent Run to Michigan City

WAPAKONETA, O.

ED. REHN, who runs the Wapak Garage in this city, has signed up to represent the Dayton Motor Bicycle in addition to other Dayton products. He made a trip to Dayton a few days ago to visit the Industrial Exposition and made his headquarters at the stand of the Davis Sewing Machine Co., while there.

BROOKLYN, N. Y.

BEN RUDERMAN, Thor representative in this city, is smiling broadly these days. He has sold ten machines so far and his repair shop is crowded with work. "I expect to double my sales this season," says Ruderman.

AKRON, O.

WILLIAM COLEMAN, proprietor of the Coleman Motorcycle Shop, has brought back a Dayton Motor Bicycle from Dayton, where he visited the Industrial Exposition. This little front-drive machine is attracting attention on all sides and demonstrations are the order of the day. Coleman is the local agent for Dayton products.

SPOKANE, WASH.

THE FALLS CITY CYCLE CO., distributors for the Harley-Davidson, has proved the merit of the Silent Gray Fellow by negotiating the steep roads in the Coeur-d'Alene country and as far north as British Columbia. It takes a good machine to make the rough, uphill roads and hairpin turns which abound in this section, and the splendid results obtained have proved that the three-speeder will take any hill with ease.

TAUNTON, MASS.

ALFRED BEAUVAIS has opened a motorcycle and bicycle shop at 9 Whittendon street. He handles the Indian products in both lines.

LOS ANGELES, CAL.

TOM GIRTON, of the Girton-Hoffer Co., is even more cheerful than usual these days, which is saying a lot, as there are folks who have never seen Tom otherwise than smiling. The same may be said of Fred Hoffer. Rumor has it that both partners have something hid out back of the woodpile in the shape of an invention pertaining to the motorcycle field. At any rate, while details are lacking, patent applications have gone to Washington and Fred Hoffer positively refuses to say anything more on the subject.

T. E. Berry, Southern California distributor for the Flying Merkel and Miami Power Bicycle, is entertaining Miami traveler, J. E. Steuer, these days. Steuer is preparing to set forth on a trip covering the northern half of California with the power bike.

GRAND RAPIDS, MICH.

L. W. DELYE left recently for a trip to the Excelsior factory in Chicago. He took with him a batch of orders for immediate delivery, and his return is being awaited with considerable impatience by a crowd of his patrons.

C. C. CLINE, local dealer for the Harley-Davidson, is now back in harness once more. His absence was caused by a trip to Milwaukee to visit the Harley-Davidson plant. Cline's return was hailed with delight, for he brought some Silent Gray Fellows, too.

CINCINNATI, O.

J. NASH, of the Harley-Davidson Garage, 1525 Race street, this city, has opened a sub-garage at 2233 Spring Grove avenue, a main thoroughfare leading into Cincinnati. The place was formerly occupied by the Pirate Motorcycle Co. Nash expects to keep a number of new Harley-Davidsons on hand at all times, utilizing the Spring Grove store for second-hand mounts. Charles Rohmeir is in charge of the new store.

Bicycle Dealers' Roll of Honor

BRISTOL, Conn., Feb. 2.—That bicycle dealers the country over have pledged their co-operation and will work hand in hand with the "One Million Bicycles Committee" in making Bicycle Day a success, is evidenced by the large list of "honor" bicycle dealers, which has just been issued by Secretary Charles F. Olin. Every dealer whose name appears here has written to the "One Million Committee," asking for all its boosting and sales-making material, which they will use to push the bicycles sales for 1916 right up to the million mark. Every live bicycle dealer's name should be on this roll of honor. *Is your name on this list, Mr. Dealer?*

With the Manufacturers

SPECIAL INSULATION IN JUMBO PLUGS

Gibson-Hollister Products are Gas-Tight and Soot-Proof, as Well as Having Self-Cleaning Properties.

GAS-TIGHTNESS, proof against heat, and self-cleaning are three qualities which are featured in the Jumbo line of spark plugs, the product of the Gibson-Hollister Mfg. Co., of Jamaica Plain, Mass. The insulation is of a novel composition, also, it being a recently developed di-electric known as "Molite." For motorcycle service, the firm specifies the Jumbo Junior, to be had in 7/8-18 (S.A.E.), half-inch or metric threads. The price of the Jumbo Junior plug is 75 cents.

The "Molite" insulation in all Jumbo plugs is very large in comparison to the total bulk of the plug. "Molite" is a lava composition of dull gray color and is unaffected by heat in any way. It will barely expand under extremes of heat and cold, as repeated tests have demonstrated. Its resistance to current pressure as compared with that of porcelain is 5,000 volts greater. This insulation is exclusively used in Jumbo plugs.

A large copper-asbestos washer placed between the insulation and inside shell shoulders provides for downward expansion, while the center electrode is surrounded with a tough glass insulator to resist puncturing and serve as a safeguard should the outer insulation be cracked. A high-compression asbestos washer is fitted around the center electrode to take the expansion of the insulation and this is bedded in a layer of elastic cement to give strength and prevent compression leakage past the electrode. The shell electrodes are in such form as to render it almost impossible to collect soot sufficient to impair the spark-output of the plug. There are two of these electrodes, each being anchored to the shell at both ends. The dissipation of heat is thus assisted and strength is added to the structure of the plug. Burning of the electrodes is avoided even under extremely high temperatures.

The shell electrodes as well as the lower part of the central electrode are of high-percentage nickel alloy. The central electrode is electrically welded to the main body. Shells are of cold-rolled steel, treated with a special non-rusting finish. Each plug is fitted with a triple-service terminal, allowing of the use of any form of connection. The retail price of the Jumbo junior is 75 cents.

THIS MESSAGE MADE WALLS GRIN TRIUMPHANTLY

IT was with justifiable pride that Advertising Manager D. R. Walls, of the Splitdorf Electrical Co., Newark, N. J., perused a cablegram a day or two ago from J. H. Rhodes, the firm's Australian representative. The cable tells such an impressive story that it requires no comment. The message follows:

"Baker on Dixie-equipped Indian established greatest record ever made on two wheels. New world's 24-hour road record —930½ miles over Victorian rock-strewn roads against heavy gales and driving rain."

RED FOX INNER TUBE IS NEW U. S. PRODUCT

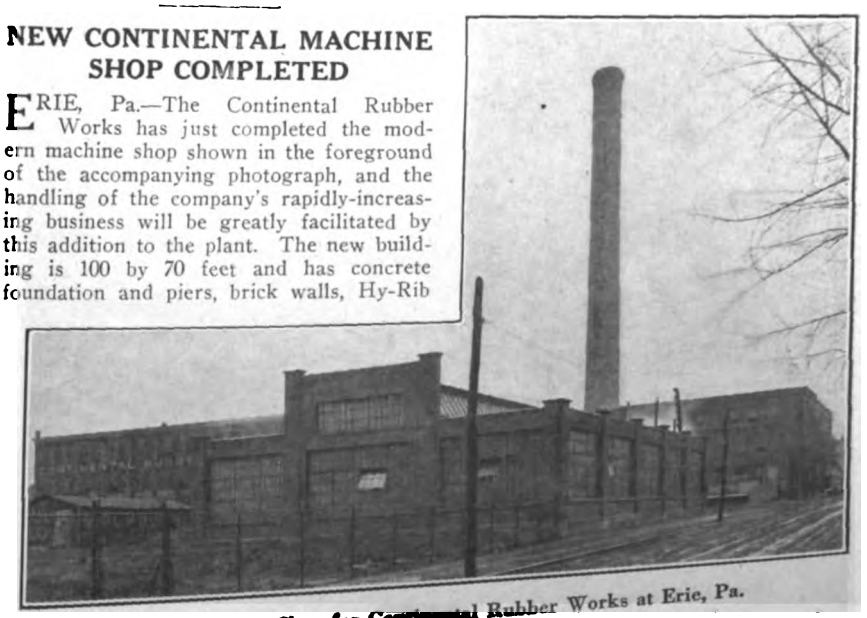
FROM the United States Tire Company comes the announcement that it is marketing a new motorcycle inner tube in red. This new offering, which embodies the usual high-grade features of construction found in United States products, with several points of improvement, will be known as the Red Fox Brand and will be supplied in both endless and butt-end styles, and in all the popular sizes.

The Red Fox tube will be heavier than the ordinary inner tube, and will be sold at only a slight advance in price over the present types offered by the company. The red tube will be sold in bicycle sizes also.

NEW CONTINENTAL MACHINE SHOP COMPLETED

ERIE, Pa.—The Continental Rubber Works has just completed the modern machine shop shown in the foreground of the accompanying photograph, and the handling of the company's rapidly-increasing business will be greatly facilitated by this addition to the plant. The new building is 100 by 70 feet and has concrete foundation and piers, brick walls, Hy-Rib roof and structural steel supporting the roof. It has a crane-way floor of hard maple, laid on sleepers embedded in concrete. Steel sash are used throughout, with wire glass. The bays are 21 feet wide and the crane span is 26 feet. A 3-ton traveling crane has been installed. The building is lighted by 100-watt Nitrogen lamps. A 50-horsepower motor supplies the power.

Reports from the factory indicate that the demand for Continental products is, growing more rapidly than at any time in the previous history of the company, and the new machine shop with its thoroughly modern equipment, is indicative of the progressive policy which is being followed in keeping abreast of the market.



New Machine Shop for Continental Rubber Works at Erie, Pa.

DEMAND IS SPLENDID, SAYS TRAVELLER SMITH

NEWARK, N. J.—L. M. Smith, traveling representative for the Loewenberg Co., makers of motorcycles and sporting clothing, has just returned from covering his territory. He reports that the demand for motorcycle clothing has been splendid, especially in the East, and that the demand for sporting clothing has also been fine. In regard to the volume of business done by the Loewenberg firm, there has been a 25 per cent. increase over the corresponding period of 1915.

TAKE WILLARD AGENCY

LISBON, N. D.—Willard storage batteries will be handled in this city by the Lisbon Battery & Supply Co., at Fourth & Main streets.

STANDARD WELDING EXPERT SUCCUMBS TO CANCER

NEW YORK.—Richard S. Bryant, factory manager for the Standard Welding Co., of Cleveland, O., died of cancer at the Post Graduate Hospital, this city, on January 24. He was 46 years of age.

Bryant was widely known as an authority on automobile rims and had invented a number of special types during his career. In fact, most of the automobiles now in use are equipped with rims designed by him while with the Standard Welding Co. He was the first to design a quick-detachable rim, and soon after bringing this out, organized the Bryant Rim Co. This firm was later bought out by the Diamond Rubber Co., of Akron, O. The goodwill and patents of Bryant's firm were turned in later to the United Rim Co., of Akron, and Bryant joined the company and later the Standard Welding Co., as consulting engineer. He was recently made factory manager.

Bryant was a member of the Standards' Committee of the S. A. E. He was a 32d degree Mason, a Knight Templar and a Noble of the Mystic Shrine. He belonged to the Cleveland Athletic Club, the Shaker Heights and the Westwood Golf clubs.

BIG ORDER FOR SCHICKELS

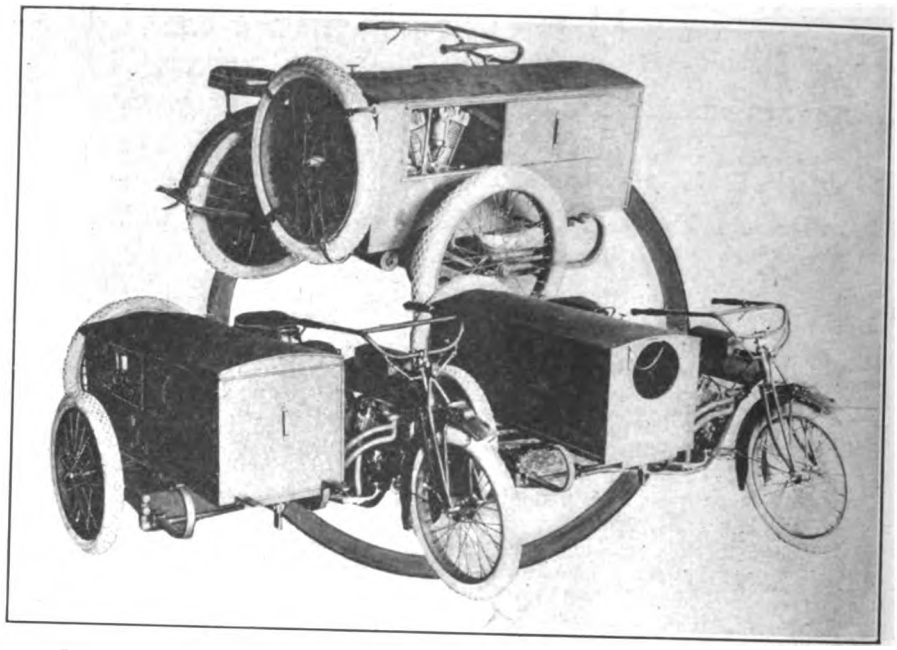
The Ellisson Automobile Tire & Repair Co., of this city, has just closed a contract with the Schickel Motor Co., of Stamford, for 100 machines. This order, which is next to the largest taken for motorcycles in Bridgeport this year, includes Schickel lightweights, Big Sixes and delivery vans.

JOHNS-MANVILLE IN NEW HOME.

PHILADELPHIA, Pa.—The H. W. Johns-Manville Co., is now located in its new home at Broad and Race streets. It was formerly on North Second street.

MORE INDIAN RADIO OUTFITS ARE ORDERED

DeForest Wireless Company Calls for Third Series of Units for Field Service Following Successful Operation of Those Previously Supplied



Top and Left, Main Carriage of Unit; Right, Service Van of Indian Outfit

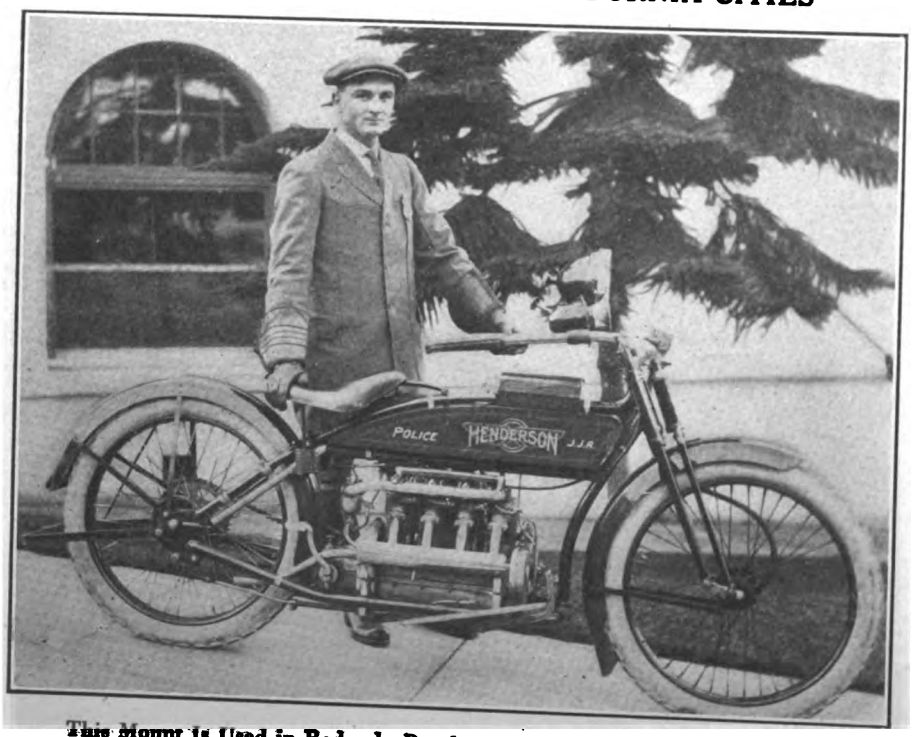
SPRINGFIELD, Mass., Jan. 28.—Five more Indian motorcycle wireless stations have just been completed by the Hendee Mfg. Co. for the DeForest Radio Telephone & Telegraph Co. of New York. This is the third order within a year of successful field operation of these machines.

The wireless or radio stations consist of two motorcycle units, one conveying the wireless sending and receiving equipment either in a side-carriage or a trailer, and the other hauling the service van, carrying poles, wires, tent blankets and other camp equipment. The wireless operator rides behind the driver on a tandem attachment.

The motorcycle is the standard 7 horsepower model fitted with automobile size tires and spring frame. Power for the wireless is furnished by a 5½ horse-power Indian motor in a compartment in the van, this motor driving a small two-in-one receiving and sending electric generator, by chain with conpensating sprocket in the line. On the sending side, the generator develops 700 volts at 2.6 amperes, being capable of sending 500 miles with this current, and on the receiving side there are 110 volts and 2.27 amperes. The operator's instruments are in the forward part of the van, and the keyboard is made removable so as to enable the operator to work in comparative silence. The power of the motor is regulated by magnetic control of the throttle and hand starting for the motor is provided.

Gasoline sufficient for 12 to 24 hours running is provided, there being a main tank and three reserve tanks. The weight of the motorcycle and van is about 1,176 pounds. Finish is olive drab.

HENDERSON SERVES TWO CALIFORNIA CITIES



This Mount Is Used in Redondo Beach and Hermosa by Officer J. J. Alder

REPUBLIC RUBBER CO. GROWING

YOUNGSTOWN, O., Feb. 2.—The Republic Rubber Co. is planning considerable extensions to its plant at Crab Creek, all departments requiring more room than is at present available. The company has announced that it is now shipping large quantities of tires and tubes to its London, England, branch, in consequence of the increased demand there. Several promotions and new appointments have been made recently by the company, as follows: M. E. Murray, assistant general manager of sales; J. M. Cranz, assistant general manager of works; S. H. Smith, assistant manager tire department; and C. M. Henrietta, foreman tire department.

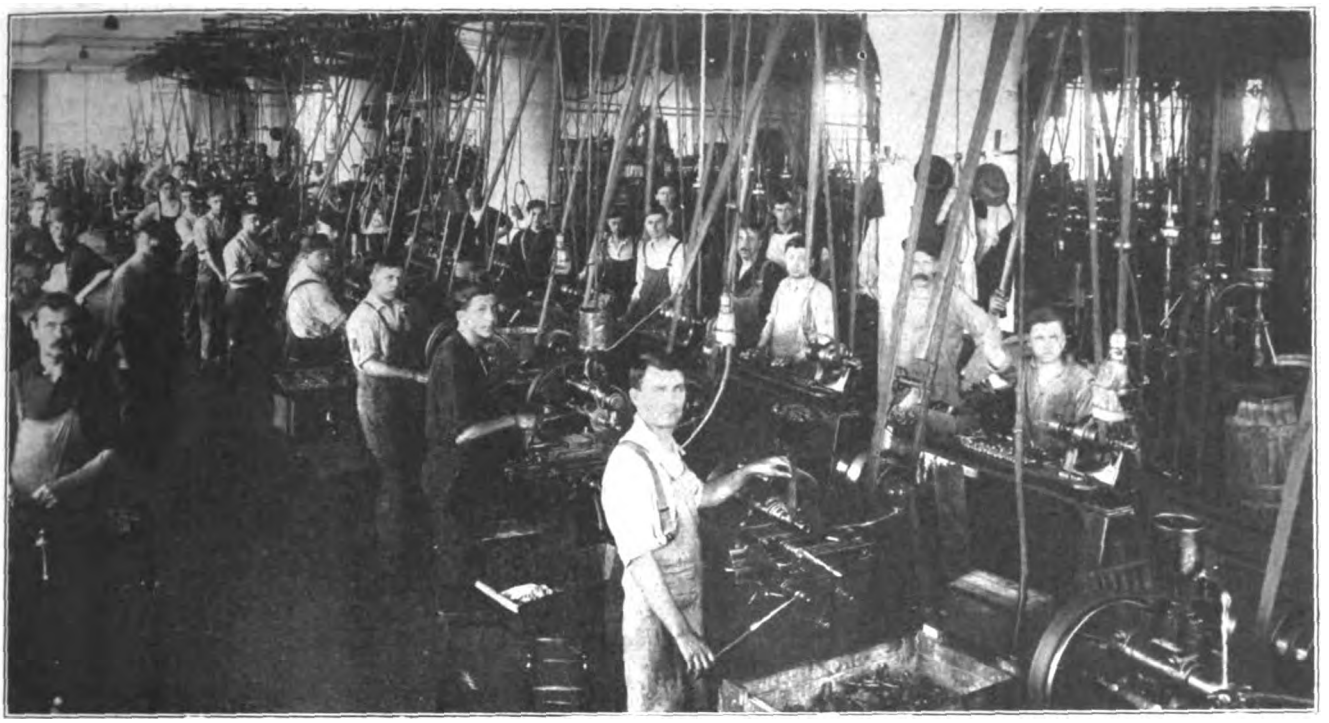
COMPLETE EQUIPMENT PRODUCES PERFECT MOTORCYCLES

The Milling Machine Department of the Excelsior Factory an Important Factor in the Production of the "Good Old X"



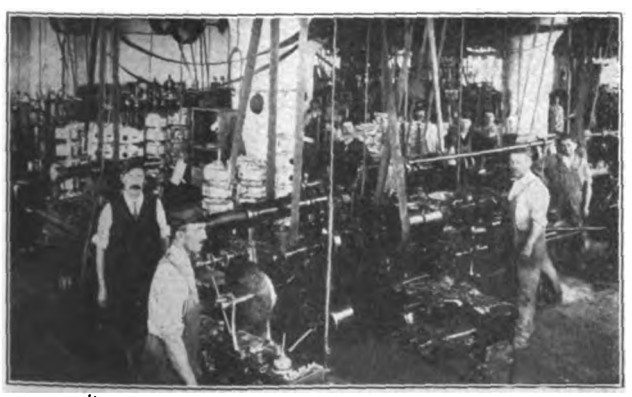
An Acre of Milling and Special Machines

THE question of what a factory can produce and deliver per dollar of selling cost is largely a matter of equipment.

In a plant of limited facilities in which machines must be dismantled, reassembled and adjusted for producing the several parts of a product or in which the various processes must be accomplished by means of machines and tools not specially adapted thereto, it is impossible to operate as efficiently and economically as in one with an equipment specially designed for the production of the several parts of the complete output.

In the Excelsior factory, every operation is by means of machines designed exclusively therefor.

Motor crank cases are completely finished on special milling machines designed to do that work and that only. Valve cams, rocker arms, pawls, and similar parts are produced on milling machines specially selected or designed for that particular purpose.



Special Mills for Crank Case Work

This is exclusive of the work done in the lathe and boring mill departments and it is largely by means of this complete equipment that the Excelsior Company is able to produce a better machine for the market price than is within the mechanical possibilities of any less completely equipped plant, and at the same time produce a more mechanically perfect motorcycle than could be done with a makeshift equipment in which lathes and boring mills are called upon to do work properly performed on milling machines and shapers.

The results are of vast importance to the ultimate buyer who gets correspondingly greater returns from his investment in a machine that embodies the utmost possibilities in power and equipment, with mechanical perfection in every detail.

The slightest consideration will convince anyone that no motorcycle can be better than the factory behind it.

The Excelsior factory is the most completely and efficiently equipped of any plant in the world, devoted solely to the production of a single line of motorcycles, and the product is in every way in keeping with the perfection of the plant and its equipment, both in machinery and workmen.

The results are shown in the world's records for Speed, Reliability and Endurance, and in the EXCELSIOR reputation as the machine that ALWAYS MAKES GOOD.—Adv.

Baker and Indian Hang Up New 1000 Mile Mark Under Most Adverse Conditions

Battling against wind and rain, riding the rough Australian roads like a dare-devil, Erwin G. Baker on January 29th, established a new world's record for 1,000 miles—covering the distance in 21 hours and 3 minutes.

Run was official under the auspices of the Victorian Motorcycle Club.

This wonderful performance of man and motor—already heralded all over the United States by the Associated Press—calls forth some extraordinary comparisons.

Previous Professional Record

For 21 Hours, 690 miles, 586 yards.

Previous Amateur Record for 21 Hours 945 miles, 587 yards—made as a special track exhibition.

Baker's time was practically the equivalent of that of the Twentieth Century Limited in its run from New York to Chicago.

He used a *stock* Powerplus motor in making this record, showing a consistent 50 miles an hour, allowing 50 minutes stop for fuel and food. This means that at times Baker did at least 75 miles an hour. *Not once did he stop for repairs other than to readjust one valve.*

As usual Indian opens up the season with important records. No motorcycle shows the motorcycle purchaser *so much actual performance for his money as the Red One.*

For power, speed and real enduring consistency of these qualities there's never a motorcycle like—

Of a Personal Flavor

Lincoln T. Kauffmann, sales manager of the Nonpareil Horn Mfg. Co., of 73 Wooster street, New York, left on January 17 for a four months' trip from coast to coast. He anticipates a large volume of business, as the demand for Nonpareil products in all lines has been steadily increasing since the opening of the new season.

Ralph W. Ashcroft has been made publicity manager for the United States Tire Co., of 1790 Broadway, New York, He was formerly with the Canadian Consolidated Rubber Co.

C. C. O'Neil has been appointed manager for the Lowell, Mass., branch of the Fisk Rubber Co., of Chicopee Falls, Mass.

J. C. Toomey is now in charge of the Boston branch of the United States Tire Co., of New York. He succeeds E. H. Kidder, recently promoted to the New England managership.

C. H. Underberg has been madé manager of the Tacoma, Wash., branch of the Fisk Rubber Co., of Chicopee Falls, Mass. He was formerly office manager.

H. S. Hadden has joined the advertising firm formerly known as the W. R. McLain Co., of Philadelphia, Pa., and has taken charge of the New York office at 220 Broadway. The firm is now known as the McLain-Hadden-Simpers Co.

H. E. Crocker has been appointed manager of the Providence, R. I., branch of the United States Tire Co., of New York. He succeeds J. C. Toomey, who is now in charge at Boston.

H. S. Ferwin has been appointed representative in eastern Washington for the New York Lubricating Oil Company, with headquarters in Spokane, Wash.

H. B. Niblette, general manager of the Buffalo, N. Y., branch of the B. F. Goodrich Company, has resigned his position. He was with the firm for seventeen years. His future plans have not yet been announced.

O. S. Johnson has been appointed manager of the St. Louis branch of the United States Tire Co., vice H. H. Hubbard, who has been transferred to the home office of the company.

W. E. Balentine, of Chicago, manager of the train lighting department of the Willard Storage Battery Co., died suddenly of pneumonia on January 18. He had been with the Willard firm for seven years, having managed the Chicago branch just prior to taking charge of the train lighting department.

Tom Wilkinson is now in charge of the San Francisco branch of the United States Tire Co. He was formerly in charge of the Los Angeles branch. H. A. Farr succeeds Wilkinson at Los Angeles.

S. L. Davis, Managing Associated Motor Sales Co., Toledo, O.

Sam Scott is now distributing Willard storage batteries in Tacoma, Wash. He makes his headquarters with the Pacific Car Co.

H. C. McCulloch, of 1431 Broadway, has been appointed Seattle, Wash., distributor for the Federal tires and other products of the Federal Rubber Co.

VAN CLEEF BROS. STATE THEIR SIDE OF CASE

VAN CLEEF BROS., of Chicago, manufacturers of Dutch Brand specialties, object to statements which have been given publicity concerning disposition of the suit brought against them by the Buffalo Specialty Co., in connection with the use of the name "Neverleak," and assert that no final court decision was given.

The following explanatory statements are made by Van Cleef Bros., in a letter to **Motor Cycle Illustrated.**

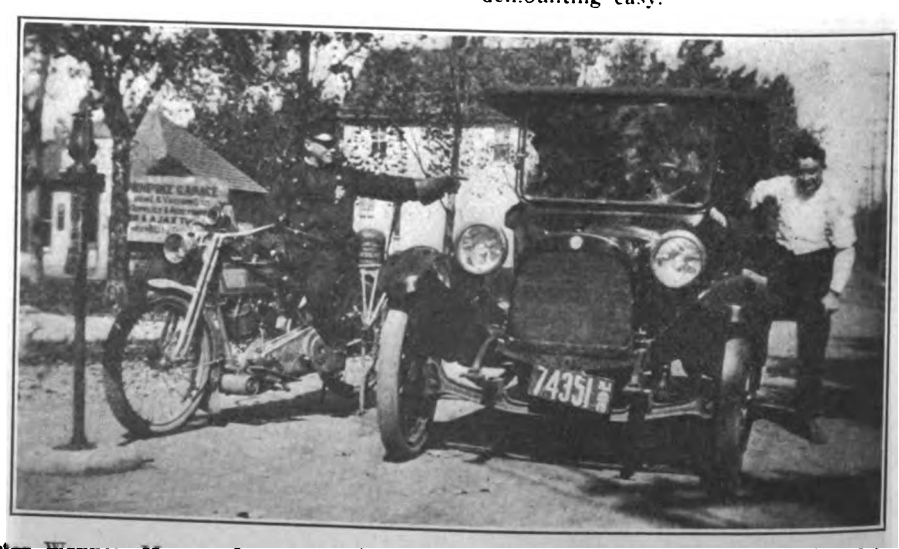
March 9, 1914, the patent expired under which the Buffalo Specialty Co. had been manufacturing Neverleak tire fluid, for sealing punctures. Upon the expiration of the patent Van Cleef Bros. marketed a tire fluid which they had had in preparation for some time, and acting upon the advice of their attorney, they adopted the name "Neverleak," believing that they were free to use the name in as much as the patent covering the product had expired.

The Buffalo Specialty Co. at once started suit to protect the name "Neverleak." Judge Sanborn, in the United States District Court, dismissed the case "for want of equity," and the Buffalo company appealed. The Appellate Court threshed out the matter and remanded the case to the lower court "for further proceedings."

At that stage of the developments Van Cleef Bros. decided that they could best serve their dealers by coming to a settlement, and avoiding another long drawn out siege of litigation, and to that end they opened negotiations with the Buffalo Specialty Co. An agreement was reached, one of the features of which was the abandonment of the name "Neverleak," by Van Cleef Bros. In brief, the declaration of Van Cleef Bros. is that the settlement was brought about through overtures from them when they decided that further litigation would inflict hardship upon their dealers, and not through a court verdict.

NEW COLLAPSIBLE RIM

ST. LOUIS, Mo., Feb. 2.—Arthur L. Ottenad, of St. Louis, has secured a patent on a collapsible rim for automobile, motorcycle and bicycle tires. The rim is hinged at several points to make mounting and demounting easy.



Peter Wanner, Motorcycle Officer of Ridgefield Park, N. J., Regulating Traffic on Main Road. He Uses a Harley-Davidson and Says He Can Catch Anything on Four Wheels

Our Canadian Letter

FRENCH-CANADIANS ARE BOOSTING BICYCLES

Newspapers in the East are Idealizing the Two-Wheeler; Canada's Slogan is "100,000 Bicycles in 1916"; Dealers Will Work Together.

TORONTO, Ont., Feb. 2.—Interest in the bicycle sales campaign in Canada for 1916 is growing, and the bicycle popularity wave is spreading to all parts of the Dominion. Among those who have taken up the boosting are the more or less phlegmatic French-Canadian newspapers in Quebec and the East, and these are now proclaiming that "cette annee sera des plus actives suivant toutes les apparences." (All indications point to a most active season.) The habitants are talking about the economy of the wheel, the increased good roads system and the healthfulness of cycling just like their English-speaking brothers, and indications are that the bicycle trade in the French districts of the Dominion will be every bit as lively as in the other sections.

Canada also has a trade slogan. Everybody now is saying "100,000 bicycles for Canada in 1916." Canadian manufacturers have adopted this cry, and it is being used in literature which is now being prepared. According to the statements of the trade moguls, this goal for the Canadian trade is not beyond reason, especially in view of the enthusiasm which has already been aroused.

A general meeting of the bicycle trade in Toronto is to be held within a week when definite plans for the proposed "Bicycle Week," starting February 28, will be arranged.

TORONTO CLUB ELECTS

TORONTO, Ont., Feb. 2.—At the regular meeting of the Toronto Motorcycle Club on Wednesday night, January 26, the annual election of officers was held with the following results:

President J. G. Jones (re-elected); vice-president, Charles Speers; treasurer, A. Burke; secretary, F. Shaw; executive committee, H. J. Stillaway and C. Hughes; competition committee, F. Dolson, chairman, E. Rynex and F. Turofsky; house committee, D. Boyd and D. Stone; legal action, W. E. Andrews and F. Dolson; auditors, A. and A. A. Shuttleworth; touring committee, W. Andrews, D. Boyd, E. Rynex, Art. Shuttleworth, Archibald Shuttleworth; social committee, C. Speers, J. G. Jones and G. Orange; tyler, Percy Barnes.

ANDREWS SELLS SIXTY

TORONTO, Ont., Feb. 2.—Walter Andrews, the new Harley-Davidson dealer in Toronto, has disposed of over sixty 1916 Harley-Davidson motorcycles and fourteen sidecars since October 1st last. During the same period one year ago, he sold three motorcycles and one sidecar. For a demonstration of the new model, Andrews recently drew forty-two skaters over the frozen surface of Grenadier Pond for a long glide and on the same day Wilfrid Morrison carried eight others on a Harley-Davidson and sidecar for a ride through High Park.

McNEIL JOINS THE RANKS

TORONTO, Ont., Feb. 2.—After turning down a lucrative position in the Excelsior factory, Chicago, J. A. McNeil came to Toronto and enlisted for foreign service with the 166th Battalion as a private. McNeil has raced on motorcycles for the past five years and has appeared on all the board tracks of the West. For several seasons he straddled an Indian but during 1914 and 1915 he made several startling performances at Omaha, St. Paul and other cities on a Cyclone.

TORONTO TRUNDLERS ISSUE CHALLENGE TO M. M. A.

TORONTO, Ont., Feb. 2.—The fame of W. G. Schack and confreres of the Motorcycle Manufacturers' Association as alley bowlers has spread to a foreign land, with the result that a quintette of Toronto trundlers have issued a challenge to meet the M. M. A. experts in alley matches at Buffalo and Toronto. The Toronto team is made up of well-known figures in motorcycle and bicycle circles, including F. A. O. Johnston and Herbert Marshall, president and vice-president, respectively, of the Canada Motorcyclists' Association; Harry Richard, secretary of the Canadian Wheelmen's Association; J. A. McNeil, the former board track champion, and A. Sellers, a local motorcycle enthusiast. The local rollers suggest that stakes be arranged or that the teams play for a supper. F. A. O. Johnston, 106 Adelaide street West, will await a notice of acceptance of this challenge from the M. M. A. stars.

KIPP & COMPANY MOVE TO LARGER QUARTERS

TORONTO, Ont., Feb. 2.—An important announcement is that H. M. Kipp & Comany, one of the oldest motorcycle concerns in Canada, have decided to remove to the larger premises at 447 Yonge street, which is in the very center of Toronto. The firm will continue to handle the Indian, but have also taken the local agencies for the Dayton and lightweights. In addition, the stock of spare parts for the Harley-Davidson formerly held by the Lion Sporting Goods Company has been purchased by the Kipp company and arrangements have also been made to carry full supplies of parts for Thor, Merkel, Reading Standard and other makes of motorcycles. F. H. Lemon will have charge of the repair department while Bert Webb will be the head salesman. The new premises will be opened on February 15th.

TORONTO CYCLISTS WOULD REORGANIZE THE C. W. A.

TORONTO, Ont., Feb. 3.—At a representative meeting of bicycle racing men at the Classic Athletic Club on Friday night, January 28, the movement of the cyclists in the United States in the direction of the organization of a new sport governing body was considered, and the general situation was discussed with a view to possible affiliation.

Toronto cyclists claim to have a grievance in the fact that they enjoy no direct representation on the executive of the Canadian Wheelmen's Association, and it was decided at this meeting to make a strong demand for the reorganization of the C. W. A. and for the establishment of a definite policy at the annual convention of the association on Saturday, April 22.

The local riders point out that outside of the board track contests in Toronto last year, the events staged in and around the city were conducted by the cyclists themselves through their own organization, the Totronto Bicycle Riders' Association. No immediate action was taken at the meeting of riders other than that the secretary was authorized to seek information relative to the situation in the United States from both the National Cycling Association and the American Cycling Association.

TRADE MEN ENLIST

WINNIPEG, Man., Feb. 2.—A. G. Cruikshank, managing director of the Consolidated Bicycle and Motor Company, Winnipeg, for the past fourteen years, and Frank Small, secretary-treasurer of the company for eight years, have enlisted for foreign service. Mr. Cruikshank has joined the 144th Battalion of Infantry, while Mr. Small is now with the 179th Cameron Highlanders. Both have been well-known figures in the motorcycle trade of Western Canada.

INDIANS FOR MILITIA

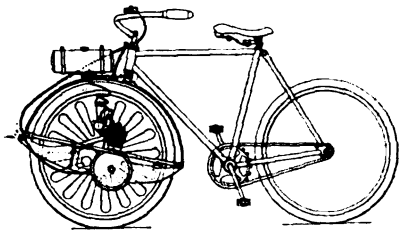
OTTAWA, Ontario, Jan. 28.—Ketchum & Company, local Indian agents, have been securing fairly heavy orders for Indian motorcycles for war purposes from the Canadian Militia Department. These machines are shipped direct to an Eastern Canadian port, from which they are transported to parts unknown.

Digitized by Google

THE LATEST CYCLE PATENTS

GORMAN MOTOR BICYCLE

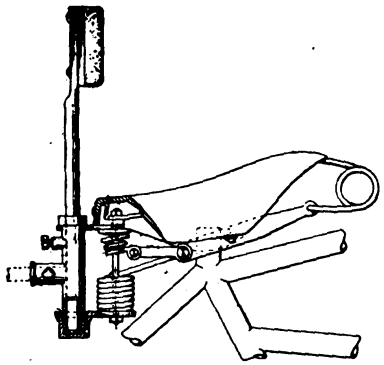
PATENT No. 1,168,300 has been granted to George H. Gorman, of Dayton, O., and assigned by him to the Davids Sewing Machine Co., of that city. This patent is substantially that relating to the Dayton Motor



Bicycle. The inventor states that the object of his device is to provide a propelling means to an ordinary bicycle without changes in the main features of construction of the same. The propelling wheel, motor and co-operating mechanism is to form a single unit. The motor is supported by a hollow frame construction which in its turn is carried on the ends of spring members emerging from the pivotal fork crown. The power plant consists of a single cylinder air-cooled motor with external flywheel, driving the front wheel by spur gearing. The hollow front member forms a muffler or expansion chamber for the exhaust gases, while the rear member is used as an oil receptacle. The fuel tank is shown mounted on the forward spring member, but this construction is not used in the Dayton vehicle. Control is by wire mechanism.

FRIEL BACKREST

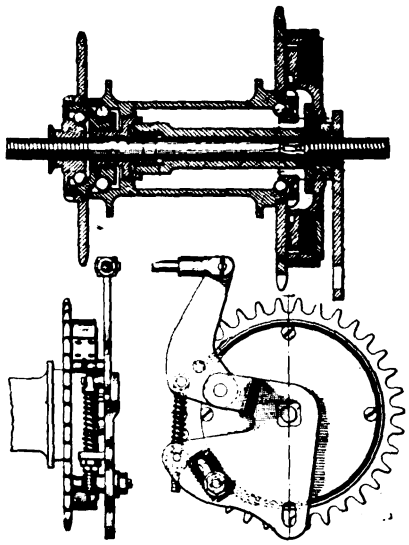
PATENT No. 1,168,253 has been granted to G. Friel, of Los Angeles, Cal., for a backrest for either motorcycle or bicycle saddles. The pad of the rest is supported by vertical bars which fit into cylinders arranged at their lower parts. The cylinders are attached to the upper springs of the saddle while to the lower springs are fitted



sleeves in which the cylinders can move as the saddle springs move. The backrest is adjustable for height and is readily removable.

ELLETT DOUBLE BRAKE

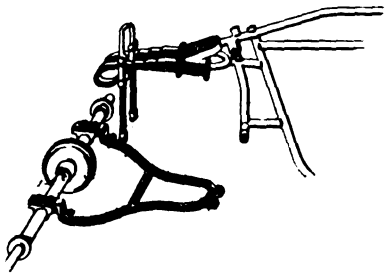
FREDERICK S. ELLETT, of Elmira, N. Y., well known as an inventor of mechanical devices in connection with motorcycles and bicycles, has been granted a patent on a braking device for motorcycles, incorporating two independent brakes. The service brake is coaster actuated and consists of a series of friction discs arranged in the left side of the hub. On back-pedalling the discs which attach alternately to the rigid portion of the hub and to the shell, are set up against each other and effect the braking. The other brake is of the external contracting band type, actu-



ated by pedal under the foot of the rider. The patent is No. 1,168,614.

FOLEY TRICYCLE DEVICE

JEREMIAH C. FOLEY, of New York, has received a patent on a tricycle attachment for use with an ordinary motorcycle, this attachment being readily put in place or detached at will. This attachment consists of a rear axle with pair of wheels, divided in the center to take a sprocket for the final drive. Provision is made for brakes on the drum carrying the sprocket. The attachment has a U-shaped forward extension



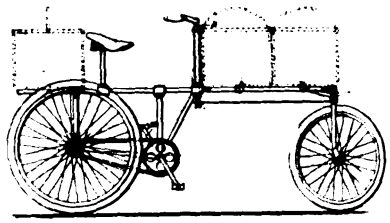
designed to attach to the bottom bracket of the motorcycle, the rear wheel having first been removed, and lugs for engaging with the vertical members of an Indian spring frame. The attachment allows of utilizing the spring frame action of the motorcycle when in place. The patent is No. 1,167,286.

CORNELL, N. Y.

S. C. Stephenson has opened a motorcycle shop at 58 Main street and is now looking for the agency for some well-known make for this territory. Stephenson is a partner in the firm of Stephenson & Co., well-known tradesmen in this city.

BARNES DELIVERY CYCLE

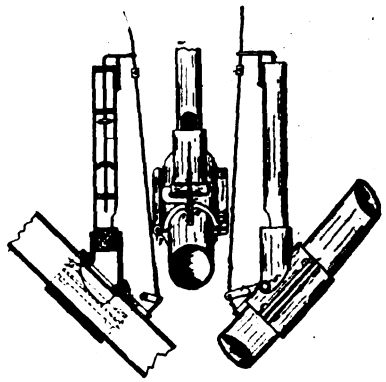
LARGE CAPACITY in connection with a low center of gravity is the end sought after in Patent No. 1,168,995, granted to William Barnes, of New York, the patent relating to a delivery tricycle. The forward



part of the frame is triangular and on this is to be carried two baskets if desired. The steering bars are centrally located with rod connections to the front wheel. The pedal gear drives a live axle as in ordinary tricycle practice. A third basket or box is provided for by a rear platform.

BECKER EXHAUST HORN

AN exhaust signal which can be readily attached to any motorcycle is the subject of a patent granted to Emil A Becker, of Milwaukee, Wis. The exhaust pipe is drilled and the horn is clamped around it. Within the exhaust pipe works a flap valve and within the cylindrical whistle or tube are two mushroom valves designed to regu-



late the tone of the exhaust. A rod designed to be moved by the hand of the rider opens the flap-valve and, moving upward, operates the valves within the whistle tube, thus varying the sound. The patent is No. 1,166,652.

SAN FERNANDO, CAL.

JOB H. SAUNDERS, Harley-Davidson agent at Fillmore until recently, is now in this city, getting a store ready for occupancy. He was burned out in Fillmore a short time ago, and decided to move to larger quarters and a better territory. He will continue the Silent Gray Fellow in this city.

WILLARD IN HANOVER

HANOVER, Pa.—The Willard Storage Battery Co., of Cleveland, O., has established a service station at the premises of the Hanover Storage Battery Co., at 240 York street.

INTERIOR OF BOWMAN BROTHERS' BICYCLE STORE IN SASKATOON, CANADA

KEEPING TAB ON YOUR PROSPECTS.—By Frank Hardy

ANOTHER BIG INSTALMENT OF KRAMER'S LIFE STORY

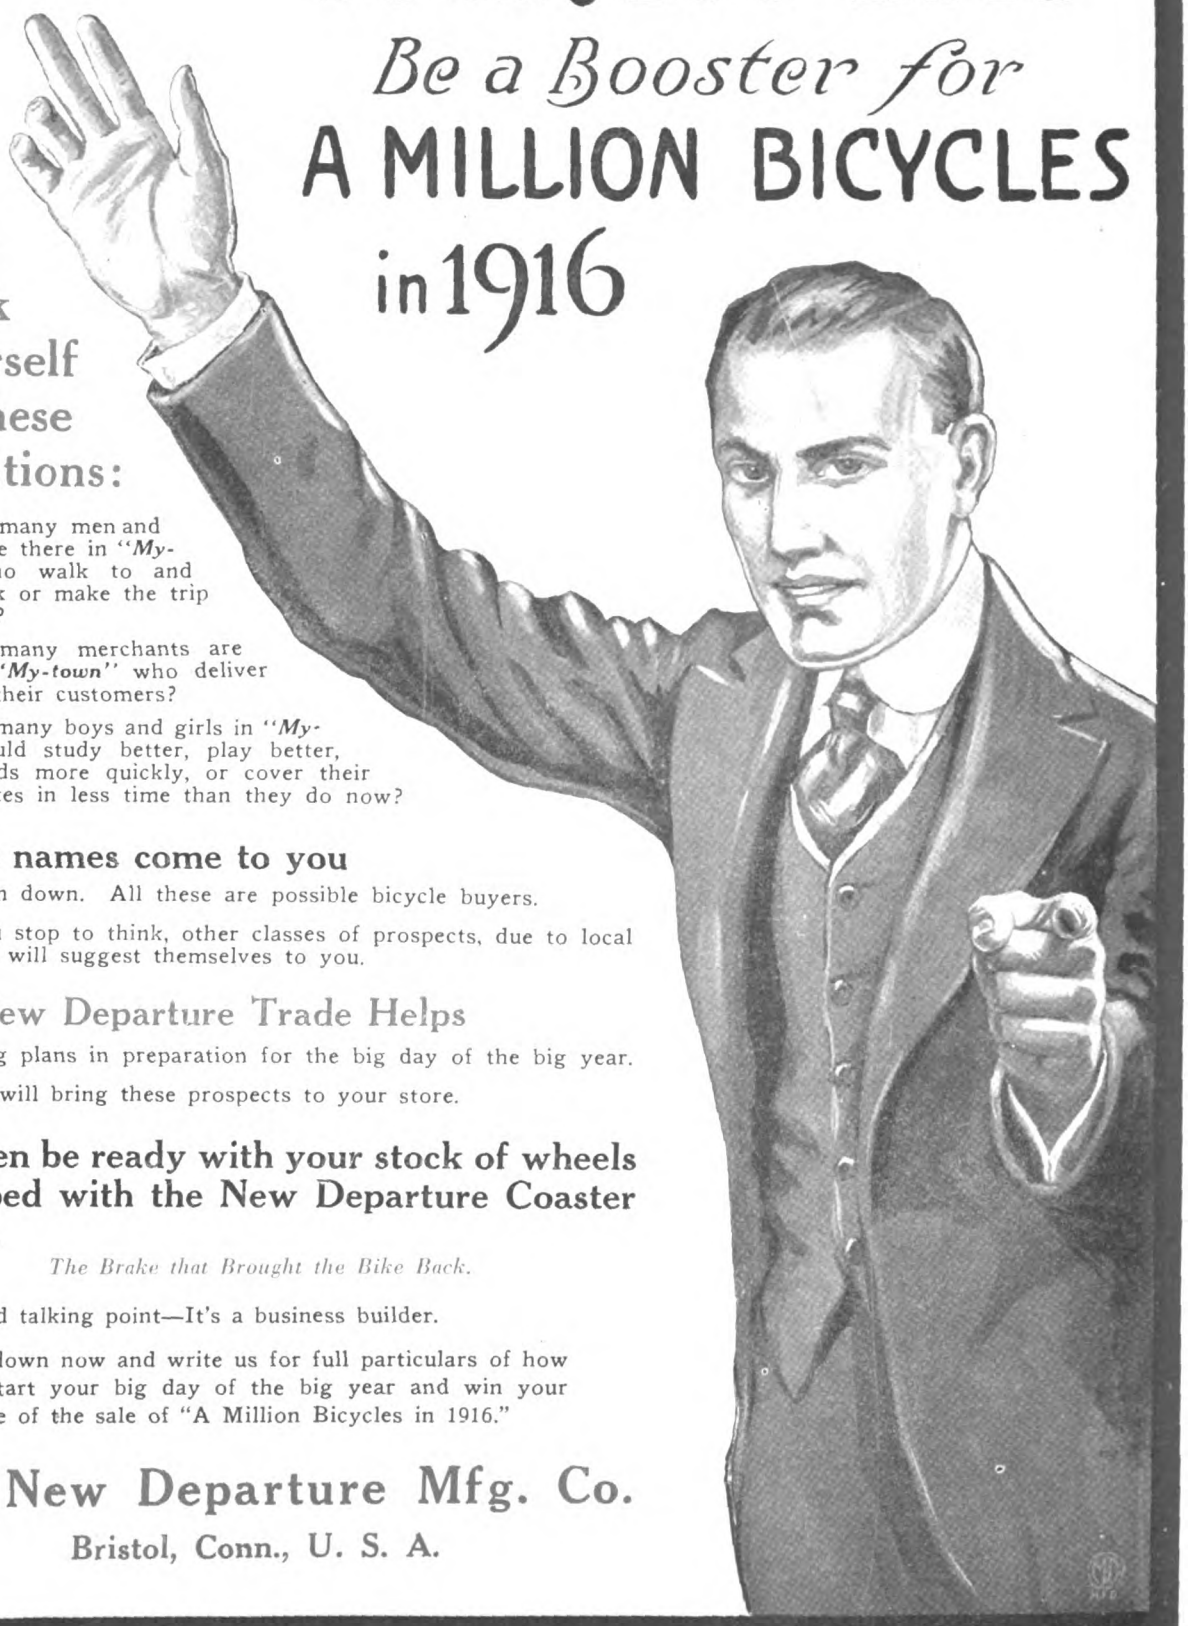
Digitized by Google

FEB. 29th

BICYCLE DAY *can be* YOUR BIG DAY

Be a Booster for

A MILLION BICYCLES in 1916



First ask Yourself these Questions:

How many men and women are there in "*My-town*" who walk to and from work or make the trip by trolley?

How many merchants are there in "*My-town*" who deliver goods to their customers?

How many boys and girls in "*My-town*" could study better, play better, run errands more quickly, or cover their paper routes in less time than they do now?

As the names come to you

write them down. All these are possible bicycle buyers.

If you stop to think, other classes of prospects, due to local conditions will suggest themselves to you.

Use New Departure Trade Helps

and selling plans in preparation for the big day of the big year.

They will bring these prospects to your store.

Then be ready with your stock of wheels equipped with the New Departure Coaster Brake.

The Brake that Brought the Bike Back.

It's a good talking point—It's a business builder.

Sit down now and write us for full particulars of how to start your big day of the big year and win your share of the sale of "A Million Bicycles in 1916."

KEEPING TAB ON YOUR PROSPECTS

Every Dealer Should Have Some Record of His Follow-Up Work—The Experience of One Dealer Who Relied on His Memory—a Simple Record System Described

By FRANK HARDY

WHEN your salesman, Jim Brady, goes out to call on prospects is he handicapped by his ignorance of what dealings you have had with your prospects to date? Or does he know to a "T" what has been done to cultivate a prospect and the results so far secured?

If you, Mr. Dealer, have no system of keeping tab on prospects, so that you and your salesmen can follow them up intelligently, then your selling efficiency and that of all the men who work for you is badly crippled.

The necessity of some way of recording the more important details connected with following up a customer from the time that his name is placed on your mailing list until the sale is actually made, is shown by the experience of a Kansas City, Mo., dealer, who is now a booster for system in handling follow-up work.

"A few years ago," he said to the writer, who dropped in to see him recently, "I relied entirely upon my memory to know what had been accomplished in getting prospective bicycle riders interested in our wheels. I thought that my memory was a pretty good one, and regarded any system as being entirely superfluous. But I had a good reason to change my mind.

"One day I sent a man out to see a wealthy prospect living about twenty miles out of the city. He was in the market for two high grade machines which he wanted for his boys. It seemed a pretty sure proposition. Well, my man went out and came back looking rather glum. He told me that the prospect had already bought the machines elsewhere and had notified me to that effect. That certainly was putting one over on my 'infallible' memory! I remembered receiving the letter, but at the time I sent my salesman out I had hooked up the letter with some other prospect. The salesman was away for the better part of the day, and of course his time was a total loss, except that it taught me the great necessity for some sort of system in follow-up work in order to eliminate waste and inefficiency."

This Dealer Can Tell His Salesman Accurately Each Prospect's Status

Lack of knowledge as to the wants of a prospect often proves disastrous. One man may wish to purchase a machine just to carry him to and from work, while another is looking for recreation and exercise. The salesman who is an intelligent business-getter will arrange his arguments to suit each particular case. If he is not posted beforehand he may find himself talking along lines that will hardly appeal.

A simple recording system will enable a dealer or clerk to aim his sales-making ammunition so that it will hit the mark. It will tell him just what the prospect wants, what has been done in following up and the results so far produced.

Suppose a good prospect decided to postpone buying a machine. Without a follow-up recording system, his name will soon slip your memory. With a system you can take note of the time when he will be most likely to purchase a two-wheeler and then continue to follow him up. More active prospects are lost through slip-shod methods of dealing with them than in any other.

Digitized by Google

To circularize customers by sending them the same form letter time and again is not only a waste of stationery, printing and postage, but it is also annoying to the prospect, for having read a letter once he does not wish to see it again. With a recording system, you can note down on each prospect's card the form letters which have already been sent to him and also the catalogues.

All that is required of an effective follow-up record is a set of cards, one for each prospect, arranged in alphabetical order. The cards can be made out as follows:

Date.....Form Letters 1, 2, 3, 4, 5, 6, 7, 8.
Catalogues sent .....
Name .....Address .....
City .....Occupation .....
Grade of machine.....Origin.....
Sale made.....By Whom.....
Demonstration .....

The explanation of the items on this card is very simple. It is important to know the date when you secured the prospect's name; this can be marked after the word "date." To prevent duplication in sending out form letters and catalogues, put a check after the numbers following "Form Letters," and mark down the particular catalogues given to the prospect. Though your form letters may not be numbered, you can readily designate each with a number to facilitate matters.

Further Details on Card

The next two lines of the card are self explanatory; the necessity of knowing the prospect's occupation is readily apparent when the dealer considers how much easier it is to shape a sales argument when he knows what the prospect works at. And if the dealer is informed that a prospect is in the market for a high grade of machine, he can concentrate his selling talk on better bicycles and compare the makes he handles with others in the market. It is not essential to fill out the line after the word "origin," unless the dealer has a reason for wanting to know how he secured the prospect's name, some dealers making it a practice to give commissions to fellows that suggest prospects to whom sales are made.

By knowing when the sale was made and by whom it was made the dealer can, after a certain period of time has elapsed, inquire whether the customer wishes to buy a new bicycle, and he can put the same salesman on the trail of the rider. Should the prospect want a demonstration, an appointment can be made with him and the time noted on the card.

The reverse side of the card can be used for "remarks"—the progress in cultivating the prospect can be set down clearly so that any clerk in the store can readily ascertain all of the important facts in connection with following up each prospect.

Simple and Economical

This card system is as economical as it is simple. One thousand cards can be bought for as small a sum as forty cents, while the card holder, such as shown on the dealer's desk in the illustration, is retailed at seventy-five cents at nearly all stationery stores. The various items can be typewritten, unless the dealer wants to invest a small sum by having the local printer set it up. The time spent in keeping up this little system is certainly well worth while, for it enables you to tell where you are at and therefore increases you selling efficiency.

WILL DECIDE SALES TALK CONTEST NEXT WEEK

Judges to Be Appointed by "One Million" Committee Will Meet Next Week and Declare the Contest Winners—New Slogan "BUY A BICYCLE" Adopted—Pamphlet on Promoting Races

BRISTOL, Conn., Feb. 3.—Secretary Chas. F. Olin, of the "One Million Bicycles" committee, announces that the winners of the selling talks contest, which closed last Monday, will be decided next week. The committee that is to judge the contributions will consist of representatives of the cycle trade journals and an advertising agency which is still to be selected. The judges will meet probably on Monday, February 7, in either New York or Philadelphia.

Arouses Widespread Interest

Mr. Olin states that a flood of letters have been received from contestants in every section of the country, and that he was really surprised at the widespread interest which had been aroused by the selling talk contest. The letters contain some of the best selling talks which he had ever read and Mr. Olin expects that the judges will experience some difficulty in deciding on the winners. Basing his opinion on the big success of this contest, the "One Million" secretary believes that dealers will participate in large numbers in the newspaper advertising and window display contests, which were outlined in a recent issue of this journal.

Over 14,000 retail dealers received last week another circular descriptive of the scope of the committee, and nearly 2,700 salesmen who call upon the bicycle trade have been urged to co-operate in the big movement. The responses have been most favorable, and the efficient committee, headed by Chairman H. S. Quine, is redoubling its efforts in order to cover every possible point in making the most of BICYCLE DAY as well as attaining the end so earnestly desired.

The circular, which has been issued by Secretary C. F. Olin, states in brief that work has been started to secure not only in the leading daily newspapers but also in the boys' publications and many of the national magazines, stories which will idealize bicycle riding and articles which will recommend the pleasures and advantages of the bicycle.

"How to Conduct Races"

A complete pamphlet on "How to Conduct a Road Race," has been prepared and this booklet will be furnished to every dealer with a strong recommendation that they will singly or jointly run races of this nature in their city to boost the bicycle. Various contests and window displays have been considered for the dealers and a bulletin will be issued shortly upon this subject, this to be accompanied with full particulars on using such contests and displays to create interest in the dealers' stores, etc.

In this same bulletin there will be information regarding pennants and souvenirs that will attract the boy and which can be obtained at a low figure. An effective slogan for all advertising has been decided upon to give uniformity to the movement, and this slogan is "BUY A BICYCLE."

But the work of the committee has not ended here. A series of illustrations and advertisements to be supplied in electro form is now being prepared, these electros being for the accommodation of dealers who will use them in their advertising for BICYCLE DAY. The range of electros includes those for half and full page spaces. The offer of prizes to clerks and salesmen for writing selling talks on the bicycle will soon be printed and distributed.

CANADIANS AT FRONT HOLD MERRY FEAST

OTTAWA, Ontario, Jan. 28.—Little bits of cheer occasionally drift from that scene of carnage, the Western theater of war in Europe, where the Canadian troops are engaged in a life and death struggle, but the most amusing story yet from the Western front is the report of a Christmas banquet which the 2nd Canadian Divisional Cyclist Corps held within range of the hostile guns. The Canadian cyclists enjoyed the most memorable feast of their lives and the most remarkable feature was the completeness of the affair. The riders not only had a full-course dinner, for which they foraged themselves, but a beautifully printed menu card and toast list was used, and there were many speeches and songs by officers and men.

Copies of the menu card have been received by friends of the cyclists in Canada, and the mementos form a most unusual souvenir from the front. According to the "eats-list" the riders enjoyed the following: Potage de la tyre; Dug-out pies with smoke helmets; Boeuf a la bully; Boiled leg of machine gun with belt dressing; Saddle of cycle; Shrapnel peas (shelled); Hand grenade potatoes; Gas puffs; Red Cross buns and, last but not least, French wines.

NOW SOLE OWNER

AUBURN, Wash.—H. Jorgensen is now the sole proprietor of the Crescent Bicycle Shop, and is also agent for the Excelsior for this city and vicinity. He recently purchased the interest of his partner in the concern.

TWENTY-SIX RIDERS WILL ENTER THE CHICAGO SIX DAY RACE

Arrival of the Professional Riders in Chicago Last Week. Note the "Masked Marvels"

CHICAGO, Ill., Feb. 2.—The windy city will witness for the first time a corking fine program of outlaw racing—including a six-day grind—which will start on the evening of February 2 and end on February 8. On the first night amateur as well as professional sprint races will be staged. Boxing and wrestling will be a feature of the night's card. Mayor Thompson has already consented to start the cash-chasers who will appear in a half-mile handicap, a three and one mile open.

On the following evening, preliminary to the six-day race, a 72-hour affair, the professional will compete in a twenty-mile open and one mile handicap. The feature will be a special match race between Spears, Verri, Lawson and Cavanagh. This will be a one-mile event. James A. Pugh will start the six-day race at ten o'clock in the evening, and it will continue until the same hour the next morning. On succeeding days the race will be resumed at four o'clock in the afternoon until four in the morning, except on the last day when the riders will appear at eleven in the morning and wind up twelve hours later.

Teams in the Grind

The track is a ten-lap affair; safety devices have been placed at the tops of all the turns. The teams that will appear in this 72-hour grind are as follows:

Swedish-Italian Team—Iver Lawson, Chicago; Francesco Verri, San Francisco.
San Francisco-Newark Team—Percey Lawrence, San Francisco; Jake Magin, Newark.
Kangaroo Team—Reggie McNamara, Australia; Bob Spears, Australia.
New York Team—Geo. Cameron, New York; Harry Kaiser, New York.
Irish-American Team—Martin Ryan, Newark; Lloyd Thomas, Newark.
Italian-American Team—Vincenzo Madonna, Italy; Ernest Ohrt, San Francisco.
German-Bohemian Team—Gus Wohlrab, Jersey City; Joe Kopsky, Bohemia.
Irish-American Team—Charles Piercey, Australia; Frank Cavanaugh, Newark.
American-Australian Team—Peter Drobach, S. Boston; Frank Corry, Australia.
Newark Team—Thomas Smith, Newark; William Coburn, Newark.
Danish-American Team—Norman Anderson, Denmark; Ned Young, Salt Lake City.
Austrian-American Team—T. Grimm; Newark; Rudi-Russe, Austria.

In addition to these teams, a mystery "duo" will make its appearance, the members of which will be known as Max and Mark Marvel. The Newark fans, who having already seen the masked marvels in the group picture shown on this page, declare that the riders are Eaton and Madden, the Newark youngsters, who performed so well in six-day classics last year.

AMATEURS COMBINE AGAINST THE N. C. A.

NEWARK, N. J., Feb. 1.—Amateur bicycle riders who intend to draw away from the National Cycling Association, to the number of forty-two, formed a temporary organization at a meeting held last week at Dave Mackay's Hall in Newark. Every one of these cyclists signed an agreement to stick by the Cycle Racing Men's Union, of America, as well as the Federation of American Cyclists.

The statement reads as follows:

"We, the undersigned, hereby agree to associate with the Cycle Racing Men's Union, of America, and we pledge our hearty support to the said union. Also to abide by and live up to, and support in every manner the rules and regulations of the Federation of American Cyclists." Those who signed follow:

Fred Taylor, Walter White, Steve O'Panowicz, Nicholas Howath, Willie Murray, Phil Shannon, James P. Cobert, H. A. Thatcher, Otto Brock, Eric Paetz, William Keller, Charles Schapiro, Ed Nagel, B. Clark, William Jaroson, Ed Kaiser, Axel Anderson, Gene Marti, Harry Krauttel, Chris Dotteroweich, Joseph Bess, John J. Brennan, Bart McGarrity, William C. Purdue, Jr., A. Chris Cammardo, George D. Chapman, William Leonard, Fred Klug, Arthur Wicht, John Fekosk, R. Vaeth, Herman H. Hintze, Hugo W. Hintze, William Schneider, Eddie Kane, Albert Krushel, Harry J. Horan, Benny Zager, Frank J. Whitney, I. Valentine, John F. Dreher, Jay Eaton, Jr.

Eddie Kane, a member of the New York Athletic Club, was unanimously chosen acting president of the new organization while the following riders were chosen to draw up a constitution and by-laws: Frank J. Whitney, Fred Taylor, Al Krushel, Robert Henderson and Walter White. Another meeting will be held near the end of this month at Mackay's Hall.

DAYTON BICYCLE CATALOG VERY COMPLETE

ATTRACTIVELY gotten up in two colors is the 1916 edition of the Dayton bicycle catalog, issued by the makers, the Davis Sewing Machine Co., of Dayton, O. Beginning with the arch-truss roadster or Model 135, the machines shown are the three-arch truss motor-bike, the racer, the Model 132 motor-bike, the roadster, and the ladies' roadster. The five-year guarantee, which is a feature of the Dayton cycle line, is given a prominent notice.

The fore part of the catalog is given over to the construction of the Dayton bicycle in general. The frame section with its reinforcements is particularly interesting, as is also the spring fork construction. There is a page devoted to the Sturmey-Archer tri-coaster and the Atherton coaster brake and the equipment is clearly outlined. The catalog is a handy size and has attractive covers showing riders of both sexes using the Dayton amid picturesque surroundings.

BICYCLE MAKERS DISCUSS CAMPAIGN

CHICAGO, Ill., Feb. 2.—Prominent manufacturers in the cycle and allied trade met here last week for the purpose of discussing the "One Million Bicycles in 1916" campaign. Ignaz Schwinn, of the Arnold Schwinn Bicycle Co., was chairman of the meeting. It was decided to hold another conference at Buffalo, where a committee, consisting of Messrs. Schack, Vogel and Fogarty, will report on plans for furthering the campaign.

Among those who attended the meeting were P. P. Ohoro and J. C. Blaine of the Excelsior Cycle Co., J. W. Ash, of the Miami; H. M. Huffman,, of the Davis Sewing Machine Co.; A. J. Musselman, of the Musselman coaster brake; J. P. Fogarty, of the Westfield Mfg. Co.; J. E. Vogel, President of the Gendron Wheel Co.; W. G. Schack, of the Emblem; Crosby, of the Toledo Metal Wheel Co.; Charles Lonn, of the Western Co.

URGED TO PUT SLOGAN IN ALL BICYCLE ADS.

AKRON, O., Feb. 2.—Harry S. Quine, chairman of the "One Million Bicycle Committee," sent out a letter last week to all manufacturers who advertise in trade journals, requesting them to use in all of their advertisements the slogan, "One Million Bicycles in 1916." His letter follows:

Dear Sir:

1,000,000 BICYCLES IN 1916.

You know about the slogan and the campaign now under way to make it "come true." We note that you are advertising and consequently must be alert and aggressive and willing to do things necessary to increase business.

May we make a suggestion?

Why not see that the Million Bicycle slogan is included in all your advertising. That will link you with the campaign and show your interest in it.

We are writing all other trade journals, advertisers of bicycles and bicycle parts, this same letter, and will appreciate your views, or better still, your co-operation in the manner suggested.

Yours for the Million.

HARRY S. QUINE,
Chairman
"The Million Bicycles" Committee.

IVER JOHNSON MAY HAVE EXPORT MODEL

FITCHBURG, Mass.—The Iver Johnson's Arms & Cycle Works, of this city, is figuring on a bicycle for export, acoording to latest reports. This machine will have its parts interchangeable with those of European makes, it is presumed, but definite details are not as yet forthcoming.

BURTON RENEWS CONTRACT

FORT WORTH, Tex., Jan. 31.—The Burton Supply Company has renewed its contract with the A. O. Smith Co., to handle the Smith Motor Wheel for 1916. The Burton company has signed for seventy-five of the motor attachments. In Dallas, George Hoehn will again represent the motor wheel.

NEW MOTOR WHEEL DISTRIBUTORS

MILWAUKEE, Wis., Feb. 2.—Johnson & Meyer Company, of Memphis, Tenn., has taken on the agency for the Smith Motor Wheel and will also distribute the bicycle boosters in the States of Tennessee, Louisiana, Mississippi and Alabama. This company is said to be the largest wholesale bicycle house in the south.

MOTOR WHEEL FOR JAPAN

MILWAUKEE, Wis., Jan. 28.—Contrasting the use of the Smith Motor Wheels in Alaska where they are beginning to replace dogs on sledges, the Motor Wheel is being prepared for adaptation to rickshas in Japan.

The American manufacturer of the ricksha tricycle has already sent a representative to the Orient, who has made extensive connections with dealers there; following the footsteps of the representative is an export Motor Wheel salesman also closing up dealers. The ricksha manufacturer, who is not ready for formal announcement as yet, and the Smith Company feel confident of a big sale of their products to the little men and women of the East.

"INLAND EMPIRE" AGAIN TAKES TO BIKE.

SPOKANE, Wash., Jan. 31.—Sales Manager Overman of the Spokane Cycle & Supply Company is most optimistic over the prospects for a big bicycle season in the "Inland Empire." Quite a number of Spokane dealers who discontinued the handling of bicycles last year have again taken up the silent two-wheeler and are placing substantial orders.

The Spokane Cycle & Supply Company unloaded a carload of machines during the past week consisting of Miami, Flying Merkel, Racycle and Hudson bicycles. The greater portion of this shipment is now being sent out to sub-dealers. This concern has found a strong demand on the Indian bicycle and expects to place a large order for early spring delivery.

WHEELMEN CLUB NOMINATES

HACKENSACK, N. Y., Feb. 2.—The nominating committee of the Wheelmen Club has posted the following for officers of the organization during the 1916 season: For president, John C. Hoth; vice-president, Chas. S. Fountain; treasurer, James F. Christie; recording secretary, A. Cotte, Sr.; financial secretary, R. Jahnel; governors, two years, George Thoma, T. J. Blanck, 3rd., G. M. Dell; one year, Wm. Van Wetering. The annual election will be held on Monday night, February 7.

FIRE AT TEN BROECK PLANT

LOUISVILLE, Ky.—The big, four-story plant of the Ten Broeck Tyre Co., at 26th and Courtney streets, suffered a loss by fire last week. The top story was practically gutted and stock and building suffered damage to the amount of $15,000. The semi-fireproof construction of the building and the steel fire doors prevented the conflagration from spreading to the lower floors. The company manufactures motorcycle and automobile casings.

FILES STATEMENT

LOUISVILLE, Ky., Feb. 2.—Emery McCurdy, president of the McCurdy Mfg. Co., dealers in bicycles, sporting goods, sewing machines, etc., has filed a statement in connection with the recent bankruptcy proceedings. The Davis Sewing Machine is the largest unsecured creditor with a claim of $2,300. Unsecured liabilities are placed at $4,348.68 with assets of $995.18. George DuRuelle has been appointed referee in bankruptcy.

TAKES DAYTON MOTOR BICYCLE.

COLUMBUS, Ohio, Feb. 2.—The L. P. Birkenbach Company, which conducts two bicycle stores in Columbus, has taken the agency for the Dayton Motor Bicycle for Franklin county. The first of the models will be delivered early in February.

VIM COMPANY DISTRIBUTES PIERCE BICYCLES

BUFFALO, N. Y.—John W. Henry, president of the Vim Cycle Hardware Company, of Buffalo, jobbers of bicycles and bicycle supplies, has made arrangements with the Pierce Cycle Company to distribute Pierce bicycles in that territory adjacent to Buffalo. Sales in the district referred to have heretofore been handled direct from the Pierce factory.

The entire territory will be under the direct supervision of Mr. Henry, who is a thorough bicycle man, and he will be supported by a staff of competent salesmen. The staff will be made up of Sam Green, formerly with the New York Sporting Goods Co., New York City; H. W. Georger, who has grown up in the cycle business under Mr. Hendy's watchful eye, and Louis Kronson, who will cover that part of the territory situated close around Buffalo.

A large stock of Pierce bicycles will be carried at Buffalo and prompt shipments are assured to agents, Mr. Henry states, even in the face of a shortage in bicycles.

VETERAN LOWELL CYCLE DEALER PASSES AWAY

LOWELL, Mass.—Leo H. Bacheldor, one of the leading motorcycle and bicycle dealers in this city, died at his home in Lowell, following an operation for intestinal trouble on January 20. The funeral was held from his late home, 11 Albert street, on January 23. Mr. Bacheldor was for many years the Indian representative in this city as well as being a bicycle dealer who entered business in the days of the "ordinary" bicycle. His son, Arthur Bacheldor, who was associated with him in his agency, will carry on the business alone in the future.

DEVELOP A NEW INDUSTRY

In a recent statement on tire materials, the chief chemist of the Goodyear Tire & Rubber Co., of Akron, O., speaks of a new industry which has had rapid growth since its inception. This is the lamp-black industry and its formation was due to the increasing popularity of black rubber.

"In making black rubber the old fashioned lamp-black is used, and since black tires have entered the field, the lamp-black industry has come to the front," says the chief chemist. "Formerly, lamp-black was used only to color paints, polishes and the like. The average paint manufacturer made his own. But since the rubber manufacturers have been purchasing large quantities of it for ues in coloring tires, a great and new market has opened up and lamp-black is made on a much larger scale than formerly."

BIG TIRE SHIPMENT

Appeal Mfg. & Jobbing Co. has just received from the Pennsylvania Rubber Co. a shipment of "Three Star" bike tires, which was the largest single shipment of bicycle tires ever received by a Coast jobber. These are to be distributed in Southern territory alone and another big shipment comes forward for the San Francisco branch to distribute in northern territory.

A QUINTET OF HAVANA'S SPEEDIEST AMATEUR CYCLISTS

HAVANA, Cuba, Jan. 17.—This city is a very active bicycle town and boasts of a first rate club, known as the Club Azul. Competitions are held the year round, with the result that some speedy cyclists have been developed. Notwithstanding the fact that roads about Havana are far from being ideal, the local riders often go on century runs and pleasure rides. Among the better known riders who have distinguished themselves by their noteworthy performances are those shown in the illustration. All of these use American machines. The cyclists appearing in the layout are: 1—Juan Rodriguez; 2—E. Sampedro; 3—Antonio Villalobos; 4—Amades Forteza; 5—Simon Ferrer.

ACME WHEELMEN ELECT THEIR OFFICERS

NEW YORK, N. Y., Feb. 2.—The Acme Wheelmen have just held their annual election of officers with the results that Harry Kaiser, the six day rider, was elected honorary president, while E. O. Spillane was chosen president. Other officers for the year are: Vice-president, C. Schaab; secretary-treasurer, F. Small; track capt., F. Woisin; road capt., G. Grundig; 1st lieut., F. Fesselmeyer; 2nd lieut., J. Schaefer.

Harry Kaiser will also act on the racing committee, which includes the following men: Geo. Cameron, J. DeBruyn, J. Schaefer, G. Schaab, F. Woisin, F. Miller, F. Small and E. O. Spillane. The sergeant-at-arms is F. Fesselmeyer, and his assistant, H. Nebuhr. Geo. Cameron has accepted the chairmanship of the board of directors.

Starting Sunday, Feb. 7, the members of the Acme Wheelmen will leave their clubhouse, 9 Jerome avenue, at 10 A. M., for their first pleasure run of the season, which will take them up-state. All cyclists in the Metropolitan District are invited to join the affair. Beginning with Sunday, March 7, there will be held a series of cork races for which special prizes will be offered.

CHAMPION HORDER WINS TWO RACES AT SYDNEY

SYDNEY, Australia.—Cycling matters out here are just about as quiet now as they can be. The last professional meeting of the season took place on December 27, Boxing Day, at the Sydney Agricultural Ground. The Australian champion, George Horder, won a mile handicap from forty yards in two minutes and ten seconds on a three and one-half mile dirt track, and also a five-mile scratch race from F. D. Walcott, A. McBeath and A. J. Davies. Walcott was disqualified for switching.

The secretary of the New South Wales Cyclists' Union, Wm. G. Liggins, has enlisted for the Australian Artillery for active service. He has been secretary of the Union since 1907 and has built the amateur cycling body up to a big power in Australia. His successor will probably be the union's present race secretary, Theo. O'Halloran.

FRISCO BOYS CHASE GLOOM AT ANNUAL BANQUET

SAN FRANCISCO, Cal., Jan. 28.—The New Century Wheelmen held their annual gathering and banquet at their club house last Saturday evening. Three popular despoilers of gloom, W. Hammitt, John Coughlan and Al Greeninger, had charge of the affair and they certainly made it a big success.

After a few songs and stories, the cyclists tackled the spread with a wonderful appetite. President Greeninger addressed the boys, after the "eats" had disappeared, on the past and future of the cycling game. Other officers gave brief talks to the thirty fellows gathered around the festive board.

The riders present were: R. A. Greeninger, W. Hammitt, Geo. Drury, John Coughlan, Vic Spence, Roy Bangs, H. Spence, L. Nelson, H. De Brie, C. Saye, Al. Sangalli, W. Thompson, L. Drury, A. Binnetti, A. Filley, R. Kneass, Pap Rhodes, R. Welch, P. Quenelon, Geo. Graner, J. Reyberg, Ad Mooney, Jean Stalker, Wm. Penaluna, Clair Johnson, J. Bertlozzi, M. Castilla, Fat Ross, P. Morgan and Frank Drury. A membership campaign will be started as soon as the racing season opens.

C. R. C. A INSTALLS NEW OFFICERS

Veteran Riders Fill National Positions; President Paul Thomas Is Given Third Term; Look Forward to Active Year

NEW YORK, N. Y., Feb. 1.—The inauguration of the recently elected national officers of the Century Road Club Association took place on January 26th, in New York City, when the retiring officials met to make a final compilation of the year's performances and to read the various annual committee reports.

The officers for 1916 are as follows: President, Paul Thomas, North Tarrytown, N. Y.; 1st vice-president, D. M. Adee, Brooklyn, N. Y.; 2nd vice-president, E. L. Ferguson, Kansas City, Mo.; recording secretary. S. Segal, New York; financial secretary, R. W. Zarr, New York City; treasurer, John M. Mitchell, Greenwich, Conn.

This is the third term that Paul Thomas will have served as president, having held that office during 1912 and 1913. Mr. Thomas is a charter member of the C. R. C. A. The first vice-president, Daniel M. Adee, has for the past ten years been president of the National Cycling Association, and served in the same capacity from 1905 to 1911 in the C. R. C. A. E. L. Furguson, the new second vice-president, has been connected with the association in various capacities, having been president a few years back. He was one of the organizers of the F. A. M., and is at the present time working hard to establish a division of the Century Road Club Association in Kansas City, where he now resides.

The offices of recording and financial secretary have been efficiently filled for the past five years by Sylvain Segal and R. W. Zarr, respectively. Both of these active cyclists have been the prime movers in the events of the association for the last seven years. Segal has established an enviable record as a rider, having reported more than 25,000 miles and 210 centuries. He hung up a new record for the distance between the Metropolis and Atlantic City, when he covered the ground in 9 hours and 9 minutes.

John M. Mitchell, of Greenwich, Conn., the national treasurer, is an old timer, whose interest in cycling dates back to the nineties. Mitchell is still very much active in two-wheeler events and can be counted on to participate in any of the century runs or pleasure trips promoted by the clubs in the Metropolitan district.

SHERMAN DECLARED CHAMPION OF CRESCENT CLUB

BALTIMORE, Md., Feb. 2.—Welby Sherman is the official champion of the Crescent Bicycle Club, having scored the greatest number of points in the ten championship events during the past season. Fred Sanborn, the previous holder of the title, is second, while his brother, Langdon M., finished third. The winner received forty-one points in the series, while Fred Sanborn got thirty-eight and L. M. Sanborn captured thirty-two.

Sherman has been riding in contests for four years. He finished third in the championship competition last year. Fred Sanborn has been riding for seven years and has many remarkable performances to his credit. He is especially good at unpaced riding. For five years L. M. Sanborn has appeared in amateur race, showing his best form last year when he just missed taking the local club title by a few points and secured second place.

C. R. C. OF A. ELECTS OFFICERS AND CENTURIONS

HOBOKEN, N. J., Feb. 3.—The annual election of national officers of the Century Road Club of America, which is now entering upon its twenty-fifth year, was held recently, resulting in the selection of Emile E. Fraysee as president. N. O. Tarbell, of Geneva Lake, Wis., is vice-president, while F. H. Peterson, of Bloomfield, N. J., is second vice-president. The national treasurer is J. G. Schmidt, of Ridgefield Park, N. J., and C. E. Nylander, of New York, is the new secretary.

The state centurions for 1916 are as follows: Henry Wheeler, Los Angeles, Cal.; R. L. Woney, Atlanta, Ga.; A. E. Clausen, Chicago, Ill.; W. G. Heberhart, Madison, Ind.; S. M. Warns, Baltimore, Md.; C. Perreault, Malden, Mass.; E. T. Taborelli, West Hoboken, N. J.; W. Miller, New York, N. Y.; W. Yorke, Philadelphia, Pa.; H. R. Allen, Merrill, Wis.

BELLO CAPTURES RACE

NEW YORK, N. Y., Feb. 2.—Tom Bello won the weekly point race of the Italian Sporting Union last Thursday night, which was run on home trainers. There was a field of seven riders and Bello set up a new mark for the one mile by riding the distance in 1:10 4-5. The former mark was 1:11 2-5, made by Jas. Papesca. Following are the results of the heats:

PRELIMINARY.

Winner.	Time.
1—Chas. Rabbino—Jas. Alfonso	
2—Tom Bello—N. Johnson	1:16⅕
3—C. Zoccola—C. Buscaglia	1:10⅘
	1:22⅗

SEMI-FINALS.

1—E. Mullin—C. Zoccola	1:19
2—Tom Bello—C. Rabbino	1:31⅗

FINAL.

Tom Bello—Elmer Mullin	1:15⅕

SIX-DAY RACE FOR 'FRISCO.

SAN FRANCISCO, Cal., Feb. 1—It is rumored about the city that James Coffrath, a boxing puromoter, plans to hold a six-day race in conjunction with Packey McFarland, toward the latter part of this month. The scene of the grind will be the Municipal Auditorium. The auditorium is one city block square and is a splendid place to hold a six-day classic.

Fifth Installment

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

How Kramer Defeated Iver Lawson for the National Title in 1903, in spite of the prophesies of racing experts.

"IF any one thinks Frank Kramer can beat Iver Lawson and is willing to back up his opinion, he can win $500 of my money any time the two line up. Iver will be the champion, all right. That's a tip for the bike fans and I am not giving the boys a wrong steer!" Thus spoke the late Floyd McFarland previous to the opening of the season of 1903.

He Sang a Different Song

Before the season was over, however, McFarland had a chance to sing a different song. Although Lawson gave Kramer one of the hardest battles the East Orange rider has ever gone through for a championship, "Big Steve" was equal to the occasion and Lawson travelled the road of his predecessors going down to defeat, while Kramer acquired the national cycling title for the third successive year, being then a couple of months shy of being 23 years.

Kramer did more than win the first honors of the land. He was the cause of McFarland's losing quite a bit of his "dough." Kramer and Lawson met in two match races during this season and in each case, Frank showed the greater amount of speed and brains.

"I Expected to Win"

Seated back in a big morris chair last week, fondly stroking his dog, Kramer said: "I well remember the fight Lawson put up for the title in 1903; and though he was ahead of me at times and I won as I expected, it was a hard struggle. Lawson gave me a close fight, but after I got back in good condition, I knew that I was riding faster than he and at no time did I really fear the result. I beat him in the championship races and also in two matches and think I proved to the public that I was the faster rider."

Major Taylor, the colored sprinter, who had always been a big figure in cycling, did not ride in America in 1903, but confined his efforts to the other side of the "pond" where he vanquished foreign stars. Taylor was a wonderful drawing card in Europe and thought he could gather more coin there than he could in this country.

Sunday Racing Not Allowed

The cycling season was not so prosperous in 1903, either for promoters or riders, and the conditions for the championship were not up to scratch. Sunday races were barred at the board track in Vailsburg, which was Kramer's favorite stamping grounds. It was not until Sunday, July 5, that the season really started in earnest and then it was at the Hillside Park turf track, in Belleville, N. J. It was a new page in the history of bicycle racing when the Hillside Park track threw open its gates.

On a track of this sort it was test of daring and strength, rather than speed, that enabled a rider to carry off victory and, in most races, the road riders distanced the sprinters.

Lawson's Friends Depressed

Friends of Kramer rejoiced while those of Lawson, his greatest rival, were depressed by the unexpected happenings at the Manhattan Beach track, on Saturday, September 5, which affected their relative positions in the struggle for the title. Although the championship race which was on was not completed on account of rain, Kramer's chances of retaining the title were greatly increased and Lawson's prospects made faint by what happened in the trial heats.

In the first trial heat, Johnny King and Frank Galvin jumped to the front while Walter Bardgett appeared to be holding back the others. Lawson was back in the pack and could not get through although

Iver Lawson

there were four to qualify in the heat. The race being a five mile affair and a double point race, it was a hard blow to Lawson's expectations for the title.

Kramer's Dirt Track Record

The next day, at Hillside Park just outside of Newark, Kramer virtually annexed the title of national cycling champion. Lawson's defeat was a decisive one and Kramer showed what magnificent form he was in by riding the distance, half mile, in 1 minute flat. This was a record performance for a dirt track.

The "Big Four" faced the starter in the final and as usual Kramer and Fenn declared to team together as did Lawson and McFarland, teaming being permitted at that time. When the whistle blew and the gun was fired, McFarland jumped from the tape with terrific speed and with Lawson on his wheel. Fenn and Kramer trailed in that order. "Mac" kept up his fast pace but Fenn finally came up on even terms with the Californian as the first turn was reached.

Wins by Wheel's Length

On the far turn McFarland dropped away from his partner who jumped to Kramer's wheel. The champion was pulled by Fenn until the back stretch was reached when the "Boy Wonder" quit. Coming into the stretch, Lawson appeared to be on even terms with the East Orange rider. Kramer, however, with a magnificent sprint, came down the stretch with Lawson on his wheel. In the last fifteen yards Kramer put on extra steam and shaking his rival off won by a little over a wheel's length.

When Kramer crossed the tape his admirers "let themselves loose" and for fully five minutes pandemonium reigned supreme. Hats were thrown in the air and the crowd shouted itself hoarse.

Clinches Title at Manhattan Beach

On Monday, the scene shifted once more to Manhattan Beach, and it was on this track that Kramer for the third successive year won the championship of America. He won the title by beating Iver Lawson in the final circuit race of the season, in one of those sensational finishes which marked practically every race in which these two rivals met.

It was in a two-mile race that Kramer and Lawson met and wound up the long list of circuit races that had been running all season. The final rating of the men gave Kramer 62 points to Lawson's 50. The five-mile event, which was ridden right after Kramer had won the title and came about through the postponement on the previous Saturday, resulted in a win for McFarland. Kramer finished second while George Collett was third. Iver Lawson, of course, did not ride, being shut out in his heat on the stormy Saturday.

Some Thrilling Match Races

Outside of these three days in which Kramer won the championship, the most eventful happenings in 1903 were his match races with Lawson, the first taking place at Manhattan Beach on Saturday, August 15. In this race Kramer justified his possession of the national title by winning two out of three heats from Iver. The match was made for $1,000 side bet, and a purse of $1,000 was put up by the management. Needless to say, the track was packed and Kramer was given an immense demonstration on his victory.

Although Lawson won the first heat, Kramer apparently did not worry, as he went right back and took the second and third. The second affair he won by superior jockeying and the third because of superior speed.

How Lawson Got His Heat

In the first heat Lawson managed to win by a length. The distance was a mile.

Digitized by Google

BOOST WITH US FOR 1,000,000 BICYCLES IN 1916

Lawson rode from the rear and when Kramer rode high on the bank, Lawson slid down and beat him down the stretch. In the second heat Kramer eased in a winner by two feet, the distance this time was a mile while the last heat at one-third of a mile, Kramer won by just about a foot. Lawson had the lead going into the stretch by a length and appeared to be the winner, but Kramer, coming down the track like the "Empire State Express," drew abreast of Lawson in the last five yards and just beat him out.

A short time intervened when Kramer and Lawson met once more in a match race. This time it took place at Boston, on Friday, August 21. Two heats were ridden and Kramer came out victorious in both. In the first heat, at a half mile, Kramer won by two yards. The second heat was just a mile, and this time Frank was a bit more considerate and led by a yard.

Kramer's Six Day Riding

Kramer laughs when he recalls his six day riding in 1903. "If all the six-day races were like the ones I rode in Providence and Pittsburgh, I would never kick about 'em," he said recently to the writer. "We rode two hours in the afternoon and two more at night; the last day of the race we rode four hours at night. At Providence, teamed with Charley Hatfield, I won first place and in the Smoke Town, with Willie Fenn, I repeated my performance made in Providence, and did not mind the riding in the least."

The cycling season did not get under way in Newark until Decoration Day, and Kramer was beaten in the one-mile race for the "pros," a decisive victory for Iver Lawson, Iver leading Kramer over the tape by an open length. With the ban on Sunday racing Kramer did not have much chance for action and in his next big race was once more defeated. This happened on Saturday, July 4. On this day, Lawson showed his heels to Kramer in a one-mile open race and led the field home in a five-mile open. It was the second time in the season that Lawson led Kramer home.

Lawson Rode Well

It was seldom that Lawson rode as well against Kramer as he did on this day. Although Kramer was right behind him, the Salt Lake City rider showed too much speed and sprinted away from Kramer to the finish.

The following day, Sunday racing was started at the Hillside Park track, and the feature race, a five-mile affair, went to Saxon Williams, better known as "Sax." He was a plugger and the race was just to his liking. Willie Fenn, who gained his first experience on a bike over the New England roads, won the one-third mile race, beat out Kramer and other stars.

BOOST WITH US FOR 1,000,000 BICYCLES IN 1916

Now for the championship—the first race held at Hartford, on July 9, at ten miles went to Kramer with Fenn, Lawson and John Bedell following in order. On the thirty-first at Hartford, Kramer won the five-mile and had the satisfaction of beating out Lawson in this titular affair. A couple of races intervened which Lawson won, and at Manhattan Beach he wrested the lead from Kramer.

Kramer was injured at Providence on August 18 in a bad spill, which occurred in the ten-mile championship race. Kramer went down with Johnny King and John Bedell. Iver Lawson by winning the race see-sawed back into first place. Up to August 27 they were even, when Kramer won a championship race, at a half-mile, staged at New Haven, and went into the lead by two points. Lawson claimed he was fouled, but the judges did not see it that way. On the first day of September, Lawson won over Kramer in a one-mile title race at New Haven and then started the big three-day meeting.

(To be continued.)

TORONTO GOSSIP

PRESIDENT WILLIAM MARR, of the Toronto Bicycle Riders' Association, tendered his resignation because of his enlistment with the 180th Overseas Battalion, but it was not accepted because he will not be leaving Toronto for several months at least.

Partial arrangements were made for the holding of a series of bicycle race-meets at the various military camps near Toronto during the coming summer. Outside of these, it is believed that the most of the bicycle events this year will be held on the road because the Toronto motordrome is being demolished.

Among the latest cyclists who have enlisted are Frank Martin and Joe Ruelins, the latter a Belgian, with the 169th Battalion.

At a recent recruiting demonstration at the 109th Regiment Armories, Toronto, the entertainment feature was a series of bicycle races on rollers.

Elwood Hughes, manager of the Toronto motordrome last summer, has been appointed captain and quartermaster of the 180th Oversees Batallion.

SEGAL'S TROPHIES STOLEN.

NEW YORK, N. Y., Feb. 1.—Cyclists in the Metropolitan district are advised to help locate two silver trophies and a camera, which were stolen recently from the home of Sylvain Segal, secretary of the C. R. C. A., while he was attending the funeral of his mother. One of the cups was the "Cooley Trophy," which was won in 1911 for establishing a record between this city and Atlantic City, while the other was the "Hawkins Trophy," which was given in 1909 for the fastest time ridden at night along the Jerome avenue course in the Bronx. The camera was a folding pocket Kodak, size 3A, with regular lens and carrying case. Secretary Segal's address is 1842 Seventh avenue, New York.

TWO CHINESE RIDERS

TAMPA, FLA., Jan. 30.—Two of the best amateur riders of this city, which is a mighty good bicycle town, are Chinese. One is Tom Kee, whose photo is shown on this page; he has succeeded in cleaning up every race in his class around this district. Tom uses a Columbia bicycle, and so does his brother Ben. The latter won one of the biggest bike races ever staged in Tampa. It was a twelve mile affair and Ben covered the distance in 25 minutes and 20 seconds, beating Tom by just two minutes.

Tom Kee

SELECT DATE FOR BANQUET

NEW YORK, N. Y., Feb. 3.—The Century Road Club of America has selected February 12 as the date for its banquet and re-union, which will be held at the Broadway Central Hotel. Many of the old-time riders and all of the active "Americas" are expected to turn out for this big event. There will be handsome souvenirs distributed among the ladies, and dancing will top off the gayeties of the evening. Tickets can be secured from J. G. Schmidt, 27 Orchard street, Ridgefield Park, N. J.

THORN-PROOF BIKE TIRES

LOS ANGELES, Cal., Jan. 30.—"California Bear, For Long Wear," is the slogan in neat type on the rubber, emphasized by the trade mark of a California bear, the State emblem, on the new special tire which jobber C. L. Smith, of Los Angeles, is getting out especially for the California desert and Arizona riders. The principal trouble the riders experience, particularly on the Arizona roads, is with cactus thorns, and Smith has had this tire built up by the Continental Rubber Company to his special specifications, using motorcycle fabric and giving a tire as near thorn-proof as a bicycle tire can be made.

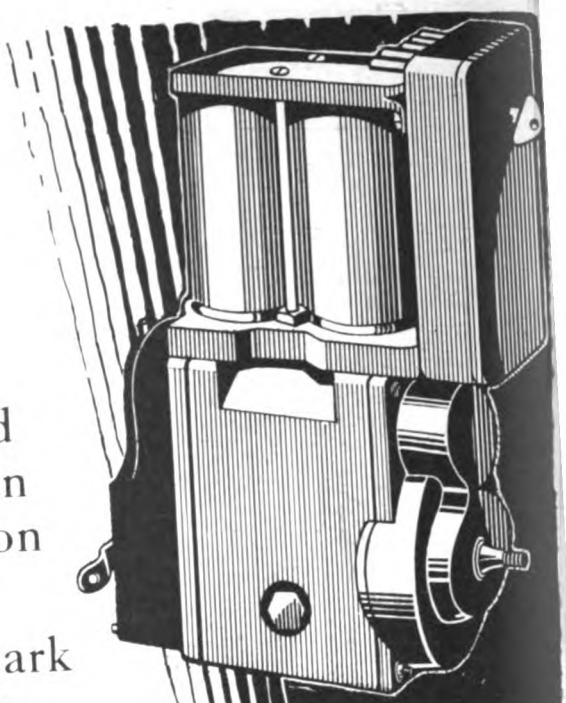
REMY

Means Easy Starting These Cold Mornings



If your mount is a Remy equipped Harley-Davidson Motorcycle you can appreciate the value of perfect ignition these cold mornings.

Think of it—a big, hot snappy spark at the very first stroke of the starter.

For starting, you get the full current from the storage battery which is kept charged by the generator.

The intensity of the spark is independent of motor speed. This means *perfect ignition*.

Thousands of owners of Remy equipped Harley-Davidsons know what perfect ignition and lighting mean.

Remy equipment is the chosen equipment of the most discriminating of experienced motorcycle riders because it stands for genuine all round motorcycle satisfaction.

The "LEONARD" Prest-o-Bracket

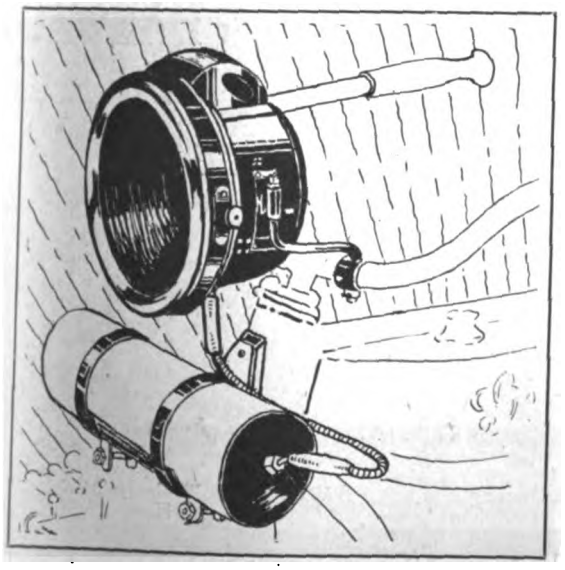
Convenience
Safety
Neatness
Lightness

Every experienced rider knows that the shortest possible connection between the Prest-o Tank and the lamp insures uniform gas pressure and a steady light.

The Leonard Prest-o-Bracket gives you the means of arranging the tank and lamp on the **front** of **the motorcycle** easy to attach, easy to remove or insert tank, easy to adjust gas pressure while riding, and it adds 100 per cent to the appearance of your machine.

No other bracket is as adaptable to all makes or models of machines. The Leonard Bracket is light in weight and cheap in price. It balances easily with the front construction and eliminates all danger of striking the tank should you fall while riding.

The Leonard is yours for $1.00, sent anywhere with a guarantee covering satisfaction, adaptability and serviceability. High nickel finish, $1.50. If you don't like the bracket, return it at once and we will refund your money.



Dealers in motorcycles and accessories should handle this bracket. It sells readily and every rider is more than satisfied. Write for special discounts.

Again DIXIE!

1,000 MILE WORLDS' RECORD FOR DIXIE

TIME 21h. 3m.

The DIXIE is truly the 20TH CENTURY MAGNETO! More firmly now than ever has the DIXIE clinched its hold upon the dominant position in the magneto field.

"Warhorse Baker" added another world's record to his string when he covered one thousand miles of Australian brush-strewn, jungle-like roads in 21 hours 3 minutes.

What CAN one think of a magneto that keeps up its steady, even ignition-production over one thousand miles of bad roads, through a driving rain most of the way at the average speed of the TWENTIETH CENTURY LIMITED?

We leave it to the trade to judge.

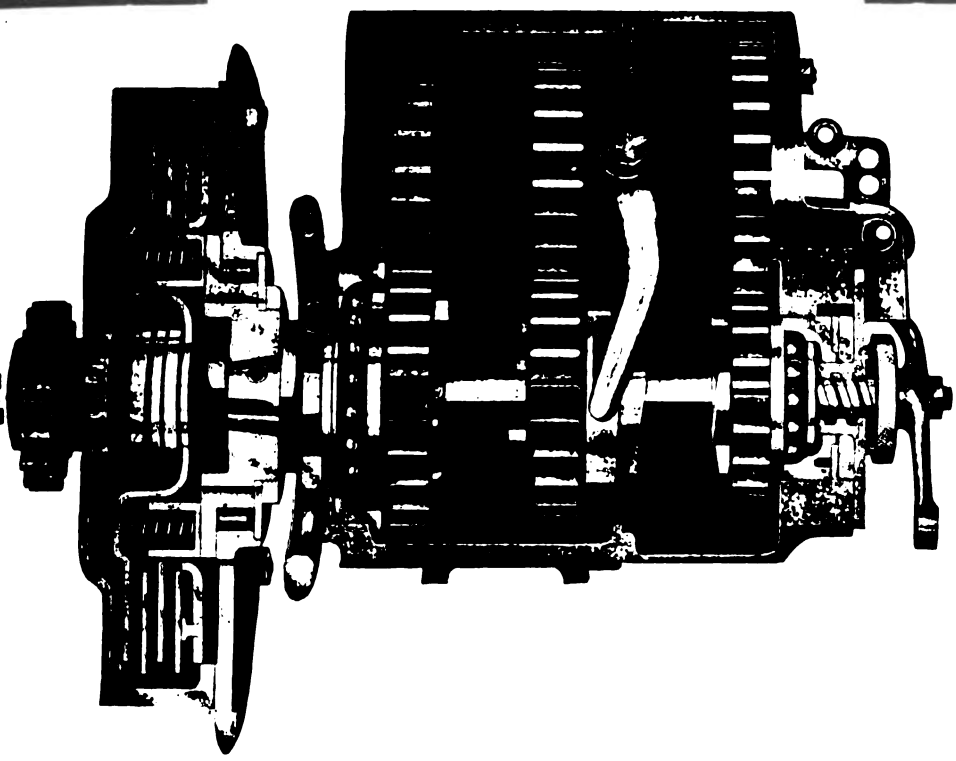
SLIDING GEAR
TRANSMISSION & CLUTCH

Thor Thor



The Thor PERFECTED THREE-SPEED is in a rigid aluminum-housing, securely supported in drop-forged steel-parallels, which form the front part of rear forks. Linked with our new Thor dependable self-locking device it firmly controls the speed changes.

THE CLUTCH of the dry-plate multiple-disc type connected with main shaft of Transmission is controlled from three points:

FIRST by hand lever on left side of tank provided with proper friction.

SECOND by foot releasing pedal on left foot-board.

THIRD by automatic release in connection with setting brake with brake pedal on right foot-board.

This is strictly an Exclusive Thor feature. It will be especially appreciated in congested city traffic, at street intersections, and so forth.

The above type of transmission used on both twin models

BLUE STREAKS

GOODYEAR
AKRON
MOTORCYCLE TIRES

On Every Leading Motorcycle

LAST YEAR Goodyear Blue Streaks won every world's record for speed and endurance on track and road.

This year they have won a record that means far more to you.

Every leading motorcycle manufacturer is equipping his product with Goodyear Blue Streaks.

One manufacturer, or several, might go wrong in tire equipment.

But when all with a reputation to sustain unite on one tire, it means that that tire must be right.

And the Blue Streak *is* right, as you will find the first time you use it.

Big and sturdy, easy riding, safe and sure, no tire was ever better fitted to give unusual mileage, to lessen trouble, to increase speed and save power.

You will do well to accept the highest recommendation any tire can receive.

Use Blue Streaks on your old machine. Get them on the new machine you buy.

You can always tell the Goodyear by the beautiful white tread with the Blue Streak on each side.

Any dealer can sell you Blue Streaks. Ask for them, and accept no other.

BLUE STREAKS

GOODYEAR
AKRON
MOTORCYCLE TIRES

At Every Leading Dealer's

IS there any possible advantage in selling any other tire than Goodyear Blue Streaks?

You know they hold all world's records, amateur and professional.

You know, they are the standard tire equipment on every leading motorcycle manufactured in this country.

You know that your only reason for selling tires is to build a permanent business and to make money.

Then why should you retard the growth of your sales and the growth of your prestige, by pushing tires that cannot hope to bring you the returns that Blue Streaks will?

Do you suppose that the Motorcycle Manufacturers adopted Blue Streaks by such an overwhelming majority, simply by chance?

Not for one minute. They chose Blue Streaks because they wanted positive assurance of quicker sales and satisfied purchasers.

And you are perfectly justified in demanding the same standards for your business.

Why do you delay another day in writing for the complete Goodyear Dealer Proposition on Blue Streaks?

1916—and the

IT'S all around us, this increased confidence in 1916. Yesterday (Feb. 3) we received from the W. E. Wandersee Co., Harley-Davidson dealer in Detroit, an order for five carloads of Harley-Davidson motorcycles and one carload of sidecars. How many dealers would have placed a single order of this size (almost $50,000.00) a year ago? Not many, that's certain.

Business Is Better Than Ever

Harley-Davidson shipments are 44% ahead of last year. Pacific Coast business is way ahead, Southern business is ahead, New England business is ahead, and business in the Middle West was never so good as it is now.

The Reason for It All

People have more confidence in business this year. Employment is steadier, collections are better, and sales in almost all lines are greater.

Digitized by Google

New Confidence

The Situation with Harley-Davidson Dealers

On top of a good season last year, again handling a popular line, and getting prompt deliveries, Harley-Davidson dealers have made a wonderful start this year.

It is an absolute fact that Harley-Davidson dealers are getting the business, and any open minded man in the industry will tell you so.

Some Splendid Openings

We still have several splendid openings in large cities for wide-awake men who are in a position to represent the Harley-Davidson. If you feel that we might have something that will interest you, we suggest that you write to us now.

DUCKWORTH Chains

Baker Uses DUCKWORTH CHAINS Exclusively

Over bad roads, through a driving rain, against a terrific head wind, Baker, on a Duckworth **chain-equipped Indian, tore through Australia and smashed** the thousand-mile record in the wonderful time of 21 hours, 3 minutes.

Baker also "busted" his own world's records for twelve and eighteen hours.

Digest this fact: during his entire trip, over unspeakable roads, he made but one repair—changed a valve. Not the slightest sign of chain trouble.

That's Duckworth Performance for You!

Business of Assured Future

Henderson dealers are reaping the greatest volume of sales in the history of this company.

And their business is ***permanent***—the kind they will hold, not a mere temporary spurt of prosperity.

For sales made by Henderson dealers are founded on confidence.

This confidence is the direct result of the riders understanding the advantages of four-cylinder design.

Having once experienced the luxury of power and comfort and responsiveness given by the perfected Henderson "four" motor, they will never be satisfied with less fully-developed types again.

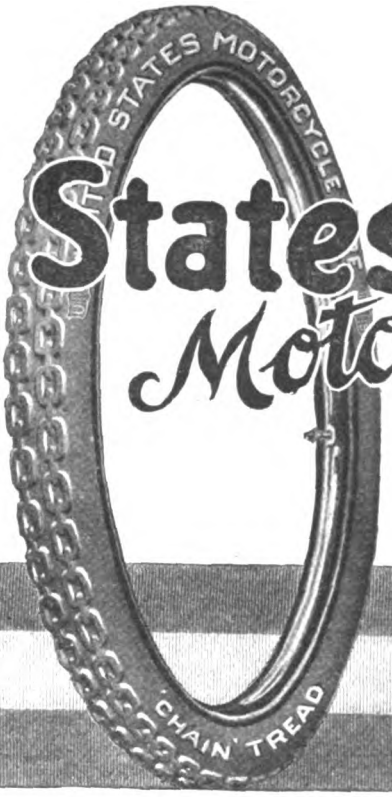
United States Motorcycle Tires



"—Have Carried Me Over 14,285 Miles"

Almost two years of steady use in all kinds of weather—over ice and frozen, rutty roads.

And the tires are "Still in fairly good condition."

There's another example of the reliability of UNITED STATES CHAIN TREAD MOTORCYCLE TIRES.

Use them—

Use them hard.

They're made to stand up under the severest possible tests.

You never have to worry about "Chain" Treads—they are there.

Which is why we get unsolicited letters from motorcyclists saying:

"—— have ridden all makes and find the 'Chain' Tread gives the best service."

Next time you buy a tire—buy a "Chain" Tread.

INDIAN SALES INCREASE IN 36 STATES

Financial Returns From Sept. 1 to Feb. 1 Show 55 Per Cent. Advance Over Same Period Last Season —Motorcycle Business Climbs 51 Per Cent. and Sidecar Demand Goes Up 49 Per Cent.

SPRINGFIELD, Mass., Feb. 8.—With cycle optimism spreading at what may safely be considered a record rate and prosperity forecasts apparently limited only by the availability of manufacturing material, nothing could be more interesting than bed-rock figures on actual sales conditions of today and such data is piling up surprisingly at the headquarters of the Hendee Mfg. Co. When approached by a staff representative of **Motor Cycle Illustrated**, Frank J. Weschler, treasurer and sales manager of the Hendee company, made the following highly significant statement concerning the present Indian motorcycle and bicycle business, as compared with the sales for the corresponding period in the season of 1915:

Big Increase Over Last Year

"In the actual total number of machines shipped from September 1 to February 1, the season of 1916 shows an increase over the corresponding period of 1915 of 51 per cent," said Mr. Weschler, "and for sidecars the figures show an increase for 1916 of 49 per cent. over the business for the same period of last year.

"In the matter of sales, the total business of the company, in dollars and cents, shows an increase of 55 per cent. from September 1 to February 1, over the same period for last year, and an analysis of the sales conditions in the various states of the Union shows that of the forty-eight states thirty-six show a substantial increase.

Where Gains Come From

"It will be interesting to know that the major portion of this increase comes in the manufacturing sections and in the South and Southwest. This is particularly interesting insofar as the South and Southwest are concerned, for the reason that for the past couple of years conditions in those sections have not been too thriving, and it shows conclusively that the South is again coming into its own.

"This means that in three-quarters of the states of the Union the Hendee company is making a very satisfactory showing, even at the time of the year when it is not to be expected that a great deal will be done in actual business, and certainly this can be construed only as a forerunner of big business to come during the spring selling season.

"At the present time there are employed by the Hendee company 2,300 people, including factory and office, with a weekly payroll of $48,000.

"Our business on lightweights has been splendid, and as we are now shipping these models there is no question but that this will give an added stimulus to the lightweight business. The indications point very strongly toward a greater demand for lightweights than we really anticipated ourselves.

"So far as the bicycle end of the business is concerned, we have been immensely

pleased with the way in which the trade has taken hold of the Indian bicycle, and providing material can be obtained and the bicycles built fast enough to meet our requirements, we have no doubt that we can sell double the number of bicycles that we estimated at the time of taking them up.

"A great many of our dealers have already found it necessary to send in reorders for bicycles, and all speak very encouragingly of the prospects, so that with the best part of the selling season ahead of us we feel that we have a right to assume that our bicycle business will go away ahead of our calculations, providing we do not have any difficulty in getting out as many as we will need to meet the requirements.

Foreign Business on the Hop

"Our foreign business has been jumping by leaps and bounds; and by this we do not mean business with any of the belligerent countries. In speaking of foreign business, and in any comparisons of foreign business, we do not take into consideration any business that may have come from any of the warring nations, but have regard solely and alone to commercial business, which has been extremely gratifying during the period of the 1916 season that has been covered up to February 1.

"All in all, we feel very much enthused over the business that we have had since September 1, and the prospects for the balance of the year certainly could not be any brighter. It makes us feel that the slogan, '100,000 motorcycles for 1916,' may not be such a far cry after all."

THOR COAST BRANCH OPENS IN SAN FRANCISCO

SAN FRANCISCO, Cal., Feb. 3.—The Pacific Coast branch of the Aurora Automatic Machinery Co., at 61 Fremont street, opened on January 26, ready for business. There was a full carload of Thor motorcycles and a large stock of Thor parts, but it was not long after Manager Z. Barton declared things started officially, that sales were made. Business has been coming the way of the branch ever since.

Manager Barton is a firm believer in "real service" and is emphasizing this in the new branch. Shipments are made within 30 minutes from the time orders are received.

HARDEN RODE BUSINESS WAVE TO THE COAST

Westfield Sales Manager Traveled Across Country With Prosperity and Was Deluged With Orders—Outlook for 1916 Sales Is Dimmed Only by the Shortage of Material

WESTFIELD, Mass., Feb. 8.—Loaded down with orders and enthusiasm in about equal parts, and possessed of much inside information concerning general trade conditions throughout the country, Sales Manager L. D. Harden, of the Westfield Mfg. Co., breezed into the company's headquarters a day or two ago after one of the longest and most successful business trips he has ever made. Mr. Harden spent some time in Canada, devoted a good deal of his trip to the Northwest, covered the Pacific Coast territory and also gave the Middle West attention.

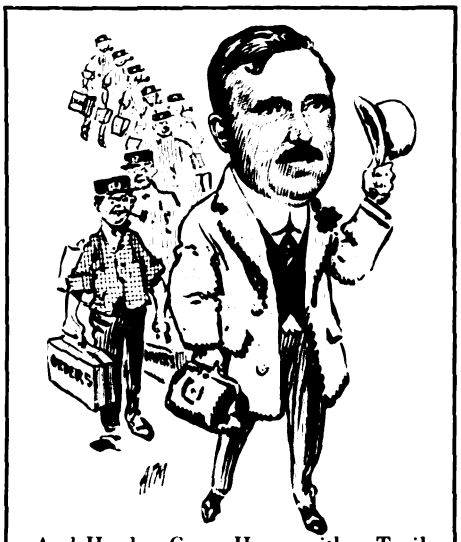
When greeted at the Westfield office by a staff representative of **Motor Cycle Illustrated,** Sales Manager Harden was just in the act of drawing a full breath after his whirlwind trip and although fifty-seven varieties of business demanded his consideration he found time to pass along some of his high-pressure optimism to the scribe.

Just Had to Use Superlatives

"Business!" he ejaculated, with the smile that is becoming as well-known and popular along the transcontinental trade routes as the Westfield company's cycle products, "why, business is so good right at this minute that I can hardly talk about it without using up all the superlatives at my command. Everybody appears to be working, wages are excellent and the buying spirit has struck the country.

"On the way across I got somewhat ahead of the business wave and when I reached the Northwest I found the cycle dealers—for both motorcycle and bicycle lines—a bit depressed. The wave had not yet struck them. A week or ten days later they began to feel it, and now nearly all of them are considerably busier than the proverbial busy bee. The only problem is how to supply them with machines as fast as they can sell them.

"When I traveled down along the coast and through California the wave was just being felt, but before I left there the dealers were up to their necks in business. On a certain Sunday I found that jobbers were telephoning to one another and trying to borrow a few juvenile bicycle models to satisfy their patrons until they could obtain shipments. In some cases the agencies were actually being besieged by both motorcycle and bicycle prospects, and the agents had to procure some machines at any cost.



And Harden Came Home with a Trail of Orders Behind Him

"Folks who have been keeping in touch with business conditions throughout the country will recall that Denver suffered a considerable slump during the last year, general conditions there being perhaps more discouraging than anywhere else in the country for a time, and when I say that Denver is now striking its gait again and looking forward to a big year you will understand that the business outlook really is nation-wide and solid.

The Shortage of Materials

"The only unfavorable angle on the situation," continued the genial Westfield transcontinentalist, "is the shortage of material, particularly of steel. All motorcycle and bicycle manufacturers are feeling this in some degree, and our own estimate of the seriousness of the matter will be understood when I say that we are now booking steel orders for delivery early in 1917.

"Perhaps we should not complain, though, for we have great numbers of motorcycles and bicycles ready to leave the plant and lacking only one or two minor parts. Material is now in hand or on the way for these parts and they will be hustled out without a moment's delay, thereby releasing a lot of heavy shipments.

"Needless to state, our plant is working on a capacity schedule and we have made remarkable progress in spite of the uncertainty of getting the materials we need. Dealers who handle our products may rest assured that the Westfield staff, from the executives to the men in the yard, has but one thought in mind these days and that is to ship just as many motorcycles and bicycles every twenty-four hours as physical endurance and a seasoned and enthusiastic organization will permit."

Turned Down Order for 1,000 Bikes

One of the most interesting sidelights on Mr. Harden's trip was that he felt compelled to refuse a number of orders from new customers who demanded early shipments, in order to protect present patrons of the company. He followed this policy throughout, and in one instance was obliged to pass up an order for 1,000 bicycles.

Mr. Harden's general itinerary was as follows: Montreal, Que.; Toronto, Ont.; Chicago, Ill.; Minneapolis and St. Paul, Minn.; Sioux Falls and Mitchell, S. D.; Miles City, Billings, Butte and Missoula, Mont.; Spokane and Seattle, Wash.; Vancouver, B. C.; Tacoma, Wash.; Portland, Ore.; San Francisco, Sacramento, Fresno and Los Angeles, Cal.; Salt Lake City and Ogden, Utah; Pueblo, Colorado Springs and Denver, Colo.; Omaha, Neb.; Kansas City and St. Louis, Mo.; Chicago, Buffalo, New York and back to Westfield.

CALIFORNIA HUSTLERS TAKE ON CLEVELAND

Live Wire Agents Sign Up to Distribute Lightweight in San Francisco and San Bernardino—Others are Lining Up

LOS ANGELES, Cal.—Aggressive sales activity is going to put the two-stroke Cleveland lightweights rapidly on Californian boulevards this year. Applications for agencies are coming in to the office of the western distributor, in this city, from men who are rated decidedly successful in the motorcycle field. The San Francisco distribution has been taken by C. C. Hopkins and "Happy" Alzina, who have hooked up in a business of their own and opened a store at 32 VanNess avenue, in the heart of the motorcycle district.

The San Fernando representation has been taken by Willis A. Rowe, who it is claimed had the heaviest sales in proportion to the population of any small town agent in the State during 1915. In Los Angeles, the Cleveland store at 203 West Eighth street, has been selling one machine a day. Victor Maple, a well-known old-time rider, who has not straddled a mount in three years, strolled in on February 1, and after taking a short ride, wrote out a check for a Cleveland.

MILITAIRE AND CYGNET TO SHOW AT BOSTON

BOSTON, Mass., Feb. 5.—The Militaire Autocycle Co., Inc., of Buffalo, N. Y., and the Cygnet Rear Car Co., of Buffalo, N. Y., will exhibit their products at the 1916 Boston automobile show, which will open on March 4 in Mechanics' Hall. Among the accessory and specialty firms at this exhibition will be the Brictson Mfg. Co., the Champion Spark Plug Co., the Master Carbureter Sales Co., Platt & Washburn Refining Co., the Silvex Co., Standard Oil Co. and the Texas Co.

PEARSON IS MANAGER FOR NATIONAL COIL

LANSING, Mich.—The National Coil Co., maker of the Midget high tension magneto, announces that C. E. Pearson, former electricial engineer for the firm, has been appointed general manager. The change in Mr. Pearson's status in the company is the result of the recent reorganization of National Coil affairs.

Mr. Pearson is well known in the electrical field as a producer of highly-efficient instruments. His wide experience prior to coming with the National Coil Co., together with the opportunities afforded him for the development of new

Digitized by Google

apparatus while engineer for this company fits him for the managerial position.

RUTHERFORD IS GOODRICH SALES MANAGER

AKRON, O., Feb. 5.—W. O. Rutherford is now general sales manager for the B. F. Goodrich Company, of this city. He was, until recently, assistant sales manager, but was advanced to his present position when H. E. Raymond became second vice-president and relinquished the managership. Mr. Rutherford has recently completed his seventeenth year in the Goodrich employ.

W. O. Rutherford was for many seasons manager of the Buffalo Goodrich branch before being called to Akron to assume certain portions of the sales work. He was responsible for the salesmen's school, which has made such a splendid record in developing new material for the field. He had been practically conducting sales department affairs when his promotion came.

EXCELSIOR IS DELIVERING MANY LIGHTWEIGHTS

CHICAGO, Ill., Feb. 5.—The Excelsior Motor Mfg. & Supply Co., of 3703 Cortland street, this city, is making deliveries of the Excelsior lightweight in quantities and is prepared to fill orders for this model as rapidly as received.

The little two-stroke has been thoroughly tried in all parts of the country wherever motorcycles are used and the reports have been uniformly enthusiastic. There was some question about pedals not being fitted when this model was first introduced, but the try-outs have shown that these were unnecessary, as the motors invariably started with the greatest of ease.

SIEBERLING GIVES DINNER TO GOODYEAR MEN

AKRON, O.—C. W. Sieberling, vice-president of the Goodyear Tire & Rubber Co., gave a dinner to 165 Goodyear employes on January 28. The participants included foremen and department managers among others. The dinner is but one of a number which figure in a plan to bring employes in closer touch with department heads and foremen and interest them in educational movements and hygiene.

AUDITORIUM UNAVAILABLE FOR MILWAUKEE SHOW

MILWAUKEE, Wis., Feb. 8.—Finding the Auditorium unavailable for staging its annual motorcycle exhibit, the Milwaukee Motorcycle club has secured the use of premises on Third street, near Grand avenue, opposite the Wisconsin hotel, which affords 8,000 square feet of floor space, and promises to make the local show for the 1916 season even better than last year.

George Melcher has been made manager of the show and is devoting his entire time to the handling of the project, having established his office in care of Emil Kasten, 253 Fourth street.

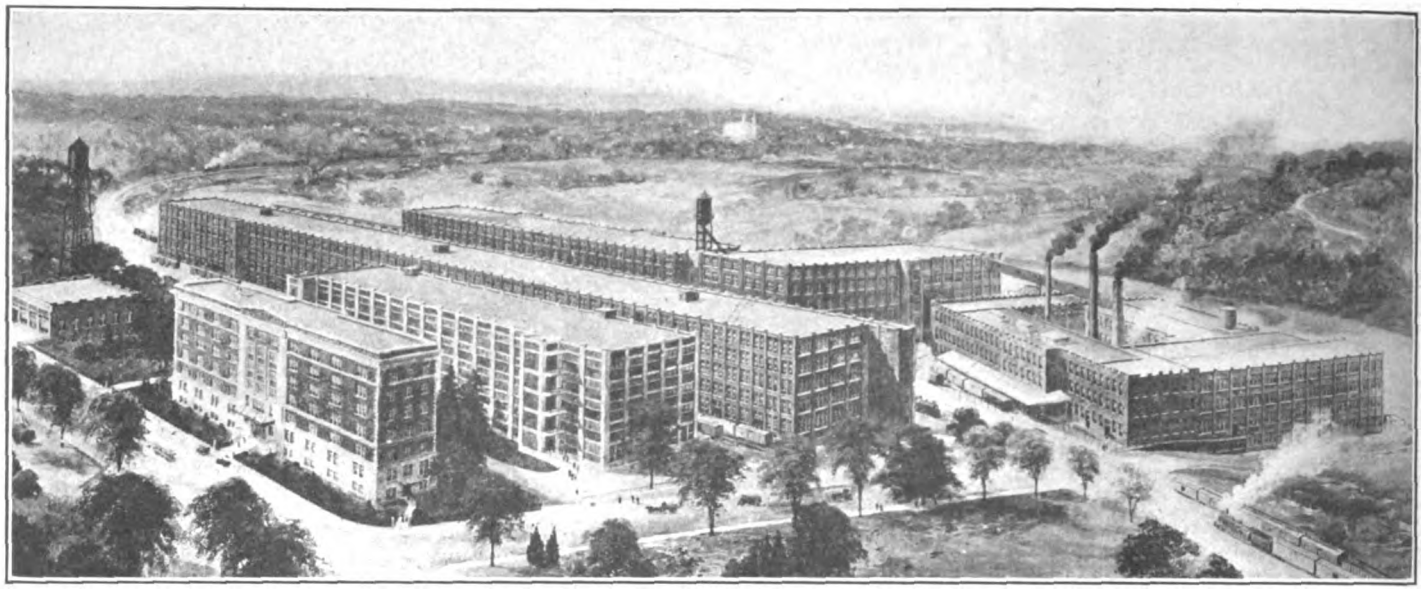
NEW FISK RUBBER COMPANY BUILDINGS ARE MODERN IN EVERY DETAIL



Bird's-eye View of the New Fisk Buildings at Chicopee Falls, Mass., Which Will Be Completed in a Few Weeks

CHICOPEE FALLS, Mass., Feb. 8.—Construction work on the new Fisk Rubber Company plant here is about completed. There are now twenty buildings in the group, and one of these, the new mill building, is one of the largest single buildings of its kind in Western New England. With the new structures the Fisk Company has twenty-nine acres of floor space wholly devoted to the manufacture and distribution of tires.

The handsome appearance of the new administration building is most impressive. It is 50 x 200 feet and seven stories high, built of stone and tapestry brick. Its 7,000 feet of floor space are divided into over fifty private offices, general offices, reception rooms, conference rooms, etc., as well as three dining halls, capable of accomodating 200 people.

The new mill building, constructed of brick and steel, is 108 x 600 feet, and has five stories and a basement. It is not only remarkable for its huge size, but also because of the fact that it is one of the best lighted buildings in this section, over ninety per cent. of its exterior being window surface. Four fire towers afford unusual fire safeguards. This building is connected with other sections of the plant by tunnels and bridges.

The new storehouse is 108 x 300 feet, having five stories and a basement. It is made of reinforced concrete and steel with brick panels. This building is also equipped with fire towers and patent sprinklers. Tunnels, too, are used to form a direct connection with other buildings. A spur tract on the south side of the building will serve as a loading platform for the receiving room. This structure is already complete and in use.

TWO CARLOADS OF ROGERS SIDECARS FOR BECK

NEW YORK, Feb. 7.—Irving Beck, representing the Rogers sidecars in the East, has received two carloads from the Rogers Manufacturing Company's factory in Chicago to date, the first carload being received on February 1. In this load all Rogers sidecars adapted for use with Indian motorcycles have been sold out, while in the second load, which has just arrived, there are 26 sidecars for Indians, fitted with the new Rogers all-ball joint connections.

The all-ball joint connection cars are new, this being the first lot to be shipped for attachment to Indian models. They will fit Indians with battery equipment as well as the regular models. Mr. Beck is desirous of communicating with Indian dealers regarding the Rogers cars fitted with these connections. He can be reached at 1493 Fifth avenue, New York.

GOODRICH ADDITIONS ARE NEARLY COMPLETED

AKRON, O.—The three big structures which have been added to the already large plant of the B. F. Goodrich Company are nearing completion and will be put into service very shortly. The largest, which will be used as a finished goods warehouse, is 320 feet long, 280 feet wide, and has two wings, one six stories high and the other seven stories high. The second largest is 300 feet long and 100 feet wide and will be used for manufacturing and storage purposes. The third building will be used as a machine and pattern shop, and will be five stories high, with a length of 260 feet and a width of 100 feet. All three buildings are of brick with concrete floors, concrete-enclosed girder work and steel window frames and sashes. Elevators and enclosed fire escapes are part of the equipment.

The Goodrich factory now consists of a group of fifty-seven buildings with a floor space of nearly 100 acres. The visitor would walk 3.8 miles in going once around the grounds which these buildings occupy.

RACINE RUBBER CO. HAS 35 PER CENT. INCREASE

RACINE, Wis., Feb. 8.—That the Racine Rubber company enjoyed a year of unusual prosperity is attested in the reports made at the annual meeting held in this city. Sales for 1915 were announced as $3,231,000, as against $2,400,000, the year before, a 35 per cent. increase. It is expected that the company's business for this year will run into the four millions easily, as the opening finds the company working on plenty of orders with a force of 700 employes, which will be increased shortly. The company has plenty of rubber and fabrics on hand.

At a meeting of the board held immediately after the following officers were chosen to serve for the ensuing year: H. L. McLaren, president and advisory manager; Stuart Webster, vice-president, general manager and treasurer; H. C. Severance, secretary and general sales manager; L. T. Vance, general factory manager.

KELLOGG SELLS EXCELSIORS TO SIGNAL CORPS

BRIDGEPORT, Conn., Feb. 8.—Stanley T. Kellogg, the progressive Excelsior distributor and Henderson agent, who has his headquarters in this city, has just placed two electrically-equipped Excelsiors with the Eastern Signal Department of the U. S. Army, for use in connection with the headquarters in New York City.

The machines were ordered by Major Carl F. Hartmann, who is a firm believer in the future of the motorcycle as an adjunct to the army. Major Hartmann is now subjecting the machines to a systematic service test and the performances they have given indicate that another order will be placed in the near future with Distributor Kellogg.

RIDING ON CREST OF PROSPERITY WAVE

MILWAUKEE, Wis., Feb. 8.—The A. O. Smith Co. announced recently that its motor wheel shipments for last month were more than three times as great as those for the same period last year, while the shipments for the fiscal year up to the first of this month had jumped five hundred per cent.

Digitized by Google

Mr. Jackson, manager of the Motor Wheel Division, is elated over prospects in all sections of the country. "Billy" Cahn, the New York Sales representative, is turning in at the rate of one contract a day. Among the larger western dealers who have again signed up for the bicycle booster is the Saufley Supply Co., of Kansas City, Mo., which has contracted to sell one hundred of the motor attachments in 1916.

DIXIE STATE RUN SLATED FOR AUGUST 11 AND 12

ROANOKE, Va.—The two-day State F. A. M. run of the Dixie M. C., of this city, from Roanoke to Richmond and return, will be held on August 11 and 12, 1916. This will be the second event of this nature conducted by the club, the initial one having been a one-day affair of 225 miles to Danville during 1915. The state run course covers a distance of close to 450 miles and takes in the cities of Lynchburg, Farmville, Petersburg, Richmond, Charlottesville and Staunton.

E. A. Robertson, Hendee traveler for this section, is much interested in the affair and is of the opinion that it will be a good test of riding ability. He thinks that the chief trouble will be to keep on the correct route between Roanoke and Richmond, but is of the opinion that this disadvantage will be much reduced by the thorough manner in which the club expects to post the course.

CHICAGO AGENTS TAKE BIG CYGNET TERRITORY

CHICAGO, Ill.—Jesse Edwards, of the Edwards-Crist Mfg. Co., Indian distributor, has taken the agency for the Cygnet Rear Car for Illinois, Indiana (except Indianapolis), Wisconsin, and Michigan (except Detroit). He has contracted for 500 of the rear cars for 1916. Mr. Edwards started in following the close of the Chicago auto show on an extensive selling campaign throughout his territory. The first order given the Cygnet Rear Car Co., of Buffalo, N. Y., was for one carload of the attachments.

R. C. Crist, local manager of the Excelsior agency, has a similar territory to that of Mr. Edwards, and has also contracted for 500 rear cars. His initial order was a carload. Mr. Crist, accompanied by Sales Manager Ogden, of the Cygnet Company, paid a visit to the Excelsior factory following the closing of the show, and Mr. Ogden reports that the Excelsior people openly recommended the rear car to Excelsior dealers all over the country.

INDIAN OUTING CLUB HAS A LADIES' NIGHT

SPRINGFIELD, Mass., Feb. 8.—The organization of department heads of the Hendee Manufacturing Company at Springfield, known as the Indian Outing Club, gave a very successful "ladies' night" at the Hotel Worthy in Springfield Saturday night, February 5, entertaining a company of 54 people. This is the second time that the women have been invited to the doings of the club, the intention being to promote good fellowship and let the women in on the good times, in which objects the affair was very successful.

The banquet took place in one of the large private dining rooms, the seating arrangements consisting of a number of small tables instead of a single big one. Healey's orchestra furnished music and vocal selections were rendered by George Dowd, a well-known Springfield entertainer. After the banquet the floor was cleared for dancing, which was enjoyed for several hours. The committee on arrangements was composed of Fred Johnson and J. H. O'Brien.

STOLL COMPANY IS DOING A RECORD BUSINESS

DENVER, Colo.—The Stoll Mfg. Co., of 3232 Walnut street, this city, is doing a record business in its well-known line of Stoll tandems. The volume of business for the three months ending October, 1915, was five times that done in the corresponding period of 1914. January, 1916, business shows an even greater increase, and from the way orders are coming in, the Stoll folks are sure that 1916 will be a record-breaker.

A moving footrest attachment, recently brought out for use with the $10 tandem, is receiving much attention from dealers throughout the country. It sells for $3.50. It is simple in construction and is readily adaptable to 1915 and 1916 tandems. It adds fifty per cent. to the riding qualities for the tandem, which accounts for much of its popularity.

The Stoll Company states that prices on Stoll tandems will probably be increased after its present stock of material is exhausted, owing to the advanced cost of raw stock and labor. Jobbers and dealers are therefore advised to purchase now.

MOTORCYCLE POLICE SQUAD ESCORTS PRESIDENT

KANSAS CITY, Mo., Feb. 8.—The entire Kansas City motorcycle squad, equipped with twenty-seven Indian machines, acted as an escort for President Wilson last week when he delivered his preparedness speech here. The police riders met the President at the Union Station.

PERSONS INCREASE LIKELY ABOUT APRIL 1

Due to Ascending Rates on Both Steel and Leather; Factory Operating on Twenty-Four Hour Schedule; Heavy Shipments to Canada

WORCESTER, Mass., Feb. 8.—Owing to the rapid increase in the cost of materials, leather as well as steel, the saddle products of the Persons Mfg. Co. will be advanced in price about the first of April. In answer to an inquiry by a staff representative of **Motor Cycle Illustrated**, President C. A. Persons stated that an increase could not be avoided.

"We use only the best materials obtainable in our saddles," said President Persons, "and no matter how the market moves we shall continue to adhere to that standard of manufacture, which means that we must pay the advanced prices for high-grade material. It would be unfair, of course, for us to shoulder all of this increase and some of it must naturally be passed on. I consider it likely that the increase in our saddle prices will be 15 per cent."

About 20,000 Persons saddles, practically all of bicycle types, were shipped to Canada alone during January and large consignments are still going to the Dominion. Export business in other directions is light, owing to the obstacles with which manufacturers have to contend in sending goods abroad at this time.

Domestic trade is brisk and the factory is working on a twenty-four hour basis. Some classes of material have been held up in transportation, but the factory is now supplied with enough rough stock to guard against a serious interruption in the run of production.

HOLIDAY RACE MEET WILL INCLUDE 4 EVENTS

AUGUSTA, Ga., Feb. 8.—A racemeet will be promoted on the local fair grounds track, on Feb. 22, consisting of four events. A three-mile race will be the opening feature, for which prizes ranging from $3 to $10 will be hung up. The other events will be a five-mile, a fifteen-mile and an Australian pursuit race. For the five-mile affair the prizes will be $5, $10 and $15; for the fifteen-mile, $10, $20 and $30, and for the Australian pursuit race $25 will be offered.

Entry blanks have been sent to all of the more important clubs about Augusta, and a big entry list is expected. Efforts are being made to get Harry Glenn, of Atlanta, to match his skill against M. B. Buford, a crack local rider. The track is in fine shape, being one of the fastest in the State. Entry blanks can be secured from E. W. Watson, 222 McIntosh street, Augusta.

MORE DETAILS ON NATIONAL CAPITAL RUN

WASHINGTON, D. C.—Chairman W. F. Throop of the competition committee of the National Capital M. C., announces further details regarding the proposed endurance run to Philadelphia and return via Lancaster, Wilmington and Havre de Grace. The date has been tentatively set for May 30 and 31, 1916, and the running schedule will be approximately 20 miles per hour.

Several controls will be arranged en route, most of them being secret checks, and riders will be compelled to hold strictly to schedule. At the finish of the run a very severe technical examination of the machines will be made and riders will be penalized for all defects.

ROUTE IS LAID OUT FOR RUN OF JAMAICA CLUB

JAMAICA, N. Y.—Members of the Jamaica M. C. are making arrangements for the spring run to be held on Sunday, May 7. There will be two "sessions" in this affair, the morning one being from the clubhouse to Patchogue via the Merrick Road, and returning by the Wick Road to Deer Park, Wyandanch, Pinelawn, Bethpage Junction, and Hempstead. The afternoon session will lead over Rocky Hill Road to Bayside, Little Neck, Manhasset, North Roslyn, Brookville, East Norwich, Berry Hill, Huntingdon, Centerport, Northside Turnpike, Port Jefferson, Dix Hills, Woodbury and Jericho to Jamaica. The distance is estimated at 225 miles in all. Further details can be had of Hugh V. Mauritho, Jr., care of the club, 447 Fulton street.

WANTS MOTORCYCLE PATROL

YORK, Pa.—District Attorney Hannum, of Delaware County, is strongly advocating the establishment of a motorcycle patrol to protect residents along Bow and Darby Creeks. For some time lawlessness has prevailed in that section and the watchmen detailed to the district have been unable to cope with the situation. Mr. Hannum believes that motorcycle officers can establish order there in a short time.

33 SIGN FOR INDIANA CYCLE SHOW

Show Committee is Circularizing all the Dealers in the State and is Advertising Widely; Many Makes of Machines to be Shown

INDIANAPOLIS, Ind., Feb. 9.—At this writing thirty-three exhibitors have reserved space for the Indiana Cycle Show in this city, which will be held in Tomlinson Hall, February 24, 25 and 26. By the opening of the show the committee in charge expects that the seven remaining spaces will be bought.

The show this year will be more than ever a dealers' proposition, if the work of the committee proves successful. Each dealer in the state will have received, before the exhibits are opened to the public, about ten circular letters inviting him to attend, and effectively setting forth the benefits which will be gained by the dealer who is wise enough to view the latest products of the cycle manufacturers and meet the "big guns" of the trade.

Every firm that will be represented at the show is mailing inserts advertising their exhibit. Posters have been mailed to every town in the state and are also being put up in conspicuous places in Indianapolis. Several pages of advertising have just been contracted for in the large Indianapolis dailies that cover the entire state.

The finishing touches are now being put on the vaudeville program which will enliven the afternoons and evenings of the three days that the show will be in progress. Moving pictures showing the processes of manufacture employed in the Davis Sewing Machine Co., the Harley-Davidson Motor Co., the Hendee Mfg. Co. and the Excelsior Motor & Mfg. Co. will be screened.

show the best local negro quartette will render some old time melodies and ragtime, while another feature of the same evening will be the balancing act of Professor Graff and his company.

Nearly every leading motorcycle produced in this country will be exhibited. The Emblem Mfg. Co. will have a full line of motorcycles and bicycles. The Harley-Davidson, Excelsior and Indian will be shown by the local dealers. The Davis Sewing Machine Co. will have a special exhibit, boosting the Dayton, as will the Cyclemotor Corporation, of Rochester. The Em-Roe Sporting Goods Co. will show the Smith Motor Wheel in its stand. Van Cleef Bros., of Chicago, have already arranged to show their complete line of "Dutch" products, such as cements and tire fillers.

The F. A. M. and Consolidated Motorcycle Club have been donated booths by the show committee. President A. B. Coffman will again attend the show this year and help wage a membership campaign for the federation.

LANG SELLS 45 TO PEOPLES' GAS LIGHT

Chicago Harley-Davidson Agent Lands Big Order for Three-Speed Singles from Public Service Firm—31 Sidevans are Included.

CHICAGO, Ill.—C. H. Lang, of 1704 Michigan avenue, has just sold the People's Gas Light & Coke Co., of this city, 45 Harley-Davidson three-speed single cylinder models and 31 sidevans. This makes a total of 86 Harley-Davidsons to be used by that company to date.

Lang started in business in 1910 and sold the People's company 20 machines that season. In 1911 Lang sold the company 12 more Harley-Davidsons and in 1912 another 34. During the next year the firm placed an order for 47 more of the Silent Gray Fellows.

Of the 45 three-speed singles just sold, 31 will replace older models which have been traded in. As the Gas Light people have 72 machines in service, the net increase is 14, making a total of 86. All are Harley-Davidson models.

The order for 31 sidevans is probably the largest that one company has ever placed in any part of the country. A corresponding number of the three-speed singles will be used with these vans. In this regard, Lang says: "I think that the single cylinder with sidevan is the proper one for this firm's service. In fact, where loads are bulky but not very heavy, it seems to fill the bill somewhat better than the twin. The last lot of Harley-Davidsons purchased will be used by the street engineering department of the Gas Light company, but the others are generally ridden by solicitors, collectors, trouble shooters and inspectors."

DEMAND IS GREAT FOR ECLIPSE LOCKING HUBS

ELMIRA, N. Y., Feb. 8.—That the new Eclipse locking hub would be a big seller has been looked for by all hands at the factory of the Eclipse Machine Company, in this city, and certainly first reports prove the confidence of the maker in the product to have been by no means misplaced. Traveler L. S. Pugh, writing from Kansas City, Mo., states that he has found an enormous demand for the locking hubs for front wheel service on bicycles among dealers everywhere.

"There has been a big market for a lock of this kind," writes Pugh, "and nothing proves it better than the demand. The lock protects the dealer as well as the rider and insures the full payment of credit-bought machines, as will be obvious at once. Bicycles not Eclipse locking hub fitted are a risk to both dealer and rider, and consequently, the dealers are very enthusiastic over the prospects of having the lock come as regular equipment."

KELLOGG HAS CLOSED FOR 500 NEW EXCELSIORS

BRIDGEPORT, Conn., Feb. 8.—Contracts for 500 Excelsior motorcycles have already been closed by Stanley T. Kellogg, Excelsior distributor in this district, and business continues to pile up at his State street store. It would not surprise the aggressive Kellogg to find his record for the season near the 600 mark. He disposed of 450 Excelsiors last year and considers the present outlook vastly improved.

Since taking on the local Henderson agency, Kellogg has found a rapid growth of interest in the four-cylinder machine, and is of the opinion that the recent advance in price, due to the condition of the material market, will not noticeably affect the sales of the Henderson. From present indications at least 25 Hendersons will be placed in Bridgeport for 1916, and the estimated allotment of Excelsiors for Bridgeport alone is placed at about 75.

Kellogg states that the sidecar is a ready seller in Bridgeport and that it has in many cases proved an aid in closing a motorcycle sale.

ONEIDA CLUB FORMED

RHINELANDER, Wis., Feb. 8.—The Oneida County Gun and Motorcycle Club has been organized with a charter membership of fifteen. The Briggs bicycle shop is the temporary quarters of the new organization. It is expected that the membership will reach thirty-five before the riding season opens.

EVERYBODY'S HOPPING AT THE MAJESTIC FACTORY

Export Business in Side Cars is Steady—Orders Have Been Closed for 400,000 Pairs of Pedals and Boxed Pedal Rubbers Are Now Adding to the Activity

WORCESTER, Mass., Feb. 8.—In spite of general conditions which tend to hamper production and transportation, particularly to foreign points, the Majestic Mfg. Co. finds a steadily increasing export business making demands upon its shipping department and hardly a week passes without shipments of Majestic sidecars to remote corners of the world. One of the latest foreign orders to be filled called for 18 of the company's Gunboat models, for a distributor in South Africa, and a few days ago three of the Majestic Windsplitters were sent to the Reading Standard agent in Amsterdam, Holland.

A Banner Sidecar Year

Sales Manager O. A. Jones, of the Majestic company, is of the opinion that 1916 will be a banner sidecar year in view of the excellent performances given of late by the third-wheel combinations under all conditions of weather, and because of the rapidly spreading spirit of sociability among motorcyclists.

"The present demand convinces us that we will experience no difficulty in selling all the Majestic sidecars we will be able to manufacture this season," said Mr. Jones in discussing the outlook with a staff representative of **Motor Cycle Illustrated,**" and if the steel men will only hustle along their shipments there is no good reason why we can't hang up a new sales record."

One of the most active Majestic departments these days is that which handles the company's pedal business. The firm started to market pedals in January, 1915, and is now assured of practically a capacity output for the present season. Rubber pedals were produced exclusively at first and an attractive rat-trap type was added later.

Majestic Pedal Rubbers as Packed

Now the company has taken up something of an innovation by offering pedal rubbers, neatly boxed, and in both the red and gray colors. Each box contains four rubbers, and the neatness with which they can be handled and displayed make them an excellent selling proposition for the jobber or dealer. One of the accompanying illustrations shows how the rubbers are boxed for the trade.

Big Pedal Rubber Contracts

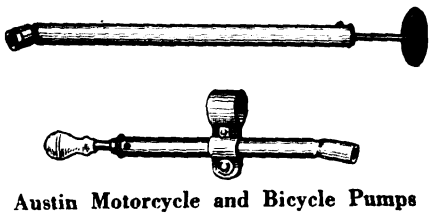
The Majestic company has already contracted for about 500,000 of the pedal rubbers, and it is estimated that in the neighborhood of 800,000 rubbers will be needed to cover the demands for the season. The first of the new boxed rubbers went out about ten days ago and the factory is now swamped with orders for them.

At the time of the Chicago show the Majestic company had booked orders for 200,000 pairs of pedals, and when the New York show rolled around the orders had mounted to nearly 400,000. As a result a number of fat pedal orders had to be passed over during the week of the New York show.

DEMAND FOR AUSTIN PUMPS IS HEAVY

Livermore Company Kept On Jump Filling Orders for Both Motorcycle and Bicycle Inflators—Novel Features of Construction

BOSTON, Mass.—Business in Austin pumps has assumed such proportions that the Horace F. Livermore Co., of 65 Pearl street, this city, has been giving it more than the usual attention. J. P. Robinson, who is behind the sales end of the firm, states that it has been difficult to cope with the demand for both the motorcycle and bicycle pumps. The difficulty has, however, nothing to do with lack of stock, for the Livermore firm is a heavy handler of brass in other forms than the pumps and is well equipped in both stock room and shop.



Austin Motorcycle and Bicycle Pumps

The Austin pumps, made with two clips for motorcycle and a single clip for bicycle use, are characterized by being tubeless. In place of the usual tube with connector, these pumps are made with a bend near the lower end and the extremity is provided with a novel rubber joint to fit over the tire valve. The extremity is offset at such an angle as to allow the part fitting over the valve to remain vertical, while the upper part or pump barrel is in such a position as to give the user a direct and straight-line thrust and pull on the plunger in a comfortable position. The rubber joint is so constructed that it will be leak-proof, even if the pump extremity is not set squarely over the tire valve, and thus the maximum of effect is had at all times.

In the motorcycle model, made with a T-handle, the rubber joint is made removable, so that it may be replaced in the event of wear. In the bicycle model, this part is not removable, being shellacked in place. The finest grade of rubber is used in making these joints. On both models of pump the pressure begins before the plunger has traveled down one inch on the stroke. This ensures the user getting the maximum of pressure for each stroke.

The Livermore firm is sending the Harley-Davidson Motor Co., of Milwaukee, Wis., 2,500 of the motorcycle pumps each month, the Austin pump being standard on this make of machine.

TO ESTABLISH DAYTON MOTORBIKE AGENCY

LOS ANGELES, Cal.—W. H. Jackson, of the Dayton factory branch in San Francisco, is in this city calling upon the trade to place the agency for the Dayton Motor Bicycle. He is riding one of the little front-drive mounts, of course. Several of the live dealers are favorably impressed with the machine and there is a brisk competition for the agency.

The head salesman of one of the local agencies took one of the bikes out for a spin and on his return said: "After trying it out on the level, I was satisfied that it had plenty of power, plenty of speed and handled well. It is either on or off and so simple that a child can control it. A salesman with a 1916 lightweight from another house joined me and we negotiated Flower street hill, both getting to the top on high. This is a fair test and a very good performance for the small motor."

HILL-CLIMB PLANNED FOR LOS ANGELES CLUB

LOS ANGELES, Cal.—As soon as the rains slack off the Los Angeles Motorcycle Club will hold a hill climb, under F. A. M. rules and sanction. Arrangements are in the hands of a committee, George Rubsch, chairman; Tommy Butler, Lester Miles and Wells Bennett. Two events will be for stock machines with 4 to 1 gear standing and running starts respectively, and the third will be a free-for-all, regardless of gear, best time to the top to determine the winner. The hill will be so steep that no stock machine is expected to make the top. All dealers are uniting to put up a bunch of prizes that will make it a grand event. As soon as the Ascot track is in good shape a race meet will be pulled. Arrangements are now being made for this.

DETAILS OF NEW CRISTMAN BILL

New Measure If Passed By Senate Will Be Effective April 1; Provides for Adequate Brakes, Lighting and Registration Procedure

ALBANY, N. Y., Feb. 8.—As announced in last week's issue of this journal, unless all signs fail, a sensible motorcycle license law will be effective in New York State beginning with April 1 of this year. Although a $2.00 license fee was desired by the riders of the Empire State, a compromise was made at $2.50, the original Cristman bill, which was defeated last year, calling for an annual fee of $5.00.

That the new Cristman measure, favorable to the riders, has been drawn up, is due largely to the combined efforts of former F. A. M. Commissioner John A. Hall and **Motor Cycle Illustrated,** as well as a number of men prominent in politics who were interested in securing a just registration law for motorcyclists. Much credit for the new bill is undoubtedly due to Assemblyman Milligan, of Brooklyn; Secretary of State Hugo, and the deputy secretary, Mr. Parker. Some of the features of the bill, which has been called a model of its kind, are quoted in part as follows:

Defining the Motorcycle

"The term 'motorcycle' as used in this article, except where otherwise expressly provided, shall include all motorcycles. A motorcycle is a vehicle with two wheels, one following the other, propelled by other than muscular power, or such vehicle with a car attached to the side, front or rear, and operated on one or more additional wheels.

"The term 'owner' shall also include any person, firm, association or corporation renting a motorcycle or having the exclusive use thereof, under a lease or otherwise, for a period greater than thirty days.

"Every owner of a motorcycle which shall be operated or driven upon the public highways of this state shall, except as herein otherwise expressly provided, cause to be filed, by mail or otherwise, in the office of the secretary of state a verified application for registration on a blank to be furnished by the secretary of state for that purpose, containing: (*a*) A brief description of the motorcycle to be registered, including the name of the manufacturer and factory number of such vehicle; (*b*) the name, age, residence, including county and business address, of the owner of such motorcycle; (*c*) provided that, if such motorcycle is used or to be used solely for commercial purposes, the applicant shall so certify.

"No person shall operate or drive a motorcycle who is under sixteen years of age.

Provision for Registration

"Upon the filing of such application and the payment of the fee hereinafter provided, the secretary of state shall assign to such motorcycle a distinctive number and, without expense to the applicant, issue to the owner a certificate of registration, and a number plate at a place within the state of New York named by the applicant in his application.

"Registration applied for on or before April first, nineteen hundred and sixteen, shall take effect on that date and certificates issued on such application or under any application made prior to January thirty-first, nineteen hundred and seventeen, shall expire on the latter date. Registration thereafter shall be renewed annually in the same manner and upon payment of the same annual fee as provided in this section for registration, to take effect on the first day of February, in each year beginning with such date in the year nineteen hundred and seventeen; and the certificates of registration issued thereunder or issued between any such dates shall expire on the succeeding thirty-first day of January.

HENDERSON TACKLES THE FLOOD DISTRICT

First Machine to Get Through from Los Angeles to San Diego and Return After the Heavy Flood in Southern California; Had to Ford Many Bridgeless Rivers on Eventful Trip

During the 200 Mile Trip Christ Had to Raise the Machine Out of More Than One Mud Hole

LOS ANGELES, Cal., Feb. 8.—With all but one bridge out over the San Gabriel and Santa Ana Rivers and at every crossing of the main rivers in San Diego County, a Henderson machine and sidecar gave a wonderful demonstration of power and reliability last week, when it traveled from this city to San Diego and return, without being crippled in the slightest. It was the first vehicle to get through after the recent flood, and it was so covered with mud as to be unrecognizable.

E. A. Christ, of the Henderson Motorcycle Sales Corporation, was the driver, and Allen B. Monks, the sidecar passenger. Though the ordinary road distance is 137 miles, the machine covered 200 miles, owing to the detours which had to be made.

In some instances while fording rivers, Christ and Monks got into holes two feet deep and had to drag the three wheel combination with a hand over the carbureter; but not once did the machine fail to climb out of the farther side of the canyon without hitting as sure as on dry boulevards in sunny June. The rain was so heavy that Christ was wet to the skin in spite of the fact that he wore a big rain coat.

Crossing one river, the Los Angeles riders got into a hole so deep that the water rushed in over the rim of the sidecar. Only once were the fellows in a "ticklish" position and that was when they came near skidding off a cliff.

Speaking of the trip, after he had returned to Los Angeles, Christ said: "I really enjoyed the whole journey and wouldn't swap the experience I got for a big bag of money. The mud was so deep down Torrey Pines grade that we had to push the outfit down the incline, and had to clean the mud from under the guards three times. But the greater part of the distance we made under our own power. We left Los Angeles at 9:30 in the morning, got into La Jolla at 8:30 p. m., and made the short distance into San Diego early the next morning."

On Their Return to Los Angeles, Christ and Monk Were Heartily Congratulated By F. A. Sutphen and Geo. A. Klapp of the Henderson Branch

FARGO OUT OF SALES CORP.

LOS ANGELES, Cal.—Hugh A. Fargo has resigned his position with the Henderson Motorcycle Sales Corporation, of this city. He is continuing his activities as Henderson factory representative.

THE POWER BEHIND NEW DEPARTURE SALES

NUMBER FIVE IN A BIOGRAPHICAL SERIES CONCERNING TRADE LEADERS

Newspaperdom Lost an Aggressive and Keen-Witted Editor When C. F. Olin Shifted His Ambition From the Art of Writing to the Science of Selling, But His Friends Feel That Results Have Fully Justified the Course Chosen — His Success Due to Versatility and Hard Work in Equal Parts

NINETY-NINE out of every one hundred friends of C. F. Olin will probably agree that his unquestioned success in life has been due to versatility—backed up by unfailing confidence in the efficacy of hard work. The one hundredth friend will no doubt dispose of the matter by asserting that Mr. Olin has won out because—well, simply because he was Charlie Olin.

That is the comfortable, hand-in-hand way that Mr. Olin's friends have of considering him. And through it all the subject of discussion would smile good-naturedly—and modestly—and wind up by remarking that he didn't see what all the fuss was about.

A Start at Editorial Work

Which is only another way of remarking that any personal sketch of the sales manager of the New Departure Mfg. Co. is bound to have as many angles as international diplomacy—but with the angles considerably more interesting.

Mr. Olin was born in Hartford, Conn., forty-five years ago and for thirteen years was simply a healthy-minded youngster with all the diversified interests of a young American. Then he began to take an interest in the more sober aspects of life, and in his thirteenth year started to sell newspapers. Almost at once he acquired a liking for the smell of printer's ink and decided that he could not be satisfied simply with selling newspapers. He wanted to help make them.

A year ago he was engaged in reportorial work in Essex, Conn., and at the same time was building up a creditable newspaper business, employing boys to cover the various routes. In this way he managed to extend his newspaper business over five towns, never for a moment relaxing his personal interest in the writing end of newspaper production.

A Student at Columbia

He was still attending school and his parents frowned upon his ambition to learn the printing trade. In fact, when an opportunity presented itself for the youth to make such a start the parental objecions became so pronounced that the idea was for the time abandoned.

At fifteen young Olin took a position on the staff of the *Connecticut Home*, a Prohibition paper published at Willimantic. The paper had a large plant and was owned by Allen B. Lincoln, a man of high ideals and a wholesome outlook on life, to whom Mr. Olin gives credit for many of the policies to which he adhered successfully in later newspaper experience. That Mr. Olin's progress was rapid is proved by the fact that he became assistant editor before the ordinary term of apprenticeship was completed.

Some time later he left the staff of the *Connecticut Home* to assist his father in a store owned by the latter at Willimantic, but this mode of life did not afford him a sufficient outlet for his energies and he soon journeyed to New York City. In the metropolis he took up special newspaper work and at the same time entered upon a college course at Columbia. He did not go through with the course along the ordinary lines, but studied under tutors, devoting to his books every moment not needed for his newspaper work. The natural result of this over-concentration was a nervous breakdown, attended by complete loss of eyesight for a period of about three months.

The youth returned home, and when his sight was partially restored, took a position as editor of the Willimantic *Daily Herald*,

C. F. OLIN
He Is a Close Friend of the Dealers and Their Troubles Are His Troubles

succeeding George C. Hinman, the present attorney general. Subsequently Mr. Olin engaged in newspaper work in Hartford, and later became editor of the New Britain *Herald*. At this point his health again gave him cause for concern and he was obliged to abandon the position for one less arduous.

He accepted the editorship of the Bristol *Press*, then a weekly, and remained with that paper until he entered the employ of the New Departure Mfg. Co. as assistant to Mr. DeWitt Page, nine years ago. His progress since has been a matter of trade record, and little need be said of it beyond the statement that it has been consistent and at all times in keeping with the high ideals conceived in earlier years.

In connection with his newspaper work Mr. Olin was active in public enterprises, and in practically every town where he has lived and worked there are organizations existing today in testimony of his civic interest and executive ability. Perhaps the most notable example is the New Britain hospital, which was opened during the Spanish war under the direction of the Soldiers' Comfort Committee, of which Mr. Olin was chairman.

A Lover of Outdoor Sports

In spite of the vast amount of work that has been crowded into his life Mr. Olin has found time to participate in and foster outdoor sports, and at various times has been president of baseball, basketball and polo leagues. He has also promoted racing events, and dabbled in other amusement enterprises. At one time he was employed by a street railway company to hold children's carnivals in parks throughout New England.

Since associating himself with the New Departure Mfg. Co. Mr. Olin has devoted much time to a study of the requirements of dealers, and as a result there are few, if any, men in the trade today better fitted to discuss the intricate questions involved in retailing. In his many business trips throughout the country Mr. Olin makes it a point to see as many dealers as possible, in order to acquire the inside viewpoint, and once or twice a year he sets aside a period for concentration upon matters exclusively concerning the dealers.

Origin of "One Million" Slogan

It was close personal contact with the dealers throughout the country, together with a broad study of trade conditions, that led Mr. Olin to set up the slogan "1,000,000 Bicycles in 1916," which has already assumed national significance.

Mr. Olin is married and has four children.

When the matter of a personal hobby was brought up Mr. Olin smiled whimsically and remarked that he has time at present for only two diversions that might be termed hobbies—his family and an occasional quiet chat with friends.

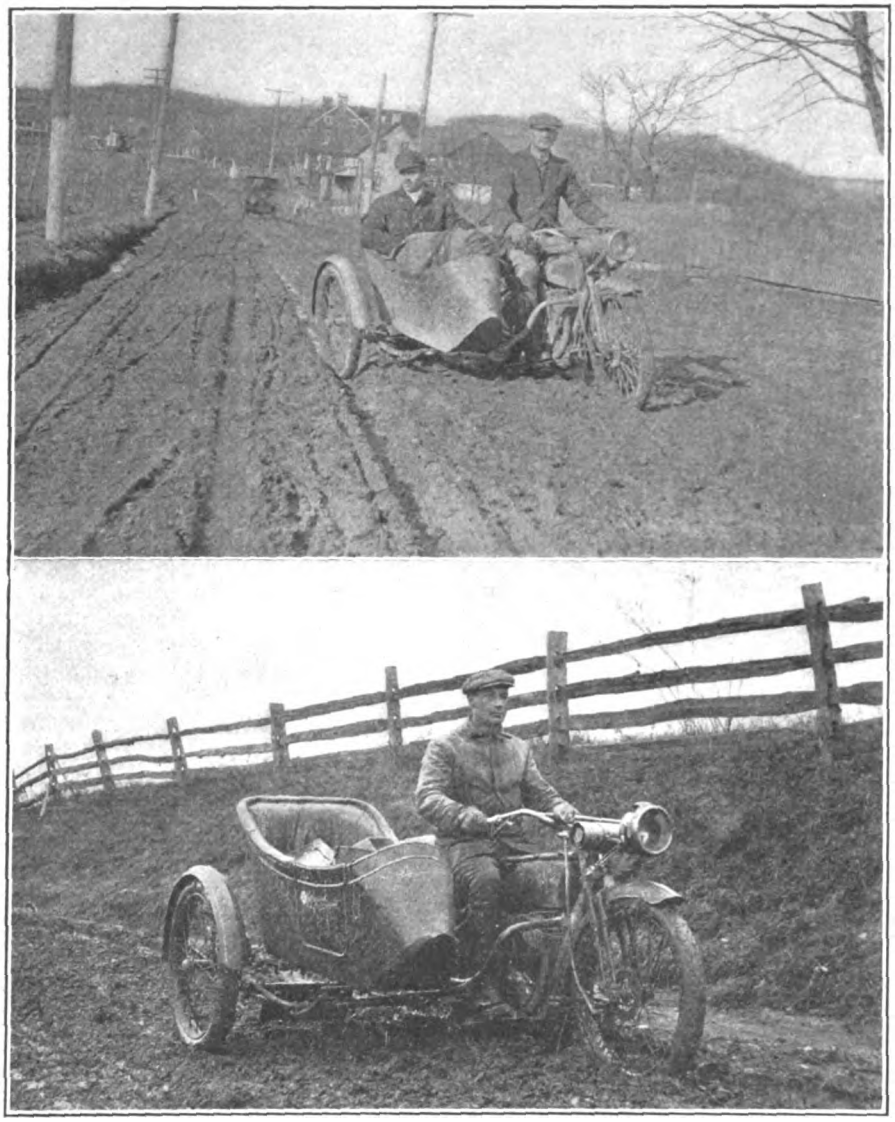
EIGHTY MILES OF CONTINUAL MUD-PLUGGING

Remarkable Efficiency Displayed by Reading Standard Motor on Sidecar Test Through Water and Mire That Frequently Submerged the Footboards and Coated the Motor

By V. CHARLES VOGEL
Of Reading Standard Sales Dept.



The Above Photographs, Which Were Taken During the Allentown Trip Made By Messrs. Vogel and Deysher, Show the Rough Going the Readingites Encountered

OFTEN I have had the pleasure of riding in a sidecar, attached to a good, fast motorcycle, while journeying along the fine country roads and enjoying the beautiful surroundings. Twenty miles per hour was just a nice pace, but the whiz of the large touring car following us seemed to awaken the speed germ, and before we were aware of the fact the speedometer was trying to show how far she could count; then would come the second sense which asks: What's the use of this daredevil riding on a pleasure jaunt—and we would let the car pass.

Possessing a machine noted for its hill-climbing abilities, we usually tried to find a sticker, but it seemed there was none that could get the best of us. We placed so much confidence in its climbing ability that we felt reasonably sure there was nothing that could stop us. After all kinds of fine-weather riding, hill-climbing, speeding and railroad sill riding, we decided to go through one of those much talked about mud tests.

The Mud Test

After patiently waiting, we finally received news that the road from Kutztown to Allentown was in such condition as to make it impossible for a motorcycle to travel it. Saturday, January 22, we decided to try our luck. The day was anything but pleasant. Six days of warm weather had turned the frozen earth into a mass of heavy mud, and the several showers we had on the morning of our trip made the roads seem like a river.

After taking on a good supply of oil and gas we dressed for the occasion and started out. One o'clock saw us whizzing up the pike to Kutztown at thirty per. Everything looked fine, and we saw no reason why we could not reach our destination by 3 p. m. Although the roads were muddy we had little trouble in covering same.

Again making inquiry as to road conditions, we were told that two automobiles had been towed in about noon of the same day. While this was not encouraging, we were by no means going to quit. At 2 p. m. we proceeded in a terrible rainstorm, prepared to meet every emergency. About four miles of hard road was before us, and we covered the distance in about as many minutes. This road led down in a valley and seemed to trail off into a stream. Upon seeking information at a farmhouse, we were told that the "stream" was our right road to take!

Well, we took it easy, and after covering about fifty feet of this mud and water we found ourselves in a cloud of steam, caused by water hitting the cylinders. Mudguards were of no use for the water splashed sideways, and the footboards being entirely under water sent up a perfect fountain spray. Another dash of water and the motor stopped; the water had short-circuited the plugs. After wrapping paper about the plugs, and covering same with clay, we had little additional trouble on that score.

First in Four Days

We gave thanks for our improved starter, for I don't believe we could have started the motor in the old-fashioned way. By pulling several miles on intermediate and low we finally reached Breinigsville, where we stopped to stretch ourselves. We were told that no other motorcycle had passed through the village for four days.

We again inquired as to road conditions to Trexlertown, and to our surprise found they were worse than those just covered. It seemed impossible that they could be worse, but at any rate there was no choice; we were between the two bad stretches and it was sink or swim. We expected the motor to "lay down" any minute from the gruelling test, but it didn't. It was there at every turn of the throttle and seemed to enjoy the sport.

We added another anti-skid chain and bid Breinigsville farewell. The water was not very deep at our starting place, and we were prepared for a flying start. After covering about 500 feet at 18 per, we struct a track running diagonally in the mud, and our front wheel followed it for almost 25 feet. Thanks to the absence of ruts, we managed to keep upright. We finally lifted the machine over the track and started again, the chains digging deep

Digitized by Google

into the mud and throwing it out like a water wheel.

Right they were; the roads were worse. Less water—more mud. We kept plugging in low gear as long as the wheel could get traction, but when mud wedged itself under the engine base so as to lift the rear wheel off the ground, we had to lift it on to the solid road once more.

Making 'Em Shut Up

Several times we stopped to pry the mud from the cylinders so they could get cooling air. It was almost impossible to see that we had a motor. A pedestrian informed us we had two miles to go to reach Trexlertown over roads no better, but more hills. At the farmhouses we created considerable interest and very few people expected us to finish our journey; but upon telling them of our past experiences they had little more to say.

Trexlertown greeted us with a splendid hill of yellow clay. We paused at the bottom to let an automobile (the first we had seen since leaving Kutztown) pass. "Better hook on, brother, and I'll tow you up the hill," was the passing greeting the driver gave us. "Much obliged," we answered, "we will try it alone." Slowly the auto started up the hill on low, only to have its motor say farewell for the time being. After helping him to find his trouble, we started up the hill and, by making fancy maneuvers, we finally reached the top.

Again we asked about road conditions. This time we were greeted with good information, for we learned we would have a hard road surface from Wescosville to Allentown, but upon further inquiry we learned we had four more miles of soft road to Wescosville. From there to our destination there was two miles of hard road. Upon looking at our watches we learned it was 5 p. m.; night was fast approaching. We lit up our lamps and determined to cover the next few miles as quickly as possible, but it was some pull. I suppose the machine was anxious to get on good roads, for twice it turned into private lanes, and we had to back out. We covered the next four miles by skidding from one side to the other and landing in ditches, where I expected every minute to be resting under the outfit.

Five more minutes and we struck solid roadbed, and away we sped into the darkness. The motor, once more in high speed, sounded strange and started off like wild. Ten minutes of rough riding found us in Allentown, and we were a sight to behold. Although drenched to the skin by the rain and mud, we had enjoyed the trip thoroughly.

What They Called Good

Upon reaching the hotel at 6.30 p. m., we changed our clothing and got busy looking over our maps for a return trip in the morning. Sunday morning greeted us with sunshine, and we decided to pull out before the roads thawed out, this time taking the road via Boyertown. We covered the first 12 miles, the worst part of the road, before the mud had a chance to do its dirty work. The balance of homeward journey was one of continuous ruts, and at no time did we have good roads, but we were satisfied to call anything good that had less than six inches of mud.

SPLITDORF PROFITS TOP THE MILLION MARK

Earnings of 1914 Were Nearly Doubled by Returns of 1915, and Net Profit to December 31 Last Was $1,134,029; Total Assets of the Company Are Considerably Over Six Million

DURING 1915 the Splitdorf Electrical Co., Newark, N. J., made a net profit of $745,107.55, very nearly twice as much as the total net profit to December 31, 1914, at which time the net was $288,921.84. The net profit to December 31 last now stands at $1,134,029.39, and it is expected that the company's earnings will stand well at the head of the 1915 records of the parts companies, especially when the amount of capital involved in the Splitdorf operations is considered. The assets of the company are held at $6,451,362.59, of which $24,561.03 is cash on hand and in banks, and $1,157,271 is in the form of investments. Loans total $589,125.95, and notes and accounts receivable together total $745,947.10.

Outside of the capital stock of $4,393,000, the liabilities total only $924,333.20, so that in investments alone, without considering the large value of the other quick assets, the company has a large surplus over any possible immediate requirements for cash. The condensed balance sheet as of December 31, 1915, is as follows:

ASSETS.

Cash in banks and on hand		$24,561.03
Advances to salesmen and sundries		3,345.87
Notes receivable		85,189.67
Accounts receivable		660,757.43
Loans		589,125.95
Insurance unexpired		12,813.23
		$1,375,793.18
Real estate and buildings, Plant No. 1	230,385.50	
Real estate and buildings, Plant No. 2	100,000.00	
		$330,385.50
Machinery and equipment	312,669.29	
Furniture and fixtures	9,606.00	
Benches	4,872.26	
Autos, trucks and motorcycles	11,100.00	
Merchandise (inv. 12-31-'15)	1,249,665.36	
		$1,587,922.91
Patents and good-will	2,000,000.00	
Investments	1,157,271.00	
		$3,157,271.00
Total		$6,451,362.59

LIABILITIES.

Capital stock		$4,398,000.00
Less treasury stock		5,000.00
		$4,393,000.00
Accounts payable		255,132.86
Notes payable		625,000.00
Reserve for customers' discount		9,911.36
Reserve for 1915 taxes		7,500.00
Personal taxes retained		357.48
Royalties accrued		26,431.50
		5,317,333.20
Net profit to December 31, 1915		$1,134,029.39
Net profit to December 31, 1914		388,921.84
Net profit year 1915		$745,107.55

This statement includes only the profits made by the Splitdorf Electrical Co. proper and $52,500 in dividends received from the company's subsidiaries. The latter report earnings totaling $131,597.97, beside the dividends paid and excluding the operations of the Sumter Works, in Sumter, S. C., belonging to the Apple Electric Co.

The general outlook for the 1916 season gives every reason to expect an even greater advance in Splitdorf business.

CANADA'S IMPORT TAX MAY CLIMB

Reported That War Duty May Go Up to 15 Per Cent.; Dealers Lay In Emergency Stock of Cycles and Accessories

Are the Passwords Going to Be "15 Per Cent. Tax?"

OTTAWA, Ont—In anticipation of rumored move on the part of Hon. W. T. White, Minister of Finance, to double the present war tax of 7½ per cent. on all motorcycle imports, a number of large Canadian motorcycle dealers have secured the delivery of good shipments of motorcycles and accessories from American factories. One Ontario distributor imported all the motorcycles of a certain make which he expects to sell this year and others are asking for early shipments.

A well-defined rumor has come from the Federal headquarters here to the effect that the 7½ per cent. tax on all imports of motorcycles, automobiles and supplies would be increased to 15 per cent. in the near future, and the report has severely jolted the trade. If this increase is made in order to provide revenue to meet Government war expenditures, it will mean that Canadians will be paying exactly 50 per cent. of the wholesale price of motorcycles more for their mounts than American riders. The regular duty is 35 per cent. and the existing war tax is 7½ per cent., making a total of 42½ per cent. which must now be added to the wholesale cost of a machine.

Tradesmen to Petition

Arrangements are being made in Montreal for a deputation of tradesmen to come to Ottawa to plead with the Government not to increase the tariff on motor vehicles or accessories. A further advance would put the automobile dealers out of business, it is declared, and the motorcycle dealers would also suffer greatly. The argument is advanced that, if the war tax is doubled, there would be a great falling off in imports and the revenue secured by the Government would probably be less than it was before the raise.

Toronto dealers are watching for possible developments and one or two have already made enquiries at the Government offices. No definite announcement has yet been made by the Minister of Finance but some dealers, particularly those in Montreal, have taken the reported increase as absolute fact already.

If the war tax is increased, it will prove a stab to what promises to be a very healthful season.

CANTON TO ADD MOTOR COPS

CANTON, Ohio.—In a vigorous campaign against speeders of all types, the city authorities are planning to add to the present traffic force a pair of men on motorcycles, whose duty it will be to gather in all who exceed the speed limits. An additional machine for these men will be purchased at once. Semaphores in the downtown district are to be tried out shortly, in order to enable the better handling of traffic.

BLAYLOCK GETS 81 PER ON HENDERSON

LOS ANGELES, Cal.—Gal Blaylock, of the Los Angeles County police, drove his 1916 Henderson at 81 miles per hour over a measured mile in an unofficial stopwatch test recently. He did this after overhauling a machine that was making 65 when it went through the trap. "If I had been on the old mount, they would have been clear to San Bernardino before I overhauled them," said Gal, "but with this one I can get my game and be home for supper."

RISDEN'S RUMORED MOVE IS NOT CERTAIN

LOS ANGELES, Cal.—There has been some talk in this city about a move of C. Will Risden to Main street, close to the other motorcycle stores. The rumors state that Risden will then lease his South Olive street place. Risden says, however, that it won't happen for some time, if it happens at all.

FORD JOINS NATIONAL COIL

LANSING, Mich.—E. M. Ford has resigned as sales manager for the Elkhart Mfg. Company, maker of Elkhart magnetos, at Monroe, Mich., and has become sales manager for the National Coil Company, of this city. Mr. Ford was connected with the Elkhart company since its organization in 1909. Through his efforts that firm booked more business in 1915 than in any previous years.

SOLVING THE USED MACHINE PROBLEM

How Washington, D. C., Dealers Cleared Their Floors of Second-Hand Mounts by Following a Simple Co-operative Scheme—Other Beneficial Results

ALL over the country the problem of the used machine has been one that calls for a satisfactory solution each season. Dealers who take used machines in trade lose little, if any, money when they resell these mounts when the season is good, but when the season is a poor one they find the machines on their hands. Sometimes it is almost impossible to sell machines, and then the dealer is faced with a considerable capital tied up and may even be pressed for ready money as a result.

What a Bad Spring Did

It had been the custom of Washington, D. C., dealers to furnish their regular customers new machines late in the fall, taking the old ones in trade and giving the rider a chance to use his new mount during the winter months. The machines taken in trade were sold off during the spring and summer. But the wet weather of the spring of 1915 caused the demand for used machines and new ones also to fall to a minimum, and the dealers were left with an exceptionally large stock of "second-handers" at a time when in previous seasons they had cleaned up all salable machines. So they got together and resolved to follow the plan suggested by one of their number. They followed it out, and it worked finely. Here it is:

Commencing August 1, no second-hand motorcycles were to be taken in trade by any of the dealers for the succeeding six months. In case any dealer sold out his stock of used machines before the end of six months he was to forward all further inquiries to one of the other dealers and receive a commission on any sales made as a result of his reference. Any customer desiring to turn in his used machine was informed that it would not be taken in trade, but that it would be sold for him on a commission basis.

Shopping Without Result

Right off a number of customers determined to get a machine as in former years, and shopped around from one dealer to another, in the hopes that they could get away with it with some agent more anxious to make a showing than the others. After going the rounds, these riders found that none of the leading makes could be secured, except on the basis outlined above. Although there was no verbal or written agreement among the dealers, not a single case came to light where a dealer failed to observe the resolution.

The riders soon saw that the Washington dealers meant business. A great many of them disposed of their mounts to friends and acquaintances and afterward purchased new ones. At the expiration of the six months, on February 1, the dealers find themselves with their floors practically cleared of used motorcycles. They have now resumed taking in used machines, and, with decks cleared for action, expect the best year's business in the history of the motorcycle trade in the National Capital.

Dealers Working Together

During the six months' period mentioned the spirit of co-operation and helpfulness engendered developed into the most cordial feeling between business competitors, who were formerly by no means friendly. As a result, several "get-together" dinners have been held at the local hotels, and an interchange of useful information relating to credits and various trade abuses has taken place. The slow-pay and "dead beat" artists, who operate freely in motorcycle circles in this city, will find their scope now curtailed considerably.

WHERE HARLEY-DAVIDSONS HAVE THEIR HEADQUARTERS IN BOSTON, MASS.

Digitized by Google

NOTES OF THE TRADE IN WASHINGTON, D. C.

HOWARD A. FRENCH & CO., of 424 Ninth street, N. W., have opened a service station in rear of their large story and are now ready to receive patrons and visiting riders. They will give the equivalent of Indian factory service hereafter. The service station is in charge of F. Hippler, who for some time has been in charge of the firm's Baltimore repair shop. J. McLeod Seabrook is continued as manager. The staff is being kept busy demonstrating the Powerplus Indian and is taking care of numerous inquiries concerning the Featherweight two-stroke.

THE HAVERFORD CYCLE CO. has sent in an order to the Excelsior factory for twenty-five of each of the Excelsior models for immediate delivery. Although this firm has a large supply of 1916 models on the floor, Manager Charles H. Cross has determined to insure himself against any possible advance in price due to the increased cost of materials and has therefore placed large orders for both motorcycles and bicycles. "Until this stock is exhausted," says Cross, "no advance will be made to customers."

COLUMBIA AUTO & SUPPLY CO., handling the Reading-Standard, has recently opened a new store at H and 13th streets. With the advent of warmer weather, the firm has found that sales have greatly increased both in the motorcycle and automobile supply line, in the new store as well as in the double store at Irving and 14th streets, the original headquarters. Sales for 1916 are expected to far exceed the deliveries, and the Columbia house is warning its customers to buy early. At the Irving street store, Westminster bicycles are handled in addition to the Reading-Standard motorcycles. Accessories in both the cycle lines are also going well.

AUGUST ZIMMERMAN, Harley-Davidson agent, at 912 Ninth street, N. W., will devote his store entirely to Harley-Davidson repairs and service hereafter. Only genuine Harley-Davidson parts will be stocked and only slight emergency repairs will be made to other makes of machine. Zimmerman does all work at cost price, and his repair business has grown so that it has exceeded the capacity of the shop. His 1916 sidecar sales have been very gratifying to date.

AUGUSTA, GA.

E. W. WATSON, of 222 McIntosh street, is doing well these days. He has several new riders added to his flock and many of his old customers are trading in for 1916 models. "The weather is fine, these days, and the roads in good shape," says Watson, "so things all point toward an early and a fine season."

LONG BEACH, CAL.

E. D. MALTBY, Flying Merkel agent, has taken a larger store at 342 Locust avenue. He has fixed up a complete repair shop and an attractive salesroom in the new quarters and is now busy giving demonstrations. Maltby formerly had his shop at 320 Locust avenue.

KANSAS CITY, MO.

E. B. SAUFLEY, of the Saufley Supply Co., handling the Excelsior, will shortly issue a new catalogue in which the "Bix X" and parts of various machines will be given much space. The new lines of bicycles have not been advertised as yet by the firm and this is one of the main reasons for bringing out the catalogue. The Pierce and Excelsior bicycles are the leading ones handled.

Neat Interior of Indian Agency of B. Slotnick, at 5306 Fourth Avenue, Brooklyn, N. Y. Indian Bicycles Are Also Handled—The Proprietor Is at the Left

Dealers

FITTING KICK-STARTERS TO OLD MODELS

WASHINGTON, D. C.—Howard A. French & Co., Indian dealers in this city, are making special concessions in their service department to owners of 1914 two-speed Indians who wish a kick-starter fitted. During the dull season, they are putting on the latest model of kick-starter for $12 and have several sets on hand at all times.

This insures the completion of the work in short order and the rider is not deprived of the use of his mount for any great length of time.

SCRANTON, PA.

JOHN RAWLING, who handles the Indian on Penn avenue, is patting himself on the back these days. He exhibited at the Scranton Auto Show and his waking hours have been spent demonstrating and answering questions on the Indian ever since. "The three-speed Powerplus twin attracted just as much attention as any of the big cars," said Rawling, "and the returns from showing have been fine."

STOCKTON, CAL.

BRANCH'S INCORPORATED is planning to dispose of its motorcycle business at 333 East Webber avenue. Pressure of other interests which require the firm's full attention is the reason. The Excelsior line is handled and a fine business has been built up for these models in the company's territory.

BRONX, N. Y.

GENE COUGHLIN & CO., Harley-Davidson representatives for this section, have incorporated, to deal in motorcycles, bicycles and sporting goods. Capital is $1,500. Incorporators are: Gene J. Coughlin, Mae R. Coughlin and William S. Grau, all of this city.

ORANGE, CAL.

T. W. PARSONS, handling the Harley-Davidson, is increasing his establishment. He will have increased shop room and an upstairs office when the alterations are completed. A line of bicycles and supplies are handled by Parsons.

YONKERS, N. Y.

ARCHIE A. HANNA, Indian representative in this city, has just received an order for nine new Indian twins for the use of the Yonkers police department.

DENVER, COLO.

ROCKY MOUNTAIN MOTORCYCLE COMPANY has taken the Denver agency for the Cygnet Rear Car.

Section

NEW YORK POLICE TO GET 68 MORE INDIANS

NEW YORK, Feb. 4.—The New York Sporting Goods Co., Indian distributors, at 15 Warren street, has just been awarded a contract for 68 new twin models for the New York Police Department. The equipment is to be the same as that used on previous police machines. The firm has also a back order for 24 machines, making a total of 92 to be delivered to Police Headquarters as soon as possible.

This makes a total of 217 Indians for the use of the metropolitan police. According to the statement made by the department, 107 machines which were in service made 10,000 arrests and the fines collected aggregated $175,000. The average upkeep per machine during 1915 was $25.

SAN FRANCISCO, CAL.

"EVERY agent, from either in or out of town, with whom I have come into contact recently has expressed confidence that as soon as the weather clears up and roads are in condition for a rider to go out without being mired or drowned, there will be a brisk business in motorcycles," says J. D. Fraser, manager of the San Francisco house of the Appeal Jobbing & Mfg. Co. "Some of these dealers say they have deposits on a number of machines, but deliveries are not desired now, as the machines cannot be used. Prospects seem bright for business as soon as old Jupe Pluve gets tired of his job and retires for the season."

PACIFIC MOTOR SUPPLY CO. has just inaugurated a sale of 42 second-hand machines, obtained from the San Francisco police. These mounts were obtained at the main house of the firm when the police obtained new Indians. The used mounts include six Thors, six Indians and thirty Harley-Davidsons.

TOLEDO, O.

UNION SUPPLY CO., Indian agent on Superior street, has separated its motorcycle and bicycle departments from other parts of the firm's business. A room measuring 120 by 20 feet has been fitted up in the basement as storage space, and a modern motorcycle salesroom is now under preparation.

NEW ORLEANS, LA.

FRED M. MILLS, former F. A. M. Commissioner and Secretary of the National Capital M. C. of Washington, D. C., is now in this city and is enthusiastic over motorcycling prospects in and around New Orleans. He says that the field is quite undeveloped and that an enterprising dealer will have a splendid opportunity to work up a big trade here, as roads are good and all the year round riding is entirely feasible.

INDIANAPOLIS, IND.

H. L. DIPPLE CO., Harley-Davidson agent, has just sold the Miller Tire Co. in this city a three-speed model with parcel car for use in delivering goods. This is the first delivery van of this make that the Dipple firm has landed in Indianapolis this season, but negotiations are under way toward attaching these vans to Harley-Davidson mounts now in service in other companies. The Miller rig will be used to render first aid to motorcyclists and automobilists on the roads around this city also.

LOS ANGELES, CAL.

PASSMORE & SAYRE, local Harley-Davidson dealers, have had much attention attracted to their show window which they trimmed up recently. A 1916 three-speed twin was the feature, the trimmings being black and white. White vases with chrysanthemums were attractively placed in the window, and there were ribbons leading from the motorcycle to cards tacked on the floor, pointing out the strong points of the Silent Gray Fellow. Salesman Eddie Ordway put over this decorative scheme.

AUBURN, N. Y.

H. H. PULLNAN, who recently opened a motorcycle and bicycle garage in this city, has called his establishment the Pirate Motorcycle Exchange. His headquarters are at 38 Orchard street. He is anxious to receive catalogs and agency propositions.

ESCANABA, MICH.

D. F. VILLEMUR, well known as a motorcycle agent in this city, has taken on the Cygnet Rear Car for 1916. Villemur is Indian distributor for this section.

PORTLAND, ME.

EARL RUPE, Harley-Davidson agent for this city, has moved to his new location on north Meridian street, from his former place on West Main street. His new quarters are larger and better equipped than the old.

JOHNSON CITY, N. Y.

B. E. JEWELL, of Binghamton, has opened a motorcycle and bicycle store in this city, with Fred Mann as manager. The Excelsior line of motorcycles is handled in both this and in Jewell's main store.

BINGHAMTON, N. Y.

BINGHAMTON dealers propose to stage a motorcycle and bicycle show in the Spring, the date to be set later. For that purpose an association known as the Binghamton Cycle Dealers' Association has been formed with Frank T. Abbott as president. Frank S. Bump as secretary, and Burt Jewell as treasurer. The last cycle show was held in this city in 1897.

RACINE, WIS.

L. C. RICE COMPANY, Indian agent, has taken on the Cygnet Rear Car representation for 1916.

ALHAMBRA, CAL.

C. E. SECHLER, who is Harley-Davidson agent in this city, is busy night and day on repair work these days. Sechler, who is also representative for the Dayton bicycle, is planning to pull off a bicycle meet on Bicycle Day, February 29.

HAMMOND, IND.

WALZ & SLIGER, Excelsior representatives in this city, have taken the agency for the Cygnet Rear Car.

REDONDO BEACH, CAL.

J. H. PETERMAN has been appointed local agent for the Miami Power Bicycle.

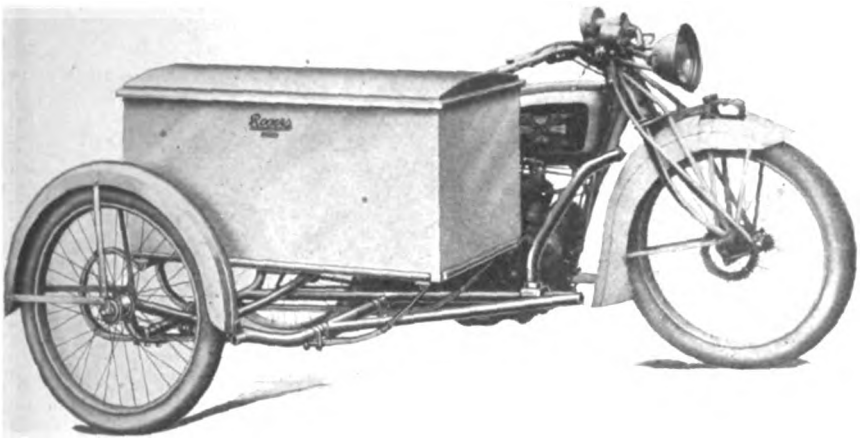
NEW ROGERS VAN IS READY FOR MARKET

Latest Commercial Model, Listing at $65, Has Autogenously Welded Chassis and Vanadium Steel Springs—Other Features



DELIVERIES, on the Rogers Model S. a new commercial van made by the Rogers Mfg. Co., of 328 West Madison street, Chicago, Ill., can now be made, according to advices just received from the company. This van has a chassis which is practically the same as that for the regular pleasure car and is built upon the exclusive Rogers method of all-steel, autogenously welded construction.

By this method the chassis becomes practically a unit, in which, instead of brazed joints, the reinforced tube ends are oxy-acetylene welded. The molecules of metal are so fused that the connection ceases to be a joint and is to all intents and purposes one piece of metal.

The springs used are the firm's vanadium steel type, of leaf construction. They are heavy enough to meet all the requirements of commercial service. The frame connections are the Rogers No-Strain type of ball joints, by which the chassis is relieved of all twisting strains, and attachment or detachment is a matter of two minutes.

The wheel has the Rogers solid steel hub with extra heavy spokes and CC rim. The price is $65 finished in colors to match any standard motorcycle.

In the Model S car, the van body is interchangeable with the pleasure body fitted to the regular Rogers sidecar. It is not necessary to change the springs in doing this. Attention is called to the fact that this interchangeable feature applies to the Model S only.

GOODYEAR BUILDING IS NEARLY READY

ATLANTA, Ga.—The new building for the Goodyear Tire & Rubber Co., on Peachtree street just north of Baker, is nearing completion and will be ready for occupancy in a few days. Manager J. J. Taylor is completing preparations to shift the entire stock to the new branch as soon as the building is turned over to him.

A CATCHY INDIAN COVER

"WHEN GRANDPA RODE THE FEATHERWEIGHT"

EIGHT CARLOADS SHIPPED

WESTFIELD, Mass., Feb. 8.—The Westfield Mfg. Co., makers of Pope motorcycles and bicycles, shipped eight carloads of bicycles last week. Two of these carloads went to the Pacific Coast, two were shipped to New York and one to Canada.

TWO MORE FOR AKRON

AKRON, Ohio.—Two new companies have been oragnized here recently to enter the tire field, one being the American Rubber & Tire Co., which was incorporated with a capital stock of $500,000, and the other the Berkshire Rubber Co., capitalized at $100,000. Both companies plan to enter the tire field at once. The Berkshire company numbers among its officers C. M. Linthicum as general manager, who was a department head at the Goodrich plant for some years.

CONTINENTAL RUBBER ELECTS

SANDUSKY, Ohio.—The Continental Rubber Co., which was recently incorporated with a capital stock of $500,000, has organized by the election of the following officers: J. J. Dauch, president; G. W. Doerbach, vice-president; Charles Sprague, secretary; Joseph T. Sloat, treasurer. These officers, with C. B. DeWitt and T. F. Weadock constitute the directors.

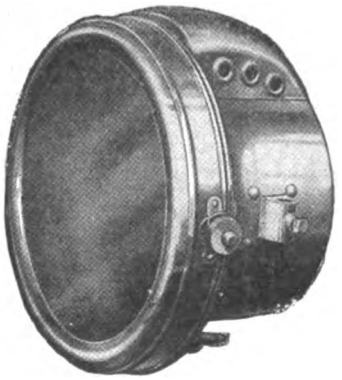
SUPERIOR HEADLIGHT HAS FEW PARTS

No. 100 Motorcycle Lamp Gives Beam of Great Carrying Power and Has Lasting Nickel Finish—Made on Interchangeable System

STURDY construction combined with simplicity and excellent illuminating powers are features of the No. 100 Superior headlight, produced by the Superior Lamp Mfg. Co., of 136 West Fifty-second street, New York. This model, like the other lamps bearing the Superior trademark, has been subjected to long tests in motorcycle service and the results of these tests have been embodied in the construction of this acetylene headlight.

The No. 100 has an 8-inch front and is 5½ inches deep. It is made in but five parts, on the interchangeable system of manufacture, so that in the event of a part needing replacement, the user can obtain a new one which will fit perfectly and may replace the part himself. The lamp has a silver-plated bezel flange behind the door, this flange being designed to assist in distributing the light. A beam of great carrying power is had from a Mangin mirror reflector. The material used in the construction is heavy gauge drawn brass, no steel being used whatsoever. The finish is all-nickel. Riveting is used throughout, no solder being permitted in Superior constructions.

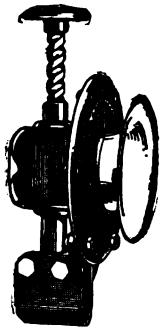


Superior No. 100 Headlight

The No. 100 headlight is furnished with double props to take a fork or twin bracket, or can be had with single back prop for flat bracket. The list price is $4. Jobbers and dealers who are interested are requested to write to the firm at the New York address.

HECO HAND-HORN GIVES A WIDE RANGE OF TONE

FOR the varying conditions of motorcycle riding a signalling device having a wide range of sound or tone is desirable, and in making up the Heco motorcycle hand-horn, this sound range has been given great consideration. The Heinze Electric Co., of Lowell, Mass., manufacturing this horn, has so designed it that the tone varies from a purr to a loud noise at the will of the operator. The Heco motorcycle horn, officially known as Type HB-1, is positive in its action at all times. It lists at $3.



The Type HB-1 horn has a special toothed rotor arranged with its pivot vertically. This rotor incorporates a ratchet clutch whose mating part is driven by the spiral thread on the plunger or handle at the top of the body. When the metal handle of the plunger is depressed, the rotor is rotated and its teeth engage a screw contact on the diaphragm, giving rise to the sound. A short bell is used to project the sound. The ratchet clutch allows the handle to ascend without interference. The teeth on the rotor and the contact point are heat treated to resist wear.

WHAT NEW ZEALAND FIRM IS LOOKING FOR

A LETTER from the Nonpareil Motor Co., Coleman place, Palmerston, New Zealand, advises that the articles of American manufacture in which they are interested are as follows:

Complete bicycles with English brakes; bicycle frames with English brakes; full steel rims exactly the same shape as Westwood (English), nickel-plated, 28 x 1 1-2 inches W. O.; upturned fixed handlebars with rim brake attached, same as those made by Phillips, England; rim brakes only of the Phillips' type; N. P. steel pumps with Dunlop threads, 15 x 3-4 inches, 15 x 7-8 inches and 18 x 1 inches; embossed one-piece celluloid grips; enamelled steel mudguards; 1-2 x 1-8 inch roller chains; rat trap and rubber pedals English style; standard English frame lugs; 15 gauge spokes threaded and boxed in one gross boxes complete with nipples and threads, length 11 7-8 inches, 12 1-8 and 12 1-4.

Mr. E. S. Pees, proprietor of the Nonpareil Motor Co., wants manufacturers who can supply these goods to communicate with him, as there is a big demand for them in New Zealand.

BROWNIE'S SELLING CYGNETS

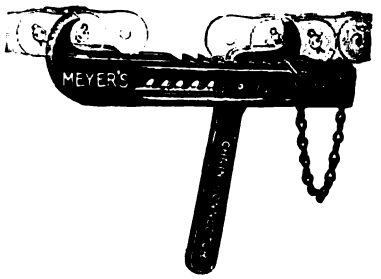
B. Karslake, Who Is Traveling for the Cygnet Rear Car Co., of Buffalo, N. Y.

MEYER'S CONNECTOR IS HANDY CHAIN TOOL

DEALERS and riders will be interested in the Meyer's lightning chain connector, the product of the Stewart Accessories Mfg. Co., of Detroit, Mich. This tool, which is made in various sizes to accommodate all forms of chain-driven mechanism, is unique and simple in construction and furnishes a ready means of repairing a chain breakage in 15 minutes or less. It can be set in place on the chain and the rider can then effect the junction of the separated parts with both hands, taking no further heed of the connector until the work is completed. The connector for motorcycles is No. 1 and lists at $1.50.

The Meyer's connector consists of two main parts. The first is a bar having at one end a hook to fit between the links of a chain and with the center section cut with ratchet teeth. There are two sets of these teeth, arranged back to back. A pair of bars on the side allow a pawl-fitted handle or lever to move by ratchet action along the teeth and at the same time retain the handle in place. There is a pin fastening to keep the handle in any desired position, this pin being fitted to a chain to prevent its being lost. The handle has a hook on its upper end similar to that on the bar.

In using the connector, the hooks are attached between links near the ends of the chain and the handle is then operated, drawing the ends of the chain close to each other. The pin-fastening is set in place and the work of fitting the chain ends in proceeding with. The connector is released by pulling the pin. The price of $1.50 includes sending by parcel post from the maker.



Meyer's Chain Connector

HOLLAND FIRM WANTS MACHINES

Among recent trade opportunities listed in the reports of the Bureau of Foreign and Domestic Commerce is one that comes from Holland. A Netherlands firm desires to communicate with American manufacturers of motorcycles, lanterns and supplies. Application should be made to the bureau, mentioning Opportunity No. 20046.

MORE DISCRIMINATION NEEDED

We have a letter from a large English agency, in which the following interesting comment is made:

"We should like to mention that most of the American firms seem to jump at agents and often place their goods with firms who have had little or no experience in motorcycles, so that a good machine often finds no ready market."

McNAMARA AND SPEARS WIN CHICAGO GRIND

With 72 Points Australian Team Captures Outlaw Six Day Race; Lawrence-Magin Take Second Money, and Cameron-Kaiser Third; Riders Cover 1542 Miles and 1 Lap in 72 Hour Classic

At the Start of Chicago's Six Day Bicycle Race, Thursday, February 3. McNamara Is the Third Rider From Left

CHICAGO, Ill., Feb. 9.—Reggie McNamara and Bob Spears, of Australia, captured Chicago's six-day grind, which ended at the Coliseum last night, by accumulating 72 points in the Berlin system of finish. Lawrence-Magin, with 55 points, were second, while Cameron-Kaiser copped third money to the tune of 46 points. Hanley and Madden hopped into fourth position with 42 points; Coburn-Smith were fifth, having piled up 40 points, and Ryan-Thomas accounted for sixth place, with 39 points. Six teams figured in the finish.

Had to Restart Finish

The Berlin finish had to be restarted after the riders had been pedaling for five minutes, for none of the cash chasers wanted to set the pace. They crept at such a cautious pace that Kaiser and McNamara fell from their wheels.

Fourteen sprints of 15 laps each were made in the finish. Seven thousand fans witnessed the final hour's riding. The score for the 72nd hour was 1,542 miles and 1 lap.

This was the third six day race to be ridden in Chicago. It was an "outlaw" grind, the promoters having failed to secure a sanction from the National Cycling Association. The teams rode twelve hours at a time. They started on Thursday evening at nine o'clock and rode until nine the next morning. On Saturaday, and the four succeeding days, they pedalled from four in the afternoon until four in the morning, while on the last day they started at 11 a. m. and finished an hour before midnight.

The attendance at the race was not up to the expectation of the promoters.

Twelve Teams Competed

Twelve teams started in the Chicago six-day bicycle race, shortly after nine o'clock on Thursday evening, February 2. These teams were as follows: Lawrence-Magin, San Francisco-Newark; Lawson-Verri, Swedish-Italian; McNamara-Spears, Australian; Cameron-Kaiser, New York; Ryan-Thomas, Irish-American; Madonna-Ohrt, Italian-American; Wohlrab-Kopsky, German - Bohemian; Piercey - Cavannagh, Irish-Australian; Young-Corry, American-Australian; Smith-Coburn, Newark; Grimm-RuddiRusse, Austrian-American; Hanley-Madden, the "masked marvels."

Drobach was to have been teamed up with Corry, but he was so severely injured in a spill the night before in a preliminary sprint, that the track doctor forbade his entering the race. Corry then teamed up with Young, whose original partner, Norman Anderson, was seized with a sudden attack of indigestion and declared himself unable to ride.

The cyclists rode until nine o'clock on Thursday morning, when the leaders had covered 266 miles and 9 laps. The Grimm-RuddiRusse combination was the only one to lose a lap during the first twelve hours. The team of Cavannagh and Piercey was broken up when the former was thrown from his machine and fell heavily on the track, sustaining a slight concussion of the skull. The mileage standing at the end of the first twelve hours was more than thirteen miles behind the record.

The riders again appeared on the track at four o'clock on Friday afternoon for another twelve-hour session. Many primes were hung up during the half-day. But this, instead of increasing the speed of the riders, brought about a rapid succession of spills, in one of which Young was struck unconscious and put out of the running, leaving his partner, Corry, to scout about for another teammate.

Verri-Lawson Penalized

Verri walked off the track without the referee's permission, and when he returned his team was set back one lap, so that at the end of the 24th hour Verri-Lawson and Grimm-RuddiRusse were one lone lap behind the field, which had traveled 520 miles and 1 lap—17 miles behind the world's record.

When the cyclists resumed the grind at four o'clock on Saturday afternoon, Verri failed to make an appearance, stating that he suffered from injuries sustained in one of the many spills. Lawson immediately teamed with Corry.

Kopsky and Wohlrab were penalized one lap during the third session for a false

THOUSANDS OF DEALERS NOW LINED UP

"One Million Bicycles Committee" Estimates That Three Out of Every Four Dealers in the Country Will Co-operate—Prominent Newspapers Will Issue Bicycle Supplements

BRISTOL, Conn., Feb. 9.—Everybody is smiling about the headquarters of the "One Million Bicycles Committee," for the responses received from dealers in every section of the country are more than gratifying—they point to a great big, united effort to roll bicycle sales up to a mark that will have people sitting up and taking notice.

Olin Is Enthusiastic

"Replies have been received," said Secretary Chas. F. Olin, last Monday to a representative of this journal, "from more than half the dealers in the United States, stating that they will observe BICYCLE DAY with special advertising and selling initiative. From returns still coming in, one can estimate on a conservative basis that three out of very four dealers in the country will be lined up."

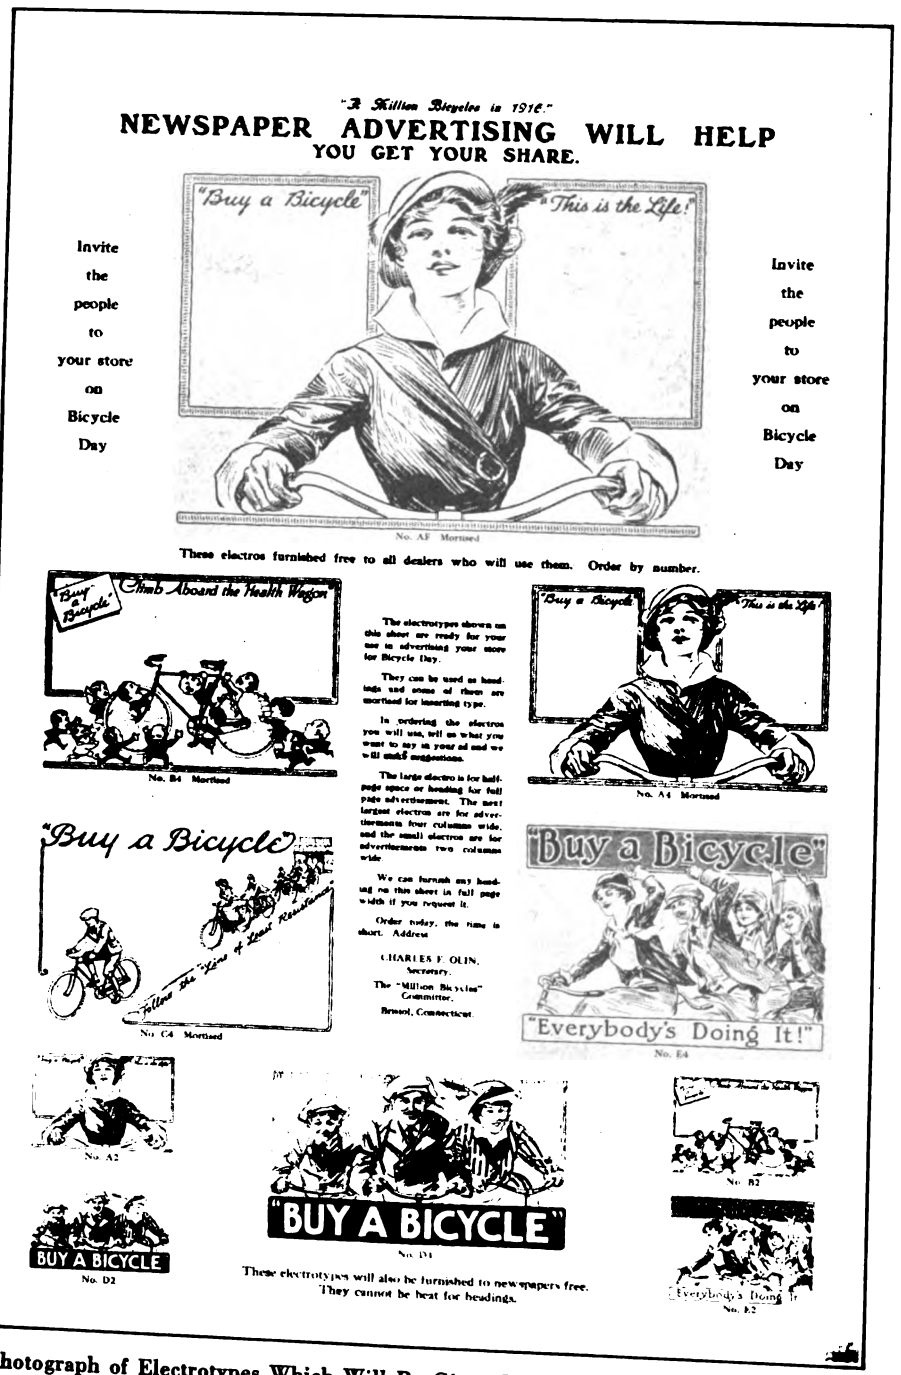
Back of the newspaper publicity campaign will be many of the most prominent papers, and some of them will issue special bicycle supplements just previous to BICYCLE DAY, in which the two-wheeler will be featured as it never has been before. Especially is this true where dealers are organized to pull together.

In connection with this newspaper campaign the committee has designed a series of electros that they furnish free to all dealers or newspapers who desire them. The committee has issued a proof sheet of these electrotypes, which is reproduced on this page and shows how attractive an ad can be made by them. The electrotypes can be furnished in any size, from single column width to a full page width. Dealers who request these electrotypes should state whether they want the committee to suggest copy to be used with them. In that case, they should indicate what they want brought out regarding their store and stock and any special features of BICYCLE DAY they have arranged. The committee will then make suggestions, incorporating all the information received from the dealers.

The selling talk contest has closed and the response by salesmen and clerks has been very gratifying, some excellent talks having been secured. The judges will be appointed this week and will make their awards as soon as possible.

Secretary Olin is now at work on a bulletin to be issued this week to all retail dealers, giving the best talking points used in the contest, also information regarding selling schemes that have proved popular and can be used on BICYCLE DAY, as well as suggestions for using the electrotypes in newspaper advertising, "dope" on suitable souvenirs that can be secured by dealers, and much other helpful material.

This will be the last general bulletin to be sent to the entire list of dealers. Everything that is sent out after that will go only to such dealers as have communicated with the committee and stated that they will observe BICYCLE DAY and work for "A Millian Bicycles in 1916." Any dealer, therefore, who has not yet sent in his name and who wants to get the full cooperation of the committee in his plans, should get in touch at once with the secretary, Charles F. Olin, Bristol, Conn.



Photograph of Electrotypes Which Will Be Given Free of Charge to All Dealers and Newspapers That Will Use Them. Application for These Electros Should Be Made to Secretary C. F. Olin, Bristol, Conn. Be Sure to Specify Width Desired

"ONE MILLION" SIGN SHOWN AT CHICAGO RACE

CHICAGO, Ill., Feb. 8.—Realizing that the scene of the six day bicycle race which has just finished here would be an ideal place for boosting the slogan, "One Million Bicycles in 1916," the Goodyear Tire & Rubber Co., through E. R. Stilwell, manager of its bicycle tire department, had erected in the Coliseum a huge sign bearing the popular slogan. The name of the Goodyear company did not appear on the sign, though the tire concern paid all the expenses connected with it.

VISITS GREAT WESTERN PLANT

LA PORTE, Ind.—Manager Tucker, of the Buckeye Motor & Cycle Company, of Akron, O., was one of the recent visitors to the big plant of the Great Western Manufacturing Company. The Buckeye firm is distributor for twenty-one counties in Ohio for the Adlake bicycle.

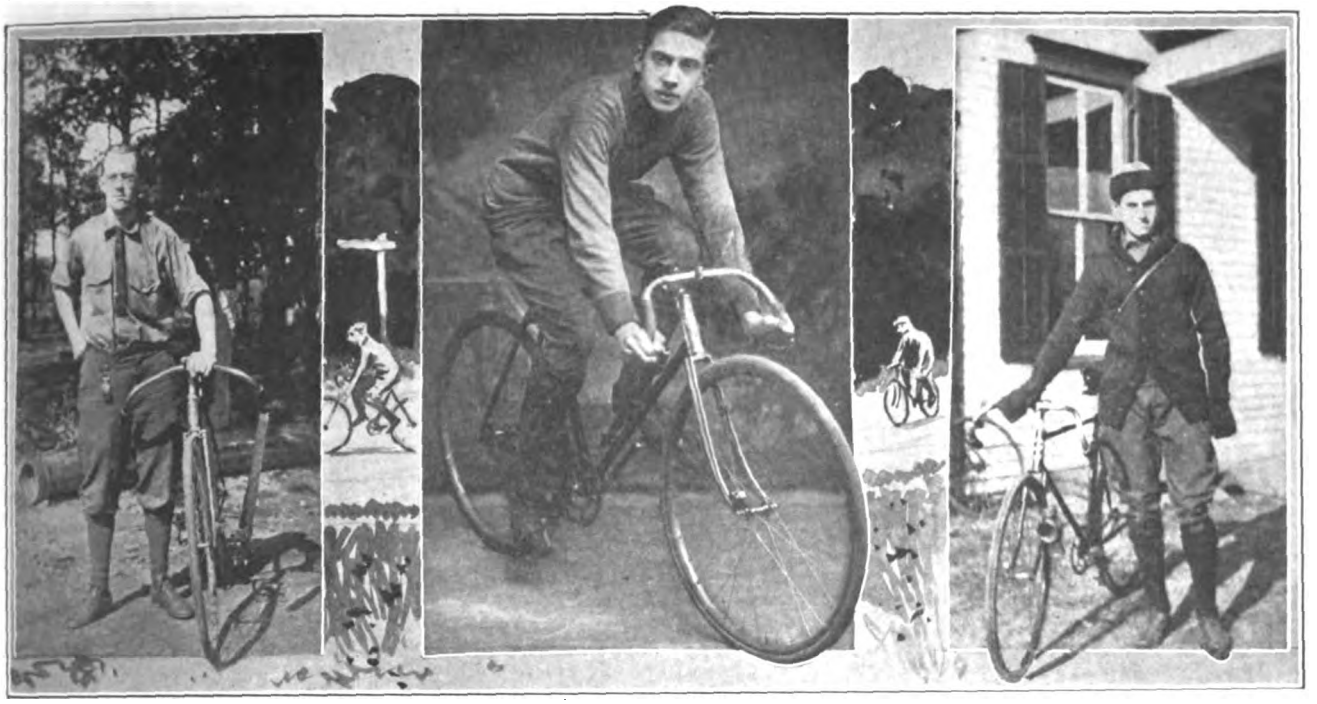
THESE THREE C. R. C. A. CYCLISTS RODE 13,680 MILES LAST YEAR



Fred M. Sanborn, 6,421 Miles

W. M. Winquist, 4,084 Miles

Sylvain Segal, 3,175 Miles

NEW YORK, N. Y., Feb. 9.—Fred M. Sanborn, of Baltimore, Md., and a member of the New York Division of the Century Road Club Association, was returned the winner of the National Century and Mileage Competition for 1915. He won the same competition in 1914.

Sanborn's Performances

During the course of the year, Sanborn covered 6,421 miles, of which 21 were single "centuries" and one double. The riding consisted of trips to Martinsburg, W. Va., to Philadelphia, Pa., to Hagerstown, Md., to Leonardtown, Md., to Winchester, Va., and included a nine-day tour through Maryland, Pennsylvania, West Virginia and Ohio.

He broke the inter-city records between Baltimore and Frederick, his time being two hours, 55 seconds; Baltimore to Hagerstown, five hours nine minutes; Baltimore to Philadelphia, eight hours seven minutes. Sanborn also won the Thompson Cup for the fastest 500 miles during the 1914-1915 season, creating a N. C. A. record by covering the 500 miles in 51 hours flat. Sanborn's mount is an "Emblem" bicycle with Palmer-Armstrong tires. As a member of the Crescent Bicycle Club of Baltimore, he took second prize in the annual championship races.

Winquist Takes Second

The second prize winner in the C. R. C. A. century and mileage competition is William M. Winquist, of Brooklyn, N. Y., who rolled up 4,084 miles, of which 15 were single "centuries" and 3 double. Winquist rides an Iver-Johnson Chater-Lea bicycle, equipped with Palmer-Armstrong tires.

Sylvain Segal, of New York, captured third prize, having covered during the year 3,175 miles, which includes 9 "centuries." In 1908 Segal was the victor of the mileage and century competition, and has traveled since that year more than 40,000 miles on his bicycle. Not contented with single "centuries," he has ridden quite a number of double, triple and quintuple "centuries." Segal holds the Garraty Trophy for having stacked up the largest number of centuries in two consecutive years.

The detailed results of the competition appears in the box below.

LAUNCH MEMBERSHIP CAMPAIGN

SAN FRANCISCO, Cal., Feb. 8.—The New Century Wheelmen have begun a hustling membership campaign. Two teams are now scouting around for genial cyclists, and the team securing most members will be royally banqueted at one of the local hotels. Ralph Welch is captain of one team and Harry Spence of the other.

NEW CENTURY BALL

SAN FRANCISCO, Cal., Feb. 8.—The annual ball and home trainer race of the New Century Wheelmen will be held on the evening of March 4. The home trainer race will probably be an inter-club affair. The following committee will have charge of the dance: John Coughlan, chairman; George Drury, Harry Spence, W. Hammitt, A. Binnetti, R. A. Greeninger, P. Morgan, L. Nelson and Carl Sayre.

BEAN & SON GET CARLOAD

SAN FRANCISCO, Cal., Feb. 8.—The Bean & Son Co., distributor for the Pierce bicycle in Northern California, has just received its first carload of Pierce machines. A second carload is enroute.

BICYCLE DEALERS

BRISTOL, Conn., Feb. 8.—Below is the second list of the bicycle dealers who have written to the "One Million Committee," pledging their co-operation and asking for the Committee's sales-making material. This new "Roll of Honor" is in addition to the one printed in these columns last week.

ALABAMA

City Cycle Shop, Gadseden Cycle Co., H. H. Harr & Co., Cliff Howell, J. D. Henderson, D. R. Moody, Murray & Oliver, Nance Hardware Co., Newell Furniture Co., Perkins Bicycle Shop, F. Di Rago, C. C. Sykes, Eugene Thoss, Jr., Tood's Gun Store. Tullis Hardware Co., G. L. Wynn.

ARKANSAS

Arkansas Cycle House, Bolls & Co., E. G. Bowers, DeLong Machinery Co., Durham Brothers, R. P. Jones, J. B. McDougal, W. W. Meriwether & Son Hardware Co., Silsby's Bicycle Co., Waldo Hardware Co., Will Wirsing. The Howell Co.

ARIZONA

C. F. Monrad Cyclery, B. Tilton, Walter L. Reid, Willcox Motor Supply Co., Arizona Motor-Cycle & Supply Co.

CALIFORNIA

Anakin Bicycle Supply Co., Anderson Vulcanizing Works, Angelus Bike Shop, Avakian Cyclery, G. M. Baker, Bakersfield Cyclery, Geo. V. Bell, C. A. Benzel, Frank Bill, Boston Bicycle Shop, G. Gardner Buckland, Bush & Bush, J. E. O'Connor, Crane's Cyclery, The Crown Cyclery, Cut Rate Bike Shop, Dahlstrom, Carlson & Sherling, J. A. Desimone, Duvall & Michels, J. G. Entler, Fix-It Shop, Frost Bros., Oscar E. Gille, Harry's Cyclery, Heise Bros., Houk's Cyclery, Homant Co., Corning Cyclery, H. G. Hunt, Jenkin Cyclery, Johnson's Cyclery, F. S. Jones, K. Kebo, Kern Cycle Co., F. J. Krueger, La Jolla Cycle & Repair Shop, Paul J. Leavens, Ed. Marty, Menlo Park Cyclery, Pacific Motor Supply Co., Inc., E. L. Parmelee, R. L. Perkins, Prummer Cycle & Sporting Goods Co., Maggini & Perkins, National Repair Shop, A. J. Nichols & Son, Ocean Park Cyclery, Okamoto Cyclery, G. W. Payton, Fred B. Pickle's Repair Shop, Unique Cyclery, Motoraid, Monrovia Cycle & Motor Co., Muenzer's Cyclery, Normart's Cyclery, E. H. Ramer, Redd Company, Inc., F. W. Rettinhouse, C. S. Richmond & Sons, San Juan Garage, Burt G. Sayre, Sheibley Bros, D. A. Smith, Fred H. Smith, T. Harold Smith, Geo. L. Snider, S. M. Sporting Goods Co., Stanton's Motorcyclery, J. A. Starkel, Steuck-Bernhard Co., Arthur L. Taber, Superior Cyclery, J. M. Tibbitts, Tompkins Cyclery, Tracy Motor Shop, Ukiah Auto Supply Co., Jack Vesty's Garage & Bike Shop, Walsh-Col Co., Ware's Cyclery, Wilson & Allen, Yale Cyclery, Zimmerlin Bros.

COLORADO

Ahring Bicycle Shop, A. D. Westbrook, Colorado Motor & Cycle Works, Diamond Cycle & Novelty Works, P. L. Hudson, The Colfax Bicycle Repair Shop, The Knabel Sporting Goods Co., The Loveland Novelty Works, Frank Neiheisel, Philip Allesbrook, W. S. Price, H. W. Vorbeck.

Boston & Hammond, Brady's Bicycle Shop, I. C. Bradley, Champa Cycle Co., Colorado Motor & Cycle Co., J. Eisenstat, Gongar & Todd, E. R. Kelly, L. A. Maedel, C. C. Mourning, T. G. Potter, C. B. Stutsman, E. J. Weightman Western Cycle Works.

CONNECTICUT

George W. Gater, E. A. Guthrie, J. P. Ledgard, Milford Auto & Repair Co., C. V. Pendleton, Jr., H. E. Welles, Geo. W. Wardwell.

J. H. Ames, The Jas. N. Boyer Garage, Inc., S. G. Brown, James F. McCormack & Son, Chas. G. Stewart.

FLORIDA

Bicycle Hospital, Chas. E. Rowton, Bradentown Cycle Co., D. P. Brewton, B. F. Condon, Dunn Brothers, L. D. Eckles, Grover Cox, The Helms Hardware Co., A. L. Hulick, George P. Johnson, Kennard Motor Co., Osceola Bicycle Shop, Frank J. Parker, Ramis Cycle Company, Richard's Repair Shop, Sanford Cycle Co., Shepard Cycle Co., Paul Weigand, Wilson-Biggs Co., Woods Cycle Co., Young's Repair Shop.

Jos. E. Anderson, C. D. Barber, Holmes & Saunders, E. E. Henderson & Sons, Dewey Kinnan.

GEORGIA

Alexander-Seewald Co., John F. Brickel, J. M. Clifton Hardware Co., C. C. Crawford Cyclery, The Fix 'Em Shop, H. E. Fourcher, F. L. Griffin, Hussey & Bawles, J. H. Betts & Co., L. E. Lowery, A. A. Parrish, Parrish Bicycle Co., A. W. Raborr, River Mercantile Co., F. O. Thompson, Vienna Bicycle Co., S. B. Volpian.

Balfour Hardware Co., L. J. Hood, Howell Bros., R. A. Mulkay, Geo. L. Riles.

IDAHO

Henry W. Baker, Carey Lumber & Hardware Co., Cycle Emporium, Dickerson Bros., George M. Dow, Gloystein Bros, Fred Perrault, A. P. Tyler & Co., White Hardware Co.

ILLINOIS

Abemathy Brothers, A. W. Wolfe, M. Anderson, E. C. Bailey, Wm. H. Bolles, C. L. Bossmeyer, Nic Bridar & Sons, H. J. Bressler, Jos. Cada, Claremont Cycle Co., Clausen Brothers & Co., A. B. Crosby, Decatur Gun Co., P. Vinhouse, C. A. Fenn, E. C. Firebaugh, Haskins Brothers, Henson Robinson Co., Hultz & Co., Hynes & Case, J. Ingels, O. H. Kathmann Co., Logan Square Cycle Co., Main Street Garage, F. M. Gilbert & Son, Henry J. Masching, S. W. Melendy, John Migliat, Modern Garage, Moore Brothers, J. A. Mussildon & Bro., Nicholas Hardware Co., Rylands & Son, P. A. Sallir, John C. Shultz, Harry H. Sheets, A. L. Snyder, J. Fred Stern & Sons, Streed & Sheppers, A. Swenson, Chas. F. Vail & Co., The Wasson Co., Edw. F. Willt.

F. W. Alderman, Arlington E. Lill, Barrett Hardware Co., Belcher Bros., E. J. Breman, Albert Booth, W. L. Chipp, A. R. Fagerholm, Ben. Filler, Humboldt Cycle Store, G. W. Kreider, H. W. McClintock, F. Monroe, F. W. Parker, Rage Cycle & Repair Shop, R. M. Stevens Co., Geo. H. Warren, S. L. Wilcox, Young & Dorris.

INDIANA

Arnold Motor Co., S. A. Beard & Co., Frank F. Cart, Ed. DeVol, Fountain Square Cycle Co., Frankfort Cycle Exchange, C. W. Fryburger, W. T. Gregson & Son, S. H. Gronemeier & Sons, A. J. Henry & Son, M. Hirschberg, W. H. McKinney Co., Nicholas Sarmicky, Lowe & McDougle, Lewis A. Miller, A. O. Nethercutt, Owl Hardware & Implement Co., Peru Sporting Goods Co., F. A. Pruitt, John V. Ross & Sons, Princeton Novelty Works, Reinhard Brothers, Roberson Cycle Company, F. P. Sanders & Sons, Louis Schoene, Chas. A. J. Schaefer, A. C. Sisson, Frank I. Smith, Stewart Brothers, C. H. Whitman Co., V. E. Woodbury.

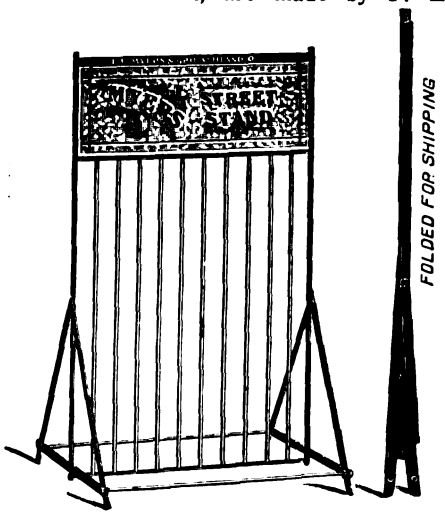
MYERS STANDS FIT ANY BICYCLE

Fold Into Small Compass and Can Be Used for Demonstrating the Wheel —Home Trainer Attachment An Extra

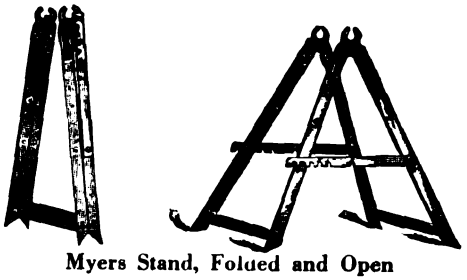
BICYCLE STANDS which enable the dealer to demonstrate a wheel and which also can be fitted with a home trainer attachment, are made by F. E. Myers & Bro., of Ashland, O., under the name of the Myers bicycle stands. These stands are foldable into a small compass and when set up can be adjusted to fit any bicycle, giving a wide base and rendering the mount absolutely steady in addition. These stands are made of spring steel, finished in aluminum bronze and are very neat in design.



Myers Street Stand

The Myers stands raise the rear wheel of the bicycle clear of the floor, thus allowing the salesman or customer to mount and try the machine right in the salesroom. This enables the goods to be shown to better advantage. There are two braces by means of which the spread of the legs can be regulated. For the home trainer a roller mounted on a yoke is spring held against the tire of the rear wheel to give an equivalent of ordinary road riding. Even with the trainer attachment on, the stand in no way mars the appearance of the wheel.

The firm is also marketing a street stand, made from spring steel and finished in aluminum bronze. The capacity of this stand is eight wheels. The rods are galvanized and polished. Each stand is fitted with a blank swinging sign which is coated ready for lettering. The street stand folds for shipping or for taking in at night. For terms on both articles, application should be made to the Ashland headquarters of the company.



Myers Stand, Folded and Open

DEALERS ORGANIZE TO BOOST BICYCLE DAY

INDIANAPOLIS, Ind., Feb. 8.—A bicycle dealers' association was organized in this city last Sunday, at the store of the H. T. Hearsey Co., for the purpose of arousing interest in BICYCLE DAY. As a result of the offer of the newly formed organization to use large advertising space, some of the local newspapers will print special bicycle sections.

Each dealer will make a special effort to arrange his store attractively and will hold a separate reception to riders and prospects of this city on the afternoon and evening of BICYCLE DAY. Light lunches will be served at the stores, and several dealers plan to have contests for visitors.

Bob Douglas, John Merz and John Kinney were appointed a committee to secure the necessary publicity in the local papers. The committee has already employed a publicity man to write stories boosting the big day, which will appear in the local dailies.

"THE TIRE MERCHANT"

ERIE, Pa., Feb. 8.—"The Tire Merchant," the house organ of the Continental Rubber Works, producer of the well-known Vitalic tires, has made its appearance for the month of January as a strong booster for "One Million Bicycles in 1916." Lots of first class "dope" is interestingly presented to dealers, telling them of BICYCLE DAY and suggesting ways of making it a success. Mr. Lancaster writes an interesting story on "Vitalics in Foreign Lands," and there is a full page devoted to clever chats about trade men.

NATIONAL CO. MAKES ONLY NAME-PLATE BICYCLES

BAY CITY, Mich., Feb. 8.—The National Cycle & Mfg. Co., of this city, makers of the National bicycles, holds a unique position among bicycle manufacturers in that this company devotes its entire efforts to the production of high-grade, name-plate two-wheelers.

The National line for 1916 consists of nine distinct models as follows: 1—Heavy Service Model; 2—Roadster for men; 3—Roadster for ladies; 4—Cushion Frame for men; 5—Cushion Frame for ladies; 6—Racer; 7—Pace Follower; 8—Juvenile for boys; 9—Juvenile for girls. All of these models are constructed with exclusive National features, which combine originality and simplicity.

One of the largest National distributors is the Johnson & Meyer Co., of Memphis, Tenn., which enjoys a very large trade in the Southern states.

APPEAL CO. IS BOOSTING FOR MILLION BICYCLES

LOS ANGELES, Cal., Feb. 7.—"We are certainly doing our share toward selling 'One Million Bicycles in 1916,'" said Mr. A. E. Welborn, manager of the Appeal Manufacturing & Jobbing Company, recently. "We have just received a carload of 300 machines at our San Francisco branch and, on January 14, a second carload of 300 bicycles left the factory for Los Angeles.

"On January 24, another carload, consisting of 310 two-wheelers, left the Emblem factory in Angola, N. Y., while on February 4, 300 more Emblem bicycles were sent on their way to the Pacific Coast, and another shipment of 250 machines are now journeying to our Frisco headquarters. That makes a total of 1,460. And in February we will positively specify two more carloads. We believe in boosting for the million mark, and we're doing our share of the boosting and expect to get our share of the big profits."

BIG PACIFIC DISTRIBUTOR FOR GREAT WESTERN

LA PORTE, Ind., Feb. 9.—So impressed was John McDonald, representative of the Pacific Hardware & Steel Company, of San Francisco, Cal., with the facilities of the Great Western Mfg. Co., makers of the Crown, Adlake and America bicycles, for the manufacture of two-wheelers and with the thorough methods employed, that he immediately signed up, during a recent visit here, for the Pacific Coast distributing rights of the Great Western machines.

BICYCLE BOOSTER POSTERS ISSUED BY NEW DEPARTURE COMPANY

Above Are Reproduced Four of a Number of Posters Which Have Been Printed in Two Colors for Dealers by the New Departure Co., of Bristol, Connecticut, to Be Used in Connection with BICYCLE DAY and Throughout the Year

VETERAN WHEELMEN MEET IN PHILADELPHIA

PHILADELPHIA, Pa., Feb. 6.—The Century Wheelman, composed of men who can recall the days when Broad street was crowded with bicycles, when bankers and lawyers rode downtown on the two-wheeled vehicles, and it was distinctly the mode to own such a machine, met last night at the Bellevue-Stratford for their annual reunion.

The organization was once the leading wheeling club of the United States, and had a membership of 1,600. Although it quit cycling, the club maintained its organization, and it was not until within the last year that its home at 1606 North Broad street was sold. Then it was decided to form a dining club, to which should be eligible all the "Centurians."

The members dined last night in the Clover Room. J. Frank Shellenberger was the toastmaster. Addresses were delivered by George M. Graham, E. J. Cattell and Dr. Phillip Moore. It was decided to make the dinner an annual affair.

MORE PIERCE BICYCLES FOR NEW YORK POLICE USE

NEW YORK, Feb. 2.—The New York Sporting Goods Co., of 15 Warren street, has just been awarded a contract for 150 additional Pierce bicycles for the use of the police. These mounts are to be fitted with Vacuum Cup tires, Neverout lamps and special spring saddle. The frames are the regular arch truss type.

WANT SHOW WITH RACE

KANSAS CITY, Mo., Feb. 9.—Much interest is being taken in the six day bicycle race which is scheduled for this city, the dates being Feb. 19 to 25. The local dealers believe that a great deal of enthusiasm will be aroused and a movement is now on foot to stage a small bicycle show in connection with the race.

NEW CYCLING CLUB

STOCKTON, Cal., Feb. 8.—The Samson Cycling Club, which has just been organized in this city, has applied to the California Associated Cycling Clubs for affiliation. The club was formed at the suggestion of Frank Klotys, formerly a member of the New Century Wheelmen, but now a resident of Stockton. Thirty riders have joined the new Stockton body.

SCHULTZ WINS TWO RACES AT ARMORY MEET

BUFFALO, N. Y., Feb. 8.—Two bicycle events made a hit with the crowd that flocked to the local armory games which were held on Saturday night. Robert Schultz, the youth who pedalled himself right into the front ranks of the best local amateurs since his appearance on the track last fall, captured both of these races. In the two-mile race, Schultz beat out his nearest opponent, Joe Schieder, by 24 points, having piled up a total of 68. In the one and a half mile repechage handicap, Schultz trimmed Schieder in the final heat.

NEW BICYCLE JOBBERS FOR BALTIMORE

BALTIMORE, Md., Feb. 8.—A new firm has entered the local wholesale cycle field here, which will be known as the Holland-Baden-Ramsey Company. This concern will handle bicycles, motorcycle and bicycle supplies and also sundries.

The officers of the company are men of many years' experience in the cycle field. William Holland, the president, has been manager of the bicycle and motor accessories department of Henry Keidel & Co., of Baltimore, for the past twenty-four years. The vice-president, Richard T. Baden, acted as financial manager of that company for seventeen years, while John A. Ramsey, the secretary, was for years the star salesman for Henry Keidel & Co. The headquarters of Holland-Baden-Ramsey Company will be located at 25 Hanover street. "Rollfast" tires will be featured.

TAKES ON INDIAN BICYCLE

SAVANNAH, Ga.—George W. Thomas, a well known bicycle dealer of this city, has taken the agency for the Indian bicycle line. Hendee traveller, T. S. Long, obtained his contract.

U. S. I. WILL HOLD SECOND SPORT NIGHT

NEW YORK, N. Y., Feb. 9.—The second indoor "sport night" will be held by the Unione Sportiva Italiana, at its club house, 410 Eighth avenue, on March 9. The bicycle end of the program will consist of a half mile match style home trainer race. Tickets for admission to the games will cost 25 cents and can be secured from Sport Director Francesco Bizzoni.

Last Sunday Tom Bello was again returned the winner of the home trainer race, which was the third in a series to decide the club championship. Seven members competed and the distance was one-quarter mile, run in three heats, two semi-finals and a final. Bello met Desimone in the final and won by a half-inch in the excellent time of 15 1-5 seconds. Bello now has ten points in the series and Desimone has eight.

The weekly one-mile match race on home trainers was staged last Thursday and was captured by Nelson Johnson, who holds third place in the championship series. Eight members competed and the event was held in four heats, two semi-finals and a final. Johnson met Alfonso in the final, the first part of which was ridden at a snail's pace, neither rider wishing to take the lead. Suddenly Alfonso jumped, opening a gap of 35 yards. Johnson woke up and by the hardest kind of plugging managed to get his man at three yards from home. He won by less than an inch.

GREAT WESTERN BICYCLES AT TWO SHOWS

LA PORTE, Ind., Feb. 8.—The Great Western Mfg. Co., makers of the Crown, Adlake and America bicycles, will exhibit their three lines at the Grand Rapids (Mich.) show, which will be staged on February 15, 16, 17 and 18. The Great Western stand will be in the care of Morley Brothers, of Saginaw, the Michigan distributor for the La Porte company.

Great Western bicycles will also be shown at the Indianapolis Cycle Show, February 24, 25 and 26, by the G. K. Westing Co., which has the exclusive selling rights in the Indiana metropolis and also distributes the Indian motorcycle.

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

Sixth Installment

With Lawson and Major Taylor Riding Abroad, Kramer Had An Easy Time Capturing the Titular Honors in 1904.

WITH Iver Lawson and Major Taylor riding on foreign shores in 1904, Kramer had practically no opposition at all in romping off with the National Cycling Championship for the fourth year in succession. This was a new world's record for acquiring successive championships, surpassing the former record of three championships hung up by that little wonder of the wheel, Eddie Cannon Bald.

Got Sixty-Nine Points

There were fifteen championship contests during the season, and out of a possible 75 points, Kramer captured 69. In thirteen of the fifteen races, the East Orange speed marvel finished first. On one occasion he finished second and another time he was fourth. Willie Fenn, Kramer's teammate, captured the two races in which the champion was defeated. Both events took place on a cinder track at the World's Fair in St. Louis, where the conditions were far from the best for good sprinting.

Kramer with his sixty-nine points loomed up far ahead of Willie Fenn who occupied second position in the race for the title with 26 credits. John and Menus Bedell, the Lynbrook (Long Island) riders, tied for third place, each accumulating twenty points. So Kramer had pretty easy sailing that year and in no way the battle that he had in the previous season, when Iver Lawson made him go practically down to the last race of the season before the holder of the title was decided.

Sets New American Record

The championship races wound up for the season on Labor Day, September 5, with Kramer taking first place in the two-mile titular race. On the following Sunday he rode a wonderful race at the Velodrome which was a fitting sequel to his remarkable record in capturing the National Cycling Championship for four successive years. Kramer, without the aid of Fenn, won the handicap race at one mile and created a new American record of 1 minute 49⅖ seconds. Floyd McFarland rode the distance in 1 minute and 49 seconds, at Australia in the winter of 1914, but he had more assistance in the way of pace making than Kramer was afforded.

The championship series for 1904 started at the Revere Beach track, just outside of Boston, on Friday night, June 19, and Kramer made a victorious start by taking the half-mile race in decisive manner. Willie Fenn finished second to the East Orange rider, while Menus Bedell was third, and Eddie Root fourth. On Sunday, July 3, Kramer won a two-mile titular race at Manhattan Beach and the next day at Newark he eased in a winner in a mile championship affair.

Kramer's Winning Streak

Against a field of twenty-three starters, Kramer won the five-mile championship race at Manhattan Beach on Sunday, July 17. Menus Bedell finished second and his brother, John, was third. Connecticut fans had a chance to gaze on Kramer in his winning form on July 25 in Hartford. The race was at a half-mile, and Frank had little trouble in beating John Bedell, Walter Bardgett and Frank Cadwell. At Revere Beach the next day, Kramer kept up his steady procession of ever increasing victories by winning another half-mile title race and beating out Willie Fenn, John and Menus Bedell.

Kramer and Root fought it out, kick for kick, on Sunday, July 31, at the Vailsburg track in the five-mile championship race.

Frank Kramer in 1904 and "Uncle" L. H. Burnett, An Intimate Friend

It was a great battle down the stretch, the champion apparently was straining his every effort to win and came up the stretch with a terrific flight of speed. He just beat out Eddie Root, while Cadwell and Fenn finished next in order. The time announced for the last eighth mile was 11⅖ seconds and there was tremendous applause when this was given out, as Kramer had ridden a wonderful race and entirely without any aid from Fenn.

Kramer met his first defeat in a championship race, at the World's Fair in St. Louis, on Tuesday, August 2. The race was a third of a mile and ridden on a cinder track. Kramer in trying to sprint around Fenn almost spilled, his wheel swerved from under him, but he managed to hold his place and finish second to Willie Fenn. The next day Kramer was once more vanquished and misfortune had surely claimed Frank at the Louisiana Purchase Exposition. Kramer's chain jumped from his sprocket, he swerved toward the outer edge of the track and, to add to his troubles, his rear tire came off. Fenn won again. Bowler was second, and Root third, while Kramer was last.

Kramer came into his own again before leaving St. Louis, and Dame Fortune smiled on him when he won both championship races in a meet on Friday, August 5. A half-mile race was run in the morning and Kramer finished ahead of Fenn, John Bedell and Cadwell. In a two-thirds mile race in the afternoon, Frank led Fenn, Krebs and Menus Bedell to the tape. Back home again at the Vailsburg track, on Sunday, August 14, Kramer won the five-mile championship affair from Menus Bedell, John Bedell and Eddie Root.

Too Long for Frankie

A twenty-mile race was run in Newark on the following Sunday, which was won by Tom Butler, of Boston. When Kramer sat up at six and one-half miles, a fan in the bleachers shouted, "A little too long for Frankie, old boy." This caused a roar of laughter throughout the old place and brought a broad smile over Kramer's face. In the last championship race of the season, at two miles, on September 5, at Vailsburg, Kramer won by an open length from Menus Bedell. John Bedell was third and Floyd Krebs was fourth.

When the season opened for 1904, racing was again resumed at the Vailsburg track, after the riders had raced one year on a dirt track at Hillside Park. When the ban was put on racing in Vailsburg, the promoters transferred the sport to Hillside Park, at Belleville, and while the dyed in the wool enthusiasts stuck to the sports, thousands and thousands who witnessed the sport on a board track at Vailsburg never went near the track at Hillside Park.

Usual Big Crowd at Vailsburg

Seven thousand fans turned out on the opening day at Vailsburg, which was Sunday, April 7. The ardor of the bike fans was not dampened, but a chill wind and threatening skies made it uncomfortable for the fans. The big event was a half-mile open, and Kramer won this with five yards to spare over Eddie Root, who was a foot ahead of Willie Fenn in third position.

On Sunday, May 1, there were two champions at the Vailsburg track. One was Frank Kramer, the sprint cycling champion, while the other was Harry Harris, the recognized holder of the bantamweight pugilist title. Kramer took up boxing in 1904, and Harris was his instructor.

BUFFALO METAL GOODS COMPANY
MANUFACTURERS OF
ATHERTON COASTER BRAKES
SCREW MACHINE PRODUCTS
184-210 WINCHESTER AVE.
BUFFALO, N.Y.

February, 1916

Mr. R. U. Wise -

This really isn't a letter, it is a thought, a suggestion- an opportunity.

"SPRING" --- doesn't that convey an idea pleasing to you? The budding out of all that which has been dormant of growth and evolution.

With the coming bicycle riding season you are looking forward to a bigger and more profitable business. Have you stopped to consider where the Atherton Coaster Brake - ATHERTON SERVICE and ATHERTON ENTHUSIASM could become a valuable asset to your business?

We want to help you sell more bicycles and to have a coaster brake which is a Coaster and also a Never Failing Brake.

The ATHERTON has only six working parts yet three braking surfaces and two driving contacts.

The hub is perfectly designed to give strength at all points of strain.

The cone principle in braking is the ATHERTON way -

"LIKE THE TWIST OF A SCREW."

This in combination with the old style flat surface braking is found only in the ATHERTON BRAKE.

If you ask for Atherton equipment you will be sure of SERVICE, you will get the Atherton Enthusiasm and will forget any coaster brake troubles you might have had in the past, --- there will be none for the future.

Yours in co-operation,

BUFFALO METAL GOODS COMPANY

McNAMARA-SPEARS WIN CHICAGO SIX DAY RACE

(Continued from page 39)

pick-up. Before the start of Saturday afternoon's pedaling, a "simon pure" sprint race was held, and exhibitions were given by Alfred Goullet and Charles Piercey. The former rode a quarter-mile in 0:26⅘ and Piercey covered the same ground in 0:26⅕. Ernie Kochler won the half-mile amateur race in 2:05. Early on Sunday the six-day grinders were still behind the record.

On Sunday afternoon the Coliseum was sprinkled with a crowd of 2,000 spectators. When the riders finished the 48th hour on Monday morning, six teams were leading, these being McNamara-Spears, Lawrence-Magin, Cameron-Kaiser, Smith-Coburn, Ryan-Thomas and Hanley-Madden. Ohrt-Madonna, Grimm-RudiRusse and Kopsky-Wohlrab were one lap behind the front-rank men, while the Lawson-Corry team was two laps to the bad.

Ohrt and Madonna Lose Laps

Ohrt and Madonna lost two laps in a jam that started early on Sunday night. Numerous attempts were made to regain lost laps, but all of them failed, the leaders being in splendid form and not allowing the rear-enders to get any advantage. Spears and McNamara had been performing better than any other team and on Sunday morning they were picked as the favorites.

The fifth day of racing, which began on Monday afternoon, was witnessed by a crowd of 2,000. Throughout the day the six leading teams managed to hold tight to their advantage and refused to let the trailers come into their fold. The score at the end of the 60th hour was 1,402 miles and 7 laps. Wohlrab-Kopsky were one lap behind the leaders, Grimm-RudiRusse three laps and Corry-Ohrt five laps.

Corry had had ill-luck with his partners throughout the grind. Lawson, his new partner, was in bad shape on Monday night and quit. Madonna, who was Ohrt's partner, did not appear on the track on Monday afternoon, thus leaving the San Francisco boy to form a new team with Corry. The latter made some terrific efforts to regain a lap, but did not succeed.

HOW THE "GRAY FELLOWS" WERE SHOWN

Effective Exhibit of the Wagner-Dolph Co., Inc., Harley-Davidson Agent, Which Was Staged at the Recent Rochester (N. Y.) Motor Show

DETAILS OF CRISTMAN BILL

(Continued from page 25)

"The following fees shall be paid to the secretary of state upon the registration or re-registration of a motorcycle in accordance with the provisions of this article: Two dollars and fifty cents upon the registration of any motorcycle of whatever horse-power, provided that if a motorcycle is originally registered after August first in any year, the register fee for that year shall be one-half of the fee herein provided for.

"The registration fees imposed by this article upon motorcycles shall be in lieu of all taxes, general or local, to which motorcycles may be subject.

"Upon the sale or transfer of a motorcycle registered in accordance with this section, the vendor shall immediately give notice thereof with the name and residence of the vende to the secretary of state, and the vendee shall, within ten days atfer the date of such sale or transfer, notify the secretary of state thereof upon a blank furnished promptly by him for that purpose, stating the name and business address of the previous owner, if known, the number under which such motorcycle is registered and the name, residence, including county and business address, of the vendee. Upon filing such statement duly verified such vendee shall pay to the secretary of state a fee of one dollar, and upon receipt of such statement and fee the secretary of state shall file such statement in his office and note upon the registration book or index such change in ownership.

Numbered Plates Are Necessary

"No person shall operate or drive a motorcycle on the public highways of this state after the first day of April, nineteen hundred and sixteen, unless such motorcycle shall have a distinctive number assigned to it by the secretary of state and a number plate.

"Such number plates shall be of metal, on which there shall be the initials 'N. Y.' and there shall be the distinctive number assigned to the motorcycle.

"Every motorcycle, operated or driven upon the public highways of this state, shall be provided with adequate brakes, adequate bell, horn or other device for signaling, and shall, during the period from one-half hour after sunset to one-half hour before sunrise, display one lighted lamp on the front and one on the rear, or, when such motorcycle is operated with a passenger or other truck attached to the side or front, two such lamps on the front and one on the rear; and in all cases the lamps on a motorcycle shall include a red light visible from the rear."

"Selling Sense"

SELLING SENSE, in nine cases out of ten, means picking a winner.

It means that when a prospective customer comes into your store you lead him right to a high-grade wheel that you know will give him a lifetime of service.

You let him admire the graceful lines, the up-to-the-minute equipment and the appearance of solid worth.

Then you tell him about the patented frame construction, the strong, dependable coaster brake that is used, the improved crank hanger that makes riding easier, and the high-grade chains, tires, rims and bearings.

By that time you've won half the battle. And you win the other half as soon as you tell him your bicycle has a world-famous name like:

Columbia
Cleveland
Tribune
Rambler
Crescent
Pope

If he's a particularly hard customer to handle, you enlarge upon the fact that your wheel is guaranteed by a concern with an unequalled reputation of thirty-eight years' standing—that in this period the highest possible standards of quality have been developed, to which every piece of material must measure—and that scientific experts are continually striving to improve every detail of construction and every process, so that your wheel is now better than any that has ever been made before.

And when your prospect goes out a purchaser you have the satisfaction of knowing that he is a booster for you and your bicycles for the rest of his life.

That's the way you do your share of the work for "1,000,000 Bicycles in 1916."

If you haven't the prices on these lines you had better write for them now—they're worth it.

TO REGULATE NEW YORK MOTORCYCLE SHOPS

Mayor Mitchel Recommends Passage of Such a Measure by Board of Aldermen, Following Report of Commissioner of Accounts

NEW YORK, February 4.—Following the report of Commissioner of Accounts L. M. Wallstein upon the condition of motorcycle agencies in this city, Mayor Mitchell has recommended that a committee of the Board of Aldermen, in co-operation with the Fire Department and Commissioner Wallstein, be appointed to draft provisions which will regulate commercial motorcycle storage and repair shops. In his recommendations to the board, the Mayor called attention to the fire hazards arising from spilled and leaking gasoline, oil-soaked floors, paper and rags and also to the location of motorcycle stores in tenement houses, factories and places of public assembly.

In Commissioner Wallstein's report, notice was called to the condition of a considerable percentage of the metropolitan shops which the commissioner visited. He examined 67 places in all and found that 35 were located in tenements housing from nine to 290 persons. Three tenements were of frame construction. One shop was located in a building of which the upper part was used as a dance hall and another was on the ground floor of a factory building employing 80 hands.

In 37 of the places the floors were of wood, saturated with oil, and there was no provision for absorbing spilled oil and fuel with sand. In 33 instances the stores were lighted by gas and heated by gas stoves, oil stoves or coal stoves. Open flame torches were also found in many of the shops. There were no receptacles for waste, no signs prohibiting smoking, no means of extinguishing fire and no fire doors or windows in a huge majority of the 67 places.

Commissioner Wallstein called the attention of the Mayor in his report to the fact that Article 11 of Chapter 10 of the Code of Ordinances relating to motor vehicle repair shops did not affect motorcycle stores and shops. Motorcycles were not included in the definition of the term "motor vehicle" in the ordinance. On the other hand, the occupancies were not governed by Article 8 of the same chapter, relating to the manufacture, storage and transportation of mineral oils, including gasoline. He cited the ordinance of the City of Chicago with regard to motorcycle premises and recommended that a similar set of regulations be adopted.

It is very probable that the commissioner's report, with the Mayor's recommendation of practically all its suggestions, will be acted upon by the committee of the Board of Aldermen and a rigid ordinance drafted. To anyone familiar with the conditions of New York motorcycle shops it will be evident that Commissioner Wallstein's report is by no means exaggerated. In the meantime much can be done, in the opinion of city officials, in cleaning up the shops and storage places in order that too drastic an ordinance may not become necessary. If passed, the measure will affect not only the majority of stores, but also every motorcycle club in the city.

SUNDRIES BUSINESS BOOMS IN CALIFORNIA

LOS ANGELES, Cal.—In spite of the slacking up of business, due to heavy rains in this section, Los Angeles dealers have forseen a big season and are stocking up with parts, sundries and bicycle goods. When **Motor Cycle Illustrated's** representative called upon E. E. Welborn, sales manager of the Appeal Manufacturing & Jobbing Company, he found him up to his ears in work over papers representing real business of the biggest kind. Four men had sent in their orders from the road, and all the orders came to Welborn in the same mail, some of them running into two or three pages each.

Welborn has stocked up heavily to meet the spring requirements of his dealers and has 200 cases of goods in transit in addition. These goods include lamps, handlebars, saddles, grips, rims, chains, bells and repair parts, and in all are enough to stock a pretty good-sized jobber for a year.

RACING CIRCUIT ORGANIZED IN WESTERN OHIO

DAYTON, O.—The Miami Racing Co. has been incorporated at Columbus with a capital of $5,000 to hold race meets for motorcycles, bicycles and automobiles throughout Western Ohio. The incorporators are R. E. Gersbacher, E. D. Hensley, of the local branch of the United States Tire Co.; R. E. Gerkins, Daniel Larkin and E. H. Rehn. All but Rehn are from Dayton.

Leases have already been taken for the 1916 season on tracks in this city, in Springfield, Greenville and Wapakoneta. Options are held on those at Lima and Chillicothe and at least one of these will be included in the circuit. The company plans to commence the racing at Dayton on the first Saturday in May. Meets will be held each Saturday thereafter, alternating between the various tracks.

CLUB WANTS F. A. M. CONVENTION IN WHEELING

WHEELING, W. Va., Feb. 7.—The Wheeling Motorcycle Club held an enthusiastic meeting last week and discussed the outlook for the coming season. President Beir reported that the club was never in better financial standing. A musical comedy will be held in the near future. A feature of the meeting was the decision to make a big effort to land the 1916 F. A. M. Convention in this city. The Wheeling Club at the present time is the fifth largest in the country.

YATES IS POPE TRAVELER

MINNEAPOLIS, Minn.—J. A. Yates, well known in the New England bicycle trade, is now travelling for the Westfield Mfg. Co., makers of Pope products, in Westfield, Mass. Yates makes his headquarters in this city and covers the Northwest in the interest of Pope bicycles.

CYGNET CLASSED WITH SIDE-CAR COMBINATIONS

NEW YORK, Feb. 8.—The New York Sporting Goods Co., which has the distributing rights for the Cygnet Rear Car in the Metropolitan district, recently addressed an inquiry to the New Jersey Commissioner of Motor Vehicles with reference to the status of the Cygnet attachment, and has been informed in reply that the Cygnet will be classed with sidecar combinations. The letter from the New Jersey Commissioner is as follows:

New York Sporting Goods Co.,
15-17 Warren street,
New York City.

Gentlemen:—Your letter of Feb. 4, enclosing catalog, is received.

My own judgment is that the Cygnet rear car attachment to a motorcycle is no different than the sidecar attachment which motorcycles are now allowed to use under the regular motorcycle registration, and in consequence believe that a motorcycle license is all that is necessary.

WM. L. DIEL.

HEARSEY-WILLIS IS NOW H. T. HEARSEY CO.

INDIANAPOLIS, Ind.—The firm name of the Hearsey-Willis Co. has been taken down from over the door above which it hung for many years and has been replaced with the newer one of H. T. Hearsey Co. Harry Hearsey was the senior partner in the old firm, having started the business close to thirty years ago, but changed the name of the company when Fred I. Willis was admitted to partnership several years ago. With the retirement from the firm of Mr. Willis some time ago to take over the management of the bicycle department of the Central Rubber and Supply Co. the name has again been changed.

John Kinney, who rejoined the H. T. Hearsey Co. after having been away from the firm for four years, has just returned from a trip through the southwest and reports a fine trade in the well-known line of Hearsey Tires. About the middle of the month Kinney will make a short trip through the east looking after the interests of the firm. He will return in time to take charge of the firm's exhibit at the Indiana cycle show, February 24, 25, 26.

VIGILANCE COMMITTEE GETS QUICK RESULTS

COLUMBUS, Ind.—By reason of the large number of bicycles which were stolen during January, the bicycle owners of this city recently started a movement toward the organization of a bicycle vigilance committee. Shortly after the organization, eight boys were arrested and taken before Mayor Volland. When presented to the Mayor and the city court, the boys confessed that they were members of an organized band of boys who stole bicycles and resold them.

The culprits also told the court that a ten-year-old boy was the gang leader. The younger boys stole the wheels and the older ones changed the parts, re-enameled the frame, etc., so that the machines would lose their identity. The court took the cases under advisement.

EXCELSIOR HEAVY LATHE DEPARTMENT

An Important Section of the Big Plant

A Section Devoted to Fly Wheels, Transmission Case Work, Gear Blanks, Valve Caps, Etc.

Producing Piston Rings, Valves, Crankshafts and the Heavy Parts of the Motorcycle.

THE large and completely equipped lathe department of the Excelsior factory cannot be considered as a part of any separate branch such as motor transmission gear or similar departments, as there is some work on practically every part of the motorcycle, done in this department. The motor work comprises fly wheels, piston rings, valve cages, crank shafts, and some parts of the valve work not within the capacity of the automatic screw machines.

The motor cylinders are bored on vertical boring mills, but machining for valve cages, outside finishing, etc., is done on heavy lathes. Transmission gear shafts, gear blanks, and similar parts, are the product of the heavier turret lathes. As in all parts of the Excelsior factory, the keynote is completeness of equipment, with the right machine for every operation.

The turret lathes (of which there are nearly fifty) range in size and capacity from light machines that are to a great degree auxiliary to the screw machines or "automatics," to powerful lathes for fly wheel finishing, crank and transmission case work and cylinder construction. Some of the turret lathes are capable of ten to a dozen operations without removing the work from the lathe.

The heavy lathes are probably the largest used in any motorcycle factory, several having a swing of 24 inches and six feet between centers. While there are no parts of a motorcycle as large as the size of these lathes would indicate, there are many that are worked "off center," thus requiring the swing room.

Another reason for the use of these large lathes is the accuracy resulting from the use of a heavy machine operating well under capacity. As every machinist knows, no machine operates at its best efficiency and accuracy when working at, or near the limit of its capacity; hence the use of these large lathes, that insure absolute accuracy and standardization of parts. Cost of equipment is the last item of consideration in the Excelsior plant, the sole object being the production of mechanically perfect motorcycles.—Adv.

NEW REGISTRATION BILL FOR RHODE ISLAND

Proposed Measure Provides for $2 Rider's Fee and $10 Dealer's and Manufacturer's Rate—Minimum Operating Age to be 16 Years

PROVIDENCE, R. I., Feb. 5.—A bill has been introduced into the Rhode Island legislature providing for the registration of all motor vehicles. Special provisions are made for dealers and manufacturers of motorcycles in this bill.

Among other sections, this measure has the following: "Every person who shall manufacture or deal in motor vehicles may, instead of registering each motor vehicle owned or controlled by him, make by mail or otherwise, upon a blank furnished by the board an application under oath to the board for a general distinguishing number or mark, and with such application shall be deposited the proper registration fee; and thereupon the board may, if satisfied as to the facts stated in such application, grant such application containing the name, place of residence and post office address of the applicant and the general distinguishing number or mark so assigned to him. The certificate of registration issued shall continue in force until midnight of December 31 next succeeding the date of such registration, unless sooner revoked for cause, but such certificate need not be carried in the motor vehicle registered under this section.

Motorcycle Maker and Dealer

"If such person is a manufacturer of or dealer in motorcycles, the board shall furnish him, without cost, three number plates for use on motorcycles; and thereupon any motorcycle which is owned or controlled by such person and which has attached to it one of such number plates shall, until sold or let for hire or loaned for more than five successive days, be regarded as registered under, and having assigned to it, such general distinguishing number or mark.

"The number plates furnished under this section shall have displayed upon them the general distinguishing number or mark assigned to such manufacturer or dealer and such information as the board may prescribe. Such number plates shall be valid only so long as the registration certificate containing the same registration number or mark shall continue in force."

Minimum Age Is 16 Years

The new bill provides that no license shall be isued to any person under 16 years of age. Applicants must pass an examination at the hands of the Board of Registration. The board has full power to refuse a license to any person who it deems improper. All applications for license are to be made under oath. For the registration of motorcycles, a fee of $2 is charged for each individual. Dealers and manufacturers are required to pay $10 for such vehicles as they may have. For every license or renewal or duplicate to operate a motorcycle, $1 shall be charged.

The bill provides that a number plate furnished by the board shall be securely attached to some part of the motorcycle, or to some device attached thereto, to the rear of the saddle and plainly visible.

Non-Resident Provisions

In reference to non-resident riders, it is provided that "any non-resident of this State who shall have complied with the laws of the State or Territory of the United States in which he resides, requiring the registration of owners of motorcycles and the display of identification numbers on such vehicles, and who shall cause the identification numbers of each state or territory, in accordance with the laws thereof, and none other, together with the initial letter or letters of such state or territory, to be displayed on his motorcycle while used or operated upon the highways of this state, may bring his motorcycle into this state for use on the highways complying with certain regulations. Such owner shall not be exempt if he conducts business in the state for ten days during each calendar year."

In one respect the bill is unique. It provides that "any person arrested for any violation of any of the provisions of the act may tender as bail a motor vehicle of which he is the owner, and, if his interest in such vehicle is of sufficient value it may be accepted as security for his appearance in lieu of any other bail."

INDIAN CLUB HOLDS ITS ANNUAL BANQUET

NEW BRUNSWICK, N. J., Feb. 4.—The Indian M. C. of this city held its annual banquet at the Hotel Klein last night. Over forty members were present. Speeches were made by President E. J. Mills, L. A. Voorhees, of the Associated Automobile Clubs, E. B. Holton, F. A. M. State Commissioner, and others. The tenor of all addresses was co-operation between motorcyclists and automobilists as road users and as citizens for the improvement of city and county highways.

The club has started working on details of the second annual elimination run, to be held on July 4. This event will continue as long as a competitor is left in the run. Last year the affair ran continuously for thirty-eight hours before the field was reduced to one rider. The Indian M. C. will shortly affiliate with the Federation of American Motorcyclists.

New York City.

Dear Sir:-

MOTOR CYCLE ILLUSTRATED as an advertising medium for our Ball Bearings has already proved its worth.

The fact that we have signed up for another year and have increased our advertising with you, speaks better than any praise.

Yours very truly,
S.K.F. BALL BEARING CO.
BY Robt E Ryder

"The fact that we have signed up for another year and increased our advertising with you speaks better than any praise."

Terse—comprehensive—complete. The praise of a man who gets results—and wants them from others.

The SKF Ball Bearing Company started advertising last year, with one-quarter page every other issue. Then they took a page or two—because, whether it was due to their advertising or some other unknown circumstance, a few weeks after their advertisement appeared in our columns, two big motorcycle manufacturers signed up for their season's requirements.

Now they are running pages in two colors every other issue—varying with two-page spreads. They are after the other manufacturers—and will get them.

RESULTS? ADVERTISE IN MOTORCYCLE ILLUSTRATED

TO DEALERS AND JOBBERS
Buy Now While You Can Buy To The Best Advantage

Owing to the continually increasing cost of material and labor, it is very probable that prices on Stoll Tandems will have to be advanced after the present supply of material is exhausted.

Before the advance in prices we purchased a large quantity of material, of which we still have sufficient to manufacture about 4200 tandems. Judging from the present rate of our sales, these will be entirely sold out before April 1. While this supply lasts, the present prices will remain in force, and therefore our advice to the trade is, "Take advantage of this opportunity NOW, to put in a stock of these popular, quick-selling articles."

Don't wait until the present supply is sold out. Make out your order today.

YESTERDAY and TODAY

Do you remember the little tin lamp with coal oil and wick that used to diffuse alleged light from the front of your motorcycle? Troublesome and uncertain, wasn't it? About the only time it was "on the job" was on a nice, straight, smooth road when you didn't need it.

Then came gas lighting. Gas was a big improvement —it made night-riding almost safe. But gas is going out of use, too.

The only wholly satisfactory light for a motorcycle comes with the

REMY

Motorcycle Lighting-Ignition System

Steady, safe and **sure** lighting is just as important to the motorcyclist as to the automobilist. That's why there is a REMY Lighting-Ignition System for the motorcycle as well as REMY equipment for automobiles.

The REMY System is trouble-proof. It is compact—reduces the bulk of the motorcycle without adding to its weight.

Wiring is vibration-proof. REMY Lighting-Ignition Systems are providing 24 hours of 100% efficient lighting and ignition for thousands of Harley-Davidson Motorcycle riders. Look at any 1916 Harley-Davidson and you won't need to be told how the REMY System adds to the joy of motorcycling.

Again Experts Agree
The Belt Drive Must Be Right

BACK of the Cyclemotor is a corps of engineers second to none in the motorcycle field—men who have investigated widely and thoroughly, in a word, men who know. When the problem of putting a power plant in any and every bicycle was placed before them for solution, the result was the clever and ingenious Cyclemotor.

With many known ways of carrying the power to the rear wheel, the Cyclemotor engineers decided that belt drive transmission was the proper transmission. The popularity of belt drive, the success of belt drive, the ability yet simplicity of belt drive, could not be equalled or bettered—so belt drive it was; and because the maximum in belts was desired, the belt selected carried the famous Spartan trade mark.

To complete your selling line, Mr. Dealer, you require an auxiliary power plant for bicycles, or a good Lightweight Motorcycle. Whichever it is to be, see that the transmission, the important factor, is one that is simple yet efficient, positive yet lasting, one that absorbs road shocks without rattle, noise, or power losses, and in addition is unaffected by dust, grit or weather conditions. Such a transmission only can be belt transmission, belt drive by the long lived, all sufficient

Cycle Show,
Feb. 24-25-26

Cyclemotor, Satisfaction and Service are synonyms in the cycle world. They stand for one and the same thing simply because the former is a blended combination of the latter.

This fact is exemplified in the care and precision exercised in each manufacturing process in our own well equipped factory, and in the high quality of the materials used. The same exactness is also required of the parts purchased by us, each of which is the recognized leader in its particular field, as the following list of standard equipment will testify.

Specifications

Belt—"Spartan" special twist giving coil spring effect.
Magneto—"National," high-tension, water-proof.
Spark Plug—Benton, mica.
Carburetor—Special high-speed design, float-feed, aluminum die cast.
Control—Bowden, aeroplane type.
Magneto Drive—Renold Roller Chain.

The enterprising and progressive dealer must have a good motor attachment to complete his selling lines and secure his full quota of business. The Cyclemotor meets the popular demand because it is standardized and will stand hard service. Booklet "L-2" and other interesting literature telling how the Cyclemotor will help increase your sales, sent free upon request.

Pledged for Big Bike Sales

Practically every manufacturer of bicycles, bicycle parts and bicycle accessories, has written us that 1,000,000 bicycles can be sold by dealers this year, if we all get together and boost the bicycle. This in answer to a letter sent out by us last November.

National Bicycle Day has been announced for Tuesday, February, 29.

This is the bicycle dealer's opportunity to demonstrate beyond a question of a doubt, that more bicycles can be sold, and sold easily.

Join your efforts with those of the manufacturers and make your bicycle sales a profitable fact. Clean your store up spick and span, put in a new stock of bicycles, tires and sundries, and inject some real live salesmanship into your bicycle selling.

The manufacturers are backing you with national bicycle advertising, that is their part, your part is to close the sale. Now let's get ready.

Remember the day — Bicycle Day, February 29th.

THROUGH CALIFORNIA'S FLOODED VALLEYS

How a San Diego Dealer Tackled the Fordless Rivers and Railroad Ties After Southern California's Second Devastating Flood in Order to Accommodate a Friend

By C. F. BRUSCHI

THE second devastating flood had swept the valleys of Southern California on January 30. On the following day the local newspapers reported that the passenger boats had turned away more than 3,000 people who wanted to travel north; the railroads were badly crippled and there was absolutely no hope of having the washed out bridges rebuilt for weeks to come. The city of San Diego was almost cut off from communication with the rest of the world, so that the chances for anybody to journey to nearby towns were—well, they simply didn't exist.

Enter, Russel J. Bowell, Esq.

"Take me to Los Angeles, Bruschi!" almost shouted my friend Russel J. Bowell the next morning as he excitedly entered my store.

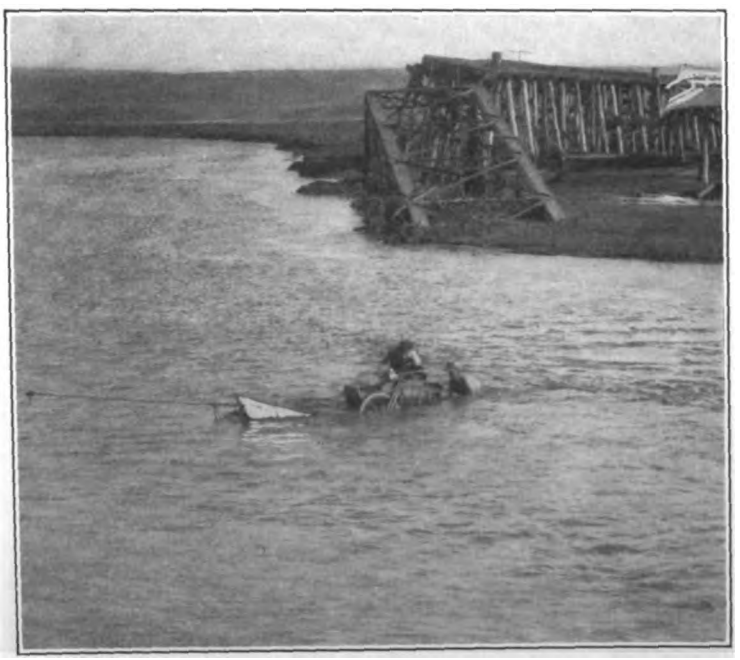
"Why, man alive, how can anyone take you to Los Angeles after that great big flood?" I asked, wondering whether Bowell had gone out of his head. "The bridges are washed out, and all the rivers are badly swollen. It's impossible."

Simply Had to Go

But the word impossible is evidently not in the dictionary Bowell uses. He simply had to go to Los Angeles on an urgent errand, and I, it appeared, was about the only one who could take him there. He asked me for the sake of our long standing friendship to reconsider the matter, and then wisely remarked that no motorcycle had yet dared the trip after the second flood. And then Bowell added a lot of other things that finally convinced me that it was my duty to risk the flood district and take my friend to Los Angeles.

I was wearing my best clothes at the time and only stopped to get a few necessaries and then rolled the machine out of the shop. My three-speed 1916 Harley-Davidson sidecar outfit was in splendid shape, for I had just finished giving the machine a thorough oil bath. As we rolled along the fine boulevards in San Diego, I could see visions of the hardships which were before us. Had either Bowell or myself known what our journey held in store for us, I doubt if we would have started.

The first leg of our journey was to Oceanside, a distance of fifty-two miles. On the way we encountered J. C. Coe with a 1915 three-speed Harley-Davidson single. Coe had started the day before and was meeting with so many difficulties riding alone that he was glad to join us. The initial river ford was at the bottom of the Torrey Pines grade. We rode the beach for a quarter of a mile and crossed on a rowboat, then again hit the beach to Del Mar. The sand was hard and the tide exceptionally low, so that it was just a case of "open her up and let her go." Fine touring, Bo!



One of the Most Remarkable Motorcycle Photos Ever Taken; Bruschi and Coe Pushing the Rowboat Containing Machine Across the Santa Margarita River, While Bowell and a Railroad Section Gang Are Pulling at the Rope from the Left Side of the Stream. Note Bridge at Right, Which Was Washed Out by the Second Flood

Bumpety, Bump, Bump!

We managed to get through the mud banks to the Del Mar river, and fortunately a good-sized rowboat was there, which easily took us across. Once more on the highway, we rolled along to Encinitas, where we encountered another non-fordable river. We made a detour, climbed up on the railroad and traveled over the ties for two miles—bumpety, bump, bump! Fine for a fellow who had snatched only a light luncheon! Finally we got back on the highway. But before that little respite, we rolled off the bank once and enjoyed that slipping, sliding, sinking sensation. Luckily it was only eight feet to the bottom. We reached Oceanside without further trouble and spent the night there.

Trouble from the Start

The next morning trouble stared us in the face at the very start; and, believe me, it surely was a day of trouble, and a night of it, too. We had to go down a steep bank (60 per cent. grade) to get to the river edge. The fellow who was tending the rowboat thought that we would never get up the bank again and offered us his services for eight dollars. We were not

Digitized by Google

Coe Crossing River on Wire Carrier, on Which He Brought His Machine Over

inclined to accept the boatman's services, and when we found that there was quicksand between the oar-pusher and ourselves we decided to do the economical thing and ride the railroad ties down to the beach. Here we met three "sons of rest," and the six of us carried the machines through a twenty-mile current that was nearly hip deep. We continued on to the Santa Margarita river, experiencing difficulties all the way.

Thirty Hours Without Sleep

That name, Santa Margarita, will always have a little meaning of its own for me hereafter. By the time we had got to the other side of the stream we had been thirty-six hours on the road, without sleep or "grub." On the bank we encountered quicksand that swallowed the machine clean up to the motor, and it might have embraced the outfit completely had it not been for the sidecar. On the other side of the river we saw a rowboat, and Coe hopped out of his saddle and swam across to fetch it over. It was but a little boat and ran on a wire, having an extra wire attached to it which could be used to pull it across. We loaded the three-wheel combination on this little shell and started to pull.

The current, however, was so swift that it carried us down stream, and the boat, being suspended from the wire, tipped, then filled and finally settled on a sand bank. The water came up to the spark plugs of the machine.

Swims Across River

Bowell jumped into the river, swam to the other side and got a gang of railroad section hands to help us out. These willing railroad workers pulled on the wire, while Coe and I pushed the boat off the sand. No sooner did we get it off when the boat sank out of sight. The water was anywhere from ten to thirty feet deep; but fortunately the boat had enough bouyancy to prevent it from going to the bottom. Coe and I stayed with the outfit, which lay under water for more than an hour. Then the husky section gang, after resting up a bit, finally gathered enough strength to move the boat and succeeded in drawing it to their side of the river.

Eating "Pioneer Grub"

By that time we were hungrier than wolves. Bowell and I worked on the machine. I opened the petcock and let out the water, took off the carbureter and cleaned it thoroughly. I found that one inlet valve had opened and filled with water, but the machine hit on one cylinder, so the three of us climbed into the outfit and slowly rode to a nearby ranch house to obtain something to eat. After eating what "pioneer grub" we could get, the three of us hastened back to a tent which we discovered near the bank of the Santa Margarita river.

The night was wet and cold. We built a roaring fire near the tent, and toasted on one side while freezing on the other. There was little sleep for us that night, and we rolled out of the tent a trio of very tired men the following morning.

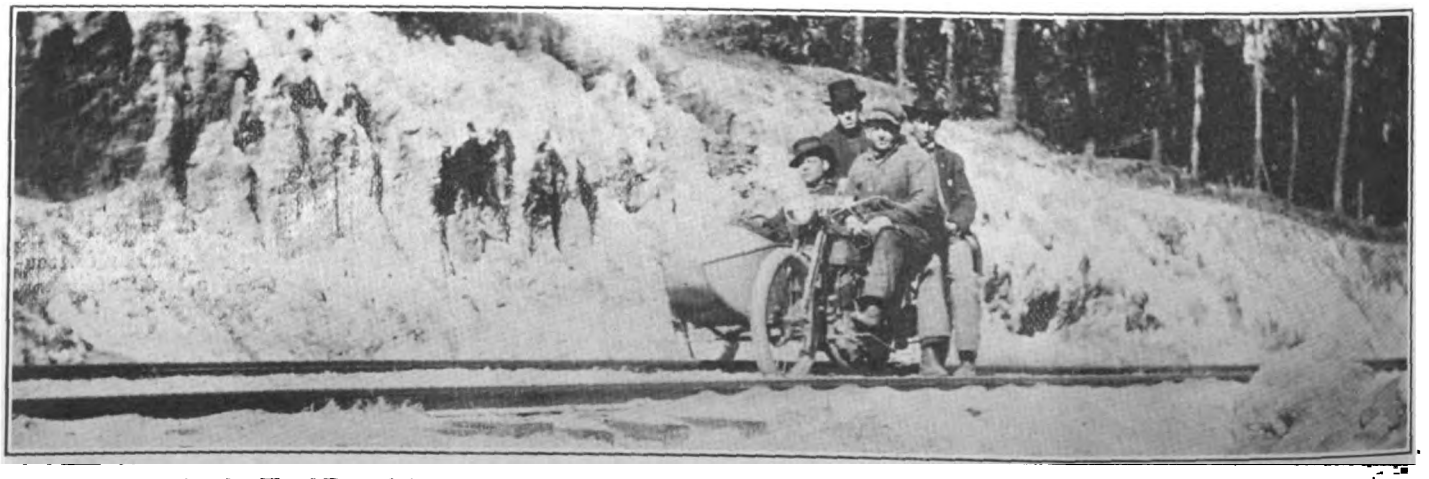
All this time Coe's machine was still on the other side of the river. Later we came to a point of the river where some telephone men had stretched a wire across, to which one of their little carriers was attached on our side. Coe got into it and pulled across, hand over hand. Then he went back for his machine, loaded it on the carrier and started to pull it back. The wire on our side of the river was fastened to the abutment of a bridge that had been washed out, and when the machine neared the abutment the wire sagged to such an extent that it was impossible to lift the two-wheeler up.

Riding the Outfit Down a 45 Degree Railroad Embankment of Soft Mud

Ten Dollars for Help

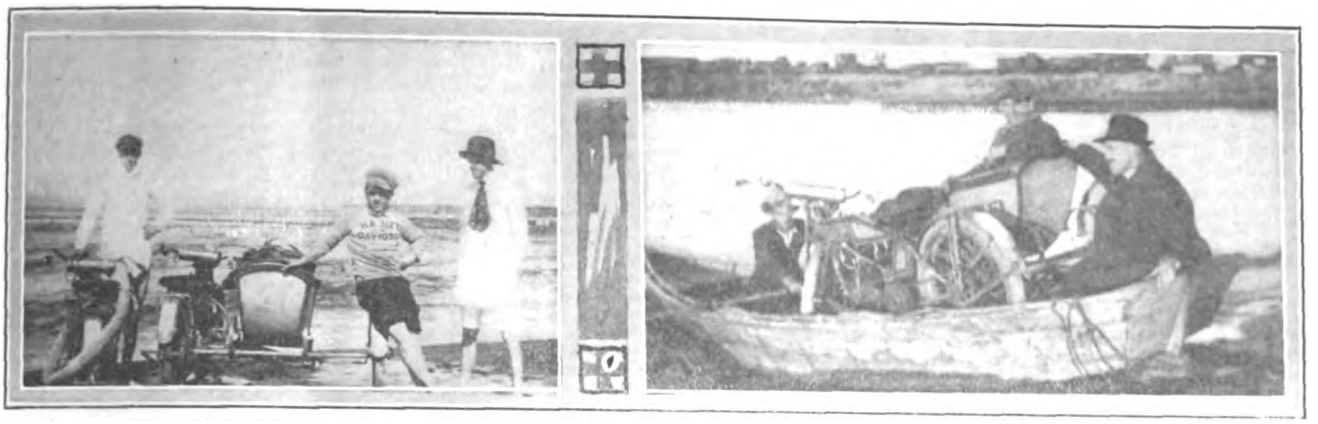
The telephone gang happened along just then and offered to bring the machine ashore for ten dollars. We accepted. They certainly did one of the neatest jobs with block and tackled that I ever saw, and in half an hour had the machine on the road.

By using the railroad track we had a



On the Flood-Tipped Sante Fe Railroad Bed. Many Miles of the Trip Were Made Over Railway Ties

Digitized by Google



Left, After Fording One of the Many Rivers; Right, Crossing on a Rowboat Near Capistrano

pretty straight run to Las Flores, where we discovered that the country bridge was out and the railroad tracks stuck high in the air with the ties dangling from the rails. We forded to the other side, both Coe and myself getting our machines over with little difficulty. Once over we again took to the railroad ties for a mile and a half more, when we met the highway and whizzed over real concrete roads to San Mateo. Then another river—and we had eaten no food for the last 34 hours!

Five Miles of Soft 'Dobe

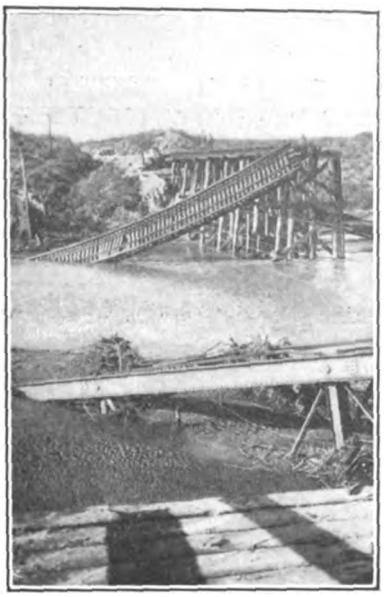
We splashed into the stream and found that the water came about up to the tanks on our machines. Before entering, however, we pulled the air shutter out to make it airtight and closed the valve and breather. When we climbed up the bank opposite, we ran into a bean field that was washed out. The field was soft 'dobe mud, right up to the knees.

We were very tired by this time and wholly unable to do any walking. So we decided to risk the five miles of 'dobe riding in the bean field. This was certainly the biggest bean field that I had ever encountered in California, and when we had finally ploughed through it we were ready for a change of luck. And our luck did change. We struck a fine highway that ran clear up to the river south of Capistrano.

Los Angeles At Last!

Leaving the machines at the river, we walked to Capistrano and partook of a real meal. There we stopped that night and went back to our machines the next morning. A three-team wagon came along, and for the price of two dollars the motorcycles were carried over the river. Then a short run over the railroad, and we were back in Capistrano. After fording another stream, and being carried over the Santa Ana river, it was clear going over the roads through Garden Grove, Rivera and into Los Angeles.

My old motor had been through 11,000 miles before this trip, but it stood up splendidly under this very severe test. When we entered Los Angeles, Bowell was howling with delight and asked me whether I wasn't happy to have made the trip. It was a matter of great pride with him.



One of the Railroad Bridges Washed Out by the Recent Floods

"Your's is the first 1916 machine to come through the second flood," he said. "And that's something to be proud of. Cheer up, Bruschi!"

PRICE IS ADVANCED ON THOR LIGHTWEIGHT MODEL

CHICAGO, Ill.—The Aurora Automatic Machinery Co., Thor manufacturer, announces an increase of $10 in the price of the Model 16-V, or lightweight twin. The new price is $235 instead of $225 as formerly.

The reasons for the advance are not only the increased cost of production but also because of the addition of a number of improvements since the Model 16-V was originally announced.

FIRESTONE IS PRESIDENT OF RUBBER CLUB OF AMERICA

NEW YORK.—H. S. Firestone, of the Firestone Tire & Rubber Company, was elected president of the Rubber Club of America at the last annual meeting. H. L. Hotchkiss, of the United States Tire Company, was elected second vice-president. Other officers who were elected are: Van H. Cartmell, Kell-Springfield Tire Company, first vice-president, and H. S. Vorhis, secretary.

CROTONA CLUB INSTALLS

BRONX, N. Y.—The annual dance and installation of officers of the Crotona M. C. was held at the Danse de Luxe, Southern boulevard and Elsmere place, on February 11. More than 150 members and guests joined in the merriment. The following officers were installed: John Paff, president; Charles Crowninshield, vice-president; John T. Welch, secretary; Ernest A. Hussey, treasurer; Ben Goldstein, captain; Fred Christman, first lieutenant; and Harry Welch, second lieutenant.

PUTTING A REAL PUNCH IN THE BIG NEWS

Motor Cycle Illustrated is carrying—has always carried—the most interesting and unusual stories of motorcycle achievements, and the most striking photographs presented to American cycledom. Needless to say, this policy will be continued, and the opening article in this number gives ample proof of the industry with which our efficient staff of live correspondents is busily scouring the whole country for extraordinary stories of motorcyclists, by motorcyclists, for motorcyclists.

If you do something distinctly out of the ordinary with your motor, or if one of your friends makes a remarkable performance, send the story and photographs to **Motor Cycle Illustrated**, addressing them to the Editor, 13 Park Row, New York. They will be put across with a real "punch"—and paid for.

CAPACITY SCHEDULE AT THE DUCKWORTH FACTORY

SPRINGFIELD, Mass., Feb. 14.—There are no idle moments these days at the factory of the Duckworth Mfg. Co., the business in motorcycle chains being unusually brisk.

"We are running at capacity," said Mr. George H. Empsall, in conversation with a staff representative of **Motor Cycle Illustrated,** "and there is every indication that we will continue on that basis indefinitely. We are pretty well supplied with material now and do not expect to have difficulty in making prompt shipments, although the present demand for our chain products is considerably larger than we had counted upon.

PLAN $10,000,000 INCREASE IN FISK CAPITAL

CHICOPEE FALLS, Mass.—A plan for increasing the capital stock of the Fisk Rubber Co. by $10,000,000 was placed before the stockholders of the company for consideration at the annual meeting held February 16. It is the intention to have the increase in capital consist of $5,000,000 in second preferred stock and $5,000,000 in common stock. In connection with the new move $375,000 of first preferred stock, purchased by the company in 1915, is to be cancelled and removed from the treasury of the company.

It is explained by the company that the proposed addition of $10,000,000 is not in response to any immediate need for funds, but is a provision for the future. Construction now under way will take care of the immediate demands of the business, and this has been financed by the recent issue of preferred stock. However, it is felt that the natural growth and expansion of the business will require within two or three years a plant even larger than that now nearing completion.

EXCELSIOR CYCLE COMPANY LANDS 20,000 CONTRACT

CHICAGO, Ill., Feb. 16.—The Gaston, Williams & Wigmore Company, Inc., with headquarters in New York, which a few weeks ago contracted with the A. O. Smith Company to handle thousands of motor wheels in the Far East for a period of five years, has just signed a contract with the Excelsior Cycle Company, of this city, for 20,000 bicycles, also covering a period of five years.

The model which they contracted for is the Special De Luxe Motor Bike, which was designed and built especially for use with the Smith Motor Wheel. The territory covered by the Gaston, Williams & Wigmore Company, Inc., is as follows: Japan, China, Hongkong, the Philippine Islands, French Indo China, Siam, Federated Malay States, Straits Settlements and the Dutch East Indies.

HOEGEE WILL DISTRIBUTE DAYTON MOTOR BICYCLE

LOS ANGELES, Feb. 14.—W. H. Jackson, traveler for the Davis Sewing Machine Co., placed the agency for the Dayton Motor Bicycle with the W. H. Hoegee Co., of 138 South Main St. This concern will also distribute the Dayton lightweight in the Southwest, having been assigned the Southern Californian territory from Fresno down, and the states of Arizona and New Mexico. W. J. Larrisey, who has charge of the bicycle department at Hoegee's, already had inquiries coming in regarding the new machine.

C. T. Forden, of the Hoegee Company, is now out in the Kite district of Southern California in the interests of the Dayton Motor Bicycle. The first carload of machines is expected within sixty days.

NEW MECO CATALOG FILLS EVERY RIDER'S NEEDS

ACCESSORIES for both motorcycle and bicycle and parts for standard makes of the power two-wheeler are described and illustrated in the 13th annual catalog of the Motorcycle Equipment Company, of Hammondsport, N. Y. The accessory range is a huge one, beginning with tires and tubes and covering the field down to contact-maker files. The tool section of the catalog is extensive, and practically every tool that the rider or garage man will need is listed.

The lamp line handled by the firm is a most complete one, as is the variety of clothing offered. A wide variety of choice is available in signalling devices, lamp brackets and tool kits. Parts for the Corbin, Musselman and Eclipse coaster brakes, and for Eclipse clutch, are listed, as well as those for Schebler, Breeze and Heitger carbureters. The tandem line is most complete. In the parts section are listed components for Indian, Excelsior, Thor, Harley-Davidson and Merkel models.

Among the specialties handled by the

company are the Meco electric light, the Eclipse two-speed hub, and Meco footboards. In the bicycle section of the catalog, a nice variety of accessories is listed and parts for the New Departure brake are shown. The prices throughout the catalog are most reasonable. Attention is called to the fact that the Los Angeles branch, at 3064 South Main street, will take care of orders for the Pacific Coast, Mexico, British Columbia, Hawaii and Japan.

BUFFALO COMPANY BOUGHT BY U. S. RUBBER CO.

THE United States Rubber Co., New York City, has taken over the Iroquois Rubber Co., Buffalo, N. Y. The Iroquois property and that of the Buffalo branch of the company will be consolidated and operated as one establishment, at 379 Washington street, under the management of J. B. Watterson, formerly the Iroquois manager.

LAMM BROTHERS OPEN A NEW YORK BRANCH

NEW YORK, Feb. 14.—Lamm Brothers, of 339 North Gay street, Baltimore, Md., have just opened a branch at 752 Broadway, this city. A full line of the firm's Lamm brand motorcycle clothing is on display at the new metropolitan quarters.

GUTERMAN TO COVER MIDDLE WEST FOR R-S

BINGHAMTON, N. Y.—Lou H. Guterman, traveling representative for the Reading-Standard Co., of Reading, Pa., is now on his way to cover Ohio, Illinois, Missouri, Wisconsin and Michigan. He returned from his Southern trip on February 3 and made a final tour through upper New York prior to leaving for Ohio.

SMART INDIAN RIG IS USED BY RADIO MAN

NEW YORK.—Harry M. Horton, representing the DeForest Radio Telephone & Telegraph Co., in this city, is the owner of the smart Indian sidecar combination shown in the accompanying photograph. The sidecar is upholstered in mohair and has a silk mohair top. The tandem cushion is finished in the same material. Horton is frequently required to call for distinguished foreigners stopping at the big hotels and show them the city, and for this work he finds the sidecar combination excellently adapted. Besides its use for business purposes, both Horton and Mrs. Horton often take the rig out to the golf links and on other pleasure trips.

10-DAY TOURIST PRIVILEGE FOR AMERICAN RIDERS

OTTAWA, Ontario, Feb. 16.—The Canada Motorcyclists' Association has taken up with Hon. J. D. Reid, Minister of Customs, and Mr. John McDougall, Commissioner of Customs, the question of extending the ten-day free tourist privilege for American automobilists to cover the motorcycle field, so that American motorcycle visitors can cross into the Dominion without taking out a bond for the covering of possible duty charges.

F. N. TO ANNOUNCE NEW PRICES ON FOOTBOARDS

DETROIT, Mich.—The Fentress-Newton Mfg. Co., of 255 Lafayette Boulevard, this city, announces that all previous quotations on F. N. folding footboards have been withdrawn. While nothing definite has been announced regarding new prices, it is safe to say that the list per pair will not be less than $2. The company will do everything in its power to market the footboards at the $2 price. The new figures will be announced as soon as possible.

The change in quotations does not affect the price of F. N. tandems complete with folding footboards. Until further notice, prices on complete tandems will remain as at present.

UTICA CYCLE INCORPORATES

UTICA, N. Y.—The Utica Cycle & Supply Co. has just been incorporated in this city to deal in motorcycles and sundries. Capital stock is $125,000. Incorporators are William F. Carroll, Michael J. Carroll and Jos. F. Carroll, all of Utica.

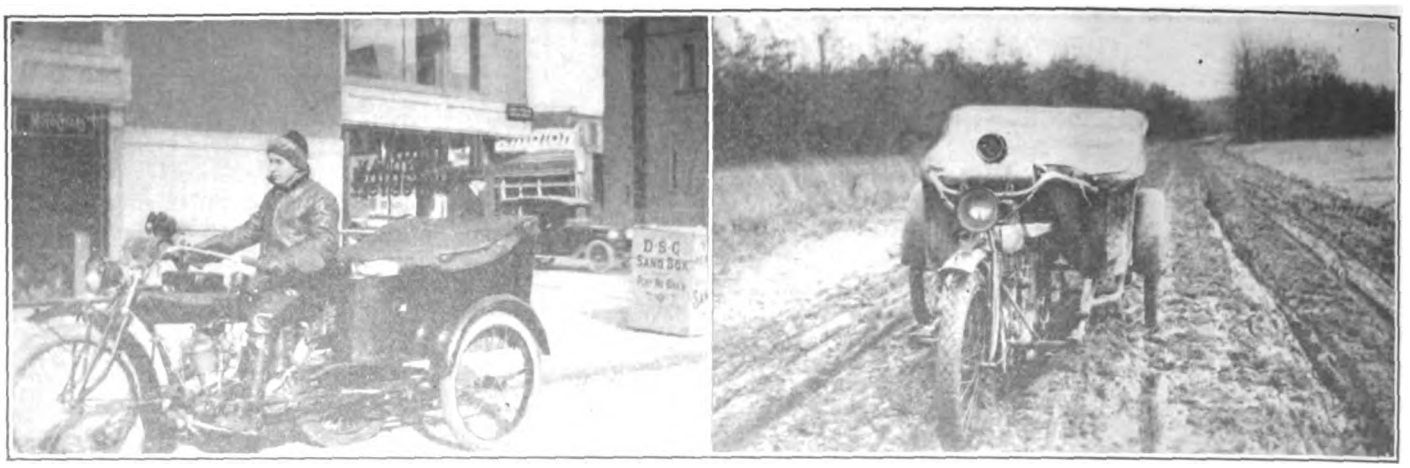
NEW YORK CYGNET TRAVELER HAS BRISK TRIP THROUGH LONG ISLAND



Left, Wallace Stuart with Rear Car Indian; Right, North Shore Road Near Wading River, Typical of Highways on Return Trip

NEW YORK, Feb. 14.—Wallace Stuart, of the New York Sporting Goods Co., 15 Warren street, has just completed a two weeks' trip through Long Island with a Cygnet Rear Car and Powerplus Indian. He covered practically every town in the island and traversed most of the roads. He closed twelve agencies, the dealers contracting for 60 cars in all.

Working Man Is Best Prospect

The class which takes mostly to the Rear Car on Long Island, Stuart found, was the working man, who will use the motorcycle to go to work every day and on Sundays, evenings and holidays attach the Rear Car and take his family for an outing. Stuart made no attempts to set records during his trip, but handled the outfit the same as an average rider would. His average fuel consumption worked out at 40 to 42 miles per gallon, while with two passengers the highest speed attained was 47 miles per hour. He rode 22½ miles from Greenport to Riverhead on a poor road in 40 minutes, averaging 33 miles an hour. As to carrying capacity, he took five passengers on a twelve-mile trip over average roads without trouble.

Stuart, who engages in much competition during the riding season, kept a memorandum of road conditions on the island. He recommends the South Short roads as the best for going to Southampton; the surface from Jamaica to Bay Shore being good macadam and asphalt; from Bay Shore to Moriches is a new cement road which tempts to the highest speeds. Regarding the road from Moriches to Southampton, the road is good dirt and macadam surfaces, but from Amagansett to Montauk Point the way is unridable except at certain seasons of the year. The surface is heavy sand.

Best Route Across Island

On crossing the island, Stuart found that the road from Bridgehampton to Greenport was the best and also the most picturesque. It is a new State highway for the entire distance. Two ferries have to be crossed to get to Greenport, the southern one being taken at Hogs Neck for Shelter Island. Stuart had to wait nearly an hour for the ferry, which consisted of a sailboat towing a scow. On reaching Shelter Island, a fine road was traversed to the north ferry and a tug taken to Greenport. The Cygnet driver had difficulty in making Greenport, as the harbor was ice-bound. It took him ten hours to cover the 14 miles from Bridgehampton to Greenport, and most of this was spent waiting or on the water. Naturally, in summer the trip could be made in one hour, but this was midwinter and no traffic on the roads.

The other cross-island trips recommended are Canoe Place to Riverhead, dirt road, poor in places; Quogue to Riverhead, dirt and macadam; Patchogue to Port Jefferson, good State road. Coming down the North Short the road is good from Orient Point to Riverhead, with dirt surface. From Riverhead to Huntington via Wading River and Port Jefferson there are poor dirt and sand roads. From Huntington to Jamaica the surface is macadam and State roads practically all the distance.

STILL GOING UP

At the Semi-Annual Meeting of the Directors of the Continental Rubber Works, Erie, Pa., the Office of Second Vice-President Was Created and W. J. Surre, Manager of the Company's Tire Sales Department, Was Selected to Fill It.

MOTORCYCLE SWEEPER IN LOS ANGELES

LOS ANGELES, Feb. 14.—One of the most interesting vehicles on the thoroughfares of Los Angeles these days is a motorcycle street-sweeper, supplied to the city by the Girton-Hoffer Company, representatives of the Excelsior line. The outfit is now receiving a thorough trial and it is predicted that its economy will lead to the purchase of other similar rigs in the near future.

Some idea of the efficiency of the outfit will be gained when it is stated that it covers the territory formerly swept by twenty White Wings. The sweeping mechanism and the operation of dumping the dust box are handled by the driver from the saddle. The city officials are much interested in the results so far obtained.

BECK IS GETTING ORDERS FOR NEW ROGERS VANS

NEW YORK, N. Y., Feb. 15.—Since the recent announcement of the new $65 model of the Rogers commercial van, Irving Beck, Rogers' eastern representative, has been receiving inquiries concerning the model and also a number of orders for the same. The next carload, due in this city on March 1, will include several vans to match each of the standard makes of motorcycle. The Rogers sidecar with fittings for attaching to Indian models has made a great hit with the trade, and Beck has had several repeat orders for this car already.

FOR COUNTY ROAD PAVING

TACOMA, Wash.—Pierce County, of this State, will spend $141,898 for permanent highway work this week. The roads to be paved included 2½ miles of highway east of DuPont and 5 miles of the Mt. Tacoma road.

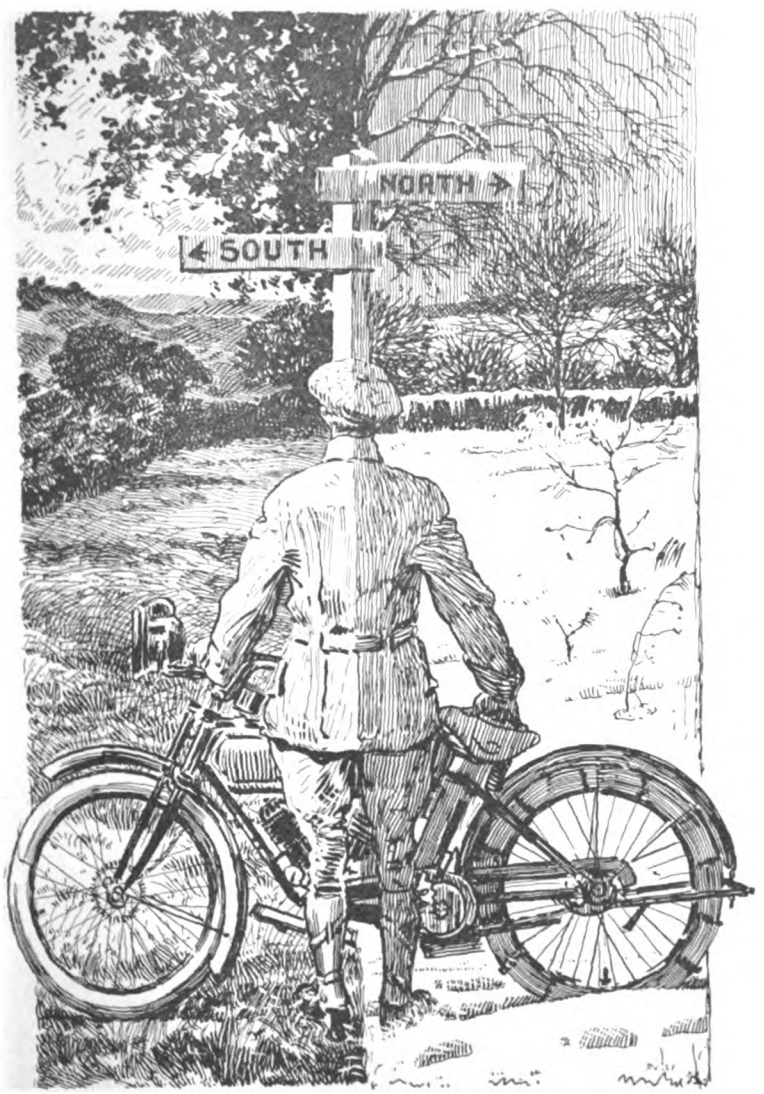
A VERSATILE SPORTSMAN



Bulletins of the last week or two have emphasized the fact that the motorcyclist is the truest all-weather sportsman to be found on our roads. Hub-deep in snow or rolling through smiling southern country, he is the same philosophical enthusiast—game, capable and hardy. Here's to him!

CO-OPERATION WILL POPULARIZE THE LIGHTWEIGHT

EDITOR, **Motor Cycle Illustrated.**—It was with a great deal of interest that I read the recent articles on competition between the lightweight machines and the big twins written by Arthur Chapple. I wish to congratulate **Motor Cycle Illustrated** on its efforts and believe that if the manufacturers would co-operate with the dealers it would result in calling the attention of the buying public to the economical merits of the lightweight.

The motorcycle clubs should also co-operate by runing racing contests and also changing their schedules in endurance contests so that the lightweight would be enabled to compete on terms sufficient to get a perfect score.

I have used a lightweight Schickel since last Fall to ride home from business and found that even when the pavements were wet it skidded very little. Owing to the low saddle position, too, I had less fear of falling than on a big twin. I have ridden the machine about 2,000 miles without any repairs so far.

A. ASHLEY.

Brooklyn, N. Y.

ORPUT'S CAPTURE BRINGS PLEASING RESULTS

PHOENIX, Ariz.—R. J. Orput, of the R. J. Orput Cycle Co., Harley-Davidson agent in this city, not only recovered a stolen machine, but also got a new member for the F. A. M. and a reward in the bargain, recently. He was offered a 1915 three-speeder by a stranger, and smelt a mouse right off. He promised the alleged owner to let him know as to buying the mount and then wired the Harley-Davidson at Milwaukee. He got a quick reply that the motor belonged to someone other than the stranger.

Orput got in touch with the Chief of Police and the stranger was nabbed. He proved to be R. L. Vilion and stated that he stole the mount from R. Rupley in Fort Worth, Tex. Then he and his brother had ridden to Phoenix to sell it. The upshot of the matter was that both Vilions and the Harley-Davidson are in the care of the State of Arizona, and will soon be shipped home.

Orput next informed Rupley in Fort Worth. Rupley is a reporter on the Fort Worth Recorder and was so tickled at Orput's capture that he sent the dealer $25 for reward and at once joined the F. A. M.

NEW ROAD FROM PHILLIE TO PITTSBURGH

ALTOONA, Pa., Feb. 16.—Local cyclists and motorists are rejoicing over the fact that this city will be included in the route selected for the proposed William Penn Highway, which, when completed, will connect Pittsburgh with Philadelphia. It will be constructed of macadam and finished with a composition ot oil, pitch and river gravel surface.

The new road will lead from Pittsburgh through Bedford, Altoona, Bellwood, Tyrone and Waterstreet, then to Lewistown, Mifflin, Harrisburg and into Philadelphia.

MOVES FOR ROAD IMPROVING IN WEST VIRGINIA

TERRA ALTA, W. Va.—Voters of the Kingwood district of this State have passed a bond issue of $164,000 for road improvement at the recent election in this city. The Paw Paw district, in Marion county, has determined to build 24 miles of permanent roads during the summer, the completion of which will mark the opening of two roads between the Fairmount district and the Monongahela County line.

Elkins is also out for good roads. A recent meeting of the Elkins Commercial Club and the Randolph County Good Roads Association saw the first move toward submitting a bond issue for road improvement in the Leadville district. The issue will call for the expenditure of $225,000.

MOTORCYCLE POLICE LOOKING FOR SPEEDERS

WASHINGTON, D. C., Feb. 15.—Motorcycle riders touring south by way of Baltimore and Washington are warned to take extreme precautions in order to avoid arrest on the Baltimore-Washington Boulevard. Speed traps have been installed at several points along this road, such as Savage, Laurel, Maryland Agricultural College, Hyattsville and Bladenburg. At each of these points is stationed a motorcycle policeman, who arrests on an average of fifteen to twenty motorists every day.

The road conditions south of Washington along the direct route from this city to Richmond are very good, with the exception of two bad stretches of about five miles between Washington and Fredericksburg, which are almost impassable to any kind of vehicle. By detouring via Frederick, Md., Winchester, Staunton and Charlottesville, Va., a fine toll road south can be found.

URGE HEAVIER PENALTIES FOR MOTOR SPEEDERS

ST. LOUIS, Mo.—Heavier penalties for speeders on motor vehicles were urged in the final report of the December Grand Jury, submitted to the Circuit Court here last week. The report said in part: "This Grand Jury believes that too great leniency has been shown in the past to all old offenders and we would greatly urge heavier penalties be assessed against repeated offenders found guilty of fast driving, including automobile, truck or motorcycle operators."

NEW CLUB FORMED IN PANHANDLE STATE

AMARILLO, Texas, Feb. 15.—The Amarillo Motorcycle Club was organized here last week and the following temporary officers were elected: President, C. R. Kersey; vice-president, Carl Straub; secretary-treasurer, H. A. Webster; road captain, Carl Robinson; press agent, C. Hoppin. Another meeting for perfecting the organization and electing permanent officers will be held on February 23.

There are more than seventy-five riders in this city and the newly formed club hopes to make every one of them a member.

MANY RUNS PLANNED FOR M. C. OF RHODE ISLAND

PROVIDENCE, R. I., Feb. 15.—A get-together meeting of the Motorcycle Club of Rhode Island was held in this city this evening and plans were discussed for the coming summer. President A. V. Howe conducted the meeting, which was attended by most of the motorcycle fans in the State. Other officers in attendance were Vice-President E. L. Buffington, Secretary A. J. G. Edwards and Treasurer B. A. Swenson.

The matter of club runs was taken up and several were tentatively arranged for the summer. The opening run, to take place in April, will be to Taunton, Mass., and will give the members an opportunity to watch the "run" of the herring. In May there will be two runs, the first on May 7 when the members will go to Westerly to visit George Murphy, Indian agent in that city. The second will be held on May 21, the destination being Roger Williams Park where the annual photograph will be taken. The annual Triangle Run, Providence-Boston-Worcester-Providence, is slated for October 1.

WHEELING CLUB SUPPLIES ROAD INFORMATION

WHEELING, W. Va.—Among the many things which the Wheeling M. C. is providing for its members, is complete road information covering all good road sections throughout the United States. In the club rooms are Blue Books and maps, as well as wall charts giving hotel prices and repair shop locations. President J. Landon Bier has just received a lot of road maps which are retailed to members at a moderate price.

Not only are the members to be benefited but also other Wheeling riders. Motorcyclists in the city are invited to get into touch with the club for road information regarding trips to be taken this summer. It is the intention to provide each tourist with a companion for this trip if possible. Every one of the 125 members of the Wheeling club is boosting for the organization in this and other ways, and will make 1916 a banner year for the organization.

PEENE IS WESTCHESTER COUNTY COMMISSIONER

Indian Day

February 22

On Washington's Birthday Indian dealers all over the United States will celebrate Indian Day.

In three years this occasion has become a trade event of such national proportions that it is recognized as the most productive sales day of its kind in the whole motorcycle industry.

Nearly 150,000 invitations alone have been sent out to riders and prospective riders.

Advertisements have been inserted in nearly 700 newspapers throughout the country.

Digitized by Google

A full page advertisement in the Saturday Evening Post carried the Indian Day message to a 2,000,000 circulation.

Special posters and selling helps have been sent to all Indian dealers.

Thoroughly and powerfully organized all the way through Indian Day has been staged as a sure-fire profit-making success.

What is its significance to the dealer?

It means a selling head start over competition at the very beginning of the season.

What is its significance to the rider?

It makes purchasing a pleasure and convenience because on Indian Day he meets many experienced motorcyclists in one group and is therefore able to profit by their collective advice and comments.

Indian Day has more to offer this year than ever before —it has the supreme attraction of 1916, the

NEW GOODYEAR FACTORY FOR CANADA

Site of Twenty-Seven Acres Has Been Bought Near Toronto and Plant Is to Cost About $750,000; Present Factory Outgrown

TORONTO, Ontario.—So much does the Goodyear Tire and Rubber Company think of the prospects in Canada that arrangements have been made, it is announced, for the erection of a huge plant near Toronto. This factory will cost in the neighborhood of $750,000, and the site secured covers an area of 27 acres. The locality is New Toronto, a suburb of this city, and the buildings are to be erected beside the new $700,000 concrete highway between Toronto and Hamilton. It is understood that the intention of the Canadian company is to make use of this highway for the delivery of tires and other rubber goods to both cities.

The headquarters of the Canadian company are located in a fine building in Toronto which was erected by the Goodyear people several years ago. The present Canadian plant is located at Bowmanville, Ont., some 60 miles east of Toronto, but the business has outgrown the capacity of that factory, which was originally operated by the Durham Rubber Company, making rubber specialties.

Practically all arrangements have been made for the building of the new works, it is declared. Plans have been made for a water supply and other necessities, and the matter of local taxation has also been settled.

SVENSGAARD TO MOVE TO NEW LOCATION

DETROIT, Mich.—The Harry Svensgaard Sales Corporation, Excelsior agent and Pullman sidecar manufacturer, will move from the present quarters at 473 Woodward avenue to 214 East Jefferson street on March 1. The Jefferson street address is that of the Wimmer Supply Co., of which the Svensgaard firm has recently purchased the stock and business. All of the firm's lines will be handled at the new address.

CONSOLIDATED M. C. DANCE

INDIANAPOLIS, Ind., Feb. 14.—The first annual dance of the Consolidated Motorcycle Club was held on February 7, in the P. H. C. Hall, over eighty couples attending. The hall was appropriately decorated in the colors of the club. The affair was a huge success, over twenty-five dollars having been cleared, and was run under the able direction of the committee, consisting of Fred Dyer, Emmet Tolle, Harry Todd and Harry Dunne. Other social affairs are contemplated.

BOOSTING THE TOURNAMENT

Novel Poster of Audubon M. C. of New York, Which Swelled Entry List For Annual Pool Contest

$40,000 FOR ROADS

BILLINGS, Mo.—A road bond issue of $40,000 was carried in the Christian County district last week. The money will be used to complete a link in the Springfield-Joplin highway.

DISCUSSING THE POWERPLUS

SAVANNAH CLUB WILL DINE RIDERS

300 Local Motorcyclists Invited to Attend Club's Banquet on Washington's Birthday; Discuss Fourth of July Plans

SAVANNAH, Ga., Feb. 16.—Three hundred riders of this city have received invitations from the Savannah Motorcycle Club to attend its Washington's Birthday banquet, on February 22, at the German Club.

Acceptations are coming in at a rate which leads the committee in charge to believe that over one hundred and fifty motorcyclists will be present. A field day program is being arranged which will include a number of running events, as well as jumping and bowling matches.

Last Sunday fifty riders met at the club house and then journeyed out to King's Ferry, where a delicious "fish fry" was served. This affair was one of the most successful held and only those members of the club who were in good standing were permitted to participate.

Much interest is being taken in the coming race meet at Augusta on Washington's Birthday. Roscoe Harn, of Savannah, will enter and is to ride the motor on which L. G. Buckner captured the championship of Georgia on New Year's Day. Plans are beginning to shape for the Fourth of July meet. Most of the riders favor a one hundred mile free-for-all race on the Grand Prize Course, while others prefer a road race in the morning and a track meet in the afternoon.

TO ENTERTAIN MILWAUKEE M. C.

RACINE, Wis., Feb. 15.—At the last meeting of the Racine Motorcycle club Frank Mesiki, the newly elected treasurer of the organization, tendered his resignation, and Wallace Nelson was elected to succeed him. The club is considering inviting the members of the Milwaukee Motorcycle club down to Racine for a social evening same as last year.

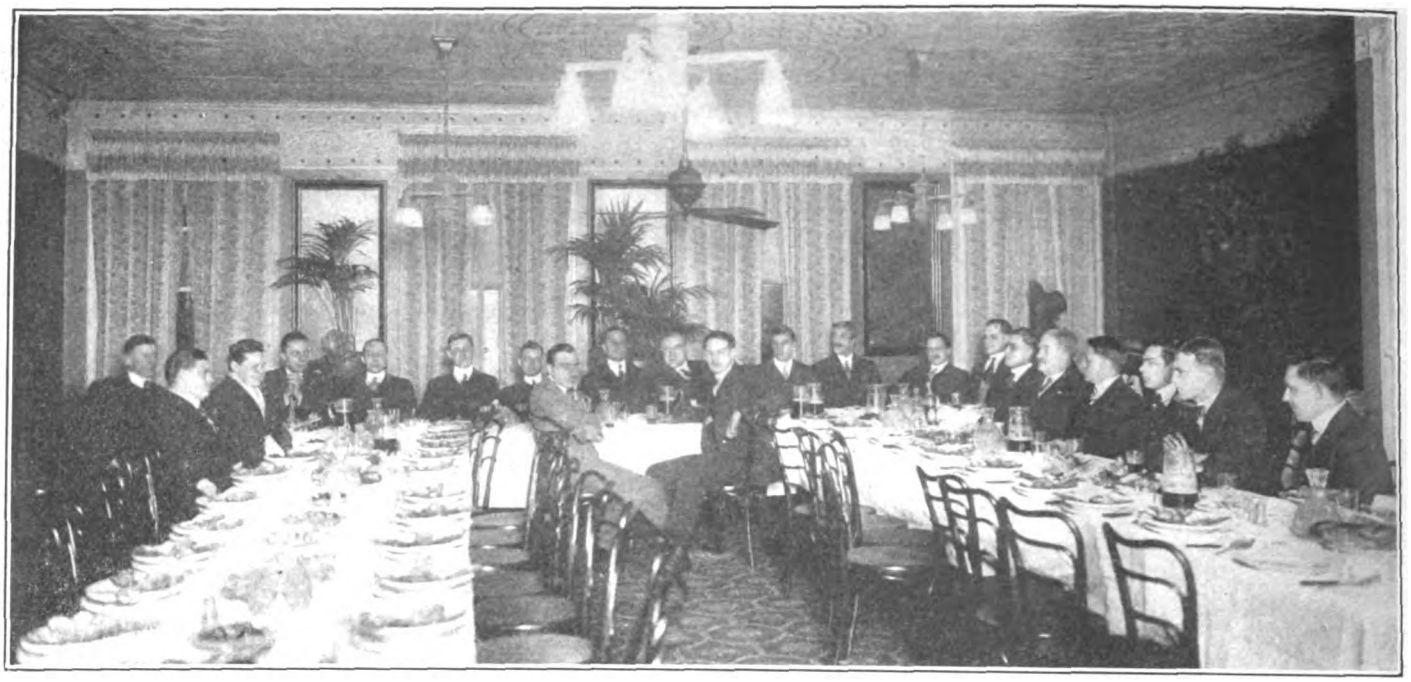
WHEN NEW OFFICERS DINED RETIRING STAFF OF NATIONAL CAPITAL M. C.



Following Custom of Past Seasons the Crack Washington, D. C., Organization Held This Banquet and Discussed Future Plans

NO SPACE LEFT IN THE INDIANA SHOW

Exhibitors Have Contracted For All the Booths and 4,000 Square Feet Will Be Devoted to Cycles; Show Opens Feb. 24

INDIANAPOLIS, Ind., Feb. 15.—The "No More Space" sign is hanging out on the office door of the Indiana Cycle Show committee, all the booths allotted for this year's exhibition having been contracted for. The committee has applications from two manufacturers who waited till the last minute, and an effort is being made to find room for them.

The demand for space far exceeded the fondest hopes of the show officers. No less than 4,000 square feet will be devoted to motorcycles and bicycles, and close to 10,000 square feet will be used for the promenade and stage.

While a complete list of the exhibitors is not yet forthcoming, the following have taken space: Cygnet Rear Car Co., of Buffalo, N. Y.; Van Cleef Bros., Chicago; Great Western Mfg. Co., La Porte, Ind.; Cyclemotor Corporation, Rochester, N. Y.; Davis Sewing Machine Co., Dayton, Ohio; A. O. Smith Co., Milwaukee, Wis.; Diamond Chain Co., Indianapolis; Excelsior Motor Mfg. and Supply Co., Chicago; Rogers Sidecar Co., Chicago; Cleveland Motorcycle Co., Cleveland, O.; Emblem Mfg. Co., Angola, N. Y.; G. H. Westing Co., Indianapolis.

Exhibiting for six additional manufacturers are the following: H. L. Dipple, Douglas & Talbott, H. T. Hearsey Co., Van Camp Hardware Co., W. A. Kelso, Chas. Koehring, Em-Roe Sporting Goods Co., Thompson Supply Co., Indianapolis Plating Co., Merz Motor Co.

In addition to the above, the Consolidated Motorcycle Club, the Indiana F. A. M., and **Motor Cycle Illustrated** will have booths at the show. Ten club members will be in attendance at the club booth each evening, waging a vigorous campaign for new members.

The F. A. M. booth will be in charge of State Secretary Fred Dyer and State Commissioner Jack Carr, and an attempt will be made to increase the State membership in the national organization. President A. B. Coffman will attend the show.

With the show already a success from a financial standpoint, it only remains for the committee to get the crowds to the exhibition, and the advertising the show is receiving in the State papers is expected to bring in the 20,000 people.

President W. F. Sturm, Secretary Jack Carr and Treasurer F. C. Baldridge Note All Spaces Are Taken for Indiana Cycle Show in Indianapolis and Smile Accordingly

NEW WILLARD STATION

KNOXVILLE, Tenn. — Marshall & Jones, of 412 Walnut street, have established a service station for Willard storage batteries for this city.

FOR PARK PATROLMAN

Four Indian machines for park patrolmen have just been ordered by the Metropolitan Park Commission at Boston through Geo. N. Holden, the Hub distributor.

THE DIRECTOR OF INDIAN SALES

NUMBER SIX IN A SERIES OF BIOGRAPHICAL SKETCHES ON TRADE LEADERS

Unremitting Industry and Firm Confidence in the Ultimate Strength of American Cycledom Are Outstanding Features of the Policy Which Carried F. J. Weschler From a Position as Office-Boy In 1898 to the Head of a World-Wide Sales Organization in 1916.

UNWAVERING confidence in the solidity of the cycle industries and a fixed belief in the principle of compensation—results in direct ratio to the energy expended—are salient features in the policy which has brought Frank J. Weschler, at the age of 33, to a position in the front rank of those who are making American motorcycle and bicycle history. As treasurer and sales manager of the Hendee Mfg. Co., Mr. Weschler wields an influence in the trade second to none, but this fact has not affected his inherent spirit of democracy, and he enjoys today the unique distinction of being one of the busiest and at the same time one of the most approachable men in the cycle field.

An Early Start

Mr. Weschler was born at Erie, Pa., March 6, 1883, being the fourth of six children, the family consisting of five boys and a girl. His mother is a native of Germany, while his father was a German of American birth. Mr. Weschler's father died at the age of 34, and as a result all of the boys felt that it devolved upon them to get out and hustle a little earlier than would otherwise have been the case. Reared under the strict discipline which has long been recognized as an invaluable feature of German family life, the Weschler boys welcomed the opportunity to be of assistance, and Frank's turn came when he was thirteen.

In the month of June of his thirteenth year the lad graduated from grammar school, and also passed examinations preparatory to entering high school the following September. During the vacation months he obtained work, and as it seemed to suit him better than attendance at school, he has, in his own words, "continued to work ever since." He found time, however, to top off his schooling with a season's course in a business college.

Entering the Cycle Field

In 1898 young Weschler took a position as office boy for the Black Mfg. Co., of Erie, Pa., manufacturer of the Tribune Blue Streak bicycles. He had not been there long when his industry and enthusiasm attracted attention, and he was assigned to various positions of increasing responsibility.

He remained at the Tribune works until August, 1902. At that time the Black Mfg. Co. was purchased by the American Cycle Mfg. Co., otherwise known as the "Trust," and a notice was posted in the factory to the effect that the Tribune bicycle plant would be shut down at once and moved, "bag and baggage," to one of the other factories at Westfield, Mass. Mr. Weschler was one of sixteen employees who were transferred to Westfield.

As he was still a minor, the youthful Weschler experienced some difficulty in obtaining his mother's permission to leave home, the situation being rendered doubly delicate by the fact that he was the first to break home ties. His mother was convinced, however, that nothing should stand in the way of his progress and she finally consented to have him profit by the transfer. Accordingly, he joined the staff of the company in Westfield, and remained there from August, 1902, till March, 1906. When he finally severed his connection with the plant he had risen to the position of buyer for the Westfield division.

During Mr. Weschler's stay at Westfield the business was acquired by the Pope Mfg. Co., and he declares that he will always look back with pride to his connection with that organization of wholehearted enthusiasts. He has a warm regard for his former employers and is a great admirer of Colonel Albert and Colonel George Pope.

FRANK J. WESCHLER

He Got Into the Swing of Hard Work at Thirteen and Has Never Lost His Stride

It was in the latter part of 1905 that the motorcycle business first gained Mr. Weschler's serious attention, and, appreciating to a small degree the great future ahead of the industry, he decided that it would be a wise move to associate himself with it in some substantial way. With this in mind, he was alert for an opening, and in February, 1906, he learned that such an opportunity existed at the factory of the Hendee Mfg. Co. He obtained an interview with Mr. George M. Hendee one evening and so far convinced the Big Chief of his general capabilities that he was taken on at once. "Needless to say," he remarked in conversation with a staff representative of **Motor Cycle Illustrated** a few days ago, "I have never had cause to regret the step."

The Hendee Growth

When Mr. Weschler joined the Hendee staff there were only six people in the office and about sixty in the factory. Some idea of the amazing rate of the company's growth will be gained from the statement that today there are 2,200 men employed in the factory, while the office, the various branches and the traveling force comprise over 200 people.

When the Big Chief added Mr. Weschler to the Indian staff he gave the newcomer an insight into the straight-from-the-shoulder methods of the organization by addressing him as follows:

"Mr. Weschler, in joining us I want you to come with the idea of becoming one of the family, and if you carry on your work as I expect you will, you will advance as the business progresses. On the other hand, if I find within a reasonable period that you are not doing what I expect of you I will come to you and tell you, and you will have to seek a field elsewhere."

Always Work Ahead

"It goes without saying," adds the present director of Indian sales the world over, "that this statement still rings in my ears. It was accentuated at the time by the fact that I had arranged to be married about two weeks after the date of entering upon my new position. Still, I have always felt that it was about as fair a thing as an employer could do for a new man. It convinced me that my future was entirely in my own hands, a fact that too many young men overlook, and forced me to see that the interests of the company were my interests."

"During the ten years that I have been with the Hendee Mfg. Co.," adds Mr. Weschler, "I have formed a close acquaintance with hard work, and I can't say that I have ever really caught up with all the matters demanding my attention. There is always work ahead of me, but my whole training has been along such lines as to enable me to tackle it with enthusiasm, and excellent health permits me to keep up the pace and enjoy it."

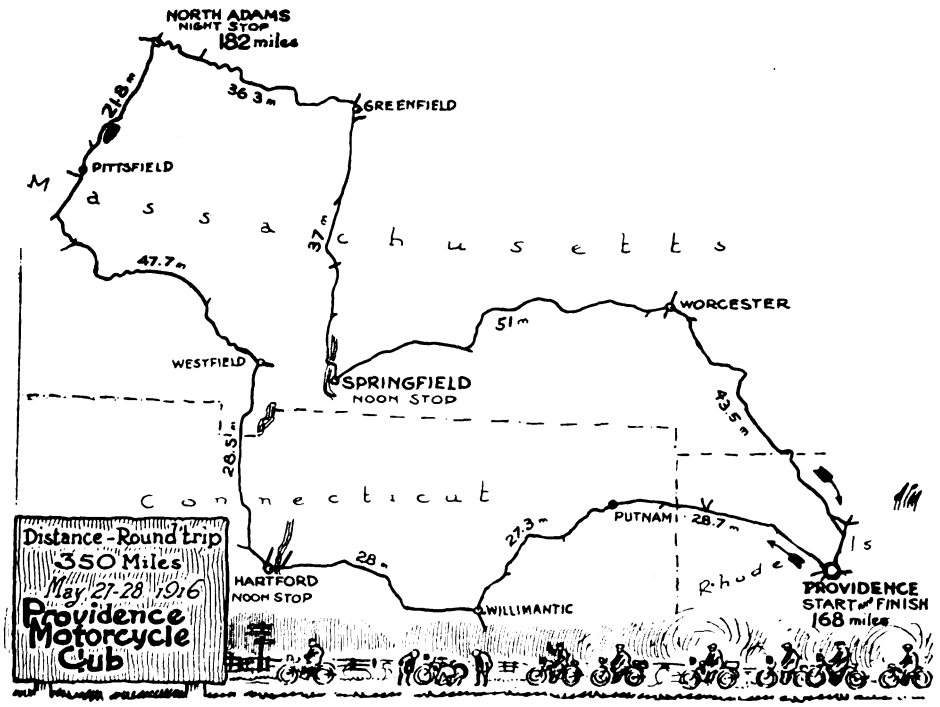
PROVIDENCE CLUB PLANS WEEK-END RUN

Rhode Island Clubsters, Under Swenson's Leadership, to Ride Through Berkshires and New Mohawk Trail on May 27-28



PROVIDENCE, R. I., Feb. 12.—Plans have been made by the Providence M. C., for a week-end trip under the leadership of B. A. Swenson, through the Berkshires and over the New Mohawk Trail. The dates set for this trip are May 27 and 28 and the total distance will be 350 miles.

The start will be made from Providence on May 27 at 7 a. m. The route will be from Providence through Putnam and Willimantic to Hartford, Conn., the noon stop. In the afternoon the route will continue to Westfield, Mass., and then to Pittsfield, through the Berkshires and over Jacob's Ladder with a night stop at North Adams, Mass. The total first day's run will be 182 miles.

On May 28, the start will be from North Adams and the return will be made to Providence via Greenfield, Springfield (noon stop) and Worcester, totaling 168 miles. To cover this mileage, a pace of 15 to 18 miles per hour average is necessary. The roads are of the best and the scenery is wonderful. The run will be really a pleasure ramble and it is expected that a considerable number will participate.

Later in the summer, President Swenson will conduct a trip or "ramble" to Niagara Falls, but this will take about ten days. This trip is rather more ambitious than previous tours and runs of the club under Swenson's direction, but he will undoubtedly have a considerable following for the ten days, not only among members of the club, but among Indian riders in all parts of New England. Swenson's runs have invariably been well attended during the last five years and each summer he heads at least three of considerable magnitude. It is stated around this city, that if there is a road in New England that Swenson does not know it is unridable or no longer in use by vehicles.

NOW GROSS MISDEMEANOR

OLYMPIA, Wash.—A legislative act of 1915 makes the theft of a motorcycle a gross misdemeanor in this State. Previous to the passage of this act it was possible only to charge larceny against a motor thief and injury to property against joy riders. This act was designated specifically to put an end to a form of crime which has earned many an easy dollar for men willing to take a chance.

BIG SUM ON ROADS

OLYMPIA, Wash.—Grays Harbor County had $274,903 worth of road work done in 1915. In the neighborhood of $50,000 was spent on the Olympia highway leading to Lake Quinalt.

Of a Personal Flavor

J. L. Mahin, founder of the Mahin Advertising Company, of Chicago, Ill., has sold his interests to W. H. Rankin, vice-president of the firm for the last seven years. Mr. Mahin retired at once from the presidency of the organization.

Paul Sutcliffe has been appointed advertising manager for the Edison Storage Battery Company, of West Orange, N. J. Mr. Sutcliffe got his earlier advertising and selling training in the West and was secretary for the W. S. Hill Advertising Company in 1912. He has been in the Edison advertising department for the past year.

J. L. Elwood has been appointed director of service for the Remy Electric Company, of Anderson, Ind. He was formerly superintendent of the Eureka Electrical Manufacturing Company, of North East, Pa., and at one time with the Remy production forces.

J. W. Hertzler has been appointed assistant manager for the Bearings Company, of America and is located at the factory in Lancaster, Pa. Mr. Hertzler was Western representative for the firm for the past four years. He is succeeded in the Detroit office by W. C. Little.

W. D. Albright is now Northwest manager of all lines of the B. F. Goodrich Company, of Akron, O., with headquarters at Portland, Ore. He was formerly manager of the Portland branch. He has supervision of all Oregon, Washington, Northern Idaho, Western Montana, British Columbia, Alberta and Alaska.

C. H. Williams is manager of the Chicago branch of the Goodyear Tire & Rubber Company, of Akron, O. He was formerly in charge of the company's branch in Portland, Ore. J. A. Leatherman has now assumed charge of the Portland branch.

Lou Wainwright, of the Diamond Chain Co., who is spending his vacation in the Florida jungles, has written to the Indianapolis factory describing the fine success he and the party of local men who accompanied him on the trip are having with the gun and fish rods. Wainwright has acquired quite a reputation locally as a fisherman and is certainly upholding that reputation in the Florida waters. The party expects to return to Indianapolis about the first of March.

H. H. Hubbard has been appointed assistant manager of the territory west of the Mississippi river by the United States Tire Co., New York City. He has been manager in St. Louis, Mo., for the company for four years, and will continue to make St. Louis his headquarters. O. S. Johnson, who has been Texas manager for U. S. tires, succeeds Hubbard at the head of the St. Louis branch.

C. H. Williams has been made manager of the Chicago branch of the Goodyear Tire & Rubber Co., Akron, O. He was formerly manager of the company's branch in Portland, Me., where he is succeeded by J. A. Leatherman.

Newark, N. J., Feb. 15.—Arthur Herrington, Jr., the well-known competition rider of the New Jersey Motorcycle Club, has joined the traveling forces of the Harley-Davidson Motor Co. He will boost the "gray fellows" in the state of Wisconsin. Herrington is not only an expert in motorcycle construction, but also an able and daring rider. In 1915 he captured a perfect score in the Invincible M. C. run and was high man in two of the New Jersey M. C. runs.

Arthur Herrington

Dave Troxel, president of the Troxel Mfg. Co., makers of Troxel saddles, at Elyria, O., is at present in Southern California, enjoying the climate and the fine boulevards.

M. E. Stokes, manager of the motorcycle tire department of the United States Tire Co., has just made a fruitful business trip to Chicago and other points of trade importance, and reports that all signs point to a record year. The company's motorcycle tire business is more active than it has been for several seasons, and Manager Stokes is correspondingly busy.

E. M. Ford, of Monroe, Mich, sales manager of the Elkhart Mfg. Co., has resigned to accept a like position with the National Coil Co., of Lansing, Mich., his resignation taking effect February 7. Mr. Ford has been connected with the Elkhart company since its organization in Elkhart in 1909.

The United States Tire Company has just added to its motorcycle department staff Mr. Shapcoot, until recently connected with the Federal Company. Mr. Shapcoot is very well and most favorably known to the Eastern trade. His pleasant personality has made him hundreds of staunch friends during the four-year period in which he has handled the export business and jobbing trade, in this section of the Federal Company. Mr. Shapcoot will be identified with the United States Tire Company as special representative, in the Eastern district, of its motorcycle department, and will travel from Maine to California.

Frank T. Chase, of the Frank Mossberg Co., of Attleboro, Mass., is taking an extended business trip which will necessitate visiting the following States: Tennessee, Alabama, Arkansas, Texas, Louisiana, Georgia, South Carolina, Virginia and Maryland. He will be absent for four or five weeks.

E. W. Simonds is now on the sales staff of the Superior Metal Products Company, of Elyria, O. He will cover Southern territory in the interests of the firm. The company is working on a new bicycle saddle which it expects to announce very shortly.

R. J. Firestone, general sales manager of the Firestone Tire & Rubber Company, of Akron, O., has rented a beautiful residence, known as The Outlook, near Pasadena, Cal., for winter use. It is well placed above the city, and the surroundings are most picturesque.

E. R. Wood, of Los Angeles, has been appointed manager of the Seattle, Wash., branch of the Firestone Tire & Rubber Company, of Akron, O. He succeeds C. W. Brown, now special representative for the coast.

Wilson C. Dold is now managing the St. Louis branch of the B. F. Goodrich Company, succeeding L. C. Rittenhouse, who recently resigned. O. E. Hoerger, who has been acting manager at St. Louis, will remain as assistant to Mr. Dold.

The staff of G. H. Keith, Pacific Coast representative of the Whitney Mfg. Co., with headquarters at 444 Market street, San Francisco, will be extended about March 15 by the acquisition of A. H. Coates. Mr. Coates is well known to Coast trade circles.

P. M. Evans, formerly chief chemist for the Willard Storage Battery Co., of Cleveland, O., is now in charge of the Philadelphia branch of the company at 1434 Brandywine street.

F. H. Smith, formerly with the Federal Rubber Co., of Milwaukee, Wis., is now superintendent for the Lee Tire & Rubber Co., Spring Mill, Pa. He succeeds A. J. Pennington.

F. E. Titus, for a long time Pittsburgh manager of the B. F. Goodrich Co., has been advanced to the position of general manager of the Goodrich branches in Buffalo, Rochester and Syracuse.

INVINCIBLE ANNUAL TO BE PLEASURE RUN

Brooklyn Club Schedules 200-Mile Spring Event for April 30 and Introduces New Class for Singles Prior to 1911 and Lightweights in Affair.

BROOKLYN, N. Y., Feb. 15.—Plans have been completed for the fifth annual spring run of the Invincible M. C., to be held on April 30. The course chosen is from Queens to Southampton and return to Bedford Rest, this city, the distance being 200 miles approximately. The run will be a pleasure affair, not a road race or an endurance test, the club officials state. The entry fee will be $2 per person.

There will be a new class in this run, composed of single cylinder machines of 1911 model or earlier and of lightweights. The other classes will be for passenger machines and for heavyweights. A passenger machine will be one motor pulling or carrying more than one person. The start will be made from Disbrow's garage, Hillside avenue, Queens, as follows: Single cylinders and lightweights, 7 a. m.; passenger machines, 7 a. m.; heavyweights, 7:30 a. m.

The field is due to arrive at Southampton before 12 noon. The start for Brooklyn will be made at 1 p. m. The times for arrival at Bedford Rest, are: Single cylinders and lightweights, before 6:30 p. m.; passenger machines, before 6:30 p. m.; heavyweights, before 6 p. m. Every rider who pays an entry fee, whether as passenger or driver, and finishes before the expiration of the time limits at Southampton and Bedford Rest, will be awarded a perfect score. Each male rider getting a perfect score will receive a handsome silver medal, while lady riders will receive gold plated medals as souvenirs.

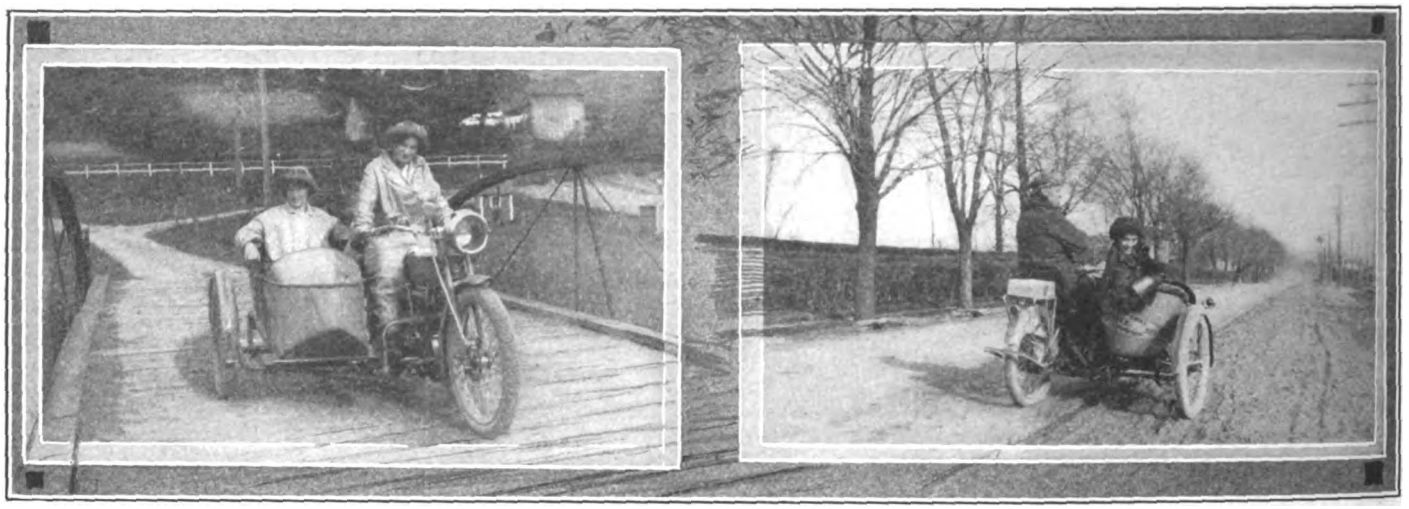
FULLER STORES BIKES IN NOVEL MANNER

TACOMA, Wash.—Manager Fuller, of the Tacoma Henderson shop is putting in a stock of Dayton bicycles and has suspended them from the ceiling on strong wires in order not to crowd his floor. The wheels can also be seen better from the street. During the cold weather he has almost reached his capacity on live storage of machines.

CARLOAD OF EXCELSIORS FOR PIPER & TAFT

SEATTLE, Wash.—The first carload of Excelsior bicycles to be ordered for the Northwest has been received by Piper & Taft, Excelsior distributors. This make of bicycle has always been a good seller here and the firm will have no difficulty in disposing of their allotment.

THESE ENTHUSIASTS MAKE THE MOST OF THEIR SIDECAR OPPORTUNITIES



PHOTOGRAPHS of hardy motorcyclists plugging snow are so plentiful these days that the two pictures above reproduced will doubtless come as something of a relief to folks who keep in close touch with motordom. It will be noted that Jack Frost does not get a look-in on either of the views, and the tourists appear to be correspondingly happy.

At the left is Miss Lillian Storms, driving, and Miss Minnie Wetherel, of Syracuse. They were snapped near Homer, N. Y. Miss Storms drives her sidecar outfit all over New York State and gets over the road like a veteran. She is able to make any ordinary repairs, but asserts that she is never bothered in that way.

The photo at the right shows Percy Adams, of the G. L. Potter Co., near Liverpool, N. Y. His passenger is Miss Barbara Weber. It will be seen that the sidecar is a model of neatness and that Miss Weber's costume is fine for roadwork.

JAMAICA RUN DATE SET

JAMAICA, N. Y.—The Jamaica M. C. will hold its annual spring run on May 8, the route being from this city to Rhinebeck, N. Y., a distance of 225 miles. The run will be in accordance with F. A. M. regulations. A committee of three, which consists of H. Schmidt, S. Billings and F. Schmidt, is laying out the route.

COLUMBIA SUPPLY OPENS BRANCH IN WASHINGTON, D. C.

WASHINGTON, D. C.—A new branch store has just been opened by the Columbia Auto Supply Company at Thirteenth and H streets. It is in charge of C. M. Marcey, who for three years was branch manager for the Miller Brothers Auto Supply Company. The Pope motorcycles and bicycles will be handled from both the branch and the main store.

A large order for both motorcycles and bicycles has just been despatched to the Westfield Mfg. Co., makers of Pope products, and a big season's business is expected.

C. M. Marcey

WANTS AMERICAN MOTORCYCLE

Jean Louis Conchon, of 412 Chatelaine. Geneva, Switzerland, is looking for a first-class American motorcycle and wishes to get into communication with manufacturers regarding their different models. He requests catalogs to be sent him.

PARA RUBBER PRICE UP

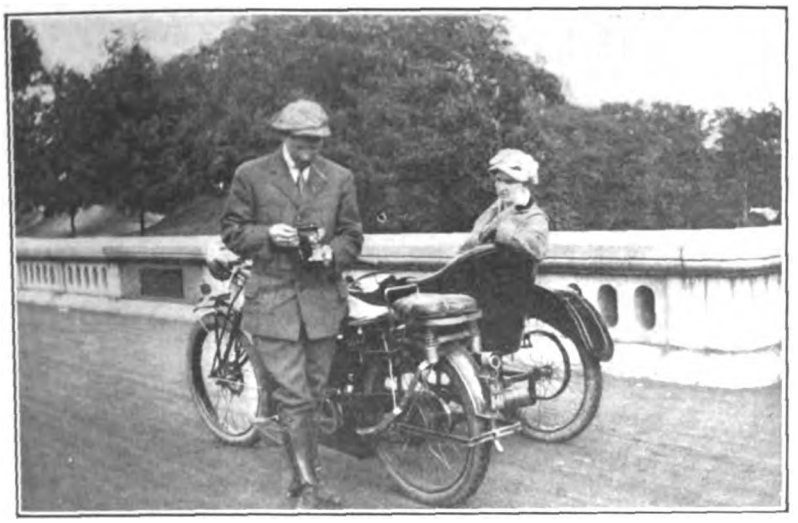
According to the American Consul-General at Rio de Janeiro, Brazil, the price of Para rubber has increased fully 50 per cent. since the middle of November. As a result, there is a condition of general prosperity throughout the Amazon Valley.

SPENCER ENLISTS

HAMILTON, Ontario.—R. Spencer, one of the most prominent track and road motorcyclists of Hamilton, has enlisted with the 120th City of Hamilton Battalion for overseas service.

Digitized by Google

EDWARDS PREACHES AND PRACTICES NEATNESS



J. G. EDWARDS, who was caught in the act of taking a snap-shot in the above picture, is B. A. Swenson's right-hand man at the Providence wigwam and one of the best-known riders in his district. In addition to being a consistent roadster, Mr. Edwards has made a point of neatness in his riding togs and has done a great deal to inspire Providence enthusiasts with a proper regard for a tidy appearance. A glance at the photo will show that his costume is a model of neatness, and that his sidecar outfit gives a correspondingly pleasing impression.

DEALERS INTERESTED IN KENTUCKY BILLS

Measures Introduced to Lower Motor Wheel License Fee to $2 and to Make All Cities Recognize Motorcycle Licenses

LOUISVILLE, Ky., Feb. 15.—Motorcycle and bicycle dealers as well as riders are taking considerable interest in a number of bills which have been introduced into the State Legislature, some of which are considered excellent measures which will materially benefit the trade and riders.

One of the principal bills is that introduced by Representative Barrett, which proposes a law whereby a person stealing a bicycle is guilty of a felony. Under existing laws a judge may only charge a bicycle thief with misdemeanor. This bill has been reported favorably by the house committee.

Representative Barrett has also introduced a bill to change the present motor license so that the two horsepower motor wheel will be classified separately from the motorcycle and the license charged to the owner will be $2, instead of $5, the fee which at present is being paid by motorcycle users. Motorcyclists have for some time been trying to get the Legislature to reduce the license tax, for they are paying almost as much as owners of lightweight automobiles.

Senator Knight, of Louisville, has presented a bill which carries a penalty for all persons convicted of throwing glass on streets or public highways. Nearly every city in Kentucky has an ordinance on this subject, but the country roads are sometimes liberally strewn with bottles and quite often no attempt is made by the cities to enforce their ordinances.

Another bill which has the support of the motorcycle fraternity is one providing that licenses issued in one city of the State should be valid in all other cities of the State. Under present conditions, it is necessary for a rider to take out an additional license if he moves from one city to another before his first license expires. This bill has also been reported favorably.

ASCOT TRACK TO BE SPEEDY

LOS ANGELES, Cal.—The Ascot Speedway is being thoroughly rebuilt under the direction of Paul J. C. Derkum, and the first motorcycle race in Southern California will be held on it. Derkum has completed the grading and is having the work on the paving pushed through.

The turns have been built up to 12 feet, and the track is being brought up to date in a manner which will undoubtedly permit of some very fast events being pulled off on it.

LEE HANDLES POPE LIGHTWEIGHT

LOS ANGELES, Feb. 14.—By a special arrangement which was made by Sales Manager Harden of the Westfield Mfg. Co., makers of the Pope motorcycle and bicycle, and C. L. Smith, the local jobber, Mr. Lee, of the Henderson Motorcycle Sales Corporation, is handling the Pope lightweight retail business in Los Angeles. The Pope lightweight is now being shown in the splendid new Henderson store on Main street. This gives the sturdy little Pope an advantageous position on motorcycle row.

SHAW AGENCY OPENED

LOS ANGELES, Feb. 14.—The Shaw Motor Bike Agency Co., 828 South Spring street, Los Angeles, has been recently organized, with Werner & Wiechmann as proprietors. They are handling the 2½ horse power Shaw motor attachment for bicycles. The new firm is state distributor and will do a retail business in this city.

NEW F. A. M. COMMISSIONERS

Homer Cumberland, of Niagara Falls, N. Y., has been appointed local commissioner for Niagara Falls, and Ray E. Rottsted, of Olean, N. Y., will represent the F. A. M. in Cattaraugus and Allegany counties for 1916.

THE SCHICKEL AT ROCHESTER AUTO SHOW

Looking Down the Stretch

February 15-20, Grand Rapids, Mich.—Grand Rapids motorcycle show in Klingman building.

February 20, San Francisco.—Endurance run of the San Francisco M. C., 270 miles.

February 22, Phoenix, Ariz.—Race meet for benefit of Loyal Order of Moose sanatarium.

February 22, Augusta, Ga.—Race meet on half-mile track, 30½ cubic inch machines.

February 24-26, Indianapolis, Ind.—Motorcycle and bicycle show at Tomlinson Building.

February 29.—All parts of the United States—BICYCLE DAY.

April 12, Springfield, Mass.—Spring meeting of the Motorcycle Manufacturers' Association.

April 16, Fresno, Cal.—100 mile free-for-all race under direction of Fresno M. C.

April 30, Brooklyn, N. Y.—Annual spring run of Invincible M. C. to Southampton and return, 200 miles.

May 7, Jamaica, N. Y.—Endurance run of Jamaica M. C., to Patchogue and return.

May 21, Harrisburg, Pa.—Endurance run of Keystone M. C. to Altoona, Shamokin, Pottsville, Reading and return.

May 28-30, Boston, Mass.—Three-day endurance run at Bay State M. C.

May 30, Roanoke, Va.—Race meet of Dixie M. C.

May 30, Wheeling, W. Va.—Race meet of Wheeling M. C.

May 31, Newark, N. J.—400 mile run, day and night of New Jersey M. C.

June 10-11, Worcester, Mass.—Fifth annual 24-hour endurance run of Worcester M. C.

June 18, 19, Wheeling, W. Va.—336 mile endurance run to Bedford, Pa., and return, of Wheeling M. C.

June 30, Wheeling, W. Va.—Sealed time run of Wheeling M. C.

July 4, Roanoke, Va.—Race meet of Roanoke M. C.

July 2-3-4, Grand Rapids, Mich.—Michigan State F. A. M. reliability trial, under auspices of Grand Rapids M. C.

July 4, Wheeling, W. Va.—Race meet of Wheeling M. C.

July 16, Wheeling, W. Va.—Tri-State endurance run and open house, distance 100 miles, Wheeling M. C.

July 30-August 12, Wheeling, W. Va.—Run to Atlantic City and return, 600 miles, of Wheeling M. C.

September 3, Harrisburg, Pa.—Endurance run of the Keystone M. C.

September 4, Roanoke, Va.—Race meet of the Dixie M. C.

September 6, Wheeling, W. Va.—30 mile road race of Wheeling M. C.

SAYS ST. LOUISANS ARE DOWN ON AUTOS

ST. LOUIS. Mo.—The charge that St. Louisans are prejudiced against automobiles was made by an attorney in the Circuit Court here last week. The case was that of Rudolph Schneider, Jr., who was run down by an automobile alleged to have been driven by Charles J. Sutter. Schneider was riding a motorcycle at the time. He sustained a broken leg, a broken arm and other injuries and asked $15,000 damages.

Sutter's attorney asked for a change of venue to some other court outside of St. Louis by reason of this prejudice. In support of his claim, the attorney introduced as evidence a mass of newspaper clippings which listed the number of deaths due to automobile accidents. He also introduced as witnesses two claim agents of the United Railways of St. Louis, who testified that in settling claims against the railways they found people were prejudiced against automobiles. The case was taken under advisement.

ISSUED 2,142 LICENSES

BUFFALO, N. Y., Feb. 15.—Motorcycle License Clerk Charles Egloff announces that he issued licenses for 2,142 motorcycles last year. Shortly he will issue the 1916 licenses which will be green and white. He expects that 2,500 motorcycles licenses will be issued this year.

MONTHLY POPE LETTERS ARE AIDS TO DEALERS

WESTFIELD, Mass.—As a part of its extensive cycle boosting campaign, the Westfield Mfg. Co., maker of Pope motorcycles and bicycles, is issuing a series of monthly letters to all its dealers. These letters incorporate a calendar with a breezy sketch illustrative of the suggestion embodied in each. The January bulletin calls the attention to the dealer that January is the month of opportunity—that it is the month for stock-taking and estimating profit and loss. During this month it is suggested that the dealer clean up his establishment and arrange his selling plans. Particular notice is called to the question of window display.

In the February letter, the month is characterized as the unusual month, when the rider begins to think of the open road and the farmer completes his buying before the sowing season. "The one way to capitalize all this interest," says the letter, "is to keep Pope motorcycles and bicycles continually in the public eye." Methods of doing this are described in brief.

NEW F. A. M. ATTORNEYS

Bonum Lee Kirk, of 507 First National Bank Building, Champaign, Ill., has been appointed F. A. M. attorney for Champaign, and S. B. Taft will care for F. A. M. interests at Uxbridge, Mass. In Cleveland, O., Spear, Mills, Knight & Godfrey, with headquarters in the American Trust Building will act as attorneys, while W. A. Keleher, of Cromwell Building, Albuquerque, N. M., will act in Aubuquerque. The appointments have all been made by W. M. Johnson, chairman of the Legal Action Committee.

POLICE MACHINE BIDS IN

NEWARK, N. J.—Bids for the equipment of the Essex County Park Police with 1916 motorcycles have been in the hands of the commissioners for the past week or so, but no inkling as to what the men are to ride has been divulged. The department is at present using seven 1915 Indians, all of which have more than 11,000 miles to their credit.

NEW AFFILIATION

The Melrose M. C., of Bronx, N. Y., has affiliated with the F. A. M. The secretary is Frank Laux, of 365 East 153rd street. There are eighteen members, all F. A. M.

WIDESPREAD PLANS FOR INDIAN DAY

Braves Throughout the Country Are Decorating Their Stores, Stocking Up With Cigars, Souvenirs and Information and Otherwise Getting Ready for Big Annual Salesfest

H-I-I-I-YIP! Catch 'um 1916 model. Smoke 'um Powerplus cigar. Everybody happy. Sign order blank on the dotted line and slip 'um wampum to cashier."

If you have heard such mystifying language as the above breaking the crisp and icicley silence of your neighborhood of late, Gentle Reader, you will no doubt be interested in learning that you are in no particular danger and that the unwonted excitement is all due to the fact that Indian motorcycle and bicycle dealers are tuning up for Indian Day, which is slated for Tuesday, February 22. This will be the third annual Indian Day and every indication points to a more successful showing than last year's, which was itself something of a record-breaker.

Special Program Outlined

At every tepee throughout the country there will be a special program on February 22, incidental to the formal presentation of the new models, and in addition to talking business the agents will loosen up and extend the glad hand. In other words, there will be social doin's as well as sales arguments, demonstrations and sich, and everybody will be welcome. It goes without saying that the big idea is to acquaint the general public with the fact that the new machines have arrived, but sufficient emphasis will be placed upon the sociability feature of the day to insure a pleasant hour or two even for the chap who doesn't see his way clear to sign up for a 1916 model instanter.

For weeks past the Hendee Mfg. Co. has been working with its dealers to perfect the plans, and a number of circular letters and posters in color have been supplied for general use. In addition, the company is featuring Indian Day in all its advertising, national and otherwise. On this page is reproduced a copy of an advertisement sent to dealers for insertion in their local newspapers.

Maslin's 1915 Celebration

An excellent idea of the methods pursued by leading Indian dealers on Indian Day will be gained by reference to the showing of George S. Maslin, of Philadelphia, last season. Maslin states that no less than 1,500 people visited his establishment during the day and evening. Nine hundred of these had received special invitations and the others simply dropped in to see what was happening. Maslin served coffee, sandwiches and cigars and kept ten men busy showing the new models. His records for the day showed that he sold twelve new machines, three second-hand machines and two sidecars.

Other dealers up and down the country reported proportionate success, and the fact that they were well satisfied with the returns was emphasized this year when the plans were taken up again and letters began to pour into the Hendee factory telling how the braves were digging out their war-paint and their gala togs and preparing to whoop things up.

So—to hark back to the opening paragraph—anything unusual that may happen during the next few days in the vicinity of an Indian agency need occasion no uneasiness. The bucks are merely trying out their tribal lingo and getting ready to pass out souvenirs, cigars, information and good cheer and at the same time to keep one hand free for stacking up the orders.

How Indian Dealers Are Breaking the News in Their Local Newspapers

KEEPING WHEELS ALIGNED REDUCES TIRE WEAR

AKRON, O.—A recent bulletin issued by the Goodyear Tire & Rubber Company warns users of motor vehicles to keep their wheels in alignment and points out the extra tire wear which a mis-alignment occasions. This will apply to the sidecar and motorcycle the same as to the larger motor vehicle.

When the wheels of a sidecar rig are not parallel, the tires must undergo a diagonal grind, says the bulletin, and wear is consequently not centered on the tread. In fact, any unusual wear on the treads should call for a look at the wheels. Sometimes an axle becomes bent by a severe blow or the wheel gets out of true. The tread, in all cases, will soon grind off and the user then has a choice of three courses. First, to run on the fabric of the tire with its susceptibility to puncture and weakening by moisture working its way into the fabric and separating the plies. Second, to have the tire re-treaded, and third, to replace it with a new one.

Whatever course is selected, the wheels must be placed in alignment. The same condition applies to the front and rear wheels of a motorcycle being out of line, due to a bump or accident, for the cocked wheel will wear unevenly on the tread as does the sidecar or rear wheel of the motorcycle sidecar rig. After the outfit has received a hard bump, the user should see at once that the axles have not been bent or the wheels knocked out of true. By regular examination and testing of the wheel alignment, an early demise of the tires can be prevented and the purchase of new ones postponed.

HE BOUGHT A SIDECAR, TOO

LOS ANGELES, Feb. 14.—While the roads were so slippery along the mountain canyons that a slide off into an arroyo was to be expected at any of a hundred places, Glen Lowe came to Los Angeles from Santa Barbara on his 1913 Henderson to take a look at the 1916 mounts in the new Henderson store. After riding about town with George A. Klapp, of the Henderson Sales Corporation, for more than an hour in a new Henderson sidecar combination, Lowe not only bought a new machine but also got a Rogers' sidecar and hustled back to Santa Barbara.

GASOLINE AT 20 CENTS NOW

SPOKANE, Wash.—Gasoline is now retailing in the Inland Empire at the top-notch price of 20 cents per gallon. On account of the deep snow, there are few motorcyclists purchasing at that price, for few are riding.

SIDECARING THROUGH MUD AND FLOOD

An Account of Two Interesting Sidecar Trips Taken by a Party of Chicagoans in Illinois and Indiana —Cross Stretch of Water One and a Half Miles Wide

By E. RYDER

CHICAGO, Ill., Feb. 14.—We took two very interesting trips last summer that certainly prove that the motorcycle is the only vehicle for all kinds of weather and all sorts of roads. The first ride was undertaken by a party of five of us over route, part of which could be called, without a particle of exaggeration, a sea of mud.

We all got into our Thor sidecar combinations early one morning and decided to take a spin out to Starved Rock. Our party included Mr. and Mrs. N. Linden, Mr. and Mrs. A. Watson, Mr. and Mrs. J. C. Nichols and son, Mr. and Mrs. E. Ryder, and Mr. and Mrs. Osborne and son. It was a real family affair, as you can see; and our party did not look forward to the rough riding that we were to encounter.

Before we had gotten out from the Windy City very far, the writer found the mud so deep that twice he had to stop and raise his spare tires which were carried in tire holders at the back of the sidecar. These tires clear hard roads by seven inches. At one point five miles from Ottawa a bridge was washed out and there were five automobiles lined up studying the situation. We didn't hesitate, but took the side ditch and plunged right into the mud and water, "magneto deep," with the foot boards ploughing into the mire.

Well, the five Thors got through the creek and back on the road again without stalling. A farmer there told us that he had been hauling automobiles through the creek the entire forenoon. "But you motorcycle fellows," he added with the regular hayseed drawl, "don't appear to need any help. You just naturally seem to take to water like a lot of ducks." We laughed and were off again.

It was fine sailing the rest of the trip and our party put up for the night at Streator, Ill. The next day we took in Starved Rock and the Utica Hills without a falter—which isn't bad considering the weight of our outfits, two of us having our wives and sons with us. I should say that our five Thor combinations including passengers, weighed from 790 to 810 pounds each. We arrived home on the following morning, having covered 268 miles. We had two punctures, but no mechanical trouble.

On Flooded Beaver Lake Road

A short time after this trip the writer announced to his friends that he would like to ride out to Earl Park, Ind., where he had formerly lived, to visit some old friends. Unfortunately all of us could not make this trip. In spite of the fact that our party was small we enjoyed ourselves thoroughly. We reached Crown Point, Ind., in two hours, after showing the dust to a big six roadster on a wonderfully smooth road that entered the town. Our speedometers then registered 48 miles from the Windy City. We stopped to take some pictures from the Kankakee River bridge, and then left the Indianapolis blue book route to take the direct course south through the old Beaver Lake bed which had been drained. We arrived in Monica two hours and a half later, took on a second supply of gasoline, after which we hustled into Earl Park, one hundred and seventeen miles from Chicago. Here we decided to halt.

That night the country was flooded with an extremely heavy rain. We spent the Sunday in Earl Park to see our friends—not because of the bad rain, for the Indian rock roads are as dry and smooth as boulevards after a rain storm. On Monday morning we left for home. We got as far as Beaver Lake, when a farmer on horseback warned us to go back, saying that the bed of the lake was flooded. While we were holding a little conference as to what had better be done, two men appeared from the direction of the flooded section and announced that the road foundation was in good condition but covered for most of the way with two feet of water.

We risked it and succeeded in crossing the stretch of water which was one and a half miles wide. In the two-foot depth of water the front wheel made a furrow so that the magnetos on the Thor machines were not flooded. The writer took a picture from the sidecar (which is reproduced on this page) of the second machine coming up out of the lake. A little further on we encountered ruts that came near forcing the sidecar frames down to the ground. But the old Thors pulled us through in fine shape.

After quitting the ruts we were once more on good Indiana rock roads, which in spite of the rain on Saturday night, were as free from mud as city boulevards. Except for the fact that we had to place planks across a stream, where the bridge has been washed out, we had clear going into Chicago, reaching home at two o'clock on Monday afternoon.

Our Canadian Letter

HAMILTON DEALERS CLIMB ON BOOSTERS' STAND

At Second Annual Meeting of Local Dealers' Association Co-operative Plans Are Discussed for the Canadian Bicycle Week—Ferries Is Elected President and Speaks on Organization

HAMILTON, Ontario, Feb. 16.—Hamilton accepted the idea of a bicycle boosting week and also adopted the Canadian slogan, "100,000 Bicycles in 1916," at the second annual meeting of the Hamilton Bicycle and Motorcycle Dealers' Association on February 8. After considerable discussion the following suggestions were worked out:

During the Bicycle Week, which will probably be held early in March, each dealer will dress his window to draw the greatest amount of attention to bicycles and accessories.

Store interiors also are to be brightened and re-arranged.

Prize Will Be Offered

Each dealer promised to insert in one or more daily papers a series of advertisements which would boost the bicycle.

Prizes are to be awarded for the best-dressed window; for the best newspaper advertisement and for the best-arranged store interior.

The management of each of the three local newspapers will be asked to publish a whole bicycle page in each issue during the week in view of the heavy advertising to be done. The papers will be asked to publish articles and stories about the bicycle of general interest.

New Officers Chosen

The meeting, which followed an informal banquet and which was attended by representatives of the sixteen local stores, was a most enthusiastic event. Several large Canadian manufacturing and jobbing houses had several experts present to give sales talks. Officers for 1916 were elected as follows: President, N. S. Ferries; vice-president; W. F. Longfield; secretary-treasurer, J. R. Dixon; executive committee, Charles Webb, G W. Tyner and J. Scott.

In addressing the gathering, President Ferries declared that a good deal of the energy which the Hamilton dealers had wasted in years previous to 1915 in cutting each other's throats and in petty scrapping was now being used in a proper manner, with a result that all of them were now enjoying more business and more profit than at any time in the history of the bicycle. Prices which are fair and reasonable for both dealer and consumer had been maintained during the first year's existence of the Hamilton association.

During 1916 the dealers will meet on the first Tuesday in each month, when a business session will follow an informal dinner at one of the leading hotels.

NO RISE IN CYCLE PRICES IS LOOKED FOR

TORONTO, Ontario.—There is every reason to believe that the price of bicycles in Canada will not be raised during 1916. The largest manufacturer of bicycles in Canada recently told a representative of **Motor Cycle Illustrated** that his prices were never changed after a season's announcement had been made, even though the cost of raw materials varied greatly from estimates. His contracts with retailers had all been signed and these would not be altered under any circumstances.

Another Canadian bicycle producer declared that he had secured all the steel tubing and other raw material that he will need for his entire output this year and that he would keep his trade prices low. He made large purchases of steel and parts in England and the States many weeks ago because he foresaw that prices would advance.

Another company which assembles a large quantity of bicycles also took time by the forelock by securing generous shipments of parts from the States last fall. The prices which this company will charge for 1916 may be slightly reduced.

WILSON COMPANY WOULD REDUCE AGE LIMIT

TORONTO, Ontario, Feb. 16.—Officers of the John T. Wilson Company, Limited, Toronto, the Canadian and original manufacturers of the Cyclemotor, are endeavoring to have the age limit of motorcyclists in Canada reduced from eighteen to fifteen years, in which case, they declare, they could sell a great many more Cyclemotors. It is the aim to have the age limit lowered in each of the Provinces for riders of lightweight machines at least. The attention of the Canada Motorcyclists' Association has been drawn to the matter.

President D. G. Anderson, of the Cyclemotor Corporation, Rochester, paid a visit to Toronto recently, when he announced that the company's business in the United States had been "excellent," while business in Canada so far was remarkable."

CYCLING UNION REFUSES TO ISSUE RACING LICENSES

MONTREAL, Quebec.—Under date of January 18, the President of the Union Vélocipedique de France has written from Paris to Alderman Louis Rubenstein, of Montreal, president of the Canadian Wheelmen's Association, to advise that the French union has decided to refuse to issue racing licenses to all bicycle competitors of military age, no matter what the individual military standing of the cyclist may be. Licenses will again be issued, however, after the close of the war. In the event of patriotic or benevolent efforts in behalf of war victims or wounded, the union promises to grant special racing permits for the occasion, but not otherwise.

Although the Union Cycliste Internationale has suspended operations, President Rubenstein of the C. W. A. has taken the notification from the French cycling organization as a request to take similar action in Canada.

WINNIPEG DEALERS LOOK FOR BIG SEASON

WINNIPEG, Manitoba.—According to a statement issued by the Dominion Cycle Company, Winnipeg, distributors of the Indian and Excelsior, the indications in Winnipeg are that double the number of motorcycles will be sold this year as were turned over in 1915. Money is circulating far more freely because of the bumper wheat crop last year, and although a thousand men are enlisting every week in Winnipeg for foreign service, there are many motorcycle prospects.

The Dominion Cycle Company has taken orders for fifteen 1916 model motorcycles already and two new Powerplus Indians are already demonstrating their mechanical contempt for snow and ice. Among the purchasers of new Excelsiors is President Bob Irvine of the Winnipeg Motorcycle Club.

J. Leslie Clubine, of Morden, Manitoba, has again signed up for the Indian sales privileges in southern Manitoba. Morden is the home of one of the few live motorcycle clubs in the Canadian West, although it has a population of only 1,300. The motorcycle activity there is chiefly due to the live-wire mind of Clubine.

CYCLE STORE FOR WINDSOR

WINDSOR, Ontario.—Windsor, the city which holds up the Canadian bank of the Detroit river, is to have a modern bicycle and motorcycle store when the building which is being erected by A. D. Bowlby is completed. His store manager will be Richard Gluns.

GIVING THE DEFI TO JACK FROST

How Rider and Sidecar Passenger Can Be Kept Warm in Wintry Weather

By SNOW PLUGGER

WITH a 1915 or 1916 model motorcycle and its three speeds, kick-starter, footboards and really-truly-legitimate clutch, what more do you need for winter riding? The way the manufacturers are turning them out now makes a motorcycle a 12-months-in-the-year vehicle. If you don't ride these nippy-frosty days you are missing half the pleasures of the pastime and are not cashing in the health-dividends your motorcycle investment is declaring.

All you need beside the red blood of a genuine 14-karat, dyed-in-the-wool motorcycle enthusiast is good woolen clothing to make you comfortable. Of course, if you do not belong to the Polar Bear Club but prefer to sit with the Rocking Chair Squad toasting your shins and dreaming over last summer's trips while your outfit stands neglected and covered with dust in the garage, this will not interest you at all. On the other hand, if you are a Bear of the 33d Degree or a prospective member of that organization, one of the few hardy lads or lasses who like the snow-bucking and who revel in the stiff head-winds of winter, then hitch your chair nearer and get chummy.

Keeping Warm Is Necessary

As you well know, to be perfectly happy while riding these cool days you must feel warm and comfy. The paramount idea in dressing for winter riding is to select wind-proof clothing as far as possible. That is why medium-weight woolens are the thing and cheap cotton materials are condemned. The latter, no matter how thick they may be, are never really warm like wool and do not cling to the body like the woolens do. Another big drawback to cotton is that it is cold and clammy when wet while wool is warm.

If you wear good woolen underwear and socks, a flannel shirt and breeches with a light woolen jersey and a mackinaw over all, you can defy Jack Frost in a cheerful way. For your ear protection, there are plenty of articles to select from. Starting with the golf style cap with fur lined flaps you can go through knitted skull caps to leather, and fleecelined aviator's helmets. As this last-named head-gear will stand you six perfectly good cart-wheels or round iron men, it is for the wealthy motorcyclist only.

For Hands and Feet

For your hands there are all kinds of gloves and mitts, also handlebar gauntlets, and for the feet, arctics worn over a good pair of shoes. The extra clothes and articles you need for winter motorcycling will stand your friend, the pocket-book, about $6. The ear cap will cost $1.50, handlebar gauntlets $1.25, and arctics $3 the pair. Every rider has gloves and a mackinaw, so these are not included in the list.

There is room for variations to this list, and these will be the result of differences of opinion and of finance, too. A paper vest is a good thing to keep warm in, and so is a fleece-lined vest or one of sheepskin. The latter type of vest is much worn by zero-weather riders, and, believe me, there are lots of this class all over the country.

Rain Shirts and Oilskins

Rubber rain shirts or oilskins worn over the regular riding regalia will keep you warm, although your looks will not be improved, especially if you have a tendency toward "filling out" forward. This refers to the older riders, of course. But most of us will not worry over looks; it is a case of keep warm first and last.

Regarding handlebar gauntlets. You do not need to purchase them if you have some girl who can make up a pair. She should use oil-cloth or mackintosh goods for the purpose. And speaking of girls, Mr. Rider, now for the sidecar occupant. It is the sidecar which is popularizing the motorcycle, not only for its safe and comfortable carrying of the passenger, but for its ability to keep the rig on the road in anything short of a big blizzard.

The Sidecar Occupant

The lady sidecar passenger has, of course, a cap and a scarf, likewise a muff. Your last year's overcoat, too, will help protect her, but real comfort will be best obtained by a heavy lap-robe. One of these retails at $4.50; it has one side covered with rubberized cloth and is the real goods for this time of year. Of course, there are such things as windshields and tops, but your real enthusiast scorns these and enjoys the whip of the keen wind that brings color to her cheeks.

Thus equipped, you can wander over the snow-covered roads with the hardy souls who appreciate winter in all its glories, and return at dusk with an appetite that would do credit to a bear—a Polar Bear, sure.

Nicer in Winter

Somehow, too, there seems to be more companionship on these winter rides. You are more welcome at the country hotels and can have the run of the place. In the summer the place is overrun with the vacationists and automobile parties. In winter, you are all more amiable. There is less dissension than in summer when the heat gets on your nerves. You also have more brotherliness for the Jinxed rider who needs help.

Think of the fun battling the snow-drifts and in seeing how the rest of the bunch make it! Think of the health you gain, the friendships you cement, the different world you see when everything is covered with the soft pall of white. Get out those arctics, ear caps and other essentials; date her for next Sunday and be at the clubhouse when the gang starts off.

Oh, by the way. See that your Prest-O-Lite tank is full. Bring along your tire chains and a camera without fail. Now you are ready for anything.

MOUNDSVILLE CLUB ELECTS

WHEELING, W. Va.—Moundsville M. C. of this city held its annual election of officers on February 3. H. A. Bowers will be president for the 1916 season, Foster Nobel vice-president, and J. E. Trimbath secretary. Arch. L. Stoltz has been elected treasurer, and Herman Ogle captain. Clyde Echols and Harry Knox are lieutenants. The club is planning to hold a run to St. Clairsville, O., and return on March 19.

NEWARK PROMOTERS SIGN UP FOREIGN RIDERS

Offer Handsome List of Prizes for Initial Meet at Vailsburg, April 2; Not Worried About "Outlaw" Circuit

NEWARK, N. J., Feb. 16.—Entry blanks for the opening meet at the Newark Velodrome, Sunday, April 2, have been sent out and there is an attractive list of events for the first meet. The feature is the B. M. Shanley Handicap, which carries a purse of $500, divided, $300, $100, $50, $30 and $20. The one-mile open for the professionals carries $400, divided, $200, $100, $50, $25, $15. The Brassard race carrying a purse of $50 to the winner is also on the opening program as is a special match race and an invitation race, the latter race having a purse of $100, which is divided in four prizes.

The amateur events will be a one-mile novice, a two-mile open and a half-mile handicap, the latter race has a first prize of $50 in merchandise. At each meet at the Newark Velodrome it is planned to stage one amateur race with a $50 for first prize, having the big award in a handicap on one day and the following meet the large award will be put up in an open event.

The Newark promoters are not worrying a great deal over the coming season. So far the Newark promoters have signed George Wiley, the American paced champion, and Clarence Carman, the Long Islander who formerly held the title, and they have assurances of other signatures to contracts. Worth Mitten, the Davenport cyclist; Eddie Root, Bobby Walthour, Charles Turville, Jr., John and Menus Bedell, Oscar Egg, and Huybrechts, the Belgian, are sure to be seen on the tracks of the Cycle Racing Association.

Nat Butler, the Revere Beach track impressario, will go ahead with his track in Providence, and Butler has already been in touch with Leon Didier, the erratic Frenchman, by cable, and Didier will be seen in paced races on the C. R. A. circuit. The European agent of the Cycle Racing has been communicated with and he will sign up a number of first-class riders that are not engaged in military duties. Michael Debaets, a Belgian six-day and long distance rider, has left Holland for America to compete in the race here. A number of other foreigners will also be signed up.

GETTING READY FOR SIX DAY RACE

KANSAS CITY, Mo., Feb. 12.—The riders who have finished the six-day race in Chicago are scheduled to appear in a second "outlaw" grind in this city, which will start on February 19 and wind up on February 26. The management of the Convention Hall, where the race will be held, reports that the grind will be a seventy-two hour affair. A fast twelve-lap saucer is now being constructed.

Because of several conventions which are being held here the hotels are very crowded and it is expected that the race will prove attractive to the delegates as well as the local fans. The last six-day grind held here was staged in 1914.

VAILSBURG IS OPPOSED TO MOTOR-PACED RACES

NEWARK, N. J., Feb. 15.—The efforts of the Cycle Racing Association to have the city ordinance changed so that motor-paced races may be resumed met with strong opposition at a meeting of the Vailsburg Improvement Association last night. The racing association made application to Mayor Raymond to have the above ordinance changed and they were assured that the Common Council would take the matter up at its next meeting early next month. Motorcycle races and motor-paced events have been "taboo" in this city since the accident at the motordrome on Sunday, September 8, 1912, when eight people, including Eddie Hasha and Johnny Albright, two racing men, lost their lives.

ST. LOUIS CYCLE FIGURES

ST. LOUIS, Mo.—Figures on motor vehicle traffic in this city as compiled by the Street Department show that the number of motorcycles in use was 915 in 1915, as compared with 286 in 1910. The number of bicycles licensed fell from 2,460 in 1910 to 1,430 in 1915.

BALTIMORE DEALERS COMBINE FOR BICYCLE DAY

BALTIMORE, Md., Feb. 16.—Bicycle Day enthusiasm has taken such a strong hold on the local dealers that at a recent meeting they organized the Baltimore Cycle Dealers' Association for the primary object of promoting bicycle clubs. Each dealer pledged himself to organize and foster at least one club among the riders with whom he came in personal contact.

If only half of the dealers who were present at the meeting will live up to their promises, the city of Baltimore will see some lively cycling competition this season. It is the realization of the fact that competition is the life of every sport which has brought the dealers together. Among the dealers who are interested in the new organization are: Howard A. French & Co., Bernard J. Logue, Heinze Motor Co., F. W. Sandruck, John F. Kitz, Joe Wiesenfeld, Louis J. Lenning, Merryman & Robinson, Excelsior Motor Co., Maryland Cycle Co., A. L. Wilson and E. D. Allard.

INTERCLUB LEAGUE ANNOUNCES SCHEDULE

NEW YORK, N. Y., Feb. 16.—Following is the 1916 schedule of open events which will be held by members of the Inter-Club Amateur Cycle Road Racing League:

Spring century, Century Road Club of America, New York Division. Date, April 2; rain date, April 9.

Ten-mile open race, Unione Sportiva Italiana. Date April 9; rain date, April 16.

Spring century, Century Road Club Association. Date, April 23; rain date, April 30.

Twenty-five-mile handicap, Century Road Club of America, New Jersey Division. Date, May 7; rain date, May 14.

Ten-mile handicap, Century Road Club Association. Date, May 21; rain date, May 28.

Fifty-mile handicap, Century Road Club of America, New York Division. Date, June 4; rain date, June 11.

Ten-mile handicap, Acme Wheelmen. Date, June 18; rain date, June 25.

Carnival of Sports, Century Road Club Association. Date August 6; rain date, August 13.

Pleasure run and fifteen-mile handicap, Hudson County Wheelmen. Date, August 20; rain date, August 27.

Ten-mile handicap, New England Wheelmen. Date, September 3; rain date, September 10.

Fifty-mile Italian Championship, Unione Sportiva Italiana. Date, September 17; rain date, September 24.

Interclub Championships, October 1, 8, 15 and 22.

Eighty-four-mile Italian Championship, Unione Sportiva Italiana. Date, October 29; rain date, November 5.

Two-hour team race, Bay View Wheelmen. November 23.

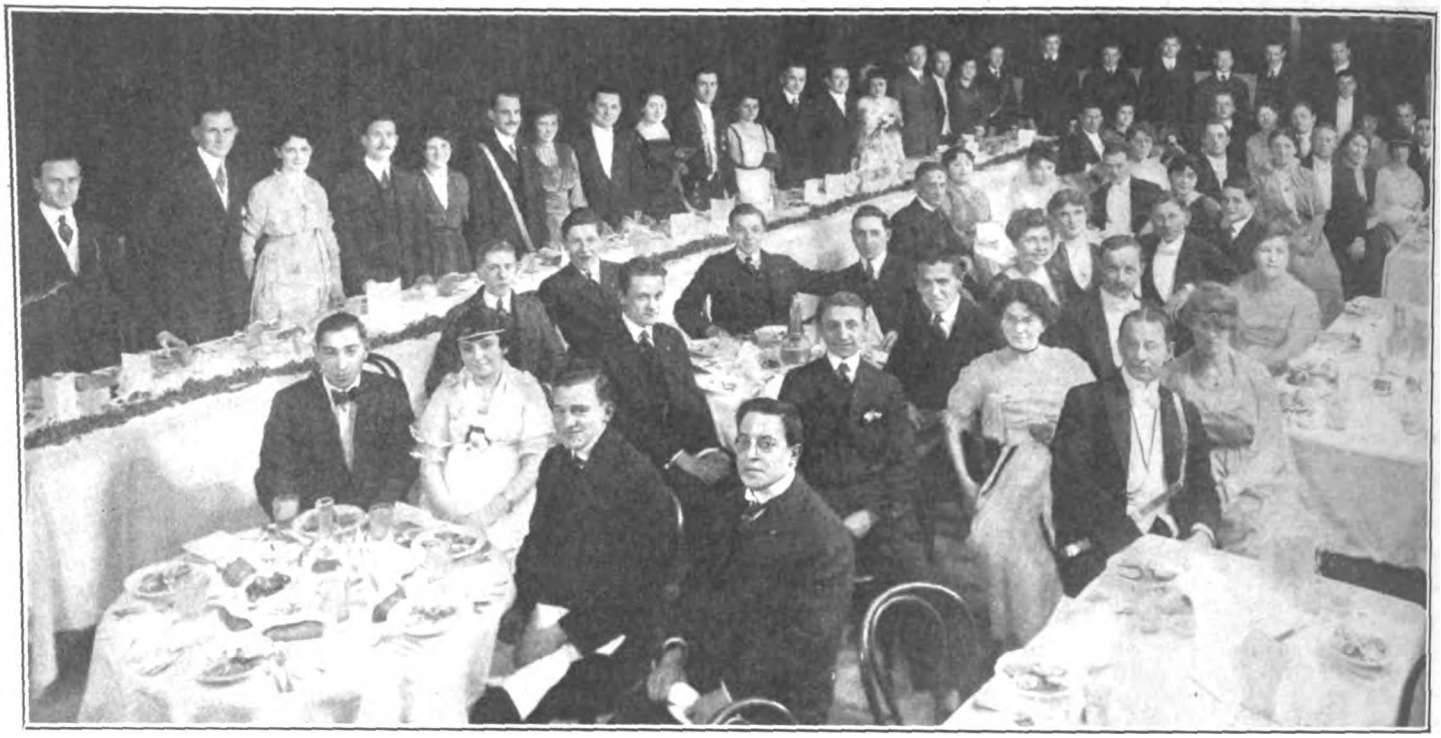
CENTURY ROAD CLUB OF AMERICA CELEBRATES SILVER JUBILEE



Scene at the Twenty-fifth Annual Banquet of the Century Road Club of America, Held Last Week at the Broadway Central Hotel, New York

NEW YORK, N. Y., Feb. 16.—In honor of the twenty-fifth anniversary of its organization, the Century Road Club of America held a banquet on Saturday evening, February 12, at the Broadway Central Hotel, New York City. About sixty-five members and friends attended to help celebrate this occasion, which proved to be one of the happiest the "Americas" ever held.

Inter-Club Spirit

The toastmaster, President Emile E. Fraysse, introduced the various speakers. President D. J. McIntyre of the Inter-Club Amateur Cycle Road-Racing League spoke of the good feeling existing in the league and also said a few words about the handicapping to be done during the coming season.

National Secretary Sylvain Segal of the Century Road Club Association was next called upon, and he congratulated the "Americas" on their excellent showing and also expressed the hope of meeting those present at the Golden Jubilee. Toastmaster Fraysse then gave out the list of mileage and century competition winners for 1915 Centurion Taborelli, of the New Jersey Division, then gave an outline of the plans for the coming year and was loudly applauded. Victor Lind, one of the original charter members, briefly summed up the history of the organization.

After the speech making was concluded the floor was "cleared for action" and dancing was in order. Among those present were: Mr. and Mrs. E. E. Fraysse, Mr. and Mrs. E. Taborelli, Mr. and Mrs. A. H. Seeley, Mr. and Mrs. A. L. Everard, Mr. and Mrs. C. H. J. Tonjes, Mr. and Mrs. E. Gerard, Mr. and Mrs. S. R. Morrison, Mr. and Mrs. J. Steinert, Mr. and Mrs. William Hall, Mr. and Mrs. Victor Lind, Mr. and Mrs. M. J. Goldman, Clinton Walker, William Muller, Ernest Kuno, William Winquist, George Steppello, Sylvain Segal, Charles Hausenbauer, R. L. Carton, Charles Kudrle, George Knopf, Teddy Heisig, Lucien A. Wetzel, A. Eisenberg, D. J. McIntyre, L. A. Fraysse, A. Bastide, and J. Zabelicky.

U. S. I. WILL STAGE TEN MILE HANDICAP

Splendid List of Prizes Promised for Big Event; Two Trophies Will Be Offered to Competing Clubs; Medals for Winning Team

NEW YORK, N. Y., Feb. 15.—The Unione Sportiva Italiana will open the outdoor cycle racing season in the East when they stage their ten-mile bicycle handicap road race on April 9. This event will be open to all amateurs registered with the National Cycling Association and will be run under the sanction of that body.

Effective support is being received from manufacturers and others interested in racing, so that a fine prize list is promised which is expected to draw one of the best fields of amateurs ever entered in a New York race.

In order to arouse a strong club interest in the affair, the Unione Sportiva Italiana will offer a handsome silver trophy to the club which enters the largest number of riders, while to the club securing the best point score with a team of five members a silver cup will be given and each member of the team will receive a specially designed medal. The rider breaking the ten-mile record, now held by Tom Bello, of the promoting body, will be awarded a beautifully engraved certificate.

Entry blanks will be issued soon. They can be secured by writing to George Harvey, secretary, Unione Sportiva Italiana, 410 Eighth avenue, New York City. For other information regarding the race communicate with George Bieregel, chairman of the racing committee.

Other events to be promoted by the Italian organization will be the fifty-mile Italian Road Championship of America, September 17, and the eighty-four-mile Italian Championship, October 29.

GIORDANO WINS U. S. I. RACE

NEW YORK, N. Y., Feb. 15.—Patsy Giordano won the weekly match style home trainer race of the Unione Sportiva Italiana, which was held last Thursday. The distance was at one mile. He beat Elmer Mullen by less than one yard. The race was run in three heats, two semi-finals and one final. The summaries:

Heats—
First heat: C. Zoccola, first; A. Ramezzana, second. Time, 1:24.
Second heat: J. Alfonso, first; G. Harvey, second. Time 1:14⅘.
Third heat: P. Giordano, first; A. Ferrero, second. Time, 1:14.
Semi-Final Heats—
First heat: P. Giordano, first; C. Zoccola, second. Time, 1:19.
Second heat: E. Mullin, first; J. Alfonso, second. Time, 1:11⅗.
Final heat: Patsy Giordano, first; Elmer Mullin, second. Time, 1:14⅕.

NEW ADLAKE AGENT

MINNEAPOLIS, Minn.—Janney, Semple Hill & Co., distributing America and Adlake bicycles for the Great Western Manufacturing Company in Minnesota, North and South Dakota and Montana, has just closed with the New England House Furnishing Co., of this city, for the exclusive sale of Adlake bicycles in Minneapolis.

DUNLAP OPENS STORE

COLUMBUS, O.—Charles A. Dunlap has opened a retail bicycle and supply store at 1145 North High street.

EMERSON GIVES BANQUET TO BUFFALO BOOSTERS

Fifty Trade Men Gather Round Festal Board Presided Over by Atherton Coaster Brake Maker; Speakers Urge Broad Co-operation to Secure Greater Publicity for Bicycle Day

BUFFALO, N. Y., Feb. 15.—W. F. Emerson, president of the Buffalo Metal Goods Company, makers of the Atherton coaster brake, gave a banquet to his friends in the cycle trades here on February 9. Fifty men attended the affair.

The toastmaster was John W. Henry, president of the Vim Cycle Hardware Company. He spoke of the work which had been accomplished in connection with the publicity campaigns now being waged in Cleveland and Chicago and urged that a similar campaign be started in the Bison City. He said in part:

"More bicycles are sold today than at any previous time. Yet few people realize that this condition obtains. Though people interested in such sports as lawn tennis seem to be more in evidence, still there are thousands upon thousands who make cycling their hobby. There is no doubt that newspapers will lend greater support to cycling if the dealers will advertise more than in the past."

Concurring in this opinion, Fred L. Brown, sales manager of the Pierce Cycle Company, said that the two-wheeler was not receiving the publicity that it should, and that the responsibility for securing more publicity rested squarely upon the shoulders of the dealers and the manufacturers, who ought to co-operate.

Speaking for the Firestone Tire & Rubber Co., H. M. Murr showed the advisability of systematic advertising. He declared that the health-giving qualities of cycling were the best talking points to be played up in advertisements.

The Goodyear Tire & Rubber Company's representative, A. W. C. May, promised the support of his company in co-operative campaigns for publicity.

It was announced at the banquet that the Buffalo dealers and manufacturers will advertise strongly in one of the local papers on February 28, and that the editors of the newspapers have agreed to run boosting articles to fill two pages.

President Emerson was the last speaker of the evening, and he read a very interesting address, in which he dealt on some of the important facts which he has learned from his long connection with the bicycle industry.

Cycle Trade Men Present

Each of the guests wore a paper carnival cap that bore the words, "Buffalo Bicycle Boosters." Among those present were: H. N. Rose, of the Forsyth Metal Goods Co.; S. W. Dawes, George J. Boller, David Batt, A. Dietrich, of the Vim Cycle Hardware Co.; H. G. Pauer, of the Pierce Cycle Co.; H. W. Georger, of the Vim Company; Morris Rosenthal, of the Frontier Light & Cycle Co.; F. X. Hellinger, of the Goodrich Co.; A. D. Hauck, George Hauck, of the Echo Motor Co., Tonawanda, N. Y.; John Stutt, John A. Wilson, L. Miller, W. A. Bihl and Edward J. Bihl, of the Cycle & Auto Supply Co.; F. C. Gerhardt, of the Buffalo Metal Goods Co.; R. M. Barwise, local agent of the Diamond Chain & Mfg. Co.; Homer S. Taylor, of the Pierce Cycle Co.; J. F. McKenneth, of the Buffalo Metal Goods Co.; H. J. McCauley, of the Forsyth Metal Goods Co.; John J. Oliver, Edward T. Ball and Edward Lewis, of Joseph Strauss & Son; Herman Kressin, H. G. Koch, W. F. Kindt, Charles Haberer, of the Glouster Cycle Co.; L. Peck, J. Ross, A. H. Olief, C. G. Koelin, of the Pierce Cycle Co.; H. N. Kriegbaum, E. G. Viertel, B. C. Candee, of the Buffalo Metal Goods Co.

KINNEY-McKEE STOCK SOLD

INDIANAPOLIS, Ind., Feb. 15.—The bankrupt stock of the Kinney-McKee Company, of this city, was sold by the receiver recently to the Gus Habich Company, also of Indianapolis. The latter concern turned over most of the stock to the local dealers in job lots and realized quite a little profit on the transaction. Art McKee, one of the members of the bankrupt concern, is now in charge of the bicycle department of the Habich Company. The Kinney-McKee creditors will probably receive thirty cents on the dollar, for many of the bills outstanding on the firm's books will not be collected.

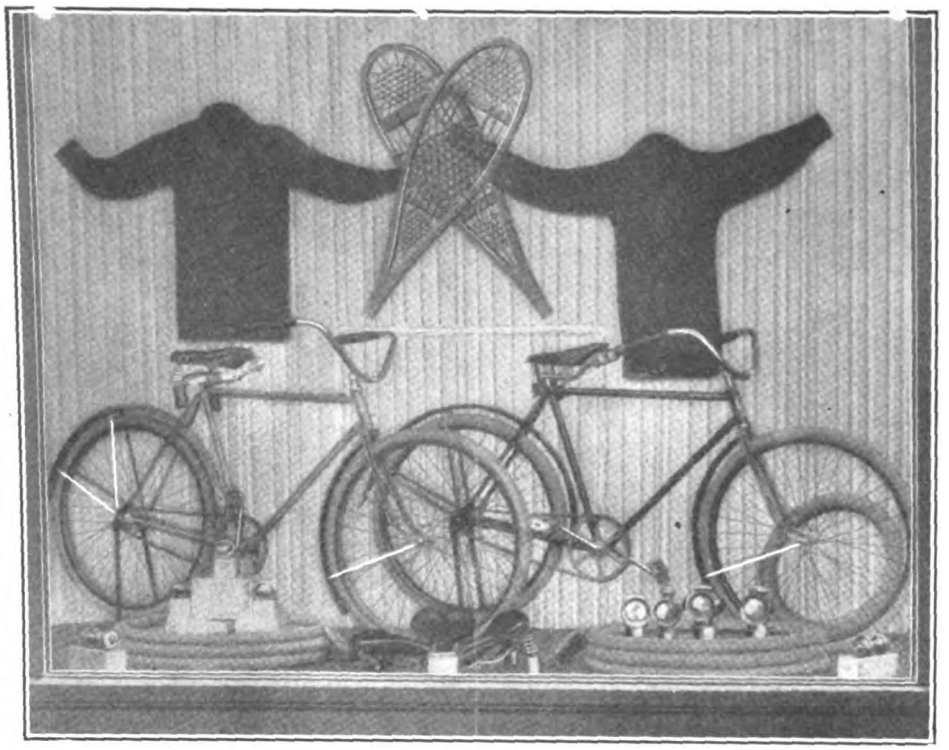
"MILLION BICYCLES" COMMITTEE MEETS IN PHILLIE

Reports Read by Officers Reveal the Widespread Interest Taken in Bicycle Day—Big Bulletin Will Be Sent to Dealers This Week With Bicycle Day Helps—Future Plans Discussed



Window Display Suggested to Dealers by "Million Bicycles" Committee

PHILADELPHIA, Pa., Feb. 16.—The "Million Bicycles" committee held a very enthusiastic meeting at the Bellevue-Stratford Hotel in Philadelphia last week, at which reports were read by the various officers of the committee which revealed, as one of the members expressed it, that "never before in the history of the industry has there been among manufacturers and dealers so unified a purpose and so much interest in pushing bicycles to the front as at present."

From every section of the country dealers are still writing in to Chairman Quine and Secretary Olin, telling of their plans for BICYCLE DAY. And it is interesting to note that their plans are cleverly drawn up.

Dealers in a number of cities have organized especially for carrying out the "Million Bicycles" campaign; and in such cities large space will be used in the newspapers to talk about the attractiveness of cycling, this being made possible by the advertising which the dealers are running.

Parades Down South

BICYCLE DAY will be featured in southern cities by parades, while all of the live dealers in the north and the south will decorate their windows and send out invitations to prospects, asking them to visit their stores. Novel schemes for attracting people will be employed by most of these dealers. According to letters received by Secretary Olin many dealers will give out souvenirs, hire bands for the occasion and keep their stores illuminated nights during BICYCLE DAY week.

The demand for electrotypes—particularly the larger ones—which were first illustrated in this journal last week, indicates that there will be extensive newspaper advertising and that dealers will employ generous space. Much interest, reports Secretary Olin, is being manifested in the newspaper advertisement and window display contests.

By the latter part of this week the "Million Bicycles" committee will have issued its final word on BICYCLE DAY to dealers in the form of a four-page bulletin, which will be full of real "meat" in the way of suggestions for getting the most out of the big opportunity which BICYCLE DAY offers.

At the Philadelphia meeting steps were taken to carry on the work of creating interest in the bicycle after BICYCLE DAY. This work will consist chiefly in effectively presenting to dealers the advantage of forming bicycle clubs and staging road races. Publicity for the bicycle in the newspapers will also be continued.

The "Million Bicycles" committee has already started to plan for the season of 1916-17, and at the Atlantic City Convention of the various trade associations in August, there will be submitted what will be a most comprehensive and complete set of plans for increasing bicycle sales. These plans will embrace many features that it was not possible to utilize in so brief a time as that between the organization of the "Million Bicycles" committee and BICYCLE DAY.

SEAMARK STAGES NOVEL BIKE DAY CONTEST

WASHINGTON, D. C., Feb. 15.—Harry F. Seamark, one of the leading bicycle and motorcycle dealers of this city, is using a "bean guessing" contest to boost Bicycle Day. He has had 10,000 circulars printed and distributed among the government employees and he is also running ads in the local papers.

So much interest has been created that Seamark's Store is well crowded each day with people desiring to enter the contest. He figures that the expenditure involved will be more than compensated for by the big list of prospects which he is acquiring.

HAS INDIAN CYCLE AND MOTOR WHEEL AGENCY

NEW YORK, Feb. 12.—The Yorkville Motor Cycle Works, of which Harry Hugger is proprietor, has taken over the agency for Indian bicycles and Smith Motor Wheels at 1729 First avenue. Proprietor Hugger has stocked a complete line of Indian cycles and is featuring the special racing models.

W. U. MESSENGERS WILL USE EVERLASTER TIRES

KOKOMO, Ind.—The Kokomo Rubber Company, maker of Kokomo tires, has just received a telegram from the Western Union Company, of New York, announcing that the Everlaster bicycle tire had been adopted for equipment on all wheels used by the Western Union Telegraph Company's messenger boys throughout the United States. This is probably the biggest bicycle tire deal ever consummated in this country. The Kokomo Everlaster tire is about the highest-priced bicycle tire on the market today, and the big order proves the old saying that "Quality wins."

The Kokomo firm feels that it is a fine recommendation for its goods to have the endorsement of the Western Union Company. This company has decided on a plan for helping its thousands of employees throughout the country by furnishing them the highest grades of suits, caps, coats, shoes and bicycles and tires at a minimum cost.

The Kokomo Rubber Company is a pioneer in the tire industry. It made the first tires for the first automobile in the United States. The first automobile was built in Kokomo and the tires were got from the Kokomo Rubber Co. to complete the machine. They were 34 by 2 inches, single tube type, resembling the bicycle tires which the firm was then specializing in.

The Kokomo factory has specialized in bicycle tires since the early days of the motor car and its products have always had an excellent reputation. The results of keeping up this reputation by adhering to the high quality of its goods has been demonstrated by the big order of the Western Union Company.

It is the opinion of the maker of Everlaster tires that a few similar moves on the part of the great corporations will do much to make the "Million Bicycle" movement a great success.

JOE SCHIEDER "COMES BACK" AT BUFFALO

Wins Two Races at Bison City Armory Meet, Defeating Bob Schultz; Good Field of Riders Appears in Both Events

BUFFALO, N. Y., Feb. 15.—The indoor fans who braved the cold last Saturday night to take in the races at the 74th Infantry games were well rewarded for their interest.

Joe Schieder came back into his own by winning the 1½-mile lap and the one mile handicap races. Robert Schultz, who has been amassing the points lately, fell in the final.

Schieder had big handicaps to overcome in the one-mile handicap, but he was good for it in the final, as well as his heat. The summaries are:

One and one-half mile lap race, bicycle. Winner and second men in two heats having the most points to qualify for the final.

First heat: Joe Schieder, C. Y. M. C. A. (53 points), first; C. F. Muth, unattached (26 points), second. Time, 3:26⅘.

Second heat: R. W. Schultz, W. S. R. C. (59 points), first; L. A. Peterson, B. R. C. C. (45 points), second. Time, 3:23⅘.

Third heat: Elmer Bundt, G. Y. M. C. A. (50 points), first; A. DiCarlo, Saturn A. C. (29 points), second. Time, 3:27⅗.

Fourth heat: Fred Schell, unattached (45 points), first; Eddie Levy, Pirate A. C. (39 points), second. Time, 3:26.

Fifth heat: I. Gronkowski, B. F. B. C. (40 points), first; A. B. Funk, P. O. D. (27 points), second. Time, 3:23⅗.

Final heat: Joe Schieder, C. Y. M. C. A. (53 points), first; Fred Schell, unattached (37 points), second; Elmer Bundt, G. Y. M. C. A. (26 points), third; I. Gronkowski, R. F. B. C. (21 points), fourth. Time 3:21⅘.

One mile bicycle handicap. First two in each heat and third in two fastest heats to qualify for the final heat.

First heat: A. Ciacinch, Falcon A. C. (15 yards), first; Fred Best, R. F. B. C. (25 yards), second); J. Muehlbauer, R. F. B. C. (40 yards), third. Time, 2:10⅘.

Second heat: Joe Schieder, C. Y. M. C. A. (scratch), first; I. Gronkowski, R. F. B. C. (15 yards), second; C. F Muth, unattached (55 yards), third. Time, 2:14⅗.

Third heat: J. Tanner, C. M. B. A. (75 yards), first; W. Anthony, Alma A. C. (40 yards), second; Elmer Bundt, G. Y. M. C. A. (15 yards, third. Time, 2:10⅘.

Fourth heat: C. H. Schmidt, R. F. B. C. (85 yards), first; C. V. Kohlmeyer, unattached (55 yards), second; A. DiCarlo, S. A. C. (65 yards), third. Time, 2 08⅘.

Final heat: Joe Schieder, C. Y. M. C. A. (scratch), first; I. Gronkowski, R. F. B. C. (15 yards), second; A. Ciacinch, Falcon A. C. (15 yards), third; J. Tanner, C. M. B. A. (75 yards), four. Time, 2:13.

A. O. SMITH CO. HELPS "MILLION CAMPAIGN"

MILWAUKEE, Wis., Feb. 15.—Over 20,000 dealers throughout the country have received a Bicycle Day circular from the A. O. Smith Company, makers of the Smith Motor Wheel. Special letters have also been sent out to motor wheel dealers, urging them to use window trims on Bicycle Day and to conduct runs.

On February 19, ten days before Bicycle Day, begins the $50,000 advertising campaign for the motor wheel with a full page advertisement in the Saturday Evening Post. More advertisements will appear in the Post and also in Sunset Magazine, Popular Mechanics, Hearst's American Sunday Magazine and eleven other national publications.

U. S. I. WILL GIVE BALL

NEW YORK, N. Y., Feb. 15.—Sunday night, March 26, has been selected for the holding of the annual ball of the Unione Sportiva Italiana. Palm Garden, at 58th street, between Lexington and Third avenues, will be the scene of the ball.

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

Kramer's trip abroad in 1905 in which he was pitted against Europe's best riders and captured 17 out of 20 events.

DURING the first half of 1905 Frank Kramer invaded the cycling tracks of Europe and captured additional laurels. His achievements surprised the Continentals, who were quick to recognize and appreciate the clever and skillful riding of America's wonderful champion.

Like a Triumphant March

His campaign abroad began on April 9 and ended July 2, and Kramer's performances were in the nature of a triumphant march. He started in twenty races, seventeen of which were victories. His three defeats came about in one match race and two open events. The single match race that he lost was the first meeting with Henri Mayer, the fastest rider in Europe at that time. Kramer, however, later demonstrated his superiority over Mayer by defeating the latter in two straight heats in a return match, which was his last race in Europe that year.

He also won a three-cornered international race, as well as the Grand Prix de Paris, the blue ribbon event of Europe. For this victory Kramer received from the French government a magnificent Severes vase, which he considers his most cherished possession. These vases are manufactured exclusively under a government plate and are made the more valuable for the reason that they can only be obtained through official presentation and are given for merit solely.

From a monetary point of view, Kramer's trip was most satisfactory, it being estimated that he came home richer by eight or ten thousand dollers. He rode in France, England, Germany, Belgium and Italy, defeating all the best riders there. Opposing Kramer were such sterling foreign pedalists as Mayer, Meyer, Poulain, Friol, Jacquelin, Farley, Rutt, Schilling, Bader and Piard.

Broke Some World's Records

Of the three match races that he won Kramer never even lost a single heat, and he annexed a couple of world's records. One of these was the riding of the 100 meters in the Grand Prix, which he covered in 5⅖ seconds, which was a fifth of a second better than the previous time for the distance. He also established new figures in a lap race which he won by traveling the fastest lap and clipping one-fifth of a second off the former record. Everywhere that Kramer rode the populace turned out in large numbers to see him, and at the final of the Grand Prix, which he won from Mayer and Poulain, there were 25,000 people present.

Kramer's first appearance abroad was on April 9 at the Buffalo Velodrome track in Paris. In this meet he broke the world's record for one-half kilometer (1,640½ feet) and also won a match race ridden against Friol.

The crowd went wild over Kramer's victories. It was his first chance to show what he could really do and, though he had little time in which to rid himself of his sea legs right after the long voyage from America, he demonstrated from the crack of the gun that he intended to make things lively for the European riders. Kramer had met Friol previously in America, but Kramer said the French rider was a much different man abroad, where he rode faster and was on a par with the best of the other foreign riders.

Jacquelin's Fine Tribute

Kramer's next opponent was Jacquelin, and the East Orange boy's victory in this event was more pronounced. He cut away from the former French champion on the back stretch and finished under restraint. After the match Jacquelin informed Kramer through an interpreter that never before had an opponent carried him at such a fast pace and then run away from him so easily as did the American.

After his early successes in France, Kramer went to London, and there met Jenkins and won two races in one day. In one of these, however, he was disqualified for the alleged fouling of Schilling and the latter was placed first. Kramer said he will always consider this race a victory, as he said that the disqualification would have never been allowed in this country. His offense was in boring out on Schilling, which practice was common on American tracks and which would not incur a penalty here.

That night Kramer had a rough voyage across the English channel and he experienced the worse case of seasickness of his entire trip, landing at 5 o'clock in the morning. Despite this, however, Kramer rode on the following afternoon at Antwerp, Belgium, and won all three races in which he competed.

Beats Poulain in Straight Heats

Kramer competed in a match race with Poulain and won in straight heats. Against Poulain Kramer rode the last eighth mile in 12 seconds and the last 100 yards in 5⅘ seconds. In a handicap of meters, the same day, Kramer broke the world's record by threequarters of a second, by riding the distance in 34⅗ seconds. The best previous time was 35⅕ seconds, made by Walter Rutt. Five hundred meters is about equal to 100 yards more than a quarter of a mile. Kramer rode the entire distance unpaced with Poulain on his wheel and won by half a length. In this race, the East Orange boy rode the last lap in 20 seconds, the track being ten yards in excess of a fifth of a mile, which was then the fastest time ever ridden on that track.

Pitted Against Walter Rutt

From Antwerp Kramer traveled to Cologne, Germany, defeating there Rutt and Farley, who had just returned from Australia. Rutt had beaten Iver Lawson in the Antipodes and felt sure he could take Kramer's measure. Kramer then returned to France and then took a trip to Italy, meeting with like success. He had a varied experience on tracks of different construction, varying from boards to cement and tar, as well as riding on indoor tracks and outdoors at night. The track on which the Grand Prix was run was of cement, while the Cologne

Start of the Final in the International Three-Cornered Race Staged at Buffalo Track in Paris in 1905. The Riders From Left to Right Are Henry Mayer, Frank Kramer and G. Poulain. This Event Was Won by Kramer

Digitized by Google

oval was of tar. When the sun was warm the impression of the tires could be seen on the surface. This caused a suction which lessened the speed, but in the cool of the evening the track was hard and remarkably fast. Kramer returned to Roxbeau, where on one occasion he was chased by the populace for refusing to ride on a wet track. On a later occasion he won a three-cornered match race at Roxbeau from Bader and Piard, together with a handicap event, and became a prime favorite.

Captured International Match

Kramer points with pride to his victory in an International three-cornered race between America, France and Germany, in which he came off with the premier honors. The international race was one of Kramer's most important victories. The contestants in this race, which was a specially arranged match, were Kramer, Fenn and Krebs for America, Poulain, Friol and Piard for France, and Henri Mayer, Meyer and Rutt representing Germany.

The race took place at the Buffalo track, in Paris, on Thursday, June 8, and Sunday, June 11. Each team rode separately in the trials and the winners of each team qualified for the finals. Kramer won from Fenn and Krebs for America. Mayer finished first on the German team and Poulain came in ahead for the "frog-eaters." In the finals, conditions were for a three-cornered match race and at the conclusion the result was a tie, with six points credited to each rider, so that an extra heat was ordered to decide the winner.

In the first of the regular heats Kramer did not extend himself and finished in the ruck; Mayer won the heat, Poulain was second and Kramer third. Kramer jumped into his stride in the second heat and, quickly showing his heels to the foreigners, won with Mayer second and Poulain last. The third heat saw Poulain of France the winner. Kramer was content to take second, and the best Mayer could get was third.

That Final Kick

After this even break, the riders mounted their bikes for the extra and deciding heat. At the start matters appeared ominous for Kramer, as the foreigners, evidently teaming against him, maintained their positions of first and second, and rode in this manner to the back stretch. Here Kramer made his bid with one of his wonderful bursts of speed; he shot out from last place and, overhauling the second man, was soon on even terms with the leader. Nearing the tape, Kramer gave a few final kicks, as only Kramer can, and shoved his wheel over the tape, a half length ahead, amid the deafening cheers of the spectators, who had anticipated a dead heat.

Proud of Winning This Race

Kramer in commenting recently on the result of this race said: "By taking first place in this event I won a race which I considered just as important as the World's Championships. My competitors were as good as those in the World's Championship meets and as good a set of riders as could be brought together on one track.

On June 25, Kramer won the Grand Prix de Paris, the classic cycling event of France. This race netted the East Orange rider something like $1,200, and after this victory Kramer succeeded in winning every race of importance, proving that he was a better cyclist than such riders as Mayer, Meyer, Poulain, Rutt, Jacquelin and Friol. The only big events left on the calendar for 1915 were the World's Championships, and Kramer arrived home before these.

(To be continued)

JONES & NOYES PRESENT THE SILVER KING

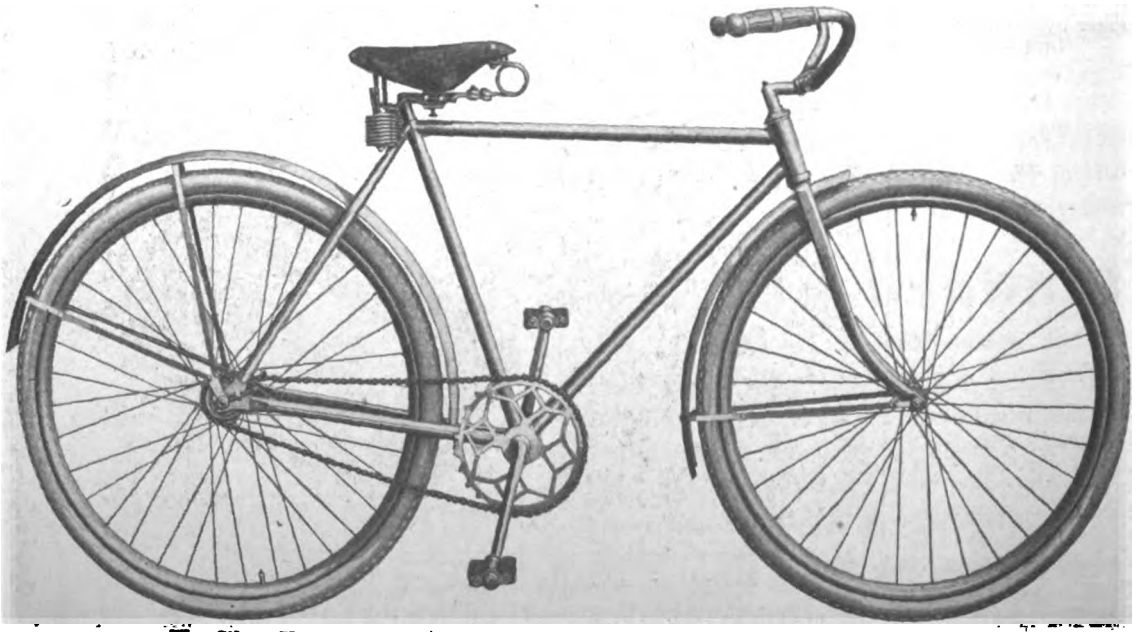
New Bicycle Made By Chicago Manufacturers is Entirely Nickel-plated; Will Sell at $35 in Middle and Eastern States

CHICAGO, Ill., Feb. 15.—An entirely nickel-plated bicycle is the Silver King, a new machine which has just made its debut in the sturdy line of two-wheelers being manufactured by Jones & Noyes, of Chicago. The Silver King will sell for $35, except in southern and western states and in Canada, where the price will be $40.

Owing to their large quantity production, Jones & Noyes are able to put the Silver King on the market at the reasonable prices mentioned, though the new bicycle is completely nickel-plated. The manufacturers claim that their nickel finish is more durable than enamel, that it will not chip or crack and that because of the copper plate it is practically rust-proof.

The specifications of the Silver King are as follows: Frame, constructed of 1-inch seamless steel tubing; 19 guage, cold drawn steel fittings with flush joints; all joints reinforced. Fork, drop forged crown; 18 guage fork sides. Hanger, Excelsior one piece. Wheels, wood rims, aluminum enamel and red stripes; steel rims, nickel-plated, $2.50 extra; Diamond E spokes. Mud guards, regular type. Chain, imported, extra strong of the roller type.

Tires, Goodyear Blue Streak, anti-skid, 28 x 1½, cement type. Saddle, Pearsons' Tuxedo, with extra wide top. Pedals, Stevens, No. 4, rubber. Handlebars, Kelly No. 4, racing type; motorcycle style rubber grips. Finish, entirely nickel plated and polished; extra heavy nickel on copper plate on entire frame, mud guards and forks.



The Silver King, a New Bicycle, Entirely Nickel-Plated, Made by Jones & Noyes

DELEGATES NOMINATED FOR L. A. W. ASSEMBLY

BOSTON, Mass., Feb. 12.—Secretary-Treasurer Abbot Bassett reports that the following delegates have been regularly nominated for the National Assembly, L. A. W.:

New York, 10—Frank P. Share, Wm. M. Frisbie, George T. Stebbins, F. W. Brooks, Jr., Julius G. Linsley, John B. Kelley, Lucius H. Washburn, H. W. Bullard, Wm. W. Share, Robert Bruce.

Massachusetts, 9—A. P. Benson, Walter G. Kendall, H. Winslow Warren, J. Rush Green, Chas. C. Ryder, Daniel A. Cook, Albert M. Skinner, Fred D. Irish, Thomas H. Hall.

Pennsylvania, 7—George T. Bush, Wm. L. Lockhart, D. B. Landis, A. D. Knapp. Warren H. Poley, Chas. E. Minnemeyer, Fred McOwen.

New Jersey, 3—A. G. Batchelder, W. S. Ginglen, E. O. Chase.

Connecticut, 2—A. G. Fisher, John N. Brooks. Illinois, 2—C. M. Fairchild, M. X. Chuse. Rhode Island, 2—John H. Barrett, Thos. P. Himes.

Ohio, 1, H. S. Livingston; New Hampshire, 1, Elmer G. Whitney; California, 1, Charles K. Alley; Florida, 1, Kirk Munroe; Kentucky, 1, Owen Lawson.

PROVING THE WORTH OF THE CLASSIFIED AD.

How This Form of Publicity Pulled a Middle Western Dealer Out of a Bad Hole and Built Up a Big Business in Used Machines for Him—Reaching the Farmer Trade

By JACK CARR

ONE of the questions that bothers most dealers who have never tried it is "Does classified advertising pay?" The answer is, that it certainly *does* pay and that it is an easy and economical form of boosting the sales of machines, accessories or, in fact, anything in the cycle line. How the steady use of classified advertisements by one of the big motorcycle and bicycle dealers in a Middle Western city resulted in the direct sale of 75 used motorcycles and several hundred used bicycles may be interesting to many agents, as it is typical of the success most businesses have had through this advertising medium.

The firm in question handled one of the leading motorcycles of the day and traded in old and often wornout machines on the new models. It was also the custom to trade in a used machine on one that was in better condition and accept a cash difference for the new model. As a result, the warerooms were continually being filled with used mounts of doubtful vintage. It was no uncommon thing to see two machines of the same make side by side, that were ten years apart in construction. The problem of disposing of these old crocks was enough to bring gray hairs to many a man's brow.

Swamped With Old Mounts

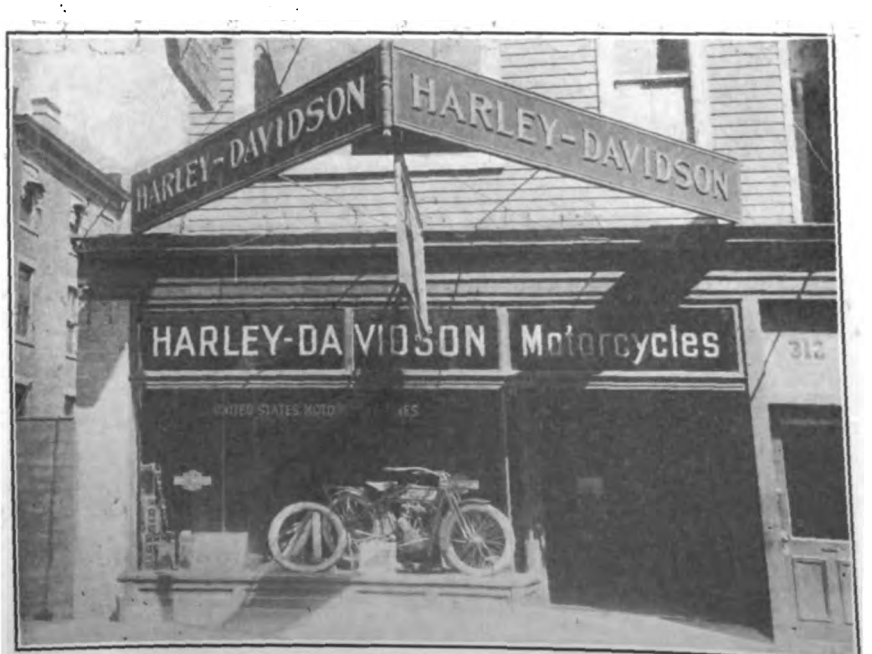
Many schemes were tried for disposing of the old mounts, but few of them resulted in the sale of more than one or two. The stock kept increasing rapidly and it soon became necessary to stop the trading in. As a result, the sale of new motors ceased. The business was at a crisis. Either the firm must discover a field for the sale of the crocks or admit itself beaten. Then one day an advertising solicitor from one of the daily papers strolled into the store and commenced to ask why there were so many machines on hand.

What the Ad. Man Said

Upon being informed of the true state of affairs and told there was no demand for these machines, he began to think and presently left the store. The following day he returned with some data and suggested this plan: Try the classified ad. section of the paper for one month. We will guarantee to move all the machines on the floor if a fair price is set on them and the cost will be one-tenth of that of any other system. The advertising man showed the dealer the section of his Sunday paper having the classified ads. and pointed out that there were 200 such referring to used automobiles, in that one issue alone.

This seemed to answer the question "Do classified advertisements pay" to the motorcycle dealer, for the fact that 200 people would advertise in the Sunday papers surely proved that people read this section. He investigated the cost of running three or four such advertisements a day and found that at the rate of one cent per word he could run four or five ads. a day at a total cost of not more than $15 a month. The dealer was desperate and decided to give the advertising solicitor a chance.

The first day the ads. prepared by the dealer read: For Sale, 1913 Blank motorcycle, 7 h. p. twin, footboards, spring frame, free engine, mechanical oil pump, completely overhauled, $100 cash or easy payments. Ad. No. 2, was: For Sale, Dash motorcycle, single cylinder, free engine, magneto, good tires, first class condition, $65, payments. Ad. No. 3 referred to 25 used motorcycles, saddles, ten tandems, 50 used casings and several lamps. Ad. No. 4 offered 50 used bicycles which had been rebuilt, equipped with new tires, pedals and grips and re-enameled. They were guaranteed and priced at $10 to $20. Under each ad. the dealer gave the location of his place of business together with his name.



Where Silent Gray Fellows Have Their Home in Newark, N. J.—Headquarters of Carl W. Bush, at 312 Halsey Street, a Model New Jersey Establishment

Returns Were Quick

Results began to come after a day or two. The second day, five men came to the store to see the Blank and Dash machines and both were sold. Others came who could not be interested in the two machines, but were fitted up with other motorcycles. Some did not buy at that time but were listed as prospects and kept in

PROVING WORTH OF THE CLASSIFIED AD.

(CONTINUED FROM PAGE 45.)

touch with whenever a machine that might suit them was turned in. The stock of old crocks soon began to look slim and only the real old models remained.

The problem was to get rid of the ancient ones. The market in this city demanded a better class of machines than those on the floor and the dealer again turned to the advertising man for advice. His answer was: "Use the classified ads. of the trade papers that go out over the country," and the dealer took steps right away to find out the cost of using the farm and motorcycle trade papers.

What Farmers Wanted

He found the farmer trade as a whole did not demand as fine appearing machines as the city boys. What the farmers wanted, he found after consulting the salesmen in this department, was a machine which would give them service; that would be like a coffee pot and boil away each day. Looks apparently did not matter so long as they got a machine which would do the work and got it at the right price. It was found that most of the farmers who came to look for a motorcycle in the store had made up their minds just how little they wanted to pay and would not be induced to buy at a higher figure. This looked to be a good field for the sale of the old motors.

Advertisements were placed in several of the cheaper-rate farm papers, two of the motorcycle trade papers and one or two of the boys' magazines that cover the Middle West pretty thoroughly, as a test of the new plan. The advertisements offered to replace any machine sent to a purchaser which was not just as advertised. All machines out of the city were sold for cash only, so that the firm was sure to get its money on all sales.

The clause in the advertisement that offered to make an exchange of any unsatisfactory machine drove any fear out of the minds of prospective purchasers as to the firm with whom they had dealings. They knew that they had the protection of Uncle Sam should the dealer not back up his statements. A machine at $40 to $50 was just what the country boys wanted and they took advantage of the opportunity to get such a machine from a firm that would stand back of its statements.

All machines shipped out of the city were put in good running condition and guaranteed as such, with the result that very few ever came back. When a customer was not completely satisfied, he was forced to pay the freight on the machine to and from the store, so that the firm was not out any money on the transaction unless it was for a few hours' labor putting the mount back into salable condition. If there were any parts broken on the first machine, the customer stood the damages, and in most cases, was glad to do it to get another machine. He told his friends of the square treatment he received and as a result, this firm has built up an enormous business in used machines inside of the last three years. This is in addition to allowing customers to trade in all the old motors offered for new machines.

NORWICH, N. Y.

T. J. MANNING will handle the Reading-Standard for 1916 in Norwich and vicinity. He recently signed up with Traveller Lou Guterman to handle this line of motorcycles.

BALTIMORE, MD.

HOWARD A. FRENCH & CO., have just sold six Indian machines to the Baltimore police. This department has been using Indians for some time and the order is for new equipment.

BREAKING HOME TIES

Excelsior Autocycles Being Crated and Shipped to All Parts of the World. When They Leave the Factory They Never Come Back, Except in Case of Wreck Through Collision or Similar Disaster

THERE is no better index of the efficiency and volume of business of a manufacturing plant than the shipping department.

The finished product must all go through this department, which must therefore be capable of handling this rapidly and correctly or the purchaser will suffer through delay and errors.

The shipping department of the Excelsior factory is easily capable of handling deliveries of over 300 motorcycles per day and more than this in emergency. Every movement is thoroughly systematized and every employee thoroughly posted on his particular part of the work.

Crates are finished as nearly as possible in a separate department, leaving the minimum of work to be done in the final crating.

Domestic and export shipments are handled by separate branches, domestic shipments being again sub-divided for express, freight and small parts.

Express shipments are delivered through an entirely enclosed wagon room, with room for six to eight large trucks, which are backed up to the loading platform, which is, at night, separated from the wagon room by large doors of the jackknife type.

Freight shipments are transported by elevators to the second floor where they are loaded directly into cars run in for the purpose on a private track owned by the Excelsior Company and connecting with the Belt Line that in turn connects with every freight depot in Chicago.

In this way carload shipments are loaded right at the door of the building, the cars sealed, and not again opened until they reach their destination.

The space occupied by this department has an area of nearly 2000 square feet, is brilliantly lighted and thoroughly ventilated.

The perfectly smooth concrete floor greatly facilitates moving the heavy crates and export shipping boxes.

The illustration only shows about one-fourth of the entire department, this being all that could be taken in by the camera at one time.

It is largely by such equipment and methods that Excelsior dealers are assured of prompt deliveries and, to the utmost possible degree, the elimination of mistakes of packing or directions.

Such efficiency is thoroughly appreciated by dealers great and small and is a valuable part of Excelsior service that is always on the job.—Adv.

KELLNER DISCUSSES POLICY THAT HAS MADE HAVERFORD BRANCH A SUCCESS

BUFFALO, N. Y.—The youngest and one of the most successful cycle dealers in Buffalo's Motorcycle Row is A. Kellner, manager of the Haverford Cycle Company's local branch and agent for the Excelsior motorcycles, Smith Motor Wheels, etc. Mr. Kellner is a graduate of "Hard-Knocks University," and is profiting every day by his experience. He grew up in the motorcycle and bicycle business, serving for years under the tutorship of his brother, L. J. Kellner, manager of the Haverford company's branch in Cleveland.

Ask Mr. Kellner how he accounts for his success in the cycle business and he will tell you that he has adhered to the following details in his sales policy: Honest representation of goods at all times; cautiousness in handling prospects and in permitting time-payment sales; prompt service in all branches of the business; complete stock of parts and accessories; friendly understanding with patrons; giving a smile even when the natural inclination might be to frown; representation of large and responsible concerns; a reputation for giving a square deal under all circumstances.

A. Kellner

"But even the dealer who keeps these matters in mind may not be working all his opportunities," remarked Mr. Kellner, in an interview a few days ago with the representative of **Motor Cycle Illustrated,** "for he must have a properly arranged store and keep it up to snuff every minute of the time.

"You will note," he continued, "that I have two large racks on which I display all my tires and rims. Then along the wall I have a shelf on which I show some of my bicycles. On the floor against the wall I have a platform 8 inches high where I also display a number of bicycles. In front of this platform I arrange my motorcycles. In this way I give every article an effective display, and still avoid the suggestion of crowding. Each row of machines is a step higher than the one in front of it.

Display Featuring Excelsior at Buffalo Branch of Haverford Cycle Co.

"I have found that systematic arrangement of goods makes a profound impression upon a prospect. Once he sees that you are handling your place on a strictly business basis, he will give you his respect and confidence. So I have carried the scientific display idea throughout the whole establishment. It has repeatedly proven to be most effective.

"On the opposite side of the store from the machines I have placed my showcases, counters and shelves for parts and sun-

MILITAIRE AUTOCYCLE

The Runabout that Lifts Motorcycling to a Higher Plane

SPECIFICATIONS
Four cylinder unit power plant.
11½ H. P., S. A. E. rating.
Selective sliding gear transmission, 3 speeds and reverse, annular ball bearings. Dry plate clutch.
Shaft drive with two universals.
Artillery wheels mounted on annular ball bearings.
Patented engine starter.
Pivoted front axle (patented).
Pressed channel steel frame.
Cantilever springs.
Wheelbase 65". Tire 28 x 3".
Patented Idler Wheels.
Highest grade equipment, including Bosch Generator.
40 to 60 miles per gallon of gasoline.
Tire expense ¼ that of lightest cars.

The MILITAIRE gives a new meaning to the word "MOTORCYCLE"—a new dignity. For no one can gaze upon the MILITAIRE without achieving a new respect for the two-wheeled class of power-vehicles.

The MILITAIRE is the **highest development of the motorcycle.** It is four-cylinder, because multiple-cylinder power means power-smoothness. It has three speeds and reverse, because the **lack** of this feature in the ordinary motorcycle stunted the growth of its popularity. It has idler wheels to remove the last vestige of labor from handling the MILITAIRE. Its channel steel frame has already proven itself.

Write for further details of the MILITAIRE. It is the best buy.

What About Your Ignition?

THE ignition question is a serious one, especially now that a desire may exist to skimp here and there to obtain a low selling price.

Ignition should not be grouped with the good enough class; too much depends upon it. Cheap construction or poor design is sure to cause inefficiency and breakdowns, and a forceful advertisement to hurt the future success of the motorcycle maker and the agent.

The Bosch Magneto is famous because of its high quality. It is built to uphold a reputation, to measure up to a standard, and in consequence it costs just a trifle more than other ignition systems —but considering its ability to serve long and well, to satisfy thoroughly, it is comparatively the cheapest ignition system made.

Be Satisfied

dries. Needless to state, these are all arranged so as to permit of getting at them without confusion or delay.

"In the rear of the store I have my repair shop, and over the repair department my office is located. From the office I am able to see all that is going on in the store, and this is a point not to be lightly considered."

When asked if a local motorcycle club was an asset to the dealer, Manager Kellner remarked that the club idea is an excellent one if worked out properly. He deplored the present tendency of many riders to "knock" the machine used by other enthusiasts, and argued that one of the great needs of the motorcycle field today is a broader sporting spirit which will permit of riders of all makes of machines pulling together for the general advancement of the game.

"As you are not a motorcycle rider, how can you consistently sell machines?" asked the correspondent.

"That's easy," was the answer. "I do not believe it is necessary for a motorcycle dealer to ride a machine in order to be able to sell them, provided he is a good salesman and knows his goods. You don't expect a man who sells horses to be a jockey. It may be well to state, however, that many a dealer would help his business by getting out with the boys, adopting a democratic attitude and using a motorcycle himself. A successful dealer really has very little time for riding, and I think he can be a good booster and a real enthusiast even though he may not be a rider at the time."

In discussing the time-payment sale, Mr. Kellner sounded a warning, while admitting that many dealers were obtaining good business along such lines.

"In the past most motorcycles were sold for cash," said Mr. Kellner, "but today we have to depend upon the workingman for a great deal of our business, and the buyer in that class usually counts upon credit in some form. This means that the dealer must conduct numerous investigations to ascertain the standing of prospective purchasers, and all agents who carry on installment business should exercise great care.

"Before closing a sale I satisfy myself that a man is dependable and then I insist upon having one-half the purchase price before the machine is taken away. The balance is paid at the rate of $ a week. I draw up a lease, in duplicate, keeping one copy ar filing the other in the office of the county clerk."

PROVIDENCE BRANCH OF HUB CO. MOVES INTO LARGER QUARTERS

PROVIDENCE, R. I., February 12.—R. M. Linnell, treasure of the Hub Motorcycle Co., of Boston, Mass., has moved h Providence branch into new quarters at 121 Empire street, neare

TWITCHELL AIR GAUGE

Guessing May Cost You Your Life

BE SURE

You can't tell how many pounds pressure there is in your tires by pinching them or looking at them, and a difference of a few pounds between what they have and what they should have means the price of a new tire or a broken collar bone, or both.

Inflate your tires to the pressure prescribed by your tire maker and test the pressure in them by means of a Twitchell gauge. There is no other SAFE way of doing it.

Write for table of air pressures recommended by the tire manufacturers.

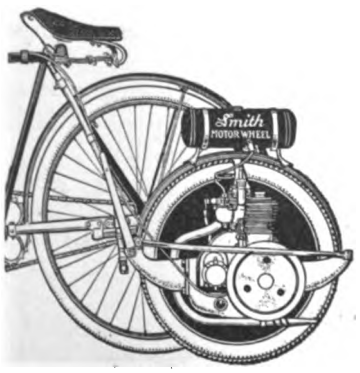
Bicycle Booster Day



Smith MOTOR WHEEL
"The Bicycle Booster"
List Price $60, F. O. B. Milwaukee

Bang!!

TEN days before Bicycle Day the Smith Motor Wheel $50,000 country-wide advertising campaign will be launched with a **full-page** advertisement in The Saturday Evening Post, Feb. 19.

This will be followed by later advertisements in the Post and advertisements beginning with the March editions of 11 other National publications.

A total of 52 full-page, half-page and quarter-page advertisements are to be issued, reaching a total of 25,000,000 people each time, **one-fourth the entire population of the United States.**

Are you ready for the business this powerful campaign will produce in your locality? Have you a 1916 Smith Motor Wheel demonstrator on hand? If not order now.

A FEW exclusive territories remain open, where representative dealers for the Smith Motor Wheel are desired. For the right kind of dealers we have an attractive proposition. With such dealers we invite correspondence.

Motor Wheel Division.

street premises and Linnell has put in a larger stock of machines and opened a repair shop in addition. The Excelsior is handled in both this and the Boston store.

The Hub Motorcycle Co. started in at the Fountain street store last November. Shortly after the store was opened, business started to boom and it became necessary for Linnell to have C. E. DeLonge, the Boston manager, come down at intervals and assist him. The business grew and a repair department was needed, but there was no room for it at 144 Fountain street. A move was determined on and the Empire street place secured.

BINGHAMTON DEALERS TO CONDUCT OWN THREE-DAY EXHIBITION

BINGHAMTON, N. Y.—The Binghamton Cycle Dealers Association of this city will hold a motorcycle show on February 29, March 1 and 2. There will be an extensive exhibit of all motorcycles represented in this city, as well as a good-sized bicycle section. The following dealers make up the association: Frank T. Abbott, president; Frank S. Hump, secretary; Bert E. Jewel, treasurer; E. E. Ayres, Turner's Cycle Store, John Braico, George S. Carver, Norval S. Douglas Co., W. A. Merrill, Waldron Drug Co.

Turner's Cycle Store has taken the Reading-Standard representation for Broome County and will have an extensive exhibit at the show. The machines to be displayed include a 1916 three-speed twin, and a 4 h. p. single lightweight. A sectioned motor, gearset and other parts will be shown. The R-S stand will be in charge of Manager William H. Wolfe.

LOS ANGELES, CAL.

WILLIAM H. HOEGEE CO., will distribute the Dayton Motor Bicycle and line of motorcycles in Southern California and Arizona. The firm will send out a specialty man at once with a Dayton motor bike and after making the rounds of the territory he will cover it again with a three-speed Dayton motorcycle. This will be followed up by the weekly call of one of the six salesmen. A carload of Dayton bicycles is now on the way to the Hoegee firm from the Davis Sewing Machine Co. factory in Dayton, O.

Dr. Alvin C. Kraenzlein, Former University Champion Athlete with His Pet Cleveland Lightweight in Belmar, N. J.

LOUISVILLE, KY.

HARRY RAY, of the Dayton Motorcycle Sales Co., reports the sale of another Henderson to Joseph Schackert of the Oertel Brewing Co. L. C. Menard of the same firm purchased a Henderson last year.

ROY E. WARNER CO., local agent for Firestone tires is planning a new home at Third and Breckenridge streets. Proprietor Warner expects to have one of the finest tire and supply establishments in the South when everything is completed.

OLEAN, N. Y.

R. E. ROTTSTED has just signed up to represent the Reading-Standard for Cattaraugus, Allegany and Wyoming counties. He already has in prospect six sub-agents.

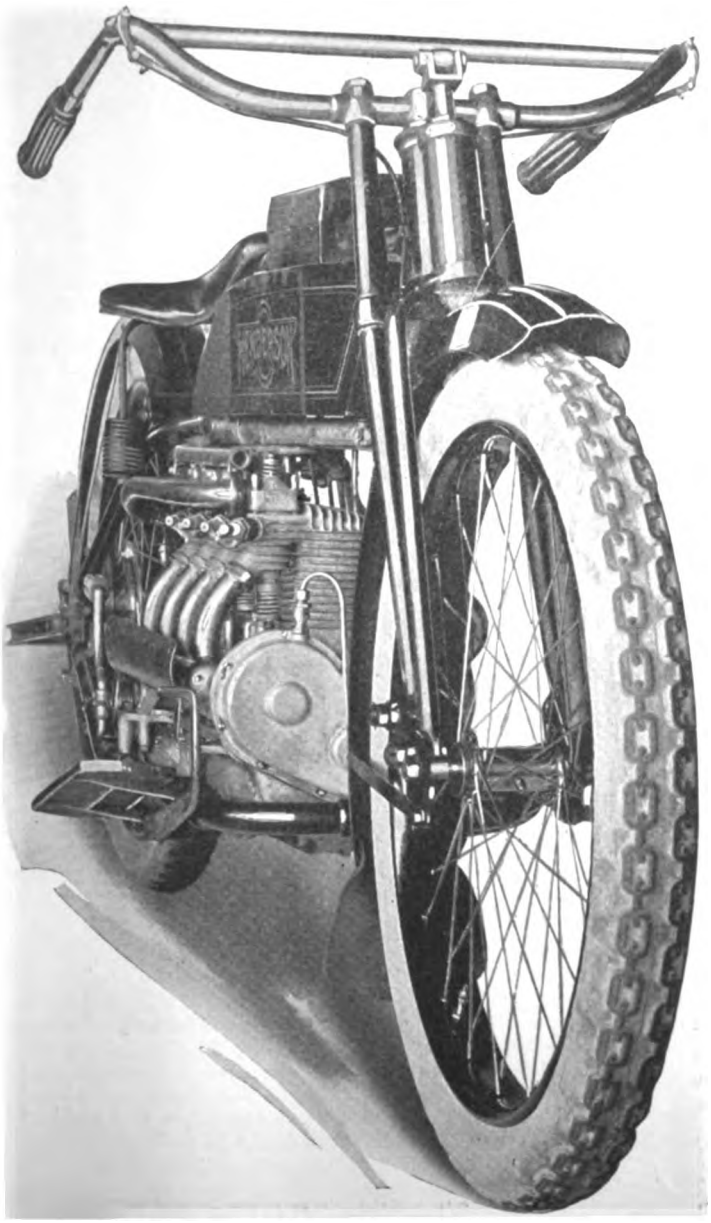
Henderson Super-Service is the Reason



Riders have learned of the greater service of the four-cylinder Henderson.

They know of the luxury of its smoothness—of its live responsiveness—of its breathless speed and indomitable power.

They know of its steadfast dependability and rugged strength—with a perfectly balanced motor to avoid the harmful effects of vibration, too.

They have learned of those qualities which can only be gained with a perfected **four-cylinder** power plant, and they are no longer willing to accept less.

Consequently, Henderson dealers are reaping a harvest of sales that eclipse records of any previous year.

HAMMONDSPORT, N. Y.
Pac. Coast Branch, 3664 So. Main St., Los Angeles, Cal.

TACOMA, WASH.

RAY DAY, Indian agent in this city, has put up an octagon electric sign reading: Ray Day—Indian—Motorcycles and Bicycles. This is the only electric sign on Tacoma avenue and it attracts customers, as Day's books bear witness. "The Powerplus twins go as fast as we get them" says Ray.

MANAGER GLASGOW, of the Harley-Davidson store, is keeping open evenings these times. He has then plenty of time to talk to prospects, who are coming in pretty fast, and are keeping him and his demonstrators busy whenever the streets of Tacoma are even ridable.

T. PAULSEN, who runs things at the Thor agency, is demonstrating on runners these days, when the streets are snow-covered. He has replaced the front wheel on his Thor twin with runners and uses a Weed chain on the rear wheel. Paulsen has fitted up a repair table on casters for his shop, and he puts each machine to be repaired on it. The work is done quicker than when the mount is on the floor. The tools are held in pockets on the sides of the table.

WASHINGTON, D. C.

AUGUST ZIMMERMAN, Harley-Davidson agent, disposed of nine machines for commercial purposes last week. The Washington Gas Light Co. took four twins with single gears, the Potomac Electric Power Co., two 3-speed twins; H. R. Howenstein & Co., real estate, two single-geared twins and the Semmes Motor Line, a three-speed twin. The last named machine was purchased by a motor bus firm for use of its service man. The firm operates buses to points varying from 30 to 40 miles out of the city.

BUFFALO, N. Y.

A. KELLNER, manager of the Buffalo branch of the Haverford Cycle Company, Excelsior and Smith Motor Wheel agent, surprised the trade here recently by announcing that he was engaged to be married. The future Mrs. Kellner is Miss Pearl F. Goodman, daughter of Mr. and Mrs. I. Goodman, of Buffalo. The wedding will take place in the late spring or early summer.

HOWARD S. TAYLOR has been appointed assistant manager of the local branch of the Haverford Cycle Company, Excelsior representative.

COLORADO SPRINGS, COLO.

CHARLES G. LOWNDES, of this city, will represent the Cleveland lightweight for Colorado Springs and vicinity during 1916. Mr. Lowndes has received several of the little two-strokers already. The contract was signed with G. B. Southard, Cleveland distributor at Denver.

NEWARK, N. J.

WALLACE STUART, of the New York Sporting Goods Co., of New York, has been busy this week in Newark demonstrating the Cygnet rear car to local motorcycle dealers. Stuart uses an Indian Powerplus as the motive power. He struck some very poor weather for his demonstrations, but the practicability of the outfit appealed to several dealers. Walter Goerke, Indian representative, has ordered one for immediate delivery.

Newark dealers are seriously considering the commercial side of the Cygnet car, as the present high price of gasoline is worrying many a small merchant who has motor delivery and turning his attention to the motorcycle for salvation.

INDIANAPOLIS, IND.

WILLIAM SPANGLER is once again foreman of the service department of the H. L. Dipple Co., local Harley-Davidson agent. He left the Dipple firm some time ago and joined the forces of the Harley-Davidson agency in Milwaukee, Wis., but has now returned to the Dipple fold "for good." Spangler is classed as the most finished repairman on Silent Gray Fellows in this part of the State and is a favorite with all Indianapolis riders. He will have his brother George as his right hand man in the Dipple repair shop. Both Dipple and Spangler are very enthusiastic over prospects for the new season.

You must Adjust Your Carburetor for Winter Weather

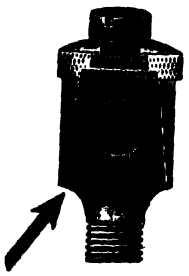
Then why not do it quickly, easily and accurately with the tool made specially for the purpose,

The Stevens Carburetor Wrench

This handy little tool takes care of all adjustments—combines chuck for reseating float valve and socket wrench for the float valve lock nut. Price, at your dealer's, 40c.

—and for quick starting

here's another invaluable little device that has made carburetor "crankiness" a thing of the past.



Stevens Air Valve

Fit this little jigger on your carburetor and watch your motor get back its old starting "pep." A rich starting mixture always. Absolutely air-tight when closed. Price 20c. —at your dealer's.
Have you got that catalog of ours? Dealers—your jobber carries a full line of Stevens accessories—each with the "sales punch" fully developed.

Stevens & Company
375 Broadway New York

SEATTLE, WASH.

VERNON & SON, distributing the Henderson in Seattle, report exceptionally bright prospects for the new season. While they have delivered a number of mounts so far, they expect that spring will keep them busy uncrating and turning the four-cylinder machines over to buyers.

PIPER & TAFT have another carload of Excelsiors ordered. When this comes in, its contents will be distributed to all their sub-agents, and a considerable number will remain in Seattle to satisfy local demand.

MANAGER HIRSCH, of the Hirsch Motorcycle Shop, has two Silent Gray Fellows in his agency window and is busy booking orders for the next lot—and the one following, in fact—as well as making preliminaries for further sales.

DENVER, COLO.

ROCKY MOUNTAIN MOTORCYCLE CO. has taken the agency for the Cleveland two-stroke lightweight for the States of Colorado and Wyoming. Manager G. B. Southard has also signed up to represent the Cygnet Rear Car for Colorado.

J. W. HENDERSON, recently appointed representative for the Hendee Mfg. Co., in this city, has received a carload of Powerplus twins for distribution throughout Colorado, Wyoming and Montana. The machines are being stored here under the new Indian distribution plan.

ST. LOUIS, MO.

KNIGHT MOTOR CO., Excelsior and Henderson dealer, is having an extensive sale in Excelsior big-valve twins and the Henderson short-coupled models. The four-cylinder mounts are invariably fitted with electric light and horns when ordered. St. Louis factories are now running full time, and installment sales are fine. The Knight company is in its new home on 3325 Locust street, right in the heart of Automobile Row.

MIAMI, FLA.

J. R. MURPHY and E. L. Walker have formed a partnership known as the Motorcycle Garage and have opened a store at 326 Thirteenth street. A large stock of parts for all makes as well as a full line of accessories is kept, and an excellent repair shop has been installed. Murphy was formerly manager of Harper's Indian agency, while Walker was in charge of the mechanical department of the Miami Cycle Co. of this city.

SPOKANE, WASH.

INLAND MOTORCYCLE COMPANY, distributor for Excelsior motorcycles and bicycles, has annexed a large distributing territory in Eastern Washington, Idaho and Montana. The firm has secured an efficient corps of sub-dealers to date and reports from all centers augur well for a big 1916 season in both motorcycles and bicycles.

SPOKANE CYCLE COMPANY, representing the Indian, has just received a carload of three-speed, electrically-equipped models. When the machines were uncrated, all hands had hard work demonstrating their fine points to the crowd which jammed the agency. The carload had a shipment of sidecars in addition to the twins.

COLUMBUS, O.

THE BELT-BARR MOTOR CO., distributing the Indian in Central Ohio, has closed a contract for two Featherweights with the local branch of the Fleishman Yeast Co., for the use of the service men and collectors. Mr. Belt, of the company says that the Featherweight is proving one of the most popular models of

NEWBURGH, N. Y.

S. V. COLE has taken the agency for the Reading-Standard for this city and vicinity. He signed up recently with Traveller Lou Guterman, of the Reading forces.

Harley-Davidson Commercial Sales

C. H. Lang, Harley-Davidson dealer in Chicago, has sold the Peoples Gas Light & Coke Company 45 more Harley-Davidson motorcycles. 31 of these will be equipped with sidevans.

With this last order, the Peoples Gas Light & Coke Company will have 86 Harley-Davidson motorcycles in service.

Motorcycles in commercial work mean many repeat orders for the dealer who represents a machine that will stand up in this service, for in no field are quality and genuine service so essential. That is one of the reasons why Harley-Davidson dealers are getting the lion's share of the commercial business in their localities.

Many Harley-Davidson dealers have developed their commercial field to the point where it is the most important end of their business.

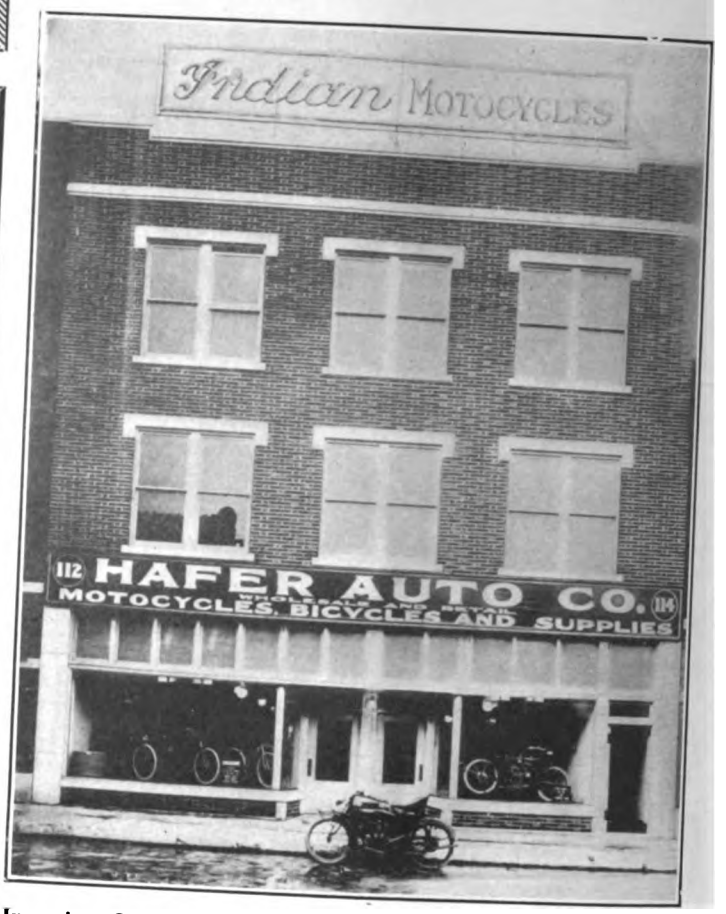
INDIAN DEALER BROTHERSON HAD MOST SUCCESSFUL CAREER

JOPLIN, Mo.—Martin Brotherson is a motorcycle dealer of which any community should be proud. He started in with the Hafer Auto Co., in 1905 and bought out Mr. Hafer's interest two years later, taking on the Indian for Joplin. The total volume of business for that year for Brotherson was $2,000, while in 1915 his total was between $50,000 and $60,000. His growth has been consistent and each season has seen a marked advance over its predecessor.

When Brotherson first started as Indian agent he had a very modest place. Today, he has a two-story building measuring 60 x 90 on the ground. The lower floor is divided into a salesroom 60 x 40 and a shop measuring 40 x 30 feet. The second floor is reserved for storage. In addition to the Indian motorcycle, Brotherson handles bicycles in quantity.



Imposing Quarters of Hafer Auto Co. at Joplin, Mo., of Which Martin Brotherson Is Proprietor. Indian Is Handled

Brotherson is planning to put on an extra fine show on Indian Day. He has instituted popularity contests for the last five years and each contest has increased his business. From a repairman in 1905 he has risen to be a member of the Joplin Board of Trade and one of the most active and best-known citizens of the town. His brother Harry who is repairman for the establishment, was trained in the Hendee repair department at Springfield, Mass. The photo shows Martin Brotherson with his brother at the left.

ST. LOUIS, MO.

HOLMAN JOHNSON, Thor dealer, at 3310 Olive street, has closed his store and disposed of much of his stock. The Knight Motor Co., Excelsior and Henderson dealer, has taken part of it, while Harry Lozier, Harley-Davidson dealer in East St. Louis, has another part. Johnson has the remainder of his stock at his home and is expected to go into business later at another address. The Knight firm is taking care of his repair trade.

KNIGHT MOTOR COMPANY, Excelsior and Henderson agent, is planning to form a motorcycle club early in the spring. Membership will be limited to owners in and around St. Louis.

WALD MANUFACTURING CO.

Dept. F SHEBOYGAN, WIS.

BOSTON, MASS.

MOTORCYCLE DEALERS in this city are planning to form a dealers' association. The association will aim at exploiting the motorcycle as a means of sport and recreation, and will co-operate to stabilize credits and allowances on used machines. Another object will be the formation and support of a motorcycle club to aid in popularizing the power two-wheeler.

The first meeting was held on February 11. Representatives of the Harley-Davidson, Indian, Excelsior, Henderson, Thor, Smith Motor Wheel, Cleveland and Miami were present. The meeting was harmonious at all times. The question of allowances on used machines came up and lists will be made by each dealer of the allowances he is willing to make on his own line of machines.

NEW YORK, N. Y.

FELIX LEWIN, manager for the Henderson Motorcycle Company, at 227 West 106th street, is now awaiting a carload of Henderson single-geared and two-speed models. This is the first complete carload shipped from the Detroit factory to Lewin in 1916, and the 27 machines contained therein are all accounted for. When the crates are opened, Lewin and his assistant, Charley Drude, will turn them over to their eager purchasers.

CALVIN R. WEBBER, manager of the motorcycle department of the New York Sporting Goods Co., metropolitan Indian distributors, is now on a visit to the Hendee factory at Springfield, Mass. This is Webber's first visit to the Wigwam and he has been looking forward to it for months. He will make an extensive tour through the Hendee factories during his trip.

STOCKTON, CAL.

JOHNSON'S SPORTING GOODS HOUSE, has taken the agency for the Dayton Motor Bicycle and the Dayton line of bicycles. The formal opening will take place on February 19. Col. Johnson will handle the executive end of the business.

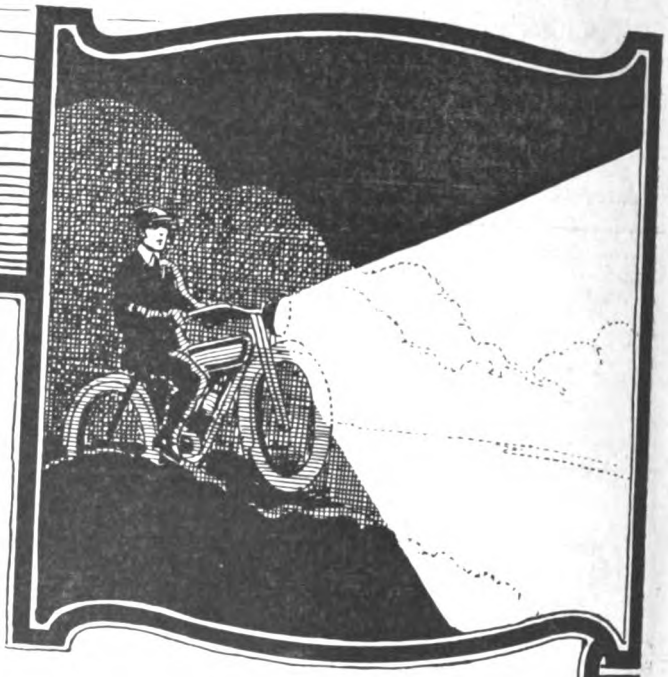
Turns Night Into Day



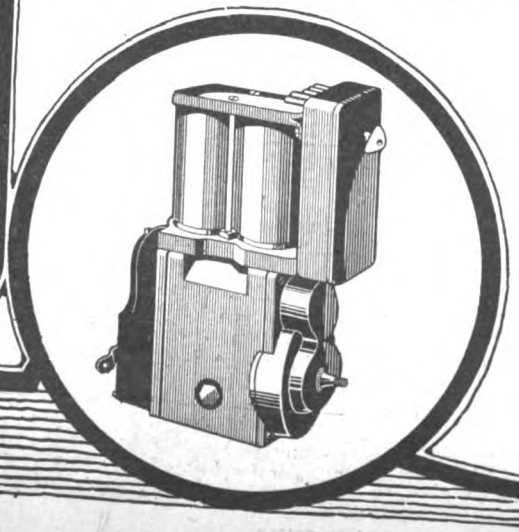
REMY

Motorcycle Lighting-Ignition System

ALL the pleasure of night-riding with the danger removed—that's the privilege enjoyed by the motorcyclist whose mount is "REMY" equipped.

No need to worry about half-hidden cave-ins, or sudden curves. No mistaking road obstructions for shadows. No need to hurry home before dark, because the REMY System turns night into day. It means ease of mind—an ever-present sense of safety.

REMY Ignition insures perfect motor performance—smooth, even running at low speed. A quick, snappy pick-up. When your motorcycle is equipped with the REMY Lighting-Ignition System, you can enjoy motorcycling at its best.



Many Harley-Davidson motorcycles are "REMY" equipped. Ask any H-D dealer to show you the advantages of the REMY System.

Quality and Service

The Keystone of Stevens Success

Stevens distribution is a service you should enlist on your side, dealers. YOUR jobber carries a complete line of STEVENS CYCLE NECESSITIES—fitments that have proven themselves in every way as measuring up to the STEVENS standard of Quality and Reliability.

Bear this in mind:—**not one accessory we manufacture is other than practical.** That is why we can offer dealers an assortment of motorcycle and bicycle accessories that for saleability and serviceability come "ace-high" with the customer.

By their very quality and reputation alone STEVENS accessories are continually moving from the dealers' shelves. BUT—the potent force of STEVENS Advertising further aids in bringing the trade into **your** store.

Write to your jobber to-day. He knows the STEVENS reputation, built up by over fifteen years of *real* co-operation—reliability and fair-dealing.

The Stevens Line Should Be on YOUR Shelves. Let Your Jobber Put It There.

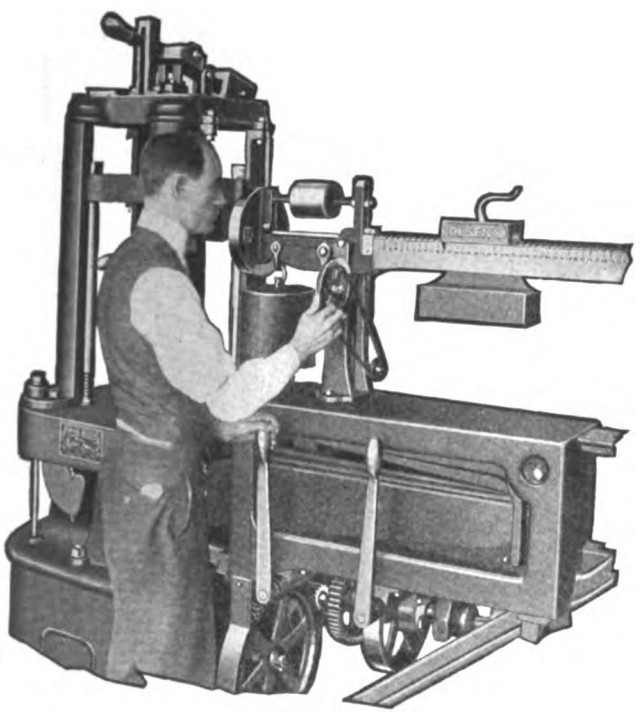
STANWELD PRODUCTS



Measuring Strength

is distinctively a twentieth century method of determining efficiency. In the building of bicycles and motorcycles the advantages of increased strength are lost if gained only by adding weight.

There is, however, a happy medium where ample strength meets minimum weight. The proper quantities of these factors cannot be determined by mere computation or guess-work. They must be found by actual test.

All metal used in the manufacture of *Stanweld Frame Parts* is carefully tested for strength. We know the strength-limit of every *Stanweld Rim* and every piece of *Stanweld Tubing.*

The motorcycle or bicycle you buy will give better service, be safer and stronger, and worth more when you want to re-sell it if built of *Stanweld Frame Parts.*

Insist that you get them.

Here are some happy dealers who boost and sell

Rollfast

TRADE MARK

-made to last

"Woodrow" Wade, the Wilson ringer, who looks after the retail tire department of the N. Y. Sporting Goods Co., says: "Rollfast? I'm too proud to fight the people who ask for them. I sell 'em—like waffles. SOME tires."

The men whose pictures are shown here are keen business men—all of them. They know what's what in tires. Read what they have to say—each one praises ROLLFAST *unreservedly*—for who would not praise a tire with the sound construction, the attractive, skidless treads, and the wonderful riding ease and durability of ROLLFAST BICYCLE TIRES?

You ROLLFAST dealers throughout the country—write us of your experiences with ROLLFAST. Send us your pictures, too.

"Jule" Berges, the popular Bakersfield, Calif., dealer declaims:—"Whew! Talk about ROLLFAST sales! They're TREMENDOUS. They're the real friend-making tires."

Mention of Motor Cycle Illustrated is always appreciated by advertisers.

Digitized by Google

rolled under the ROLLFAST banner, write to your nearest distributor today. There's too much ROLLFAST business floating around in your territory for you to lose the cream of it to your competitor, who may get that EXCLUSIVE AGENCY while you're hesitating. Write to your jobber *today*.

"Ollie" Berkhemer, the Bronx Collosus, has this to say:—"Never in all my experience have I found bicycle tires so well balanced—in appearance, in construction, in "sell-power." I'm solid for life with the boys I sell them to."

Here's Sol Lazarus, who makes money selling 'em in Yorkville. "I've stocked ROLLFAST since they came out," says Sol, "and my trade in bicycle tires has steadily increased since then. S'nuff?"

RED WING

The Up-to-the-Minute Line That Makes Bicycle Converts

The RED WING Line has flown high in favor since its introduction last October. Dealers throughout the country unite in saying that RED WING bicycles have acted as magnets to draw new prospects into the bicycle ranks. And that's the best that can be said about *any* wheel.

A WELL-BALANCED LINE

Here's one of the big reasons for RED WING Popularity. The line is so remarkably well adapted to everyone—be it boy or girl, growing youth or adult—RED WING bicycles supply a model *exactly* suited to the prospect's requirements.

MODERATE PRICES

The prices are RIGHT, too. For quality equipment such as is found on RED WING wheels, there's a heap of value to offer the bicycle buyer. Live dealers appreciate this, that's why they are continuously pushing RED WING to the front.

ENDURING SATISFACTION

Finally, RED WING Bicycles have proven themselves by the crucible test of SERVICE. There are no come-backs with the RED WING Line. Every purchaser is the dealer's *friend for life.* Sounds strong, but those dealers who sell RED WING will heartily endorse this statement.

Write us for full description of the biggest bicycle sensation of the year.

100,000 Motorcycles for 1916

Do you realize that the only factor necessary to reach this grand sales total is just good salesmanship on your part?

Nearly every known make of motorcycle is being nationally advertised by the motorcycle manufacturers.

This advertising can't do it all. It is creating the desire for motorcycle ownership. But it takes you, as the dealer, to close the sale.

Keep your store clean; keep your stock up to date; and be enthusiastic — these are the three cardinal principles of successful selling.

And of these three, enthusiasm plus courtesy can make a motorcycle sale nearly every time.

Don't overlook a single prospect. Think of the needs the motorcycle fills. Think of the deliverymen for the retail stores.

Go out and see the police department, firemen, telephone linemen and mail carriers. Call on the automobile repairmen, the collectors and delivery service.

Talk to the hundreds of men and boys who are half inclined to buy a motorcycle for pleasure riding. All they need is just a word of encouragement from you — and new motorcycle sales are rung up.

Motorcycles are built right and the prices are right. What the business needs is red hot salesmanship on your part.

Believe in the motorcycle, understand the motorcycle and talk the motorcycle — then it will be quite possible for you to land your share of the 100,000 motorcycle sales for 1916.

PREST-O-LITE

for Motorcycles

The Light That Stands the Jolts

A strong, steady light is especially important when the road is full of ruts, bumps and gravel, with unexpected turns.

The most severe jolts and bumps do not affect your Prest-O-Lite —it throws a brilliant, unflickering light far ahead, illuminating every obstacle. It gives you confidence and enables you to "throw her open" on any road because of its steady brilliance.

Prest-O-Lite Is as Sturdy as Your Motorcycle

Still Prest-O-Lite costs less to buy and less to use than any other brilliant light. It is the choice of experienced riders, everywhere. You yourself can give it any attention it may need.

We have a valuable proposition for dealers—write today

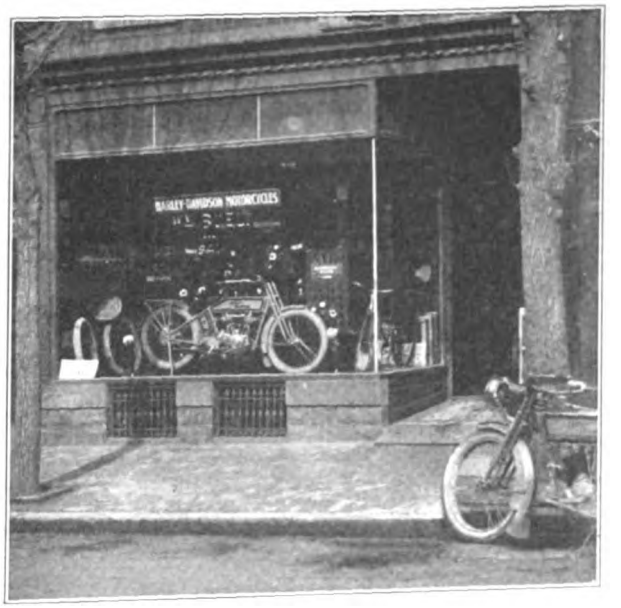
The Result of Selling the Right Line



Wm. Buel, Harley-Davidson dealer in Reading, Pa., is making 1916 the biggest year in the history of his business.

To date he has ordered out 32 Harley-Davidson motorcycles and 32 sidecars. Last year at this time we had shipped him 5 motorcycles and 2 sidecars.

This year he is selling as many sidecars as motorcycles. Last year Buel sold 39 Harley-Davidson motorcycles and 26 sidecars, or 2 sidecars to every 3 motorcycles.

38 of the 39 Harley-Davidsons Buel sold last year were three-speed twins, and all of his 1916 orders are for three-speed twins.

Buel's increasing business is due to his business ability, the popularity of the line he is selling, and the factory co-operation back of the Harley-Davidson.

MAKING A BICYCLIST OF THE BOY

He Is the Most Important Single Figure on the Bicycle Horizon; How to Arouse His Interest, Bring Him Into the Ranks of Riders and Win His Permanent Co-operation

By RODMAN BARRY

"Give proper attention to fostering the bicycle interest of His Majesty, the American boy, and most other angles of the industry will take care of themselves."

ONE of the keenest and most conservative students of cycle trade affairs summed up the sales situation in the above words during a recent conversation with the writer, and the more thought that is given to this statement the more evident it becomes that the boy really is today the most important single figure on the bicycle horizon. Upon the success with which dealers arouse the boy's enthusiasm for the pedal two-wheeler will depend to a great extent the outcome of the present nation-wide boosting campaign.

Every boy is born a bicycle prospect. If he does not join the ranks of riders at some time during his youthful years, the chances are fifty to one that the cycle dealers of his town are to blame. They have ignored him.

To make the average boy a rider it is only necessary to crystallize a desire that is as natural and spontaneous with the lad as breath itself. He is an adventurer at heart, a pioneer, he is inherently averse to "staying put." The woods, the fields, the open roads call him; he is a friend of all outdoors, and the bicycle simply opens the way to the pleasant fulfillment of his ambitions.

But even a healthy, normal boy, athrob with fresh enthusiasm, may overlook the bicycle and devote himself to other forms of recreation unless his attention is attracted and held by a plausible exposition of the two-wheeler's advantages. In other words, he must be "shown." And the "showing" ought to be a simple matter.

Convince a boy that instead of encroaching upon his other interests, the bicycle makes itself a logical feature of all his plans, a jim-dandy adjunct to all his pas-

Digitized by Google

times, and you get him to view the machine practically in the light of a necessity. You can then begin to think of reaching for your order book.

"But the boy, as an individual, is not a buyer," you may argue. "He is not possessed of funds to spend as he pleases."

True enough, but standing modestly and lovingly in the background is a parent who in most cases would be willing to sell the family portraits in order to procure for that boy any harmless article that he believes will contribute to his happiness. It is not essential to aim sales arguments directly at the parent; the boy will do that, in his own way and far more effectually than any salesman, once he sets his mind upon the ownership of a bicycle.

The Parent Is Easily Convinced

So far as the average parent is concerned it is only necessary for the dealer to prove that there is not a single moral or physical objection to the bicycle, and that full value is being given for the purchase price.

Any dealer who stumbles over these obvious points is so far gone and helpless that nothing can be done for him—and it's a safe bet, by the way, that he is not reading this article. The helpless and undiplomatic dealer is growing scarcer, however, and a season of such broad-gauge educational work as is now being done in the cycle industries ought to make him as rare a bird as the dodo.

If the cycle salesman feels that he can help matters by a little straight talk aimed at the parents in his town, he need not look far for an impressive sales wedge. Let him take up the world-old problem of keeping the growing boy out of harmful company, and he can hold the attention of exactly one hundred parents out of every one hundred.

Bicycling Suggests Clean Living

The boy who owns a bicycle has neither time nor inclination for the "corner gang." His interests lie elsewhere. He is a self-appointed scout on the trail of adventure. He has such a lot of things to see, so many interesting places to visit, so many uncommon by-paths to try out, such hosts of friends with the same inclinations, that thoughts of spending a Saturday afternoon filling his fresh, young lungs with cigarette smoke in the shelter of a board fence, or of plotting the discomfiture of his neighbors, make little or no appeal to him. The bicycling boy receives so many suggestions for clean living that he is bound to profit by some of them.

The parent who neglects to provide a safe and pleasant outlet for his boy's enthusiasm is taking big chances. If you don't believe it, or if he doubts it, just dig up a few statistics from the long-headed men who are studying the sociological problem of the boy. What they'll tell you will make you think hard.

Getting the Boys' Viewpoint

The adage that you can't "put an old head on young shoulders," is as solid as rock. The boy's mind must be occupied or he may become a prey to a score of temptations. If he is not given a chance to interest himself in a bicycle, he is certain to interest himself in something else—and that something may be a heart-breaker for the parent.

"Convince the Boy That the Bicycle Is a Jim-Dandy Adjunct to All His Pastimes"

But all that is somewhat beside the purpose of the present article. Most parents are awake to their duty to the boy, and it is unnecessary to dwell upon unpleasant possibilities. That is a negative side of the matter, anyway, and it is the dealer's object to be positive. The moral aspect of the situation is mentioned here only because it has made some old folks "see the light" when all other arguments fell flat.

Just how the cycle dealer can best approach the boys of his town is to some extent a local proposition, but one thing is dead-shot certain: No salesman can make a success of selling bicycles to boys until he climbs down off his high-horse of dignity and gets the boy's viewpoint.

Let's assume, merely as a basis of argument, that the dealer was once a boy. Presto! He's back in knickerbockers, there are freckles on his nose, a high appreciation of jam in his palate and a thousand and one thoughts and schemes of conquest whirling round in his head. Gee, what a lot of things he wanted to do! And most of them were linked up with the out of doors.

Some Ambitions of Boyhood

He wanted to see this, that and the other place, so that he could come back and give startling descriptions of his discoveries; he hankered to be a man of the world, at least to the extent of ascertaining what was on the other side of Johnson's Hill; he longed to reach places, a considerable distance from home, where other boys had not gathered all the chestnuts; he needed a means of getting over to the next town for week-end visits with grandma, who made those wonderful pies; he yearned for something that would get him to and from school as quickly as possible, in order to have more time for adventure-seeking; he wanted to show that with nothing but his own sturdy young limbs he could do some rather amazing things along athletic lines; he liked to get to the baseball field, play a game and still have time for a ramble before heading homeward for supper.

A Universal Mount

Our friend, the dealer, who hops back to his boyhood will know immediately that this list is the merest beginning. Why, there is no end to the varieties of healthful fun and service a boy can derive from a bicycle. Every item on the list will suggest another, and all of them hook up as naturally with bicycling as though the pedal two-wheeler had been taken into consideration when the schedule of boys' pastimes was framed up at the beginning of time.

But the true psychology of the bicycle's appeal to the boy probably lies in his desire to "be anywhere but where he is." He is a natural rover: fundamentally a pagan;

Digitized by Google

and something of a rebel. Whirling through open country with the breeze in his face, his eyes feasting upon new wonders at every turn and his own legs furnishing the power, he has a sense of freedom that approaches ecstasy perhaps more closely than any sensation his later life will know.

Don't let it be said that the boys in your town are being robbed of this thrill; not while you're a cycle dealer. See that the boy gets his share of sun and air and health. He'll be a better boy for it—and a better man. His lungs will be stronger, his head clearer and his mind cleaner.

Find the Happy Medium

Don't "baby" a boy; a healthy youngster hates that sort of thing like "pizen." And don't fire a lot of soggy, old-fogy arguments at him either. Look for the happy medium, the chummy, friendly, confidence-inspiring line of talk and keep at it. In other words, just be a red-hot bicycle enthusiast day and night—and talk about it so that the boy can understand you.

Some cycle dealers have found that carrying side lines of moderate-priced sporting goods is a paying policy; they fit in with the bicycle and broaden the latter's scope. Tents, fishing tackle, mess kits, small cameras and all kinds of light camp paraphernalia have been handled to good effect. Anything that will suggest to the boy another means of applying a bicycle to recreation will be certain to exert some influence as a sales-breeder.

The Making of an Enthusiast

Under ordinary conditions the healthy boy should be considered a bicycle prospect at the age of eight. At that period he can best be reached through the schools. A little later the boys' club should also be considered in getting up a mailing list.

The local newspaper is always a good publicity proposition, and the curtain at the local moving picture house is a mighty good place to show an advertisement for the boys.

But in the name of common sense, don't be stiff, and formal, and dignified, and intricate—and fifty-seven other undesirable things—when aiming a sales talk at the boy. Loosen up and act as if selling bicycles was real fun. It is—if you go about it properly.

And when you have made a sale, don't tighten up on your service to the boy. Be a business pal to him. If his bicycle needs a minor adjustment see that it is fixed for him. He'll remember that. If an attempt is made to separate him from every quarter he gets—he'll remember that too.

Use present boy riders to interest others. Circulars can be distributed in this way for little or nothing. If there is a Boy Scout company in your town get one of the officers to give a talk at your store or elsewhere on the fun and healthfulness to be found in the bicycle. The Boy Scouts are boosters for the bicycle. The fact that they use a great many machines, by the way, is often an interesting argument to use with boys who are not Scouts. The military idea, the bicycle and youthful ambitions go well together.

As soon as a sufficient number of boys have been supplied with bicycles it is advisable to form a club. Clubs breed interest and foster good fellowship. Occasionally a wide-awake dealer can entertain the boys' bicycle club in some simple way—a picnic five or six miles out of town will score a hit. The boys will attract attention as they ride out, the newspapers will mention the program, games and contests can be arranged, everybody will be happy and the parents of the boys will feel that the dealer is not such a hide-bound, mercenary chap after all.

"If a Boy Patron's Bicycle Needs a Minor Adjustment See That It Is Fixed for Him."

Manufacturers Can Supply Literature

Bicycle manufacturers usually have special literature aimed at the boy. If you haven't received it, write for some. When it arrives, lose no time in getting it to the youngsters.

Perhaps you have been doing all these things, and the boys of your town are well taken care of; if so, you don't need this article. If you have not been devoting special attention to the boy, start today. He is your most promising patron.

No effort has been made in this article to outline specific methods of selling bicycles to boys. Every dealer will find numerous openings as soon as he buckles down, and besides, the sales situation is always somewhat affected by local conditions.

The chief aim—in fact, the only aim—of this talk with the men who stand between the bicycle factory and the buying public is to impress upon them the importance of the boy in the bicycle field; to show that he is almost invariably a good prospect and that once the boy's attention is properly attracted the bicycle practically sells itself.

It is worth while to keep in mind that, boost, business, bicycle and boy all begin with the same letter.

THE MOTORCYCLE SECTION

The motorcycle section of this number opens on page 56. It will be found as bright and breezy as usual although considerably compressed because of the special bicycle features in this issue.

HOT ON THE WINDING TRAIL OF NEW PROSPECTS

How Bill Evers Put in Five Months of Hustling and Got Results; Methods He Used to Obtain Live Prospects and Make the Most of Factory Literature

By FRANK HARDY

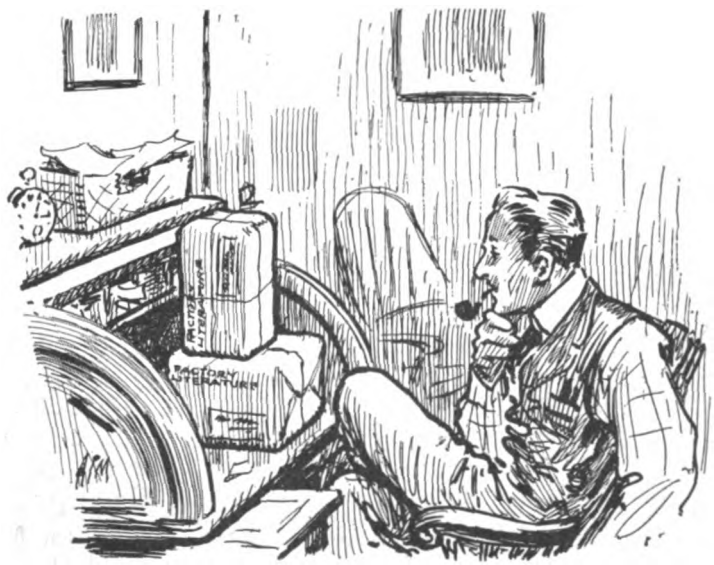
ABOUT five months ago when I entered young Bill Ever's fine bicycle store, I found the genial dealer gazing at two packages that the expressman had just brought in, with a perplexed look in his eyes.

"Watzamatter, Bill?" I asked.

"Matter enough!" he grumbled. "The factory just sent down that pile of catalogs and literature. I don't for the life of me know how I am going to distribute them so that I'll get better results this trip than I did the last time the factory people shipped a load of 'em down to me."

He Wasn't a Slouch

Billy wasn't a slouch. When the wheels in his head were revolving at full speed he usually found some pretty good solution for his problems.



Evers Gazed at the Packages of Factory Literature and Wondered How He Could Use it to Best Advantage

Well, that was five months ago. The other day I dropped in on Bill again, and, as the fellows say, he was "all smiles." He had solved the problem of working up a first class mailing list and getting active prospects. Here's what he told me about it:

The First Thing He Did

As everybody knows there are two classes of prospects: The fellow who wants a machine for pleasure and the man who desires a wheel largely for business purposes. There was one effective way in which I obtained the names of both classes of prospects. I sent out letters to my old customers in which I asked them to tell me confidentially the names and addresses of those among their friends who would be likely to buy a machine, provided they were approached in the right way. I made that letter quite personal and enclosed a post card so that they would not be put to any expense whatever in acceding to my request. Almost everyone of my customers mailed back the card, and I got to work at once with mighty good results.

I also made it a point to ask people who made purchases in my store the same question and the results were also gratifying.

Getting Youngsters' Names

But I realized that I hadn't arrived at the end of my rope yet. I wanted to get at the younger generation. The first thing that suggested itself was to pay a personal call at the various clubs and the Y. M. C. A. Upon second thought, however, I concluded that this would not be the wisest course to follow, for the persons in charge of the club and the Y. M. C. A. secretary might object to giving me access to their lists of members, because I wanted them for business purposes only. And then, it would be practically impossible for me to pick out from these lists the fellows who wanted a wheel, with the result that I might be circularizing a bunch of dead prospects.

I, therefore, decided to work through the members of the club, the Y. M. C. A., churches and schools. I have always been a friend of the boys—my store is open to them and they're welcome to come in and have a chat with me at any time—and found no difficulty in getting a number of them who belonged to various clubs, Y. M. C. A., etc., to do some scouting for me and secure the information I wanted.

Of course I didn't ask them to give me any of their time for nothing. I paid them on the basis of the number of prospects they obtained and where they were instrumental in making a sale I gave them additional accessories, the value of which depended upon the grade of bicycle sold.

Going after commercial prospects wasn't an easy job. It meant work—and hard work, too. I divided this class of prospects into several divisions: (1) The employee who wishes to ride to work. (2) The merchant who wants a bicycle for delivering orders. (3) Messenger boys. (4) Government employees, such as letter carriers, police and street cleaning inspectors. (5) Farmers. (6) Very large factories where the bicycle might be a time saver in making it easier to get from one point to another.

That's just a rough classification of commercial prospects, but it enabled me to work it systematically.

Interesting Factory Employees

First I tackled the men who were employed in factories on the outskirts of the city. I covered one factory a day, going out to the plant at the closing hour and distributing to the workers attractive folders in which I used an electro furnished by the manufacturer, showing a workman leisurely riding to the factory, and also called attention to the low price of the bicycle and the small cost of maintenance as compared with carfare. On the last page of the folder I invited the men to visit my store and see the machines, or send their name for a catalog. In some cases, when I was busy, I got boys to distribute these folders for me. The results of this little campaign were surprisingly good, and my business with factory employees is growing larger every day.

Perhaps the stiffest proposition I came up against was trying to convince merchants that the bicycle was an ideal vehicle for delivering rush orders. Once a storekeeper gets set in his ways, it's certainly a deuce of a job to lift him out of the rut. I made a store to store canvass. However, I didn't visit all the merchants on one block during the same day, but scattered my calls, checking each man's name on my list and making a short note on the prospects for selling an output.

Used His Demonstrator

On these visits I always rode round with a demonstrator. When I called on a man, it was an easy matter to persuade him to load the panniers with some of his goods. I would then ride a short distance so that he might see the facility with which the orders can be carried on a bicycle. I had to follow up these merchants rather consistently; but when I had once sold a number of outfits, other sales were made with less effort on my part.

Digitized by Google

In approaching the farmers, I soon found that they were scattered over such a wide territory that it was practically impossible to make many sales profitably. I therefore got out a special folder, describing the value of a bicycle on the farm. I called attention to the fact that errands to the town were frequently necessary when the teams were needed for other purposes; that the bicycle afforded an easy and ready means of going to town, and that pannier baskets could well carry any supplies which the farmer might want to buy in the city. I lined up more farmers than I thought I would, and sent them the factory literature and catalogs. That brought the farmers to my store on Saturday afternoons.

Where Trade Journals Helped

None of the messenger boys in this town were mounted on wheels; and from stories and pictures I saw in trade journals, I realized that the bicycle could give the right kind of service to the telegraph company. I made an appointment with one of the "big guns" of the local branch, and although I haven't sold him any machines yet, I've got him thinking bicycles—and also thinking the make of wheels that I handle. He has several of my catalogs.

Three of the letter carriers who collect mails are now using my make of machine. I secured their names from the postman who delivers the mail here. I have also gotten a number of street cleaning inspectors interested. These fellows are using up good shoe leather every day in the week, and they are logical prospects for the bicycle. To get their names I went to headquarters and the clerk, upon learning my errand, was real eager to help me out.

Making the Police Think

I haven't been able to accomplish much in connection with the police, for they have to make some radical changes in the department's organization to use bicycles. There never was a police bicycle squad in existence here, and it didn't dawn upon the authorities to use two-wheelers until I called the matter to their attention and told them how the New York police were using bicycles with great satisfaction. That set them thinking. I know that if they finally decided to use machines I'll have to bid against my competitors. But I'll quote an attractive figure, for I believe that my prestige locally will go up a couple of notches if I land a police order.

He Visited Storekeepers and Showed Them the Commercial Bike in Action

The Big Factories

There is just one other class of prospects that I have been trailing and circularizing quite regularly—the large factories. I learned recently that a number of big factories in New England were using bicycles to make it easier for their clerks to get from building to building.

I tackled the clock factory which is located just south of the city and spun my little yarn to the "super." He's a wide-awake fellow—a live wire from the ground up—and it didn't take him long to see the point. He ordered two machines from me, and promised that if they gave the service expected of them, he would give me a nice re-order. There are certain other large factories outside the city, and just as soon as I get that re-order I am going to use it as a sales argument and go after them good and hot.

Now, what I've told you is a summary of hustling I've been doing during the past five months. That box of factory literature started me thinking and I've certainly used it to good advantage—my profits show it.

BE FAIR TO THE BICYCLE

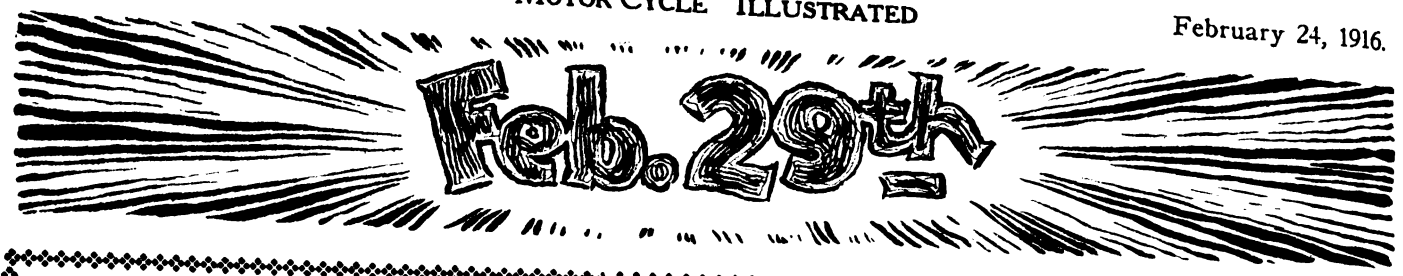
Don't sell a bicycle for service that you feel is going to break down the mount in a short time. Bicycles deliver light packages to perfection, for example, but they are not intended to carry heavy weights in addition to the rider. If a van is needed and the articles to be carried are weighty, sell your patron a motorcycle outfit. A great part of the problem of repopularizing bicycles will be solved when dealers educate their patrons to keep the bicycle in its proper place. The field of the bicycle is broad enough.

USE MORE SIGNS

Many dealers do not use signs in their show windows. It is not sufficient to show a few machines and accessories. A dealer should stimulate the desire to own a machine by some pertinent and cleverly worded sign.

Two Commercial Outfits Which Are Being Used Daily in New York City. At the Left Is Shown the Unique Way in Which a Shoe Merchant Advertises His Wares, While at the Right a Messenger Is About to Deliver Some Rush Orders Through the Busy Streets of the Metropolis; These Outfits Have Already Seen Much Service

Digitized by Google



THESE COLOR PAGES ARE FOR YOUR WINDOW, MR. DEALER

ON the opposite page, and on three of the pages following, appear striking photographs with appropriate text, so arranged that a cycle dealer can clip the pages neatly from the magazine and use them in connection with special Bicycle Day window displays. Don't fail to make use of them. They are eye-catchers and will help to brighten your window on Bicycle Day or any other day.

First read the interesting articles which appear on the reverse side of the special photo pages; you can't afford to miss any of them. Then cut the four color pages out of the magazine, preferably using a sharp knife and keeping as close as possible to the binding. Trim the pages so that the same margin of white appears all the way round.

Then you are ready to place the pictures in your show window. It will be noted that the first and second layouts are arranged to make a pair, as are also the third and fourth. Assuming that the first and second photos are placed towards the lower corners of the window, the decorative flying wheels should be turned inward and should be on a line. The two remaining photos can be used in the upper corners of the window in the same way.

BUT BE SURE TO USE THEM. Better fix 'em up right away. **Motor Cycle Illustrated** and **Bicycling World** has gone to considerable pains and expense to provide these striking pages—simply with a view of helping the dealer, so it is up to the dealer to do his part by displaying the pictures where he believes they will attract most attention. It will take only ten minutes to clip them out and arrange them in the window.

ALL HANDS KEYED UP FOR "BICYCLE DAY"

Secretary Olin's Office Is As Bustling As Fourteen Bee-Hives, Helpful Material Is Going to Dealers All Over the Country, and Co-operative Interest Reaches a Record Mark

BRISTOL, Conn., Feb. 23.—All is ready for Bicycle Day. It will be the biggest boom day the bicycle industry has ever experienced—the start of a campaign that is certain at least to double the demand for bicycles in this country.

The Saturday half holiday was forgotten in the office of Secretary C. F. Olin, of the Million Bicycles committee, and with the assistance of sixteen stenographers and as many mailing clerks the requests for special "bicycle boosting" electrotypes and reading notices, that have been pouring in from all sections of the country, were cleaned up.

Monday morning there was another big batch of similar correspondence to be handled. Many of the requests came from newspapers that will feature the pedal two-wheeler in special "Bicycle Day" issues next Sunday and Monday. All such applications for assistance were promptly complied with.

The mailing of the big eight-page "Million Bicycles Bulletin" also started Monday and before the end of the week this meaty publication will be in the hands of 15,000 dealers, several times as many clerks, and about 2,700 wholesale bicycle salesmen.

This bulletin has four pages of pointers that can be used in talking up bicycles to people who call at the stores on "Bicycle Day" and thereafter—not theories, but talking points that have been successfully used by the hundreds of men in the industry who participated in the selling talks contest just closed.

Such important matters as "cleaning house," the window display and newspaper advertising contests, road races, selling schemes, novel guessing contests, etc., etc., are also treated in this circular.

Contests Close March 10

It has been decided that all newspaper advertisements submitted for the cash prizes, and all photographs of window displays of bicycles in the prize contest, must be in the hands of the secretary of the committee by March 10.

Secretary Olin is most enthusiastic over the outlook for "Bicycle Day." For the first time, bicycle dealers in a score of cities have organized for holding bicycle shows on Bicycle Day and continuing the good work then started by billboard advertising, organizing clubs, giving races, arranging outings and doing other things to stimulate new interest in cycling.

The individual dealers are also very much in earnest and there will scarcely be a village, town or city in the prosperous sections of the United States that will not experience Bicycle Day in one may or another.

An important development is the use of moving picture theatres by dealers who find the screen a profitable place for advertising the pleasures and values of cycling to audiences aggregating hundreds of thousands daily. The committee did not have time or the money to get out special slides for this purpose, but several manufacturers are supplying them in large numbers. The same is true of window display suggestions and special signs, posters and literature.

"It is most gratifying," said Secretary Olin today, "to find that most of the dealers who are planning so elaborately for Bicycle Day are making this but the start of a season's campaign in which they will utilize every opportunity all through the year to do their share for 'a million bicycles in 1916.'"

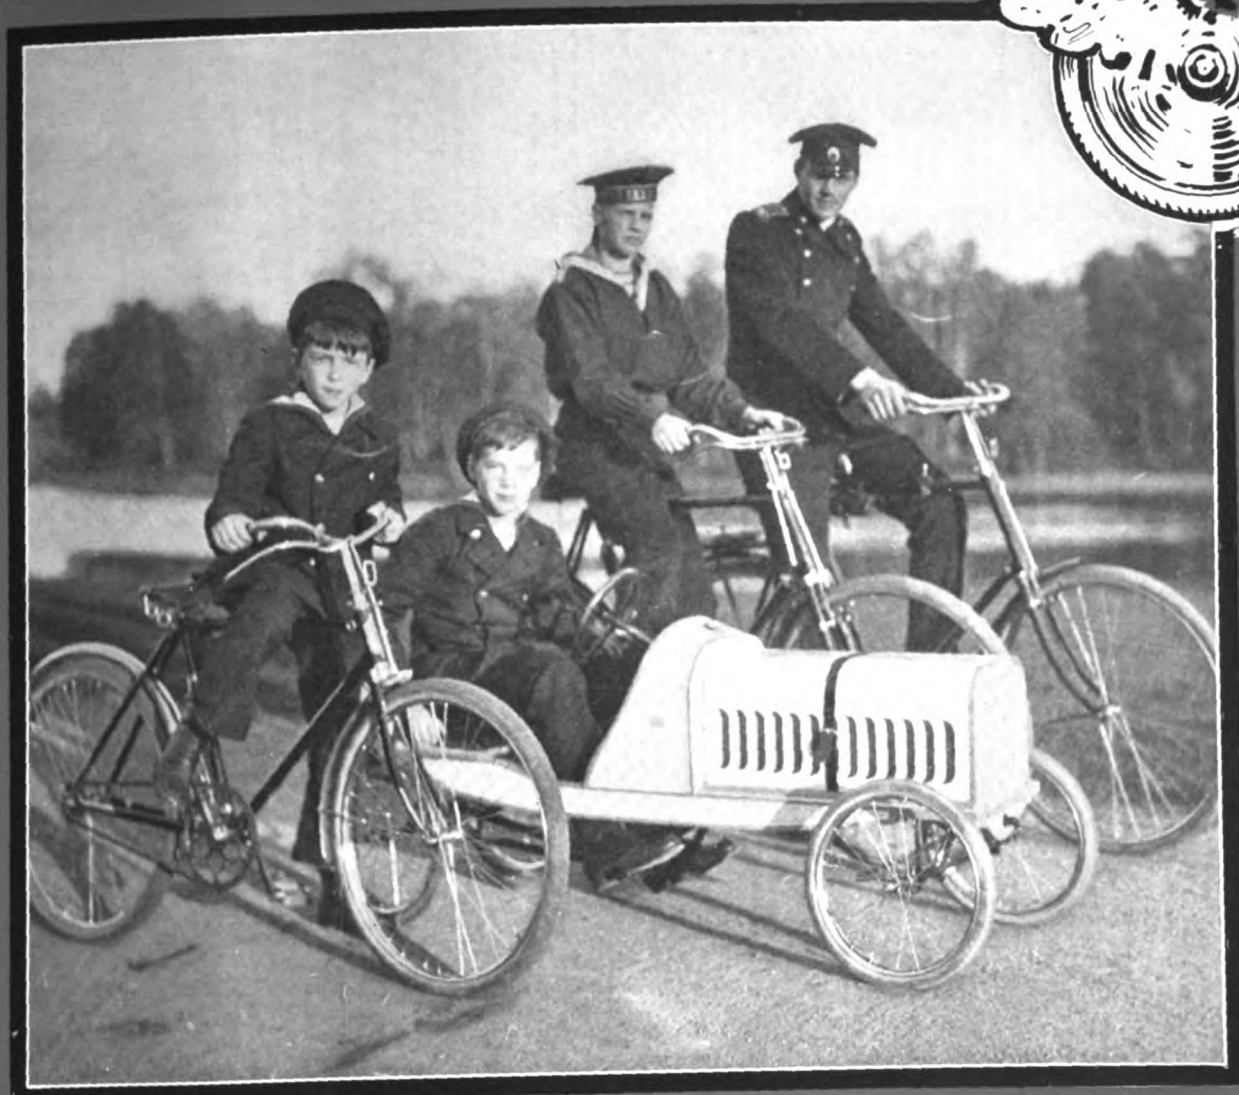
RUSSIAN PRINCES ARE KEEN BICYCLISTS



These royal lads—from left to right, Princes Vasili, Rostislav, Nikita, and Feodor Alexandrovitch, who were photographed at the Yelagine Palace, at Petrograd, the residence of Her Imperial Majesty the Empress Marie Feodorovna—can have absolutely anything that their hearts desire and THEY SPEND MOST OF THEIR TIME ON BICYCLES.

They find that the bicycle gives them more fun, more healthful exercise, more of the spirit of personal freedom, more all-round pleasant service than any other individual vehicle that money could buy. That's all.

HOW ABOUT THE LITTLE PRINCE IN YOUR HOUSEHOLD? We can supply him with a bicycle that is guaranteed to give him ROYAL SERVICE. Come in and let us tell you how and why. Now's the time.

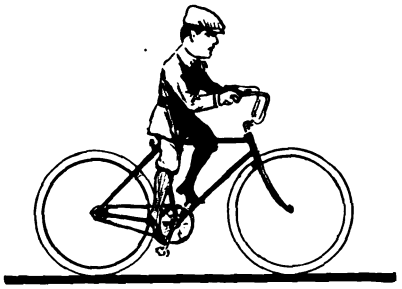
CREATING SATISFIED BICYCLE RIDERS

The Importance of Keeping Bicycles Sold and Turning Every New Rider Into a Booster; It's Up to the Salesman to Fit the Bicycle to the Individual Customer

By W. T. FARWELL, Jr.

WITH Bicycle Day just around the corner, as it were, the majority of the dealers have already replenished their stock to meet the wants of a new army of cyclists which is being created by the publicity campaign of the "One Million Bicycles Committee." The live dealer will be brightening up his store, dressing his window appropriately and investing money

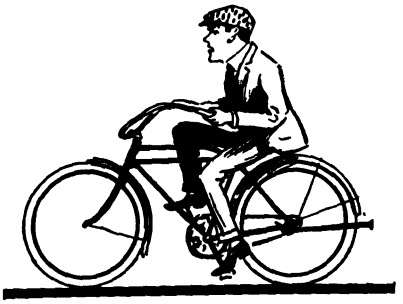


Too Big and Heavy for Small Boy

in local advertising. Much attention will be given to new selling ideas and convincing arguments—so much attention, perhaps, that the important consideration of how to keep bicycles sold may be sidetracked.

As Important as Making Sales

It goes without saying that to make satisfied bicycle riders is of equally vital importance as selling machines. Especially is this phase of the retail bicycle business deserving of serious thought at this time, when thousands of bicycles will be placed in the hands of those who have never mounted a machine before, but whose desire to ride a wheel has been stimulated



Saddle Too Low; Handle Bars Too High

by the widespread publicity which cycling is now enjoying.

These prospects will come to the dealer favorably disposed toward the bicycle. Not only to sell them a two-wheeler, but also to make every one of his new customers an out-and-out booster should be the chief aim of the bicycle salesman. The salesman should study the individual needs of each customer and carefully exercise his judgment in properly fitting the bicycle to the new rider.

His first week's riding will soon determine whether the beginner will be pleased with his machine, or whether he will join the ranks of the "knockers." If he finds that he cannot pedal up the merest pimple of a hill without great effort; if his position feels cramped or uncomfortable, his enthusiasm may disappear entirely and he may give up cycling with disgust.

The Way of the Novice

The novice will not stop to think that the particular machine sold to him was not suited to his needs. He may have been given an 84 gear, when a 74 gear would have made pedaling easier. Perhaps the saddle was too low in imitation of the motorcycle position, so that his legs were doubled up and he could not pedal freely, while his handle bars may have been so high that his hands were up near his chest. Instead of criticizing his particular machine, the beginner will immediately condemn all bicycles and quit the sport forever.

It lies within the power of the salesman to make a satisfied customer. Had he suggested to the novice that a lighter machine would be more suitable in that it afforded easier running, and had he raised the saddle so that the rider rested comfortably with the knees slightly bent and the ball of the foot bearing on the pedal at the lowest point, and had the handle bars been lowered so that the arms were nearly straight, with the hands resting naturally on the grips, much would have been accomplished toward fitting the rider correctly.

Giving the Beginner the Right Start

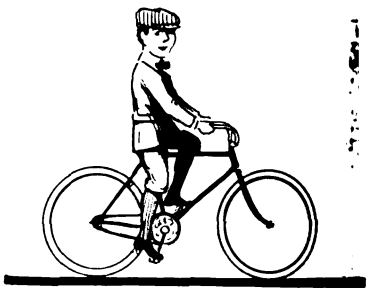
If the salesman had done that, and in addition had defined the meaning of gearing, pointing out that the high gear entails a great expenditure of energy, while the medium gear takes the hard work out of pedaling, giving less speed, of course, though greater comfort, then the novice would have received the right start. His enthusiasm would have increased and he would probably have brought more new riders to his friend the dealer.

The growing boy and the active youth, it seems safe to say, are the biggest factors in the retail field, and the importance not alone of winning over the young people, but also starting them out right cannot be overestimated.

Too many boys are riding bicycles much too large for them. They stretch and seesaw across the saddle in their efforts to reach and keep their feet on the pedals. This condition, combined with a high gear and heavy equipment, not only makes riding hard, but may also result in disastrous injury. Sometimes, of course, these cases of "misfit" cycling are the fault of the boys, who want a regular "man's size" bicycle, while often the parents believe that it is good economy to buy a larger wheel, believing that "the boy will grow into it in a very short while." But whenever the dealer can prevent the sale of a "misfit" machine, and sell the boy a bicycle that suits his requirements best, he certainly ought to do so.

Using a Bit of Diplomacy

The growing sales of ladies' models is sufficient evidence that the members of the fair sex are again looking with favor upon the simple two-wheeler. Here also great care should be taken to furnish machines



Just Right; Easy and Comfortable

that are suited to the individual customer.

Of course, there are many classes of customers. Some of them seem to know exactly what they want; others think they do, but don't, and there are also those who are willing to be shown. But the wise dealers will study each case and use a great deal of diplomacy in making the kind of riders from whom there will be no comebacks.

Overlook Mechanical Side

The bicycle strikes most people as being such a simple vehicle that they pay little attention to it as a mechanical proposition. The novice will naturally be influenced in his selection of a bicycle by the color of

Good Position for Easy Pedaling

the finish, fancy tire treads, some unimportant accessory. Quality of material and the design of such important parts as the bearings, chain, etc., and the size of the gear come in for little consideration by the novice, so that it is up to the dealer to give each customer some "rock-bottom dope"—the kind that will sell the better grade of machine and make permanently satisfied bicycle riders.

REMINGTON ARMS COMPANY ADOPTS BICYCLE

Twenty-eight Machines in Use at Monster Bridgeport Plant; Give Effective Service in Carrying Messengers Through the Huge Buildings; Called "Satisfactory Solution of Vital Problem"

THE bicycle is used commercially where the light of publicity seldom penetrates. The more one learns of the many uses to which not only merchants, collectors, etc., but also large industrial enterprises place the sturdy two-wheelers, the stronger becomes the conviction that the scope of the bicycle ,as a commercial proposition, is an ever-increasing one.

Wherever quick and economical transportation of a light character is desired the bicycle usually fits in well. And the possibility of sales for commercial purposes are only limited by a dealer's ingenuity in ferreting out the prospect whose business is so situated that the use of bicycles would save energy, time, money and trouble.

One instance where the bicycle has been found to be a most helpful vehicle is that of the Remington Arms and Ammunition Company, of Bridgeport, Conn. Most readers have seen in the newspapers reports of the marvelous growth of the Remington Company since the outbreak of the European war. Huge plants were rapidly erected in Bridgeport to take care of the large war orders that had been secured by this company. Coincident with this unprecedented growth sprang up new and complex problems which demanded an immediate and carefully thought out solution. One of these problems was that of inside transportation.

This Remington Arms Bicycle Messenger is Riding Through a Corridor of the Bridgeport Plant to Deliver a Package From One Office in the Monster Factory to Another

Huge Size of Bridgeport Plant

The Remington Arms Company buildings are so designed that they lend themselves admirably to bicycle traffic. The main units of the works comprise 13 five-story buildings, 274 feet long by 62 feet wide. These are connected at right angles through the center, at each story, by a service building, so that communication from one structure to another is rendered easier. The corridors through these thirteen main units and service buildings are each one-half mile long. To inspect the various shops in these structures would entail a walk of ten miles, exclusive of the stairways. From this it is comparatively easy to infer that the matter of rapid transportation between points must be of vital importance.

The difficulty has been solved by the adoption of bicycles, electric and hand trucks and roller skates.

Walking along one of the great corridors, the warning jingle of a bell is heard and one turns to see a uniformed messenger speeding on a wheel, bound for perhaps a dozen points which may take miles to cover.

How Bicycle Messengers Work

A boy on the ground floor of building "A" is given a note to deliver on the top floor of building "M." He takes his bicycle on an elevator to the fifth story, mounts it and is off on a run of 2,000 feet. If not detained by the party to whom the note is addressed, he can deliver his answer to the person sending it, within seven minutes from the time he began his journey. Had he depended upon his legs entirely, the same trip would have taken him at least 25 minutes.

The bicycles are of ordinary type costing about $30.00 apiece, and 28 are in service. They are stationed at the ends and center of each of the corridors.

Occasionally a boy is allowed to take a bicycle outside the buildings to accomplish an errand, but these circumstances do not often occur. It is also a rare occurrence that a bicycle gets out of order. There are so few obstructions to invite accident, and as high speeding and coasting are out of the question, the life of a wheel at the Remington plant should be a prolonged one.

SIMPLICITY, ECONOMY, GOOD ADVERTISING

These bicycle delivery vans were snapped in New York City, where there are hundreds of others similar to them. They are run almost the year round, carry quite heavy loads and do amazing stunts in heavy traffic.

Needless to state, they permit of remarkable economy. With them it is possible to deliver packages for which it would be wasteful to use a heavier vehicle, and the merchant consequently builds up a reputation for good service. Service, in turn, means more sales.

Note the crowd that gathered as soon as the bicycle van stopped at the curb to make a delivery. Good advertising, eh? The merchant who uses such an outfit and has his name on it is getting double returns every day of the year.

We can give you some interesting figures on van service.

TO
COLONEL ALBERT A. POPE,
of Boston, Massachusetts,
whose liberal spirit of enterprise and generous confidence in the integrity and ability of the author made the tour
AROUND THE WORLD ON A BICYCLE
possible, by unstinted financial patronage, is this volume respectfully dedicated.

THE editor's suggestion that I might contribute to this number of **Motorcycle Illustrated** some reminiscences of early bicycle touring starts a flood of pleasant memories, which have been more or less dormant for several years. It takes one quite far back from this modern era of speed and power to less strenuous and more comfortable days, when time and distance were not as sharply defined as they have now become; and the spirit of comradeship among users of the road was more in evidence. But it is impossible to be comprehensive in these fugitive reminiscences, as to do so would not only exceed the allotted limits but require more research for names, dates and exact circumstances than can be given at short notice.

Arousing Interest in Cycling

At the beginning it was necessary to stimulate the growth of bicycling by road exploits or "stunts," exactly as the earliest makers of automobiles did on a larger and more expensive scale with their endurance runs and road races. The first notable attempt in that direction, and one which stands very much alone today, was the trip made around the ridable part of the world by Thomas Stevens in 1884, '85 and '86. It was the only successful effort to encircle the globe on the "good old ordinary"; and likewise the only subject (except the Pennell trips) referred to in these paragraphs with which the writer was not personally familiar at the time. It happened a few years too soon for that, and is now remembered only by the few remaining contemporaries of Col. Albert A. Pope, "Papa" Weston, "Happy Days" Pitman, "Karl Kron," A. T. Lane and E. C. Hodges, all of whom have since gone to their final rest.

Route Stevens Followed

Stevens left San Francisco on April 22, 1884, riding across the continent over approximately what is now known as the "Lincoln Highway," or Overland Trail, through Sacramento, across the Sierra Nevada Mountains, the Rockies and the broad plains of the central West to Chicago. He then continued through South Bend, Toledo, Cleveland, Erie, Buffalo, Syracuse, Albany, Pittsfield, Springfield and Worcester to Boston, instead of finishing at New York City, like most of the eastbound transcontinentalists of today. Boston, which he reached on August 4, was then not only the principal center of the bicycle industry but the residence of Col. Albert A. Pope, its most commanding personality for a number of years. In the "preface" to his book Stevens gives Col. Pope the following generous credit, showing that the pioneer Boston manufacturer assisted in financing the trip, even if he did not meet the total expense:

Quite a stir was caused by the safe ending of that really remarkable trip, especially as the young traveller had made himself personally very popular; and the people of the "Hub" gave him a memorable welcome. The publication in *Outing* of Stevens' articles, which were written in a style which

FRANK G. LENZ
He Started on a World Tour in 1892, Using a "Safety" Bicycle

makes them interesting even today, added to his reputation and encouraged him to extend the trip around the world, arrangements for which were soon made. Starting from Liverpool on May 2, 1885, Stevens crossed Europe and a considerable part of Asia that year, reaching Teheran, Persia, on September 29. Leaving there on March 10, 1886, he rode through Persia, Afghanistan, India, the Straits Settlements, China and Japan, reaching Yokohama on December 17, after having made the trip in parts of three different riding seasons. By taking steamer from Yokohama to San Francisco he completed the world's circuit.

There was sufficient newness, adventure and romance about this trip of fully 13,500 miles to give it unprecedented publicity; and it came at just the right time to increase greatly the interest in cycling. Meanwhile the young industry was becoming well established, cycle trips grew in popularity, and hundreds of newspapers started bicycle columns. Tours were made to a greater extent than is generally understood today—all without more than here and there a stretch of really good road, without maps or guide books, but with quite frequent reports of trips in the *Bicycling World* and other publications, which were read very carefully for such items. Of course this was not all due to Stevens' remarkable world tour, but it was at least a timely factor.

Interesting Trip by Lenz

A trip somewhat similar to that of Stevens', attempted in the early summer of 1892 by Frank G. Lenz, of Pittsburgh, Pa., attracted about as much attention. It was made on a "safety" bicycle ("Victor" with spring frame), and from east to west, instead of in the direction Stevens rode on the high wheel. A few years ago the *Bicycling World* published a detailed story of the Lenz trip, which many readers of **Motor Cycle Illustrated** will remember. It is sufficient for our present purpose to recall that after wheeling from Pittsburgh to Washington and New York, thence across the northern route through Chicago, St. Paul, Minneapolis, Fargo, Bismarck and Spokane to Seattle, Lenz continued down the Pacific coast through Portland and Medford, Oregon, to Sacramento and San Francisco, where he sailed for the Orient.

Lenz Rode Low Wheel

In a general way it may be said that he reversed Stevens' route through Japan, China, the Straits Settlements, India, Afghanistan and Persia to Asia Minor, but was undoubtedly murdered there in the spring of 1894. Lenz was better equipped for his trip than Stevens, because he had a low wheel and pneumatic tires. He also carried a camera, which might have caused suspicions on the part of the lawless tribes in Asia Minor and no doubt indirectly contributed to his tragic end.

Of course the trips of Stevens and Lenz were big, personal undertakings, but indirectly affiliated with the bicycle trade. There were a few other attempts, and the very successful one of Allen and Sachtleben; the latter, so far as generally known, was an amateur affair, without special trade influence or publicity, though like Stevens, they published a complete record of their world tour. Lenz was an expert photographer, but an inexperienced writer; "his" story was principally thrown together at the *Outing* office from such crude notes as he sent in; and probably for that reason,

BOY'S NATURAL VEHICLE IS THE BICYCLE

The young sportsman shown above, who was photographed at Palm Beach, gave up a pony and cart to ride his bicycle. Couldn't exactly explain why. Just liked his bicycle better than anything else; that's all. And he's as healthy, happy and ruddy as they make 'em.

His daddy, who plays polo, drives an 80 h. p. car and semi-occasionally pilots a monoplane, was well satisfied with the boy's decision. "No matter what he elects to do in later life," he said, "he will be more capable for having spent much of his boyhood on a bicycle."

It will be noted that this bicycle is well adapted in size and weight to the lad's requirements, a very important point. We guarantee satisfaction in that and all other directions. No matter what your boy's requirements, or your own, may be we can fill them perfectly. The new models are here; walk in and inspect them.

We have a bicycle to fit every need and every purse.

Start of the First 'Round the World Bicycle Tour, Thomas Stevens Leaving the Riders Who Accompanied Him a Distance from the Pacific Coast in the Spring of 1884. Reproduced from Scribner's

(Continued from page 30)

as well as the fact that the trip was never completed, no permanent record of it was ever published.

One of the most interesting developments of the early days were the number of bicycle tours abroad. Unfortunately no means were ever taken to gather statistics as to how many cyclists went to Europe, say, from 1890 to 1897; but it must have been very large—probably as many as there ever were of automobilists before the present war started. Those trips were especially popular among college professors, school teachers and clergymen; and probably few local papers of that era were long without news notes or contributed articles from members of the families of some readers who were on the other side of the Atlantic. One thing in favor of bicycle trips abroad was the low cost at which they could be made—no gasoline or oil were required, uniformly good roads, reducing tire wear to the minimum, and almost everywhere unpretentious but comfortable inns catering to the wheelmen with the same zest that most of them do to the motorist of today, and at a rate which few of them would think of offering now.

Worden's Unique Trip

Of course there were extremes then as today. Well do I remember J. Perry Worden, then in or just graduated from college, who made the trip abroad just as cheaply as possible, carrying and cooking his own food along the route. As I recall it now, he brought the expenses down to about what it would cost to live in a modest furnished room in a large city and dine very moderately at "Childs" or some equivalent. Cheaper still was the New York-Chicago ride of "Dead Broke" Wylie, a Chicago newspaper man who, on a wager, I believe, made that trip on a time limit, earning en route every cent he was obliged to spend. These two exploits were exceptional enough to attract passing attention; but the great majority of cycle tourists asked for the best, got it at a reasonable rate and seldom appeared to covet any publicity.

Wheelmen were distinctly the pioneer good roads workers, but received less rewards than is usual for pioneers, except that in later years many of them became automobilists and shared in the benefits of the fairly recent road improvement era. One reason why foreign tours were so popular was the poor condition of American roads in those days, when pushing one's mount uphill was often a back-straining and breath-testing reality.

Tours Well Organized

European bicycle tours from the United States were also well organized at one time, and probably a number of readers will remember the several annual tours conducted by F. A. Elwell, of Portland, Maine. Begun in a small way at first, the "Elwell tours" became very popular, and letters from the veteran conductor, who was as fine and pleasant a man as you might meet in a month of Sundays, frequently appeared in the *Bicycling World* of that time. He died several years ago. There were also a number of successful parties organized privately in different cities, one I particularly recall being under the leadership of E. B. Porter, then cashier of the Indiana National Bank, Indianapolis, and later, I believe, interested in the bicycle business of that city.

Trip to British Isles

One of the many professional men who enjoyed pleasant bicycle trips abroad was Reuben Gold Thwaites, then secretary of the Wisconsin Historical Society and already an author of some note, who in 1891 spent six weeks in the British Isles, visiting the most interesting and historic places. As a result A. C. McClurg & Co., Chicago, published in 1892 one of the most interesting and delightful sketches of travel imaginable by him under the title of "Our Cycling Tour in England." Sometimes as an offset to the strain of modern days I get out some of my old cycling literature and always enjoy a chapter from this book. Mr. Thwaites, now deceased, was another of the oldtime bicyclists whose name is somewhat familiar to the present generation, but as a historian and educator rather than as a bicyclist.

It is passing strange that automobiling has never produced anything like "Our Cycling Tour in England"—possibly because the motorist does not need to "walk" his machine up the hill, as Mr. Thwaites did on the way from Bath to Glastonbury, incidentally giving his readers, as a result of that climb, one of the best pieces of description in the book.

Interesting Odds and Ends

Though quite out of their chronological order here, two other noteworthy publications deserve mention as factors in the development of touring—or at least helped arouse the interest which greatly assisted it. One was the tricycle tour from London to Canterbury, England, made in 1884 by Joseph and Elizabeth Robbins Pennell, who for a full generation have been writing and drawing in their delightful way, producing hundreds of magazine articles and a goodly list of books. Their three days' trip came out as the "Canterbury Pilgrimage," published in this country by *Scribners* in 1885. It was semi-descriptive, and has some interesting incidents, such as the driver of a donkey trying to get up a race with the Pennell's tricycle.

That type of touring story has long since gone out of fashion, for who among automobilists or motorcyclists would today be willing to spend three days on the road from London to Canterbury; and where is the driver of a donkey who would now challenge the power-driven two-wheeler or four-wheeler to a contest of speed? "The Canterbury Pilgrimage" was, in fact, only one of the cycling publications of the Pennells, others being "Our Sentimental Journey," "Two Pilgrims' Progress" and "Over the Alps on a Bicycle," the four tracing, picturing and describing a tour by cycle and tricycle from London to Naples, between the years 1884 and 1897—certainly a very deliberate way to plan and carry out a tour! Nothing like that series has ever been approached in the literature of motoring, and there is little likelihood that it ever will be.

Karl Kron Stories

One of the most interesting characters in tricycle touring was "Karl Kron," a prolific contributor to *Outing*, the *Bicycling World* and other publications for several years. He was one of the real pioneers and used the "good old ordinary," I believe, to the end, always looking down, in a literal as well as in a figurative sense, upon those who forsook it for the later "safety" types. He seemed to go everywhere, and his stories were always read with the greatest of interest by a large number of us slightly younger ones.

FORMING A BICYCLE BOY SCOUT COMPANY

Any Dealer Can Organize a Company in His Town and Become Affiliated with the U. S. Boy Scouts; Uniforms Furnished for $3.50; Steps to Take in Starting a Company

By ANDREW N. SEGAL

Formerly Capt. National Bicycle Scouts of America

WITH the spirit of military preparedness sweeping the country as it never has before, keener interest is being taken in movements having for their object the strengthening of our defenses against any possible enemy, and among these movements the organization of the boy scouts stands out prominently. In connection with companies of boy scouts, bicycle units are now being formed in many sections of the country, and the officials of the United States Boy Scouts are eager to increase these bicycle units, and especially to see formed new squads or companies consisting entirely of bicycle boy scouts. This offers a very attractive opportunity for the live dealer.

Headquarters of Boy Scouts

Any dealer, provided he is over twenty-one years of age, is eligible to organize a squad or company of bicycle boy scouts and affiliate with the national body, known as the United States Boy Scouts. When the dealer has secured eight or more boys, ranging in age from thirteen to eighteen years, he has but to write to the Adjutant General, U. S. Boy Scouts, at 33 Maiden Lane, New York City, and he will receive a muster roll, oath of office and the necessary number of application blanks.

Getting a Commission

The boys will be required to fill out the application blanks and have them endorsed by their parents or guardians. The scoutmaster—the active organizer of the squad or company, who need not necessarily be the dealer, but someone perhaps selected by him—will be required to fill out the oath of office and have it acknowledged by a notary public. When the oath of office is returned to the Adjutant General, a commission will then be issued, giving him a proper military rank.

There are forty members to each company, which is made up as follows; seven privates and one corporal constitute a squad; two squads and a sergeant constitute a platoon, while four squads make a company. There are then thirty-two privates, four corporals, two sergeants, one first sergeant, in addition to a second lieutenant, first lieutenant and captain, besides the company bugler and guidon bearer.

Drilling the Scouts

The best results can, of course, be obtained in drilling the bicycle scouts when an ex-army or militia man acts as the drill master. It is advisable that he first teach the boys the infantry movements before attempting to put them through the mounted movements, the latter being more difficult.

From his experience as captain of a bicycle scout company the writer has learned that the boys will become more readily proficient if they are first taught the school of the soldier, secondly the school of the squad, and then the school of the company.

Manual of Drills Simple

The manual of drills, which is given out by the U. S. Boy Scout headquarters, is based on the standard United States Army drill regulations of 1911, and is written in such simple language that any boy of average intelligence can readily understand it and obtain a working knowledge of military manoeuvering, signalling and camping.

While it is not at all necessary to have the boys uniformed for the "muster-in," it certainly is desirable to have this done as soon as possible, for the boys take greater interest in their work when dressed in the regulation uniform. For $3.50, the Quartermaster's Department of the U. S. Boy Scouts, at the New York office, will furnish a complete uniform for each scout, consisting of a coat, breeches, leggings and haversack, all made of strong, serviceable khaki. The quartermaster will gladly furnish information on how to take accurate measurements for the uniforms.

Dealer Is Logical Organizer

Formerly the bicycle scouts had a separate organization, but realizing that the movement would meet with greater success if they affiliated with the U. S. Boy Scouts, they joined the latter body. Since the consolidation rapid progress has been reported in cities scattered all over the country. But the movement is only in its infancy. Much still remains to be done, and the bicycle dealer is the logical person to organize a company of scouts in his city. In that way he can create a strong following of riders, and get new prospects whose parents will undoubtedly be impressed by the many benefits their boys will receive in joining the bicycle scouts.

NEWSPAPER RUNS BIKE COLUMN

BUFFALO, N. Y., Feb. 21.—Beginning with Bicycle Day the *Buffalo Evening Times* will run each week a column of bicycle news similar to its column of automobile news. This co-operation is being extended to dealers and manufacturers in return for advertising which they promised to insert from time to time.

Detachment of German Boy Scouts in Front of the Governor's Palace in Carlsruhe

THE VALUE OF THE CLUB TO THE DEALER

How Much Favorable Publicity Can Be Secured by the Dealer Who Organizes a Club—Returns in Sales Which a Live-Wire Club Yields to the Progressive Merchant

Club Team Entered by Indianapolis Dealer in Local Events

SALES usually thrive on the amount of favorable attention which is attracted to a dealer's store. One of the strongest magnets for drawing the crowd to the bicycle dealer's establishment is the club.

Returns from Clubs

Upon first thought the dealer might be lead to believe that a club will entail a lot of expense and time on his part, without giving anything like proportionate returns. But the experience of live bicycle merchants who have formed organizations of young riders shows that clubs not only yield returns, but also furnish a great deal of wholesome fun and recreation for the dealer himself.

There are two distinct phases of club activities which will bring new riders into the ranks. One is the intense and interesting competition which is possible only among groups of well organized riders, and the other consists of the social events promoted by a club.

Perhaps no better wedge for entering in the columns of the local newspapers can be placed in the hands of a dealer than the races and runs which are launched by the organization he fosters. These events furnish splendid material for the reporters to work on and the items appearing in the newspapers will get the public interested in cycling and bring out a large crowd to witness the meets.

Big Crowd at Races

In the crowd that will see the riders match their skill and strength against one another, will be lots of youngsters who will realize how much healthy sport they are missing. These boys are the very prospects whom the dealer should cultivate; and by distributing hand bills at the races he can invite them to come to his store, examine the new models and meet the club boys.

When the club goes on a run, the large body of cyclists pedaling along the streets of the town and over country roads presents a forcible argument in favor of the bicycle.

The social side of bicycle club life not only appeals strongly to the boy but also to his parents. By joining the club he is brought in contact with a desirable group of red-blooded fellows who are developing the best that is in them.

Launching Membership Campaigns

Membership campaigns launched by the club, for which inexpensive prizes may be hung up, will get the fellows to scout around for those of their friends who ride but are not affiliated with any organization and also the non-riders who are anxious to learn to handle a machine and enjoy the sport which membership in the club makes possible. The latter rider will need a machine and the dealer who promotes the club will be the logical person from whom to buy a wheel.

The dealer with a strong club following is bound to get results, for the active riders will naturally purchase their sundries and accessories from him. His store will be attracting attention because of the publicity it is receiving and will become the center for many of the wide-awake young cyclists in his town as well as the grown-ups.

The expenses of a club are never large and can readily be defrayed by nominal dues and initiation fees which all of the riders can readily afford. Practically the only obligation which the dealer is looked upon to discharge toward the club is to offer his store as a meeting place and to give one or two prizes for the race meets and runs which the club promotes.

Line-up of Cleveland Club Riders Before Start of Road Race Which Was Well Supported by Local Dealers

National Bicycle

Every dealer in bicycles in America should keep one day firmly in mind—Feb. 29th.

That is the day on which you can prove to yourselves conclusively, that 1,000,000 new bicycles can be sold in 1916.

That is the day in which you are asked to join with the entire bicycle industry, regardless of personal interest, and present to the American puclic the merits of the bicycle.

The manufacturers of bicycles, the manufacturers of bicycle parts and the manufacturers of bicycle accessories have united in one movement—to present to the bicycle dealers definite plans to increase their bike sales and therefore increase their profits.

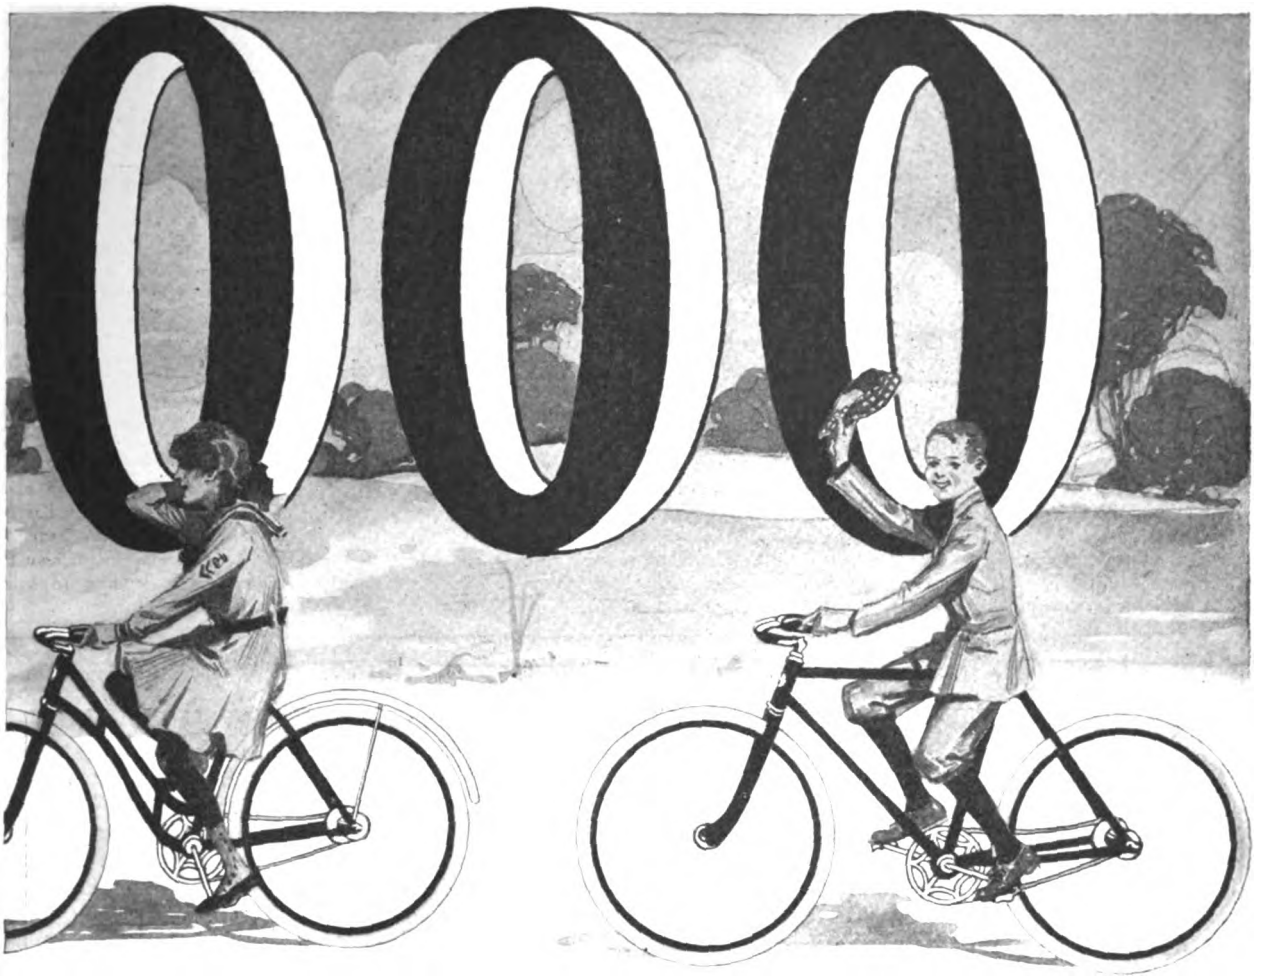
These plans will be sent to you shortly or announced in this paper. When you get these plans read them.

But a plan alone won't increase bike sales—it takes action of a very definite sort on your part.

Urge rival dealers to join with you in making Bicycle Day a success. Urge your home newspapers to give bicycle publicity. Show them that it is to the advantage of everyone to promote the best interests of the bicycle.

GOODYEAR
AKRON

Digitized by Google



Day, Feb. 29th

See that your store is as clean as a whistle—windows washed and neatly trimmed, counters in order, stock in good shape.

Send out a bicycle letter to your customers. Tell them about Bicycle Day. Ask them to call and see the new wheels. If you want us to write these letters for you, simply write us for our Letter Service.

Nothing succeeds like success. Make the bicycle a live proposition in your neighborhood by being alive to its possibilities.

Do you see now what effect this will have on the prospective bike purchaser? Do you see how thousands of dealers, plus the newspapers, plus the advertising of Bicycle Day, can exert a very decided influence for increased bicycle sales?

This concerted action is all that is needed to put the bicycle back where it belongs in popularity.

There are 1,000,000 new bicycle purchasers waiting for the proper salesmen. Be sure that you are one of them on Feb. 29th.

The Goodyear Tire & Rubber Company, Akron, Ohio.

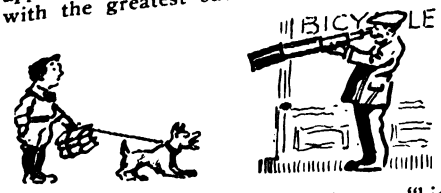
APPEALING TO THE BOY

Because the bicycle makes such a strong appeal to the boy, the dealer who will meet with the greatest success is the one who



studies the boy and tries to act as a "big brother." Youngsters have to be treated with a great deal of patience, and the knack of making a hit with them can only be acquired with conscious effort.

EXPLAIN THE IMPROVEMENTS

Mention the bicycle to some uninformed persons and you suggest toilsome pedaling on hills and more work than recreation. Part of the dealer's educational campaign therefore should be devoted to explaining how modern bicycle improvements have taken the trouble out of hills. Tell the prospect that hill-climbing is almost entirely a matter of gearing, and convince him that you can supply him with a mount capable of climbing all ordinary grades with a moderate expenditure of energy.

RIGHT TO THE POINT

It isn't so much what we do as what we don't do that loses the order.

Being on the job has been the secret of more than one big success in business.

It isn't the size of the plate glass front, but the use you make of it that counts.

NOW'S THE TIME

Do your work now. Make your efforts and your sales today. It is not tomorrow that is going to make you big, strong and successful financially. It is what you do today. Today is all you have. Tomorrow may never get here. Don't fumble; don't miss; don't postpone—but do it now.

AVOID UNPLEASANT CONTRASTS

Avoid having mud-covered or battered bicycles standing about your salesroom. The best of machines will in time become a little the worse for wear, and when they do it is poor policy to leave them in the salesroom where they are bound to detract from the good impression created by the new models. When an old machine comes in for repairs, or for any other reason, it should be hustled back to the repair shop. When the cycle is in good trim again there is no objection to relieving repair-shop congestion by placing it in the salesroom until called for, but it should be in the rear and not mixed in with the new machines.

THE ROOT OF EVIL

"Love of knocking is the root of much evil." The man who knows the art of selling does not run down the wares of his competitors. He devotes his time and

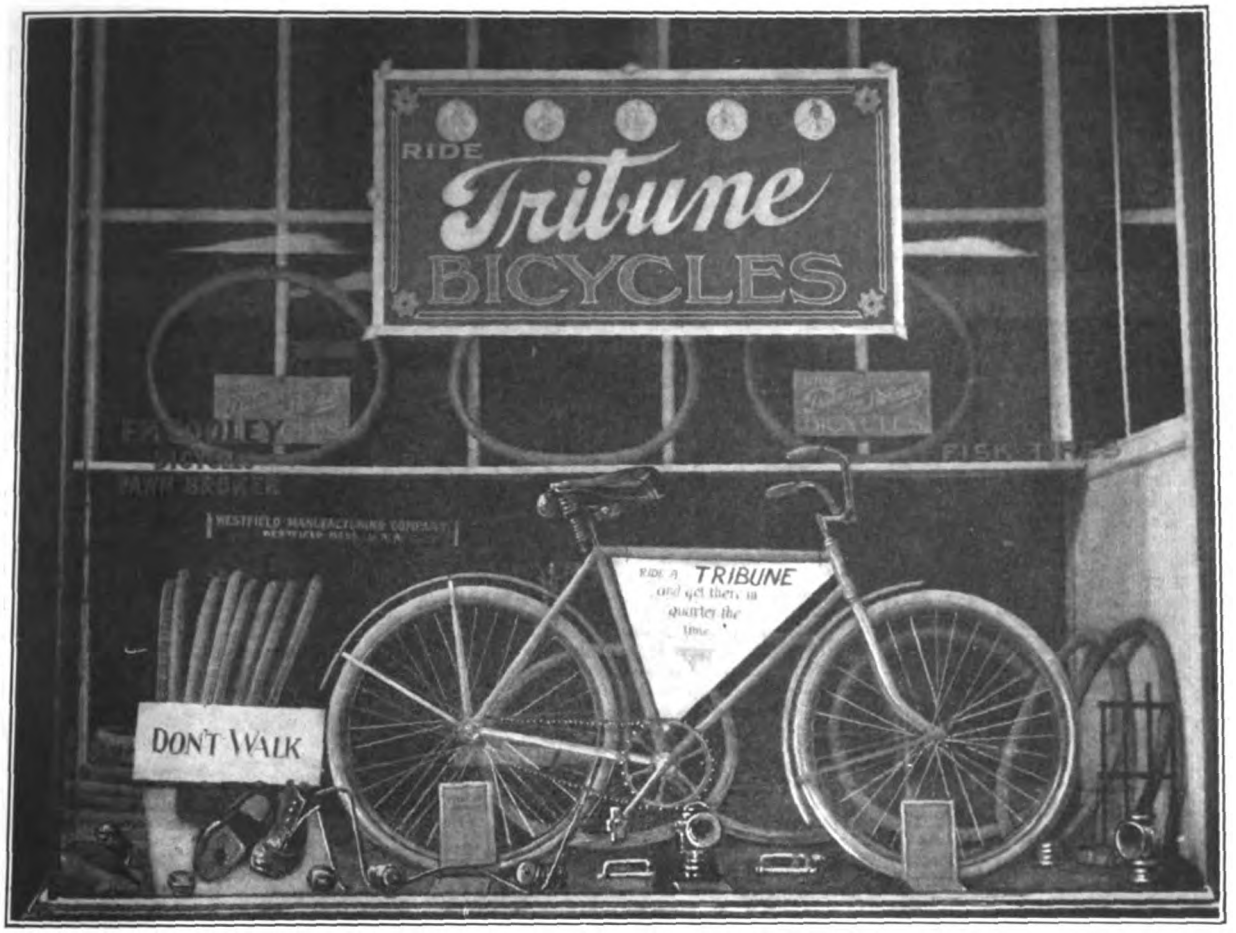
energy to a convincing exposition of the merit of the machines that he handles; and the results of that kind of salesmanship will be more productive of success than limitless conversation tending to belittle the product of a competitor.

"WHEN SUMMER CALLS THE BICYCLE BRINGS THE COUNTRY NEARER"

Here is a simple window display gotten up by the Westfield Mfg. Co., makers of the Pope line of two-wheelers, which can be reproduced at a very small expense. The 14 yards of green cambric which was used for decorating cost $1.12; the two hand-lettered signs are home made and were painted on cardboard that cost 5c. per sheet. The two printed signs were supplied by the factory. The rest of the material shown in the window was taken from the dealer's stock.

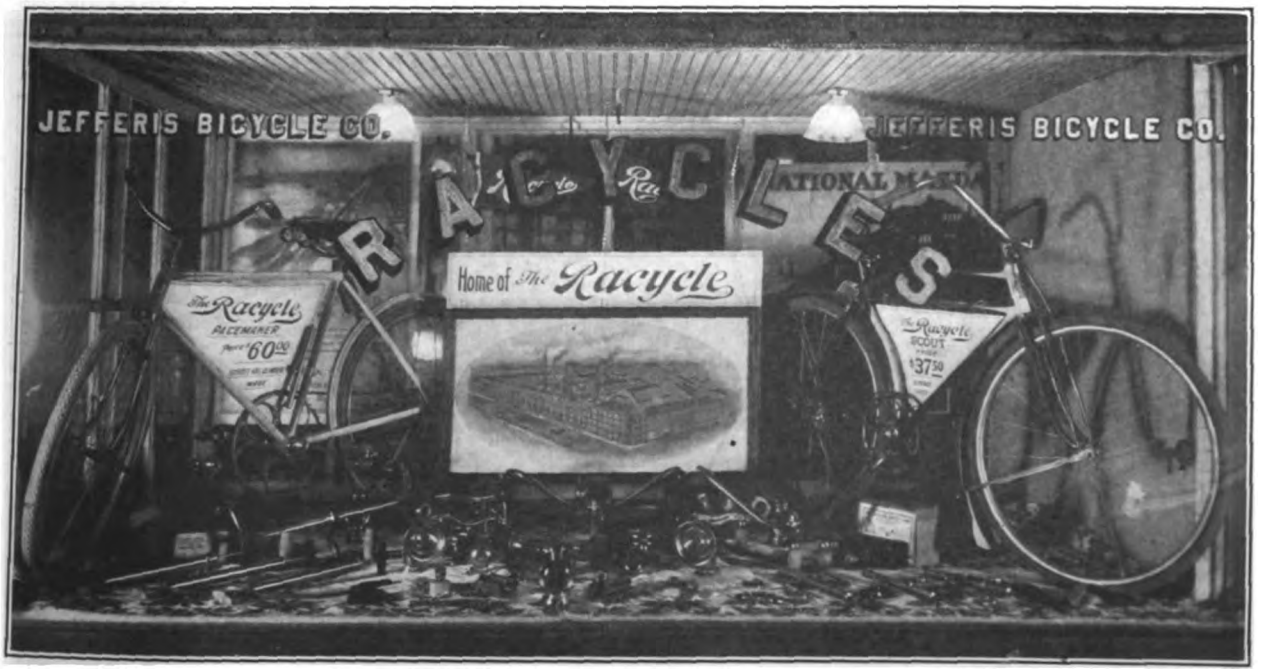
Digitized by Google

EFFECTIVELY EMPHASIZING THE ECONOMY OF BICYCLE RIDING



This window, featuring the Tribune, one of the Pope Bicycles made by the Westfield Mfg. Co., tells a story to passers-by. It points out that bicycle riding will save both time and shoe leather. The signs are brief and to the point.

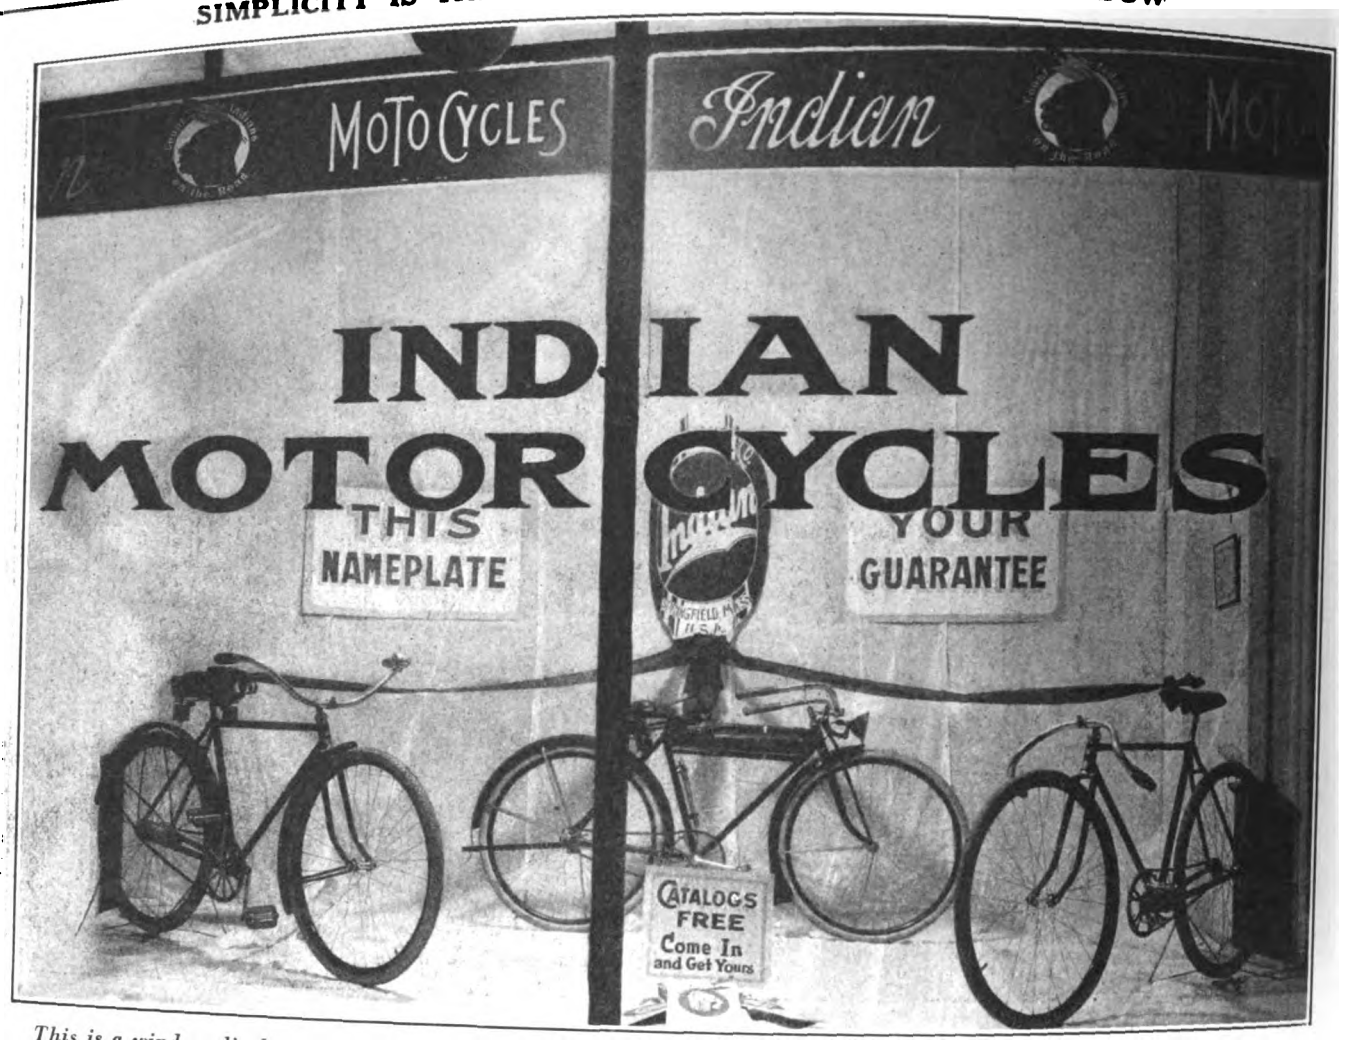
FEATURING THE FACTORY THAT STANDS BEHIND THE BICYCLE



This dealer had secured a picture of the Miami Cycle and Mfg. Co. and is giving it a prominent place in the window. Note the harmonious arrangement of accessories and the fact that signs are effectively used on the machines.

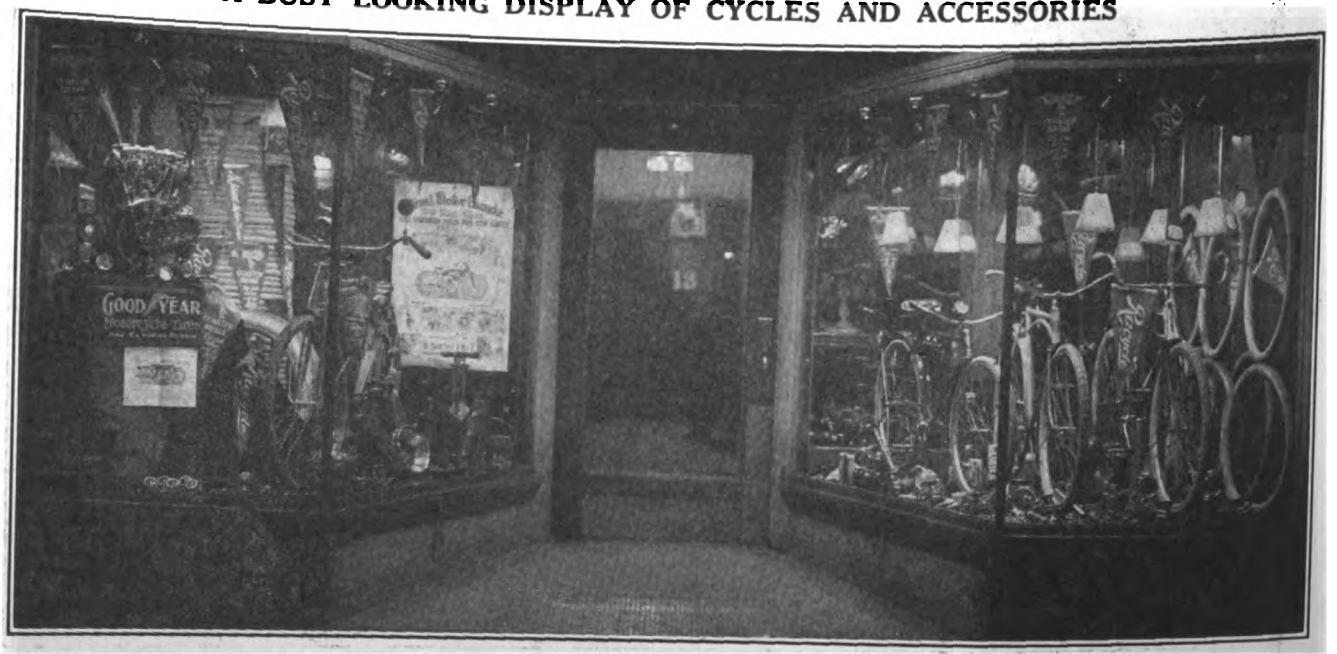
Digitized by Google

SIMPLICITY IS THE KEYNOTE OF THIS ATTRACTIVE WINDOW



This is a window display that any sign maker can turn out, and if the dealer himself be skilled in handling the brush, then the only expense involved is the cost of the ribbon (75c.), which links the machines with the big Indian bicycle name plate shown in the center background. The sign in the middle foreground, with a catalog immediately in front of it, is intended to draw passersby into the store of the dealer, who can secure their names for circularizing.

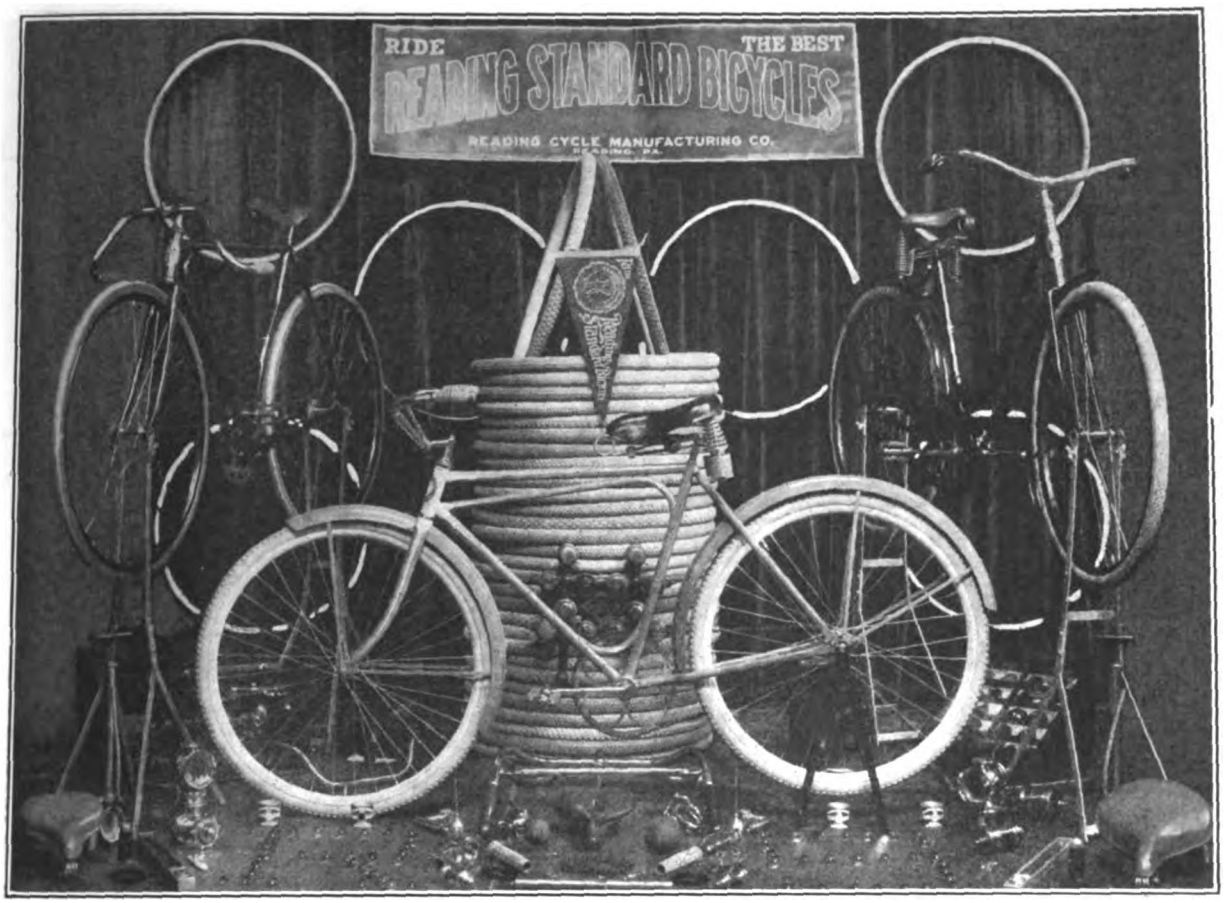
A BUSY LOOKING DISPLAY OF CYCLES AND ACCESSORIES



By the use of pennants, drop and shaded lights this window of Miami bicycles has been given a distinctive appearance. Three bicycle models are shown in the right window, the wall is banked with tires, while the floor is covered with accessories. These two windows were kept lighted day and night for a full week and attracted much attention.

Digitized by Google

A WELL BALANCED DISPLAY OF READING STANDARD BICYCLES



Everything shown in the window above pertains strictly to cycling. Three models are displayed by means of stands, these being the R-S Flyer in front, the R-S Racer at the left and the Ladies' Roadster at the right. In the middle are the various types of tires with which R-S machines are equipped. In the right background is a display case of Wilson Goggles, while in the left background is one of Ever Ready Flashlights. New Departure Bells are fastened to the tires, while saddles, grips, coaster brakes and other accessories are attractively grouped in the foreground.

MILEAGE CONTESTS BREED INTEREST

A great deal of interest can be worked up in a mileage contest, and those who participate in it are certain to pass some of their enthusiasm along to non-riders who may thus be brought into the ranks. An attractive prize, or better still, a number of prizes, should be offered by the dealer for the best mileages made during the season. Incidentally, every rider who participates in a mileage contest will be a purchaser of a cyclometer. If the plans are properly handled a lot of valuable publicity can probably be obtained from newspapers.

GOODS HALF SOLD

"Goods well displayed are goods half sold." That's a principle of merchandising which is very true of the bicycle business.

Your accessories and machines should be so arranged that they will attract people and "put a dent in 'em."

MOTOR WHEEL BOBS

A little stunt that will attract attention to the Motor Wheel is to connect the attachment to a sled or a bob and ride through the busy streets of your town. That will show that the "bicycle booster" is both powerful and can be used in a novel manner when the snow covers the ground. The dealer who tries this stunt should advertise his place of business on the bob and invite people to call on him.

A BEAN GUESSING CONTEST

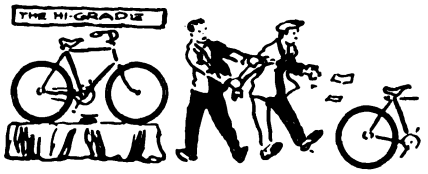
One bicycle dealer in Washington, D. C., has started a bean guessing contest to arouse interest in Bicycle Day and bring the crowd to his store. He has placed a jar of beans in his display window and allows everybody a chance to guess at the number of beans which the jar contains. To the person whose guess is nearest the right number, he will give absolutely free of charge any bicycle in his store.

RIDE A BICYCLE

Be a consistent bicycle dealer—ride a machine yourself. You will be a more enthusiastic salesman if you are a cyclist, and your talks to prospects will ring more true. After you have been riding your machine for a time you can use it as an illustration of the lasting qualities of the bicycle and the low cost of upkeep.

BOOST BETTER BICYCLES

Always push the better grade of bicycle—there are no comebacks when you sell a first-class machine; the profit is larger and your customers will be permanent.



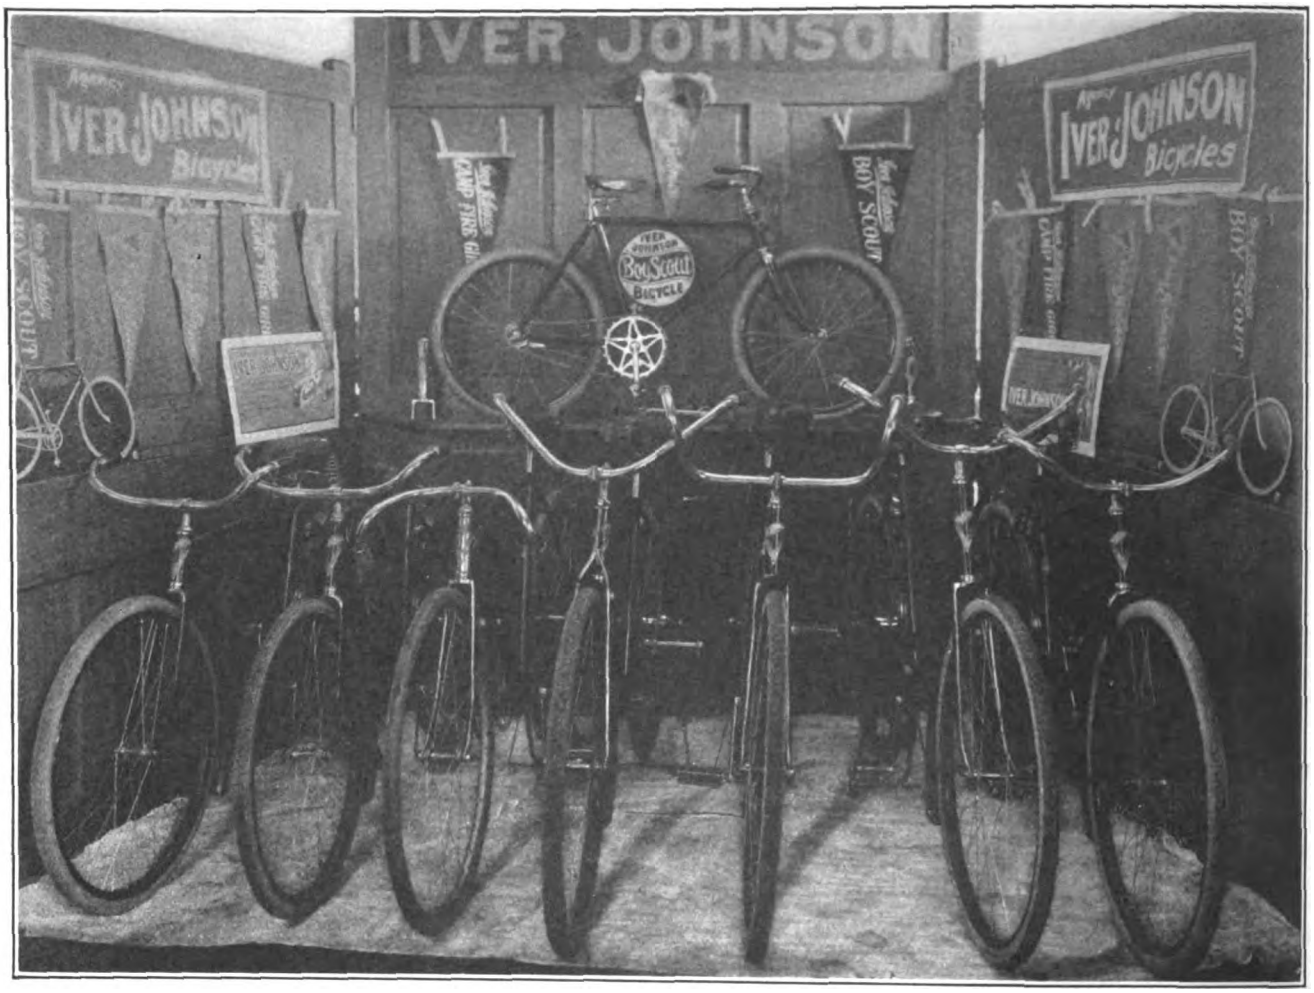
The foundation for a god business depends upon a dealer's reputation for reliability. Talk, sell better bicycles; you'll be better off.

MOTOR ATTACHMENTS

Dealers who handle motor attachments for the bicycle, such as the Smith Motor Wheel and the Cyclemotor, will find many active prospects among their customers who are still riding machines and even those who have put their wheels up in the garret. Any man who already owns a bicycle is a possible purchaser of a motor attachment.

Digitized by Google

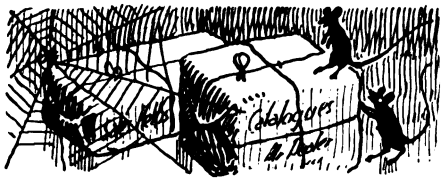
BUNCHING A VARIED LINE-UP OF BICYCLES TOGETHER



In this window display pennants and signs are employed to good advantage, and especial attention is attracted to the Iver Johnson boy scout bicycle by virtue of its being placed in the center and elevated above the other machines. Note the shelves on the side which can be raised or lowered. Both Boy Scout and Camp Fire Girl pennants are used. The signs and lithograph metal bicycles are furnished free by the Iver Johnson company to its dealers.

WHAT DO YOU DO?

When the manufacturer ships you a supply of printed matter what do you do with it? Booklets in boxes stuck away in the



storeroom might better be back at the factory. They have been sent you for a purpose and that purpose is to have you place them in the hands of your prospects. Are you doing it systematically?

ARMORY ATHLETIC MEETS

In a large number of towns the local militia stages athletic meets during the winter months. Very seldom are bicycle races included in the program. The hustling dealer who wishes to get a lot of effective publicity for the bicycle can easily prevail on the committee in charge of the meets to permit bicycle races and get some of the fellows to ride. Then, he can advertise in the program of the meets and call attention to the fact that his make of machines are being used and that they are popular because of their service-giving qualities, etc.

ADVERTISING THAT PAYS

Advertising will pay you—if you are persistent. One "ad" or sales letter is pretty much a waste of time and money. The way to make advertising pay—and the only way—is to keep at it. The dealer who tells his story over and over again, day in and day out, is the one who will win. Decide definitely what you will do, and then

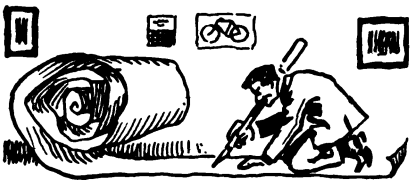
stick to it. If you can afford to run two ads in your local newspaper each week, do so consistently for a definite period of weeks. Remember that you've got to compete with other merchants who advertise to attract the attention of readers.

"BICYCLE REPAIR SHOP"

Too many bicycle dealers who handle new machines call their stores repair shops. It is hardly advisable to emphasize the repair end of the business, when you are really making a specialty of selling brand new wheels. It leaves a "bad taste" in the prospect's mouth.

A DAILY SCHEDULE

Make a schedule of the work that you are going to do each day. Don't tackle the day's work in a haphazard fashion.



Think over what you know ought to be done, and then do it on a systematic basis. The dealer who doesn't set out to accomplish something definite each day usually goes wide of the mark.

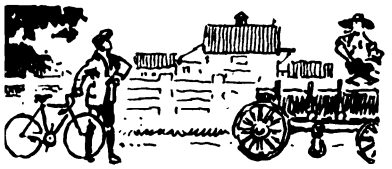
MAKE WINDOW DISPLAYS SIMPLE

Aim to keep your window displays simple in lay-out. When you are displaying bicycles it is unwise to complicate the design by working in a great number of accessories. Show the machines by themselves, featuring a juvenile, a standard man's model and a lady's type, if you have room—and a week or ten days later make up an accessory window display.

Digitized by Google

THE FARMER NEEDS ONE

The farmer is one of your best prospects. There are times when his team is in use, and it is necessary for some one in his family to go to the village on an important errand. Then it's a case of "hoofing it" and losing a lot of valuable time. A bicycle



would make those trips to the village shorter and pleasanter.

GIVE FIGURES WHEN POSSIBLE

Figures are always impressive. If a bicycle in your town has been running for ten or a dozen years—and a lot of them throughout the country have—get the facts and use them. The rider of such a durable mount ought to be a good man to whom to offer prospects, and he might be induced to let you display his machine in your show window for a few days with suitable cards telling the story of efficiency, provided the machine is of a brand that you handle.

AN ATTRACTIVE SCENIC EFFECT

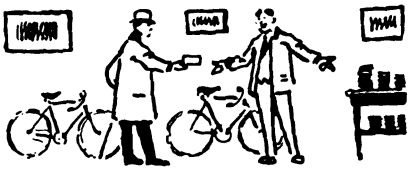
Dealers who wish to put a punch in their show windows preparatory to a drive for Spring business can obtain an artistic effect, and also give a pleasant suggestion, by having a heavy cardboard background for the window painted to represent a country road or woodland scene. The cardboard should be high enough to shut off the view of the salesroom from the street, and the bicycles can be placed in front of it with neatly lettered cards calling attention to their many advantages. Any clever sign-painter can turn out the scenic background at small cost.

FLY SPECKS AND DUST

One of the best ways of going into bankruptcy is to have all your wares covered with fly specks and dust. Spider webs hanging in the corner of your store are always an indication that you belong to the fraternal order of Rip Van Winkles. It is well to have your store topsy-turvey, provided you do not wish to be bothered with having customers enter your place and disturb your reading the newspaper. On the other hand the dealer who would be prosperous will clean his store and window thoroughly at regular intervals and give his establishment a neat and business-like appearance.

GETTING HIS ADDRESS

One dealer who found difficulty in getting the addresses of people who came into his store, discovered a simple plan that

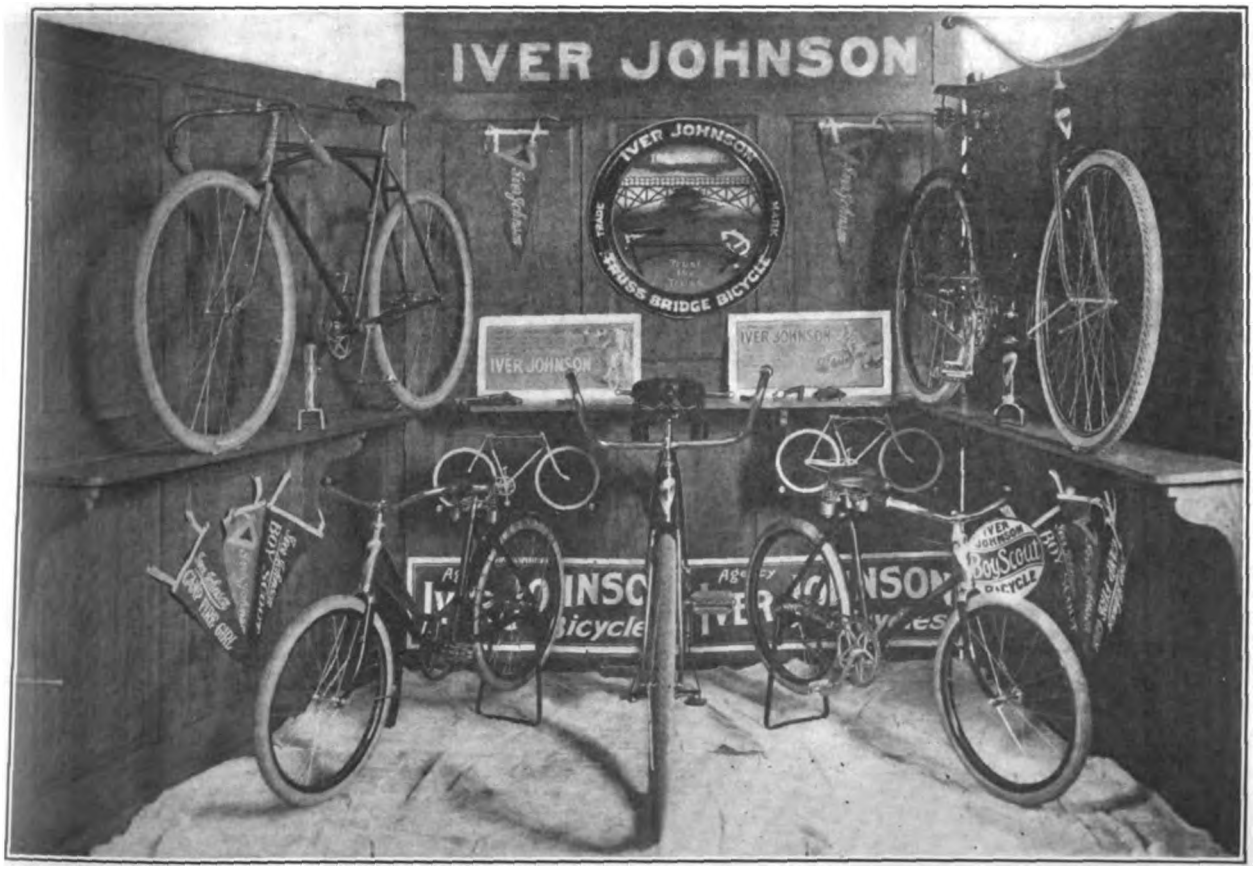


made it easier for him to secure this information. He would tell the prospects that he wished to mail them some interesting catalogs and literature within a few days and for that purpose would appreciate having them leave their addresses. Nearly everyone readily complied with his request.

GETTING A "FOLLOWING"

An effective way of securing a "following" of riders who will boost your business is to send write-ups of the boys' activities to the trade papers. Get the fellows into the habit of dropping into your store to read, not only the stories of what they have done, but also the happenings of other clubs which are recorded in the trade journals each week. That will arouse their interest in cycling and keep them coming in.

THE EFFECT OBTAINED BY USING FEWER MACHINES



This photo shows the same window as on the opposite page, but fewer bicycles are used, only three being shown on the floor, while the shelves have been raised to support a machine at each side. In the background is a large Iver Johnson saucer sign showing the idea on which the truss bridge bicycle is based. The stands on the juvenile bicycles tilt the machines forward, thus suggesting action. Factory signs and pennants are also effectively used in this display, the tendency being toward simplicity. Note fancy bicycle heads on side shelves, and parts on rear shelf.

Digitized by Google

BRINGING THE MOTOR ATTACHMENT TO THE FRONT

Here is a display in which the Cyclemotor is prominently featured by attaching it to bicycles that are brought right against the window. Passersby are thereby given an opportunity to see the motor clearly. It is advisable in windows showing motor attachments to use some pertinent signs, briefly stating the advantages secured by using them, the extreme speeds at which the motor will travel and the small fuel cost per mile, etc. Fewer machines should be shown.

REMEMBER YOUR BOYS

Get your boy friends interested in Bicycle Day. Offer prizes for the fellows that bring in the largest number of prospects—that'll get the youngsters active and make them take a personal interest in the success of Bicycle Day. You can't have enough people routing for you, and the kids certainly can do wonders once you get them going.

CONTEST IN WINDOW

Stage a home trainer contest in your window and you're bound to draw a big crowd. Get some of the local riders to compete on the trainer for accessory prizes. Have this contest run off every evening at a specified hour during Bicycle Day week, and the crowd will be looking forward to the event each night. A contest of this sort will make interesting stories for the local papers.

EQUIPPING THE MESSENGERS

If bicycles are not being used by messengers, special delivery workers and others similarly employed in your town it is probably because the matter has not been presented to the companies in an attractive manner. It is a good scheme to supply a machine or two without cost for a short period, say one or two days, so that the officials can have a practical demonstration of the bicycle's fitness for such service. Needless to state, the machines sent out for such a trial will not be new ones, but they should be in first-class condition.

OFF IN A QUIET SPOT

USE GOOD PHOTOGRAPHS

When you obtain a striking bicycle photograph, Mr. Dealer, have an enlargement made and paste it neatly against the glass at the side of your show window with a few descriptive lines under it. Pictures are eye-catchers and often give a stronger buying suggestion to a passerby than a yard of sales arguments in type. When you see an attractive picture in a trade journal, cut it out and post it in your window. Many interesting war pictures are printed in the trade journals, as well as photographs of runs and races.

KEEP YOUR MIND OPEN

The difference between the live ones and the dead ones is the open mind. The live one does not think that because he has been in the bicycle business for a number of

years all the knowledge of that business is locked up in his cranium. He realizes that the world keeps traveling and that new ideas are constantly being developed.

PEDAL BUSINESS AS A BAROMETER

Capacity Demand for Majestic Line is Significant of the Progress Being Made Towards That Million Bicycles Goal

By O. A. JONES
Sales Manager, Majestic Mfg. Co.

"ONE Million Bicycles in 1916!" Will it be possible? That's a question that a lot of us are pondering these days, and we must admit that even if it should prove not quite possible it is a mighty interesting and attractive goal to aim at.

When our esteemed friend Mr. Olin, of the New Departure Mfg. Co., first passed the slogan along to the trade I venture to say that many joined the writer in making a mental note somewhat as follows: "Fine young dream; looks well in print and is undoubtedly good advertising, but hang it all, it can't be done!"

When you consider the quiet period experienced by the trade during 1914 and the first half of 1915 it will be seen that we had some excuse for this feeling of uncertainty. Then again, most of us have been sleepily following a well-worn rut since the bicycle boom days became a part of the glorious past.

Lack of Co-Operative Work

While some of us may not quite like the idea, there is no denying that our newspaper friend from Chicago who spoke at the Cycle Parts luncheon in New York hit the nail on the head when he referred to us as Rip Van Winkles. We have been working pretty hard, and still not getting anything like the results that should be obtained if cycledom is to move forward at a pace proportionate to its importance. This condition was largely due to lack of co-operative work, and that has now been vastly improved. The present enthusiasm of a united trade, concentrated on this million bicycles slogan, will not be denied. It is sure to bring results. Mr. Olin surely has "started something."

Million Bicycles Not Impossible

Some days ago a trade friend and I were holding a mutual sympathy meeting, discussing our woes, saying mean things about our sources of supply on raw material, and exchanging similar cheerful small talk when the conversation drifted to a discussion of the million bicycles idea and its probabilities and possibilities. Both of us do our traveling stunt among the trade, and comparisons and analyses of our experiences since June, 1915, led us to the conclusion that the million idea was not so radical after all.

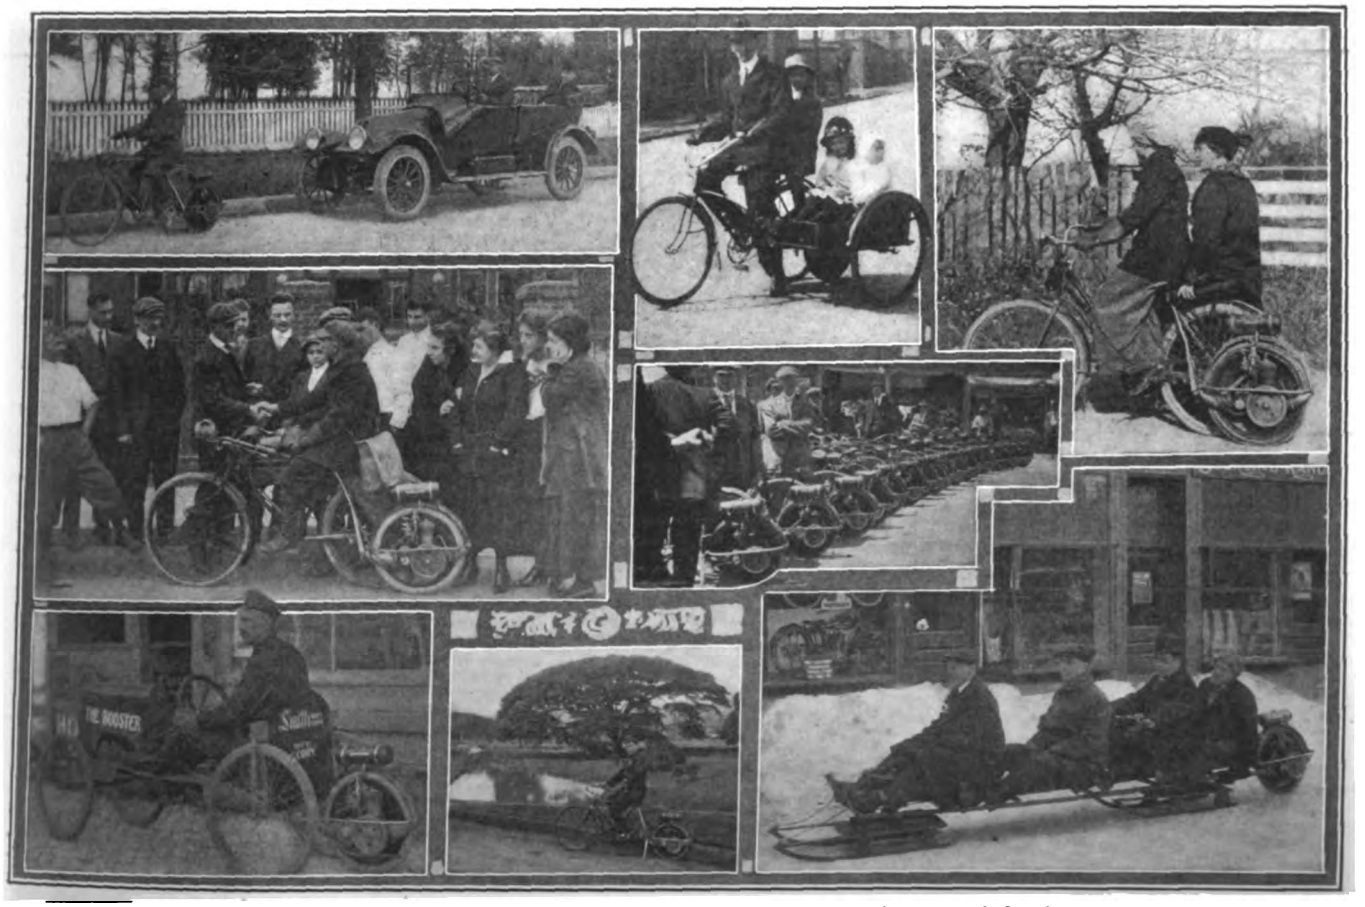
While we are selling different lines, we agreed that our experiences pointed to a decidedly promising year. My end of it—pedals—surely gives the impression that bicycles are booming. Our company is a new comer in the pedal business, and we have no records of past years on which to base comparisons, but when a new producer in any line can count his volume up so far into the thousands as we are now doing it certainly means that business is brisk and the general outlook decidedly encouraging. When a company hits the capacity mark with a pedal line that it introduced only a year ago, it requires no intricate mathematical calculation to arrive at the conclusion that a lot of bicycles and motorcycles are going to be sold. At the time of the New York Show we had booked orders for 400,000 pairs of our pedals.

It must be remembered of course that no pedals are being imported, but examination of statistics shows that pedal imports were never alarmingly extensive. As a matter of fact, pedal importation in the past has been confined to a surprisingly few firms or individuals. Nor can our pedal volume be credited to export business. We have had such offers presented to us in flocks and droves, but we believe the domestic demand has first call upon our service, and our pedal department is now operating at full tilt.

Raw Material the Only Problem

From careful consideration of the conditions applying to our own case, and the general trend of events since early last summer, it appears that there is nothing to prevent the realization of that million bicycles idea except the shortage of material. If the manufacturers can obtain their material in time, and in sufficient quantities, the campaign ought to go through.

THE SMITH MOTOR WHEEL IN VARIOUS INTERESTING ROLES



These Photos Show the "Bicycle Booster" on the Job in Different Sections of the Country

WHY THE LADIES NEED THE BICYCLE

Veteran Lady Rider Tells of the Many Benefits Which She Derived From Cycling—Society Again Takes to the Bicycle and the Sport Promises to Be Revived Among the Fair Sex

HATS off to the lady riders! Though their ranks have thinned out it appears, from reports received from various sections of the country, that the present season will see more of the ladies awheel, joyously pedalling on the road to good health and happiness. The ladies really need the bicycle; but they don't know it. They haven't been told.

When It Becomes the Fashion

As everybody knows the fair sex is rather finicky about fashions. And the only way to get a goodly number of them to take up cycling is to give their side of the sport more publicity that it has received in past years. After the ladies are once impressed by the fact that cycling for them at present is eminently proper and tremendously beneficial; that representative members of their sex are finding it an enjoyable source of recreation, one may again expect to see more of them riding.

Already society at Palm Beach, Fla., has revived cycling. The pictures which are shown on the opposite page were photographed but a few weeks ago. More women are now riding bicycles at the famous winter resort than at any previous time. The five ladies appearing in the layout are all members of New York's smart sex, who are setting the pace for women the country over. Widespread publicity has been given to the fact that Palm Beach is awheel and the sport is being taken up by ladies, and also men, at other Southern resorts where society finds a haven from the cold grip of Jack Frost.

Makes a Wider Appeal

But cycling is much too democratic a pastime to be restricted to the smart sex. The modern bicycle is an inexpensive vehicle and women of all classes can certainly afford to own one. Emphasis alone is placed on the fact that society ladies are once more mounted on two-wheelers because they usually create fashions that are quickly copied.

One of the most enthusiastic lady riders of the country is Mrs. Jane Yatman Ruch, of New York, who has been a member of the Century Road Club Association since 1895. Up until a year ago she has been a consistent rider, and her opinion of cycling as regards the fair sex is, therefore, both interesting and enlightening. In speaking of her experience recently to a correspondent of this journal, she said:

Health-Giving Pleasure

"I hope to see the day when women will return to one of the greatest health-giving pleasures—bicycle riding. Back in the days of cushion-tired wheels, costing $150 and more, I caught the 'bicycle fever' and had it up to 1914.

"I can well remember the time when there were exclusive clubs for women, and then there were some co-called men's clubs which also invited the ladies to membership. Society rode and the newspapers used to print some very interesting articles and news on cycling. Why, the churches even had special 'bicycle accommodations.'

"Century runs were frequently participated in by women, some of whom were ambitious to help set the pace. They vied with each other to wear one of the pacemakers' sashes of brilliant color and wanted to be 'IT.' I was 'IT 'very often and have quite a number of century bars and medals to show for the events in which I rode.

MRS. JANE YATMAN RUCH

She Tells of Her Experiences as a Bicycle Rider and Believes That Cycling Is the Ideal Sport for Women

What Cycling Did for Her

"Of course, it is hardly to be expected that the modern woman would indulge in century or long distance riding. But cycling has many attractions to offer which make ambitious tours wholly unnecessary. I remember that when I first started to ride I was a puny girl weighing about one hundred and five pounds, with a bunch of nerves that were always on the jump. I soon found that in order to enjoy riding, I must develop steadier nerves. After riding for a time I found myself becoming healthier every day, and happier, too. The bicycle did it, and can still do the very same thing for thousands of women in this country who now lack a suitable means of recreation.

Able to Undertake Long Rides

"After I had been riding for a number of years, my strength and endurance had developed to a point where I could go wheeling in all kinds of weather and take long trips. I made a bicycle tour to Chicago in ten and one-half days and a seven hundred-mile run on the Merrick road on Long Island in 8 hours. I have a string of one hundred gold century bars. This long-distance riding appeared to have no ill effect on me—in fact, I seemed to thrive on it.

"I stopped riding in 1914 because I was unable to secure a suitable diamond frame wheel for my use. I prefer them, because they are lighter and run with much less vibration than the drop-frame wheel now being manufactured for women. If the manufacturers again made a good diamond-frame bicycle for women, I would certainly ride again—and other women would too.

The Automobile Nuisance

"The great difficulty in resuming riding might be said to be the automobile chauffeur who drives his juggernaut carelessly. Stricter rules of the road would soon correct this evil and make the roads in and around the cities perfectly safe for women. In the hey-day of cycling we also had the road-hog to contend with. This nuisance soon became a thing of the past, when pressure was brought to bear by the large army of cyclists.

"To sum it all up, there is nothing more exhilarating for any one than an early morning ride through the country on a bicycle. The health-giving ozone acts as a tonic, makes one forget doctors and grow young instead of old.

"So here's to the bicycle. May it again become popular among women as it was back in the good old days."

TAKES CYCLEMOTOR AGENCY

NEW LONDON, Conn.—Moxley's Bicycle Store has taken the agency for the Cyclemotor for New London and vicinity for 1916. The contract was signed by O. W. Adams, traveling representative in New England for the Cyclemotor Corporation, of Rochester, N. Y. Moxley is looking forward to a fine season with the handy little bike powerplant.

FOUR TEAMS LEAD IN KANSAS CITY GRIND

Ten Teams Start in Outlaw Six-Day Race; Corry-Ryan Drop Out Early, While Ohrt-RudiRusse are Three Laps Behind

KANSAS CITY, Mo., Feb. 22.—By frequent and terrific sprints four teams during the fourth day of the outlaw six-day race, which started here last Saturday afternoon, jumped one lap ahead of the field and clung to their advantage. These teams were: Lawson-Cameron, Thomas-Kaiser, McNamara-Madden, and Lawrence-Magin. The race is a ten-hour per day affair. At the end of the thirty-first hour the leaders had covered 716 miles and 9 laps. Four teams were one lap behind the leaders, and the Ohrt-RudiRusse combination was three laps in the rear.

A large crowd attended the start of the outlaw six-day race in this city on Saturday afternoon. The riders were scheduled to begin the weary whirl at 12:30, but did not get under way until 1 o'clock. The track was built in record time and is a very fast one, having twelve laps to the mile.

Ten teams were entered in the race, these being: Reggie McNamara-Eddie Madden; Percey Lawrence-Jake Magin; Harry Kaiser-Lloyd Thomas; Iver Lawson-George Cameron; Frank Corry-Martin Ryan; Charles Piercey-Ned Young; Thomas Smith-William Coburn; Gus Wohlrab-Joe Kopsky; Thomas Grimm-Vincent Madonna; Ernest Ohrt-RuddiRusse.

The first hour was rather slow. The field covered 24 miles and 7 laps, with Kopsky setting the pace. Shortly after four o'clock Michael Boyle, of the Chicago promoters, put up a five dollar prime for a six lap sprint, which was captured by Harry Kaiser without much of a struggle. The big thrill of the first day did not come until about nine-thirty in the evening, when McNamara started a jam and with the assistance of his partner Madden continued to set the pace for about three minutes. He was madly pursued by the entire field, and when things quieted down it was found that Madonna-Grimm and Ohrt-RuddiRusse had each lost one lap.

Corry Falls from Wheel

A ten dollar prime for a mile sprint marked the close of the first day's riding. Cameron started after the money and then Piercey threw off his cap and outsprinted Ryan in the last three laps of the mile. Corry, trying to pass McNamara in this sprint, fell from his wheel and was bruised about the knees. The riders rode nine and one-half hours on the first day and succeeded in covering 231 miles and 8 laps.

The Sunday afternoon program opened with a two-mile amateur race which started at one-thirty. Herman Hoffman, Bert Nelson, Harry Gundacker and Paul Anderson, of Chicago, were pitted against William Tavenor, William Brook and Joe Strode of Kansas City. The race was close all the way, Gundacker winning, with Hoffman second and Brook third. The time was 5:00⅗. E. B. Pertle rode an exhibition one-mile motorcycle race in 1:40⅘. He was mounted on a stock Excelsior.

The six day riders then appeared on the track and rode for another ten hours. A five dollar prime hung up by the Twentieth Century Cycling Association, the promoting body, was captured by Jake Magin. Madonna proved to be a favorite with the crowd by his repeated attempts to regain his lost lap. Ohrt made several jumps but was always caught by the field.

Shortly before eight o'clock Corry again fell in trying to pass a rider and dislocated his shoulder, which forced him to withdraw. Ryan continued to ride without a partner and pulled a great deal of "grandstand stuff" in setting a hot pace and making several jumps. In the big jam which soon followed Ryan jumped to the front several times and set such a hot pace that reliefs to the other teams came often. Ryan, after puncturing all his tires, withdrew at nine twenty-six.

Piercey Takes a Prime

In the big jam of the evening which McNamara started, RuddiRusse-Ohrt team lost two more laps and the Madonna-Grimm combination lost one lap. At ten-thirty a ten dollar prime, offered by the Twentieth Century Cycling Association, was captured by Piercey. Cameron, Magin and Madden by taking the lead in this sprint made it a lively one. At the end of the second day the riders had travelled 417 miles and one lap. The Madonna-Grimm team was two laps behind and the RuddiRusse-Ohrt team three laps to the bad.

The third day was uneventful, except that the Madonna-Grimm team regained its lost lap, the honors being about equally divided between the two riders. At the end of the third day the riders had covered 597 miles and 6 laps.

BIG JOBBERS DISTRIBUTE DAYTON BICYCLES

DAYTON, O.—Widespread distribution of Dayton bicycle has been obtained by the maker, the Davis Sewing Machine Company, by the signing up of eleven large cycle jobbers. These jobbers will care for the putting out of Dayton wheels in all but eight States, the factory handling the territory for the eight direct.

The jobbers are: J. W. Grady & Co., Worcester, Mass.; Haverford Cycle Co., Philadelphia, Pa.; Wm. H. Grover, Norfolk, Va.; Walthour & Hood Co., Atlanta, Ga.; the Sutcliffe Co., Louisville, Ky.; Beckley-Ralston Co., Chicago, Ill.; H. A. Testard, New Orleans, La.; Pettee Cycle Co., Denver, Colo.; Wm. H. Hoegee Co., Los Angeles, Ca.; W. E. & W. H. Jackson, San Francisco, Cal.; Washington Cycle & Supply Co., Tamoma, Wash.

FOREIGN AGENTS SIGN UP FOR CYCLEMOTOR

ROCHESTER, N. Y.—Among recent foreign representatives which have been appointed by the Cyclemotor Corporation are, F. Navas & Co., of Havana, Cuba; Felix Gaos, Barcelona, Spain, and V. Panchemko, Kharkoff, Russia. There have also been appointed representatives in Honolulu and in the Netherlands.

The Cyclemotor Corporation is rapidly increasing its list of overseas representatives and the closing of a European or South American contract is now a daily occurrence. That the little motor attachment is a "comer" in all parts of the civilized world is demonstrated by these orders and by the numerous inquiries which are being daily received and which keep the clerical staff busy as bees.

OLD RIDERS TO ORGANIZE CLUBS IN GRAND RAPIDS

GRAND RAPIDS, Mich.—This city is to be again on the cycle map, as regards a real bicycle club. A movement to organize a club has been started by Ray O. Denison and C. M. Shook, members of the defunct Western Michigan Cycling Club, and it has the backing of all the local dealers. Denison and Shook hope to have 75 members for the first meeting of the proposed organization.

The object of the club will be to get young men who cycle to participate in week-end pleasure trips to surrounding towns and to enter in road and track races under the auspices of the organization. It is expected that the first meeting will be held about the middle of March.

SIX-DAY RACE DROPPED

MILWAUKEE, Wis., Feb. 23.—Manager J. C. Grieb of the Milwaukee Auditorium Building has announced that all negotiations for bringing the professional riders to this city to participate in the proposed six-day race have been called off. The local promoters are said to have gotten "cold feet" when they heard that the Chicago men lost some $10,000 on the outlaw grind held there.

HAVERFORD GIVES BICYCLE AS SOUVENIR

PHILADELPHIA, Pa.—On the opening of the new quarters of the Haverford Cycle Co., at 503 Market street, the firm offered a unique souvenir to its customers. This souvenir was a bicycle fitted with Atherton coaster brake, Tip Top saddle, Schineer handlebar, R. E. C. mudgards and Diamond tires. The bicycle was given to those ordering 25 pairs of assorted Diamond-Goodrich tires.

The Haverford company had stocked 25,000 pairs of tires and 1,000 bicycles for the opening. The tires and the bicycle were shipped freight prepaid to the dealers who took advantage of the firm's offer, and shipments under this offer will be continued until March 1, or until the stock on hand is exhausted.

OPEN A NEW STORE

HARRISBURG, Pa.—The Dayton Cycle Company has opened a new and larger store at 912 North Third street, for the sale of bicycles and bicycle sundries. One of the specialties will be the New Departure coaster brake. The new establishment has the most modern equipment throughout.

INDIAN FEATHERWEIGHT SCORING BIG SUCCESS ALL OVER THE UNITED STATES

Now the Featherweight reports are coming in! Coming from Indian dealers who have proven these wonderfully efficient little machines to their own satisfaction and whose unstinted, voluntary praise is giving voice to another Indian mechanical achievement.

The Indian Featherweight is now demonstrating *by performance* how fit it is to bear the proudest name in motorcycledom —INDIAN.

The Indian Featherweight is showing them all that it is entitled to be the leader in the lightweight division just as the Powerplus Big Twin is "Master of Them All."

Here are what some dealers write us about the new Featherweight—

"The Featherweight arrived today and it certainly has exceeded our expectations. We have no doubt but that the Featherweight will be a big seller."

A. Freed, San Francisco, Cal.

"Just received the Featherweight Indian. It is a bird. Has a quicker get-a-way in the sand with tandem passenger than some of the other make twins here. Believe it would almost climb a tree. Made more than 30 miles an hour with it today. It is the center of attraction in this burg."

Geo. W. Spriestersbach, Alamosa, Col.

"I was very much surprised at the Featherweight. It has easy starting qualities and elasticity far superior to those of other two-cycle engines I have known. It has power and pick-up that I never suspected possible in such a little thing."

Walter Gray, Del Rio, Tex.

"We received a Featherweight today and, to use the English expression, "My Word," it's a wonder. Although this is the coldest day we have had this year, the thermometer hovering around zero, with a good snowfall yesterday, we could not keep "Happy" off it. It has been used practically all day, making demonstrations, and we have already received half a dozen orders for immediate delivery."

Howard A. French & Co., Baltimore, Md.

"Today Baumgardner took it out to a Dubois St. hill. This street is paved with cobblestones and grass covered because nothing goes up it; the grade runs from 32 to 35%. It climbed on the low this grade as smooth as it run the level on high. Everyone is enthused over it."

Geo. W. Sherman, San Francisco, Cal.

WITH THE POWERPLUS BIG TWIN, FEATHERWEIGHT AND INDIAN BICYCLES THE INDIAN DEALER IS IN POSSESSION OF THE STRONGEST AND MOST PROFITABLE TWO WHEELED LINE IN THE WORLD.

SENSATION OI HISTORY—IND

Today the Indian Bicycle Department is literally swamped with inquiries coming in responce to the Indian Bicycle Advertising Campaign.

These inquiries reflect the tremendous national demand for a bicycle that has its origin in a manufacturer who puts his honorable name upon it—and who stands back of that name with a machine of known quality.

Likewise the dealer enthusiasm with which the Indian Bicycle has been received reflects in turn the immense purchaser-satisfaction which has resulted from Indian Bicycle Style, Quality and Design.

Mr. Sam F. Boord of The Omaha Bicycle Co., says: ***"We wish to congratulate you on the Indian Bicycle. It seems to me to be the easiest selling bicycle I have ever handled"***

The Indian Bicycle Line on Display at the Omaha Bicycle Company

The immediate place which the Indian Bicycle has taken in the front rank is one of the most noteworthy and unique accomplishments that the trade has ever known.

NORTH SIDE CLUB HOLDS SILVER JUBILEE

MILWAUKEE, Wis., Feb. 23.—Louis Pierron, the veteran bicycle fan, was re-elected president of the North Side Cycling Club at its annual meeting, which was held on Saturday evening, preliminary to the celebration of the club's silver jubilee. Otto J. Tank was again chosen vice-president, while Emil A. Schueppert was re-elected secretary-treasurer. The new road captain is Louis Ritter.

Most of the old guard were on hand to observe the North Side's twenty-fifth anniversary, and the evening was pleasantly spent.

Preliminary plans were discussed for staging a monster bicycle outing early this spring. Reminiscent speeches also featured the celebration. Speakers recalled the fact that bicycling was at its height in Milwaukee about ten years ago, when there were at least twelve separate bicycle clubs in the city, which formed a consolidated body that numbered more than one thousand members. So strongly had the sport taken hold that the demand for bicycles was very difficult for the dealers to meet.

Last year the old North Side club became active again and held a number of successful runs, which brought out not only the veteran riders but also some of the young blood.

CALIFORNIA TRADE NEWS

SAN FRANCISCO, Cal., Feb. 20.—A. Freed, the Northern California Indian distributor, is very enthusiastic over the new Indian bicycle and has sold quite a number to the local wheelmen.

Oliver Baxter, sales manager of the Bean Son & Company, has just returned from a trip through the Sacramento and San Joaquin valleys and has met with splendid results in signing up new agencies and booking new orders. His company makes a specialty of the Pierce bicycle.

Johnson's is the name of a new bicycle and sporting goods store that will shortly be opened in Stockton. Johnson will feature the Dayton bicycle and motor bicycles.

DESIMONE DEFEATS BELLO

NEW YORK, N. Y., Feb. 22.—Anthony Desimone showed some of his old-time form last Sunday night, when he won the fourth race of the series which will decide the home trainer championship of the Unione Sportiva Italiana. Desimone met Tom Bello in his heat which he rode in the fast time of 52⅖ seconds. The distance was ¼ mile. Desimone now leads in the point score, which follows: A. Desimone, 13; Tom Bello, 10; N. Johnson, 3; P. Giordano, 3; A. Ferrero, 3; E. Mullin, 2; T. La Rossa, 1; J. Mossuti, 1.

RECORD JANUARY MILEAGE

BALTIMORE, Md., Feb. 22.—The unusually open weather prevailing here during January resulted in the greatest total mileage ever reported by the Crescent Bicycle Club for that month. 5,141 miles and 16 centuries were reported, as compared with 1,325 miles and no centuries, the best previous total. Great interest attaches to this season's mileage and century competition due to the fact that some of the new members of the club have announced their intention of making the three veteran road pluggers—Wright, Stricker and Fred Sanborn—do some tall hustling for the club medals.

CLUB WILL HOLD NOVICE RACE AT PARK STADIUM

SAN FRANCISCO, Cal., Feb. 20.—The New Century Wheelmen held their first run of the season last Sunday when twenty-five members turned out to participate in the ride to San Mateo. The day was ideal. Now that the rainy season is over the local club has planned to stage quite a number of bicycle runs to points of interest.

On April 2, the California Associated Cycling Clubs will hold their annual novice race at the Golden Gate Park Stadium. This race is looked upon as the banner event of the season. It is a thirty-mile relay affair, with six men from each club. Entries are assured from the New Century, Garden City, Samson and Acme clubs. The winning team will be presented with a trophy and each man on the team will be given a gold bar.

BUTLER COUNTY C. C. HOLDS ANNUAL ELECTION

HAMILTON, O.—At the annual meeting of the Butler County C. C., held at the clubhouse last week, William Glauch was elected president for the fourth consecutive time. Jack Dedrick became vice-president, and Elmer Ortoff recording secretary. Walter Poffinbarger was elected financial secretary, George Kendall treasurer, and Harry Reeder road captain.

The entire membership of the club was divided into two teams to conduct the membership campaign, which has just been started with a view of bringing every eligible man in town into the club. It is hoped that by March 1, the date of installation of the new officers, that the membership will be close to 100 per cent. of its possibilities.

AMATEURS GOING TO NEWARK

SAN FRANCISCO, Cal., Feb. 20.—Nick Eisentraut and L. Cooper, two of the fastest men of the Garden City Wheelmen of San Jose, have left for Newark, N. J., where they will appear in the amateur ranks at the Vailsburg Velodrome. Frank Murray, of the New Century Wheelmen, Ed Carroll and Harry Hoffman, both of the Olympic Club, will also ride at the opening Newark meet. Hans Ohrt, of course, will be there "with bells on."

FOUR NEW GLUNZ WHEELMEN

BROOKLYN, N. Y., Feb. 22.—Joseph and Raymond Caldwell, who have been doing some good riding for the Century Road Club Association during the past season, have become members of the Glunz Wheelmen. John Henky and Will Howe, of the Empire City Wheelmen, have also joined the Brooklyn club. With this new material and Harry Arons, Harry Garbade, Pete J. Brock and Fred Herman, the Glunz Wheelmen will put up a strong fight for the Inter-Club championship this year.

ST. LOUIS C. C. SHOWS SOME SCREEN SCREAMS

ST. LOUIS, Mo., Feb. 23.—Following its annual custom the St. Louis Cycling Club entertained about 150 members and their friends with a stereopticon lecture on Thursday evening, Feb. 17. This is one of the ways in which the local club breaks the monotony of the winter and keeps interest alive while Jack Frost blocks the roads.

The lecture covered a wide scope of subjects and included graphic accounts of bicycle tours taken by various members through Missouri, Colorado and other states, a two days' trip down the trails of the Grand Canyon of Arizona, a "Pullman" ride to the fairs at California, and other interesting trips.

Quite a lot of laughter meet the pictures of the runs which were taken near the city. Many of the unconventional snapshots of the fellows who were present at the lecture showed them in rather embarrassing situations, which required a deal of explaining on the part of the victims. For instance, "Fat" Schreiner was flashed on the screen tapping a cider keg at the annual barbecue. He appeared fondly embracing the keg, and offered an alibi by saying that the keg was empty and needed to be propped up. Lots of wholesome fun featured the evening, and everybody roared until "their sides split."

RABBINO CAPTURES TRAINER RACE

NEW YORK, N. Y., Feb. 22.—The weekly point race of the Unione Sportiva Italiana, which was held last Thursday was captured by Chas. Rabbino, who won from George Harvey by three yards. Tom Bello and Anthony Desimone rode exhibition miles against time, the former approaching his record by ⅗ of a second in the fast time of 1:15⅕, while Desimone rode the distance in 1:14⅗. Summaries of the home trainer race:

HEATS.

1—G. Harvey—E. Mullin	1:16¼
2—C. Rabbino—J. Alfonso	1:15⅘
3—A. Ferrero—C. Zoccola	1:22⅗

SEMI-FINAL.

1—G. Harvey—A. Ferrero	1:17⅗

FINAL.

Chas. Rabbino—Geo. Harvey	1:16⅕

LANGDON WINS TWO EVENTS

BALTIMORE, Md., Feb. 22.—Capt. Langdon M. Sanborn was the winner of both events held in connection with the Crescent Bicycle Club's run to Chattalanee Springs on Sunday last. He captured the hill climb up steep Stevenson Hill by nosing out Fred Sanborn, and defeated Walter Vigelhart by inches in the weekly point race at five miles, covering the distance in fifteen minutes.

TRADE ASSOCIATION MEETS

ST. LOUIS, Mo.—The St. Louis Cycle Trades Association, which was organized in this city last fall for the purpose of securing the co-operation of all the trade men in St. Louis with a view to arousing greater interest in both motorcycle and bicycle activities, will hold a called meeting on Sunday, Feb. 27, at the Rock Springs Turner Hall. All local manufacturers, jobbers and dealers are invited to attend.

CHICAGO CYCLE SUPPLY CO. HAS RAPID INCREASE

CHICAGO, Ill., Feb. 21.—The Chicago Cycle Supply Co. reports that its business for the month of January just past showed an increase of 26 per cent. as compared with January, 1915. The company has found the demand for its products picking up at an amazing rate during the last few months, and bulletins from various parts of the country indicate that the pace will continue.

Officials of the company, in conversation with a staff representative of **Motor Cycle Illustrated** a few days ago, stated that 1916 ought to be a memorable cycle year from all angles.

BECK DOUBLES ORDER FOR ROGERS SIDECARS

NEW YORK, Feb. 19.—Irving Beck, Eastern representative for the Rogers Mfg. Co., maker of Rogers sidecars in Chicago, Ill., has changed his order of one carload shipment for March 1 to a double carload. The majority of cars in these shipments will be for Indian and Excelsior models.

"Weather has no effect on the sale of sidecars in New York," says Beck. "In 1914, if it snowed there would hardly be any outfit seen on the road. Now, they ride, snow or fair weather, and there are more and more of them out all over the country; 1916 will be a huge sidecar year."

NEW FACTORY STARTED FOR DIMMER GOGGLES

CHICAGO, Ill., Feb. 21.—The Chicago Eye Shield Co. is building a new three-story factory, with 22,500 square feet of floor space, at Oakley and Warren streets, on the West Side.

The company's business has expanded so rapidly in the past year that it became absolutely necessary to provide more room, and the new factory structure is the outcome of the firm's determination to give its patrons the best service possible. The building will have 78 large windows to each floor, thus providing plenty of natural light. The building will be 60 x 125 feet in area.

The company counts upon moving into the new quarters about April 1 in order to catch up with the orders for Dimmer goggles.

FISK RUBBER CO. ADDS TO CINCINNATI QUARTERS

CINCINNATI, O.—The Fisk Rubber Co., now located at 816 Main street, has made arrangements for larger quarters, having entered into a six-year lease on its present store with an additional building in the rear for the service station. With the additional space, the company will have much better accommodations than at present and a larger stock can be handled and customers given better service.

CREVISTON VISITS WIGWAM IN SPRINGFIELD

SPRINGFIELD, Mass.—Ray Creviston, the midget speedster from Marion, Ind., was a recent visitor to the factory of the Hendee Mfg. Co. He floated in to call on the various department heads, and to renew acquaintance with the riding boys who are working in the factory this winter. Crevy is now conferring with promoters, who expect to stage some big races this season, and will soon be in riding togs on the track once more.

INTERESTING CONTENTS IN FIRESTONE MAGAZINE

FIRESTONE factory and sales topics, both useful and personal, take up most of the February issue of *The Firestone*, a monthly house organ issued by the Firestone Tire & Rubber Company, of Akron, O. Practically all the branches are covered in this magazine, as well as the different departments of the big factory in Akron, and there are excellent illustrations throughout its pages. Two novel features are the first Firestone and the oldest repairman and a photo of the twenty-five men who composed the factory force thirteen years ago.

ENJOYING THE WINTER SIDECAR OUTING

Pair of Dubuque, Iowa, Enthusiasts Traversing Snowy Roads with Runner-Equipped Harley-Davidson Combination

U. S. TIRE CO. DONATES TO WHEELING M. C.

WHEELING, W. Va.—The local branch of the United States Tire Company has donated a chain tread tire, and will furnish all the posters for the races and all the stationery of the Wheeling M. C. during the 1916 season. This action on the big tire firm's part has been duly appreciated by the organization. The club has ordered a supply of pennants for the new season, these being old gold and blue, the club colors. The pennants will be carried on all endurance, sociability and cross-country runs.

Emory Herrold, a member of the Wheeling M. C. and one of the best-known local trackmen, has left this city for Springfield, Mass., to work with the Hendee Mfg. Co. during the rest of the winter. Herrold will get well acquainted with Indian mounts, and in the Spring will start out on the track for the Wigwam.

MOTOR WHEEL APPEARS AT MANY SHOWS

MILWAUKEE, Wis., Feb. 21.—The Smith Motor Wheel has appeared in many shows during the winter, and is now "booked up" for display at a show to be held in Brooklyn, N. Y., during the week of March 8. Dealer A. H. Patterson will have charge of the Brooklyn exhibit, which is to include a cut-away motor and a parts board.

The motor wheel attracted much attention at the Wisconsin Retail Hardware Dealer Show, held in the Milwaukee Auditorium, Feb. 3, 4, and 5, and many dealers were signed up as a result. The following dealers exhibited the motor wheel at various shows: Hall-Williams Co., distributors for Minnesota, North and South Dakota, Grand Forks, N. D., Auto Show; J. S. Roler, Nashville, Tenn., Auto Show. Among the dealers who will exhibit motor wheels at local shows are: L. W. De Lye, Grand Rapids, Mich.; Hall-Williams Co., St. Paul, Minn.; G. K. Westing, Indianapolis Cycle Show. The factory will arrange for an exhibit at the Milwaukee Show.

BALDWIN NOW WESTFIELD ASSISTANT MANAGER

WESTFIELD, Mass.—The Westfield Manufacturing Company, maker of Pope motorcycles and bicycles, has created the office of assistant manager and appointed Frank E. Baldwin to fill it. The new office was found desirable by reason of the remarkable growth of the firm's business in all branches.

Mr. Baldwin is thoroughly familiar with every phase of cycle manufacture, having been identified with this and allied industries for the past twenty years. Originally connected with the Crawford Bicycle Company and the resulting American Bicycle Company, he successively held the positions of production manager of the Willys-Overland Company, assistant superintendent of the Pope-Hartford Company, and assistant to the general superintendent of the Packard Motor Car Company. It was this latter position that he resigned in order to accept his appointment in Westfield.

In assisting Mr. Fogarty, secretary and manager, Mr. Baldwin will devote most of his attention to factory problems and the betterment of the product and service of his company.

REAR CARS CLASSED WITH SIDECARS IN CONN.

HARTFORD, Conn., Feb. 17.—Cygnet Rear Cars are classified with sidecars in Connecticut and pay a $5 fee, according to a recent ruling by the Motor Vehicle Department of the State. This ruling is given in a letter from Secretary C. D. Burnes to the New York Sporting Goods Company, metropolitan distributors for Cygnet products. Secretary Burnes' letter follows:

"It will be necessary to register the motorcycle with rear car attachment in the same class as the motorcycle with sidecar attachment, for which the fee is $5. The motorcycle may then be used with or without the rear car attached."

'FRISCO LEAP YEAR PARTY IS HUGE SUCCESS

SAN FRANCISCO, Cal., Feb. 20.—The feminine members of the San Francisco M. C. staged the most successful social in the history of the organization recently. The affair was a "Leap Year Social" and the fair members managed everything. Following the custom at Leap Year affairs, they invited the male members to dance, took them to supper, etc. All hands enjoyed themselves to the full.

There were 14 new members initiated on the evening of the Leap Year party, thus bringing the number to 100 in all. A booster's committee was appointed by President Meyer and an effort will be made to double the membership before the end of the season.

READING CLUB IS SEEKING MORE MEMBERS

READING, Pa.—The Reading M. C. has opened its charter for new members. Sales by motorcycle dealers indicate that there will be a big crop of new riders this season and an effort is being made by the club to get all of them in.

The club is arranging for its fifth annual banquet to be held at Mineral Springs Hotel on February 25. L. P. Allen, J. G. Neubling, James Mayo, William Buell and A. B. Rhode are on the committee in charge. A smoker is slated for March 17.

POOR ATTENDANCE AT BI-MONTHLY RUNS

NEWARK, N. J., Feb. 21.—The New Jersey M. C. is having a hard time running off the scheduled bi-monthly runs this winter. Old Jack Frost has taken a delight in gumming the works every Sunday a run is to be held and while no runs have been postponed to date, only sidecar drivers brave the cold and snow.

39 FINISH 270-MILE FRISCO RUN

With Ideal Weather and Fine Roads These Endurance Riders Had Little to Bother Them; Excellent Work by Sidecar Crews

SAN FRANCISCO, Feb. 21.—There were 48 starters in the 270-mile endurance run of the San Francisco M. C. yesterday, and 39 finished. The secret control at Milbrae was responsible for practically all of the lost points.

Following are the scores of the finishers: F. Karslake and Mrs. Karslake, Harley-Davidson combination, 1000 points; E. Garrigues and Dudley Perkins, Harley-Davidson combination, 1000; Firestone team—J. Fennell, Reading Standard, 1000; Ed. Laudenclos, Henderson, 1000; S. Slosson, Harley-Davidson combination, 972; W. Reinholm and L. Corlis, with Harley-Davidson tandem, 1000; F. King, Excelsor, 1000; C. E. Stone, Cyclone, 1000; Paul Casselli and C. E. Oberg, with Indian combination, 1000; "Brick" Wedell, Excelsior combination, 1000; C. H. Northrup and G. Dufoot, of San Jose, with Indian tandem, 1000; J. Hulfe, Thor, 1000; L. G. Shaw, Harley-Davidson, 1000; R. E. Kruger, Indian, 1000; F. Boegel, Indian, 1000; C. T. Lutgen, Indian, 1000; W. C. Scheuer, Indian, 1000; San Jose Harley-Davidson team—M. Norns, F. Gottrell, H. Manchester, 1000; San Jose Indian team—Ed House, Ben Torres and "Doc" Eddy, 998; T. Sennis, Indian, 998; C. Gosney, Indian, 998; Volney Davis, Indian, 998; G. F. Farrotto, Harley-Davidson, 996; C. A. Lewis, Indian, 995; R. H. Polley, Indian, 994; C. T. Bullhouse, Indian, 992; L. Howard, Indian, 992; A. Hole, Excelsior, 984.

L. H. Spicer, Harley-Davidson single, was disqualified for being too far ahead of the schedule.

GLENN CLEANS PLATTER IN AUGUSTA MEET

AUGUSTA, Ga., Feb. 22.—Harry Glenn, Atlanta, astride an Indian single, won all the motorcycle races held here today. His daring riding pleased a big crowd.

Eddie Wilcox, of Atlanta, mounting an Indian, won second place in every event, thus making it an out-and-out Wigwam day. The summary:

Three miles—Glenn, Indian first; Wilcox, Indian, second; Cassells, Harley-Davison, third. Time, 3:50.

Five miles—Glenn, first; Wilcox, second; Cassells, third. Time, 7:25.

Fifteen miles—Glenn, first; Wilcox, second; DeMonte Moreland, Harley-Davidson, third. Time, 19:07.

Five miles—Glenn, first; Wilcox, second; Cassells, third. Time, 3:45.

ORDERS 80 TWO-STROKES FROM EXCELSIOR CO.

CHICAGO, Ill.—An order for 80 two-stroke lightweights has been received by Sales Manager Fred B. Mathis, of the Excelsior Motor Mfg. & Supply Co., from E. F. Merry, Excelsior distributor in San Francisco and Los Angeles. Merry desired the full order to be shipped on February 16 and 80 Baby Excelsiors are now on their way to Frisco. They were shipped on Wednesday the 16th, as Merry requested.

OGDEN SIGNS UP NINE NEW CYGNET DEALERS

NEW YORK, N. Y., Feb. 21.—Sales Manager Leadley Ogden, of the Cygnet Rear Car Company, has just returned from a flying trip to Washington, Baltimore and Philadelphia, in which cities he signed up nine new agents and secured orders for the immediate delivery of nineteen Cygnet rear cars.

In Washington, Osborn & Leishaar, the local Indian dealers, and Charles Sonne, the Reading-Standard agent, contracted to handle the Cygnet. While riding his outfit through the streets of the Capital City, Mr. Ogden was hailed by a stranger who wanted a demonstration. After a short ride he insisted upon buying the demonstrator, which was sold to him together with a new Indian machine, through Osborn & Leishaar.

Though lacking a demonstrator and having but five hours to spare in Baltimore, the Cygnet sales manager nevertheless succeeded in adding three more dealers to his growing list in the Oriole City. These are The Heinz Motor Company, Harley-Davidson, the Excelsior Motor & Supply Co., and J. F. Kitz, Emblem.

In Philadelphia, Max Sladkin, of the Haverford Cycle Co., contracted to represent the Cygnet rear car in all of his eight stores and ordered demonstrators for each of his establishments. Alexander Klein, Harley-Davidson, George Maslin, Indian and Chas. Krause, Thor, will also handle the Cygnet in Philadelphia.

Immediately after his return from his tri-city trip, Mr. Ogden left for Chicago.

RAIN BALKS PHOENIX PHANS

PHOENIX, Ariz., Feb. 22.—The motorcycle race meet, for the benefit of Moose Sanitarium, which was scheduled for today, was postponed till Sunday, Feb. 27. Rain spoiled the track for speed work today.

STEVENS SIDECAR HAS 100 POUNDS CAPACITY

STEVENS & CO., of 375 Broadway, New York, is producing the Stevens Service Side Car, adaptable to any bicycle. It combines the capacity of the ordinary hand cart with the recognized convenience and economy of the bicycle. Loads up to 100 pounds can be readily carried in it.

The Service car has a frame of cold-drawn seamless steel tubing, rectangular in form. The front connection is arched to attach by a special fitting to both the top tube and diagonal tube. The wheel is built up of heavy spokes and has a steel rim with Goodrich tire. The body, measuring 24 inches long, 16 inches wide and 14 inches deep, is mounted on spiral springs at each corner, absorbing all road shocks.

With this vehicle an inexperienced boy can deliver a lot of goods with safety and despatch. The weight is evenly distributed and there is no danger of skidding or upsetting on rough and slippery pavements.

The car comes in two models. Model R has a rattan hamper with strong hinges and metal clasp. Model W is fitted with a waterproof box in superior black coach finish and has the top covered with waterproof duck. It is fitted with a metal clasp. The firm can supply a brass lock with leather-covered chain which secures both the side wheel and the cover of the hamper.

The Stevens Service Side Car weighs less than 20 pounds complete and is narrow enough to pass through an ordinary door.

FREIGHT RATE VICTORY FOR COAST DEALERS

LOS ANGELES, Cal.—The Interstate Commerce Commission, at Washington, D. C., has rendered a decision reducing rates on motorcycle shipments from Eastern motorcycle factory points to the Pacific Coast from $4 to $2.50 per hundred and ordering rebates of $1.50 per hundred to dealers on all shipments made during the past two years. No rebates will be paid, however, to dealers who did not pay the $4 carload rate which was in effect prior to December 1, 1913.

The saving to Pacific Coast dealers by the new rate will be something over $20,000 annually, it is figured. The rate applies to carload shipments of not less than 17,500 pounds. The present less-than-carload rate is held by the Commission to be reasonable. The rebates will amount to $24,000 in Los Angeles alone, it is estimated.

The decision by the Commission is a source of much joy to the Coast trade, as it represents the successful culmination of a very hard-fought case before the Commission. It was known as the "Los Angeles Motorcycle Case" and was instituted by W. H. Whitesell some seasons ago. After languishing for a long time, legal proceedings were resorted to and the result was the reduction order from the Commission.

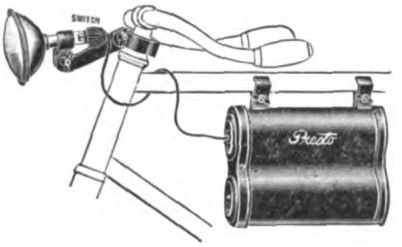
On March 1 a new schedule of rates for bicycle frame shipments in less than carload lots will be in force. Up to a minimum of 25 per cent. of a carload weight of 17,500 pounds, bicycle frames may be shipped to Los Angeles at $2.62 per cwt. and to San Francisco and San Diego at $2.50 per cwt. Smith Motor Wheels are included in this classification. This is a reduction of nearly $5 per cwt. in some cases.

CONTINUE WITH EXCELSIOR

DARTMOUTH, N. S.—C. G. Walker & Company, Dartmouth, one of the largest motorcycle firms in the Maritime Provinces, have renewed their contract for Excelsiors and expect to sell twenty-five machines this season.

NOVEL ADJUSTMENT ON THIS ELECTRIC LAMP

BICYCLE lamps in eight different models to suit the tastes of all riders are produced by the Metal Specialties Mfg. Co., of 730-738 West Monroe street, Chicago, Ill. The illustration shows one of the leaders, a greatly improved model of electric cycle lamp with Anchor Ediswan



switch type of plug connection and heavy universal bracket which will fit securely on any machine. The source of current is two standard No. 6 dry cells.

The reflector is made of highly polished nickel-plated brass and the tungsten bulb is accurately focused to give maximum efficiency. The four-inch bulls-eye lens produces the powerful penetrating search light required by all cyclists. There is a ready means of adjusting the reflector by means of small thumbscrews, to any angle, up or down, and it can be set permanently in any position desired. It is furnished with sufficient wire to carry the current from the battery to the lamp head.

The battery container is highly finished in black enamel and is an ornament to any bicycle. It is firmly held in place by two metal clamps which are felt padded so that they will not mar or scratch the enamel finish on the bicycle frame. The container cannot rattle or swing as when fastened with leather straps. There is absolutely no danger of short-circuiting.

SIDECAR IS ENJOYING A BOOM IN CANADA

TORONTO, Ontario.—According to business reports to the Canadian representative of **Motor Cycle Illustrated**, fifty per cent. of the motorcycle sales in Eastern Canada during the past two weeks or so have included sidecars. Some dealers in Toronto report that three out of five purchasers of standard motorcycles have bought sidecars. Another feature of recent sales has been that over thirty per cent. of motorcycles sold have been equipped with electric lights.

20,000 SQUARE FEET IN SIZE

In the advertisement for the Excelsior Motor Mfg. & Supply Co., for our February 17 issue, the space occupied by the shipping department was given as 2,000 square feet. This should be 20,000 square feet, as obviously, the Excelsior output of 300 motorcycles per day could not be handled in the small area mentioned and the floor cleared for the succeeding day's shipments.

MORE TERRITORY FOR BRANCH

PHOENIX, Ariz.—The local branch of the Fisk Rubber Co. has had its territory extended to cover New Mexico and southwestern Texas. Formerly the branch cared for Arizona business only.

THREE-SPEED FEATURED IN FEBRUARY "DEALER"

DETAILED descriptions of the Harley-Davidson three-speed gear, with the best method of dismounting and disassembling it, is the feature article of the February issue of the *Harley-Davidson Dealer*, the house organ of the maker of the Silent Gray Fellow in Milwaukee, Wis. The various steps in the process are clearly outlined, and the tools best adapted to the work are described and illustrated. A series of motor suggestions is another valuable article in the book.

There are pictured standard forms of receipts for dealers, as well as service certificates, and the matter of service is discussed briefly but thoroughly. General news of the agencies occupies the remainder of the space within the covers. On the back cover is an excellent article on educating the rider.

AIRLESS TIRE CARRIES 8,000-MILE GUARANTEE

LONG mileage and comfortable riding are features of the Dayton Airless tires, the product of the Dayton Rubber Mfg. Co., of Dayton, O. This tire, known as the Motorcycle Special, is of unique construction and carries a guarantee for 8,000 miles. It will fit any 28 x 3 standard C. C. rim. As regards the riding qualities, the Airless tire has been found in repeated tests by the company to ride as comfortably as a pneumatic tire of the same size and profile. It resembles a regular pneumatic tire when on the rim.

The Dayton Airless tire consists of a casing within which are a series of rubber "piers" and an annular "beam" of fabric and rubber of great strength. The rubber piers are of heavy stock and give radial strength to the tire, while the beam prevents distortion circumferentially. The space between the piers allows them to distort under load to absorb obstructions in the same manner as a pneumatic tire.

The construction is by no means new, as it has been tried out and proven effective in automobile service during the past seven years. It is only recently that the motorcycle tire has been put out, and this

Dayton Airless Tire

after a year of hard testing. The mileage of 8,000 under the guarantee has been frequently exceeded on a number of machines and the average has been considerably above the guarantee.

With the Airless construction, punctures do not bother the user, as there is no air under pressure to leak out. There is also no chance of a blow-out for the same reason. The long mileage secured from these tires is claimed to make them cheaper per mile than other types. The list price is $22.50 f. o. b. Dayton.

Pope Sidecar Combination with Which Senor Santos Beirao, Pope Distributor in Lisbon, Portugal, Made a 1,630-Mile Run to Show Dependability

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

KOSSE, Texas.—A. J. Jennings is handling bicycles and bicycle and automobile accessories in this city and is desirous of receiving manufacturers' catalogs.

GLENWOOD, Minn.—Gordon & Gondrud have opened an implement store and are requesting catalogs on lubricating oils and automobile accessories.

WYNNEWOOD, Okla.—The Keys-Mitchell Hardware Company requests catalogs on bicycles, small tools and lubricating oils.

CEDAR HILL, Tenn.—Catalogs on bicycles and lubricating oils are desired by the Draughton & Gossett Hardware Company.

AUGUSTA, Wis.—E. A. Ringhand has succeeded to the implement business of A. C. Mohr, and lubricating oil catalogs are requested by the new proprietor.

BARRON, Wis.—C. V. Anderson & Sons are desirous of obtaining catalogs of bicycles and accessories and small tools.

MARSHFIELD, Wis.—The Marshfield Hardware & Auto Company has just been incorporated and requests catalogs of bicycles, tools and lubricating oils.

CHESTER, Vt.—Bicycles and bicycle accessories are handled by A. W. Harvey, of Main and School streets. Catalogs in these lines are requested.

GILLESPIE, Ill.—Bicycle and accessory catalogs are wanted by the Gillespie Hardware Company of this city.

BUTLER, Ind.—L. A. Pugh is anxious to get in touch with bicycle and accessory manufacturers and asks that catalogs of these goods be sent.

ANITA, Ga.—The Farmers' Supply Company, dealing in general merchandise, is asking for bicycle and accessory catalogs.

CEDAR RAPIDS, Iowa.—F. J. Stenck & Company desire to receive bicycle and bicycle accessory catalogs from manufacturers.

CLARINDA, Iowa.—George M. Lathrop, of this city, wishes to get into touch with makers of bicycles and bicycle accessories. Catalogs are requested.

PRATT, Kan.—The Tye Hoppe Hardware Company is dealing in bicycles and wishes to obtain catalogs from the manufacturers.

LONG RUN PROVES POPE'S STAYING POWERS

LISBON, Portugal.—Senor Santos Beirao, distributor for Pope motorcycles in Portugal, has just completed a 1,630-mile run to demonstrate the endurance qualities and power of the Pope machine. Carrying a sidecar passenger and one on tandem, Marlo Beirao, son of the distributor, drove a Model R-15 from this city through Coimbra to Vianna de Castello and back via Villa Real, Visen, Guarda Castello Branco and Santarem to Lisbon. Only some minor repairs were made during the run and the success achieved has greatly aided the sale of Popes in this country.

CLIMBS ICY MT. PENN WITH THOR COMBINATION

READING, Pa.—George L. Dengler and C. R. Lenich, of the Berks M. C., recently climbed Mt. Penn., just above this city with their Thor sidecar combination, following the recent heavy fall of snow. The snow was up to the footboards in many places and ice coated most of the winding surface to the crest. The road winds around the peak and is several miles long. Dengler's outfit is a 1916 twin of 12 horsepower with Rogers sidecar.

NEW DISTRIBUTION PLAN IS WORKING WELL

KANSAS CITY, Mo.—A carload of Indian motorcycles recently reached this city. Its contents are now stored at the warehouse of the D. A. Moore Storage Co. and are subject to the order of A. Crocker, chief of the sales division of the Hendee Mfg. Co., Grand Avenue Temple Building.

Since the abolition of the factory branch in Kansas City, this method of distribution is being used throughout the territory. Special arrangements have been made by the company in regard to collections and the form in which they are to be made. C. Hanson, the local Indian agent, says that the new plan is much more to his liking than the establishment of a branch house.

CELEBRATING VALENTINE'S DAY AT MILWAUKEE M. C.

Members and Guests of Live Wire Organization in Wisconsin Metropolis Assembled at Clubhouse to Enjoy Dance and Entertainment on February 14

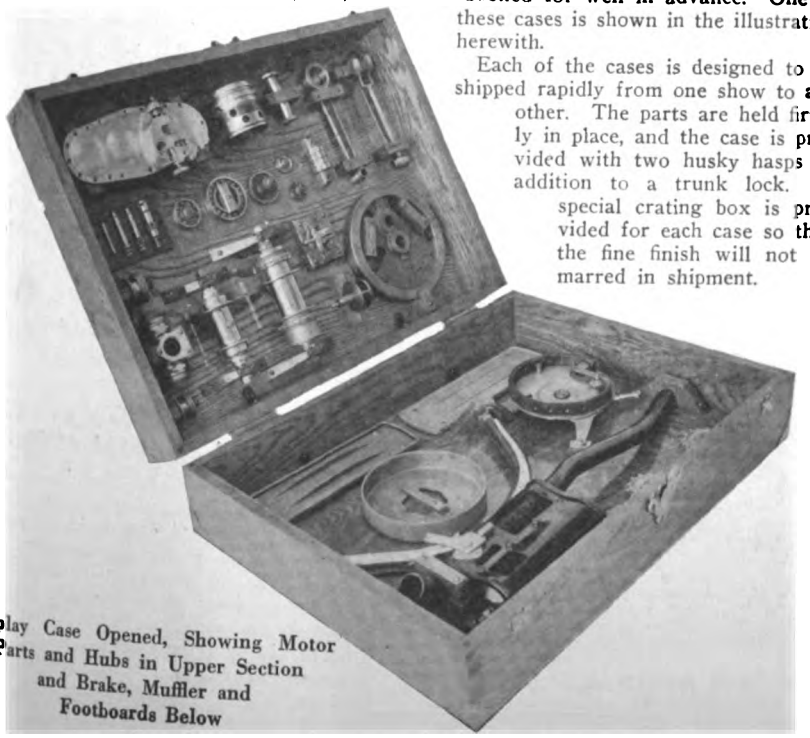
HARLEY-DAVIDSON HAS NEAT SHOW CASES

Display Layouts from Big Motorcycle Maker are Developed to Co-operate with Dealer in Local Exhibitions

THERE has been a general tendency on the part of manufacturers to recognize the value of the local shows in awakening the interest of the general public in the motorcycle, and manufacturers have done much to co-operate with dealers in getting the best results from these exhibitions. The co-operation takes the form of special layouts of tools, parts, etc., as well as special literature and advertising.

One firm in particular, the Harley-Davidson Motor Company, in recognition of the value of the small show, has recently prepared six display cases of parts especially made up for local exhibitions. There are only six of these cases, just enough to take care of the shows scheduled, and all have been booked for well in advance. One of these cases is shown in the illustration herewith.

Each of the cases is designed to be shipped rapidly from one show to another. The parts are held firmly in place, and the case is provided with two husky hasps in addition to a trunk lock. A special crating box is provided for each case so that the fine finish will not be marred in shipment.



Display Case Opened, Showing Motor Parts and Hubs in Upper Section and Brake, Muffler and Footboards Below

The mechanical oiler, in the upper left hand corner, has been cut away to show the operating mechanism, and is provided with a knob to "see the works move." The brake in the lower half is similarly mounted to demonstrate the double-acting feature. There is an exhaust pipe with a section cut away and a sectional muffler.

These cases have been enthusiastically received by dealers wherever sent, and have done much to increase sales in each instance. The display cases are the most recent additions to the many devices and methods of the Harley-Davidson folks in co-operating with their dealers.

QUEBEC CUSTOMS TO BE OPEN TILL MIDNIGHT

SHERBROOKE, Que.—The Customs Department of the Dominion of Canada in this city will give service till midnight at the ports of Stanhope, Rock Island and possibly Mansonville, for the benefit of tourists entering and leaving the Eastern townships.

This will do away with all annoyances which existed when the customs service closed at sunset and will be well appreciated by American motor vehicle tourists.

"BILL" WAS A QUICK CONVERT

Editor Motor Cycle Illustrated:

I let "Bill" take a few copies of your valued magazine, and it gives me great pleasure to send you enclosed herewith two dollars for a year's subscription to Motor Cycle Illustrated. "Nuf sed."

EXCELSIOR CYCLES HAVE SPECIAL CONSTRUCTION

Curved Bar Model with Single Top Tube and De Luxe Motor Bike Are Built for Hard Service and Are Light-Running—High Quality of Workmanship in All Models

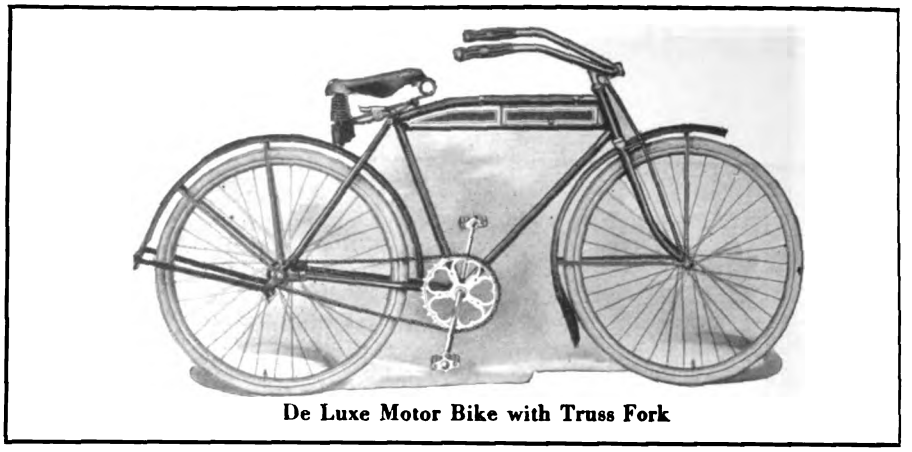
AMONG the many models of bicycles offered by the Excelsior Cycle Co., of Chicago, Ill., are two on which the company has specialized for the 1916 trade. The first of these is a curved bar machine with a single top tube, while the second is the De Luxe Motor Bike, especially adapted for use with the Smith Motor Wheel. Both models are of sturdy construction and, while easy running, will stand up under gruelling service.

The curved bar model has a diamond frame with a curved top tube. The curve is gradual and graceful, without short bends. The frame is made from 18-gauge Shelby tubing, heavily reinforced at all connections. Main frame tubes are one inch in diameter. Head fittings are motorcycle type, insuring great strength and wearing qualities. The seat post cluster is of the pinch-bolt type with nickeled bolt, nut and cap washer.

Fork and Hanger Construction

Carrying out the hard service construction, the front fork is of the truss type with 18-gauge fork-sides and special drop-forged crown. The hanger is the Excelsior one-piece model, with large cups, cones and balls. The hanger, while made for heavy service, is accurate in workmanship and has large bearings, making for extra light running. The adjustment is accurate and positive. The sprocket is of the De Luxe pattern, with either 26 or 30 teeth and has a width of 3/16-inch for motorcycle type roller chain.

The mudguards are extra wide and heavy with front extension and nickel-plated flat steel braces. One brace supports the extension in front of the fork. Tires are De Luxe extra heavy studded, 28 x 1½ inches and fully guaranteed. Pennsylvania Sturdy Studs of single tube type are supplied as an option. The handlebar is of the English box bar pattern, 22 inches wide and with a six-inch rise. The stem is adjustable and of the forward extension type. Standard finish is carmine frame with ivory white head and seat mast tube. Several color combinations are listed as options. The price is $40. This model is the only single-bar cycle on the market giving the motorcycle riding position.

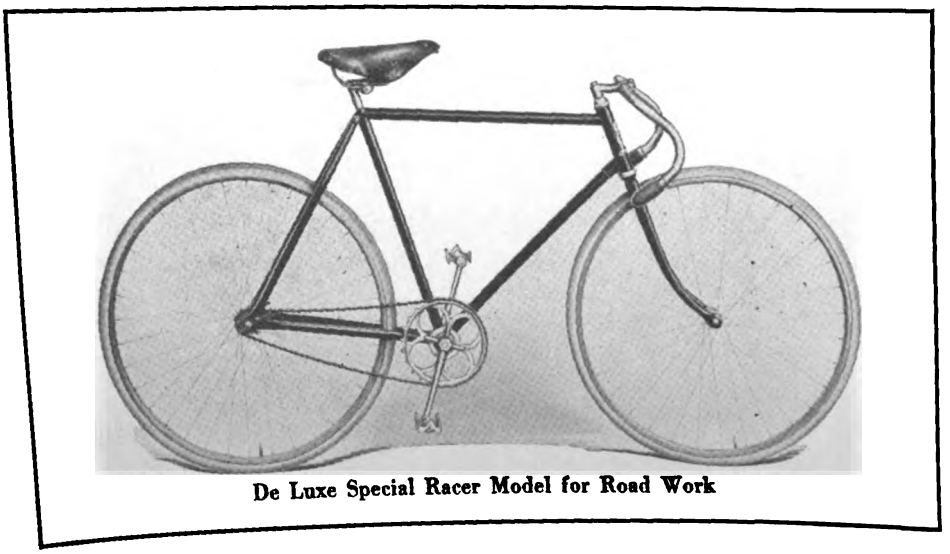


De Luxe Motor Bike with Truss Fork

The De Luxe Motor Bike, designed for Smith Motor Wheel service, is built with a long wheelbase, trussed front fork and special reinforced frame. This machine has been specially designed to meet the various strains incident to the use of the side drive. The standard finish is carmine, handsomely striped.

Other standard models of the Excelsior line are the well-known De Luxe Auto Bike, the Excelsior single-bar and the double-bar types, the special racer and various juvenile and ladies' machines.

The Excelsior Cycle Company is now located at 166-168 North Sangamon street, but so rapid has been its growth that a new and finely-equipped plant is being built for the factory at Michigan City, Ind. The firm will shortly move into this plant, leaving the offices and sales department at the present location during 1916.



De Luxe Special Racer Model for Road Work

THOR LIGHTWEIGHTS GOING TO PACIFIC COAST

CHICAGO, Ill., Feb. 21.—H. N. Kirk, sales manager for the Thor, has received an order for a carload of Thor twin lightweights for the Pacific Coast branch in San Francisco. The shipment was made on February 18. A second lot of 20 lightweights was shipped on the 17th.

Manager Kirk has also been notified that the Akron, O., police department has ordered three big Thors from the Century Cycle Co., Akron representative. The Akron department has been using Thors for the last three years.

The Motorcycle Sales Co., of San Francisco, is one of the recent additions to the big Thor list of agents.

EXCELSIOR BUSINESS KEEPS McBRIDE ON THE JUMP

TORONTO, Ontario.—A sample of business activity in Canada is seen in a statement of 1916 sales by Percy A. McBride, the Toronto distributor. So far this year McBride has imported 65 Excelsiors, including lightweights, from Chicago, but he has secured contracts for 340 Excelsiors for future delivery. He has also imported 48 Henderson motorcycles so far and has already sold 120 throughout his territory. He has also disposed of six Miami Power Bicycles.

McBride has also imported 45 Rogers sidecars and has future orders for many more. He is keeping Rogers sidecars in stock for Hendersons, Excelsiors, Harley-Davidsons, Indians and Thors.

One Saturday recently McBride sold seven motorcycles from his floor and all were Excelsiors. During the week he had sold five Hendersons, three fitted with Rogers sidecars and two equipped with electric lights.

He is keeping Harold Pratt, his travelling representative, on the road all the time to look after outside business.

WESTING TO SHOW F-N PRODUCT AT INDIANAPOLIS

DETROIT, Mich.—The Fentress-Newton Manufacturing Company, of Lafayette Boulevard, has made arrangements with the G. H. Westing Company, of Indianapolis to display F-N tandems and other products at the Westing booth during the Indiana Cycle Show. The Westing-firm will have the exclusive display of F-N goods at this exhibition from February 24-26.

Trade and Sport in England

LONDON, England.—Everybody who has been at the front tells one tale—how uniformly and universally useful are motorcycles and bicycles, as well as the big cars. There are novelties as well as sensations. It is, for instance, pretty well known that by this time a British military bicycle, of folding pattern, is made by the B. S. A. company and that it has proved perfectly reliable. Years ago, one saw the French and Italian army cyclists with such "velos," but in this country they were looked at askance, as if military men would need a bicycle which folded up for ease of transport.

However, we've learned something since August, 1914. Very few in this country have seen a British folding bicycle and many an agent would give a few dollars for the loan of one as an eye-catcher to help his window display. We shall be seeing plenty by-and-by; the sooner, the better.

A Narrow Squeak

As regards bicycle sensations at the war front the experience of a captain friend of mine in a Scottish regiment will take some beating. He was cycling to examine some telephone wires when he heard a shell coming. Dropping off his bicycle he ran to what he thought was a safe point. On returning after the burst, all he found of his mount was one spoke and part of the saddle. Nuff sed!

The Smith Motor Wheels of America seem to be pretty much what the Auto Wheel invented by Wall over here is to Britain. I figure that it is about the pick of the bunch for motor-assisted bicycling. Parenthetically, let me say that quite a big effort is being made over here to boom this species of bicycling or motoring and the game is well worth boosting. There is plenty of sport and exhiliration with these motor-aids to bicycling. I have encountered parties of Auto Wheelists in the hilly country of Wales and every man and woman spoke highly of the accessory. In places like Chester, Leamington and the Shakespeare Country generally, and in seaside resorts the Auto Wheel does useful service in a small way, but I count more on the jolly fine results I have observed in hilly touring areas such as North Wales. Both the Auto Wheel and the Motor Wheel will do one thing: they will prove the pleasures of motoring to many who hesitate to transfer from pedal-pushing to autocycling.

Auto Wheel for Gallipoli

You may be interested to know that, just as the Smith is reported to have won favor amongst those who are charged with the success of the U. S. Army, so the Auto Wheel is understood to have convinced somebody over here that it is to be used by the military in Gallipoli. It looks almost incredible. One would have thought that the powerful Indian, Harley-Davidson, Clyno, Triumph or some crack brand of motorcycle would have been suitable for the hilly country that impinges on the Dardanelles and the Aegean Sea.

Some time ago this paper reproduced pictures of the Scott motorcycle with machine gun equipment in lieu of the ordinary sidecar and passenger. It has been long an open secret that the motorcycle gunners have done great service on the Western front, but seeing that the Scotts are water-cooled, one British writer protests against their being employed also, in Gallipoli, on the ground that it is bad enough for me and beasts and big cars to get water without having to find a few gallons for motorcycles. The Scotts are the only water-cooled type on active service.

Scott Three-Wheeler

W. A. A. Scott, the genius who gave the Scott motorcycle to the world, showed me two or three years ago—just before the present big works at Saltaire were opened—a special three-point frame which he had for attaching a sidecar to a motorcycle. It was intended to be mechanically as near perfection as possible. Now, he has evolved a three-wheeled vehicle that is a go-between the motorcycle and the light car or cyclecar. It isn't big enough to be classified as a cyclecar and some folks argue that it is more than a motorcycle-plus-sidecar. Well, we had some lovely squabbles a while back about engine capacity, car weights, etc., in order to secure an acceptable definition for a cyclecar and nobody will forgive the motorcycle designer if he revives the bogey. Meanwhile, to business: the tricar, as one may call it for simplicity (or is it a tricarcycle or a tricycle car?) has a low, underslung frame, with a Scott engine mounted on one side of it, this driving the back axle through a propeller shaft. The single front wheel is aligned with the right-hand rear wheel—as in a regular motorcycle, of course. The crucial feature of the new mount is the location of the engine.

Sidecar Arguments

Thousands upon thousands of times at big meets in Britain has the argument gone forth that the motorcycle with sidecar is a mechanical monstrosity, the "pulled" weight of the sidecar and passenger providing an undue and forced strain on the engine. But thousands of times, also, the retort has been uttered: "Look at the perfect pleasure that sidecar motorcyclists give and the rarity with which anything goes wrong. In fact, I challenge you to bring forward a case of engine or frame distortion due to the weight of the sidecar being on one side."

The Designer's Motive

It is a fact beyond argument that the sidecar has been a wonderful success, but equally is it a fact that expert engineers and mechanics didn't like the idea. Hence, I suppose W. Scott, realizing that the sidecar was a delightfully popular motor medium, brought out his new type of frame—to eradicate the objectionable in design, while retaining the benefit of the motorcycle with sidecar. At any rate, the Scott offering seems assured of a welcome.

Looking Down the Stretch

February 24-26, Indianapolis, Ind.—Motorcycle and bicycle show at Tomlinson Building.

February 29.—All parts of the United States—BICYCLE DAY.

March 19, Wheeling, W. Va.—Run to St. Clairsville, O., and return of Wheeling M. C.

March 27-April 1, Manchester, N. H.—Annual motor show.

April 12, Springfield, Mass.—Spring meeting of the Motorcycle Manufacturers' Association.

April 16, Fresno, Cal.—100 mile free-for-all race under direction of Fresno M. C.

April 30, Brooklyn, N. Y.—Annual spring run of Invincible M. C. to Southampton and return, 200 miles.

May 7, Jamaica, N. Y.—Endurance run of Jamaica M. C., to Patchogue and return.

May 7, Providence, R. I.—Annual run to Westerly of M. C. of Rhode Island.

May 21, Providence, R. I.—Annual photograph run to Roger Williams Park, M. C. of Rhode Island.

May 21, Harrisburg, Pa.—Endurance run of Keystone M. C. to Altoona, Shamokin, Pottsville, Reading and return.

May 27-28, Providence, R. I.—Week-end run of Providence M. C. to North Adams, Mass., and return.

May 28-30, Boston, Mass.—Three-day endurance run at Bay State M. C.

May 30, Roanoke, Va.—Race meet of Dixie M. C.

May 30, Wheeling, W. Va.—Race meet of Wheeling M. C.

May 31, Newark, N. J.—400 mile run, day and night of New Jersey M. C.

June 10-11, Worcester, Mass.—Fifth annual 24-hour endurance run of Worcester M. C.

June 18, 19, Wheeling, W. Va.—336 mile endurance run to Bedford, Pa., and return, of Wheeling M. C.

June 30, Wheeling, W. Va.—Sealed time run of Wheeling M. C.

July 2-3-4, Grand Rapids, Mich.—Michigan State F. A. M. reliability trial, under auspices of Grand Rapids M. C.

July 4, Roanoke, Va.—Race meet of Roanoke M. C.

July 4, Savannah, Ga.—Race meet of Savannah M. C.

July 4, Wheeling, W. Va.—Race meet of Wheeling M. C.

July 16, Wheeling, W. Va.—Tri-State endurance run and open house, distance 100 miles, Wheeling M. C.

July 30-August 12, Wheeling, W. Va.—Run to Atlantic City and return, 600 miles, of Wheeling M. C.

September 3, Harrisburg, Pa.—Endurance run of the Keystone M. C.

September 4, Roanoke, Va.—Race meet of the Dixie M. C.

September 6, Wheeling, W. Va.—30 mile road race of Wheeling M. C.

October 1, Providence, R. I.—Annual Triangle run, Providence-Boston-Providence of M. C. of Rhode Island.

November 13-18, Chicago, Ill.—National cycle and accessories show.

November 30, Wheeling, W. Va.—Hill climb of the Wheeling M. C.

December 4-9, New York—National cycle and accessories show.

ALBRIGHT AND ROTH ARE CRACK MOTOR SLEDDERS

ALTOONA, Pa.—Motor sledding has been a popular sport in Altoona for the last two winters, and the recent heavy snows have brought out numbers of devotees of this form of travel. Among the "veteran" bob-drivers are Ernest J. Albright and George Roth, both experienced motorcyclists as well as sledders. Albright won a number of contests during last winter and this winter. He appears with Roth in the accompanying photograph.

Albright's sled is of tee-iron construction, upon which is carried a Harley-Davidson twin motor and rear wheel on heavy steel supports. The driving wheel is supported on steel springs to permit the wheel to accommodate itself to the inequalities of the surface. A combination oil and fuel tank is mounted on uprights directly over the motor and spark, and throttle controls are fitted to the steering wheel.

George Roth's sled uses a Pope twin motor, for Roth is Altoona's Pope agent. The design is somewhat similar to that of Albright, but Roth's bob has a windshield and a mechanical oil pump operated by the mechanician alongside the driver. Recent speed tests showed that with a 3:1 gearing a maximum of 45 to 50 miles an hour can be obtained, on a level road. Both sleds are the handiwork of the drivers and are great sources of interest to all Altoonans.

NEW BILL WILL ABOLISH ALL SPEED TRAPS

BALTIMORE, Md.—A bill has been introduced in the Maryland Legislature for raising the motorcycle license fee from $1.80 to $3, among other changes. One of the provisions of the bill calls for the abolition of roadside speed traps and roadside courts, whose actions have been in the past most unfair to all road users.

If the bill passes, all justices of the peace having such authority will have to try speed cases and road violations in the regular court rooms, with every courtesy extended to the accused. The costs imposed by justices for their own services and for those of constables and deputies will also be limited. There will be a State-wide law, if the bill passes, which cannot be amended by any town or municipality.

1270 MACHINES ARE USED IN RHODE ISLAND

PROVIDENCE, R. I., Feb. 19.—According to figures just compiled by the State Board of Public Roads and announced here this week, there are 1,270 motorcycles in Rhode Island. Of these the city of Providence leads with 367, while Pawtucket, near Providence, comes next with 128. Newport ranks third with 106 machines registered, and Cranston has 62.

Westerly, R. I., has 26 motorcycles, and Woonsocket has 19. The remaining 562 are scattered through Washington, Providence and Kent counties. For its size the State of Rhode Island is one of the biggest users of motorcycles in the East.

WILL STOP CITY LICENSE

BUFFALO, N. Y., Feb. 21.—The motorcycle license clerk of this city has announced that should the State license for motorcycles become a law then the city would discontinue its city licenses. This will mean a loss of $2,000 to the city's coffers each year.

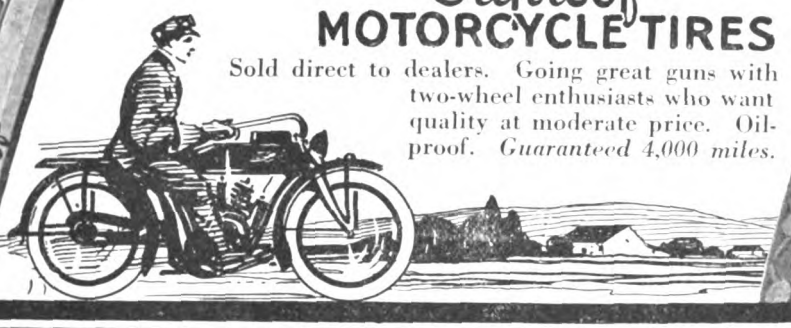
The Safest Tires for Fast Riding

The Fastest Tires for Safe Riding

VACUUM CUP Oilproof MOTORCYCLE TIRES

Built right up to Pennsylvania standards. The ultimate choice of users in quest of highest quality. A phenomenal seller, laster, performer.
Saves spills on slippery surfaces. Oilproof. *Guaranteed 5,000 full miles*, with a record of averages double the distance.



STURDY STUD Oilproof MOTORCYCLE TIRES

Sold direct to dealers. Going great guns with two-wheel enthusiasts who want quality at moderate price. Oilproof. *Guaranteed 4,000 miles.*

Pride of the Boys Who Bike

VACUUM CUP *Red Oilproof Tread* BICYCLE TIRES

In ever-increasing demand and piling up profits for their dealers. Longest lasting, sturdiest, safest-riding tires made. Puncture-proofed by the use of special 15½-oz. fabric strong as that used in most small auto casings.

Guaranteed Oilproof and for full trouble-free season, or repaired or replaced.

The World's Predominant Factory Brands

★THREE★STAR★ *LINE OF* BICYCLE TIRES

Quality, tread, design and service at three popular prices. Sold direct to dealers on a generous margin of profit.

STURDY STUD *Tripletread* SUCCESS

Write *at once* for 1916 Selling Plan covering Pennsylvania Tires, providing exclusive territorial arrangements and utmost protection and profit

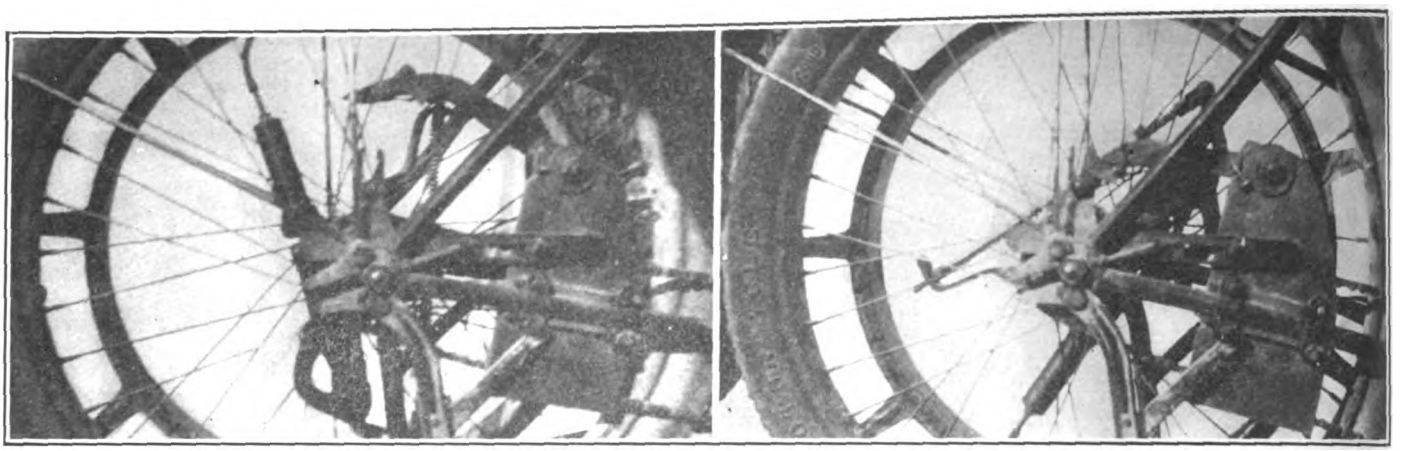
PUMP INFLATES TIRES AUTOMATICALLY AS DRIVING WHEEL ROTATES



Left, Wilkes Pump in Non-Operating Position with Cylinder Pointing Upwards; Right, Pump in Action with Piston on Return Stroke

BILOXI, Miss.—Walter G. Wilkes, of this city, has invented and been granted a patent upon the ingenious automatic tire pump shown herewith. The pump is actuated by the rotation of the wheel on which it is carried and can be set into operation or allowed to remain idle at the will of the rider.

The pump piston is drawn outwardly from the cylinder in each revolution of the wheel and is returned by a spiral spring. This spring can be adjusted to the desired tension, either for inflating empty tires or for constantly pumping air into a leaky tire in order to enable the rider to reach home or a repair shop on his machine. There is a device for putting the pump into or out of operation, leading to the rider's seat.

Wilkes has used one of these pumps with a ¾-inch cylinder on his motorcycle for about ten months and giving it the roughest kind of tests. He put it in and out of operation with the motorcycle moving at 35 miles per hour. "This pump puts slow leaks out of business," says Wilkes. "I have found my tire flat from a tiny hole that would let out all the air in about two minutes, would pump it up at the start and operate the pump for 13 miles to this city, and repair the leak after I reached home."

CAMPBELLS HAVE 150 MILES OF SNOW-BUCKING

New England Harley-Davidson Manager Rides To Boston in Recent Blizzard With Wife in Sidecar—Some Experiences

BOSTON, Mass., Feb. 18.—New England as a touring ground these days is not much in vogue, but Jes Campbell, New England manager for the Harley-Davidson, says that tobogganning has nothing on a 150-mile trip that he and Mrs. Campbell took recently. The time was during the worst storm that New England has had in a decade. There were twelve inches of snow on the roads.

The trip was to Springfield, Northampton and Greenfield, Mass., Hartford, New Haven and Bridgeport, Conn. The weather was fine and summery on January 26 when the Campbells started with the Harley-Davidson sidecar for the 100-mile trip to Springfield and the next three or four days of travel were fine. But on leaving Bridgeport, Conn., it got colder and the snow commenced to fall.

On reaching Hartford, Wednesday, February 2, there were two inches of snow under foot and more coming. Both Jes and Mrs. Campbell believe in getting home on the vehicle in which they start out, and so headed for Boston, 150 miles away. The snow turned into the storm that broke all New England records since 1909. They got to Springfield and Worcester that day with more snow coming down and the motor doing its bit and getting along through "the beautiful."

Jes still thinks that it was great going. He had to get the combination to 30 miles per hour and then she seemed to 'plane over the crust of the snow. If the speed slacked, down into the snow went the wheels and the rig was buried to the footboards and over. The Harley-Davidson kept on plugging along just the same.

WORKING AT 36 BELOW

Excelsior Sidevan Outfit Belonging to Johnson's Grocery Delivering Goods in Deep Snow and Unusual Cold Weather

There was no great hardship from low temperatures, fortunately, but the melting snow dropping from the riders' faces formed stalagmites on the collars and prevented their turning their heads. On only one occasion was there any danger of mishap, and this was when Jes tried to take a turn at some speed and found that the machine wouldn't respond. The snow was too solid, but further progress toward the side of the road was checked by a huge drift. The trip to Boston from Worcester was made through twelve inches of snow on the next day.

Jes has always been a believer in motorcycles, but now is even recommending sidecar combinations for Arctic exploring.

WORK STARTS ON CINCINNATI SPEEDWAY SITE

CINCINNATI, O.—Work is now actually under way on the site chosen for the two-mile track of the Cincinnati Speedway Company, near Sharon. Surveys have been made to determine the amount of grading necessary and the work is being blocked out rapidly.

Comparatively little grading is necessary by reason of the nature of the country and the most work will be needed in the construction of the track itself, and of the stands, garages, etc.

NEWS DEALER BUYS VAN

WASHINGTON, D. C., Feb. 18.—Howard A. French & Co. reports the sale of an Indian twin equipped with an Indian side van to Hamilton Adams, a leading newsdealer of Washington. Adams is purchasing this machine with the purpose of replacing all his auto delivery with motorcycles.

YOU WON'T FIND ONE, GEORGE

Editor, Motor Cycle Illustrated:

It gives me a certain kind of joy—even though it be for but one-half year—to renew my subscription for the magazine.

I have yet to find a cycling paper that is newsier, has better makeup and is any better illustrated.

With best wishes for future success, believe me,

GEORGE ROESCH

HARLEY-DAVIDSON MAKES NON-STOP RECORD

Phoenix Fans See Harry Crandall's Machine Roll Up 4,310.5 Miles in 214 Hours of Constant Going; Ran 118⅝ Miles Per Gallon of Gas

By F. A. M. COM. JAS. C. BLAINE

The Harley-Davidson Running in the Phoenix Cycle Company's Window

PHOENIX, Ariz., Feb. 18.—Harry Crandall's Harley-Davidson motorcycle rolled up a new indoor non-stop record recently when he placed his machine in the window of the local agency and started the motor going at exactly 5 p. m. on January 24, and had it running continuously until 2 p. m. February 2. The motor registered 4,310.5 miles, after running for 214 hours.

Ellis Wilson was Crandall's partner in the record run. They took turns in twelve hour shifts, changing hot spark plugs, keeping lubrication at its prime and so on. And the motor purred on! There is little to say about those 214 hours, except that the motor just purred on and on.

Sometimes the electric fans that were supposed to keep the motor cool would stop. Then all was excitement—palm fans were brought into play, extra oil pumped in, etc., to keep down the temperature. Again the fans are going. Such a relief! And the motor always purred on and on.

The Firestone tires stood the strain remarkably well, and a trusty Corbin speedometer, so arranged that the crowd outside could easily see it register the mileage, never failed during the 214 hours of constant running. The Wright spark plugs stood the test as though they were constructed especially for the occasion.

In all, 361½ gallons of gasoline were consumed and two gallons of lubricating oil, giving the surprising figures of 118⅝ miles per gallon of gasoline and 2,155.25 miles per gallon of oil. Those are certainly some figures to think about. The motor traveled on an average of 20.1 miles per hour.

The writer and Hugh Miller were the official stoppers. When all was in readiness the clutch lever was pulled back at 2 p. m. on February 2, and the mob of spectators standing outside gave a rousing volley of cheers. Doc Lane was so pleased that he took the hot machine right out of the window, and to show that it had more than plenty of pep left, he pushed it out to the street, hooked it up to a nearby touring car and toted a bunch of fans about town. The total load was 5,166 pounds.

$2.50 N. Y. LICENSE FEE ASSURED, SAYS HUGO

NEW YORK, Feb. 21.—A member of the staff of **Motor Cycle Illustrated** had a short talk with Secretary of State Hugo one evening last week. Mr. Hugo assured the **Motor Cycle Illustrated** man that there was practically no question regarding the passage of the Motorcycle registration bill now before the New York legislature. Progress of the bill has been delayed on account of objections by a New York legislator against the plan proposed for distributing the revenue for road improvements. The New York senator in question is seeking to have the bill amended so as to provide for a portion of the revenues being expended in the city.

However, no matter whether or not an amendment of this sort prevails, the legislators are practically unanimously in favor of the passage of the bill, and it is safe to predict at this time that a $2.50 license fee will be effective in New York beginning April 1.

BICYCLE PARTS AND ACCESSORIES

M. Pearlman, with offices at 320 Fifth avenue, New York, representative of a large bicycle manufacturer in Birmingham, England, is desirous of obtaining quotations on bicycle parts and accessories of all kinds. Mr. Pearlman desires to deal directly with manufacturers and those in a position to supply his requirements will find him prepared to purchase in large quantities.

CYCLE OPENINGS IN FOREIGN FIELDS

OPENINGS IN SOUTH AFRICA

THE publishers of **Motor Cycle Illustrated** are in receipt of a letter from Messrs. J. Braybrooke & Son, Port Elizabeth, South Africa, one of the recipients of our recently issued Export Number, in which they say that they are "very much interested" in American-made motorcycles, and "feel certain that there is a good field for them" in that country, "as they are better suited for the prevailing conditions than are machines of British manufacture."

SEEKS AMERICAN CYCLES

Antoine Freccero, 28 Rue Saint-Martin, Marseilles, France, representing a wholesale house supplying the motorcycle and bicycle trade, is desirous of making arrangements with American manufacturers for representing in France, Spain, Algeria and Tunis, to sell either for their account or for his own as exclusive sporting agents. American manufacturers are urged to send him catalogues, price-lists and terms in detail.

AMERICAN BICYCLES WANTED

A. Blot, 10 to 14 Rue de la Scellerie, Tours, France, writes us that he is desirous of securing representation for American bicycles. He requests catalogues, prices (for France), terms of sale, territory, etc.

CYCLE PARTS AND ACCESSORIES

American manufacturers of cycle parts and accessories may find it to their advantage to communicate with Marius Lacombe, Rue de Marseilles, Lyons, France, who desires to represent manufacturers of these articles in his country. He advises **Motor Cycle Illustrated** that he has traveled for twenty-five years in this line for the largest concern of its kind in France, and refers to the Credit Lyonnaise, in Lyons, France. Quotations must be made f. o. b. in France, and catalogues must be in French.

REQUEST FOR CYCLE CATALOGS

G. Lebigre, Rue Saint-Roch 3, Havre, France, a dealer in French, English and American motorcycles and bicycles, requests the catalogs of American manufacturers.

He formerly sold American, Columbia and Crescent bicycles in France, and is desirous of securing a representation for one or two American cycle manufacturers.

MARKET FOR LOW-PRICED CYCLES

Lucien Avocat, 18 Rue Bausset, Paris, France, writes this journal advising that as a wholesaler, he is in the market for low-priced American motorcycles. He states that he has an interesting proposition for any firm not already properly represented in France.

A National "Holler-Day"

February 29

IT offers a golden opportunity to come out strong on the merits of Pope-made bicycles.

Every man who accepts your invitation to enter your store on Bicycle Day is thinking of bicycles as he has never thought of them before.

Make sure that when he goes out he is thinking of *yours* above all—whether it is a Columbia, Cleveland, Tribune, Rambler, Crescent, or other Pope-made bicycle.

Make the most of this chance to impress him with the features that put these wheels in the front rank—the two piece crank-hanger construction — the patented frame reinforcement—the dropped crank bracket—the forged fork crown.

Talk about the high-grade saddles, tires, chains, coaster brakes, rims, spokes, pedals, guards, handle-bars and grips.

Don't forget to mention the advantages offered by the Sturmey-Archer Three-Speed Hub, the cushion frame, the spring fork, the spring seat-post, the truss fork, the thief-proof rear wheel stand, and the For-Sure lock.

As a Pope dealer you have working on your side established quality, world-wide reputation and the experience of thirty-eight years of bicycle production.

Cash in on it! Get your share of the "1,000,000 Bicycles in 1916."

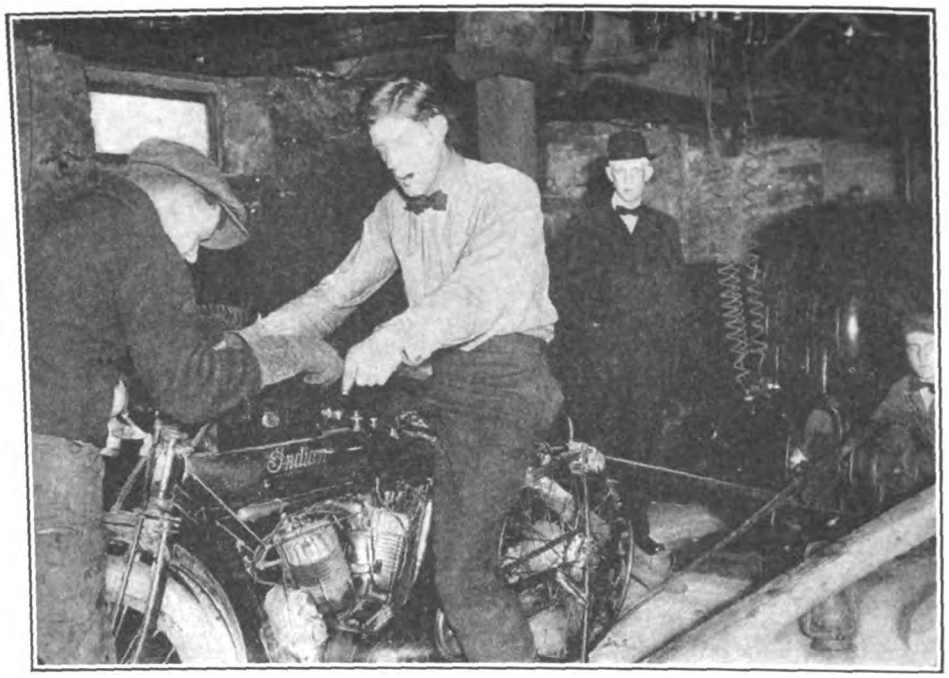
AIDS IN LIGHTING TOWN WHEN CURRENT FAILS



E. F. Wayee on His Indian Operating Exciter in St. Charles Power House

ST. CHARLES, Mo.—An Indian motorcycle, owned by E. F. Wayee, electrician and trouble man for the Electric Company of Missouri, assisted materially in lighting this city recently, when the feeder cable from the big Keokuk dam broke. St. Charles gets its current over this cable and the parting left the town in darkness.

However, there was a steam power plant for lighting which had been used before the town secured current from the Keokuk dam, and this was started up with all speed. However, the engineers found that the exciter for the big generator was out of commission, and so current could not be produced. The exciters in the sub-station for the Keokuk plant would work all right and excite the fields of the generator if one of these exciters could be driven. So they connected one in and Electrician Wayee volunteered to couple up his Indian to keep the exciter moving.

He set the machine on the stand, removed the tire and substituted for it a belt on the rim, this belt leading to the pulley on the exciter and started the motor. For one hour and a half the Indian held the exciter up to its work and the town was kept lighted, while the cable to Keokuk was being repaired. The motor was run wide open.

STANDARD TRAFFIC CODE COMPILED

Committee of Safety First Federation of America Studies Traffic Regulations and Draws Up Code to Secure Uniformity

NEW YORK, N. Y., Feb. 18.—A standard code of traffic regulations has been compiled by the street traffic committee of the Safety First Federation of America, New York City, as a result of the increasing, nation-wide demand for uniformity in the regulation of street traffic. The committee, of which John Gillespie, Commissioner of Police of Detroit, was chairman, has studied this subject for a year.

Each city in the past has drafted its own regulations and the rules in neighboring cities have often been very different. It has even been found that the regulations of some cities would clash with those of the state and the result would be confusing.

Among the important features which the committee's code incorporates are the following:

Prohibiting the use of the muffler cut out.

Prohibiting excessive emission of smoke or gases.

Prohibiting the unnecessary use of warning signals.

Providing that all vehicles shall carry lights from one hour after sunset to one hour before sunrise.

Approval of the near side stop regulation for street cars.

Providing car stop safety zones for persons getting on or off street cars.

Providing for protecting the car stop safety zone from encroachment by vehicles, either moving or standing.

Requiring that all vehicles must come to a full stop at least five feet behind a street car when stopping, or which has stopped, to receive or discharge passengers. Eight feet is recommended.

Requiring pedestrians to cross the street at the regular crossing, to cross with the traffic and comply with the signals of traffic officers.

Requiring the locking of unattended motor vehicles to prevent their removal by unauthorized persons.

Requiring properly illuminated license tags on automobiles, and favoring the adoption by automobile manufacturers of a uniform transparently illuminated license tag holder.

Requiring in the event of an accident that the driver must stop and render all possible assistance to persons injured.

AS NECESSARY AS EATING

Editor, Motor Cycle Illustrated: Enclosed you will find money order for subscription to your magazine. Might just as well do without a meal as to do without Motor Cycle Illustrated.
With very best wishes, I remain,
Yours very truly,
JERA DRAKE.
Bolivar, Mo.

NO UNFAVORABLE BILLS IN JERSEY LEGISLATURE

TRENTON, N. J., Feb. 21.—The 1916 session of the State Legislature is all but over, that is the time for presenting new bills has passed and the remainder of the session will be spent in passing or rejecting those already presented. This state of affairs pleases the motorcyclist, as the only bill bearing on motorcycles is the one that would compel all sidecars to carry two white lights in front.

This bill is in reality a move for safety and has the endorsement of the New Jersey M. C. and other clubs in the State Several bills that, while they do not relate specifically to motorcyclists would have an effect on them if passed, have the active opposition of the Automobile Association and will probable die in committee. Two other bills look good to the rider, one being for raising the speed limit to 30 miles per hour in open country and the other to allow a $7,000,000 bond issue for the construction of new roads.

RAILROAD MAN CAUTIONS ON TAKING CHANCES

TACOMA, Wash.—A. C. Lettig, secretary of the committee of safety for the O. W. R. & N. railroad has sounded a caution for motorcyclists in a recent letter on safety. Among the paragraphs are the following:

"A passenger train traveling at 40 miles per hour, under general conditions, by applying the air brakes in emergency can stop in a distance of 1,500 feet, or approximately one-fourth of a mile. A freight train traveling at 25 miles an hour, under general conditions, can make an emergency stop in 1,100 feet, or about one-fifth of a mile. A motorcycle traveling 25 miles per hour can ordinarily stop in a distance of from 10 to 25 feet, depending on the kind of brake used.

"A train traveling 50 miles per hour covers 4,400 feet per minute. The lives dependent on an engineer's vigilance, in the majority of cases, are people who are total strangers to him. On the other hand, the life dependent on a rider, is generally that of a loved one or at least is a friend. Be cautious.

"To take a chance, to run a machine past warning signals at a railroad crossing, to trust to luck to get across, is worse than foolhardy; is criminal.

"It is the motorcycle rider who does not know the country who should exercise the most caution on approaching grade crossings. Remember that accidents to motorcyclists at grade crossings happen to those who run risks."

DOUBLE-DEALERS IN THE MOTORCYCLE TRADE

How One Lost An Agency Through Slick Practices and the Other Doubled His Profits By Fair and Up-to-Date Business Methods—Co-operation Part of Second Man's System

By THE ONLOOKER

THERE are two kinds of double-dealers. I know one of each, but I will not admit any closer acquaintance with the first than by sight and reputation. When I first met him he was agent for the most popular machine in the city. But his slogan was—"Present profits, and hang the future." In time he hung it, and I am going to tell you how.

There was a considerable demand for seconds of his line, so he usually managed to get rid of all his trade-ins at a profit. This was in spite of the fact that he would offer the same machine to three or four different fellows on the same day at as many different prices, depending on what he thought they could pay. He always began with a high price, on the chance of getting it from the uninformed or ignorant, and if necessary let himself be beaten down a few dollars at a time until the unwary often thought they were getting bargains. But he had little real competition in those days so if a buyer seemed to have money he paid a stiff rate, and if he wanted to buy on time he had to pay liberally for the accommodation.

His Business Methods

As soon as you entered this man's place he would ooze up as close to you as his capacious girth permitted, and begin to talk in an oily confidential tone. His breath was strong enough to beat a gas-works, and his chief sales arguments were knocks. He always behaved as if afraid of being overheard, and may be he was, as he pulled some pretty raw deals. I know, because he once tried to sell me a machine at $165, swearing he was losing ten dollars on it. The next day he offered to sell the same boat to my father (not knowing who he was) for $150, or to give him $15 rake-off if he could sell it to anyone before the end of the week. Needless to say I did not buy from him, and later it appeared that his hurry to get it off at that rate before the end of the week was due to the fact that he had accepted a deposit on the machine at a lesser price, the deal to be closed Monday. Such methods injured his business.

Another little trick of this genial gentleman was that he would never make any repairs, no matter how small, while you waited. Why was this? Merely so he could charge more time than was actually required, and so you couldn't learn how to do jobs yourself; and it came to be generally believed after a time, that he used cheap parts instead of good ones made by his factory—so as to increase his profits. Even at this his stock was small, so that riders frequently had to wait for parts. Add to all these the facts that his shop always looked like a dump heap and that he didn't know what the word service meant, and you have a pretty clear idea of the fellow.

Start of the Slump

He seldom advertised. He said there was no use wasting money on that—that his machines were advertisement enough, with so many of them running around town. So in spite of his having the best machine in the place his unpleasant personality and poor tactics were driving fellows to trade elsewhere, his business began to run down, and numerous complaints reached the home office from individual riders. A letter or two made no impression on him, however.

So in course of time the sales manager—a man whom the dealer had never seen—came down from headquarters. The minute he stepped out of the station his eye was caught by a poster on a sign board across the street. In the middle was a picture of a motorcycle and rider. Huge letters at top and bottom commanded the reader to

RIDE A Q MOTORCYCLE
FOR HEALTH—FOR PLEASURE
AT LOW COST

"Ugh!" grunted the chief, "that man's got some enterprise. He's a live wire. I'll see him first."

Forthwith he sought out the "Q" agent for a heart to heart talk. Then he called on our friend the dealer—ostensibly as a customer. It didn't take the visitor long to size up the other, and something like the following conversation took place.

Visitor.—"Here's my card."

Agent.—"Why, you're from the factory, sales manager.

V.—"Yes. There have been so many complaints about you, and your business has fallen off so, that I came in to see what was the matter. I've found out. You've been playing the present against the future. Any successful business man has to look ahead a bit, if he doesn't he won't stay in business. You haven't been making use of your opportunities. So we are going to make a change."

A.—"A change?"

V.—"Yes. We are going to apply the 30-day clause in our contract with you. One month from to-day you cease to be our representative. Blank, of the "Q," is to take the agency. You haven't sent us a man-sized order for parts for two years, but if you have any *real* parts on hand that you want to get rid of, talk to Blank; he'll treat you square. Good morning."

Blank Gets the Agency

Thus the manager transferred the agency to Blank, and the first dealer found that he fooled and hurt nobody so much as himself by his double-dealing.

Blank is the other kind of a double dealer. I am proud to call him my friend and to ride one of his machines. I call him a double-dealer because he is as good as two men; and he does as much business as any two dealers here because he is such a live wire. Doesn't that make him double?

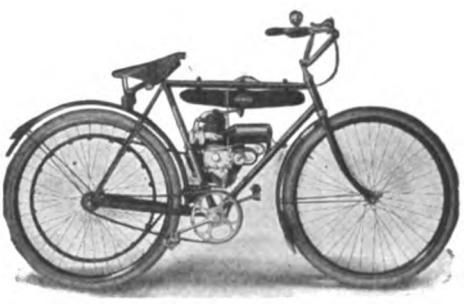
THE Cyclemotor WILL BE

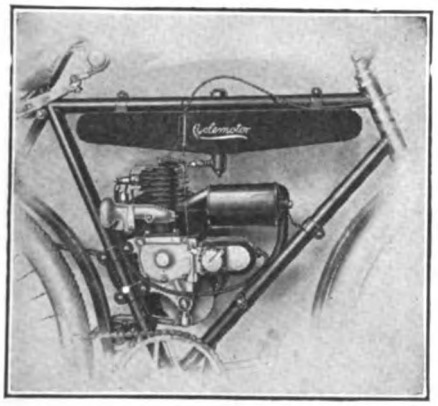
WHEELING WITHOUT EFFORT

BOOSTING BUSINESS BRIGHT AND EARLY BICYCLE DAY AND EVERY SUCCEEDING DAY

because its clean-cut, attractive appearance brings new prospects into your store and its perfect performance under test guarantees their continued enthusiastic support.

The Cyclemotor is a **perpetual** business builder. It makes many **more friends** for the bicycle by multiplying the conveniences of wheeling and adding to its pleasures. It is the one best bet as a booster because it solves the motor problem for bikes in a sensible, practical way. It doubles the dealers' profits on every combination sale and increases his new business because its appeal to riders lies in its vibrationless, lightweight features which mean reserve power and economical operation.





TWO-STROKE
HIGH-SPEED
VIBRATIONLESS

FEB. 29th

will be **Cyclemotor** Day from morning till night. A demonstrator in the window on that occasion will work wonders for you.

Mr. Dealer, if you want to inject the liveliest stimulus possible into your selling lines this season; if you want to watch your business grow; if you want to get the utmost possible out of your efforts you should write at once for our proposition, and Booklet "D-2," and learn the benefits of perpetual Cyclemotor boosting.

CYCLEMOTOR CORPORATION

DOUBLE DEALERS IN THE TRADE

(CONTINUED FROM PAGE 72)

Here are some of the ways he uses to get business. His place is clean. A window-washing company takes care of his glass. His window display is good and always changing—it takes a mighty attractive one to stay over a week with him. His stock of parts is large and standard so there is little waiting on repair jobs. He believes that in selling a machine he is merely starting something, and gives good service, largely in free inspection. He advertises in the newspapers, with handbills, with follow-up letters, and with billboard posters, for he has not forgotten how he got his start. He, or any of his clerks, will give you the same price on second-hand machines in his place, for all are priced and listed to avoid errors.

These are some of the secrets of his success, but the biggest one is not yet. It is a method of selling new machines which can be used almost anywhere. He keeps on file his competitors' literature as well as his own, where all his salesmen can have access to it. Then, regularly every week during the riding season, and oftener when the new models are out, he has a round-table conference with all his sales force.

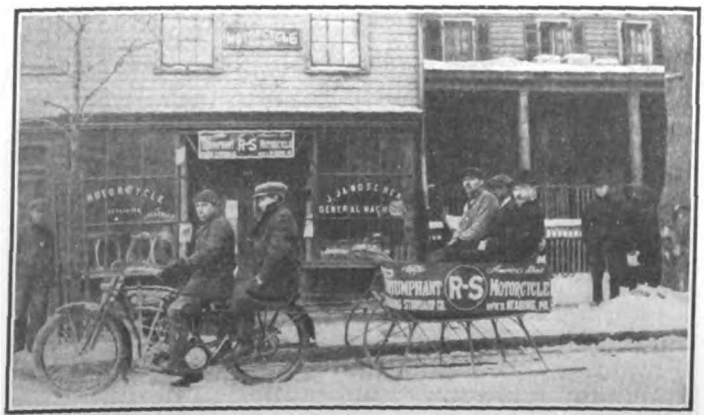
At each of these meetings one man represents a rival machine. He gives all the good points about it that he can, including any that have come up since the last meeting, and defends all its weaknesses to the best of his ability. All the rest of the men pounce on his statements and tear them to pieces. They don't stop until they have a satisfactory answer to any arguments put forth for the rival, and an answer, as well, to every criticism of their own machine.

Thus they are prepared in a short time to discuss the matter on more than even terms with prospects who are inclined to any proposition other than their own, and to do it tactfully. They admit good in others, but show their's up best in the grand total.

Does it pay? I should say so. Blank himself says that this conference business (merely an application of big business methods) is the best thing he ever started. The men perfect themselves not only in selling arguments but in actual knowledge of construction and design of all makes, which comes in very handy in trouble-hunting and repair work.

READING-STANDARD DEMONSTRATION IS MADE ON HIGH GEAR

BRONX, N. Y.—J. Janoschek, representing the Reading-Standard in this city and county, is very active these days at his headquarters at 1013 Washington



Janoschek on Reading-Standard Drawing Sleigh with Three Up

avenue. During the recent snow he has hitched his brown 1916 twin to a sleigh and given demonstration runs to prospects over the packed and icy streets and hills in the county. Janoschek uses the high gear for this performance and thus proves the pulling power of the R-S motor under even adverse conditions.

The normal load in Janoschek's sleigh is three passengers, but he has frequently pulled as many as seven, not including a tandem passenger. The sleigh carries one of the big Reading-Standard strip-posters and is an object of much interest wherever seen.

INDIAN EXHIBIT IS CENTER OF INTEREST AT MONTGOMERY SHOW

MONTGOMERY, Ala.—The Hobbie Motor Car Co., of 220 Montgomery street, was among the prominent exhibitors at the automobile show in this city on January 25 to 27, and its booth displaying Indian models

Exhibit of Hobbie Motor Car Company at Montgomery Show

was always a center of interest. Secretary J. C. Salter and Head Salesman W. J. McClellan were highly elated at the result of the show and their efforts at the booth have resulted in a number of orders for spring delivery.

BALTIMORE, MD.

HOWARD A. FRENCH & CO., Indian representatives, have just received their first two-stroke Featherweight from the Springfield factory. Chic Thomas, sales manager of the firm, has been demonstrating the little fellow from the Baltimore street store, and has already taken a number of orders. "The Featherweight is a comer all right," says Chic, "and it is only a question of getting them fast enough."

HEINZ MOTOR CO., local distributor for the Harley-Davidson, has enlarged its service department by adding 800 feet of floor space. A large and up-to-date brazing and welding plant has been installed, and a big supply of parts has been laid in. Gus Heinz, in charge of this department, is a firm believer in service with a capital S, and will have the best mechanics possible.

SAN FRANCISCO, CAL.

JOHN BAUMGARDNER, handling the Indian in this city, is beaming these days. His 1916 sales so far have been equal to one-fifth of his total business last year. Baumgardner has the Indian Exposition models on show and every few days someone walks in and separates him from one of these highly-finished mounts.

ASK CONTRIBUTIONS OF CYCLE GOODS FOR BINGHAMTON SHOW

BINGHAMTON, N. Y.—The Binghamton Cycle Dealers' Association, formed of practically all the agents in the city, has completed all preparations for the motorcycle show, to open on Bicycle Day, February 29 and run through March 1 and 2. There will be a complete representation of all makes of cycles represented in this city at the show.

The Association is asking for contributions of articles pertaining to motorcycles and bicycles from manufacturers and jobbers with whom its members deal. These articles will be put on display both at the show and in the stores of the individual members of the Association and will be advertised in the Binghamton papers. They will finally be given away free to those attending the exhibition.

Contributions of such articles may be sent through any member of the Association or direct to the Secretary, Frank S. Bump of the Frank S. Bump Company.

NATIONAL CAPITAL INDIAN DEALER TAKES ON BICYCLES

F. L. (LIN) LEISHEAR, Indian agent in Washington, D. C., has signed up for the Indian line of bicycles and has received his demonstrators. Mr. Leishear has heretofore handled only motorcycles, but has received such favorable reports regarding the sale of the line of Indian bicycles that he has decided to make bicycles a feature of his business.

Although in business only about two years, Mr. Leishear, who is still a young man, has built up a fine business in motorcycles and accessories, handling the Indian and Henderson motorcycles. Last year he sold nearly 100 motorcycles and this year is confident that he will double that number. Mr. Leishear has an especially complete stock of parts and accessories for the machines he handles and is constantly adding to his salesroom.

A. A. Peters, Reading-Standard Agent in Allentown, Pa., with His Family Out for a Sunday Spin

SAN FERNANDO, CAL.

WILLIS A. ROWE, formerly agent for the Indian and Excelsior, has taken the representation for the Cleveland lightweight exclusively. He expects to sell 25 of the little two-strokers this season by reason of the unusual lightweight interest which prevails. "The two-stroke principle with its lack of valves appeals to lots of riders here," says Rowe, "and the fact that the Cleveland is very easy to handle makes it a comer."

(MORE NEWS OF DEALERS ON PAGE 78)

WHEN PREPAREDNESS COUNTS

For the Cycle Dealer

To have in stock fresh up-to-date goods that the riding public wants and in that way be prepared to take full advantage of such demand.

For the Cycle Rider

Always to have a supply of dependable repair materials on hand so as to be ready for any emergency.

DUTCH BRAND

RUBBER CEMENT and CYCLE SPECIALTIES

answer the call for Preparedness of both dealer and rider. They are sure to satisfy because made right. No guess-work methods are employed in turning out DUTCH BRAND RUBBER CEMENTS. No matter how high the market price of the raw materials may be, we use the same finest grade always. Scientific processes, the result of years of careful study, are employed in producing the cement. Not surprising that DUTCH BRAND RUBBER CEMENTS

Stick and Stay Stuck

We make many other attractive specialties, such as Motorcycle Cement, Wood Rim Cements, Tire Fluid, Shellac, Enamel, Friction Tape, etc.

Sold by leading jobbers to dealers and dealers to riders. Look for the Dutch Girl Label.

WHEELING, W. VA.

WESLEY HOUSE, local Indian agent, has received his first Indian Featherweight and is busy demonstrating it in snow and mud. The three speed gear is taking the fancy of the riders in particular and House is looking forward to a widespread sale of the little two-strokers.

H. G. FRIEDRICH, handling the Pope lines of motorcycles in Wheeling, is awaiting a shipment of twins and the Model H single from the Westfield, Mass., factory. The three-speed model is the flower of the flock, according to Friedrich.

EARL BRAULICH, Harley-Davidson dealer, has just delivered an electrically-equipped three-speed model and has orders for two more, this week, as well as a sidecar combination. The machines all go to members of the Wheeling M. C.

HARVEY BERNARD, Indian traveler in West Virginia, Eastern Ohio and Western Pennsylvania, is back in Wheeling once more, after a trip through his territory. He reports business picking up in great shape and looks for a fine Indian season.

SANDS ELECTRIC COMPANY has taken the agency for the Henderson in Wheeling for 1916. Its right hand man in the motorcycle department is Harry Douglass, a well-known rider and salesman, who is secretary of the Wheeling M. C.

DEER LODGE, MONT.

WILLIAM GIBLER has the Indian agency in this city. He has some good prospects lined up for twin models and sidecar rigs. "They will take Spring delivery" says Gibler. "They have to on account of the weather here. The temperature has gone to 45 degrees below zero at times and there is lots of real, stiff wind and deep snow. Warm weather will do the trick, however."

DEVIL'S LAKE, N. D.

ARTHUR BRAINARD, local agent for the Harley-Davidson, has been exhibiting the Silent Gray Fellows at the midwinter fair in this city. He states that he can trace the sale of two machines directly to his exhibit. Although there are only 5,000 inhabitants in Devil's Lake, there is considerable motorcycling enthusiasm all the year round.

Attractive Stand of Arthur Brainard, Featuring Harley-Davidsons at Devil's Lake Midwinter Fair

GOODRICH GIANT BLACK SAFETY TREAD BICYCLE TIRES

Cash in on the Black Safety Tread demand

Black Safety "Barefoot" Rubber Treads on auto tires are the striking development of the last few months. Goodrich introduced them and thousands of owners are bringing their cars up-to-date with them.

That is why every boy who owns a bicycle will try to bring his mount up-to-date just like his daddy who has these black treads on his auto tires.

So, the national "Giant" advertising campaign

will for the most part be directed to the boys, to send them into *your* store to get this Black Safety Tread "Giant" and to see these two attractive gifts, which make a strong appeal to every red-blooded boy.

First—A rich maroon or dark blue pennant with silver frosted letters, given away with every "Giant."

Second—A boy's "Guide Book" telling how to make a boomerang, how to put up a camping tent, how to tell poisonous snakes, and poison ivy, and dozens of other "pointers," also free with every "Giant."

And the "Giant" is a better bicycle tire

It is the only bicycle tire, in which the fabric is actually heavier than on many small size auto tires of other makes.

Then, its porous weave is such that the layers of rubber are welded together through the fabric.

It is practically one piece of rubber. *No other bicycle tire in the world is made like it.*

That is why the "Giant" is *guaranteed* for a year and why it will last much longer.

There is a greater margin of profit on "Giant" sales

than on any other high-grade, well advertised tire on the market. This is a money-making opportunity that you can't afford to miss.

Send us the coupon below for our proposition.

The "Giant" Display Rack, a sales booster, free with the first ten pairs, is only one of many interesting offers we will send you in our sales plans.

The B. F. Goodrich Company

Makers of the Celebrated Goodrich Automobile Tires *"Best in the Long Run"*

If He Buys a Brake It's Ten to One It Will Be The

CORBIN

DUPLEX COASTER BRAKE

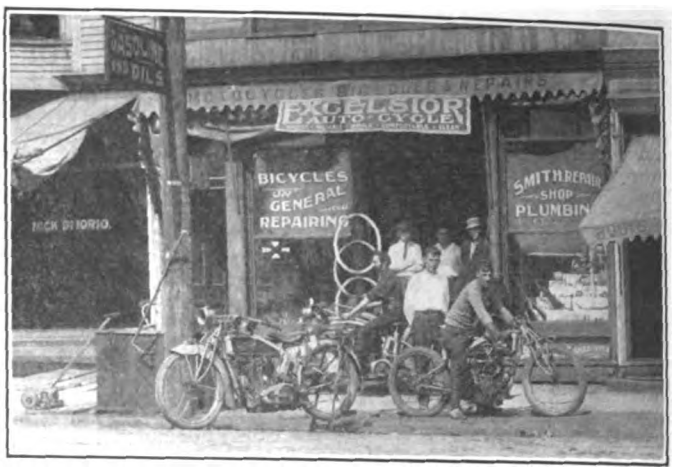
This is a safe bet. Just figure the percentage of Corbins on brake equipped bicycles and you will know why.

This test will convince you of the wisdom of keeping the Corbin Duplex always in stock. It will prove to your own satisfaction that the Corbin Duplex Coaster Brake is the biggest seller on the market, that the majority of brake equipped bicycles carry the Corbin equipment.

The sales of brakes this season will keep pace with the sales of bicycles. There is going to be a big increase in both, and consequently, a greater demand than ever for the Corbin Duplex.

All bicycle manufacturers will equip it when specified. Do so, it will increase the selling value of the wheel. Your jobber will supply you. Write for price lists, discount and catalog.

The Corbin Screw Corporation
THE AMERICAN HARDWARE CORPORATION, Successor
NEW BRITAIN, CONN.
BRANCHES: New York, Chicago, Philadelphia
Makers of Corbin-Brown Speedometers



Excelsior Headquarters of Frank Moll in Massillon, O. The Excelsior Line of Bicycles Is Also Handled

OAKLAND, CAL.

GEORGE FAULKNER, representing the Harley-Davidson, at 244 East Twelfth street, has taken the store adjoining his property, formerly the agency of W. P. Williams. The partition has been removed between the stores and Faulkner has a whacking big place for his Silent Gray Fellows.

W. P. WILLIAMS, Excelsior representative, is now in the old Chansler & Lyon store on East Twelfth street, across the way from his former location. He delivered another 16-3 Excelsior last week.

BATAVIA, ILL.

C. M. ANDERSON, Thor agent in this city, was burned out last week, losing everything but the machinery in his shop. The fire was of unknown origin. The loss was partly covered by insurance. Anderson has not yet been able to continue on the same scale as before by reason of not being able to obtain a suitable location. He intends to erect a modern building in the near future. He handled the Great Western line of bicycles in addition to the Thor.

PHILMONT, N. Y.

A. F. DEXHEIMER, local Excelsior agent, had a two days' look at his first 16-3 Excelsior. The machine arrived on a Wednesday and on a Friday it was sold to a local enthusiast. There is a second machine on the way from Chicago now, but Dexheimer has small hopes of handling it much, for the purchaser is looking in at his place every day and will take it away as soon as the crate arrives. Dexheimer's agency is the first to be placed in Philmont.

ALBUQUERQUE, N. M.

ALBUQUERQUE NOVELTY WORKS, agent for the Indian, has the distinction of having the only 1916 machine in the city. It is a Powerplus twin and is on the road most of the time demonstrating its ability to speed and plug sand.

LONG BEACH, CAL.

SIMON & MURPHY have taken the agency for the Harley-Davidson, through the Appeal Manufacturing & Jobbing Company. The deal was closed by Sales Manager Welborn. The firm has adopted the following motto: "Sales made rapidly on the easy payment plan."

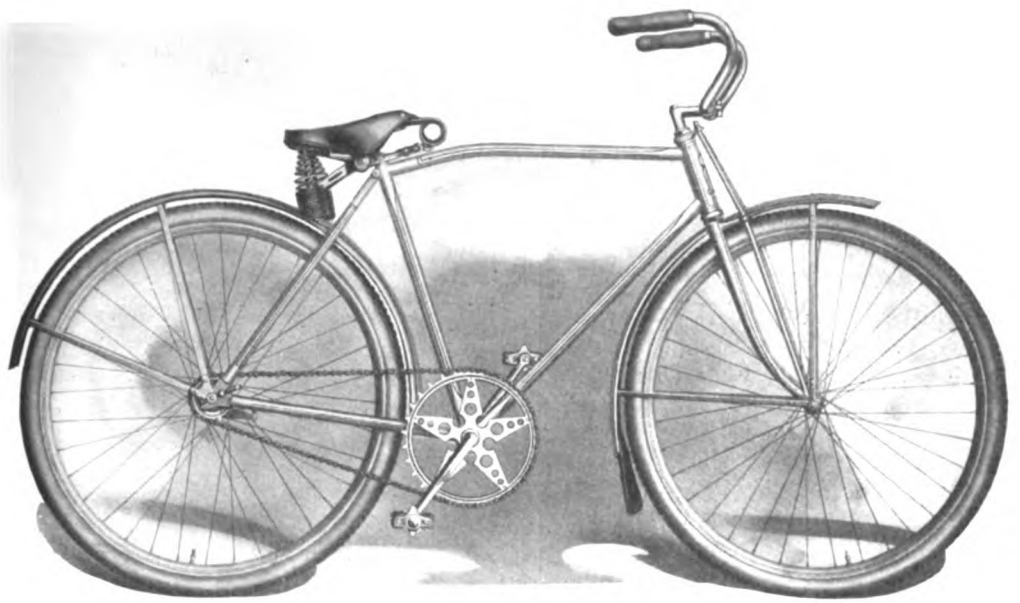
DE LUXE-EXCELSIOR
BICYCLES



Our New Curve Bar Model—one of

AN ENTIRELY COMPLETE LINE

Including Double and Single Bar, Light, Medium and Heavy Weight, Juvenile and Ladies' Models.

Excelsior cycles are a quality proposition throughout.
Their graceful lines, high finish and excellent equipment make them ready sellers.
Their fine running qualities and durability make satisfied owners who recommend them to their friends.
We aim to build not the cheapest bicycle but the best that can be produced and wise dealers appreciate the value of such a line.
Satisfied customers are your best advertisement and owners of Excelsior-De Luxe bicycles are boosters of you and your business.

IMPORTANT

We take possession of our new factory at Michigan City, Indiana, on March 15th, and with these increased facilities will be able to double our output and serve our many customers even more promptly and efficiently than before.
Our office and sales department will continue at the present address.
Live dealers who appreciate quality and service, write for terms and details of our complete line.

NEW YORK, N. Y.

GUS ROTHOLZ, the veteran Reading-Standard distributor for the metropolis and vicinity, has just sold another R-S three-speed twin with Rogers sidecar. This is the ninth sidecar combination to be stored in Rotholz' place at 1491 Fifth avenue, and it is getting so that considerable maneuvering is needed to get the full number in.

"As long as the wheels will track on the street, they take out their sidecars," says Rotholz. "The last two Sundays, when we had heavy snow, most of the fellows went out with their rigs and hit the drifts. It is only a question of time until the weather gets milder and the spring rush will keep me busy with all my makes."

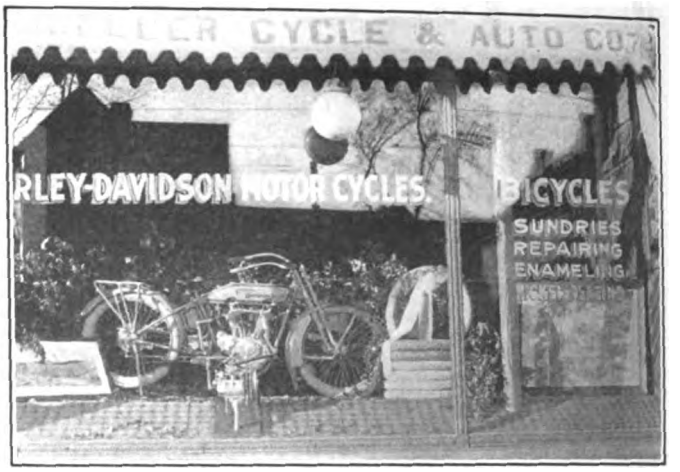
LOUISVILLE, KY.

THE SUTCLIFFE CO., Smith Motor Wheel agent, has just taken out a building permit for improvements of its Fourth street business home. The company will have increased floor space and the shop, at present in a detached building, will be housed under the main roof.

KLINE BROTHERS, Harley-Davidson representatives, report that they are "burning it up" with the Silent Gray Fellow this season. Fifteen machines have been sold and eight have already been delivered. Business this year has been considerably better than in 1915.

POMONA, CAL.

FRED D. WEAVER manager of the Pomona Motorcycle Shop, has taken the agency for the Miami Power Bicycle. His original contract was for ten machines. After signing up with Traveller H. A. Brunell, Weaver started around the town demonstrating the little four-stroker and seven sales were the result of one day's work. Weaver then increased his contract to 20 machines.



Store of Mueller Cycle & Auto Co., Milwaukee, Wis., Featuring Harley-Davidson Machines and Tires

NIAGARA FALLS, N. Y.

B. L. MOORE has taken the agency for the Dayton Motor Bicycle. He signed up with the Vim Cycle & Hardware Co., of Buffalo, local distributors.

FALCONER, N. Y.

LEONARD ASKER will represent the front-wheel drive Dayton mount for 1916. The contract was taken through the Vim Cycle & Hardware Co., of Buffalo.

Ten Big R-S Features

Dealers—in the 1916 R-S you have the most powerful collection of "talking-points" in the world—real quality features that lift the R-S into the front rank as a really luxurious SERVICE mount.

***You,* as an R-S Dealer, will have the advantage over all others in your town. Because now, with the reduced price, the last objection to *everyone's* wanting an R-S has been removed.**

Just scan these BIG points of R-S superiority—then write us for full information on our unexampled dealer offer.

THREE SPEED TRANSMISSION—DOUBLE LOCKING DEVICE—NEW STEP STARTER—LARGE COUNTERSHAFT CLUTCH—FOOT AND HAND OPERATED—30" SADDLE POSITION—VERY STRONG FRAME—NEW FRONT FORK—R-S PERFECTION SEAT POST—LONG COMFORTABLE FOOTBOARDS.

TRADE NEWS FROM THE NORTHWEST

CHARLES F. WRIGHT and O. B. Ballou, well known Indian distributor for the Northwest, celebrated their twentieth anniversary as partners by giving their employees in the Portland house a banquet at the home of Wright. There were 42 employees present. Following the dinner, the guests presented Wright and Ballou with gold watch fobs.

The two partners were in business in Great Falls, Mont., for seven years before coming to Portland. They are both veterans in the cycle trade and hustlers from the ground up.

TACOMA, WASH.

J. S. JOHNSON, formerly of Everett, Wash., where he handled the Harley-Davidson for the Hirsh Cycle Co., is now with W. P. Glasgow, local Harley-Davidson distributor. Johnson is an expert mechanic and motorcycle salesman and is an important addition to the Glasgow forces.

GASOLINE in this city and in Seattle went up one cent during the past ten days. It is now 17½ cents a gallon. Dealers are in the dark as to such details as when the final figure will be reached and what it will be, but all are unanimous that the end is not yet in sight.

From Portland reports, gasoline has gone up another cent, making the sixth raise since the start of the big demand last Summer. At Spokane and throughout the Inland Empire, the price is now 20½ cents a gallon.

SEATTLE, WASH.

G. C. AUSTIN has opened the Seattle Motorcycle Exchange at 1206 East Pine street and has taken the agency for the Thor for this city. Austin is well-known in Seattle and is one of the most popular riders in the State. He is an expert motor mechanic and will do much to popularize the Thor hereabouts.

PUYALLUP, WASH.

A. B. HICKEY, handling the Excelsior and Miami Power Bicycle, is awaiting for the arrival of a shipment of Miami power bikes and Excelsior twins. He says that prospects are fine for the motorcycle this season and that the early spring will see lots of "Big X" models out.

LAWRENCE DeBOLT, Indian dealer, has taken two orders for Powerplus twins recently and will deliver them on Indian Day, February 22. He has a shipment of Indian bicycles on the way and is also working up a nice trade in heavy service wheels. He has Earl Wilcox as his expert in the Indian shop.

PUYALLUP DEALERS are all busy brushing up their stocks, cleaning up the repair shops and ordering motorcycles and bicycles in preparation for a whacking big season. One thing that has been a factor in increasing the popularity of both the power and foot-propelled two-wheelers is twelve miles of hard surface paving which has been laid during the last season and a broad highway leading to Tacoma in addition.

STOCKTON, CAL.

JOHN JOHNSON, of 340 East Weber avenue, has taken the agency for the Dayton line of motorcycles and bicycles during the 1916 season. He will make a specialty of the Dayton Motor Bicycle. The contract was obtained by J. A. Peterson, traveler for W. E. & W. H. Jackson, Dayton distributors in San Francisco.

MOTT STEEL RIMS

Mott Steel Bicycle Rims are the only kind of rims that can be ridden in all kinds of weather—in all climates—and on all kinds of roads. They are not affected by dampness, heat or sudden changes of climate and can be depended upon to stand up under the hardest kind of usage.

They are

Always Satisfactory—Everywhere!

Made of the best grade steel—light in weight—no higher in price—safe in cases of accident—true to size and measurement — and enameled in any color desired. Mott Steel Rims possess every advantage necessary to perfect service.

That is the reason more Mott Steel Bicycle Rims are being used every year. Prices gladly submitted.

WASHINGTON DEALERS HAVE PLAN FOR "BICYCLE DAY"

CHARLES H. CROSS, manager of the local branch of the Haverford Cycle Co., has devised a unique plan for creating interest in "Bicycle Day." He has placed in his window a $50 Packard bicycle, against the rear wheel of which he has placed the shaft of an electric motor. The motor will be run four hours each day from Monday, February 21, until Tuesday, February 29, excepting Sunday. The diameter of the wheel is plainly stated on a card placed alongside of it. A cyclometer has been placed on the wheel and the person calculating the nearest to the number of miles traveled will receive the bicycle absolutely free of cost.

The contest has been announced through the local newspapers and any resident of the city and the suburbs is allowed to deposit his figures. A great deal of interest has been aroused in this contest; as attested by the crowds which continually gather around the window of the Haverford store, which is located in the best shopping district of the city.

MILWAUKEE, WIS.

MANAGER KOEHLER, of the Milwaukee Cycle Supply & Sales Co., has just returned from a trip to most of the leading motorcycle factories and reports that while in Dayton, Ohio, he arranged for the agency rights on the new Dayton Motor Bicycle. He anticipates a great future for the front wheel drive machine.

SALT LAKE CITY, UTAH

THE HOUSE OF HOPPER has delivered six Harley-Davidsons to customers so far. There has been much snow and little riding, but with clearer roads the Silent Gray Fellows will go faster and faster, "both as regards getting owners and moving on the road," says Hopper.

LON CLAFLIN, Indian dealer, has taken the agency for the Cyclemotor for Utah. He had a fine exhibit at the local auto show this week, featuring a Powerplus motor torn down with the parts arranged alongside those of a 1915 twin. The stand had a Dixie magneto and Splitdorf mag-dynamo in operation. Both Indian and Cyclemotor models were at the stand.

WORCESTER, MASS.

J. W. GRADY & CO., distributors for the Dayton Motor Bicycle and line of motorcycles in New England, has signed up Herman Ulrich at Lawrence, Mass.; William C. Dawe at New Bedford, Mass.; and William H. Wyman at Exeter, N. H., for the Dayton front-drive model.

DUNKIRK, N. Y.

B. L. FELLOWS has taken the agency for the Dayton Motor Bicycle for Dunkirk and vicinity, through the Vim Cycle & Hardware Co., of Buffalo, local distributors.

BELLINGHAM, WASH.

F. J. ROSS has added the Dayton Motor Bicycle to his other Dayton products for 1916. He obtained his agency from the Washington Cycle & Supply Co., of Tacoma.

GREENVILLE, N. C.

JOHN FLANAGAN BUGGY CO. has taken the distribution rights for the Dayton bicycle line in addition to those already held for the Dayton Motor Bicycle and motorcycle.

IMPORTANT ANNOUNCEMENT

from The Complete and Exclusive Bicycle & Motorcycle Supply House

WE ARE now giving our entire facilities and efforts to the distribution of BICYCLES, BICYCLE SUPPLIES and MOTORCYCLE SUPPLIES, and are selling them through established dealers exclusively.

Having discontinued the manufacture and sale of Automobile Specialties and supplies, and concentrated our time, resources and organization in marketing Bicycles, Bicycle and Motorcycle Parts and supplies, we offer you a line and service that are positively unequaled elsewhere, in this country.

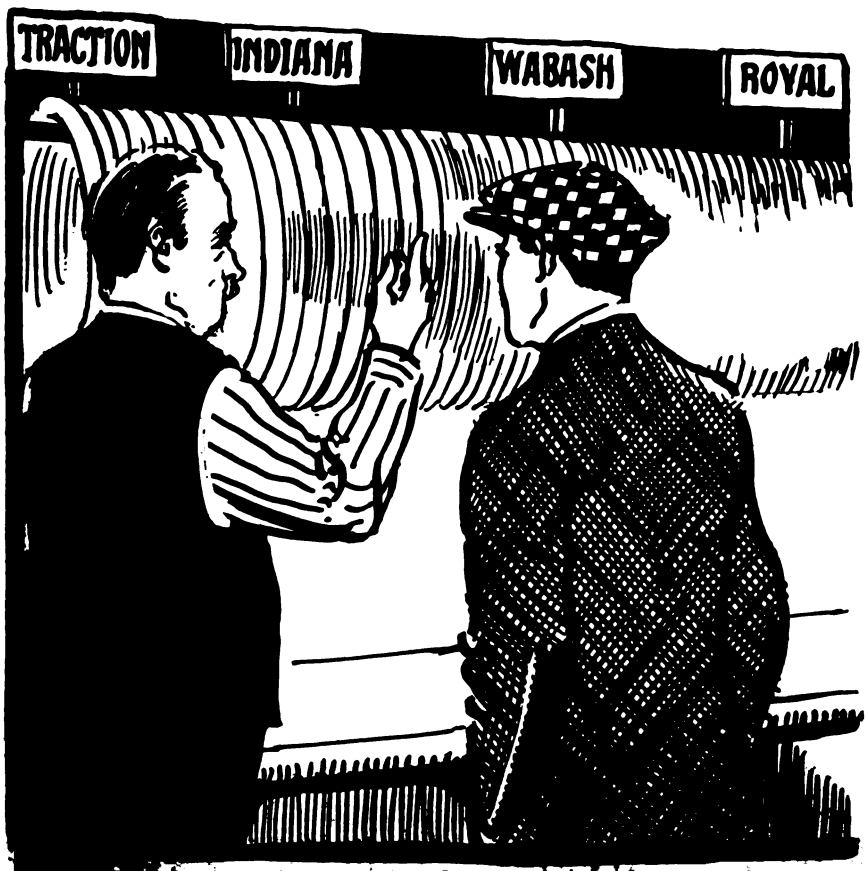
"What Every Dealer Knows"

Every dealer who stocks these famous tires knows that he has a gold-mine of tire-quality in this line. They MUST sell, on quality, price and appearance.

Traction Indiana
Wabash Royal

"The Marks of Tire Quality"

These tires come in various colored treads and side-walls. They make a striking display on the dealers' racks. The service they render is made possible by the high quality of motorcycle fabric employed, the pure rubber that makes for remarkable resiliency coupled with an unusual "toughness" and immunity from road hurts.



Every dealer should know more about these tires. Write us.

See that trade mark!

OLD SOL
LIGHTING·SYSTEMS

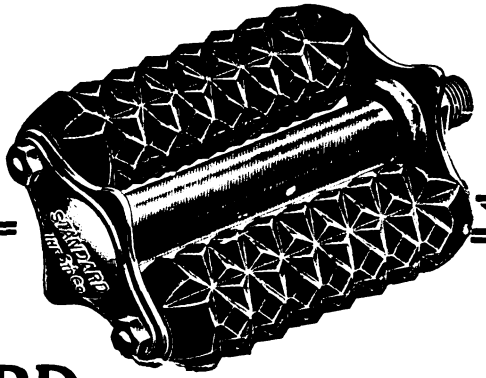
"It's the sign of good goods—of lasting quality—of enduring satisfaction. You're safe when you buy under that brand."

The trade has long been acquainted with the name. By a process of steady growth it has become the standard by which all others are judged. "As good as 'OLD SOL'"—that's the compliment you hear every day from those just-as-good dealers who do not realize the magic power of a trade-mark such as ours.

When you say "Old Sol" to your customer the sale is three-quarters made. HE knows what the name implies.

HARNESS THIS DYNAMIC SALES-POWER TO YOUR STOCK. IT WILL HELP.

HAWTHORNE MFG. CO., 38 SPRUCE STREET **Bridgeport, Conn.**



No. 3 MOTORCYCLE PEDAL

No. 3 STANDARD MOTORCYCLE PEDALS

Our products comprise:

Diamond "E" trade mark brand Spokes and Nipples for Bicycles, Motorcycles, Tricycles, Velocipedes, Invalid Chairs, Sulkies, Carriages, Cyclecars and Automobiles. Pedals for Bicycles, Tricycles, Velocipedes and Motorcycles. Toe Clips for Bicycle Pedals. Emergency Axles for Pedals. Screw Machine Products.

When you buy a motorcycle, make sure that it is equipped with STANDARD PEDALS.

Most manufacturers have reasoned out that "STANDARD" EQUIPMENT means increased value on the machine.

STANDARD PEDALS are big, roomy, soft and minimize the shocks. Deeply corrugated to insure positive foot grip. Insist upon STANDARD EQUIPMENT.

20th Century
NAME AND TRADEMARK REGISTERED
Bicycle & Motorcycle Lamps

Model No. 1

The original bicycle oil lamp, of which this model is the successor, was the greatest seller of them all and made the name 20th Century famous. Made of brass, nickel plated, height 5½ inches, weight 13 ounces. Burns 12 hours on one filling. Equipped with spring brackets if so desired.

Freedom from Lamp Troubles

20th Century Lamps are the lamps of a generation. Their reputation is founded on performance ranging over a quarter of a century. Wherever lamps are used, 20th Century Lamps are spoken of with respect.

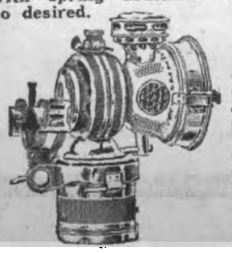
We show here four of our most popular models—models that have proven themselves efficient on both motorcycles and bicycles—lamps that have meant immunity from lamp trouble.

Write us for a full description of our line. Dealer and Jobber prices upon request.

20TH CENTURY MFG. CO.
41 Warren St. New York, U. S. A.

"Fairy" Tail Lamp

Shows clear white light on license plate. Shows a bright red light to rear for protection. Made of aluminum, combining light weight with strength and durability.



Model No. 2

The best known and most widely sold acetylene lamps on the market. Favorite of all bicycle riders at home and abroad. Sold by the retail and wholesale trade everywhere. Made of brass, nickel-plated. Height 7 inches. Weight 22 ounces. Carbide capacity 5 ounces; ¼-foot burner. Parabola reflector. New carbide cup attachment and new patent door catch. Equipped with spring brackets if so desired.

Model No. 6

A self contained lamp, but specially reinforced for motorcycle and carriage service. Has extension reflector 6 inches in diameter and gives about 125 candle-power light. Equipped with same improvement as No. 2.

STEEL TUBING

For Motorcycle and Bicycle Handle Bars, Frames, Etc.

Unequalled for Mechanical Accuracy

¶Six separate operations are combined by the huge automatic machines used in the manufacture of "Elisco" Steel Tubing. The "Elisco" process insures an accuracy and finish unattainable by any other method.

¶Each of these huge machines receives the coil of cold rolled steel, forms it, burrs, rounds, straightens, smooths, cuts it to length and delivers it ready for inspection and shipment—untouched by human hands.

¶Our new plant in Cleveland is equipped with twenty of these huge units, with a total yearly capacity of over twenty million feet of tubing—and additional machines are now being installed.

Furnished in straight lengths or formed to suit your requirements. Let us submit samples and quote prices.

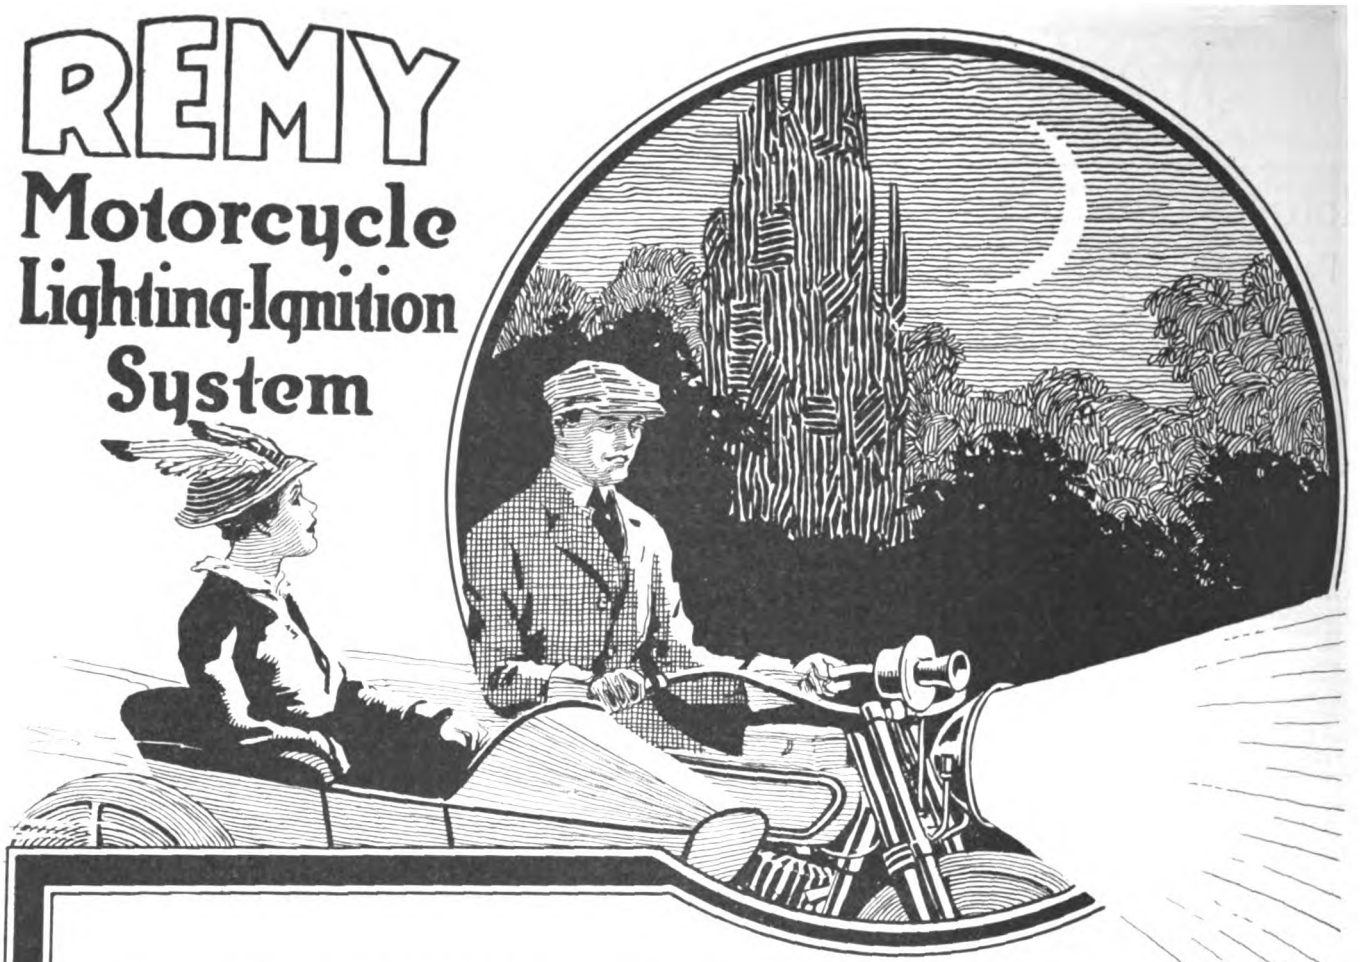
REMY
Motorcycle Lighting-Ignition System



REMY IGNITION INSURES PERFECT MOTOR PERFORMANCE

Smooth, even running at low speed—a quick, snappy pick-up—and the powerful, unerring pull so often necessary when running slowly—proper ignition for that spurt of speed you need when you want to pass the boys on the road—Remy Ignition insures all this and more.

Unless your mount is a Remy equipped Harley-Davidson motorcycle you may not realize what perfect motor performance means.

You may blame erratic, or jerky, unpleasant running at low speeds, onto "poor gasoline" or an improperly adjusted carburetor when neither is at fault. But the spark is the same at *all* speeds—as it should be.

Your Harley-Davidson dealer will show you the advantages of Remy equipment—the best for lighting and ignition. At your first opportunity make it a point to inspect the Remy System as applied to the 1916 Harley-Davidson.

ALWAYS MAKES GOOD

MAKES A HIT.

The EXCELSIOR LIGHTWEIGHT

ALWAYS MAKES GOOD

Revives the enthusiasm of an old time dealer who was about to quit.

Here is the story

THE EXCELSIOR MOTOR MFG. & SUPPLY CO., Stockton, Cal., Feb. 7, 1916.
Chicago, Ill.
ATTENTION: MR. MATHIS
Gentlemen:

I just want to congratulate you on the new Excelsior Light Weight. I believe that it is going to be a wonderful seller. I had fully decided to discontinue our Motorcycle store after our experience of last year in that line but after carefully examining the Light Weight I changed my mind and am coming back strong for the Excelsior and especially for the Light Weight. Our experience with the Smith Motor Wheel last year demonstrated fully to me that there is a great field for the Light Weight, inexpensive machine.

We received our first shipment of the machines Saturday morning and the crowd around the Motorcycle store from early morning until closing time Saturday night brought back memories of the old days of 1912-1913 when motorcycles were so popular. I expect to have a waiting list before this week is out. I think we must have had 50 people ride the Light Weight Saturday, and everyone was enthusiastic over it, even to some of the riders of big machines, and I believe that the sale of a large number of Light Weights will mean an increased sale later on of the larger machines as it will bring new riders into the field.

Again assuring you of our allegiance to the Excelsior line and with best personal regards to yourself and Mr. Schwinn, I beg to remain

Yours truly,
BRANCH'S, INC.

They All Chose Belt Drive

The Pope Lightweight
The Miami Power Bicycle
The Cyclemotor

THE unanimous decision of these three corps of engineers is conclusive evidence of the superiority of belt transmission for Lightweight Motorcycles.

Not one man, not two men in an organization, but three separate and distinct groups of men, each with keen determination to produce a satisfactory and popular product, all agree that the right method of transmission is belt transmission.

When three groups of engineers decide upon belt transmission, that decision is proof of careful judgment, but when all agree that the belt to make their transmission a success must be the Spartan Belt, a decision has been made which must be considered conclusively convincing.

Mr. Dealer—take on a Lightweight Motorcycle for 1916, extend your field, reach every man with "Everyman's Motorcycle," but be sure the Lightweight Motorcycle you select is a belt drive motorcycle fitted with a

Publicity's rays now envelop the four men who are more accustomed to shedding it on others than to having it turned upon themselves.

Men of the trades, we present for your inspection—favorable or otherwise—the pristine, beaming, freshly-shaven, more or less presentable countenances

The Editor

Step up, Mr. J. H. Donehue, and be Bertilloned. "Don" is one of the few living editors in captivity who is always approachable. Note the significant "Come In!"—over his head. His "nose for news" has been remarkably well developed by eleven years' experience on big Eastern newspapers, such as the New York Tribune, the Philadelphia Ledger, Camden, Newark and other dailies. As O. Henry so aptly says, he was "the king-pin, the snowy-petalled Marguerite, the star-bright looloo of the rewrite men." His unerring news-sense stands him in good stead in reducing to pithy paragraphs the essence of the "doings" in the motorcycle industry. In the bright lexicon of "Don" there is no such word as "slush." That's why every line in Motor Cycle Illustrated and Bicycling World is crammed full of FACTS.

Then, too, "Don" is one big bug on motorcycle riding. He rides a ..... machine (name deleted by censor) and thinks it's a darn good boat.

(Note to motorcycle advertisers: Make the most of this.)

The Bicycling World

Mr. A. E. Bott, our nimble-witted Adonis, came to grace the office with his presence when the famous "Bi-World" was joined to Motor Cycle Illustrated. He brought with him an abiding faith in the bicycle and a record of several years' consistent work on several leading New York papers. He keeps our hundreds of Bicycling World correspondents in line—what? No, Clarice, his hair is **not** marcelled; it's a natural wave. Er, as we were saying—he keeps tab on the "Bi-World" correspondents, edits all the bicycle news of the week, makes up the paper, re-writes a great deal of motorcycle news and does a few other things. But the "Bi-World" is his baby, and you have but to glance at the bike section in this issue to see that he need not be ashamed of his "chee-ild."

Why do we "ballyhoo" our Editorial Staff, ask you in wondering tones? BECAUSE WE'RE PROUD OF IT. Because we feel that you, who have doubtless oftimes commented admiringly on this or that feature in MOTOR CYCLE ILLUSTRATED and BICYCLING WORLD, should know better the men who are constantly changing the scenes behind the big curtain of the MOTOR CYCLE ILLUSTRATED'S cover—and know WHY it is possible to put out every

Motor Cycle Illustrated and Bycl

Digitized by Google

of the four men who guide the destinies of the Editorial Department of MOTOR CYCLE ILLUSTRATED and the Bicycling World. All of 'em are old-timers—they're well-known to quite a few in the trade—but in order to give them 100% trade "circulation" we use the columns of our journal.

Art (Capital A)

LAY-DEES and Gentlemen: Permit us to introduce for your kind attenshun Mr. Arthur T. Merrick, our chief Art contributor. If you read Judge, or Life, or Leslie's Weekly you will not infrequently find Mr. Merrick's work featured there. Yeh, he plays big time, too. But the best part of it all is—"ATM" is such an out-and-out, red-hot, dyed-in-the-wool motorcycle fan that he takes the keenest delight in putting upon paper with brush and pen every phase of the most fascinating game in the world—at so much—oh, so much—per phase. Mr. Merrick graduated legitimately into the motorcycle division, having been an ardent bicycle enthusiast and one of the real "old-timers" in the League of American Wheelmen. Watch Mr. Merrick's work—it tells the story of his ability better than we can.

Technical

Mr. Douglas R. Hobart—he's muckle Scotch—plays the "heavy" in this four-part drama. He knows so durned much about motors! His brain must be one big internal combustion engine. There's a standing reward offered for anyone who can formulate a legitimate problem in gas engine design, construction or operation that Mr. Hobart cannot answer. That's a big order, but look at his record! In 1905 he graduated a Mechanical Engineer at Columbia University. Had charge of Gas Engine Testing Department. He then worked for the American Locomotive Company, Autocar and Leon Berliet, in France. He is contributing editor to 'most every Automobile paper in America, France and Spain. He's been an official judge in countless F. A. M. meets and endurance runs. Mr. Hobart is competent to advise YOU on your mechanical problems. Consult him through the paper.

week—such a complete, workmanlike newspaper of the cycle field—a faithful reporter and interpreter of cycle events. The paper is not perfect; we should not want it so—for that would mean an end to our ambitions. But we feel that the human material we have to work with is of such a quality that the paper can be made perfect—and that is the goal of our desires.

4 SPARK PLUGS IN EACH CYLINDER!

BETHLEHEM FIVE POINT SPARK PLUG

The man who uses the BETHLEHEM in his motor has the equivalent of four spark plugs in each cylinder! The five extra-heavy, pure nickel electrodes thrust a blazing spark deep into the motor, and even should one electrode fail there are always three others to take up the work.

Consider this one big feature carefully, dealers, when stocking up for the spring drive—also the fact that the BETHLEHEM FIVE POINT SPARK PLUG IS GUARANTEED FOR THE LIFE OF THE MOTOR.

Such a sweeping guarantee is only possible with a plug built as is the BETHLEHEM—with engineering skill of the highest—steel of the finest—and, finally, tests of the most gruelling character, on all types of motorcycle motors.

BETHLEHEM SPARK PLUGS SHOULD BE IN YOUR STOCK.

What Confidence Will Accomplish

Mr. James G. Burroughs of Bridgeport, Conn., who last year sold another make, took on the Harley-Davidson line at the beginning of the 1916 season, dropping the other make, and contracting for 100 Harley-Davidsons.

February 1st Mr. Burroughs increased his contract to 200. To date we have shipped him 90 machines, although his total actual sales, including orders for future delivery, are well in excess of his original contract for 100.

Last year only 3 Harley-Davidsons were shipped into this same territory before March 1st, and Harley-Davidson sales there totaled 31 for the 1915 season.

Mr. Burroughs has gone after business with the spirit of the 1916 season—the new confidence—and his business shows that so far he has more than succeeded in getting what he went after.

The Race is On

It's a handicap affair. The dealers in the Southern States are already under way, while those further north are starting in at the first crack of the sales gun that heralds open roads.

THEY ARE ALL TRAVELING LIGHT. The word has gone forth that the lightweight will be the big seller this year. The dealers see that the mighty field for motorcycle sales lies among the mechanics, the farmers, and all those who desire a runabout machine. They are convinced that the lightweight is the logical machine for this work.

And the POPE LIGHTWEIGHT MODEL H-16 is easily the favorite. Dealers know that this model appeals to the widest possible field of prospects because of its low cost, simplicity of operation, lowest-of-all upkeep, and long tire mileage. As the price of gasoline goes mounting they have a stronger and still stronger talking point in the low fuel consumption of the H-16.

They realize that in the seven years that this model has been on the market it has been tried and proven—and that it has made good. They know that it has sufficient power and speed for ordinary work—and that its scientific design, skilled workmanship and high-grade materials assure it the one supreme quality—dependability.

Is the Pope Lightweight your equipment for the Spring sales race—if not, just ask for our catalog and dealer's prices.

BLUE STREAKS

A Standard Bicycle Tire at $2.50 Each

Do you really want to eliminate the factors in the bicycle business that have been its own worst enemies?

Do you want to eliminate factors in bicycle tire selling methods, that you would not permit for a single moment in any other line you carry?

Lack of faith in tires and tire prices has kept thousands of people from purchasing bicycles; people who did not care to renew old grievances against the Dealer in bicycles and bicycle tires.

Now, so far as Goodyear Dealers are concerned, that is ended.

We have standardized the brand—it is the Goodyear Blue Streak Non-Skid, the best tire value we can build.

We have standardized the price—it is $2.50 each to riders everywhere.

We have standardized the guarantee—it provides both the dealer and the rider with a new tire free if the service is unsatisfactory.

You can always tell the Goodyear by its beautiful white tread, with the Blue Streak on each side.

The price to dealers is the same whether 10 pairs or 100 pairs are purchased.

More than 7000 Dealers have accepted this Goodyear Square Deal Policy. Don't you believe it would help your bicycle sales too? Then write us for complete Goodyear Dealer's Bicycle Tire Proposition.

ASKS FOR RECIPROCITY ON MOTOR VEHICLES

Bill Introduced in Congress Would Enable Owners of Motor Vehicles to Travel in Any State Without Paying Any Additional License Fee—Will Include Motorcycles

WASHINGTON, D. C., Feb. 29.—An important bill has been introduced in Congress by Representative William G. Adamson, of Georgia, which provides for the national reciprocity for motor vehicles. If this bill be enacted into a law, a motor vehicle registered in one State may go through any other State, District, or Territory, without securing any additional license or paying a special fee.

In part the bill reads as follows: "No person personally qualified under the laws and regulations of the State, Territory, or District of his residence to use and operate such vehicle or vehicles shall be required in any other State or Territory or District into which he may go for business or pleasure, to make any additional registration or take out any additional license or tag or pay any additional tax in order to use and operate any such machine. Nor shall any owner of such vehicle, who has complied with the laws of his own State, as to registration, license, tagging or tax, be required, in order to operate the same vehicle in any other State, Territory or District, to make any additional registration, or secure any other license or tag or pay any additional tax.

"The certificate of the proper local officers shall, when demanded, be taken and accepted in all States, Territories, and Districts as competent and sufficient evidence that such person has complied with the laws and regulations of the State, Territory or District of his residence, but nothing herein contained shall be construed to exempt any person from the police regulations of any State, Territory or District into which he may go, save only the additional registration and the taking out of additional license or tag or paying of additional tax in case he shall have complied with the laws and regulations of his own State, Territory or District."

Although, after reading the bill carefully, it seems evident that the measure is intended to include motorcycles, yet no mention is specifically made of the motorcycle in the preamble. Former F. A. M. Commissioner John A. Hall, of New York, who was instrumental in having the first Cristman bill in New York killed last year, interviewed a number of prominent officials and attorneys in Washington recently regarding the necessity of having the word motorcycle included in the preamble of Representative Adamson's bill. Opinions differed as to the necessity of inserting the word, but all agreed that it would leave no possibility of a doubt if the word were placed in the preamble.

Mr. Hall has taken this matter up with several members of the upper and lower houses of Congress, and at this writing it seems probable that the word motorcycle will be inserted.

A canvass of the several members of Congress indicates that there is a strong sentiment in favor of the bill. The automobile interests are strongly backing the measure, and Mr. Hall believes that motorcyclists can help to facilitate the passing of the Adamson bill by writing to their representatives in Washington and expressing their hearty approval of the measure.

JOHNS DENTS THREE RECORDS AT PHOENIX

Wigwam Lad Knocks Edge Off Five, Ten and Twenty-Five Mile Marks With Graves and Boido as Runners-Up

PHOENIX, Ariz., Feb. 28.—Don Johns romped off with fifty per cent. of the prize money in the race meet held here Sunday, the 27th. Incidentally he grabbed off new five, ten and twenty-five mile records.

In the five-mile professional event which opened the card, Johns, on his Indian, was first in 4:04⅗. Morty Graves, also mounting an Indian, was second by a neck. The previous record for five miles was 4:15. It was hung up by "Red" Parkhurst, Harley-Davidson, in 1914. Johns used Goodyear Blue Streak tires and Berling magneto; Graves had his mount fitted with Goodyear Blue Streaks, also, and his magneto was a Dixie.

In the one-mile time trial, Johns was first in 47⅗ seconds. Lorenzo Boido, Indian, made second best time—51⅖ seconds.

In the ten-mile pro. feature, Johns showed the way home in 8:18⅕. Graves broke a piston and Boido went into second place.

The fifteen-mile Arizona championship went to Boido, on his Indian, his time being 13:07. Crandall, Harley-Davidson, was second.

Johns carried off the honors in the twenty-five-mile dash; time, 20:47⅕. Graves threw a tire in the seventeenth mile and went out. Boido broke his gas line, but managed to make repairs and finished in second position.

The Australian pursuit race also went to Johns. He passed Boido in 8½ miles, having covered this distance in 6:06.

Cloudy weather and lack of transportation facilities to the track kept down the attendance. The prizes totaled $300.

STEWART-WARNER LOCATES CANADIAN BRANCHES

TORONTO, Ont.—The Stewart-Warner Corporation has made arrangements for the establishment of a chain of branches throughout Canada with headquarters at Toronto. Donald F. Johnston, until recently manager of the San Francisco branch of the company and formerly a Toronto man, has been appointed sole Canadian distributor for the Stewart-Warner products. The Toronto office will be located at 486 Yonge street. Mr. Johnston is a relative of President F. A. O. Johnston, of the Canada Motorcyclists' Association.

Other branches will be located in the near future.

Digitized by Google

WINNERS AT HONOLULU MOUNT EXCELSIORS

CHICAGO, Ill.—The Excelsior Motor Mfg. & Supply Co. has just received a cablegram from Honolulu, H. I., reading as follows:

"Ten-mile event: Cummings, first; Ropero, second; Markham, third. Fifteen-mile feature: Walters, first; Cummings, second; Ropero, third. All the victors rode the Excelsior."

The cable refers to a race meet staged in Honolulu a few days ago and indicates that the racing game is progressing satisfactorily in Hawaii and that the Excelsior is doing its part to acquaint the native speedsters with the "kick" that is stowed away in motorcycles from the States.

PENNSYLVANIA TIRE SALES TOTALED $4,000,000

JEANNETTE, Pa., Feb. 29.—The Pennsylvania Rubber Co. did about $4,000,000 worth of business during 1915, and realized earnings that were the most satisfactory in the history of the company, according to the report presented to the stockholders at their annual meeting.

Increases in the sales of both the new Ebony Tread tire and the well-known Vacuum Tread have necessitated increasing the plant, and an output of 2,000 tires daily is to be reached shortly.

Officers of the company have been re-elected as follows: President and treasurer, Herbert DuPuy; vice-president, C. M. DuPuy; secretary, George W. Shively; assistant treasurer, C. G. Morrill; general manager, Seneca G. Lewis. The directors include the officers and Herbert DuPuy, chairman, and H. W. DuPuy.

A BIG ADDITION FOR A. SCHRADER'S SON

BROOKLYN, N. Y., Feb. 29.—A. Schrader's Son, Inc., of 785-95 Atlantic avenue, Brooklyn, manufacturers of Schrader valves, Schrader universal tire gauges, and the Schrader universal pump connection, has increased its factory floor space and production facilities more than 70 per cent.

When this extensive addition to the original factory was planned a year ago, it was considered ample to take care of the increase of business for several years, but during the time required for the completion of the building the volume of business has grown to such an extent it is already necessary to look forward to acquiring more floor space in the near future.

U. S. TIRE MEN HEAR ABOUT PREPAREDNESS

NEW YORK, Feb. 29.—The Eastern District Sales-managers of the United States Tire Company were in convention during the last week at the New York headquarters. Thursday afternoon all of the sales managers in attendance and the male employees of the New York offices gathered at the West Side Y. M. C. A. Auditorium to hear a lecture in the interest of national preparedness.

Col. Samuel Pomeroy Colt, president of the United States Rubber Company; J. N. Gunn, president of the United States Tire Company; Raymond B. Price, vice-president of the tire company, and, in fact, all of the United States Rubber and Tire officials are intensely interested in the subject of preparedness.

MANY DEALERS ATTEND FIRESTONE RALLY

FIRESTONE dealers in 35 counties of Ohio and 12 in West Virginia celebrated Firestone Day, February 17, in Columbus, O. They had been called to a convention at the Virginia Hotel, and besides listening to various officials of the Firestone Tire & Rubber Co., Akron, O., outline the plans for growth during 1916, they inspected a rubber forest, set up in the lobby of the hotel, for the purpose of illustrating the methods of collecting the essential latex.

"NEVER AGAIN," SAYS HE

WASHINGTON, D. C.—Here's a little news story with a moral. If you can't detect the news, you will at least discover the moral.

A few months ago a prominent member of the National Capital M. C., and a motorcycle rider of long standing, was bitten by the light motor car bug. A smooth-tongued salesman convinced him that it would cost him no more to operate the light car than it did to run his motorcycle. Said agent also made an allowance on the motorcycle, and the deal was closed.

Two months ago the "flivver" began to give trouble and repair bills mounted up. Gasoline sold this week in Washington at 25 cents a gallon, and our friend's repair bill last month approximated $30. Being a government clerk on a moderate salary he saw but one way out. He sold the light car, losing exactly $150 on the transaction, but he had enough left to buy a motorcycle—which he immediately did.

"Never again," he remarks significantly when some one mentions the light car as a competitor of the motorcycle.

IVER JOHNSONS GOING TO SCANDINAVIANS

FITCHBURG, Mass.—The British admiralty has been petitioned by the Iver-Johnson Arms & Cycle Co., of this city, for a guarantee of "safe passage" for a big order of motorcycles purchased by a Scandinavian country.

The officials of the company after receiving the order had work started at once on the manufacture of the machines, but has decided not to make any shipment until such time as assurances are given that the ship on which the motorcycles will be carried will not be attacked.

Motorcycles are not regarded as contraband, but as there might be some suspicion that the machines would eventually go from the Scandinavian country to which they would be consigned to Germany or Austria, and because of the heavy loss that would result from their seizure by the British, the local concern decided to first try to get assurances from Great Britain for "safe passage" over the seas.

FISK SALES FOR YEAR FOOT UP TO $14,500,000

CHICOPEE FALLS, Mass., Feb. 29.—Sales for the fiscal year of $14,500,000, with net profits of $1,791,579, were reported at the annual meeting of the Fisk Rubber Co., held here February 18. The regular quarterly dividends of 1¾ per cent. on the preferred stock, payable May 1, and on the second preferred stock, payable June 15, were declared.

The officers and directors were re-elected as follows: President, H. T. Dunn; vice-president, E. H. Broadwell; chief engineer, John Kearns; sales manager, J. D. Anderson.

U. S. TIRE CO. SETS UP TOPICAL WINDOWS

NEW YORK, N. Y., Feb. 29.—The United State Tire Company has been staging a series of window displays on the ground floor store front of its large quarters in the U. S. Rubber Building, at 58th street and Broadway. A setting was arranged with a bust of Lincoln as the centre attraction on Lincoln's Birthday, and this was surrounded and flanked by U. S. tires. On the background was hung a map of the Lincoln Highway, with four flags.

An appropriate window display was set up for St. Valentine's Day, with a conventional "Kewpie" in the centre, three tires again forming the support. Arrows, hearts and a mail bag overflowing with letters were also employed.

SALESMEN'S CONGRESS TO MEET IN JULY

DETROIT, Mich., Feb. 29.—The World's Salesmanship Congress, in which District Manager W. C. Standish, of the U. S. Tire Co., figures prominently as a member of the executive committee, will be held in this city on July 9 to 13, inclusive. This will be the first of a series of annual conventions of salesmen and executives in every line of business activity.

The Congress is the outgrowth of the Salesmanship Club of Detroit, and lists among its members the names of salesmen and sales managers widely known for their ability and achievements. The object of the congress is to facilitate the interchange of the newest ideas and methods in selling.

BECK'S SHIPMENTS GOT STARTED IN TIME

NEW YORK, Feb. 29.—Irving Beck, representing the Rogers sidecars in the East, is feeling pretty elated at the prompt shipment of a double carload of sidecars and sidevans from the factory of the Rogers Manufacturing Company in Chicago on February 25. One of the reasons for Beck's joy is that the shipment was on the way prior to the embargo on freight for New York, declared by the railroads on February 26. This means that the shipment will come through and that Beck will be plentifully supplied with Rogers products to care for the March trade.

HUGE GOODYEAR ORDER FOR GREAT BRITAIN

Director Harrison B. Ball, of Goodyear Tyre & Rubber Co., of London, Contracts for Sixty-one Carloads of Tires, Seven Carloads Being for Motorcycles, on Visit to Akron

NEW YORK, Feb. 29.—Harrison B. Ball, director and secretary of the Goodyear Tyre & Rubber Co., Ltd., of London, England, has just completed his annual trip to the United States to confer with the Goodyear Tire & Rubber Co. in Akron, O., and to attend a number of important business conferences. He has ordered 61 carloads of Goodyear tires to be sent to Great Britain, and seven of these are for use by British motorcyclists both for War Office and for private use.

Successful from the Start

In an interview to-day with a **Motor Cycle Illustrated** representative at the Hotel Astor Mr. Ball spoke of the excellent business which had been transacted by the London Goodyear house since its establishment three years ago. "We started in a modest way," said the genial Goodyear director, "and at the end of two seasons practically 22 per cent. of our business abroad was done with British merchants. We moved to larger headquarters each season, and in spite of the war are pretty well crowded in our present ones.

"When the war started British banks closed for ten days and credit was practically denied in many lines of business. The Goodyear firm, however, extended credit where English tire firms were chary of doing so, and trade with us advanced very rapidly. As the situation cleared our British competitors extended credit also, and things boomed for all in the tire business. To-day the Goodyear Tyre & Rubber Co. is ranked among the leaders in output in the British Isles and is officially rated as tied for third place by the British trade authority. We have, in fact, been doing a phenomenal business in the last two seasons, or since the opening of the war."

Rim Sizes are Confusing

When questioned concerning motorcycle tires Mr. Ball stated that sales in these had not progressed in proportion to those of Goodyear automobile tires. "The multiplicity of rim sizes, all with the same markings, has worked against voluminous sales of the motorcycle casings," he said. "By this I mean that there are probably a dozen different 26 x 2¼ inch rims (the recognized size in Britain), all from different motorcycle makers. The war prevented the Cycle Traders' Union from adopting a standard profile of rim, but with the cessation of hostilities this will be used widely, and the chief difficulty in our selling motorcycle tires will be done away with. Obviously, we could not manufacture 26 x 2¼ inch tires in ten or more different dimensions of bead, distances across the clinches and wall thicknesses.

Big Business After the War

"With regard to what will happen after the war, I could not venture to predict," continued Mr. Ball. "There will be a big resumption of trade, of course, and British makers may be a bit hard put to it to supply the demand. I feel confident that Goodyear will keep on growing in both the motor car and motorcycle lines, as it has since the house was first established in England, for I can by no means consider that our remarkable success has been but temporary and due to the demands of war only."

AMERICAN MOTORCYCLES WIN TORONTO FIELD

Last Active Agency for British Machines in Canadian Metropolis Shifts to the Reading Standard—Four Toronto Dealers Handle Ten Makes of Motors from the States

TORONTO, Ont.—A sign of the times is the passing of the last active agency in Toronto for British motorcycles. One by one, each of the six Toronto dealers who had been handling English-made mounts, have either thrown up the sponge or have transferred their energies to the sale of motorcycles made in the United States. The latest to make the change was William Porter who sold the Douglas, Matchless and Brough makes. He has announced that he can get no more single-trackers from across the pond and has taken an agency for the Reading-Standard, a shipment of which he has already received.

Not more than eighteen months ago ten different English makes were being offered for sale in this city by six different dealers, but the American manufacturers have captured the whole Canadian market. The history of the transformation is as follows:

How the Changes Were Made

Porter was selling the Douglas and Matchless when war broke out. Finding it impossible to secure further shipments of either of these makes because of war's demands, he secured an agency for the Brough. Before 1915 was out, however, he could not secure any more of this make so he has taken the Reading-Standard.

Herb Greenwood, one of the first motorcycle dealers in Canada, was selling all the Triumphs he could secure, but with the outbreak of hostilities he practically went out of business.

Walter Andrews was selling the B. S. A., as well as American machines, and he is now selling only Harley-Davidsons.

In 1914 the British-Canadian Import Company were doing a fair business in the sale of Wolf, Chater-Lea and other British makes. This firm has gone out of business entirely.

The Anglo-Canadian Motor Sales Company started to sell Rex and Zenith motorcycles in 1914, but this company has also gone to the wall.

Sam Bulley was handling the Humber before the war started, but he is now doing well in bicycles and accessories.

There are four bona-fide motorcycle dealers in Toronto at the present time and they sell ten different makes of motorcycles, five of which are lightweights or motor attachments for bicycles. The four dealers are: Percy A. McBride (Excelsior, Henderson and Miami Power Bicycle); H. M. Kipp & Co. (Indian, Tiger and Dayton lightweight); Walter Andrews (Harley-Davidson), and William Porter (Reading Standard). The Smith Motor Wheel and the Cyclemotor are also sold by several retailers.

BUFFALO FIRM EXPLAINS COURT ACTION

ASSERTING that an article recently published in these columns concerning its suit against Van Cleef Brothers was misleading, the Buffalo Specialty Co., of Buffalo, has submitted a letter in which it sets forth the basis of the suit and the disposition made of it by the courts.

The Buffalo Specialty Co. states that it had never manufactured Neverleak Tire Fluid under a patent, and that the patent referred to in the printed article covered a tire "treated with a tire fluid," and therefore should not be considered in extenuation of the fact that the Van Cleef company used the name Neverleak following the expiration of said patent. In other words, the Buffalo Specialty Company explains that the patent which expired had nothing to do with Neverleak Tire Fluid.

The Buffalo company further points out that the Circuit Court of Appeals upheld its claims fully and remanded the case to the lower court "for proceedings consentaneous with this opinion." It is stated further that no negotiations for a settlement were opened by Van Cleef Brothers until after the Circuit Court of Appeals had rendered its verdict in support of the Buffalo Specialty claims.

HALEDON M. C. DANCE

PATERSON, N. J., Feb. 29.—The Haledon Motorcycle Club will hold a dance on April 28 at the Masonic Hall. The committe in charge of the affair is headed by William Burgess and "Bunk" Fielding. An invitation is extended to all motorcycle clubs to attend. The proceeds of the dance will be used to furnish the club's new quarters at 147 Elliston street.

WHAT IS YOUR DETAILED IDEA OF A SATISFACTORY RIDING COSTUME?

Motor Cycle Illustrated Offers Cash Prizes for the Most Practical and Helpful Letters and Photographs Describing Apparel for Roadwork—Send Your Contribution in Without Delay—The Accompanying Article Tells All About the Contest.

SPECIAL CLOTHING SECTION IN MARCH 30 ISSUE

ASSUMING that you are one of those cyclists—their ranks are rapidly growing, by the way—who wish to present a neat appearance on the road without undue flattening of the wallet, and who feel some uncertainty as to the best method of combining attractiveness, durability and moderate cost, you will be interested in the announcement that **Motor Cycle Illustrated** will devote a special section of the March 30 number to clothing for the rider. After you have read the interesting, practical and instructive material concerning road togs in that number you will be ready to select that riding outfit you have been thinking about—to attire yourself from top to toe with proper regard for both economy and neatness.

A RIDERS' CLOTHING CONTEST

In connection with the special section referred to, **Motor Cycle Illustrated** will award cash prizes of $10, $5 and $3 for the most practical and helpful letter, accompanied by a photograph, showing what the cyclist requires in a costume.

If a contributor has found what he considers a satisfactory riding outfit he will be expected to describe it fully, point out all its advantages and furnish a photograph showing the costume in use. The photograph is essential, as it will prove that the outfit has really seen practical service on the road. The descriptive letter and the photograph must be mailed together, and both must bear the contributor's name.

SYSTEM OF AWARDING PRIZES

The awards in the Riders' Clothing contest will be based on the following percentage system: Appearance, 35 per cent.; adaptability, 20 per cent.; durability, 20 per cent.; comfort, 10 per cent.; inexpensiveness, 10 per cent.; demonstration, 5 per cent.

Appearance—Under this heading the costume suggested will be considered from the viewpoint of its appeal to all who may see it—non-riders as well as other cyclists. It must be kept in mind that a satisfactory riding costume should create an equally favorable impression when the rider is away from his mount and when he is in the saddle.

While the suit proper—that is, the coat and pants—will naturally receive first consideration it must be remembered that no riding outfit is complete without puttees or leggings, gloves, cap and goggles. Some riders may consider a jersey or sweater among the essentials, according to the conditions of weather. In other words, this contest will be based upon the points scored by the complete riding outfit—from cap to leg covering.

READ ALL THE CONDITIONS

Adaptability—Is the costume you are going to describe suited to the special service in which it will be used? Has it been designed so as to meet all the specific requirements of the cyclist? Those are the questions to be considered under the adaptability heading. Oviously, a riding costume may present an excellent appearance without being at all suited to month-in-and-month-out wear in the saddle of a motorcycle.

Durability—This heading explains itself. If the costume will wear well under the varying conditions of road and weather to which it will be subjected—if it is of such weight, texture and pattern as to give the user maximum service it will be entitled to the full count of 20 per cent. for its durability.

Comfort—Admitting that a riding costume is attractive in appearance, well adapted to the special conditions of cycling, and assured of long life, the next question is "Can the rider wear it with comfort?" Under this heading must be considered weight, the proper distribution of pockets, method of lining, style of collar and cuffs, the method of reinforcing the seat of the pants and of fastening them at the knees, etc.

Inexpensiveness—A costume might easily be placed beyond the reach of the average rider through a prohibitive price, although combining most of the other desirable features of a standard riding outfit. Can the average rider who wishes to present a good appearance afford to invest in the suit you suggest? That's the big question under this heading.

Demonstration—The photograph will cover this point. It will show that the suit has been tried out, and that the contributor is basing his suggestions upon actual service obtained.

ASK QUESTIONS, IF NECESSARY

As all cyclists—and those interested in cycling who may not at this time be riders—are fully cognizant of the conditions under which a road costume is used, of the features essential to it and of the impression it is desired to create, it is not considered necessary to dilate further upon the conditions of the contest. If additional information is desired, however, questions may be addressed to the Editor, **Motor Cycle Illustrated**, 13 Park Row, New York, and prompt replies will be given by mail or in these columns.

Aside from the awards that are made in the contest **Motor Cycle Illustrated** will pay one dollar for every riding costume photograph that is reproduced in the columns of this journal.

Should two letters and the accompaning photos be considered of equal merit each of two contributors will receive the full amount of the prize. For example, if two contestants are tied for first place, each will receive an award of $10.

THERE IS NO TIME TO LOSE

Each letter will be limited to 500 words. It must be written one one side of the paper and must carry the full name and address of the contributor. All letters, in order to be considered, must be in the office of **Motor Cycle Illustrated** not later than 5 p. m. on Saturday, March 25.

The editors of this journal will act as judges of the contest.

There is no time to be lost. Hustle out a pen or throw your typewriting machine into "high" and go to it. Tell the story of your ideal riding outfit and cop off one of the cash prizes—$10 for the best letter; $5 for the second best, and $3 for the third, *and don't forget the photo!*

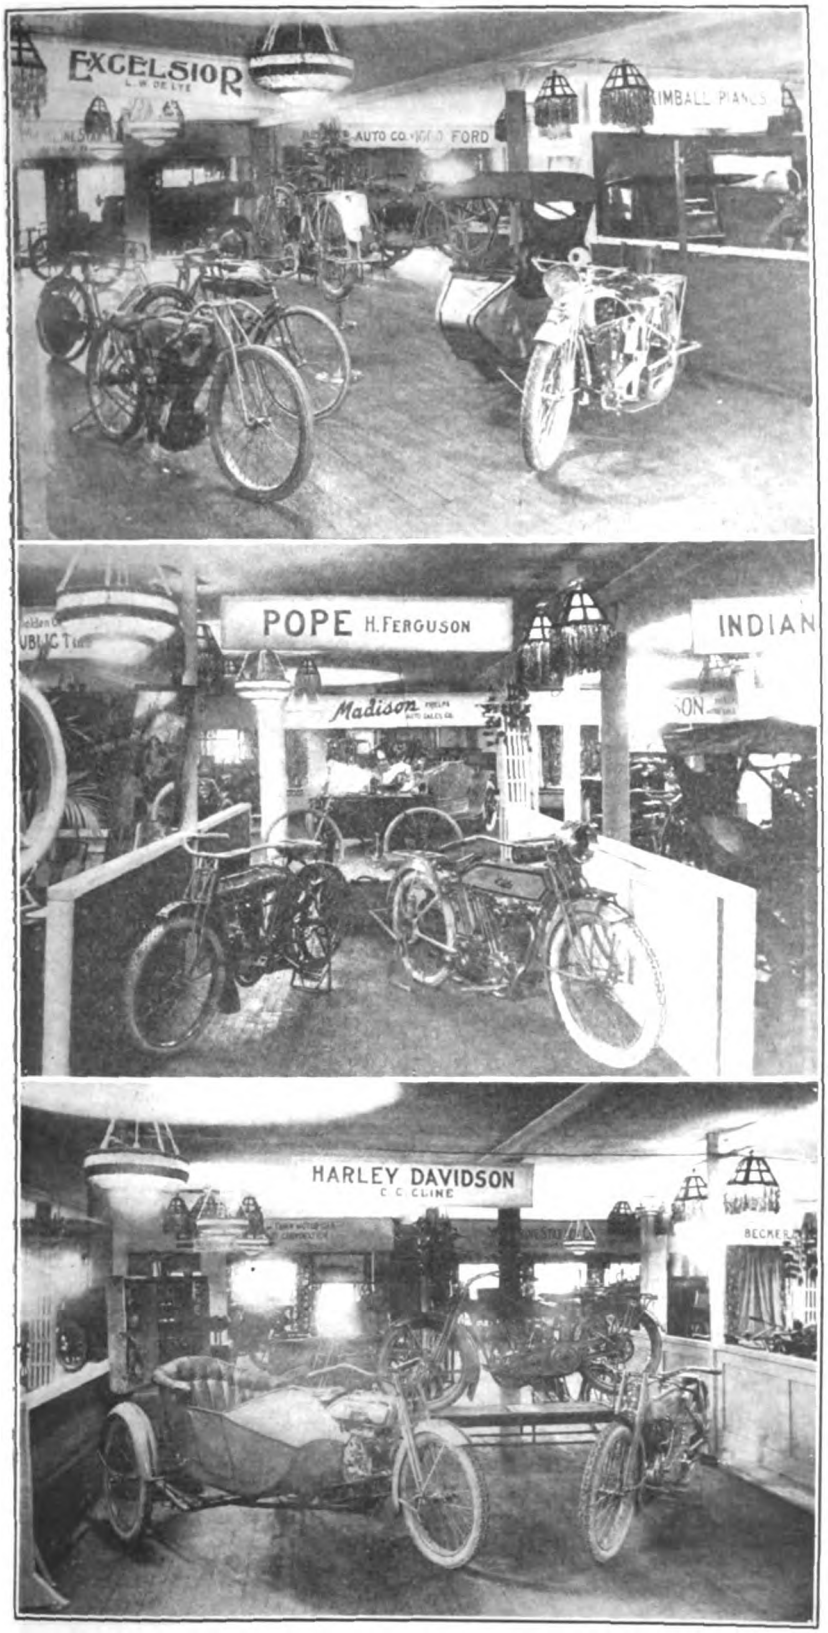
LIGHTWEIGHT MAKES HIT AT GRAND RAPIDS SHOW

Enthusiastic Crowds From All Sections of Michigan Throng the Show—Five Makes of Motorcycles Are Exhibited—Dealers Pleased With Business Results



Top, Excelsior Exhibit of L. W. DeLye, Showing Racing Mount, Combination and Cyclemotor in Foreground; Center, Where H. Ferguson Showed Pope Models; Bottom, Harley-Davidsons Exhibited by C. C. Cline

GRAND RAPIDS, Mich., Feb. 29.—The local automobile and motorcycle show which was held here last week attracted a large crowd of motor enthusiasts from all over the state. The motorcycle section came in for its share of praise and attention. The lightweight roused as much curiosity as the heavyweight motorcycle sidecar combinations. Workingmen were especially impressed by the lightweight, the small initial cost and low running expense making a strong appeal.

The "woodhicks" (lumberjacks) from upstate were there in all their resplendent glory, bedecked in felt socks and rubbers, topped by a mackinaw of a gaudy hue. Their comments were humorous, to say the least. For example, one expressed a desire to know where the other wheel was on the sidecar outfit. The ever-present gay young flappers were there in abundance, and at times it was almost necessary to resort to a block and tackle to remove them.

Honors were about evenly divided between the Harley-Davidson and Excelsior exhibits for the most complete and unique display of machines. L. W. DeLye displayed a big Excelsior electric three-speed and sidecar combination, a regular three-speed twin equipped with a police motor, a baby X lightweight and Carl Goudy's machine. The cyclemotor and the Smith motor wheel also were displayed by DeLye.

The side car and commercial van occupied a prominent place in the Harley-Davidson booth and kept the attendants busy expounding the merits of both. A single three-speed and short coupled model were displayed, while a three-speed twin electric was made a feature of the exhibit. Cline, the local dealer, also displayed the new Dayton motor bicycle. Hap Scherer, of the Milwaukee factory, was on the job the entire week giving practical demonstrations of the running qualities of the Silent Grey combination.

P. R. Eaglesfield, chief of the local wigwam, showed a three-speed electric Powerplus side car combination, a rigid frame three-speed, in addition to a spring frame regular three-speed and the new Featherweight, the latter being the centre of interest. Eaglesfield was well pleased over the results of the show, especially the interest displayed in the Featherweight, as he is convinced there is a good market here for this type of machine. Howard Ferguson displayed a big three-speed Pope, a lightweight and the Pope bicycle line, making a feature of the cutaway motors used at Chicago. W. F. Stadel showed a Reading-Standard twin.

A. R. Ketcham, Ex. Mich. F. A. M. Commissioner, made his official re-entry into motorcycledom in the capacity of road man for the Svensgaard Sales Corp. Detroit and was in attendance all week at the X booth. Tom Martin, of "Tojapines" fame (code word, Tour of the jack-pines), was there exploiting the merits of the good old X in his new capacity as salesman for Bill DeLye.

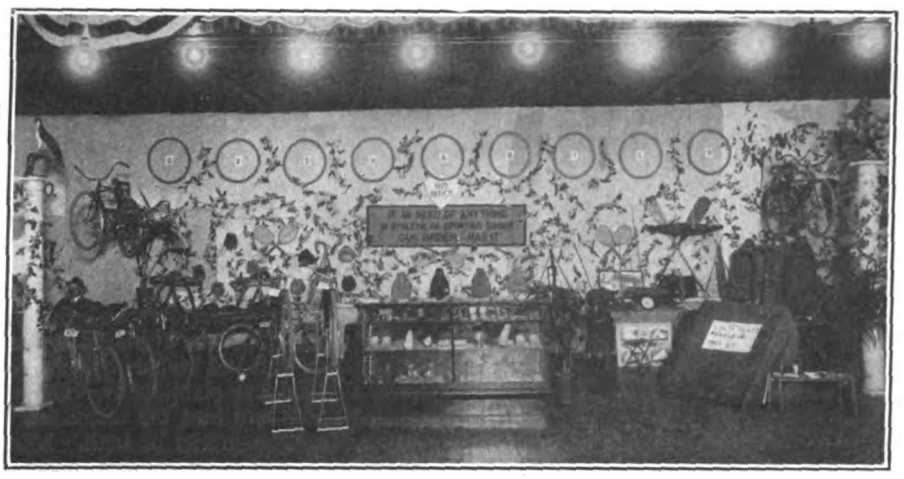
INDIANA CYCLE SHOW DRAWS BIG CROWDS

Thirty Exhibitors Enjoy Brisk Business at the Three-Day Cycle Show in Indianapolis—Large Attendance of State Dealers Makes Things Interesting for Factory Men

Where Merz Motor Co. Displayed Full Line of Excelsiors



Stand of Gus Habich, Featuring Bicycles and Accessories

INDIANAPOLIS, Ind., Feb. 29.—The second annual Indiana Cycle Show opened its doors in this city on the evening of February 24, with thirty exhibitors represented on the floor. The show lasted for three days and from both a business and a social viewpoint it was a decided success. The attendance of the state dealers on the opening day far exceeded the fondest hopes of the jobbers and manufacturers who were exhibiting.

The first night was "Kids' Night," and the host of youngsters who crowded the hall were made happy by the thousands whistles which were distributed by Van Cleef Bros., of Chicago. A negro orchestra and quartette kept the crowd coming in large numbers on the second night, while on the last evening the place was jammed.

Interest in the Cyclemotor

The booth of the Cyclemotor Corporation was one of the chief centers of interest and the throngs that inspected the bicycle motor attachment kept Sales Manager Anderson and his assistants stepping rather lively. Much attention was also attracted to the stand of the Davis Sewing Machine Company, where the Dayton Motor Bicycle was prominently featured. The Cygnet rear car proved to be a strong magnet, the G. H. Westing Company displaying its Cygnet demonstrator.

In the Cleveland booth, which was in charge of C. E. Hauk, two lightweights and a cut-out model were shown, Douglas and Talcott, the local agents, also being in attendance. George Evans, of the Excelsior factory, was also on the job and ably assisted by John Merz, the Indianapolis Excelsior agent; he was certainly kept busy introducing prospects to the new Excelsiors.

Guessing Contest a Hit

One of the big hits was the guessing contest, staged by the W. A. Kelso Company. This concern showed a bicycle covered with varicolored dots, and all of the visitors were allowed to guess the number of dots on the machine. The winner was presented with a high grade bicycle. The exhibit of the H. T. Hearsey Company, under the management of J. H. Kinney, was one of the best in the hall and all of the men reported a brisk business, especially in the Hearsey line of tires.

A very cleverly gotten-up stand was that of Harry Dipple, the Indianapolis Harley-Davidson agent. The big gray fellows came in for a lot of attention and Dipple secured a large list of prospects. The Smith Motor Wheel was displayed in the Em-Ore Sporting Goods Company booth, and, as usual, the bicycle booster roused the interest of the visitors.

The Thompson Supply Co. exhibited the Emblem line of motorcycles and bicycles, Mr. Thompson himself taking charge of the booth. The little twin was easily the prominent feature of the Emblem line. The Indianapolis Plating Company greatly pleased the spectators by offering to plate, free of charge, in gold any pin which a visitor happened to be wearing.

Rambler bicycles are featured at the stand of Charles Koehring.

Interesting Accessory Exhibits

The H. & T. Electric Company, of Indianapolis, displayed repair parts for magnetos, coils and other electrical appliances. The Van Camp Hardware Co. had on exhibit a complete line of bicycles and sundries, Tom Thomas being in charge. The Consolidated Motorcycle Club and the F. A. M. shared the same booth, while the members of the Excelsior Club made their headquarters at the stand of the Merz Motor Co. **Motor Cycle Illustrated** made an effective showing, several live wires being in attendance. Copies of the paper were passed out to visitors, and the riders gathered at the stand to read the latest news of cycledom.

The most elaborate and largest booth in the hall was that of the G. H. Westing Co., which displayed a complete line of Indian motorcycles and bicycles. The Cygnet rear car, Atherton coaster brake and Great Western bicycles were also shown here. The complete list of out-of-town exhibitors was as follows:

Van Cleef Bros.—Rubber Cement, Dutch Brand, Polishes, tape and a thousand accesories.

The Davis Sewing Machine Company—Dayton motorcycle, Dayton motor bicycle.

The Cycle Motor Corporation—Motors to be attached to any bicycle.

Cygnet Rear Car Company—Rear car for motorcycles, for both commercial and passenger use.

Fentress-Newton Company—Tandem attachments and other accessories.

Stoll Manufacturing Company—Tandem attachments, accessories.

New Departure Manufacturing Company—Coaster brakes, etc.

Buffalo Metal Goods Company—Atherton coaster brakes, etc.

Wald Manufacturing Company—Carriers, tandems, etc.

Eclipse Coaster Brake Company—Coaster brakes.

OBERWEGNER HOLDS SHOW

TOLEDO, O.—A. R. Oberwegner, the pioneer motorcycle dealer and proprietor of the Oberwegner Motor Co., has been holding a motorcycle and bicycle show at his Jefferson avenue headquarters. Like all past shows held by Oberwegner, the present exhibition attracts large crowds.

Exhibit of H. L. Dipple, Harley-Davidson Representative, at Indianapolis Show

Neat Stand of Davis Sewing Machine Co., Featuring Dayton Line at Indianapolis

SURPLUS OF $10,305,679 FOR GOODRICH CO.

That Was the Record for 1915 as Compared With a Surplus of $3,371,927 in 1914—Net Sales for Year Aggregate $55,416,866

THE B. F. Goodrich Co. in 1915 showed a surplus of $10,305,679, equal to 17.17 per cent. on the $60,000,000 common stock, as against $3,371,927 in 1914, or equal to 5.62 per cent.

Net sales for the year ended December 31, 1915, aggregated $55,416,866.55, as compared with $41,764,008.66 for 1914, representing a gain of 32½ per cent. Net profits amounted to $12,265,679, compared with $5,440,427 in 1914.

The directors of the company voted, subject to the approval of the shareholders, to retire 7,000 shares of the preferred stock. This is in accordance with the provision of the company's charter, which provides for the retirement of a minimum of 9,000 shares of the preferred stock each year, beginning with July, 1914. As last year the company retired 2,000 shares in excess of the charter requirements, it was necessary to retire only 7,000 shares additional prior to July, 1916.

The company has added to its plant account during the year 1915 extensions and equipment costing $1,332,146.70, and still further additions are under way.

From the surplus at December 31, 1915, the directors voted to set aside $1,700,000 to increase the reserve for contingencies from $300,000 to $2,000,000, together with a sum of $1,200,000, as an initial amount, for a pension fund. The directors were led to appropriate this amount for contingencies on account of the general unsettled conditions existing throughout the world and the consequent desire to reinforce the fund available to meet unfavorable conditions should they arise.

ROGERS ISSUING BOOKLETS ON COMMERCIAL VANS

CHICAGO, Ill., Feb. 28.—In order to promote commercial sales, the Rogers Manufacturing Company, of 328 West Madison street, is getting out a series of booklets describing the different lines to which the Rogers sidecar models are adapted and showing a van suited to each type of service. The booklets also contain valuable information on selling the Rogers products.

This is the first step taken by a sidecar manufacturer in going after the commercial sales. The campaign to this end will be conducted with the thoroughness which has characterized similar procedures on the part of the big automobile manufacturers. Eastern dealers who desire copies of these booklets can obtain them from Irving Beck, Eastern Rogers representative, at 1493 Fifth avenue, New York, by mail or personal application.

GOOD FELLOWSHIP BANQUET IS WELL ATTENDED

DENVER, Colo.—The Western M. C. of this city held a good fellowship banquet at the Kaiserhof on the evening of February 22, at which 102 members and guests were present. The feature of the affair was a series of addresses on club matters and motorcycles in general, by President Wolff and Messrs. Haste and Coe, of the local branches of the United States and Goodyear tire companies. The trade was represented by the Hayutin Brothers and W. W. Whiting.

The results of the banquet were very gratifying to the club officials, and it is safe to say that the next banquet will be attended by double the number of enthusiasts. The club is planning a number of sociability runs for the season, as well as two endurance affairs. Road races between Denver and neighboring towns are also contemplated.

DEALERS ARE PLEASED BY MIDDLETOWN SHOW

MIDDLETOWN, N. Y.—The first annual automobile and motorcycle show here was held February 16-19, under the auspices of the Chamber of Commerce. The exhibits occupied two floors of the Armory Building. The motorcycle exhibits drew their full share of attention and the dealers report a fair list of prospects. Several sales were made.

EMPFIELD BACK IN INDIAN RANKS AGAIN

PHILADELPHIA, Pa.—John Empfield has signed up with George S. Maslen, local Indian distributor, to cover west Philadelphia in the Quaker City Indian interests. This is Empfield's second connection with Maslen, his first being in 1912 and lasting until 1914. His return to the local wigwam has been received with great satisfaction by all who know him, and big things are looked for from him this reason.

Empfield left Maslen's employ in 1914 to go with the Haverford Cycle Co., in this city. He was with this firm until recently, and as has been the case in all of his

John Empfield

business connection, made good with the big Excelsior representatives. He is well known on both board and dirt tracks around this city.

MILWAUKEE SHOW RINGS THE SUCCESS BELL

List of Exhibitors Was Representative and Business Returns Satisfactory—Annual Show Is Now Assured—The Strong Lineup of Displays and Those in Cha

MILWAUKEE, Wis., Feb. 29.—With an attendance that far exceeded the expectations of the Milwaukee Motorcycle Club, which promoted the Motor Cycle Accessory Show held at 175 Third street, Saturday and Sunday, Milwaukee's second annual exposition of motorcycles, bicycles and alllied products passed into history and netted the club's treasury a handsome sum.

Much of the credit for the success of the show must be given to George Melcher, a director of the club, who worked indefatigably in securing exhibitors, laying out space and arranging the decorations. Manager Melcher had the assistance of a show committee comprising Arthur Davidson, Arthur Eckes, Emil Harrisburger, Paul Bruess and Alex Landry, as well as the club's officers, Charles Grier, president; Hugh Sharp, secretary, and C. T. Martin, treasurer.

Exhibitors and Their Products

A brief summary of the exhibitors and their products on display follows:

Excelsior General Supplies Company, of Chicago—accessories, with General Manager Harry C. Curtis and salesmen George M. Roosevelt and Carl Ziegler in attendance.

Milwaukee Cycle Supply and Sales Company—giant twin and light twin Thors, Thor sidecar, Dayton Motor Bicycle, and the "Misco" line of bicycles and tires; J. J. Koehler, H. C. Liesman, W. E. Barnhart, Bernard McGinnis and William "Rosie" Jessrang in attendance.

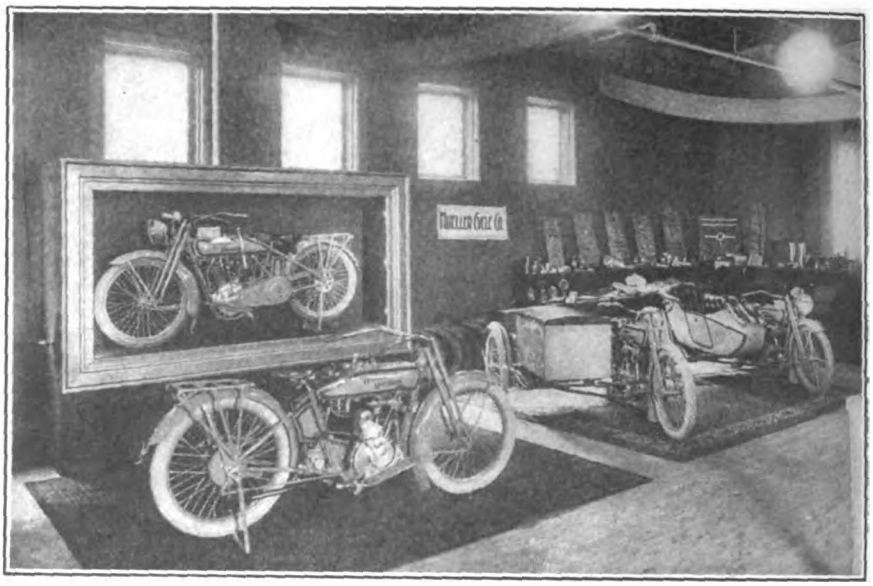
Cygnet Rear Car Company, of Buffalo—Cygnet Rear Car attached to a Harley-Davidson three-speed twin; H. L. Schwind in charge.

Simon Goerke—Pierce bicycles, sporting goods, Smith Motor Wheel, small show model of Pierce bicycle; Mr. Goerke in charge.

J. R. Lamberty—the Auxiliary Spark Gap; Mr. Lamberty in charge.

Cream City Trimming Company—sidecar top; Oscar Becker in charge.

Lippow Cycle Company—Merkel two-speed; electric two-speed Henderson, and Henderson sidecar; Miami Power Bicycle, enameling display and accessories; Leo Lippow and W. Henwood in attendance.



Harley-Davidson Exhibit of Mueller Cycle & Supply Co., with Framed Three-Speed

Badger State Motorcycle Company—Indian three-speed electric model with cradle-spring frame, three-speed rigid frame, Indian Maid sidecar, Indian lightweight, Cygnet Rear Car, eight-valve racing model, Indian bicycles; R. L. Clarke, Adolph Waech and William Jensen in attendance.

Emil Kasten—Excelsior three-speed electric, a short-coupled model, an Excelsior lightweight, an Excelsior sidecar; Emil Kasten, Charles Grier, Lewis Hadfield, Arthur Eckes, F. Wagner and Leslie Garrow in attendance.

At Smith Motor Wheel Booth

A. O. Smith Company—Smith Motor Wheel, featuring also front van and Jones & Noyes basket carrier, with Smith Motor Wheel attached; W. V. C. Jackson, general manager of Motor Wheel division; Frank Effinger, publicity manager; James Van Toor, assistant sales manager, and Otto Pupikofer in charge.

E. Miller—Cleveland lightweight, bicycles and accessories; E. Miller and Mrs. E. Miller in charge. Mr. Miller donated a Defiance casing, to be given away to the person guessing the nearest number to the correct attendance.

J. J. Dougherty Company—Ten Eyck portable air pumps; J. J. Dougherty and Abner Sylvester, sales manager, in attendance.

Cleveland Motorcycle Sales Company—Cleveland lightweight; C. E. Hauk, sales manager, and L. H. MacDonald, Wisconsin and Illinois representative, in attendance.

Julius Andrae & Sons Company—electrical supplies.

Pioneer Manufacturing Company—Ideal automatic stand, Pioneer two-seater and Pioneer starter; J. B. Christiansen in charge.

Gas Tank Recharging Company—lighting and welding; Fred Pagels in charge.

Bartles-Maguire Oil Company—oils; Henry Stoltz, manager and M. McGarry in attendance.

Big Harley-Davidson Stand

Mueller Cycle & Supply Company—Harley-Davidson three-speed electric model, three-speed regular Harley-Davidson side-van, Harley-Davidson sidecar, sidecar equipped with top, fire department sidecar outfit equipped with axes, pike pole and Pyrene extinguishers, an electric model framed in electric lights, a service and accessory display; Louis Peterik, manager of the Mueller Company; Wallace Wrede, Emil Hinz, William House, Bert Talbert, E. J. Mueller, assistant sales manager of the Harley-Davidson factory; Hiram Hascall, manager of accessory department; T. A. Miller, Eastern correspondent; Arthur Harrington, Wisconsin traveling representative, and Hugh Sharp, manager of the research department, in attendance.

Andrae & Sons—attendants, F. H.

THE MANAGER OF SPLITDORF PUBLICITY

NUMBER SEVEN IN A SERIES OF BIOGRAPHICAL SKETCHES ON TRADE LEADERS

It Was by a Somewhat Circuitous Route that D. R. Walls Arrived in the Motor Ignition Field, but Since Joining the Splitdorf Organization He Has Set a Humming Pace as a Business-Builder, Trade Analyst and Maker of Friends

TO those "in the know" in the cycle trades, he is now referred to as "Dixie Dan," is Dan R. Walls, advertising manager of the Splitdorf Electrical Company, manufacturers of the Dixie Twentieth Century magneto and Splitdorf spark plugs. "Dixie Dan" came by his new title during the Chicago Motorcycle Show, and there is no gainsaying the fact that it is as appropriate as it is euphonious. As the efficient manager of Splitdorf publicity, Walls, has earned a national popularity among thousands of folks identified with the motorcycle, automobile and other trades supplied by the big firm with which he is connected.

Started as Office Boy

"Dixie Dan" started in business as an office boy for a wholesale commission house. His duties were the usual ones, although he clearly remembers that his employers had a penchant for keeping him almost constantly occupied dusting office furniture. Dan became an expert at the task by the time he discovered that although good dusting is quite an art, it did not very well fit into his plans for making real progress in the world.

So he changed employers, and for two years served with another commission house on the Produce Exchange. His next employment, this time for five years, was in the Freight Department of the Pennsylvania Railroad, and then for nine years in the Audit Department of the American Express Company. Having in these years acquired a thorough-going knowledge of shipping, Walls accepted an offer from the Lehigh Valley Coal Company, assuming charge of its tonnage department. Not long afterwards he became cashier of Berry Bros., a large varnish house.

Became an Editor

At this stage Walls was still far removed from magnetos, spark plugs and advertising. Nothing in his previous experience would indicate that he was destined to head the Advertising Department of the Splitdorf company. But at this point he switched to a field of endeavor of an entirely different character than his previous occupations. He became assistant managing editor of *Outdoor News* and, upon the merger of that journal with *Recreation* and *Burr McIntosh's Monthly*, he began to handle the circulation of the combined publications. Then he became identified in a similar capacity, and also as purchasing agent, with *Hamptons' Magazine*.

Walls was first identified with C. F. Splitdorf Company, Inc., as assistant order clerk, later succeeding Mr. Hovey in the Advertising Department. When the new corporation, The Splitdorf Electrical Co., was organized, Walls was installed as advertising manager, which position he has held ever since. Not only does he manage the advertising of his company, but he is also constantly engaged in active co-operation with the Sales Department. Walls is a familiar figure at the shows and conventions, and "there is always something doing" when the Splitdorf advertising manager is in the neighborhood. He likes to supply good times for his fellow-trademen,

DAN R. WALLS

Friends Call Him "Dixie Dan," Because He Radiates Fat Sparks of Optimism

and he goes about the pleasant task like a veteran. The Splitdorf parties, at shows and conventions, personally conducted by Dan R. Walls, are always big parties, with plenty of fun for every participant.

Walls is married and has two daughters. Among his favorite hobbies are tennis, and in fact all outdoor sports. When at school, Dan distinguished himself as a sprinter, doing 100 yards in 10¾ seconds.

Every Inch an Optimist

There is no room for pessimism in the Walls' make-up. He is particularly optimistic in regard to the business possibilities of the motorcycle industry. Prospects for 1916 are unusually fine, he says, and he believes that the highly-developed motorcycle of today, with its passenger-carrying attachments, is certain to earn the popular approval which the industry so well deserves.

When recently interviewed by a member of the staff of **Motor Cycle Illustrated,** Walls called attention to the fact that the motor-driven two-wheeler was being used by all types of young men, to whom the motorcycle appeals as a sport even as attractive as automobiling. It is also to be noted that the Splitdorf Company is lined up with the most active accessory manufacturers in the efforts which the leading parts makers are putting forth to properly co-operate with the motorcycle manufacturers. Walls is in hearty sympathy with this movement and is in every way demonstrating his confidence in the industry's future.

Member of Fraternal Orders

Walls is a Mason, also a member of the Elks and the Royal Arcanum. He is a good fellow in every sense of the word, and the industry with which he is so actively identified can well be congratulated upon having men of his calibre of enthusiasm and energy working hard every day to help bring about the millenium for which the trade is aiming.

BOSTON DEALERS FORM ASSOCIATION

BOSTON, Mass., Feb. 29.—The Bay State Motorcycle Dealers' Association was organized at the Hotel Oxford on Monday, February 28. The following officers were elected: President, Ben Straube; secretary, W. F. Mann; treasurer, W. J. Walker. As the name indicates, the association will not be confined in its activities to Boston, but will include the entire eastern section of the State.

The formation of this organization is largely the result of the untiring efforts of the New England F. A. M. director, Jesse Campbell. It will not be entirely a trade proposition, for the dealers have already decided to lend their support to furthering the interests of the Bay State Motorcycle Club.

LIKES OUR DEALERS' SECTION

Editor: Please extend my subscription for another year. I don't believe I could get along without Motor Cycle Illustrated. The Dealers' section alone is worth the price you ask for Motor Cycle Illustrated.

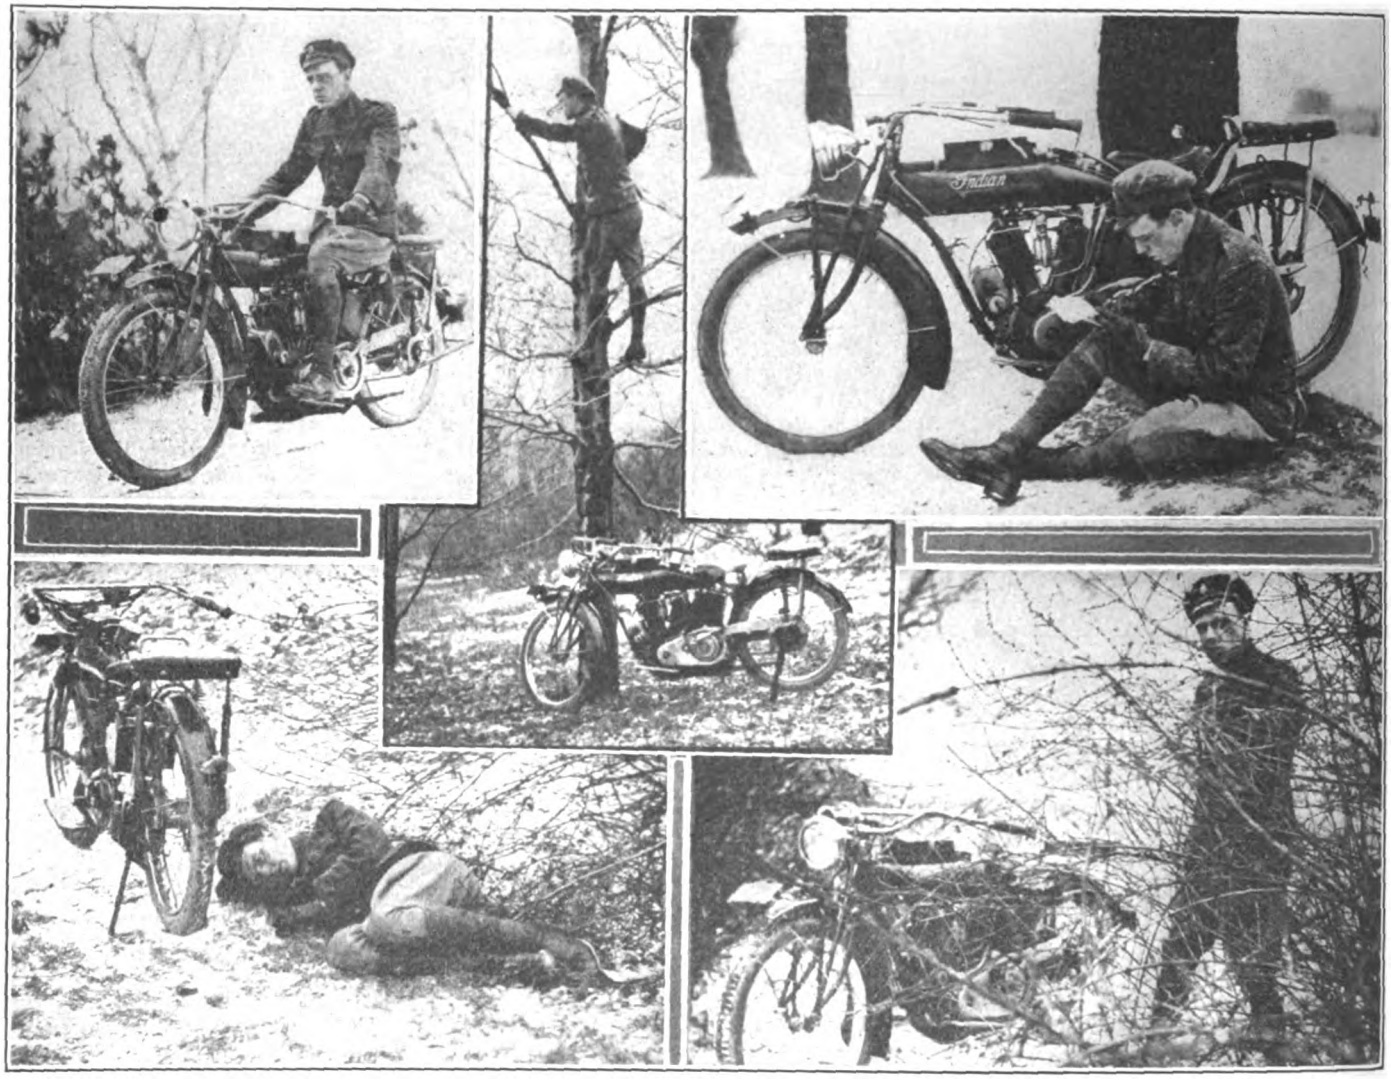
DISPATCH RIDER TELLS OF THE WAR STRAIN

Billy Robinson, of Boston, Who Was with Entente Allies on Western Battlefront Says Dropping Into Great Shell Holes Is a Regular Feature of Motorcycle Service



Some Views of Robinson Snapped in Various Locations on Western Battle Front, Near Ypres

BOSTON, Mass.—The terrific strain under which the motorcycle dispatch riders do their work in the war is pictured in the story of Billy Robinson, a Boston boy, who recently returned from service on the Western Front with the Entente Allies.

Robinson was on the firing line in the battle of Ypres, where he could watch an attack launched against the French and English lines fall back, leaving the ground between covered with dead and wounded. Part of Robinson's duties was to stand by and wait for dispatches on the progress of the fighting and then mount his machine and ride with them to headquarters at the rear.

The motorcycle riders were exposed to a constant shell fire and had to hurl themselves through the danger zone and trust to luck to come through with a whole neck. Great holes were torn in the surface of the roads by shells, of which the first notice to the rider was the sudden dropping of his machine into the depression and his being hoisted aloft for a brief space. Robinson was thrown off his machine in this manner so many times in one night that he confesses he wandered up and down the roads, blubbering like a child from pure fatigue and nervousness.

To show how much on edge they were from constant perils, Robinson relates the case of a rider named Lewis, who happened to be waiting at the motorcycle squad's headquarters when another man came up behind him and dropped a couple of empty gas tanks on the floor. They made such a clatter that Lewis jumped clear over a table and fainted dead away. At another time, a rider who tossed a couple of wounded soldiers his water bottle and rode away, was fired upon in return for his kindness.

Out of the corps of 31 riders with whom Robinson started on duty at Ypres only four were alive when he left.

ONE CLASS ONLY IN MICHIGAN STATE RUN

Committee in Charge Decides That All Entrants Must Ride Under Same Schedule in Big Three-Day Event

GRAND RAPIDS, Mich., Feb. 26.—As a result of the meeting of the committee in charge of the Michigan State F. A. M. Run last night, there will be no classes such as sidecars, lightweights, etc., in the big event. This decision was arrived at after much deliberation and after a careful consideration of the matter from every angle.

The committee states that the magnitude and original plans of the contest prohibit the inclusion of more than one class in it. This run, they state, is not to be confused with the conventional endurance contest and the amount of work necessary in staging it is enormous. More than one class of contestants would involve a considerable distraction from the main object of the affair, in addition to hampering present plans for furnishing complete results within several hours of the finish.

There is still another thing to be considered. The great pine barrens of Northern

Digitized by Google

Michigan are so utterly devoid of habitation that it is practically an impossibility to arrange controls and checks for more than one class of rider and one riding schedule.

Negotiations are under way with the United States War Department, in order to have military representatives observe the practicability of the modern motorcycle under abnormal conditions of service. The matter of granting the motion picture rights of the big contest to some film firm has not yet been decided upon, but several companies have been heard from so far. A flood of inquiries has been received concerning entries, conditions and the like and there is every evidence that the run will be a pronounced success.

FUNKE VICTOR AT MANHASSET BAY TRAPS

NEW YORK, Feb. 28.—Herbert F. L. Funke, president of the H. F. L. Funke Company, the Coventry chain, and Brown & Barlow carbureter representative, is as noted for his work at the traps as in the field of commercial endeavor, and yesterday saw him chalk up several more victories to his list with the shotgun. He was one of eight crack contestants at the Manhasset Bay Yacht Club shoot, and made a straight score of 25 clay birds, in spite of a gale blowing toward the gunners.

This score put him down as winner of the leg for the yearly cup. He also won the 100-bird handicap, making him high gun for the day. The oncoming wind made the targets "come back" at various angles, which made Mr. Funke's performance all the more commendable.

MOTOR IGNITION DEVICES FACTORY GROWING

DETROIT, Mich.—The Motor Ignition Devices Company, manufacturer of the "Midco" generator, which is used on Excelsior motorcycles, has completed the installation of considerable new machinery incidental to the recent expansion of the factory, and as a result the concern is in a position to increase its output.

The scope of the company's operations has been greatly broadened by the improvements and additions referred to, and the organization is on tip-toe in preparation for what promises to be a year of remarkable activity in the "Midco" plant.

KIMBALL-UPSON CO. SELLS HARLEY-DAVIDSONS

Well-Known Sacramento Firm Signs Up to Handle the Gray Fellows and Disposes of One a Day for the First Week

Attractive Show Window of Kimball-Upson Co., Featuring Harley-Davidson and Parts

SACRAMENTO, Cal., Feb. 25.—These are days of rapid developments in Pacific Coast trade circles, and one of the most interesting announcements to come through is that concerning the selection of the Kimball-Upson Co. to represent the Harley-Davidson in Sacramento. Notice to that effect has just been given by J. D. Fraser, manager of the San Francisco branch of the Appeal Manufacturing & Jobbing Co.

From the moment that the new models were introduced, the Pacific Coast trade has been making heavy demands upon the Harley-Davidson factory, and with the Kimball-Upson Co. added to the list of Harley-Davidson boosters in California there are indications that the shipping pace will have to be still further accelerated.

The main store of the Kimball-Upson Co. is at 609-611 K street and occupies four floors. The company operates a separate repair shop at 613-615 Oak avenue. Up-to-the-minute business methods prevail throughout both establishments, and the ability of the company to keep abreast of the rapidly-moving California field is indicated by the fact that seven new motorcycles and two sidecars were sold in the first week after the Kimball-Upson started its Harley-Davidson selling campaign.

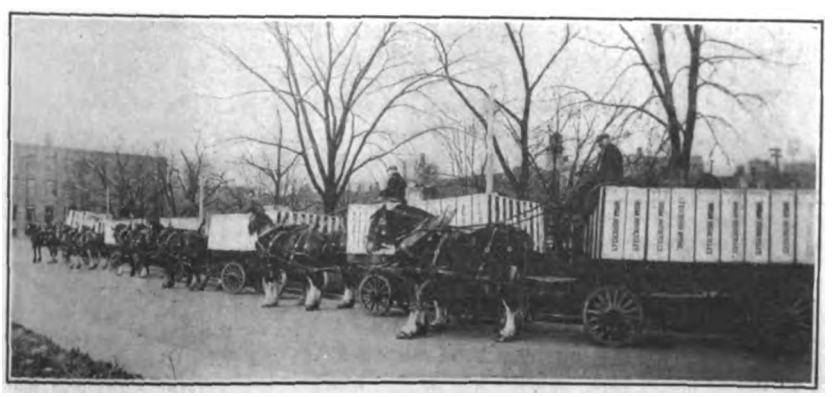
It should be noted that the price of $310 marked on the card above the saddle in the accompanying photograph is the Pacific Coast rate for the machine—$295 plus $15 freight to the Coast.

GOODYEAR DISTRIBUTES INSURANCE POLICIES

AKRON, O.—In accordance with the Goodyear Tire & Rubber Company's recent statement to employees, announcing the establishment of a group insurance plant, the firm has just made the first distribution of life insurance policies to the value of more than $2,000,000.

The plan provides for all employees in the factory, offices and in the company's numerous branches. Policies for $1,000 have just been issued to all male employees who are members of the Goodyear Relief Association in good standing, while to the female employees have been issued $500 policies. All women on the payroll are insured without membership in the relief association.

FOR USE OF CANADIAN GOVERNMENT AT HOME AND OVER-SEAS



Carload of Indian Twins Shipped from Toronto Branch of Hendee Mfg. Co.

WARNER IS PRESIDENT OF TIRE SOCIETY BODY

LOUISVILLE, Ky.—Roy E. Warner, Louisville representative for the Firestone Tire & Rubber Company, of Akron, O., has just returned from Indianapolis, Ind., where he was elected president of a new organization of tire men, the National Tire Service Association. Other officers are F. C. Dobson and B. O. Leftwich, both of St. Louis. The association is for the exchange of ideas along credit and service lines and for the co-operation of members in extending service, and its good effects are already visible.

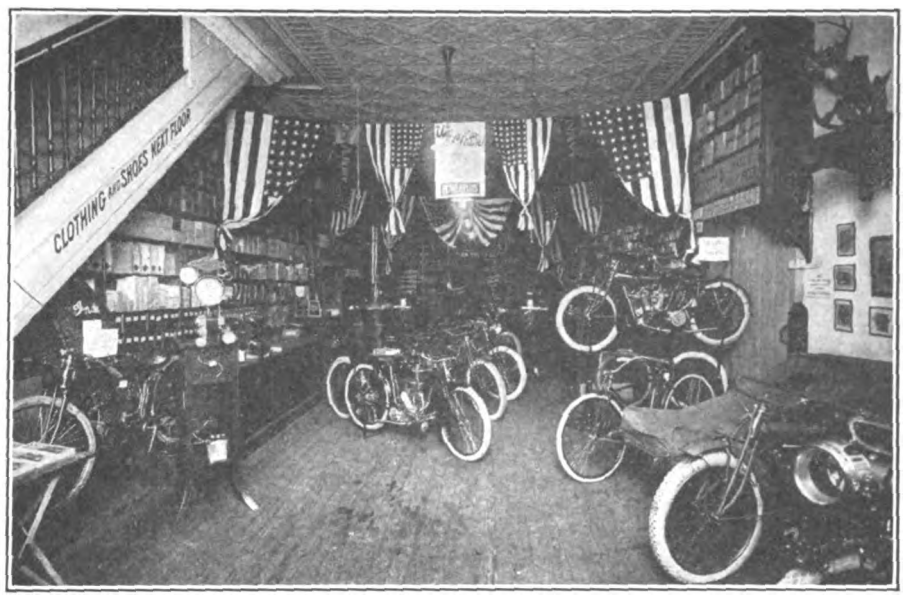
CROWDS PACK TEPEES ON INDIAN DAY

Chieftains from Far and Near Feast and Entertain Braves and Squaws on Date Set to Formally Present 1916 Hendee Models to Public—Many Sales Are Closed



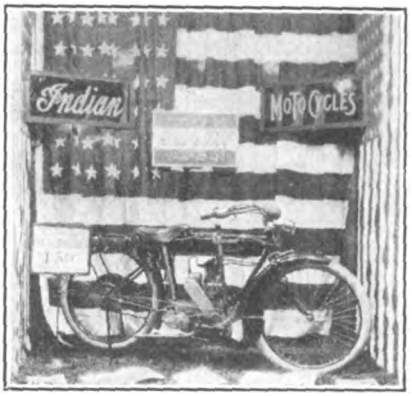
Interior of New York Sporting Goods Company's Motorcycle Department at 15 Warren Street, Decorated for Indian Day. Note Splitdorf Display at Left

NEW YORK, Feb. 29.—With special exhibits of Indian motorcycles and bicycles in the full line of both, and with the show-room decorated to suit the occasion, the New York Sporting Goods Co., metropolitan distributors, opened on February 22 to greet the large crowd of motorcycle enthusiasts which taxed the capacity of the store throughout the entire day. Souvenirs in the form of neat match boxes and handsomely bound route books were given to each caller, and all were pleased with the attention they received by the picked staff of the company.

The Featherweight attracted its full meed of notice, while there was a jam around the Indian-Colt machine gun outfit and the Indian Red Cross combination, two added attractions.

Another feature of the display was one of the Splitdorf Electrical Company's exhibition outfits, consisting of the magnetos used on the Indian Featherweight and on the Powerplus models, the Splitdorf sparkplug and the Mag-Dynamo. Michael Toepel, the veteran Splitdorf ignition expert, spent part of the day explaining the different apparatus and citing his experiences with each.

During the day, orders were taken for practically every Indian model, as well as



How Featherweight Was Shown

for Indian Maid sidecars, Rogers sidecars and Cygnet Rear Cars. The Indian Day spirit is being continued through this week by the company, and a great increase in business from this celebration is expected.

MASLEN HAS MOVIES FOR RECORD CROWD

PHILADELPHIA, Pa.—Indian Day at George S. Maslen's agency was a greater success than in 1915. Preparations were made for 2,500 visitors, but more than double that number attended the celebration. In the middle of the afternoon a hurry-call had to be sent for more refreshments to the caterer.

The first floor was decorated with palms and boxwood and there were baskets of flowers on the showcases. Cutaway parts of the Powerplus motor were arranged on the counter, while the Featherweight two-stroke occupied a prominent position on the floor. The second floor had a model of each machine on view, each having a different equipment. Along one wall was a carload of new Indians, the last carload in from the factory. The "eats" were arranged at the rear. A moving picture theatre was arranged at the front of the room and pictures of the Indian factory, Baker's transcontinental run and a number of comic reels were shown. On the third floor were used machines.

In Maslen's office the ladies assembled in the evening and talked over sidecars and other things. Each lady received a silver Indian head and a bouquet of jonquils as a souvenir, while the men visitors got an Indian match case. Maslen was assisted by Bob Robertson, Hendee traveller, and John Empfield, the new West Philadelphia agent. The entire office and sales force were on hand and all were tired at midnight, when the day was officially over. Maslen netted 12 motorcycle sales, as well as an order for immediate delivery of one sidecar as the result of the celebration.

SWENSON GETS 30 SALES AS DAY'S RETURNS

PROVIDENCE, R. I.—"Indian Day" was the greatest success that B. A. Swenson, the Indian man, had ever had, according to the chieftain's own statement. Between 500 and 600 visitors congregated in his place on Broad street during the day and the last man did not leave till nearly midnight. Swenson and his aides were dog-tired when the day was over, but decidedly jubilant.

"Never have I been so satisfied with the outcome of Indian Day as this year," said B. A. "It went way beyond expectations. I sold six machines on that day and six more went a few days afterward. The great venture will net me about 30 sales—sales which I can truthfully say followed as a result of the day."

Swenson had a caterer on hand on Indian Day and served refreshments from 9:30 a. m. until 11:30 p. m. He gave away souvenirs, and so large was the crowd that he ran short and dispatched special messengers for more. It was an enthusiastic gathering and many of the fair sex who were present said that it was successful from their viewpoint.

2,000 VISIT HANSON'S DECORATED TEPEE

KANSAS CITY, Mo.—More than 2,000 visitors crowded the tepee of Charles Hanson on February 22, Indian Day. The store was beautifully decorated with American flags and well-worded advertisements on the Indian. The entire force of the establishment took part in the exhibit and were kept busy explaining things to the numerous visitors. The machines were arranged in the front of the store to get as much space as possible for the guests.

Souvenirs in the form of match boxes were presented, and late in the afternoon refreshments were served. A feature of the day was the visit of the entire police force on their machines.

NEW HAVEN RIDERS CROWD STURGES' STORE

NEW HAVEN, Conn.—Shelton Sturges, tepee proprietor in this city, welcomed nearly 200 motorcyclists on Indian Day. The streets of New Haven were masses of ice and snow, so few came on their machines. The exceptions were eleven who rode in at various times, only three of these using sidecar outfits.

Sturges had several Powerplus models on display, one having full electric equipment. The new Powerplus motor was the

centre of interest to all visitors, and Sturges has lined up a number of prospects as soon as the weather clears up.

DEMONSTRATIONS ARE PART OF GOERKE'S DISPLAY

NEWARK, N. J.—Walter Goerke, veteran rider and dealer, had his third annual Indian Day celebration, and is glad that it is over. From morning till night his place on Washington street was crowded with Newark and out-of-town riders and prospects, and Goerke and his staff were pretty tired when the last visitor left the place, late at night. Souvenirs in the form of Indian match boxes were presented to all comers.

Goerke had the Featherweight and a Powerplus sidecar combination outside, and demonstrations were given by both at regular intervals. Although the streets were a mass of ice and snow, the little two-stoker never threw a rider, which caused the crowd to look with respect at the newcomer. Goerke's books showed the effects of the day in a long list of prospects and orders.

BECKWITH USES MODEL AT SMOKER LECTURE

HARTFORD, Conn.—R. A. Beckwith, proprietor of the Beckwith Motor Sales Co., had an original scheme for his smoker for the night of Indian Day. He arranged his store with a Powerplus Indian, in front of which was a mechanically-operated model, showing the workings of eight different types of gas and gasoline engines. Beckwith used this to lecture on the internal combustion engine in general and the Indian in particular when he got his visitors seated and provided with cob-pipes, cigarettes and souvenirs.
